Mr. SATTERFIELD. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 5029) to amend title 38 of the United States Code in order to authorize contracts with the Republic of the Philippines for the provision of hospital care and medical services to Commonwealth Army veterans and new Philippine Scouts for service-connected disabilities; to authorize the continued maintenance of a Veterans' Administration office in the Republic of the Philippines; and for other purposes, with Senate amendments thereto, and concur in the Senate amendments with amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Veterans' Programs Extension Act of 1978".

TITLE I—EXTENSION OF CERTAIN PROGRAMS IN THE REPUBLIC OF THE PHILIPPINES

SEC. 101. Section 230(b) of title 38, United States Code, is amended by striking out "June 30, 1978." and inserting in lieu thereof "September 30, 1981.".

SEC. 102. (a) Section 624(c) of title 38, United States Code, is amended by striking out "Veterans Memorial Hospital" and inserting in lieu thereof "Veterans Memorial Medical Center".

(b) Section 632 of such title is amended by—

(1) striking out "Veterans Memorial Hospital" each time it appears and inserting in lieu thereof "Veterans Memorial Medical Center";

(2) striking out "June 30, 1978," and inserting in lieu thereof "September 30, 1983," in the material preceding clause (1) of subsection (a);

(3) inserting "furnished prior to October 1, 1979," after "care" the first time it appears in clause (2) of subsection (a);

(4) inserting before the semicolon at the end of clause (3) of subsection (a) "and paid or to be paid for by the United States under this subsection";

(5) inserting before the semicolon at the end of clause (4) of subsection (a) a comma and "except that, in cases in which hospitalization was not primarily for a service-connected disability, the United States may not provide for such payments for nursing home care furnished after September 30, 1979";

(6) striking out "July 1, 1978," in subsection (b) and inserting in lieu thereof "October 1, 1983,"; and

(7) striking out "five years" and "June 30, 1978" in the material preceding clause (1) of subsection (d) and inserting in lieu thereof "period" and "September 30, 1980", respectively.

TITLE II—BENEFITS PAYABLE TO PERSONS RESIDING OUTSIDE THE UNITED STATES

SEC. 201. Paragraph (4) of section 101 of title 38, United States Code, is amended by—

(1) inserting "(A)" before "The" and redesignating clauses (A), (B), and (C) within such paragraph as clauses (i), (ii), and (iii), respectively; and

(2) inserting at the end thereof the following new subparagraph:

"(B) For purposes of subparagraph (A) of this paragraph, in the case of an adoption under the laws of any country other than the United States (including the possessions, territories, and Commonwealths of the United States)—

"(i) a person residing outside any of the States during the lifetime of a veteran (including for purposes of this subparagraph a Commonwealth Army veteran or 'New' Philippine Scout, as defined in section 1766 of this title) shall not be considered a legally adopted child of such veteran unless such person—

"(I) was less than eighteen years of age at the time of adoption;

"(II) is receiving one-half or more of such person's annual support from such veteran;

"(III) is not in the custody of such person's natural parent, unless such natural parent is such veteran's spouse; and

"(IV) is residing with such veteran (or in the case of divorce following adoption, with the divorced spouse who is also an adoptive or natural parent) except for periods during which such person is residing apart from such veteran (or such divorced spouse) for purposes of full-time attendance at an educational institution or during which such person or such veteran (or such divorced spouse) is confined in a hospital, nursing home, other health-care facility, or other institution; and

"(ii) a person shall not be considered to have been a legally adopted child of a veteran as of the date of such veteran's death and thereafter unless—

"(I) at any time within the one-year period immediately preceding such veteran's death, such veteran was entitled to and was receiving a dependent's allowance or similar monetary benefit under this title for such person; or

"(II) for a period of at least one year prior to such veteran's death, such person met the requirements of clause (i) of this subparagraph.".

SEC. 202. Section 107 of title 38, United States Code, is amended by inserting at the end thereof the following new subsection:

"(c) Notwithstanding the provisions of subsections (a) and (b) of this section and, notwithstanding the provisions of subchapter VII of chapter 35 of this title, no benefits under chapter 11, 13, or 35 of this title shall be paid to any person by virtue of the provisions of either such subsection or such subchapter on the basis of a claim by such person for initial eligibility for any such

benefits filed on or after October 1, 1979, if, on the basis of prior claims filed by such person, such initial eligibility had been disallowed more than once.".

SEC. 203. (a) The Administrator of Veterans' Affairs shall carry out a comprehensive study of benefits payable under the provisions of title 38, United States Code, to persons who reside outside the fifty States and the District of Columbia. The Administrator shall include in such study—

(1) an analysis of the issues involved in the payment of such benefits to persons who reside outside the fifty States and the District of Columbia, together with analyses of such aspects of the economy of each foreign country and each territory, possession, and Commonwealth of the United States in which a substantial number of persons receiving such benefits reside as are relevant to such issues (such as the rate of inflation, the standard of living, and health care, educational, housing, and burial costs);

(2) an analysis of the issues involved in the payment of such benefits as the result of adoptions under laws other than the laws of any of the fifty States or the District of Columbia;

(3) an analysis of the amounts and method of payment of benefits payable to persons entitled, by virtue of sections 107 and 1765 of such title, to benefits under chapters 11, 13, and 35 of such title;

(4) estimates of the present and future costs of paying monetary benefits under such title to persons described in clauses (1) and (3) of this subsection;

(5) an evaluation of the desirability of continuing to maintain the Veterans' Administration Regional Office in the Republic of the Philippines, taking into consideration (A) the current and expected future workloads of such office, (B) the estimated cost in fiscal years 1981 through 1985 of continuing to maintain such regional office, (C) the feasibility and desirability of transferring appropriate functions of such regional office to the United States Embassy in the Republic of the Philippines, and (D) a provisional plan, which the Administrator shall develop, for the closing of such office and so transferring such functions, together with cost estimates for fiscal years 1981 through 1985 for the implementation of such plan assuming that such office is closed prior to October 1, 1981; and

(6) an evaluation of the effects of the amendments to such title made by sections 201 and 202 of this Act.

(b) Not later than February 1, 1980, the Administrator shall report to the Congress and the President on the results of such study together with the Administrator's recommendations for resolving the issues to be analyzed and evaluated in such study.

TITLE III—HEALTH CARE AMENDMENTS

SEC. 301. Subclause (v) of clause (C) of section 601(4) of title 38, United States Code, is amended to read as follows: "(v) hospital care, and medical services which will obviate the need for hospital admission, for veterans in a State not contiguous to the forty-eight contiguous States, except that the annually determined hospital patient load and incidence of the provision of medical services to veterans hospitalized or treated at Veterans' Administration expense in Government and private facilities in each such noncontiguous State (except in the Commonwealth of Puerto Rico and in the Virgin Islands) shall be consistent with the patient load or incidence of the provision of medical services for veterans hospitalized or treated by the Veterans' Administration within the forty-eight contiguous States, but authority under this subclause shall expire on December 31, 1980, in the case of each noncontiguous State (except Alaska and Hawaii).".

SEC. 302. Clause (3) of section 612(i) of title 38, United States Code, is amended by inserting "(including the conduct of an examination to determine eligbility for service-connected compensation under chapter 11 of this title)" before the period.

SEC. 303. (a) Subchapter IV of chapter 17 of title 38, United States Code, is amended by redesignating section 634 as 635 and inserting after section 633 the following new section:

"§ 634. Hospital and nursing home care and medical services in the United States

"The Administrator, within the limits of Veterans' Administration facilities, may furnish to a Commonwealth Army veteran or new Philippine Scout hospital and nursing home care and medical services for the treatment of a service-connected disability of such veteran or Scout.".

(b) The table of sections at the beginning of Chapter 17 of such title is amended by striking out

"634. Definitions."

and inserting in lieu thereof

"634. Hospital and nursing home care and medical services in the United States.
"635. Definitions.".

SEC. 304. (a) Not later than October 1, 1979, the Administrator of Veterans' Affairs shall submit to the Congress and the President a report on the furnishing by the Veterans' Administration of hospital care and medical services in the Commonwealth of Puerto Rico and in the Virgin Islands. The Administrator shall include in such report—

(1) a comprehensive assessment of the health-care needs of veterans in the Commonwealth of Puerto Rico and in the Virgin Islands;

(2) a detailed report on the hospital care and medical services which were furnished or are planned to be furnished to veterans there during fiscal years 1975 through 1981, with breakdowns according to the numbers of veterans being treated, the facilities at which such care and services are furnished, and the extent to which such care and services are furnished for the treatment of service-connected disabilities and to veterans with service-connected disabilities rated as 50 per centum or more; and

(3) recommendations as to how such health-care needs can best be addressed within the existing authority of the Veterans' Administration and what additional authority, if any, is necessary and desirable to meet such needs.

Recommendations under clause (3) of this subsection shall be made only after taking into consideration—

(A) the extent of poverty in the Commonwealth of Puerto Rico and in the Virgin Islands;

(B) alternative sources of health-care services that would be available to such veterans being furnished such services there by the Veterans' Administration if the services so furnished by the Veterans' Administration for non-service-connected disabilities were substantially reduced;

(C) the equitable distribution of Veterans' Administration health-care resources; and

(D) the priority attaching to the care and treatment of service-connected disabilities.

(b) Not later than March 1, 1979, and annually thereafter, the Chief Medical Director of the Veterans' Administration shall submit to the appropriate committees of the Congress, through the Administrator of Veterans' Affairs, a full report on the implementation of section 601(4)(C)(v) of title 38, United States Code (as amended by section 301 of this Act), including the numbers of veterans provided contract treatment (and the average cost and duration thereof) in each State (as defined in section 101(20) of title 38, United States Code) in the categories described in the following provisions of such title: sections 601(4)(C)(v) (as so amended), 610(a), 612(a), 612(f)(1)(A), 612(f)(1)(B), 612(f)(2), and 612(g).

SEC. 305. Section 6(a)(2) of the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 (Public Law 94–123; 89 Stat. 669), as amended, is amended by striking out "September 30, 1978." and inserting in lieu thereof "September 30, 1979.".

SEC. 306. Section 5082 of title 38, United States Code, is amended by inserting at the end thereof the following new subsection:

"(c) There is further authorized to be appropriated for fiscal year 1979 for carrying out the programs authorized under this chapter such sums as may be necessary (1) to make to institutions with which the Administrator has entered into agreements under subchapter I of this chapter supplemental grants for which the Administrator had, prior to May 1, 1978, approved applications from such institutions, and (2) to meet fully the commitments made by the Administrator prior to May 1, 1978, for grants and applications approved under authority of this subchapter and subchapters III and IV of this chapter, except that no funds appropriated under this subsection may be used for grants and applications approved under this subchapter and such subchapters III and IV until the full amounts for which applications had been so approved have been obligated under such subchapter I.".

SEC. 307. Section 611 of title 38, United States Code, is amended by inserting at the end thereof the following new subsection:

"(c) The Administrator may, in the discretion of the Administrator, enter into a contract with any organization recognized under section 3402 of this title to furnish, on a reimbursable basis, as prescribed by the administrator, emergency medical services at a national convention of such organization to individuals attending such convention except that reimbursement shall not be required to the extent that eligible veterans receiving such services would otherwise be eligible for medical services from the Veterans' Administration under this chapter.".

TITLE IV—VETERANS READJUSTMENT APPOINTMENTS AND PENSION REFORM IMPLEMENTATION

SEC. 401. Section 2014 of title 38, United States Code, is amended by—

(1) amending subsection (b) to read as follows:

"(b) To further this policy, veterans of the Vietnam era shall be eligible, under the terms and conditions specified in Executive Order Numbered 11521 (March 26, 1970) and in accordance with regulations which the Civil Service Commission (or successor authority) shall prescribe, for veterans readjustment appointments, and subsequent career-conditional appointments, except that such an appointment (1) may be made in the case of any veteran of the Vietnam era up to and including the level GS–7 or its equivalent, (2) may be made in the case of any veteran of the Vietnam era who is a disabled veteran without limitation as to completion of more than fourteen years of education, and (3) may be made at any time prior to October 1, 1981.";

(2) striking out all after "subsection (b) of this section and" in subsection (d) and inserting in lieu thereof a comma and "with breakdowns for disabled and other veterans, the following information: The number and grade levels of such appointments; the number of appointees converted or terminated, with a breakdown according to categories of causes for termination; the number of such terminations initiated by the department, agency, or instrumentality and by the veteran; descriptions of the education and training programs in which appointees under subsection (b) of this section are participating; and the results of the plans required under subsection (c) of this section."; and

(3) inserting "subsections (a) and (c) of" after "in" in subsection (f).

SEC. 402. For the purpose of enabling the Administrator of Veterans' Affairs to carry out, with maximum efficiency, during the first one-year period following the date of its enactment, any Act enacted after June 1, 1978, with an effective date prior to October 1, 1979, establishing a new program of benefits under chapter 15 of title 38, United States Code, including the conduct of a program of public information designed to advise fully and fairly all persons who may be affected by the provisions of such Act of its implications for them, without impairing the efficiency of the Veterans' Administration in carrying out its other programs and responsibilities, there is authorized to be appropriated $5,000,000 for fiscal year 1979.

SEC. 403. (a) For the purposes of carrying out the studies required under sections 203 and 304 of this Act, there is authorized to be appropriated $350,000 for fiscal year 1979.

(b) Sums appropriated pursuant to subsection (a) of this section shall remain available until expended.

Amend the title so as to read: "An Act to amend title 3 of the United States Code to authorize contracts with the Republic of the Philippines for the provision of health-care services for Commonwealth Army veterans and new Philippine Scouts, to authorize the continued maintenance of a Veterans' Administration office in the Republic of the Philippines, to impose new requirements with respect to claims by certain persons residing outside the United States, to modify the circumstances under which contract hospital care and medical services may be furnished outside of the contiguous States; to authorize the provision of care in the United States for the treatment of the service-connected disabilities of certain Filipino veterans, to increase the authorization of appropriations for grants to assist certain health manpower training institutions, and to extend and improve the program of veterans readjustment appointments in the Federal Government; to extend the Veterans' Administration authority in Public Law 94–123, as amended, to enter into special-pay agreements with physicians and dentists; to require certain studies to be undertaken; and for other purposes.".

Mr. SATTERFIELD (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The Clerk read the House amendments to the Senate amendments, as follows:

In lieu of the matter proposed to be inserted by the amendment of the Senate to the text of the bill, insert the following:

That this Act may be cited as the "Veterans' Administration Programs Extension Act of 1978".

SEC. 2. Section 230(b) of title 38, United States Code, relating to the Veterans' Administration office in the Republic of the Philippines, is amended by striking out "June 30, 1978" and inserting in lieu thereof "September 30, 1981".

SEC. 3. (a) Section 624(c) of title 38, United States Code, relating to the veterans medical center in the Republic of the Philippines, is amended by striking out "Veterans Memorial Hospital" and inserting in lieu thereof "Veterans Memorial Medical Center".

(b) Section 632 of such title is amended—

(1) by striking out "Veterans Memorial Hospital" each place it appears in such section and inserting in lieu thereof in each such place "Veterans Memorial Medical Center";

(2) in the matter in subsection (a) preceding clause (1)—

(A) by striking out "a contract" and inserting in lieu thereof "contracts"; and

(B) by striking out "June 30, 1978" and inserting in lieu thereof "September 30, 1981";

(3) by striking out "July 1, 1978" in subsection (b) and inserting in lieu thereof "October 1, 1981"; and

(4) by striking out "during the five years beginning July 1, 1973, and ending June 30, 1978—" in subsection (d) and inserting in lieu thereof "occurring during the period beginning July 1, 1973, and ending September 30, 1981—".

SEC. 4. Section 6(a)(2) of the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 (Public Law 94–123; 89 Stat. 669), relating to the expiration of authority to enter into special pay agreements, is amended by striking out "September 30, 1978" and inserting in lieu thereof "September 30, 1981".

SEC. 5. Section 601(4)(C) of title 38, United States Code, relating to contract-care medical facilities, is amended by striking out "(v) hospital care" and all that follows through "December 31, 1978" and inserting in lieu thereof "(v) hospital care, or medical services that will obviate the need for hospital admission, for veterans in a State not contiguous to the forty-eight contiguous States, except that the annually determined hospital patient load and incidence of the provision of medical services to veterans hospitalized or treated at the expense of the Veterans' Administration in Government and private facilities in each such noncontiguous State shall be consistent with the patient load or incidence of the provision of medical services for veterans hospitalized or treated by the Veterans' Administration within the forty-eight contiguous States, but the authority of the Administrator under this subclause (except with respect to Alaska and Hawaii) shall expire on December 31, 1981, and until such date the Administrator may, if necessary to prevent hardship, waive the applicability to the Commonwealth of Puerto Rico and to the Virgin Islands of the restrictions in this subclause with respect to hospital patient loads and incidence of provision of medical services".

SEC. 6. (a) Section 2012(b) of title 38, United States Code, relating to veterans' employment emphasis under Federal contracts, is amended by inserting after "veterans" a comma and "or if any veteran who is entitled to disability compensation under the laws administered by the Veterans' Administration believes that any such contractor has discriminated against such veteran because such veteran is a handicapped individual within the meaning of section 7(6) of the Rehabilitation Act of 1973 (29 U.S.C. 706(6))".

(b)(1) Subsection (b) of section 2014 of such title, relating to veterans readjustment appointments within the Federal Government, is amended to read as follows:

"(b)(1) To further the policy stated in subsection (a) of this section, veterans of the Vietnam era shall be eligible, in accordance with regulations which the Civil Service Commission shall prescribe, for veterans readjustment appointments, and for subsequent career-conditional appointments, under the terms and conditions specified in Executive Order Numbered 11521 (March 26, 1970), except that—

"(A) such an appointment may be made up to and including the level GS–7 or its equivalent;

"(B) a veteran of the Vietnam era shall be eligible for such an appointment without any time limitation with respect to eligibility for such an appointment; and

"(C) a veteran of the Vietnam era who is entitled to disability compensation under the laws administered by the Veterans' Administration or whose discharge or release from active duty was for a disability incurred or aggravated in line of duty shall be eligible for such an appointment without regard to the number of years of education completed by such veteran.

"(2) In this subsection, the term 'veteran of the Vietnam era' has the meaning given such term in section 2011(2)(A) of this title.

"(3) No veterans readjustment appointment may be made under authority of this subsection after September 30, 1981.".

(2) Subsection (d) of such section is amended (A) by striking out "thereof" in the second sentence and inserting in lieu thereof "of this section", and (B) by adding at the end of such subsection the following new sentence: "Each report under the preceding sentence shall include in the specification of the use and extent of appointments made under subsection (b) of this section the following information (shown for all veterans and separately for veterans described in subsection (b)(1)(C) of this section and other veterans):

"(1) The number of appointments made under such subsection since the last such report and the grade levels in which such appointments were made.

"(2) The number of individuals receiving appointments under such subsection whose appointments were converted to career conditional appointments, or whose employment under such an appointment has terminated, since the last such report, together with a complete listing of categories of causes of appointment terminations and the number of such individuals whose employment has terminated falling into each such category.

"(3) The number of such terminations since the last such report that were initiated by the department, agency, or instrumentality involved and the number of such terminations since the last such report that were initiated by the individual involved.

"(4) A description of the education and training programs in which individuals appointed under such subsection are participating at the time of such report.".

(3) Subsection (f) of such section is amended by inserting "subsection (a) of" after "as used in".

SEC. 7. Section 5082 of title 38, United States Code, relating to authorizations of appropriations, is amended by adding at the end thereof the following new subsection:

"(c) There is authorized to be appropriated for fiscal year 1979 to carry out the programs authorized under this chapter such sums as may be necessary (1) to make to institutions with which the Administrator has entered into agreements under subchapter I of this chapter supplemental grants for which the Administrator had, before May 1, 1978, approved applications from such institutions, and (2) to meet fully the commitments made by the Administrator before May 1, 1978, for grants and applications approved under authority of this subchapter and subchapters III and IV of this chapter, except that no funds appropriated under this subsection may be used for grants and applications approved under this subchapter and such subchapters III and IV until the full amounts for which applications had been so approved have been obligated under such subchapter I.".

SEC. 8. (a) Not later than February 1, 1980, the Administrator of Veterans' Affairs shall submit a report to the Congress and to the President on the furnishing by the Veterans' Administration of hospital care and medical services in the Commonwealth of Puerto Rico and in the Virgin Islands. The Administrator shall include in such report—

(1) a comprehensive assessment of the health-care needs of veterans in the Commonwealth of Puerto Rico and in the Virgin Islands;

(2) a detailed report on the hospital care and medical services furnished or to be furnished to such veterans during fiscal years 1975 through 1981, with information in such report shown with respect to the number of veterans treated or to be treated, the facilities at which such care and services are furnished or to be furnished, and the extent to which such care and services are furnished or are to be furnished for the treatment of veterans for the service-connected disabilities of any degree and of veterans with service-connected disabilities rated at 50 per centum or more; and

(3) recommendations as to how the health-care needs of such veterans can best be addressed within the existing authority of the Administrator of Veterans' Affairs and what additional authority, if any, is necessary and desirable to meet such needs.

(b) In making recommendations under subsection (a)(3), the Administrator shall take into consideration—

(1) the state of the economy in the Commonwealth of Puerto Rico and in the Virgin Islands;

(2) alternative sources of health-care services that would be available to veterans in the Commonwealth of Puerto Rico and in the Virgin Islands if the health-care services furnished by the Veterans' Administration for non-service-connected disabilities were substantially reduced;

(3) the desirability of equitable distribution of Veterans' Administration health-care resources; and

(4) the higher priority established by law for the care and treatment of service-connected disabilities.

SEC. 9. There is authorized to be appropriated for fiscal year 1979 the sum of $5,000,000 to enable the Administrator of Veterans' Affairs to implement the Veterans' and Survivors' Pension Improvement Act of 1978. Amounts appropriated pursuant to the preceding sentence shall remain available during the one-year period beginning on the date of the enactment of such Act and may be used to carry out a program of public information and advertising designed to advise fully all persons who may be affected by the provisions of such Act of the provisions of such Act, including the manner in which such Act may affect them and any rights they may have under such Act.

In lieu of the amendment of the Senate to the title of the bill, amend the title so as to read: "An Act to amend title 38, United States Code, to extend certain expiring programs of the Veterans' Administration, to extend and improve the program of veterans readjustment appointments in the Federal Government, and for other purposes.".

Mr. SATTERFIELD (during the reading). Mr. Speaker, I ask unanimous consent that the House amendments to the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Virginia?

Mr. HAMMERSCHMIDT. Reserving the right to object, Mr. Speaker, and I do not plan to object, in fact, I rise in support of this amendment. Each of the provisions in this bill are essential to the well-being of a large segment of our veteran population. An objection by a Member to this legislation would be tantamount to depriving vital services to large numbers of veterans.

At the same time, however, I would like to register my disappointment in this amendment in its present form. Mr. Speaker, this amendment contains only the most absolutely essential portion of a very comprehensive bill which the Veterans' Affairs Committees of both the House and Senate spent many weeks developing. The version originally intended for this body's vote included a provision that would have given mental and psychological readjustment counseling to Vietnam-era veterans. It had another provision establishing a pilot program for treatment of veterans with alcohol or drug problems, and another pilot program for preventive health care for certain disabled veterans. It contained another very important provision that would have given the Veterans' Affairs Committee jurisdiction to approve, and thus control, certain costly construction programs.

It appears that these provisions were eliminated because of the objection of one individual member of the majority party to the section relating to construction. In order to prevent an almost certain objection because of jurisdictional concerns as to which committee should have this function, the veterans of our country have been deprived of an important protection. I deeply regret this, Mr. Speaker, and I wish to record my strong disappointment in this matter even though I do endorse the provisions now before us.

This amendment, Mr. Speaker, will extend for 3 additional years the authority of the Administrator of Veterans' Affairs to enter into agreements with physicians and dentists to provide incentive pay in addition to basic salary for service in the Veterans Administration's Department of Medicine and Surgery. Members will recall that Public Law 94–123 enacted in 1975 authorized a 1-year period during which the Administrator could enter into agreements to provide incentive or bonus pay for physicians and dentists. It was then anticipated that the administration would recommend legislation to provide an equitable and uniform pay system for all physicians and dentists employed by the Federal Government. Despite two extensions of the authority, the legislative recommendations of the administration on this subject have not yet been received.

We are hopeful that the Congress itself will be able to work out a permanent solution to this problem prior to the expiration of the 3-year extension of the temporary arrangement authorized by this measure.

If the Veterans' Administration hospital system is to continue recruiting and retaining qualified physicians and dentists, it is essential that the levels of pay be increased.

Also scheduled to expire this year is the authority of the Veterans' Administration to operate a regional office in the Republic of the Philippines and a modest grant program which assists the Philippine Government in operating a veterans' memorial hospital.

Mr. Speaker, this amendment will extend for 3 years both the authority to continue a Veterans' Administration regional office in the Republic of the Philippines as well as a 3-year extension of the annual grant of $2.1 million to operate the hospital.

The distinguished chairman of the Subcommittee on Medical Facilities and Benefits and I visited this facility and the regional office early this year. I can assure Members that the hospital provides a high level of quality care and the need for financial assistance to this hospital still exists.

In addition, the tremendous number of veterans and widows with Veterans' Administration claims, either pending or in an active status, dictates the need for the continued operation of the regional office.

Under existing law, the President may appoint certain Vietnam-era veterans to positions at grade 5 levels in the Federal Government without regard to civil service laws and regulations. Scheduled to expire this year, this amendment will extend the President's authority for 3 additional years and increase the authority to cover positions at the grade 7 level. Service-connected disabled veterans are given special consideration under this provision.

Another provision of current law scheduled to expire on December 31, 1978, is the authority to provide contract hospital care for non-service-connected disabilities to veterans residing in States or possessions of the United States that are not contiguous to the 48 contiguous States. This amendment will extend this authority to December 31, 1981, for all territories while eliminating any expiration date for Alaska and Hawaii. Medical services to obviate the need for hospitalization are also authorized under this amendment, as well as a report on the health care needs of veterans in Puerto Rico and the Virgin Islands.

Finally, the bill will authorize the appropriation of such sums as are necessary to meet shortfalls in the grant program for health manpower training institutions. This program permits the Veterans' Administration to make grants to States for the establishment of new medical schools and to existing medical schools for expansion and improvements. Additionally, the bill authorizes the appropriation of $5 million in fiscal year 1979 to enable the Veterans' Administration to implement the Veterans' and Survivors' Pension Improvement Act of 1978.

These, Mr. Speaker, are the major provisions of the amendment. I urge that it be approved.

Mr. HAMMERSCHMIDT. Further reserving the right to object, Mr. Speaker, I yield to the distinguished chairman of the subcommittee, the gentleman from Virginia (Mr. SATTERFIELD) for an explanation of what his request is.

Mr. SATTERFIELD. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, the bill H.R. 5029 passed

the House on April 4, 1977 by a voice vote. As passed by the House, the bill would have authorized for 1 year the continuation of Veterans' Administration payments to reimburse the Veterans' Memorial Center in Manila for furnishing health-care services to Commonwealth Army Veterans and New Philippine Scouts. The House-passed measure also extended for 1 year the authority of the Administrator of Veterans Affairs to operate a regional office in Manila. This office adjudicates claims against the United States for service-connected veterans, pay compensation to Commonwealth Army Veterans and New Philippine Scouts, operates an outpatient clinic and administers VA programs for U.S. veterans residing in the Republic of the Philippines.

H.R. 5029 as passed by the Senate would have extended the authority to provide such health-care services as follows:

First, until September 30, 1983 (a 5-year extension), for hospital care, nursing home care, and outpatient services for the treatment of service-connected disabilities; second, until September 30, 1979 (a 1-year extension), for hospital and nursing home care for the treatment of non-service-connected disabilities; and third, until September 30, 1981, for grants for education and training of health service personnel and for replacement and upgrading of equipment in rehabilitating the physical plant and facilities of the hospital.

Mr. Speaker, the Senate amendments to H.R. 5029 are not acceptable by the House Committee on Veterans Affairs; however, in recent days we have had some discussions with the other body on the proposed House amendments to the Senate amendments, and I feel that they are acceptable to the other body.

The proposed amendments are as follows:

To extend to the Administrator the authority to operate a regional office in Manila, Republic of the Philippines, for an additional 3 years or until September 30, 1981.

To change the name of the Veterans Memorial Hospital, Republic of the Philippines, in chapter 17 of title 38 to that of the Veterans Memorial Medical Center.

To extend the authority of the President to authorize the Administrator to enter into contracts with the Veterans Memorial Medical Center, Republic of the Philippines, for the hospital care or medical services for Commonwealth Army Veterans and New Philippine Scouts from June 30, 1978 to September 30, 1981.

To extend the grant program to the Republic of the Philippines for the purpose of making payments for the care of Commonwealth Army Veterans and New Philippine Scouts of $2 million per fiscal year for 3 additional years or until October 1, 1981.

To extend the authority for making a grant of $50,000 per year to the Veterans Memorial Medical Center for education and training of health service personnel and $50,000 for making grants to the Veterans Memorial Medical Center for the purpose of assisting the Republic of the Philippines for replacing and upgrading of equipment and rehabilitating the physical plant and facilities of the medical center until September 30, 1981, or for a period of 3 additional years.

To extend the expiration date of Public Law 94–123, the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 from September 30, 1978 to September 30, 1981 or for a period of 3 additional years. This extension is necessary, Mr. Speaker, if the medical program of the Veterans' Administration is to continue to attract and retain qualified physicians and dentists to provide quality medical services to sick and disabled veterans. We had been hopeful that by this time the administration would have presented proposed legislation to us that would resolve this problem across the board for Federal physicians and dentists. No such proposal has been received and the word we receive is that the executive branch is nowhere near a solution or legislation on this matter. The Committee on Veterans' Affairs has, therefore, requested its staff to work with the other body and the other committee involved in an effort to arrive at some permanent solution to this Government-wide problem on or before the expiration of this authority.

To amend chapter 17 of title 38, section 601, to eliminate the delimiting date for the provision of contract care for veterans in the noncontiguous States of Alaska and Hawaii. This amendment also provides an extension of the current delimiting date for veterans residing in territories, possessions, or commonwealths until September 30, 1981. Authority has been included to grant the Administrator of Veterans' Affairs discretionary authority to waive the requirement that the Administrator annually determine the average hospital patient load per thousand veteran patients hospitalized at VA expense in Government and private facilities in the Commonwealth of Puerto Rico and the Virgin Islands. Mr. Speaker, this latter discretionary authority to waive this requirement has been placed in this measure in order to give the Administrator, as well as the legislative and oversight committees in both Houses, the opportunity to review the unique needs of veterans residing in these two localities. Currently the number of veterans hospitalized in these localities exceeds the annually determined average. This amendment will permit the Administrator to make an exception at his discretion until the needs of these veterans can be more thoroughly studied and solutions developed.

To extend the veterans readjustment appointment authority until September 30, 1981. In April 1970 President Nixon issued an Executive Order, No. 11521, to provide assistance by the Federal Government to help in the readjustment of Vietnam veterans who were returning to civilian life in large numbers from service in the Armed Forces in Southeast Asia. Because so many lacked the skills and education needed to compete in the then tight labor market, the Executive order was promulgated to help Vietnam veterans to obtain employment with the Federal Government, and provide training and education to enable them to assume a productive and successful role in civilian life.

Executive Order 11521, dated March 26, 1970, established a special appointing authority for veterans readjustment appointments in a noncompetitive excepted appointment to a position in the competitive service in grades 1 through 5 (both GS and wage grade) combined with a training program. Under the Executive order, Vietnam-era veterans who had not completed more than 14 years of formal schooling were eligible for a veterans readjustment appointment during the first year following their discharge or separation. For the veteran appointed under the Executive order to be converted to a career status, that is, a career conditional appointment in the U.S. Civil Service, the veteran must have participated in a program of training or education agreed to at the time of the appointment. Following the 2-year period of combined work and education or training, the appointment was converted to career or career conditional.

In 1974, the 93d Congress passed Public Law 93–508 which incorporated into law (title 38, U.S.C. 2014B) the special appointing authority contained in Executive Order No. 11521. Public Law 93–508 made an exception to the rule that the VRA must be used within 1 year after separation for veterans who are hospitalized immediately following their separation. In these cases, the 1 year after separation did not begin until the date of release from the hospital.

Another exception to the 1-year rule after separation provided in Public Law 93–508 was in those cases where veterans enrolled in a program of education under the GI bill within a year after their separation. In these cases, the period of eligibility for a veterans readjustment authority appointment was extended by the time spent in the qualifying GI bill course of training or education.

Because the program was due to expire on June 30, 1978, the administration, in a letter to the chairman of the House Committee on Veterans' Affairs, requested that legislation be introduced to extend the program to September 30, 1980. Subsequently, H.R. 10398 was introduced by Mr. TEAGUE, chairman of the Subcommittee on Education and Training, on December 15, 1977. H.R. 10398 proposed to extend the period of eligibility for veterans readjustment appointments in the Federal Government for veterans of the Vietnam-era to September 30, 1980, and restore Vietnam-era veterans' eligibility by eliminating the 1-year time limit for eligibility for a veteran who was eligible for a readjustment appointment under the order of April 9, 1970.

The primary purpose of the veterans readjustment authority, as provided in Public Law 93–508, is to assist Vietnam and disabled veterans to develop skills through a program combining employment and education and training. A vet-

erans readjustment appointment is to be made only under a training or education program developed by a Federal department or agency in accordance with guidelines established by the Civil Service Commission.

Despite legislation such as Public Law 93–508, authorizing the Federal Government to make VRA appointments to certain veterans, the hiring of Vietnam veterans, under this program, did not materialize as contemplated. We do know from the four semiannual reports submitted to the Congress by the Civil Service Commission, as required by Public Law 93–508, that over the 2-year period of the reports that the total Government-wide hiring under the VRA, about two-thirds of all veterans readjustment appointments hiring has been done by the Veterans' Administration and the Department of Defense, and more than half of the agencies averaged less than 1 percent of its new hires as veterans readjustment appointments.

However, the VRA program has resulted in more than 100,000 veterans being employed under the authority created.

Ending this program would not be in keeping with our national policy to extend every effort to help Vietnam-era and disabled veterans find satisfactory training and employment. Many Vietnam-era veterans did not have an opportunity to take advantage of the VRA program within 1 year from the date of their discharge. Extending the VRA, should be extremely helpful in lowering the unemployment rate among Vietnam and disabled veterans.

With this background, the Subcommittee on Education and Training held hearings on H.R. 10398 on April 5 and 6, 1978. The leadoff witness was Chairman Campbell speaking for the Administration, followed by Mr. Richard D. Brady, Personnel Officer of the Veterans' Administration; Mr. Austin E. Kerby, Director for Economics, and Mr. Edward J. Lord, assistant director, National Legislative Commission, the American Legion; Mr. Donald H. Schwab, director, National Legislative Service, Veterans of Foreign Wars; Mr. Ronald W. Drach, national director of employment, Disabled American Veterans; Mr. Gerald Jones, legislative director, Paralyzed Veterans of America, Inc.; and Mr. Len Gilmer, director of employment, National Association of Concerned Veterans. All testified in support of legislation to extend the veterans readjustment appointment (VRA) authority.

On April 20, 1978, the Veterans' Affairs Committee ordered reported H.R. 12353, a bill similar to H.R. 10398, but with amendments recommended by the administration. H.R. 12354, a bill identical to H.R. 12353, was also introduced by Mr. TEAGUE, chairman of the Subcommittee on Education and Training. Twenty-six members of the Committee on Veterans' Affairs cosponsored these two bills.

The reported bill, H.R. 12353, proposed to extend the period of eligibility for VRA appointments from June 30, 1978, to September 30, 1980. In addition, it proposed to raise the maximum grade level from GS–5 to GS–7 and eliminate the 1-year limit, thereby giving a second chance to Vietnam-era veterans to obtain a VRA appointment and recognize the fact that many veterans have obtained the necessary education and experience to qualify for a higher grade. Finally, it proposed to waive the 14-year education limit for VRA appointments for disabled veterans.

The Administration and all of the veterans' organizations fully supported the reported bill.

On May 22, 1978, H.R. 12353 was considered and passed unanimously by the House by the overwhelming majority of 338 to 0. On May 23, H.R. 12353 was referred to the Senate Committee on Veterans' Affairs. The Senate has not acted on H.R. 12353.

On May 26, 1978, the Senate passed H.R. 5029, with amendments. One of the amendments proposed to extend veterans readjustment appointments and make other amendments to the program as provided in section 401 of the amended H.R. 5029.

Clause (1) of section 401 of H.R. 5029 would extend the VRA authority until September 30, 1981, the time during which VRA appointments may be made; extend eligibility to any Vietnam-era veteran (a veteran whose active service included duty between August 5, 1964, and May 7, 1975) by opening up appointments to those who served before April 10, 1969, and eliminating entirely the restriction generally limiting appointments to the first year after separation; authorize VRA's to be made up to and including the level GS–7 or its equivalent; and eliminate for any disabled veteran of the Vietnam era the 14-year maximum number of completed years of education in order to be eligible.

Clause (2) of section 401 would expand the existing reporting authority to include the following information, broken down according to disabled and other veterans: The number and grade levels of VRA's; the number of appointees converted to terminated; the causes for such terminations; the number of terminations initiated by the employer and by the veteran; and a description of the education and training programs in which the appointees are participating.

Clause (3) of section 401 makes the definitions of "veteran" and "disabled veteran" as used in civil service law regulations applicable only to subsections (A) and (C) of section 2014, thus making the definitions of these terms in title 38 (sec. 101(2) ("veteran") section 2011(1) ("disabled veteran") applicable for the remainder of section 2014).

The agreement reached with the Senate on extending the veterans readjustment authority program contains the following provisions:

First. Makes veterans of the Vietnam era who served between August 5, 1964 and May 7, 1975, eligible for readjustment appointments under the terms and conditions specified in Executive Order No. 11521 up to and including the level of GS–7, or its equivalent;

Second. Makes eligible a veteran of the Vietnam era for such an appointment without any time limitations with respect to eligibility for such an appointment;

Third. Makes a disabled veteran of the Vietnam era entitled to disability compensation under the laws administered by the Veterans' Administration, or was discharged or released from active duty also for a disability incurred or aggravated in line of duty, eligible for a VRA appointment without regard to the amount of education of such a veteran;

Fourth. Extends the readjustment authority to September 30, 1981;

Fifth. In the semiannual report by the Civil Service Commission, in its review and evaluation of the implementation of the veterans readjustment authority program, and other activities required under 38 U.S.C. 2014, the Commission shall expand its reporting requirements to include in the specifications of the use and extension of the VRA appointments the following information to be shown separately for disabled and nondisabled veterans.

The number of appointments made since the last such report, and the grade levels in which such appointments were made.

The number of veterans receiving VRA appointments, which appointments were converted to career conditional appointments, or in the alternative, employment under the VRA appointment was terminated, together with a complete list of the categories of causes of the termination of VRA appointments, and the number of such veterans terminated.

The number of terminations of VRA appointments that were initiated by the department, agency, or instrumentality involved, and the number of VRA terminations initiated by the veteran.

A description of the education and training program in which veterans appointed under the veterans readjustment authority participated at the time of such report.

Sixth. A House amendment has added a provision to section 2012(b) veterans' employment emphasis under Federal contracts which provides that a disabled veteran may file a complaint under the provisions of the Rehabilitation Act of 1973, in addition to filing a complaint with the Veterans' Employment Service of the Department of Labor. A disabled veteran is defined as any veteran who is entitled to disability compensation from the Veterans' Administration, or who was discharged or released from active duty for a disability incurred or aggravated in the line of duty. This provision is intended to strengthen the law to help all disabled veterans who believe they have been discriminated against by Federal contractors who refuse to hire them because of their service-connected disabilities.

Copies of pertinent sections of the Rehabilitation Act of 1973, as codified in 29 U.S.C. 793 follow:

Under 29 U.S.C. 706(6), the term "handicapped individual" means any individual who: First, has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment and, second, can reasonably be expected to benefit in terms of employability from vocational rehabilitation services provided pursu-

ant to subchapters I and III of this chapter. For the purposes of subchapters IV and V of this chapter, such term means any person who: First, has a physical or mental impairment which substantially limits one or more of such person's major life activities, second, has a record of such an impairment, or third, is regarded as having such an impairment.

Under 29 U.S.C. 793(b), if any handicapped individual believes any contractor has failed or refuses to comply with the provisions of his contract with the United States, relating to employment of handicapped individuals, such individual may file a complaint with the Department of Labor. The Department shall promptly investigate such complaint and shall take such action thereon as the facts and circumstances warrant, consistent with the terms of such contract and the laws and regulations applicable thereto.

On October 10, 1978, the President submitted a message to the Congress to report on the progress of veterans of the Vietnam era and describe the actions the President will take to respond to the special problems a number of these veterans still face.

I am very encouraged that one of the actions already taken by the President is the issuance of an order that all Federal agencies make greater use of the Veterans Readjustment Authority (VRA) to bring Vietnam-era veterans, especially the disabled, into Government service. I have every hope this Presidential order will result in a sharp increase in the utilization of the VRA program, which to date has not materialized as contemplated by Congress. There follows a memorandum for the heads of departments and agencies issued by the President urging greater utilization of the VRA program:

THE WHITE HOUSE,
Washington, D.C.

MEMORANDUM FOR THE HEADS OF DEPARTMENTS AND AGENCIES

A major goal of this Administration has been to insure that employment opportunities for Veterans are concentrated on those areas where there is the most need—Vietnam-era and disabled Veterans.

As you are aware, since 1970, Federal agencies have had the authority to appoint certain Vietnam-era Veterans—generally with less than 14 years formal education and within one year after separation from active duty—to jobs at levels up through GS-5. In turn, these appointments can be converted to career-conditional positions. Administration supported legislation now pending in House-Senate conference would further extend and liberalize this authority by allowing appointments up to GS-7 and by removing the education limitation for disabled Veterans.

In 1974, the Congress charged the Civil Service Commission with responsibility for the evaluation of this program as it is implemented by your agencies. The Commission is mandated with obtaining, on at least a semi-annual basis, reports from Federal agencies with respect to their records on these Veterans' readjustment appointments and resulting conversions to career-conditional positions.

I am concerned with the wide disparity between agencies in the utilization of Veterans readjustment and resulting career-conditional conversion appointments. While some agencies have done a commendable job others have virtually ignored the Veterans readjustment and career-conditional appointment program. Access to Federal employment can be enhanced for Vietnam-era and disabled Veterans with fuller utilization of the Veterans readjustment appointment authority outlined in 38 U.S.C. section 2014.

I have directed the Chairman of the Civil Service Commission to contact each agency with a request for a specific plan of action to include goals and timetables for the implementation of the Veterans readjustment program. I expect your full cooperation on this matter.

JIMMY CARTER.

To amend section 5082 to authorize the appropriation of such sums as may be necessary in fiscal year 1979 to carry out the grant provisions of subchapters I, III, and IV, of chapter 82 of title 38 to institutions with which the Administrator has entered into agreements before May 1, 1978.

To require the Administrator of Veterans' Affairs to submit to the Congress and the President a comprehensive report not later than February 1, 1980, on the furnishing of hospital care and medical services to eligible veterans in the Commonwealth of Puerto Rico and in the Virgin Islands and on the number of patients receiving such care and medical services in these localities in order to determine the unique needs, if any, of these veterans. The provision requires that the study take into consideration the economy of these localities and any alternative sources available to provide such medical care.

To authorize the appropriation of $5 million for fiscal year 1979 to enable the Administrator of Veterans' Affairs to effectively establish and implement the new veterans pension program including the conduct of a program of public information desired to advise all persons who may be affected by the new pension program of its provisions and its implications for the individual.

Mr. Speaker, all of these amendments, particularly those extending certain dates that have expired or will expire in the near future, are essential to the continued effective provision of services to eligible veterans and to the operation of Veterans' Administration activities. The maximum cost of the provisions of the proposed House amendments will not exceed $18.5 million, and I assure Members that this is well within the amount of any new entitlements or authorizations in the second concurrent budget resolution. Mr. Speaker, I urge all of my colleagues to support this essential measure for veterans who are entitled to receive these benefits.

Mr. HAMMERSCHMIDT. Mr. Speaker, I thank the gentleman for his explanation.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. President, I just want to ask the gentleman from Virginia whether there are any nongermane amendments here which were adopted by the other body.

Mr. SATTERFIELD. If the gentleman will yield, Mr. Speaker, there are in the proposal that we have two amendments which do not specifically deal with the health jurisdiction of our committee.

The first one is an amendment to extend the Vietnam veterans' readjustment authority. The House has already passed this provision in a separate bill.

The last one I mentioned, which was a $5 million authorization in connection with the implementation of the pending pension reform measure, was an amendment the Senate added to our bill. The particular provision was not contained in H.R. 10173, the pension reform bill which we went to conference on. This merely would implement the pension measure should it be approved. If not, the provision has no application at all.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman.

Mr. HAMMERSCHMIDT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Virginia?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SATTERFIELD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the legislation just considered and that I be permitted to revise and extend my remarks and include extraneous matter on the legislation just considered.

The SPEAKER prc tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

AMENDING FEDERAL TRADE COMMISSION IMPROVEMENT ACT TO EXTEND DEADLINE FOR FILING REPORT OF RULEMAKING PROCEDURES

Mr. ECKHARDT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3595) to amend section 202(d) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act to extend the deadline for filing a report of rulemaking procedures and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. BROYHILL. Reserving the right to object, Mr. Speaker, and I have no intention to object because I feel that this is needed, but all it does is to extend the deadline for two studies that the administrative conference is making of Federal Trade Commission rulemaking. It extends that deadline for those studies for 1 year. This is noncontroversial. I would point out that it does not call for any Federal expenditures because the administrative conference and the Federal Trade Commission will complete the studies out of existing appropriated funds.

Mr. ECKHARDT. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from Texas.

Mr. ECKHARDT. That is correct. The

only reason we use this means is because we passed a bill that was noncontroversial out of the subcommittee, and we simply did not have time to get it to the floor.

What does the bill do? It merely extends the deadline for submission of a study of the new Federal Trade Commission rulemaking processes mandated under the Magnuson-Moss Warranties Act in 1975. The reason the extension is needed is that the Commission's rulemaking is taking longer than originally expected and there has only been one rule issued under the new procedures. That is not enough for a thorough study.

Will one additional year be enough? It should be. The Commission has issued one rule on prescription eyeglass advertising, and there are 10 more on which hearings have been completed. Those 10, or some of them, should be issued over the next few months.

What is the need for the study? The Magnuson-Moss Warranty Act of 1975, on which Mr. BROYHILL and I did very much work on as subcommittee members, established new and rather formal procedures under which the Commission's consumer rulemaking is now conducted. In addition to the requirements of traditional rulemaking for notice in the Federal Register and comment by interested parties, the Magnuson-Moss procedures require a written record of the proceedings, a right to oral comment, limited cross-examination, processes to narrow and define issues, and court review on the basis of substantial evidence rather than the general "arbitrary and capricious" standard.

These procedures are the first of their kind, designed to give those affected by rulemaking a more formalized opportunity to participate. But because of the novelty of the procedures, the act provided that the administrative conference and the Federal Trade Commission each conduct a study and submit it to Congress.

What will this cost? There is no additional appropriation for this activity, since it is done out of existing funds already appropriated to the administrative conference and the Commission.

The staff-time costs for both the conference and the Commission should run in the neighborhood of $100,000—but, of course, that is money not spent on this earlier.

Is there a comparable House bill on this? Yes. H.R. 12563 was considered by my subcommittee and reported to the full Interstate and Foreign Commerce Committee late this summer. Unfortunately, there was not time in the end-of-the-Congress rush to bring the bill up in full committee.

Mr. BROYHILL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, I would also like to ask the gentleman about any nongermane amendments adopted by the other body.

Mr. ECKHARDT. If the gentleman will yield, there are none.

Mr. BAUMAN. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202(d) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act is amended by striking out "July 5, 1978", and inserting in lieu thereof "June 30, 1979".

The Senate bill was ordered to be read a third time, and was read the third time and passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ECKHARDT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 13750, SUGAR STABILIZATION ACT OF 1978

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13750) to implement the International Sugar Agreement, 1977 between the United States and foreign countries, to protect the welfare of consumers of sugar and of these engaged in the domestic sugar industry, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman explain to us what this is all about?

Mr. FOLEY. Mr. Speaker, will the gentleman yield to me?

Mr. ROUSEELOT. I will be delighted to yield to the gentleman.

Mr. FOLEY. I thank the gentleman for yielding.

I will advise the gentleman that the Senate acted yesterday or early this morning with respect to the sugar legislation by adopting an amendment which has been attached to the House bill striking everything after the enacting clause of the House-passed bill and inserting the Senate amendment therein. It has now reached the desk, and I have asked unanimous consent to take it up and concur in the Senate's request for a conference.

Mr. ROUSSELOT. So we are not in any way giving approval to anything that they may have added; we are just going to conference, period.

Mr. FOLEY. We are not by this action doing anything except to concur in the Senate's request for a conference on the disagreeing views of the House and the Senate with respect to H.R. 13750, and this action does not commit the House to any position with regard to this legislation other than agreement to go to conference.

Mr. ROUSSELOT. I thank the gentleman for his explanation.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

May I have the attention of the chairman. So that the House may anticipate the difficulties that we might have in the conference, I will ask the chairman are there Senate amendments that are nongermane to the Sugar Act?

Mr. FOLEY. If the gentleman will yield, the gentleman is correct. The Senate has included amendments dealing with the waiver of countervailing duties. That is correct.

Mr. DERWINSKI. That does not at this point cause any technical complication for the conferees as yet?

Mr. FOLEY. Not as yet. We have not appointed the conferees.

Mr. DERWINSKI. I mean when the conferees meet, though, they are in the situation where they are working from the House-passed sugar bill?

Mr. FOLEY. Yes.

Mr. DERWINSKI. And then they have matters that under normal circumstances would call for conferees and other committees?

Mr. FOLEY. I will advise the gentleman that the conferees who would be appointed by the Speaker, in the event that this unanimous-consent request is agreed to, include members of the Committee on Ways and Means that has jurisdiction over the countervailing duty amendments that are involved as nongermane amendments to this matter. Half of the conferees who will be appointed, if no objection is made to this request, will be members of the Committee on Ways and Means. The other half will be members of the Committee on Agriculture. The Senate jurisdiction in both matters lies with the Committee on Finance.

Mr. DERWINSKI. If I may then rephrase my question, the chairman has a positive attitude toward producing an acceptable sugar bill before we adjourn?

Mr. FOLEY. Indeed, I do.

Mr. ROUSSELOT. I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington? The Chair hears none, and without objection, appoints the following conferees: Messrs. FOLEY, ULLMAN, POAGE, ROSTENKOWSKI, VANIK,

CORMAN, GIBBONS, DE LA GARZA, NOLAN, AKAKA, JOHNSON of Colorado, FRENZEL, STEIGER, and MOORE.

There was no objection.

CONFERRING U.S. CITIZENSHIP POSTHUMOUSLY UPON LEOPOLDINE MARIE SCHMID

Mr. EVANS of Georgia. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 8930) to confer U.S. citizenship posthumously upon Leopoldine Marie Schmid.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the bill, as follows:

H.R. 8930

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Leopoldine Marie Schmid, late of San Mateo, California, and formerly of Zurich, Switzerland, shall be held and considered to have been a citizen of the United States at the time of her death.

Mr. EVANS of Georgia. Mr. Speaker and Members—I have watched the progression of this legislation from its inception. We had extensive discussions on the bill in the Judiciary Subcommittee on Immigration, Citizenship and International Law, of which I am a member. The bill was passed out of committee with widespread support.

Simply stated, the bill will confer citizenship posthumously on one Leopoldine Schmid, an immigrant to this country over 20 years ago whose single dream was to become a U.S. citizen. She and her husband completed the required studies and passed the examination. But Mrs. Schmid's dream of becoming a citizen was never realized because 15 days after the examination she was murdered, the victim of an attempted robbery by two gunmen who were never found.

This bill will not cost the Federal Government a nickel. However, it will be a priceless treasure to a man who lost his wife in the most tragic of circumstances.

We do not set precedent casually in this Chamber. But in this case we are not setting precedent. We have posthumously restored citizenship to Robert E. Lee (Public Law 94–67), and just last month the House passed the bill restoring citizenship posthumously to Jefferson Davis (S.J. Res. 16). Furthermore, we have granted honorary citizenship to Winston Churchill (Public Law 88–6). If we can do it for the famous, I feel strongly that we should do it for the not so famous as well. The passage of this bill would help to build an impression of a Congress able to consider and respond in a sympathetic fashion to the innocent needs of an individual.

I urge my colleagues to support this bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMMUNICATION FROM THE SECRETARY OF THE SENATE

The SPEAKER pro tempore laid before the House the following communication from the Secretary of the Senate:

Ordered, That the Secretary of the Senate be directed to request the House of Representatives to return to the Senate the bill (H.R. 12929) entitled "An Act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1979, and for other purposes", together with all accompanying papers.

Mr. MICHEL. Mr. Speaker, reserving the right to object, I wonder if I might have a little bit of explanation from our distinguished chairman just what it is that is going on here.

Mr. MAHON. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the distinguished gentleman.

Mr. MAHON. Mr. Speaker, yesterday, we, of course, considered the conference report on the Labor-HEW appropriation bill. It was sent back to the Senate, the other body.

The Senate adopted and suggested that the present law with respect to abortion be embodied in the bill and they took action late yesterday, but as a result of a technical error the Senate provided in their report to us the House language, the so-called Hyde language, and they also provided the language in the present law which was approved last year with respect to the HEW continuing resolution; so there is no way to resolve the problem.

It is contradictory in its present form. I understand the other body has requested that the papers be returned. In view of the fact it was a technical error, as a matter of comity and good faith, it would seem that the Senate is entitled to make the correction of the material that was in error.

Mr. MICHEL. Mr. Speaker, so if I understand correctly from the distinguished chairman, that in the Labor-HEW bill as it comes back to the House, we not only have the original House language, but we have the language to which the Senate agreed to, but to which the House did not agree, two sets of language to govern us on the issue of abortion. That is quite interesting.

Mr. MAHON. Mr. Speaker, the gentleman is precisely correct. It is a contradictory kind of thing brought about by some sort of technical error.

Mr. MICHEL. What would be the situation if we just refused to send those papers back? Would we not just have our way then and have our position sustained?

Mr. MAHON. I think it would be sort of a chaotic situation. I have been in touch with the other body, and they feel as a matter of comity between the bodies that they are entitled to get the papers back and make the correction of an error which was technical in nature.

Mr. MICHEL. Mr. Speaker, in deference to the chairman of my committee, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the Senate?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I would say to the gentleman from Texas (Mr. MAHON) it appears to the gentleman from Maryland that there is more than just a matter of comity involved in this request. The other body in its wisdom, having made this mistake, has presented us with the papers in a fashion which is obviously contradictory on the issue of abortion, but if we send the papers back and they amend this, it will come back here and there will be another fight on the issue of abortion.

I assume and hope we will uphold the original House position, as we did by a healthy margin the other day. If we do not return the papers the battle will be prolonged for at least 24 hours, but the other body already has in its possession a continuing resolution containing the compromise language.

I have a great deal of concern for the feelings of the Members of the other body and their pride and their printer's pride, as well as their staff's pride, but why are we extending the battle over this issue when it could be resolved by having these papers retained right on the desk?

Mr. MAHON. Mr. Speaker, I do not view this as a tragedy or a vehicle to continue the controversy over the issue of abortion. It is just a matter of sending papers back upon request of the other body.

I say in all sincerity I personally do not know what the other body will do with the papers when we send them back. It is an intolerable situation to have them here, and what will be done when we send them back to the Senate, I do not know. They may correct the error and send the papers back to us, in which case they will recommend that in the HEW appropriation bill we provide the language that is in the current law which was adopted last year.

That may be done or it may not be done, I do not know. I would assume possibly that would happen, but I have no assurance it will happen. I have no assurance what the House would do with respect to the matter.

As far as I am personally concerned, I thought the matter was settled yesterday, but after all this parliamentary process, the other body did have the right and the opportunity to take the action it undertook to take but mistakenly did not take.

Mr. BAUMAN. Mr. Speaker, further reserving the right to object, I understand all that, and most of all, I agree with the gentleman's statement that it is impossible to predict what the other body will do. That is always done. All I am saying is that we could shorten this whole battle considerably if we did not send the papers back tonight and they passed the continuing resolution.

Mr. Speaker, I, therefore, do object.

The SPEAKER pro tempore. Objection is heard.

The question is on the request of the Senate.

The question was taken; and on a division (demanded by Mr. BAUMAN) there were—yeas 28, nays 3.

So the request of the Senate was agreed to.

PROVIDING FOR CONSIDERATION OF H.R. 11153, RECLAMATION SAFETY OF DAMS ACT OF 1978

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1424 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1424

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11153) to authorize the Secretary of the Interior to construct, restore, operate, and maintain new or modified features at existing Federal reclamation dams for safety of dams purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore (Mr. EVANS of Colorado). The gentleman from Washington (Mr. MEEDS) is recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from Maryland (Mr. BAUMAN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1424 is the rule providing for the consideration of the bill H.R. 11153, Safety of Federal Reclamation Dams.

This is a simple 1-hour open rule with no waivers of points of order. It provides for the consideration of the bill, H.R. 11153, to authorize appropriations to the Secretary of Interior and the Bureau of Reclamation. The purpose of this authorization is that the Bureau of Reclamation may perform structural modification to dams and related facilities under their jurisdiction to assure the safety of those facilities from failure.

Mr. Speaker, I support the rule and urge the adoption of House Resolution 1424 in order that H.R. 11153 may be considered.

Mr. BAUMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1424 provides 1 hour of debate for the consideration of H.R. 11153. This piece of legislation authorizes the Secretary of the Interior to construct, restore, operate, and maintain new or modified features at existing Federal reclamation dams for safety of dams purposes. This bill establishes a program and will authorize appropriations by means of which the Secretary of the Interior, acting through the Bureau of Reclamation, may perform structural modifications to dams and related facilities under the jurisdiction of the Bureau of Reclamation to assure their safety from failure. The Rules Committee has granted an open rule for the consideration of this bill.

Mr. Speaker, I yield back the balance of my time.

Mr. MEEDS. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 12533, INDIAN CHILD WELFARE ACT OF 1978

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1374 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1374

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 12533) to establish standards for the placement of Indian children in foster or adoptive homes, to prevent the breakup of Indian families, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs now printed in the bill as an original bill for the purpose of amendment under the five-minute rule and said substitute shall be read for amendment by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 12533, the Committee on Interior and Insular Affairs shall be discharged from the further consideration of the bill S. 1214 and it shall then be in order in the House to move to strike out all after tne enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 12533 as passed by the House.

The SPEAKER pro tempore. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Maryland (Mr. BAUMAN), pending which I yield myself such time as I may consume.

Mr. Speaker, H.R. 12533 establishes minimum Federal standards for the removal of Indian children from their families and the placement of such children in foster or adoptive homes and institutions.

This is an open rule providing for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs. It shall be in order to consider the amendment in the nature of a substitute recommended by the committee on Interior and Insular Affairs. It also provides for one motion to recommit with or without instruction.

The rule also provides that after the passage of the bill (H.R. 12533) it will be in order to call up the companion bill referred from the other body (S. 1214) and insert the text of the House-passed bill. This is a routine procedural motion, normally handled by unanimous consent, which expedites conference considerations of the legislation. In addition, the rule provides that the bill be read for amendment by titles instead of by sections.

Mr. Speaker, the purpose of this bill, H.R. 12533, is to protect the interest of Indian children. The bill promotes the stability and security of Indian tribes and families by establishing minimum Federal standards for the removal of Indian children from their families and the placement of children in foster or adoptive homes or institutions. The unique values of Indian culture will be reinforced and preserved by allowing children to remain with their own people.

The separation of Indian children from their families is perhaps the most tragic and destructive aspect of American Indian life. Indian children are being removed from their families to be placed in adoptive care, foster care, special institutions and Federal boarding schools at rates grossly disproportionate to non-Indian rates. Studies conducted by the Assocation of American Indian Affairs conclude that 25 to 35 percent of all Indian children are now separated from their families. My colleagues, the problem is getting worse and the figures are shocking.

Mr. Speaker, this particular piece of legislation was originally considered in 1974. The 93d, 94th and the 1st session of the 95th Congress convened and adjourned, thus leaving American Indian children to suffer the hardship of displacement.

Mr. Speaker, I strongly believe that this resolution before us is both extremely necessary and constitutional. The Indian welfare crisis will continue until we as legislators begin to realize and appreciate the importance of preserving American Indian culture. We can no longer neglect or ignore the cultural values and social norms of American Indians who are continuously struggling to "save the children."

Mr. Speaker, I request that we adopt the rule for House Resolution 1374 so that we may proceed with the consideration of the Indian Child Welfare Act.

Mr. BAUMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from California has given his usual excellent elucidation on this rule.

Mr. Speaker, House Resolution 1374 is an open rule which provides 1 hour of

general debate for the consideration of H.R. 12533. H.R. 12533 establishes standards for the placement of Indian children in foster or adoptive homes and seeks to prevent the breakup of Indian families.

The rule further provides that the committee amendment is in order as an original bill for the purpose of amendment. According to the rule the bill is also to be read for amendment by titles instead of by sections. Additionally, the rule provides for one motion to recommit with or without instructions.

Finally, House Resolution 1374 provides that after the passage of H.R. 12533, the Committee on Interior and Insular Affairs shall be discharged from further consideration of the bill S. 1214. It shall then be in order in the House to move to strike out all after the enacting clause of S. 1214 and insert in lieu thereof the provisions contained in H.R. 12533 as passed by the House.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 12605, LONG-TERM FINANCING FOR CORPORATION FOR PUBLIC BROADCASTING

Mr. VAN DEERLIN. Mr. Speaker, I call up the conference report on the bill (H.R. 12605) to amend the Communications Act of 1934 to extend and improve the provisions of such act relating to long-term financing for the Corporation for Public Broadcasting and relating to certain grant programs for public telecommunications, and for other purposes. The Clerk read the title of the bill.

(For conference report and statement, see proceedings of the House of October 12, 1978.)

The SPEAKER pro tempore. Under the rule previously adopted, the conference report is considered as having been read.

The gentleman from California (Mr. VAN DEERLIN) will be recognized for 30 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. VAN DEERLIN).

Mr. VAN DEERLIN. Mr. Speaker, I yield myself such time as I may consume. I am pleased to bring to the House a conference report on the bill H.R. 12605 relating to long-term financing for the Corporation for Public Broadcasting and relating to certain other grant programs for public telecommunications. The conference report leaves intact almost all of the provisions of H.R. 12605 as passed by the House. This includes authorization ceilings for the Corporation for Public Broadcasting of $180 million in fiscal year 1981, $200 million in fiscal year 1982, and $220 million in fiscal year 1983. The 3-year advance authorization represents a reaffirmation of the congressional commitment to long-term funding of the public broadcasting system.

In addition, the conferees agreed to the reduction in the matching formula which was passed by the House. The current formula provides that for every $2.50 in non-Federal support raised by public broadcasting entities, the Federal Government will contribute $1, up to the authorization level. The House bill, and now the conference report, would lower the match to $2—non-Federal—to $1—Federal. The purpose of lowering the match is to alleviate the stations' local fund-raising burden while maintaining the incentive for increasing local support.

The conferees also agreed to the House provision that recognized the growing needs of our public radio system. Until just recently, the educational broadcast facilities program allocated a very small portion of its funds to radio expansion and development with the result that public radio now reaches only about 40 percent of American homes. In order to improve this record, the House bill required that 25 percent of the facilities funds be available for radio expansion, and that the Corporation for Public Broadcasting increase its contribution to radio accordingly. The conference report replaces the specific percentage requirement with the words "a substantial amount" since the conferees believed that the administrators of the facilities program should have some discretion in the allocation of funds. However, the explanatory statement of the managers does make it clear that we expect that radio will continue to receive approximately the percentage that it has received for the last 2 years; in other words, about 25 percent.

The conferees also agreed to:

First. The House provision limiting the salaries of officers of CPB, PBS, and NPR to not more than that of Cabinet level officers, with an amendment grandfathering the salaries of current officers;

Second. The House provision requiring CPB to use panels of experts to evaluate program proposals, to the extent practicable;

Third. The House provision requiring the stations to establish community advisory boards;

Fourth. The House provision permitting the stations to include a limited portion of volunteer services as non-Federal income for purposes of the match, following the adoption of valuation standards by the corporation; and

Fifth. The House provision requiring that CPB allocate a significant portion of its funds to program production and acquisition, and reserve a substantial amount for distribution to independent producers.

The conferees adopted strong compromise provisions pertaining to open meetings, financial management and audits, and EEO requirements. For the most part, these provisions track those passed by the House, but clarify the applicability and terms of the provisions.

The conferees also agreed to several provisions contained in the Senate amendment to the House bill. These include provisions which extend the authorization for the HEW telecommunications demonstration program for 3 years, require NTIA to submit an annual report to Congress, and require each facilities grant recipient to keep a complete and itemized inventory of all telecommunications facilities under its control.

The conference agreement does not include two provisions that were contained in the House bill. The first provision added five new criteria for determining the amount of the incentive portion of the community service grants that CPB gives directly to public television stations. The new criteria included the encouragement of community responsiveness, cost efficiencies, volunteer programs, training programs for women and minorities, and innovative approaches to reaching new audiences. The conferees felt that although the criteria represented laudable goals for the system to achieve, they might be difficult to apply uniformly as a matter of law, in determining the amount of funds to be distributed to each station. The proposed criteria are cited in the statement of managers as goals for the system.

The conference committee also agreed to the deletion of the provision in the House-passed bill which would have eliminated the current ban on editorializing by public broadcast stations, and the existing requirement that stations keep audiotapes of programs in which issues of public importance are discussed. The House bill replaced these provisions with a more narrow prohibition against support or opposition of political candidates by public broadcasters. I would like to emphasize that the House conferees only agreed to maintaining the existing requirement pertaining to editorializing and taping because it was clear to us that the Senate was firmly opposed to elimination of these provisions at this time. Indeed, the Senate conferees had been instructed by the Senate not to accept the House provision. Therefore, in order to insure that the other important provisions of the bill could be acted upon prior to the adjournment of the Congress, the House conferees agreed to the deletion of our provision. We are nonetheless committed to securing full first amendment freedoms for public broadcasters, and will continue to argue strenuously for the detention of the taping requirement and the editorializing ban in future legislation.

Mr. MOORHEAD of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think the bill has been improved slightly in the conference committee over what it was when it passed the House. Most of the major differences were decided in favor of the House version, but there were some of the criteria for eligibility that had been written in great detail in the House version that would have been difficult for stations throughout the country to follow that were taken out.

I ask for an aye vote.

● Mr. STAGGERS. Mr. Speaker, H.R. 12605, the Public Telecommunications Act of 1978, is an important bill for public telecommunications. The initiative for this bill came from President Carter's legislative proposal (H.R. 9620) which I introduced on October 18, 1977.

I have been deeply interested in broadcasting during my years in Congress. In presenting the first public broadcasting bill on the floor of the House in 1967, I commented that:

When all the factors that have made the 20th century such a great century have been considered and entered on the ledger books of history and a balance struck, I believe that the peculiar mark of this century will be that of wireless broadcasting. Without it, I believe we would be living in an entirely different world today, without a great many of the advances that we have made.

I still believe that today, 11 years later. The conferees preserved many of the substantive points that appeared in the House bill. The conferees report on H.R. 12605, is a fair one from the standpoint of the House and I hope the House will unanimously approve it.●

● Mr. WAXMAN. Mr. Speaker, I am pleased to join the distinguished chairman of the Subcommittee on Communications, Representative LIONEL VAN DEERLIN, in urging adoption of the conference report on H.R. 12605, the Public Telecommunications Financing Act. It is an exceptionally good bill which greatly strengthens our Nation's public broadcasting system.

We have provided more money than public broadcasting has ever had before, with $220 million authorized by 1983. We have made it substantially easier for the stations to receive Federal funds by lowering the nonpublic fund match requirement from 2.5:1 to 2:1, and by providing a limited credit for services performed by volunteers. Within 5 years, total income for public broadcasting will exceed half a billion dollars.

Coupled with our reiteration of the system's commitment to programing as its highest priority, public broadcasting's audiences can look forward to substantial improvements in the quality and diversity of their television and radio programs.

We have also made a special effort to assist public radio. It can expect to receive $10 million per year to build new radio stations and expand existing ones. This special dedication of facilities funding is to be accompanied by a commensurate increase in money from the Corporation for Public Broadcasting (CPB) for public radio programing. This formula is designed to extend the reach and listener support of public radio to the entire country within 5 years.

This conference report also addresses the longstanding problem of lack of access to the public broadcasting system—at both the national and local level—by independent producers. We expect that no less than $27 million per year will be awarded by CPB to independent producers—both large and small—for programs for the system by 1983. In so doing, the Congress is on record as recognizing the distinctive achievements of the abundance of creative talent in our Nation.

We have also acted to limit the potential for political interference by CPB in programing decisions by requiring its board, which is composed of political appointees, to use outside peer review panels to evaluate programing grants. This procedure will further insulate this most sensitive process from political abuse. As such, it is a significant reform from current practices.

We have also taken major steps to make the system, and particularly the stations, accountable to the communities they serve. We have required open meetings at all levels—in the national organizations and in the stations. We have directed the imposition of uniform accounting procedures and a requirement that pertinent financial records be open for public inspection. We have also required the formation of community advisory boards, which will give grassroots guidance to the stations on their judgments as to how to best serve their audiences.

In short, this legislation makes public broadcasting truly public.

The essential questions of structural reform of public broadcasting—the ultimate role of the Corporation for Public Broadcasting, the Public Broadcasting Service, National Public Radio, and the executive branch—are not addressed in this bill. Further steps must be taken, in my judgment, to reduce the bureaucratic overlap and inefficiency in the system, and to provide a greater degree of insulation for both its funding sources and programing decisions. As this legislation is silent on these issues, it must be considered an interim measure.

I therefore look forward to our continuing debate over the proposed title VI of the Communications Act of 1978, and the impending report of the Carnegie Commission for a resolution of these critical matters.

Mr. Speaker, I wish to express my sincere appreciation to all my colleagues on the subcommittee for their work on this bill, and especially to my chairman, Mr. VAN DEERLIN, who provided outstanding leadership. It was a pleasure to work with him, and he should be extremely proud of his achievement.

I urge adoption of this conference report.●

Mr. VAN DEERLIN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. VAN DEERLIN. Mr. Speaker, I ask unanimous consent that all Members may have up to the sine die adjournment date in which to revise and extend their remarks and to include extraneous matter on the subject of the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ANNUAL REPORT OF ADMINISTRATOR, NATIONAL CREDIT UNION ADMINISTRATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs:

To the Congress of the United States:

I hereby transmit to the Congress the Annual Report of the Administrator, National Credit Union Administration and an addendum, entitled Annual Report 1977, for the calendar year 1977. This report contains additional information on unsecured loans as requested by the Committee on Banking, Finance and Urban Affairs, House of Representatives, during its consideration of Depository Institutions Amendments of 1977 (Public Law 95–22).

JIMMY CARTER.

THE WHITE HOUSE, *October 13, 1978.*

SEVENTH ANNUAL REPORT ON ADMINISTRATION OF FEDERAL RAILROAD SAFETY ACT OF 1970—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection referred to the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

I transmit herewith the Seventh Annual Report on administration of the Federal Railroad Safety Act of 1970 (84 Stat. 971, 45 U.S.C. 421 et. seq.) as required by that Act. This report has been prepared in accordance with Section 211 of the Act, and covers the period January 1, 1977 through December 31, 1977.

JIMMY CARTER.

THE WHITE HOUSE, *October 13, 1978.*

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2570) entitled "an act to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 7971. An act to validate the conveyance of certain land in the State of California by the Southern Pacific Transportation Co.; and

H.R. 11409. An act to make permanent the existing temporary suspension of duty on certain dyeing and tanning materials.

The message also announced that the Senate agrees to the amendment of the House to the Senate amendment to a bill of the House of the following title:

H.R. 11092. An act to increase the authorization of appropriations under the act of December 22, 1974 (88 Stat. 1712).

The message also announced that the Senate agrees to the amendment of the House to the Senate amendment to a bill of the House of the following title:

H.R. 4319. An act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House to the amendment of the Senate to a bill of the House of the following title:

H.R. 5646. An act to amend the Regional Rail Reorganization Act of 1973 to require ConRail to make premium payments under certain medical and life insurance policies, to provide that ConRail shall be entitled to a loan under section 211(h) of such act in an amount required for such premium payments, and to provide that such premium payments shall be deemed to be expenses of administration of the respective railroads in reorganization.

The message also announced that the Senate agrees to the amendments of the House with an amendment to a bill of the Senate of the following title:

S. 976. An act to amend the Perishable Agricultural Commodities Act, 1930, relating to practices in the marketing of perishable agricultural commodities.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3946) entitled "An act to suspend for a temporary period the rate of duty on wool not finer than 46s," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG, Mr. TALMADGE, Mr. MOYNIHAN, Mr. CURTIS, and Mr. HANSEN to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2253. An act to amend title 28 of the United States Code to encourage prompt, informal, and inexpensive resolution of civil cases by use of arbitration in U.S. district courts, and for other purposes.

HEALTH SERVICES AMENDMENTS OF 1978

Mr. ROGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 12370) to amend the Public Health Service Act and related health laws to revise and extend the programs of financial assistance for the delivery of health services, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. ROGERS).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 327, navs 6, answered "present" 1, not voting 96, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 12370, with Mr. MURTHA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Wednesday, October 11, 1978, all time for general debate on the bill had expired.

Mr. ROGERS. Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The bill is as follows:

H.R. 12370

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) This Act may be cited as the "Health Services Amendments of 1978".

(b) Whenever in this Act (other than in sections 6, 7, and 9) an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

HEALTH INCENTIVE GRANTS FOR COMPREHENSIVE PUBLIC HEALTH SERVICES

SEC. 2. (a)(1) Section 314(d)(7)(A) is amended by striking out "and" after "1977," and inserting before the period a comma and the following: "and $103,500,000 for the fiscal year ending September 30, 1979".

(2) Section 314(d)(7)(B) is amended by striking out "and" after "1977," and inserting before the period a comma and the following: "and $25,000,000 for the fiscal year ending September 30, 1979".

(b)(1) The Congress finds and declares that—

(A) individual health status can be effectively and economically improved through an adequate investment in community public health programs and services;

(B) the Federal Government and the States and their communities share in the financial responsibility for funding public health programs;

(C) the Federal contribution to funds for public health programs should serve as an incentive to an additional investment by State and local governments;

(D) existing categorical programs of Federal financial assistance to combat specific public health problems should be supplemented by a national program of stable generic support for such public health activities as the prevention and control of environmental health hazards, prevention and control of diseases, prevention and control of health problems of particularly vulnerable population groups, and development and regulation of health care facilities and health services delivery systems; and

(E) the States and their communities, not the Federal Government, should have primary responsibility for identfying and measuring the impact of public health problems and the allocation of resources for their amelioration.

(2) Effective October 1, 1979, section 314(d) is amended to read as follows:

"COMPREHENSIVE PUBLIC HEALTH SERVICES

"(d)(1) The Secretary shall make grants to State health authorities to assist in meeting the costs of providing comprehensive public health services.

"(2) No grant may be made under paragraph (1) to the State health authority of any State unless an application therefor has been submitted to and approved by the Secretary. Such an application shall be submitted in such form and manner and shall contain such information as the Secretary may require, and shall contain or be supported by assurances satisfactory to the Secretary that—

"(A) the comprehensive public health services which will be provided within the State with funds under a grant under paragraph (1) will be provided in accordance with the State health plan in effect under section 1524(c);

"(B) funds received under grants under paragraph (1) will—

"(i) be used to supplement the level of non-Federal funds that would otherwise be made available for the comprehensive public health services for which the grant funds are provided, and

"(ii) not be used to supplant such non-Federal funds,

except that the Secretary may in exceptional circumstances waive clause (i) or (ii) or both clauses;

"(C) the State health authority for which the application is submitted will—

"(i) provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of and accounting for funds received under grants under paragraph (1);

"(ii) from time to time, as prescribed by the Secretary, report to the Secretary (through a uniform national reporting system and by such categories as the Secretary may prescribe) a description of the comprehensive public health services provided in the State in the fiscal year for which the grant applied for is made and the amount and source of funds expended in that fiscal year and in the preceding fiscal year for the provision of each such category of services; and

"(iii) make such other reports (in such form and containing such information as the Secretary may prescribe) as the Secretary may reasonably require and keep such records and afford such access thereto as the Secretary may find necessary to assure the correctness of, and to verify, such reports; and

"(D) the State health authority for which the application is submitted will have in effect a method satisfactory to the Secretary which will assure equitable distribution of funds under grants under paragraph (1) among State and local public health entities within the State which have made expenditures which may be used under paragraph (4) to compute the amount of such grants and which method provides that within the limit of the amount of funds received by the State health authority under such grants—

"(i) each local public health entity which makes such expenditures shall receive from such funds in the fiscal year for which grants are made an amount which is equal to the lesser of—

"(I) the product of the total amount of such expenditures in such fiscal year and the applicable grant computation percentage, or

"(II) the product of $1.50 and the population of the area served by such entity (as such population and area may be determined pursuant to guidelines established by the Secretary); and

"(ii) amounts which a local public health entity would receive under clause (i)(I) which are in excess of the applicable amount computed under clause (i)(II) shall be distributed for comprehensive public health services within communities which have the greatest need for such services as determined by the State health authority pursuant to guidelines established by the Secretary.

For purposes of subparagraph (D)(i)(I), the term 'applicable grant computation percentage' means the percentage applicable under paragraph (4)(A)(i)(II) to the computation of the amount of a grant under paragraph (1).

"(3)(A) The Secretary shall review annually the activities undertaken by each State health authority with an approved application under this subsection to determine if the authority complied with the assurances provided with the application. The Secretary may not approve an application submitted under paragraph (2) if the Secretary determines—

"(i) that the State health authority for which the application was submitted did not comply with assurances provided with a prior application under paragraph (2), and

"(ii) that he cannot be assured that the authority will comply with the assurances provided with the application under consideration.

"(B) Whenever the Secretary, after reasonable notice and opportunity for a hearing to the State health authority of a State, finds that, with respect to funds paid to the authority under a grant under paragraph (1), there is a failure to comply with assurances provided under paragraph (2) with respect to the receipt of such grant, the Secretary shall notify the authority that further payments will not be made to it under such grant (or in his discretion that further payments will not be made to it from such grant for activities in which there is such failure), until he is satisfied that there will no longer be such failure. Until he is so satisfied, the Secretary shall make no payment to such authority from such grant or shall limit payment under such grant to activities in which there is no such failure.

"(4)(A) The total amount of grants received by a State health authority under paragraph (1) in any fiscal year shall be the greater of the amount determined under clause (i) or (ii) as follows:

"(i) The total amount of grants to a State health authority in a fiscal year shall be the lesser of—

"(I) the product of $1.50 and the population of the State served by such authority, or

"(II) in the case of the fiscal year ending September 30, 1980, 10 percent of the amount of State and local expenditures for comprehensive public health services within the State in the State's fiscal year which ended on or before July 1, 1979, in the case of the fiscal year ending September 30, 1981, 15 percent of the amount of such expenditures in the State's fiscal year which ended on or before July 1, 1980, and in the case of the fiscal year ending September 30, 1982, 20 percent of the amount of such expenditures in the State's fiscal year which ended on or before July 1, 1981.

"(ii) The total amount of grants to a State health authority in a fiscal year may not be less than the greater of—

"(I) the total amount of grants recieved by such authority under paragraph (1) for the fiscal year ending September 30, 1979, or

"(II) the product of $1 and the population of the State served by such authority.

Notwithstanding clause (ii), if for any fiscal year the amount appropriated for that fiscal year under paragraph (6) is less than the amount needed to make grants in that fiscal year in accordance with such clause to all State health authorities with approved applications, the total amount of grants in that fiscal year for a State health authority shall not be less than an amount which bears the same ratio to the amounts determined for such authority in accordance with such clause as the amount appropriated under such paragraph bears to the amount needed to make grants in accordance with such clause in such fiscal year to all State health authorities with approved applications.

"(B) The Secretary, at the request of a State health authority, may reduce the amount of the grants to it under paragraph (1), by—

"(i) the fair market value of any supplies (including vaccines and other prevention agents) or equipment furnished the State health authority, and

"(ii) the amount of the pay, allowances, and travel expenses of any officer or employee of the Government when detailed to the State health authority and the amount of any other costs incurred in connection with the detail of such officer or employee,

when the furnishing of such supplies or equipment or the detail of such an officer or employee is for the convenience of the State health authority and for the purpose of carrying out a program with respect to which its grant under paragraph (1) is made. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment, or in detailing the personnel, on which the reduction of such grant is based, and such amount shall be deemed as part of the grant and shall be

deemed to have been paid to the State health authority.

"(C) For purposes of subparagraph (A)(i)(II), the term 'State and local expenditures for comprehensive public health services' means expenditures by State and local public health authorities for public health services designated by the Secretary, but excludes by such authorities—

"(i) specifically required by Federal statutory law as a condition to the receipt of Federal financial assistance, or

"(ii) for operating inpatient care facilities, construction, or mental health programs.

"(D) For purposes of subparagraph (A) and paragraph (2)(D), populations shall be determined on the basis of the latest figures available from the Department of Commerce.

"(5) The Secretary may make payments under grants under paragraph (1) on the basis of such estimates and in such installments as appropriate with adjustments for any previous overpayments or underpayments.

"(6)(A) For the purpose of making grants under this subsection there are authorized to be appropriated $250,000,000 for the fiscal year ending September 30, 1980, $275,000,000 for the fiscal year ending September 30, 1981, and $300,000,000 for the fiscal year ending September 30, 1982.

"(B) Of the amount appropriated under subparagraph (A) for any fiscal year, the Secretary shall obligate not more than $1,000,000 for the uniform national health program reporting system referred to in paragraph (2)(C)(ii).

"(7) Regulations (including substantive amendments to regulations) under this subsection shall be promulgated by the Secretary after consultation with a conference of State health authorities. The Secretary shall consult with such conference prior to the publication of proposals for such regulations or amendments.".

DISEASE CONTROL PROGRAMS

SEC. 3. (a) Subsection (d)(1) of section 317 is amended by striking out "public and nonprofit private entities" and inserting in lieu thereof "State health authorities, health authorities of political subdivisions of States, other public entities, and nonprofit private entities".

(b)(1) Subsection (g)(1)(A) of such section is amended by inserting before ", there are authorized" the following "and for the purpose of grants under such subsection for the fiscal year ending September 30, 1979, for disease control programs to immunize individuals against influenza".

(2) Subsection (g)(1)(B) of such section is amended by striking out "for disease control programs for diseases borne by rodents" and inserting in lieu thereof "for rodent control programs".

(c)(1) Subsection (g)(1)(A) of such section is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$51,000,000 for the fiscal year ending September 30, 1979, $40,250,000 for the fiscal year ending September 30, 1980, and $46,280,000 for the fiscal year ending September 30, 1981".

(2) Subsection (g)(1)(B) of such section is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$15,000,000 for the fiscal year ending September 30, 1979, $17,300,000 for the fiscal year ending September 30, 1980, and $19,900,000 for the fiscal year ending September 30, 1981".

(3) Subsection (g)(1)(C) of such section is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: $5,800,000, for the fiscal year ending September 30, 1979, $6,700,000 for the fiscal year ending September 30, 1980, and $7,700,000 for the fiscal year ending September 30, 1981".

PREVENTION AND CONTROL OF VENEREAL DISEASES

SEC. 4. (a)(1) Subsection (f) of section 318 is repealed and subsections (g) and (h) of such section are redesignated as subsections (f) and (g), respectively.

(2) Subsection (g)(2) of section 317 is amended by striking out "Except as provided in section 318, no funds" and inserting in lieu thereof "No funds".

(b)(1) Subsection (d)(1) of section 318 is amended by inserting after "(1)" the following: "For the purpose of making grants under subsections (b) and (c) there are authorized to be appropriated $45,000,000 for the fiscal year ending September 30, 1979, $53,000,000 for the fiscal year ending September 30, 1980, and $62,000,000 for the fiscal year ending September 30, 1981. For grants under subsection (b) in any fiscal year, the Secretary shall obligate not less than 5 per centum of the amount appropriated for such fiscal year under the preceding sentence."

(2) Subsection (b) of such section is amended by striking out "(1)" and paragraph (2).

(3) Subsection (c) is amended (A) by striking out paragraph (2), (B) by striking out "(1)", and (C) by redesignating subparagraphs (A), (B), (C), (D), and (E) of paragraph (1) as paragraphs (1), (2), (3), (4), and (5), respectively.

FAMILY PLANNING

SEC. 5. (a) Section 1001(a) is amended by striking out "family planning methods (including natural family planning methods)" and inserting in lieu thereof "family planning methods and services (including natural family planning methods, infertility services, and services for adolescents)".

(b)(1) Section 1001(c) is amended (A) by striking out "and" after "1977;", and (B) by inserting before the period a semicolon and the following: "$200,000,000 for the fiscal year ending September 30, 1979; $230,000,000 for the fiscal year ending September 30, 1980; and $264,500,000 for the fiscal year ending September 30, 1981".

(2) Section 1003(b) is amended (A) by striking out "and" after "1977;", and (B) by inserting before the period a semicolon and the following: "$3,100,000 for the fiscal year ending September 30, 1979; $3,600,000 for the fiscal year ending September 30, 1980; and $4,100,000 for the fiscal year ending September 30, 1981".

(3) Section 1004(b)(1) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$105,000,000 for the fiscal year ending September 30, 1979, $120,800,000 for the fiscal year ending September 30, 1980, and $138,900,000 for the fiscal year ending September 30, 1981".

(4) Section 1005(b) is amended (A) by striking out "and" after "1977;", and (B) by inserting before the period a semicolon and the following: "$700,000 for the fiscal year ending September 30, 1979; $805,000 for the fiscal year ending September 30, 1980; and $926,000 for the fiscal year ending September 30, 1981".

GENETIC DISEASES, HEMOPHILIA PROGRAMS, AND SUDDEN INFANT DEATH SYNDROME

SEC. 6. (a) Section 402 of the Health Research and Health Services Amendments of 1976 is amended by striking out "including" and inserting in lieu thereof "such as".

(b) The first sentence of section 1104(a) is amended by striking out "such information" and inserting in lieu thereof "such information (including assurances for an evaluation whether performed by the applicant or by the Secretary)".

(c)(1) Part A of title XI is amended by adding after section 1106 the following new section:

"APPLIED TECHNOLOGY

"SEC. 1107. The Secretary, acting through an identifiable administrative unit, shall—

"(1) conduct epidemiological assessments and surveillance of genetic diseases to define the scope and extent of such diseases and the need for programs for the diagnosis, treatment, and control of such diseases, screening for such diseases, and the counseling of persons with such diseases;

"(2) on the basis of the assessments and surveillance described in paragraph (1), develop for use by the States programs which combine in an effective manner diagnosis, treatment, and control of such diseases, screening for such diseases, and counseling of persons with such diseases; and

"(3) on the basis of the assessments and surveillance described in paragraph (1), provide technical assistance to States to implement the programs developed under paragraph (2) and train appropriate personnel for such programs.

In carrying out this section, the Secretary may, from funds appropriated under section 1101(b), make grants to or contracts with public or nonprofit private entities (including grants and contracts for demonstration projects).".

(2) Section 1101(b) is amended by inserting "and section 1107" after "this section".

(d)(1) Section 1101(b) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$20,000,000 for the fiscal year ending September 30, 1979, $23,000,000 for the fiscal year ending September 30, 1980, and $26,500,000 for the fiscal year ending September 30, 1981".

(2) Section 1121(b)(5) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$3,500,000 for the fiscal year ending September 30, 1979, $4,000,000 for the fiscal year ending September 30, 1980, and $5,000,000 for the fiscal year ending September 30, 1981".

(3) Section 1131(f) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$3,500,000 for the fiscal year ending September 30, 1979, $4,000,000 for the fiscal year ending September 30, 1980, and $5,000,000 for the fiscal year ending September 30, 1981".

(4) Section 1132(e) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$2,500,000 for the fiscal year ending September 30, 1979, $3,000,000 for the fiscal year ending September 30, 1980, and $5,000,000 for the fiscal year ending September 30, 1981".

HOME HEALTH SERVICES

SEC. 7. (a) Part A of title III is amended by inserting after section 311 the following new section:

"HOME HEALTH SERVICES

"SEC. 312. (a)(1) For the purpose of demonstrating the establishment and initial operation of home health agencies (as defined in section 1861(o) of the Social Security Act) which will provide home health services (as defined in section 1861(m) of the Social Security Act) in areas in which such services are not otherwise available, the Secretary may, in accordance with the provisions of this section, make grants to public and nonprofit private entities to meet the initial costs of establishing and operating such agencies and expanding the services available through existing agencies, and to meet the costs of compensating professional and paraprofessional personnel during the initial operation of such agencies or the expansion of services of existing agencies.

"(2) In making grants under this subsection, the Secretary shall consider the relative needs of the several States for home health services and preference shall be given to areas within a State in which a high percentage of the population proposed to be served is

composed of individuals who are elderly, medically indigent, or both.

"(3) Applications for grants under this subsection shall be in such form and contain such information as the Secretary shall by regulation prescribe.

"(4) Payments under grants under this subsection may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(5) There are authorized to be appropriated for grants under this subsection $14,000,000 for the fiscal year ending September 30, 1979, $16,100,000 for the fiscal year ending September 30, 1980, and $18,500,000 for the fiscal year ending September 30, 1981.

"(b)(1) The Secretary may make grants to public and nonprofit private entities to assist them in demonstrating the training of professional and paraprofessional personnel to provide home health services (as defined in section 1861(m) of the Social Security Act).

"(2) Applications for grants under this subsection shall be in such form and contain such information as the Secretary shall by regulation prescribe.

"(3) Payments under grants under this subsection may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(4) There are authorized to be appropriated for grants under this subsection $2,000,000 for the fiscal year ending September 30, 1979, $2.500.000 for the fiscal year ending September 30, 1980, and $3,000,000 for the fiscal year ending September 30, 1981.".

(b) Effective October 1, 1978, section 602 of Public Law 94–63 is repealed.

HYPERTENSION PROGRAMS

SEC. 8. (a) Part A of title III is amended by adding after section 312 (added by section 7 of this Act) the following new section:

"HYPERTENSION PROGRAMS

"SEC. 313. (a) The Secretary may make grants to State health authorities to assist them in meeting the costs of providing programs for screening for, and the detection, diagnosis, prevention, and control (including referral for treatment) of, hypertension.

"(b) No grant may be made under subsection (a) unless an application therefor has been submitted to, and approved by, the Secretary. Such an application shall be in such form and be submitted in such manner as the Secretary shall by regulation prescribe and shall provide—

"(1) a complete description of the type and extent of the program which is to be provided by or through the applicant with a grant under subsection (a);

"(2) assurances satisfactory to the Secretary that the program to be provided under the grant applied for will be provided in accordance with the State health plan in effect under section 1524(c);

"(3) assurances satisfactory to the Secretary that the applicant will make such reports respecting the program as the Secretary may require; and

"(4) such other information as the Secretary may by regulations prescribe.

"(c) The Secretary shall determine the amount of any grant made under subsection (a). Payments under such grants may be made in advance on the basis of estimates or by the way of reimbursements, with necessary adjustments on account of underpayments or overpayments, and in such installments, and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(d)(1) Each recipient of a grant under subsection (a) shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such grant, the total cost of the undertaking in connection with which such grant was made, and the amount of that portion of the cost of the undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient of grants under subsection (a) that are pertinent to such grants.

"(e) The Secretary may provide technical assistance to State health authorities in connection with the operation of their hypertension programs.

"(f) The Secretary shall submit annually to the Congress a report (1) on the extent of the problems presented by hypertension, and (2) on the effectiveness of the activities assisted under grants under subsection (a).

"(g) There are authorized to be appropriated for grants under subsection (a) $28,800,000 for the fiscal year ending September 30, 1980, $33,000,000 for the fiscal year ending September 30, 1981, and $38,000,000 for the fiscal year ending September 30, 1982."

(b) Section 317(f) is amended by striking out "hypertension,".

LEAD-BASED PAINT POISONING PREVENTION PROGRAMS

SEC. 9. (a) Part A of title III is amended by adding after section 314 the following new section:

"LEAD-BASED PAINT POSIONING PREVENTION PROGRAMS

"SEC. 315. (a)(1) The Secretary may make grants to agencies of units of general local governments and to private nonprofit entities to assist them in meeting the costs of providing lead-based paint poisoning prevention programs.

"(2) For purposes of this section—

"(A) the term 'lead-based paint poisoning prevention program' means any program which provides for—

"(i) educational programs intended to communicate to parents, educators, and local health officials the health danger and prevalence of lead-based paint poisoning among children;

"(ii) the development and carrying out of intensive community testing programs designed to detect incidents of lead-based paint poisoning among community residents and to insure prompt medical treatment for such afflicted individuals;

"(iii) the development and carrying out of intensive followup programs to insure that identified cases of lead-based paint poisoning are protected against further exposure to lead-based paints in their living environment;

"(iv) the establishment of centralized laboratory facilities for analyzing biological and environmental lead specimens; and

"(v) any other actions which will reduce or eliminate lead-based paint poisoning; and

"(B) the term 'units of general local government' means (i) any city, county, township, town, borough, parish, village, or other general purpose political subdivision of a State, (ii) any combination of units of general local government in one or more States, (iii) an Indian tribe, and (iv) with respect to lead-based paint poisoning elimination activities, in their urban areas, and territories and possessions of the United States.

"(b) No grant may be made under subsection (a) unless an application therefor has been submitted to, and approved by, the Secretary. Such an application shall be in such form and be submitted in such manner as the Secretary shall by regulation prescribe and shall provide—

"(1) a complete description of the type and extent of the lead-based paint poisoning prevention program which is to be provided by or through the applicant with a grant under subsection (a);

"(2) assurances satisfactory to the Secretary that the program to be provided under the grant applied for will be provided in accordance with the State health plan in effect under section 1524(c);

"(3) assurances satisfactory to the Secretary that the applicant will make such reports respecting the program as the Secretary may require; and

"(4) such other information as the Secretary may by regulation prescribe.

"(c) The Secretary shall determine the amount of a grant made under subsection (a). Payments under such grants may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(d)(1) Each recipient of a grant under subsection (a) shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such grant, the total cost of the undertaking in connection with which such grant was made, and the amount of that portion of the cost of the undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and recods of the recipient of grants under subsection (a) that are pertinent to such grants.

"(e) The Secretary may provide technical assistance to recipients of grants under subsection (a) in connection with the operation of their lead-based paint poisoning prevention programs.

"(f) The Secretary shall submit annually to the Congress a report (1) on the extent of the problems presented by lead-based paint, and (2) on the effectiveness of the programs assisted under grants under subsection (a).

"(g) There are authorized to be appropriated for grants under subsection (a) $14,000,000 for the fiscal year ending September 30, 1979, $16,100,000 for the fiscal year ending September 30, 1980, and $18,500,000 for the fiscal year ending September 30, 1981.".

(b) Effective October 1, 1979, titles I and II and sections 504 and 505 of the Lead-Based Paint Poisoning Prevention Act are repealed, and section 506 of such Act is redesignated as section 504.

EFFECT OF LEAD ON CHILD DEVELOPMENT

SEC. 10. The Secretary of Health, Education, and Welfare shall conduct a study to determine the long-term effect on child development of various levels of lead in blood. The Secretary shall report the results of such study to the Congress together with recommendations for such legislation as the Secretary determines is appropriate.

EMERGENCY MEDICAL SERVICES SYSTEMS

SEC. 11. (a) Section 1203(c) is amended (1) effective June 30, 1975, by striking out the first sentence of paragraph (2), (2) by striking out paragraph (3), and (3) by redesignating paragraphs (4) and (5) as paragraphs (3) and (4), respectively.

(b) Effective June 30, 1975, the first sentence of section 1204(b)(1) is repealed.

(c) Subparagraph (B) of section 1206(b)(1) is amended to read as follows:

"(B) No applicant may receive more than a total of five grants, contracts, or grants and contracts under this part, except that in determining the number of grants and con-

tracts which an applicant received under this part, the Secretary shall not include any grant or contract received under section 1202(b)(1) or 1205.".

(d)(1) Section 1207(a)(1) is amended by striking out "sections 1203 and 1204" and inserting in lieu thereof "sections 1202, 1203, and 1204".

(2) Section 1207(a)(5) is amended by striking out "for the succeeding fiscal year" and inserting in lieu thereof "for each of the two succeeding fiscal years".

SELECT PANEL FOR THE PROMOTION OF CHILD HEALTH

SEC. 12. (a) The Secretary of Health, Education, and Welfare (hereinafter in this section referred to as the "Secretary") shall establish within the Office of the Secretary a Select Panel for the Promotion of Child Health (hereinafter in this section referred to as the "panel").

(b)(1) The panel, after reviewing all the significant medical, scientific, behavioral, and epidemiological studies concerning the promotion of child health and the prevention of childhood diseases and concerning the efficacy and efficiency of child health programs, shall—

(A) formulate specific goals with respect to the promotion of the health status of United States;

(B) develop a comprehensive national plan for achieving these goals and otherwise promoting the health of children in the United States;

(C) transmit to the Secretary, to the Committee on Interstate and Foreign Commerce of the House of Representatives, and to the Committee on Human Resources of the Senate, not later than eighteen months after the date of the enactment of this Act, a report detailing the comprehensive national plan it has developed and recommendations for such administrative, legislative, and other actions as it deems appropriate to implement this plan and to otherwise promote the health of children in the United States.

(2) The panel shall include in its comprehensive national plan (developed under paragraph (1)(B)) recommendations with respect to—

(A) the appropriate type and quantity of preventive health care and other health services needed by children in general and by particular types of children at risk;

(B) the appropriate methods (and providers) for delivering and financing the delivery of such services;

(C) the appropriate methods for coordinating and consolidating, within an agency and between agencies, the administration of child health promotion programs;

(D) the need for research into the delivery of such services and the promotion of child health;

(E) the appropriate methods for instructing children and parents in methods of maintaining their health;

(F) the encouragement of innovative programs to promote child health;

(G) the appropriate methods (including demonstration programs) for applying research findings to delivery of health services to children and otherwise to promoting the health of children;

(H) the appropriate relationship between child health promotion programs and health planning organizations;

(I) the appropriate support of training of health personnel for child health promotion programs; and

(J) the appropriate technical assistance to States to implement child health promotion programs.

(c)(1) The panel shall be composed of the Assistant Secretary for Health and the Assistant Secretary for Planning and Evaluation, who shall serve as ex officio members, and of fifteen other members who shall be appointed by the Secretary not later than sixty days after the date of the enactment of this Act. Among members of the panel appointed by the Secretary, the Secretary shall appoint not less than three, nor more than five, individuals employed by the Department of Health, Education, and Welfare, and shall appoint representatives from the scientific, medical, allied health, mental health, preventive health, public health, and education professions, as well as consumers and representatives from State and local health agencies.

(2) The Secretary shall designate, at the time of appointment of members of the panel, one member to serve as chairperson and another to serve as vice chairperson of the panel.

(3) Members of the panel shall serve for the life of the panel and the Secretary shall appoint individuals to fill vacancies on the panel as they may arise.

(4) Each member of the panel (who is not a full-time officer or employee of the United States) shall be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including traveltime) during which the member is engaged in the actual performance of duties vested in the panel. All the members of the panel shall be allowed, while away from their homes or regular places of business in the performance of service for the panel, travel expenses (including per diem in lieu of subsistence) in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(d)(1) Upon the request of the panel, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the panel to assist the panel in carrying out its functions.

(2) The Secretary shall provide the panel with such administrative services and facilities as may be required to carry out its functions.

(e)(1) The panel may, for purposes of carrying out its functions, hold such hearings, sit and act at such times and places, take such testimony, receive such evidence, and appoint such advisory committees at it may deem advisable.

(2) The panel may secure directly from any department or agency of the United States information necessary to carry out its functions. Upon request of the chairperson of the panel, the head of each such department or agency shall, to the extent permitted by law, furnish the information and otherwise cooperate with the panel.

(f) The panel shall cease to exist ninety days after the date of submittal of the report described in subsection (b)(1)(C).

(g) There is authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1979, to carry out this section. Sums appropriated under this subsection shall remain available for expenditure until the date the panel ceases to exist.

AMENDMENT OFFERED BY MR. ROGERS

Mr. ROGERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 11, strike out lines 11 through 14 and insert the following: "$218,000,000 for the fiscal year ending September 30, 1980, and $257,000,000 for the fiscal year ending September 30, 1981."

Mr. ROGERS. Mr. Chairman, this amendment, coupled with one other Dr. CARTER and I will offer, has the effect of reducing the total authorizations in this bill by $388 million, or nearly 15 percent—14.5 percent.

We have reduced fiscal year 1980 authorizations for the health incentive grant program by $32 million; fiscal year 1981 authorizations for that program by $18 million; and have deleted the fiscal year 1982 authorizations of $300 million. In addition, we have deleted the fiscal year 1982 authorization of $38 million for programs of hypertension.

Mr. Chairman, I would urge adoption of the amendment.

Mr. CARTER. Mr. Chairman, I strongly support the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. ROGERS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROGERS

Mr. ROGERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 23, line 6, insert "and" after "1980,", and beginning in line 7 of that page strike out ", and $38,000,000 for the fiscal year ending September 30, 1982".

Mr. ROGERS. Mr. Chairman, this is a companion amendment to the prior one to complete the reduction of funds for fiscal year 1982. This amendment reduces authorizations by $38 million.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. ROGERS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. THORNTON

Mr. THORNTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. THORNTON: Page 8, strike out lines 9 and 10 and insert in lieu thereof the following:

"(I) an amount determined by the Secretary which may not be less than the product of $1.00 and the population of the State served by such authority or more than the product of $1.50 and such population, or

Page 8, insert after line 22 the following:

In determining the amount of a grant to a State health authority under subclause (I), the Secretary shall take into account the financial need of such State and the relative level of State and local expenditures for comprehensive public health services (as defined in subparagraph (C)). In determining the financial need of a State, the Secretary shall consider, as major factors, the proportion of the State's population whose income level is below the poverty income level established by the Secretary and the proportion of its population which is living in medically underserved areas.

Mr. THORNTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. THORNTON. Mr. Speaker, I want to commend the chairman of the subcommittee, the gentleman from Florida, (Mr. ROGERS) for the fine work he has done in managing this important piece of legislation. I strongly support the programs authorized in this bill, and believe that the health care of all of our citizens will be improved because of this legislation.

While I support the services which this bill will provide, I am concerned about the way in which these services will be funded. The current funding formula for comprehensive public health services (as defined in section 314(d) of the Public Health Service Act) provides that the Federal share for each State would be based on that State's population and financial need. The proposed funding formula in H.R. 12370 deletes any reference to financial need; thus; the poorer and less populated States like Arkasnas will not receive as much money as the more populous, wealthy States.

This is especially disturbing to me because those of us living in rural America experience a more acute shortage of physicians and health services than our urban neighbors. According to recent HEW statistics, approximately 51 million people, representing 25 percent of the total U.S. population, reside in medically underserved areas. Thirty million, or roughly 60 percent, are rural residents. While one out of two rural residents live in a medically underserved area, only 1 out of 7 urban residents live in such an area.

The basis for identifying these medically underserved areas is an index which is composed of four criteria: ratio of primary care physicians to population; infant mortality rate; percentage of the population which is 65 years of age or older; and percentage of the population with family income below the poverty level. An assessment of need is made by assigning weights to each of these measures and applying them on a county-by-county basis in rural areas and on a census tract—by census tract in urban areas. The Public Health Service has declared 23 counties in Arkansas as medically underserved areas. It is not unusual for my constituents to travel 20 miles to see a doctor or a dentist, and we have all felt the frustration and helplessness of driving 20 to 30 miles to a hospital in an emergency situation.

While rural areas account for 60 percent of the Nation's medically underserved population, they receive less than 25 percent of the available funding. Under the Community Health program, HEW currently spends more than $7.50 for every medically underserved urban resident, but only about $1 for every rural person residing in a medically underserved area. Although the Rural Health Initiative program was established to address the special needs of rural areas, the 260 rural health projects which were funded under this program operated on a total budget of less than $23 million, while the 160 or so predominantly urban community health centers received approximately $185 million.

Low population density, high proportions of the elderly and the poor, inadequate transportation, and an acute shortage of physicians all combine to make access to health care in rural communities very difficult. In the absence of adequate health personnel in rural areas, public health has filed the gap by providing many medical services that would normally have been carried out by a private physician. In many counties, the health department is the only provider of health services; in other counties, the health department is the only provider for poor people because the private providers refuse to care for medicaid patients.

Therefore, I think it is extremely important that we take into account the medical services available to a community when we develop a formula for the allocation of Federal funds for comprehensive health services.

The amendment which I am proposing will not decrease the present level of allocation for any State, nor will it take away the incentive for States to contribute to the funding. It will, however, attempt to distribute funds more equitably in relation to need by giving attention to the numbers of medically underserved and people living below the poverty level, as well as the total population in each State.

Mr. Chairman, this amendment reflects the importance of recognizing the factor of need in determining the amount of grants to the States. This has been accomplished in the Senate because of the leadership of my colleagues from Arkansas, Senator BUMPERS and Senator HODGES.

I want to congratulate them on their leadership in the matter, and urge the adoption of this amendment.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I will be pleased to yield to the gentleman from Florida.

Mr. ROGERS. Mr. Chairman, we have looked at the gentleman's amendment on this side. I know he has had it also looked at on the other side. The gentleman from Kentucky (Dr. CARTER) might want to comment.

We have no objection on this side.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I will be pleased to yield.

Mr. CARTER. Mr. Chairman, this is a great effort for the rural areas and I certainly support the amendment.

Mr. THORNTON. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I ask that the amendment be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas (Mr. THORNTON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CARTER

Mr. CARTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CARTER: Page 14, line 11, insert "(1)" after "SEC. 5. (a)".

Page 14, after line 16, add the following:

(2) Section 1006 is amended by adding at the end thereof the following new subsection:

"(d) (1) A grant may be made or a contract entered into under section 1001 or 1005 only upon assurances satisfactory to the Secretary that informational or educational materials developed or made available under the grant or contract will be suitable for the purposes of this title and for the population or community to which they are to be made available, taking into account the educational and cultural background of the individuals to whom such materials are addressed and the standards of such population or community with respect to such materials.

"(2) In the case of any grant or contract under section 1001, such assurances shall provide for the review and approval of the suitability of such materials, prior to their distribution, by an advisory committee established by the grantee or contractor in accordance with the Secretary's regulations. Such a committee shall include individuals broadly representative of the population or community to which the materials are to be made available."

Mr. CARTER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. CARTER. Mr. Chairman, the purpose of this amendment is to provide a reasonable review process for educational and informational materials that are developed or made available with family planning funds.

It is intended to address the concern that I and other Members have had about the improper use of Federal dollars under title X—namely to support materials that are in poor taste and inappropriate.

Specifically this amendment would require the recipient of family planning funds to provide assurances, satisfactory to the Secretary, that informational or educational materials developed or made available under this title will be suitable for the purposes of this title and for the population or community in which they are to be made available.

This amendment also require grantees to establish an advisory committee to review and approve the suitability of such materials before they are distributed. This advisory committee shall include individuals who are broadly representative of the population or community where the materials are to be distributed.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I am happy to yield to the distinguished chairman.

Mr. ROGERS. Mr. Chairman, I think the amendment that the gentleman from Kentucky is offering has great merit. I know there are some Members who are concerned about materials that some 3 years ago were published by some family planning programs.

Mr. Chairman, this amendment will get to that problem, and I think the gentleman is correct in offering the amendment. I would urge its adoption.

Mr. CARTER. Mr. Chairman, I thank the chairman of the subcommittee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kentucky (Mr. CARTER).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The CHAIRMAN. The pending business is the demand of the gentleman from Ohio (Mr. ASHBROOK) for a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: Page 15, add after line 17 the following:

(5) Section 1006 is amended by adding at the end the following new subsection: "(d) No program or project which directly or indirectly receives funds under this title may prescribe or dispense any prescription drug or device used for birth control purposes, to an unemancipated child under the age of 16 unless the parent or guardian of such child is notified of the intent to prescribe or dispense such drugs or devices."

Mr. VOLKMER. Mr. Chairman, this amendment is for the purpose of providing that in Family Planning Services, when they intend to and do provide prescriptions, that is, dispense and prescribe prescription drugs or devices to a minor of the age of 15 or under, that they are to notify the parents that they intend to prescribe or dispense such drugs or devices.

Now, what brings this about? This amendment is brought about by the concern of many parents in this Nation that, contrary to their beliefs both as to their social beliefs and to their moral beliefs, that their children are being provided such contraceptive devices without their knowledge or information. They have great concern of this, since many of them feel that it is both morally and socially wrong. They object strenuously to their tax dollars being used for such purposes. This amendment does not prevent the Family Planning Center from providing such information and prescription; it just means that the parents would have to be notified that they intend to provide such.

Recently, a case in Michigan held—and I think it is constitutionally good law—that a parent does have a constitutional right to be notified; that a parent, as the head of a family, is an underlying part of our society and our structure. The right of parents to the custody, care, and religious and moral education of their children is firmly established in the traditions and laws of this Nation.

The right of parents and the family are now being invaded by the family planning. We are not talking about anything other than prescription drugs and devices. A lot of people perhaps will think there is nothing wrong with the pill. The pill in the hands of an 11- or 12-year-old can do injury to the health of a youngster.

The FDA on their labeling requirement gives quite a few warnings about the use of the pill, and I believe that the members of the committee surely know that if there are scanty or irregular periods or a young woman is without a regular cycle, she should use another method of contraception, because if she uses the pill—and so forth.

There is no question that this is being done at the present time. Not too long ago I was back in my district after I had had this amendment printed in the RECORD. I was visited by family planning in my district in St. Louis County, and we discussed my amendment and the purpose of it. The basic purpose is to uphold the rights of the parents just to know—just to know—what is happening concerning their children that are of tender age.

We are not talking about the 16- or 17- or 18- or 19-year-old child; we are talking about the 11-year-old or the 12-year-old or the 13-year-old or the 14-year-old, or the 15-year-old child.

I feel in my opinion, as the court said in Michigan, that the parents do have a constitutional right to know. This amendment was offered in the Senate and adopted at that time by agreement of the managers in the Senate. I believe that it makes sound policy. I urge the Committee to adopt the amendment.

Mr. ROGERS. Mr. Chairman, I reluctantly must rise to oppose the amendment, and I think we do need to look at this and think it through. It is very appealing on its first face. I think all Members should know that each year in this Nation there are 1 million adolescent females who become pregnant—1 million a year. If these young people are sexually active—and any amendment we pass will not change that—is it not better for them to have the proper information so that they could avoid pregnancies and avoid the need for an abortion? That is what this bill is trying to do.

I agree that family planning programs should encourage adolescents to discuss their sexual activities with their parents, but many simply will not come in if we require such a discussion. And what will happen to them? They risk becoming pregnant and we risk spending $4.5 billion a year in welfare costs for adolescent mothers and their dependent children.

So I do think we need to be reasonable in the approach and certainly it is the intent of the committee that all of the family planning programs should encourage adolescents to discuss their sexual activities with their parents.

So the gentleman I know means well and we share his concern, but the committee has thought this through and I would urge the Members to be practical, to be realistic, and to vote down this amendment.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman.

Mr. VOLKMER. There is only one thing—and I know we have various differences of opinion.

Mr. ROGERS. Yes.

Mr. VOLKMER. On this matter.

Mr. ROGERS. Yes.

Mr. VOLKMER. But I think we should clarify one thing that was said.

Mr. ROGERS. All right.

Mr. VOLKMER. And that is that they would not be able to give information under this amendment. The gentleman knows the amendment does not stop them from providing any information or pamphlets or anything else they want to. All it does is say they could not dispense, unless they notify the parents, the devices and prescription drugs, that is all.

They can give all the information they want. And I think they should be able to.

Mr. ROGERS. This amendment does not stop them from going to any drug store in this country to get what they want. The gentleman says that in a family planning setting we are saying, "We are not going to tell you anything, or to let you know anything unless you tell your parents."

Mr. VOLKMER. No, it does not.

Mr. ROGERS. If the gentleman will permit me to continue, that is exactly what it says; they are not going to be given any of these devices unless they go and tell their parents. But they can go to the drug store where they do not even know what they are getting, where they are not instructed properly, and they will become pregnant, and you will have these parents wanting an abortion and you will be building on to the $4.5 billion in the welfare program.

I would urge the defeat of the amendment.

The CHAIRMAN pro tempore (Mr. FLIPPO). The question is on the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

The question was taken; and on a division (demanded by Mr. VOLKMER), there were—ayes 10, noes 45.

Mr. DORNAN. Mr. Chairman, I demand a recorded vote, and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

Mr. DORNAN. Mr. Chairman, I renew my demand for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN pro tempore. Are there other amendments to the bill?

AMENDMENT OFFERED BY MR. DORNAN

Mr. DORNAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN: Page 15, insert after line 17 the following: (C) section 1001 (a) is amended by inserting "(1)" after "operation of", and (2) by inserting before the period a comma and the following: "or (2) projects which provide

counseling respecting the alternatives to abortion."

Mr. DORNAN. Mr. Chairman, I have five amendments, and I will try to go through these as quickly as possible. I will not take the well. I may or may not ask for a record vote on each one. I will make my explanation comprehensive and brief.

This amendment addresses itself to a situation of inequality in the way title X funds are distributed to counseling organizations which assist women who are in a distressful pregnancy situation. In this particular amendment we can do something for the stress and loneliness of these young women. It's effect would be to help couples who desire to adopt children. It would enable groups which specialize in alternatives to abortion to receive title X funding without all the counseling encumbrances that HEW currently places on them as an eligibility precondition to title X grants or contracts.

Why fault groups like Birthright or Alternatives to Abortion, Inc.? Why? They help girls through a crisis pregnancy. If these groups do not wish to get into areas of counseling abortion or sterilization. Which in their judgment is not in the best interest of the young girls they counsel, that is their business. I do not see any reason why they should be denied a share in some of these tax funds we are authorizing.

The language is very simple and straightforward. That is my position.

Mr. ROGERS. Mr. Chairman, here again I regretfully must oppose the amendment. I am sure the gentleman means well, and I know his strong feelings, but to adopt this amendment would simply change the whole concept of family planning. Family planning occurs before pregnancy. If the gentleman wants to set up a specific program of counseling after pregnancy in some other program, I would see nothing wrong with it. But the need is too great for family planning before pregnancy, and that is when we want to be able to do something to prevent the need for abortion. If people become pregnant, as we would under the gentleman's amendment, then what happens?

We are trying to say let us do something before pregnancy occurs. That is what family planning is about.

As I say, I know the gentleman means well. I salute him for his interest, but I must say this is contra. This amendment should be defeated because we have 3.5 million poor women that are presently unserved that we can help to prevent pregnancy, not wait until they get pregnant and then say, "Well, we will counsel you a little bit." Then it is too late. Spend the money where it will do the most good and prevent that welfare bill from going up to $4 or $5 billion.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. DORNAN

Mr. DORNAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN: Page 15, insert after line 17 the following: (C) Section 1006 is amended by adding at the end the following new subsection: "(d) The Secretary may not deny an application for a grant or contract under this title on the basis that the applicant does not provide abortion services, sterilization, or counseling respecting contraception."

Mr. DORNAN. Mr. Chairman, in this particular amendment, I refer to the distinguished gentleman from Florida's own words about the expressed congressional intent of this program, to prevent unwanted pregnancy. Here we have again unfairness. Natural family planning education programs are prejudiced against because they simply do not provide abortion service, sterilization or counseling respecting artificial contraception.

Why is this fertility method regulation that has been discussed world-wide, and has received great attention just in the recent year alone, why is it no NFP considered eligible to receive direct Federal funding, as do other family planning methods, so that it would be protected under his amendment?

Mr. Chairman, I simply rest on that.

Mr. ROGERS. Mr. Chairman, I oppose this amendment. For instance, here he says that title X funds cannot be used for abortion. Of course not, because under our law you cannot use title X funds for abortion. It cannot be done. There is a strict prohibition in this law.

Now, counseling respecting contraception is a basis for voluntary family programs. That is the whole thesis, to try to prevent a pregnancy. To say that we are going to pay somebody who does not provide necessary information, well, you will be wasting your money.

Mr. CARTER. Mr. Chairman, I rise to oppose the amendment, reluctantly. I feel that most of it is already covered in the bill, because abortion is not permitted in this legislation. Of course, information about contraception, and contraceptive methods certainly is provided. This is a part of family planning.

Mr. Chairman, I oppose the amendment of the gentleman from California.

Mr. DORNAN. Mr. Chairman, will the gentleman yield for one minute?

Mr. CARTER. I yield to the gentleman.

Mr. DORNAN. Mr. Chairman, I did not take a full 5 minutes on my amendment, so I thank the gentleman for yielding.

Is this Congress going on record, then, as giving a sort of second-class citizenship to those groups that believe in natural family planning, those groups that for reasons of conscience or ethics do not want to get into counseling methods they find offensive?

I would refer particularly to use of the birth control pill on which we are now getting "early warning" vibrations from HEW that the pill may be totally condemned in the next 2 or 3 years as unsafe for health. In younger teenage girls, for instance, whose bones are still forming, those under 17 years of age, there is strong medical evidence that 52 negative changes can take place in a young woman who is on the birth control pill.

What is this bias against natural family planning?

Mr. CARTER. I will say, Mr. Chairman, that certainly we have no bias against other natural means of family planning. In particular, I suppose the gentleman is referring to the rhythm method which relies upon use of a thermometer at a certain time of the month to predict ovulation. Actually, natural family planning is already covered in the legislation.

If the gentleman would read section 1001 of title X, he would know that the Secretary is authorized to make grants to entities which provide a broad range of family planning methods, not just one, but many. I believe the gentleman's intent is already covered and is already part of the law.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the gentleman from Florida.

Mr. ROGERS. Mr. Chairman, the gentleman from Kentucky (Mr. CARTER) is entirely correct. I am sure the gentleman from California (Mr. DORNAN) would like to know that we expressly require in the law that natural family planning methods shall be provided. The gentleman's intent is covered in the law already.

Mr. Chairman, I urge the defeat of the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The question was taken; and on a division (demanded by Mr. DORNAN) their were—ayes 8, noes 49.

Mr. COUGHLIN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from California (Mr. DORNAN) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. DORNAN

Mr. DORNAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN: page 15, insert after line 17 the following:

(C) Section 1006 is amended by adding at the end the following: "No grant or contract authorized by this title may be made or entered into with an entity which directly or indirectly provides abortion, abortion counseling, or an abortion referral services."

Mr. DORNAN. Mr. Chairman, if I may point out to the distinguished chairman and to the distinguished minority member, we are now into an amendment that will reinforce the assurances the gentlemen have already given us, namely, that none of the money under this title X funding measure will be used in the family planning area for abortion, abortion counseling, or abortion referral in any way whatsoever. I have here a letter from the Department of HEW, dated April 19, 1974, Office of the General Counsel, signed by Joel M. Mangel.

He says in the second paragraph:

On the basis of section 1008 and the attendant legislative history, it is the Department's policy that Federal funds may not be expended to perform, encourage, or promote abortions.

But, it has come to my attention there are at least 117 hospitals and clinics receiving title X family planning money where abortion is a method of family planning and is used both to referral and counsel abortion as a very basic approach, even with very young pregnant women.

If I may come back to the Dingell wordage, which goes all the way back to 1970. I have the wordage before me from the CONGRESSIONAL RECORD of that year. This language has never been removed from the law and it says very simply:

None of the funds appropriated under this title shall be used in programs where abortion is a method of family planning.

If I may quote from the distinguished gentleman from Florida, he said:

The law is very clear as to the design and content of programs funded under title X of the Public Health Services Act. None of the funds appropriated under title X may be used in programs where abortion is a method of family planning.

This provision would not merely prohibit the support of any program in which abortion counseling or abortion referral services are offered.

This wordage therefore prohibits use of funds for family planning in any program in which abortion counseling or abortion services are offered. So, when there are abuses in this area, I suggest to the distinguished chairman and the distinguished ranking minority member, that since this would only affect 3 to 4 percent of the grantees under title X, this would assure us that abuses will not take place in the future.

Mr. ROGERS. I reluctantly oppose the amendment, Mr. Chairman.

This is an unneeded amendment. We have a specific prohibition in the law that says no funds—none—in title X may be used for abortion as a method of family planning. That means none. Absolutely no funds could be used.

There are some 1,700 local health departments, 650 public and private hospitals, 173 Planned Parenthood affiliates, and 600 voluntary agencies that are under the prohibition of using any title X funds for abortion.

Abortion is not a method of family planning. Abortion comes after pregnancy—after pregnancy. And the gentleman misses the point of what we are doing in title X. It is before—before. It is to let people know how to avoid pregnancy. We cannot use any funds for abortion. The amendment is not needed. I urge its defeat.

Mr. DORNAN. Mr. Chairman, will the gentleman yield for one question?

Mr. ROGERS. Certainly I yield to the gentleman from California.

Mr. DORNAN. What about the 117 organizations at a minimum that are abusing these funds?

Mr. ROGERS. They are not using title X funds for abortion as a method of family planning. It is simply not done. It is not permitted under the law.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield for a further question?

Mr. ROGERS. Certainly.

Mr. VOLKMER. Do any of these people that come to the family planning clinics, do the records show that any of them when they come there are pregnant?

Mr. ROGERS. Oh, sure, some are indeed pregnant. Also you may have a hospital that may be running a family planning section in one wing and maybe they do an abortion in that hospital to save the life of the mother. It is a legal procedure. If the doctors there do not want to do it, they do not have to do it. We have already said if it is against their conscience they do not have to do it. But you mean to say, here is a good institution and they cannot run a family planning clinic because somewhere down the hallway—somewhere in an operating room—they might have at some time or other performed an abortion, or they might perform an abortion?

I would say the amendment offered by the gentleman from California (Mr. DORNAN) should be defeated.

Mr. VOLKMER. I am not saying that.

Mr. ROGERS. That is silly.

I urge that the amendment be defeated.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the gentleman from Florida (Mr. ROGERS), on a number of occasions has engaged in discussions on this issue with me. For example, we discussed the existing provision against abortions, the so-called Dingell amendment already in the law. Since that law was adopted a problem has arisen which was discussed during the general debate on this bill some days ago.

I do believe that the amendment offered by the gentleman from California (Mr. DORNAN) addresses this problem. Put simply, a number of groups, Planned Parenthood, included, that do promote abortions and also promote family planning are receiving large amounts of Federal funds.

In certain instances some of the moneys that have gotten into their hands have been used to promote abortions, not just to promote family planning. These groups are able to redirect the funds that they would otherwise use to the promotion of abortions. I know that it is difficult to segregate funds given to these groups, but the gentleman from California (Mr. DORNAN) has suggested the manner in which to deal with it, and that is to allow no Federal funding to such groups.

I personally feel that this is a reasonable request. I do not think it is out of order to offer this amendment. It ought to be adopted as a supplement to the existing provision of law.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The question was taken; and on a division (demanded by Mr. DORNAN) there were—ayes 13, noes 56.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. DORNAN

Mr. DORNAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN: (C) Section 1006 is amended by adding at the end the following new subsection:

"(d) an application for a grant or contract under section 1001, 1002, or 1003 shall contain assurances satisfactory to the Secretary that each physician who provides services under the program or project for which the grant or contract is applied for will comply with applicable requirements of state law respecting the reporting of pregnancy of an unwed minor."

Mr. DORNAN. Mr. Chairman, this is, again, a very easy-to-understand amendment.

I have before me a letter from the office of Evelle J. Younger, attorney general in the State of California. Jack R. Winkler, chief assistant attorney general, wrote to State candidate for Governor there; Senator John Stull (38th district) on March 29, 1978. He says:

In your letter of December 27, 1977, you correctly note that a minor female cannot lawfully consent to sexual intercourse. Given that state of the law, you have asked us for an informal discussion of (several) questions.

Is there not a responsibility upon the doctor to report such an incident, similar to his responsibility to report all gunshot wounds?

The answer is as follows:

As to your second question, it would appear that section 11161.5 of the Penal Code imposes a responsibility upon a physician to report an incidence of pregnancy in an unwed minor to local police authorities and the juvenile probation department, or in the alternative, to the county welfare department or county health department. If it appears to a physician that a minor that he is examining or treating has been "sexually molested," section 11161.5 requires the physician to report his observations to local authorities. Pregnancy in an unwed minor is evidence of unlawful sexual intercourse which is a violation of Penal Code section 261.5. It might therefore be concluded that a physician is obligated to report an incidence of pregnancy in an unwed minor. To this point, however, the courts have not been called upon to determine whether section 11161.5 imposes this duty upon a physician.

Mr. Chairman, all I am asking for in this amendment is that all Federal family planning programs comply with the applicable requirements of State law respecting the reporting of pregnancies of unwed minors.

Mr. ROGERS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, what the amendment says is that if there is a State law requiring physicians to report the pregnancy of an unwed minor, then they must comply with that law and the Federal Government is going to make them comply.

Mr. Chairman, this is certainly a new theory. States enforce State laws. The Federal Government enforces Federal law. If there is such a State law, then the State should enforce it.

Mr. Chairman, I do not know the purpose of this amendment. I would strongly urge that the amendment be defeated.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. DORNAN

Mr. DORNAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN: Page 14, line 19, strike out "before the period a semicolon" and all that follows through line 23 and insert in lieu thereof the following "the following: ', and $136,400,000 for the fiscal year ending September 30, 1979'."

Page 15, line 1, strike out "a semicolon" and all that follows through line 4 and insert in lieu thereof the following: "the following: ', and $3,000,000 for the fiscal year ending September 30, 1979'."

Page 15, line 7, strike out "before the period a comma" and all that follows through line 11 and insert in lieu thereof the following: "the following: ', and $68,500,000 (for the fiscal year ending September 30, 1979'."

Page 15, line 14, strike out "before the period a semicolon" and all that follows through line 17 and insert in lieu thereof the following: "the following: ', and $600,000 for the fiscal year ending September 30, 1979'."

Mr. DORNAN. Mr. Chairman, my colleagues have been most gracious tonight, and I would ask for their indulgence in offering this final and fifth amendment. I did have six amendments, and my own personal sensitivity leads me to indicate to my colleagues who have been supporting me here that we were successful in removing this important piece of legislation from the suspension process. I was proud to be one of the Members. Along with other hard working colleagues who brought to the attention of the distinguished ranking minority member the incredible sleazy, soft-core pornography books that were used in a number of title X family planning centers and programs which I detailed in the CONGRESSIONAL RECORD for October 11, 1978, on pages 35613–35614.

The suggestion to amend title X to avoid this pornography was graciously accepted by both the chairman and ranking minority member. I intend to bring some of these amendments back in the future at the committee level where they will be won at the committee level, rather than on the floor at a very late hour.

I offer this amendment because this is a bill controversial enough to have been removed overwhelmingly from the suspension calendar. This will reauthorize title X for 1 year at last year's funding level until we can work out some of these problems with porn and section 1008 and other violations. The number of years that are usually asked for in these expensive programs, I think, go beyond the spirit of what Congress really wants, and what the American people want in the process of monitoring. So, with that, I will yield back the remainder of my time.

Mr. ROGERS. Mr. Chairman, I oppose the amendment. This simply cuts 1979 authorizations to the 1978 level. There would be no family planning program in 1980 and 1981, and for people who want to do something to prevent abortion, this is the best way to do it. So I would urge this amendment be defeated.

I want to say the gentleman has been gracious in working with us. We have tried to accede to his demand on any material that was proper. We put in such an amendment. We tried to work with him, and we appreciate his cooperation.

This amendment would be totally devastating to the whole program.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I yield to my distinguished colleague, the ranking minority member.

Mr. CARTER. I thank the gentleman for yielding.

I, too, reluctantly oppose this amendment. This is money which is spent to prevent pregnancy. The gentleman's amendment would extend it only for 1 year and at last year's level, without taking into account the inflation factor. Not only that, for the second 2 years funding would be discontinued under this amendment. Mr. Chairman, I think that this program's money is best spent for prevention of pregnancy and, therefore, prevention of abortions.

I strongly oppose the amendment and move the previous question on the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The amendment was rejected.

● Mr. PREYER. Mr. Chairman, I rise in opposition to the Volkmer amendment. I believe very strongly that, if we are to encourage family planning and a reduction in teenage pregnancy, we ought to devise legislation which will accomplish our purpose.

Family planning is a sensible, logical way to avoid the unhappy consequences of abortion on the one hand and unwanted children on the other. This is not to say that the Federal Government ought to force anyone into acceptance of family planning—only that the option of contraceptive use should be readily available to those who choose it. Consequently, sex education is extremely important, and family planning centers provide a great service by supplying contraceptive information to those who seek it.

I think we could all agree that unwanted children are unfortunate victims of a situation over which they had no control. The sort of deprived life that many lead is a tragedy. This tragedy is compounded when emotionally immature teenage girls, with no financial means, give unplanned birth.

If we are going to put some clout behind the intent of this legislation, we must think first and foremost about what can be done to prevent teenage pregnancies. We cannot ignore the fact that two-thirds of teenage pregnancies are unplanned.

And if these teenagers, with the capacity to behave physically as adults, but emotionally as children, have to seek parental consent for contraception, the whole intent of this legislation will be undermined.

I agree that it would be wonderful if children could confide in their parents on sexual matters. Some do.

But, for the purpose of this bill, many do not. And the consequence of this lack of communication is unwanted children for young girls and boys.

I do not condone children keeping secrets from parents. But this is not the issue here. The question is whether children will be required to get parental consent. I believe that this requirement is unrealistic and unfair for the children, the parents, and all of society.

I urge a "no" vote on the Volkmer amendment.●

● Mr. WEISS. Mr. Chairman, I rise in strong support of H.R. 12370, the Health Services Amendments of 1978. However, as one of the cosponsors of H.R. 11007, the major provisions of which have been incorporated into this legislation, I am strongly opposed to proposed amendments which would seriously affect family planning programs and limit the rights to full medical care and counseling of millions of American women.

One thing which has been repeated time and time again during the long struggle over the abortion issue is the necessity of finding alternatives; providing preventive services so that the need for abortion is diminished. The title X program directly addresses this matter through an increase in the authorization for programs of family planning services and research. These programs benefit not only individuals who desire to prevent an unplanned pregnancy, but allow for significant economic savings as well.

In testimony before the Select Committee on Population, Dr. Kristin Moore emphasized that payments to teenage mothers constituted half of the Nation's bill for aid to families with dependent children. This came to a total of $4.65 billion in 1976. It is reasonable to assume that if such pregnancies were postponed until the parents were better able to support their child, this figure would be greatly reduced.

An innovative aspect of the legislation is the assistance which it provides to couples suffering from infertility. For the first time since its enactment, the bill authorizes title X funding specifically for treatment of this problem; demonstrating that family planning programs do not have as their sole focus the prevention of unwanted pregnancy.

The proposed amendments are based upon the assumption that the extension of the voluntary family planning program constitutes a proabortion policy. This, however, is absolutely false. Section 1008 of title X specifically prohibits the use of these funds in any program where abortion is a method of family planning. What title X has done is avert an estimated 1 million unwanted pregnancies since its inception in 1970, thus becoming a significant factor in our efforts to avoid abortion. Those who oppose abortion

should closely examine the intent and history of this legislation. Title X has made family planning services available to many teenagers and low- and moderate-income women who had not had access to them before. There is no evidence that even one abortion has been performed with title X money. I do not understand how those who decry abortion can at the same time fail to provide counseling and educational services which are the very things able to help prevent an unwanted pregnancy.

I believe that passage of these amendments would so restrict and impair effective programs, that the opposite of the desired effect will occur—there will be an increase of unplanned and unwanted pregnancies and thus a rise, rather than a decrease, in the incidence of abortion. I urge my colleagues to join me in preventing this tragic occurrence by defeating the proposed amendments.●

The CHAIRMAN pro tempore. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. NATCHER) having assumed the chair, Mr. FLIPPO, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 12370) to amend the Public Health Service Act and related health laws to revise and extend the programs of financial assistance for the delivery of health services, and for other purposes, pursuant to House Resolution 1408, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT

Mr. DORNAN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. DORNAN. Yes, Mr. Speaker, I am opposed to the bill.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. DORNAN of California moves to recommit the bill, H.R. 12370, to the Committee on Interstate and Foreign Commerce with instructions to report it back forthwith with the following amendment:

On page 15, insert after line 17 the following:

(C) Section 1006 is amended by adding at the end the following: "No grant or contract authorized by this Title may be made or entered into with an entity which directly or indirectly provides abortion, abortion counseling, or a abortion referral services."

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. DORNAN).

Mr. DORNAN. Mr. Speaker, I would like to take this opportunity to express my gratitude for the graciousness extended to me by the chairman and by the distinguished ranking minority member, the gentleman from Kentucky, Dr. CARTER.

I would like to say I have been most impressed in this first term of mine with the aggressive way that both of these gentlemen have pursued excellence in health care for all Americans.

I have been particularly impressed with the gentleman from Florida (Mr. ROGERS) in the Select Committee on Narcotics. Especially the way in which the gentleman has pursued those doctors who overprescribe and tranquilize American women in an ugly chauvinistic way, and then use a wholly different approach with the men of this country.

I hope the gentleman did not think I was mischievous or obstructing the committee in any way. I hope I have as fine a career in the health area, as the gentleman from Florida has had.

I merely want to register by this recommital motion with instructions, that these areas I have brought up tonight constitute fatal flaws in what otherwise is an excellent approach to the health services of our country. And that it all.

I do feel somewhat sad that this very important type of legislation comes up on a Friday night, when most of us had expected a week ago to be going to our districts in an election eve period. I hope similar measures next year come up earlier, and at a decent hour when we are not competing with other distractions such as the very excellent world series baseball game in the cloakrooms.

I have already discussed the language in the fourth amendment that I offered, which is embodied in this recommital motion.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. DORNAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 137, nays 232, not voting 61, as follows:

Mr. Carney with Mr. Caputo.

Mr. Phillip Burton with Mr. Burke of Florida.

Mr. Diggs with Mr. Del Clawson.

Mr. Ammerman with Mr. Cochran of Mississippi.

Mr. Clay with Mr. Evans of Colorado.

Mr. Applegate with Mr. Ireland.

Mr. Mathis with Mr. Milford.

Mr. Meeds with Mr. Milford.

Mr. Teague with Mr. Shipley.

Mr. Moss with Mr. Tucker.

Mr. SIMON changed his vote from "yea" to "nay."

Mrs. HECKLER changed her vote from "present" to "yea."

Mr. CONTE changed his vote from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. GUYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 343, nays 27, answered "present" 1, not voting 59, as follows:

The Clerk announced the following pairs:

Mr. Alexander with Mr. Sarasin.

Mrs. Burke of California with Mrs. Smith of Nebraska.

Mr. Burleson of Texas with Mr. Rudd.

Mr. Carney with Mr. Sebelius.

Mr. Phillip Burton with Mr. Hyde.

Mr. Evans of Colorado with Mr. John T. Myers.

Mr. Giaimo with Mr. Marlenee.

Mr. Flynt with Mr. Badham.

Mr. Roberts with Mr. Frey.

Mr. Fary with Mr. Quie

Mr. Moss with Mr. Cohen.

Mr. Le Fante with Mr. Del Clawson.

Mr. Miller of California with Mr. Lujan.

Mr. Hawkins with Mr. Shuster.

Mr. Gibbons with Mr. Whitehurst.

Mr. Diggs with Mr. Crane.

Mr. Ullman with Mr. Bob Wilson.

Mr. Charles H. Wilson of California with Mr. Dickinson.

Mr. Slack with Mr. Cochran of Mississippi.

Mr. Tsongas with Mr. Burke of Florida.

Mr. Walgren with Mr. Skubitz.

Mr. Sisk with Mr. Wydler.

Mr. Shipley with Mr. Young of Florida.

Mr. Applegate with Mr. McFall.

Mr. Bonker with Mr. Patten.

Mr. Ammerman with Mr. Harrington.

Mr. Conyers with Mr. Meeds.

Mr. Teague with Mr. Armstrong.

Mr. DORNAN changed his vote from "yea" to "present."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, H.R. 12370.

The SPEAKER per tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. ROGERS. Mr. Speaker, pursuant to the provisions of House Resolution 1408, I call up from the Speaker's table the Senate bill (S. 2522) to amend title X and part B of title XI of the Public Health Service Act to extend appropriations authorizations for 5 fiscal years for voluntary family planning and population research programs and for sudden infant death syndrome programs, and to make improvements in the provisions governing such programs and research with respect to such syndrome; and for other purposes and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. ROGERS

Mr. ROGERS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROGERS moves to strike out all after the enacting clause of S. 2522, and insert in lieu thereof sections 5 and 6(d)(2) of H.R. 12370 as passed by the House, as follows:

That (a) section 1001(a) of the Public Health Service Act is amended by striking out "family planning methods (including natural family planning methods)" and inserting in lieu thereof "family planning methods and services (including natural family planning methods, infertility services, and services for adolescents)".

(b)(1) Section 1001(c) of such Act is amended (A) by striking out "and" after "1977;", and (B) by inserting before the period a semicolon and the following: "$200,000,000 for the fiscal year ending September 30, 1979; $230,000,000 for the fiscal year ending September 30, 1980; and $264,500,000 for the fiscal year ending September 30, 1981".

(2) Section 1003(b) of such Act is amended (A) by striking out "and" after "1977;", and (B) by inserting before the period a semicolon and the following: "$3,100,000 for the fiscal year ending September 30, 1979; $3,600,000 for the fiscal year ending September 30, 1980; and $4,100,000 for the fiscal year ending September 30, 1981".

(3) Section 1004(b)(1) of such Act is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$105,000,000 for the fiscal year ending September 30, 1979, $120,800,000 for fiscal year ending September 30, 1980, and $138,900,000 for the fiscal year ending September 30, 1981".

(4) Section 1005(b) of such Act is amended (A) by striking out "and" after "1977;", and (B) by inserting before the period a semicolon and the following: "$700,000 for the fiscal year ending September 30, 1979; $805,000 for the fiscal year ending September 30, 1980; and $926,000 for the fiscal year ending September 30, 1981".

SEC. 2. Section 1121(b)(5) of the Public Health Service Act is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$3,500,000 for the fiscal year ending September 30, 1979, $4,000,000 for the fiscal year ending September 30, 1980, and $5,000,000 for the fiscal year ending September 30, 1981".

Amend the title so as to read: "An Act to extend the programs of assistance under title X and part B of title XI of the Public Health Service Act.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "to amend the Public Health Service Act and related health laws to revise and extend the programs of financial assistance for the delivery of health services, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill, H.R. 12370, was laid on the table.

APPOINTMENT OF CONFEREES ON S. 2522

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate bill (S. 2522) and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida? The Chair hears none and without objection appoints the following conferees: Messrs. STAGGERS, ROGERS, SATTERFIELD, PREYER, SCHEUER, CARTER, and BROYHILL.

There was no objection.

Mr. ROGERS. Mr. Speaker, pursuant to House Resolution 1408, I call up from the Speaker's table the Senate bill (S. 2474) to amend the Public Health Service Act to extend through the fiscal year ending September 30, 1981, the assistance program for community health centers and migrant health services; assistance to veneral disease programs; genetic diseases programs; hemophilia programs; home health progams; and to extend through the fiscal year ending September 30, 1979, the assistance programs for comprehensive public health services; hypertension programs; disease control programs; lead-based paint poisoning programs; and to establish hospital-affiliated primary care centers; to provide for research and demonstration projects in primary health care; and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. ROGERS

Mr. ROGERS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROGERS moves to strike out all after the enacting clause of S. 2474 and insert in lieu thereof the text of H.R. 12370 (except sections 5 and 6(d)(2) and the text of title I of H.R. 12460 as passed by the House, as follows:

SHORT TITLE

SECTION 1. This Act may be cited as the "Health Centers and Health Services Amendments of 1978".

TITLE I—HEALTH CENTERS

SHORT TITLE; REFERENCE TO ACT

SEC. 101. (a) This title may be cited as the "Health Centers Amendments of 1978".

(b) Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

MIGRANT HEALTH CENTERS

SEC. 102. (a)(1) Subsection (a)(1) of section 319 is amended by inserting after "as may be appropriate for particular centers" in subparagraphs (D) and (E) the following: "(as determined by the centers)".

(2) Subparagraph (G) of such subsection is amended to read as follows:

"(G) information on the availability and proper use of health services and services which promote and facilitate optimal use of health services, including, if a substantial number of the individuals in the population served by a center are of limited English-speaking ability, the services of appropriate personnel fluent in the language spoken by a predominant number of such individuals,".

(3) Subparagraph (F) of subsection (a)(6) of such section is amended to read as follows:

"(F) pharmaceutical services.".

(4) Subsection (a)(7) of such section is amended—

(A) by amending subparagraph (F) to read as follows:

"(F) dental services (including preventive dental services);",

(B) by amending subparagraph (K) to read as follows:

"(K) social services (including counseling, referral to assistance, and followup services for patients for the social and other nonmedical needs which affect their health status);",

(C) by amending subparagraph (M) to read as follows:

"(M) health education services (including nutrition education).", and

(D) by striking out subparagraphs (I) and (N), by inserting "and" at the end of subparagraph (L), and by redesignating subparagraph (J), (K), (L), and (M) as subparagraphs (I), (J), (K), and (L), respectively.

(b) The second sentence of subsection (b)(1) is amended by inserting a comma before the period and the following: "except that no area which is not a high impact area and in which the number of migratory agricultural workers and the members of their families residing is less than one thousand shall be assigned a priority over a high impact area".

(c)(1) Subparagraph (B) of subsection (d)(1) is repealed and subparagraph (C) of such subsection is redesignated as subparagraph (B).

(2) Paragraph (2) of subsection (d) is amended by striking out "or (1)(B)".

(3) Paragraphs (1) and (3) of subsection (f) are each amended by striking out "(d)(1)(C)" and inserting in lieu thereof "(d)(1)(B)".

(4) Subsection (h)(2) is amended by striking out "(d)(1)(C)" each place it occurs and inserting in lieu thereof "(d)(1)(B)".

(d) Paragraph (3) of subsection (d) of such section is amended to read as follows:

"(3)(A) The amount of any grant made in any fiscal year under subparagraph (A) of paragraph (1) to a health center shall be determined by the Secretary, but may not exceed the amount by which the projected costs of operation of the center in such fiscal year exceed the total of—

"(i) the State, local, and other funds, and

"(ii) the fees, premiums, and third-party reimbursements

which the center may reasonably be expected to receive for its operations in such fiscal year. In determining the amount of such a grant for a center, the Secretary, if funds have been requested for a service described in subparagraph (D) or (E) of subsection

(a)(1) or a supplemental health service described in subparagraph (B), (F), (J), or (L) of subsection (a)(7), shall include (in an amount determined by the Secretary) funds for such service unless the Secretary makes a written finding that such service is not needed and provides the applicant with a copy of such finding.

"(B) Payments under grants under subparagraph (A) of paragraph (1) shall be made in advance or by way of reimbursement and in such installments as the Secretary finds necessary and adjustments may be made for overpayments or underpayments, except that if in any fiscal year the sum of—

"(i) the total of the amounts described in clauses (i) and (ii) of subparagraph (A) of this paragraph received by a center in such fiscal year, and

"(ii) the amount of the grant to the center in such fiscal year,

exceeded the costs of the center's operation in such fiscal year because the amount received by the center from fees, premiums, and third-party reimbursements was greater than expected, adjustment in the grant to the center in the succeeding fiscal year shall be made in such a manner that the center may retain one-half of the amount by which such sum exceeded such cost but only for the purpose of enabling the center to expand and improve its services, to increase the number of persons it is able to serve, to construct and modernize its facilities, to improve the administration of its service programs, and to establish the financial reserve required for the furnishing of services on a prepaid basis.".

(e) Subsection (f) of such section is amended by redesignating paragraph (2) as paragraph (3) and by adding after paragraph (1) the following:

"(2) An application for a grant under subparagraph (A) of subsection (d)(1) for a migrant health center shall include (A) a description of the need in the center's catchment area for each of the health services described in subparagraphs (D) and (E) of subsection (a)(1) and in subparagraphs (B), (F), (J), and (L) of subsection (a)(7), (B) if the applicant determines that any such services is not needed, the basis for such determination, and (C) of the applicant does not request funds for any such service which the applicant determines is needed, the reason for not making such a request. In considering an application for a grant under subparagraph (A) of subsection (d)(1), the Secretary may require as a condition to the approval of such application assurance that the applicant will provide any specified health service described in subsection (a) which the Secretary finds is needed to meet specific health needs of the area to be served by the applicant. Such a finding shall be made in writing and a copy shall be provided the applicant.".

(f)(1)(A) Subparagraph (G) of paragraph (3) (as so redesignated) of subsection (f) of such section is amended by striking out clause (ii) and inserting in lieu thereof the following: "(ii) selects the services to be provided by the center, schedules the hours during which such services will be provided, approves the center's annual budget, approves the selection of a director for the center, and, except in the case of a governing board of a public center, establishes general policies for the center; and if the application is for a second or subsequent grant for a public migrant health center, the governing body of the center has approved the application or if the governing body has not approved the application, the failure of the governing body to approve the application was unreasonable;".

(B) The change in the governing board requirements for migrant health centers made by the amendment made by subparagraph (A) to section 319(f)(3)(G)(ii) of the Public Health Service Act shall not apply with respect to any public migrant health center which met the governing board requirements in effect under such section before October 1, 1978.

(2) Subparagraph (H) of such paragraph is amended (A) by striking out "and (IV)" and inserting in lieu thereof "(IV)", and (B) by inserting before the semicolon at the end ", and (V) expenditures made from any amount the center was permitted to retain under subsection (d)(3)(B)".

(g)(1)(A) The first sentence of subsection (h)(1) of such section is amended by striking out "and" after "1977", and by inserting before the period a comma and the following: '$2,200,000 for the fiscal year ending September 30, 1979, $2,500,000 for the fiscal year ending September 30, 1980, and $2,900,000 for the fiscal year ending September 30, 1981".

(B) The second sentence of such section is amended by striking out "two fiscal years" and inserting in lieu thereof "five fiscal years".

(2)(A) The first sentence of subsection (h)(2) of such section is amended by (i) by striking out "other than" and inserting in lieu thereof "including", (ii) striking out "and" after "1977,", and (iii) by inserting before the period a comma and the following: "$38,800,000 for the fiscal year ending September 30, 1979, $44,600,000 for the fiscal year ending September 30, 1980, and $51,300,000 for the fiscal year ending September 30, 1981".

(B) The third sentence of such section is amended by striking out "fiscal years ending September 30, 1977, and September 30, 1978" and inserting in lieu thereof "any fiscal year".

(3) Section 319(h)(3) is amended to read as follows:

"(3) In any fiscal year, the Secretary shall obligate for payments under grants and contracts in such fiscal year under subsection (d)(1) for the provision of inpatient and outpatient hospital services not less than 10 per centum of the amount appropriated in such fiscal year under paragraph (2) and not more than $5,000,000.".

(h) The amendments made by this section shall apply with respect to grants and contracts made under section 319 of the Public Health Service Act from appropriations for the fiscal years ending after September 30, 1978.

COMMUNITY HEALTH CENTERS

SEC. 103. (a) Subsection (a) of section 330 is amended by striking out "as may be appropriate for particular centers" in paragraph (4) and inserting in lieu thereof "as may be appropriate for particular centers (as determined by the centers)".

(b) Subsection (b)(1) of such section is amended by amending subparagraph (F) to read as follows:

"(F) pharmaceutical services.".

(c) Paragraph (2) of subsection (b) of such section is amended—

(1) by amending subparagraph (F) to read as follows:

"(F) dental services (including preventive dental services);",

(2) by striking out subparagraph (I),

(3) by amending subparagraph (K) to read as follows:

"(K) social services (including counseling, referral to assistance, and followup services for patients for the social and other nonmedical needs which affect their health status);",

(3) by amending subparagraph (M) to read as follows:

"(M) health education services (including nutrition education); and",

(4) by striking out "outreach workers" in subparagraph (N) and inserting in lieu thereof "appropriate personnel", and

(5) by redesignating subparagraphs (J) through (N) as subparagraphs (I) through (M), respectively.

(d) Paragraph (4) of subsection (d) of such section is amended to read as follows:

"(4)(A) The amount of any grant made in any fiscal year under paragraph (1) to a community health center shall be determined by the Secretary, but may not exceed the amount by which the projected costs of operation of the center in such fiscal year exceed the total of—

"(i) the State, local, and other funds, and

"(ii) the fees, premiums, and third-party reimbursements

which the center may reasonably be expected to receive for its operations in such fiscal year. In determining the amount of a grant for a center, the Secretary, if funds have been requested for an environmental health service described in subsection (a)(4) or a supplemental health service described in subparagraph (B), (F), (J), (L), or (M) of subsection (b)(2), shall include (in an amount determined by the Secretary) funds for such service unless the Secretary makes a written finding that such service is not needed and provides the applicant with a copy of such finding.

"(B) Payments under grants under paragraph (1) shall be made in advance or by way of reimbursement and in such installments as the Secretary finds necessary and adjustments may be made for overpayments or underpayments, except that if in any fiscal year the sum of—

"(i) the total of the amounts described in clauses (i) and (ii) of subparagraph (A) received by a center in such fiscal year, and

"(ii) the amount of the grant to the center in such fiscal year,

exceeded the costs of the center's operation in such fiscal year because the amount received by the center from fees, premiums, and third-party reimbursments was greater than expected, adjustment in the grant to the center in the succeeding fiscal year shall be made in such a manner that the center may retain one-half of the amount by which such sum exceeded such cost but only for the purpose of enabling the center to expand and improve its services, to increase the number of persons it is able to serve, to construct and modernize its facilities, to improve the administration of its service programs, and to establish the financial reserve required for the furnishing of services on a prepaid basis.".

(e)(1) Subsection (e) of such section is amended by redesignating paragraph (2) as paragraph (3) and by adding after paragraph (1) the following:

"(2) An application for a grant under subsection (d) for a community health center shall include (A) a description of the need in the center's catchment area for each of the health services described in subsection (a)(4) and in subparagraphs (B), (F), (J), (L), and (M) of subsection (b)(2), (B) if the applicant determines that any such service is not needed, the basis for such determination, and (C) if the applicant does not request funds for any such service which the applicant determines is needed, the reason for not making such a request. In considering an application for a grant under subsection (d), the Secretary may require as a condition to the approval of such application assurance that the applicant will provide any specified health service described in subsection (a) or (b) which the Secretary finds is needed to meet specific health needs of the area to be served by the applicant. Such a finding shall be made in writing and a copy shall be provided the applicant.".

(2)(A) Subparagraph (G) of paragraph (3) (as so redesignated) of such subsection is amended by striking out clause (ii) and inserting in lieu thereof the following: "(ii) meets at least once a month, selects the services to be provided by the center, sched-

ules the hours during which such services will be provided, approves the center's annual budget, approves the selection of a director for the center, and, except in the case of a governing board of a public center, establishes general policies for the center; and if the application is for a second or subsequent grant for a public center, the governing body has approved the application or if the governing body has not approved the application, the failure of the governing body to approve the application was unreasonable;".

(B) The change in the governing board requirements for public community health centers made by the amendment made by subparagraph (A) to section 330(e)(3)(G)(ii) of the Public Health Service Act shall not apply with respect to any public community health center which met the governing board requirements in effect under such section before October 1, 1978.

(3) Subparagraph (H) of such pragraph is amended (A) by striking out "and (IV)" and inserting in lieu thereof "(IV)", and (B) by inserting before the semicolon at the end ", and (V) expenditures made from any amount the center was permitted to retain under subsection (d)(4)(B)".

(4) Subsection (e) is amended by adding at the end the following:

"(4) The Secretary shall approve applications for grants under subsection (d) for community health centers which have not received a prior grant under such subsection or which have applied for such a grant to expand their services in such a manner that the ratio of the medically underserved populations in rural areas which may be expected to use the services provided by such centers to the medically underserved populations in urban areas which may be expected to use the services provided by such centers is not less than two to three or greater than three to two.".

(f)(1) Paragraph (1) of subsection (g) of such section is amended by striking out "and" after "1977," and by inserting before the period a comma and the following: $6,300,000 for the fiscal year ending September 30, 1979, $7,500,000 for the fiscal year ending September 30, 1980, and $9,000,000 for the fiscal year ending September 30, 1981".

(2) Paragraph (2) of such subsection is amended by striking out "and" after "1977," and by inserting before the period a comma and the following: "$359,700,000 for the fiscal year ending September 30, 1979, $431,500,000 for the fiscal year ending September 30, 1980, and $518,000,000 for the fiscal year ending September 30, 1981".

(g) The amendments made by this section shall apply with respect to grants made under section 330 of the Public Health Service Act from appropriations for fiscal years ending after September 30, 1978.

TECHNICAL ASSISTANCE GRANTS AND ASSESSMENT OF CONTINUING EDUCATION

SEC. 104. (a) Part A of title III is amended by adding after section 314 the following new section:

"TECHNICAL ASSISTANCE GRANTS

"SEC. 315. (a)(1) The Secretary may make grants to entities of State governments and to nonprofit private entities (other than schools of the health professions) to assist such entities in meeting their costs of providing technical assistance to entities engaged in the planning, development, or operation (or in any combination of such activities) of migrant health centers under section 319, community health centers under section 330, or any other centers for the delivery of primary health care. The technical assistance with respect to which a grant may be made under this paragraph includes—

"(A) assistance in the selection of sites for such centers,

"(B) assistance in the selection of governing boards for such centers,

"(C) assistance in the management of the service programs of such centers,

"(D) assistance in the recruitment, selection, and retention of personnel (including members of the National Health Service Corps) for such centers,

"(E) assistance in financial management, and

"(F) assistance in the procurement of facilities, equipment, and supplies for such centers.

"(2) In making grants under paragraph (1), the Secretary shall, to the extent feasible, make such grants to—

"(A) entities which will provide technical assistance on a statewide basis for the planning, development, and operation of centers to provide primary health care in urban and rural areas.

"(B) entities which will provide technical assistance solely for the planning, development, and operation of centers to provide primary health care in large, densely populated areas,

"(C) entities which will provide technical assistance solely on a statewide basis for the planning, development, and operation of centers to provide primary health care in rural areas, and

"(D) entities which will provide technical assistance on a regional basis in large States.

Grants under paragraph (1) to nonprofit private entities may only be made to such entities to provide technical assistance in the States in which they are primarily engaged in business.

"(b)(1) No grant may be made under subsection (a) unless an application therefor has been submitted to and approved by the Secretary. Such an application shall be submitted in such form and manner and shall contain such information as the Secretary may require by regulation.

"(2) The amount of any grant under subsection (a) shall be determined by the Secretary, except that no grant to an entity in any fiscal year may exceed $500,000. Payments under such grants may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(c) The Secretary shall establish a Primary Health Care Advisory Committee (hereinafter in this subsection referred to as the 'Committee') to make recommendations respecting—

"(1) the capabilities of applicants for grants under subsection (a) to effectively carry out the projects for which the grants would be made;

"(2) the renewal of grants under such subsection; and

"(3) the evaluation to be made under section 104(b) of the Health Centers Amendments of 1978.

The Committee shall consist of five members appointed by the Secretary, in accordance with section 222, from individuals who are not officers or employees of the Federal Government and who because of their expertise in providing technical assistance to primary health care centers are particularly qualified to serve on the Committee. Section 208(c) shall apply to compensation and allowances for members of the Committee.

"(d) For the purpose of carrying out this section, there are authorized to be appropriated $3,000,000 for the fiscal year ending September 30, 1979, $3,000,000 for the fiscal year ending September 30, 1980, and $3,000,000 for the fiscal year ending September 30, 1981.".

(b) Not later than January 1, 1981, the Secretary of Health, Education, and Welfare shall submit a report to the Congress on—

(1) the effectiveness of the entities assisted with grants under section 315 of the Public Health Service Act in—

(A) establishing centers which meet the requirements of sections 319 and 330 of the Public Health Service Act,

(B) improving the acceptability, in the communities served, of migrant health centers, community health centers, and other centers engaged in the delivery of primary health care,

(C) improving the ability of such centers in attracting and retaining health professions personnel,

(D) assisting such centers in reducing their dependence on public funding;

(2) the effect of the effectiveness of entities assisted under grants under such section 315 of (A) the type of area to be served by the centers for which planning, development, and operation assistance was provided by such entities, and (B) the organizational structure of such entities.

(c) The Secretary of Health, Education, and Welfare shall conduct an assessment of the various types of continuing education programs available for health professions personnel in medically underserved areas and the effect such types of programs have on the retention of such personnel by centers engaged in the delivery of primary health care in such areas. The Secretary shall report the results of such assessment to the Congress not later than January 1, 1980.

DEMONSTRATION PROJECTS IN RURAL MEDICALLY UNDERSERVED AREAS

SEC. 105. The Secretary of Health, Education, and Welfare may make grants to—

(1) public and nonprofit private entities which received grants from appropriations made for the fiscal year ending September 30, 1978, to carry out demonstration projects under section 1110 of the Social Security Act related to health services in rural medically underserved areas, and which before September 30, 1978, had applications approved by the Secretary under such section for grants for the fiscal year ending September 30, 1979, and

(2) to any other public and nonprofit private entity which before September 30, 1978, had an application approved by the Secretary under such section for a grant for the fiscal year ending September 30, 1979,

to enable such entities to carry out demonstration projects under such applications in the fiscal year ending September 30, 1979. For the purpose of the grants under this section, there is authorized to be appropriated $13,500,000 for the fiscal year ending September 30, 1979.

TITLE II—HEALTH SERVICES EXTENSIONS

SHORT TITLE; REFERENCE TO ACT

SEC. 201. (a) This title may be cited as the "Health Services Extension Act of 1978".

(b) Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

HEALTH INCENTIVES GRANTS FOR COMPREHENSIVE PUBLIC HEALTH SERVICES

SEC. 202. (a)(1) Section 314(d)(7)(A) is amended by striking out "and" after "1977," and inserting before the period a comma and the following: "and $103,500,000 for the fiscal year ending September 30, 1979".

(2) Section 314(d)(7)(B) is amended by striking out "and" after "1977," and inserting before the period a comma and the following: "and $25,000,000 for the fiscal year ending September 30, 1979".

(b)(1) The Congress finds and declares that—

(A) individual health status can be ef-

fectively and economically improved through an adequate investment in community public health programs and services;

(B) the Federal Government and the States and their communities share in the financial responsibility for funding public health programs;

(C) the Federal contribution to funds for public health programs should serve as an incentive to an additional investment by State and local governments;

(D) existing categorical programs of Federal financial assistance to combat specific public health problems should be supplemented by a national program of stable generic support for such public health activities as the prevention and control of environmental health hazards, prevention and control of diseases, prevention and control of health problems of particularly vulnerable population groups, and development and regulation of health care facilities and health

(E) the States and their communities, not the Federal Government, should have primary responsibility for identifying and measuring the impact of public health problems and the allocation of resources for their amelioration.

(2) Effective October 1, 1979, section 314 (d) is amended to read as follows:

"COMPREHENSIVE PUBLIC HEALTH SERVICES

"(d) (1) The Secretary shall make grants to State health authorities to assist in meeting the costs of providing comprehensive public health services.

"(2) No grant may be made under paragraph (1) to the State health authority of any State unless an application therefor has been submitted to and approved by the Secretary. Such an application shall be submitted in such form and manner and shall contain such information as the Secretary may require, and shall contain or be supported by assurances satisfactory the Secretary that—

"(A) the comprehensive public health services which will be provided within the State with funds under a grant under paragraph (1) will be provided in accordance with the State health plan in effect under section 1524(c);

"(B) funds received under grants under paragraph (1) will—

"(i) be used to supplement the level of non-Federal funds that would otherwise be made available for the comprehensive public health services for which the grant funds are provided, and

"(ii) not be used to supplant such non-Federal funds,

except that the Secretary may in exceptional circumstances waive clause (i) or (ii) or both clauses;

"(C) the State health authority for which the application is submitted will—

(i) provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of and accounting for funds received under grants under paragraph (1);

"(ii) from time to time, as prescribed by the Secretary, report to the Secretary (through a uniform national reporting system and by such categories as the Secretary may prescribe) a description of the comprehensive public health services provided in the State in the fiscal year for which the grant applied for is made and the amount and source of funds expended in that fiscal year and in the preceding fiscal year for the provision of each such category of services; and

"(iii) make such other reports (in such form and containing such information as the Secretary may prescribe) as the Secretary may reasonably require and keep such records and afford such access thereto as the Secretary may find necessary to assure the correctness of, and to verify, such reports; and

"(D) the State health authority for which the application is submitted will have in effect a method satisfactory to the Secretary which will assure equitable distribution of funds under grants under paragraph (1) among State and local public health entities within the State which have made expenditures which may be used under paragraph (4) to compute the amount of such grants and which method provides that within the limit of the amount of funds received by the State health authority under such grants—

"(i) each local public health entity which makes such expenditures shall receive from such funds in the fiscal year for which grants are made an amount which is equal to the lesser of—

"(I) the product of the total amount of such expenditures in such fiscal year and the applicable grant computation percentage, or

"(II) the product of $1.50 and the population of the area served by such entity (as such population and area may be determined pursuant to guidelines established by the Secretary); and

"(ii) amounts which a local public health entity would receive under clause (i)(I) which are in excess of the applicable amount computed under clause (i)(II) shall be distributed for comprehensive public health services within communities which have the greatest need for such services as determined by the State health authority pursuant to guidelines established by the Secretary.

For purposes of subparagraph (D)(i)(I), the term 'applicable grant computation percentage' means the percentage applicable under paragraph (4)(A)(i)(II) to the computation of the amount of a grant under paragraph (1).

"(3)(A) The Secretary shall review annually the actiivties undertaken by each State health authority with an approved application under this subsection to determine if the authority complied with the assurances provided with the application. The Secretary may not approve an application submitted under paragraph (2) if the Secretary determines—

"(i) that the State health authority for which the application was submitted did not comply with assurances provided with a prior application under paragraph (2), and

"(ii) that he cannot be assured that the authority will comply with the assurances provided with the application under consideration.

"(B) Whenever the Secretary, after reasonable notice and opportunity for a hearing to the State health authority of a State, finds that, with respect to funds paid to the authority under a grant under paragraph (1), there is a failure to comply with assurances provided under paragraph (2) with respect to the receipt of such grant, the Secretary shall notify the authority that further payments will not be made to it under such grant (or in his discretion that further payments will not be made to it from such grant for activities in which there is such failure), until he is satisfied that there will no longer be such failure. Until he is so satisfied, the Secretary shall make no payment to such authority from such grant or shall limit payment under such grant to activities in which there is no such failure.

"(4)(A) The total amount of grants received by a State health authority under paragraph (1) in any fiscal year shall be the greater of the amount determined under clause (i) or (ii) as follows:

"(i) The total amount of grants to a State health authority in a fiscal year shall be the lesser of—

"(I) the product of $1.50 and the population of the State served by such authority, or

"(II) in the case of the fiscal year ending September 30, 1980, 10 percent of the amount of State and local expenditures for comprehensive public health services within the State in the State's fiscal year which ended on or before July 1, 1979, in the case of the fiscal year ending September 30, 1981, 15 percent of the amount of such expenditures in the State's fiscal year which ended on or before July 1, 1980, and in the case of the fiscal year ending September 30, 1982, 20 percent of the amount of such expenditures in the State's fiscal year which ended on or before July 1, 1981.

"(ii) The total amount of grants to a State health authority in a fiscal year may not be less than the greater of—

"(I) the total amount of grants received by such authority under paragraph (1) for the fiscal year ending Setpember 30, 1979, or

"(II) the product of $1 and the population of the State served by such authority. Notwithstanding clause (ii), if for any fiscal year the amount appropriated for that fiscal year under paragraph (6) is less than the amount needed to make grants in that fiscal year in accordance with such clause to all State health authorities with approved applications, the total amount of grants in that fiscal year for a State health authority shall not be less than an amount which bears the same ratio to the amounts determined for such authority in accordance with such clause as the amount appropriated under such paragraph bears to the amount needed to make grants in accordance with such clause in such fiscal year to all State health authorities with approved applications.

"(B) The Secretary, at the request of a State health authority, may reduce the amount of the grants to it under paragraph (1), by—

"(i) the fair market value of any supplies (including vaccines and other prevention agents) or equipment furnished the State health authority, and

"(ii) the amount of the pay, allowances, and travel expenses of any officer or employee of the Government when detailed to the State health authority and the amount of any other costs incurred in connection with the detail of such officer or employee,

when the furnishing of such supplies or equipment or the detail of such an officer or employee is for the convenience of the State health authority and for the purpose of carrying out a program with respect to which its grant under paragraph (1) is made. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment, or in detailing the personnel, on which the reduction of such grant is based, and such amount shall be deemed as part of the grant and shall be deemed to have been paid to the State health authority.

"(C) For purposes of subparagraph (A)(i)(II), the term 'State and local expenditures for comprehensive public health services' means expenditures by State and local public health authorities for public health services designated by the Secretary, but excludes expenditures by such authorities—

"(i) specifically required by Federal statutory law as a condition to the receipt of Federal financial assistance, or

"(ii) for operating inpatient care facilities, construction, or mental health programs.

"(D) For purposes of subparagraph (A) and paragraph (2)(D), populations shall be determined on the basis of the latest figure available from the Department of Commerce.

"(5) The Secretary may make payments under grants under paragraph (1) on the basis of such estimates and in such installments as appropriate with adjustments for any previous overpayments or underpayments.

"(6)(A) For the purpose of making grants under this subsection there are authorized to be appropriated $250,000,000 for the fiscal year ending September 30, 1980, $275,000,000 for the fiscal year ending September 30, 1981, and $300,000,000 for the fiscal year ending September 30, 1982.

"(B) Of the amount appropriated under subparagraph (A) for any fiscal year, the Secretary shall obligate not more than $1,000,000 for the uniform national health program reporting system referred to in paragraph (2)(C)(ii).

"(7) Regulations (including substantive amendments to regulations) under this subsection shall be promulgated by the Secretary after consultation with a conference of State health authorities. The Secretary shall consult with such conference prior to the publication of proposals for such regulations or amendments.".

DISEASE CONTROL PROGRAMS

SEC. 203. (a) Subsection (d)(1) of section 317 amended by striking out "public and nonprofit private entities" and inserting in lieu thereof "State health authorities, health authorities of political subdivisions of States, other public entities, and nonprofit private entities".

(b)(1) Subsection (g)(1)(A) of such section is amended by inserting before ", there are authorized" the following "and for the purpose of grants under such subsection for the fiscal year ending September 30, 1979, for disease control programs to immunize individuals against influenza".

(2) Subsection (g)(1)(B) of such section is amended by striking out "for disease control programs for diseases borne by rodents" and inserting in lieu thereof "for rodent control programs".

(c)(1) Subsection (g)(1)(A) of such section is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$51,000,000 for the fiscal year ending September 30, 1979, $40,250,000 for the fiscal year ending September 30, 1980, and $46,280,000 for the fiscal year ending September 30, 1981".

(2) Subsection (g)(1)(B) of such section is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$15,000,000 for the fiscal year ending September 30, 1979, $17,300,000 for the fiscal year ending September 30, 1980, and $19,900,000 for the fiscal year ending September 30, 1981".

(3) Subsection (g)(1)(C) of such section is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$5,800,000, for the fiscal year ending September 30, 1979, $6,700,000 for the fiscal year ending September 30, 1980, and $7,700,000 for the fiscal year ending September 30, 1981".

PREVENTION AND CONTROL OF VENEREAL DISEASES

SEC. 204. (a)(1) Subsection (f) of section 318 is replealed and subsections (g) and (h) of such section are redesignated as subsections (f) and (g), respectively.

(2) Subsection (g)(2) of section 317 is amended by striking out "Except as provided in section 318, no funds" and inserting in lieu thereof "No funds".

(b)(1) Subsection (d)(1) of section 318 is amended by inserting after "(1)" the following: "For the purpose of making grants under subsections (b) and (c) there are authorized to be appropriated $45,000,000 for the fiscal year ending September 30, 1979, $53,000,000 for the fiscal year ending September 30, 1980, and $62,000,000 for the fiscal year ending September 30, 1981. For grants under subsection (b) in any fiscal year, the Secretary shall obligate not less than 5 per centum of the amount appropriated for such fiscal year under the preceding sentence."

(2) Subsection (b) of such section is amended by striking out "(1)" and paragraph (2).

(3) Subsection (c) is amended by (A) by striking out paragraph (2), (B) by striking out "(1)", and (C) by redesignating subparagraphs (A), (B), (C), (D), and (E) of paragraph (1) as paragraphs (1), (2), (3), and (4), and (5), respectively.

GENETIC DISEASES, HEMOPHILIA PROGRAMS, AND SUDDEN INFANT DEATH SYNDROME

SEC. 205. (a) Section 402 of the Health Research and Health Services Amendments of 1976 is amended by striking out "including" and inserting in lieu thereof "such as".

(b) The first sentence of section 1104(a) is amended by striking out "such information" and inserting in lieu thereof "such information (including assurances for an evaluation whether performed by the applicant or by the Secretary)".

(c)(1) Part A of title XI is amended by adding after section 1106 the following new section:

"APPLIED TECHNOLOGY

"SEC. 1107. The Secretary, acting through an identifiable administrative unit, shall—

"(1) conduct epidemiological assessments and surveillance of genetic diseases to define the scope and extent of such diseases and the need for programs for the diagnosis, treatment, and control of such diseases, screening for such diseases, and the counseling of persons with such diseases;

"(2) on the basis of the assessments and surveillance described in paragraph (1), develop for use by the States programs which combine in an effective manner diagnosis, treatment, and control of such diseases, screening for such diseases, and counseling of persons with such diseases; and

"(3) on the basis of the assessments and surveillance described in paragraph (1), provide technical assistance to States to implement the programs developed under paragraph (2) and train appropriate personnel for such programs.

In carrying out this section, the Secretary may, from funds appropriated under section 1101(b), make grants to or contracts with public or nonprofit private entities (including grants and contracts for demonstration projects).".

(2) Section 1101(b) is amended by inserting "and section 1107" after "this section".

(d)(1) Section 1101(b) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$20,000,000 for the fiscal year ending September 30, 1979, $23,000,000 for the fiscal year ending September 3, 1980, and $26,500,000 for the fiscal year ending September 30, 1981".

(2) Section 1131(f) is amended (A) by striking out "and" after "1977,", and (B) by inserting before the period a comma and the following: "$3,500,000 for the fiscal year ending September 30, 1979, $4,000,000 for the the fiscal year ending September 30, 1980, and $5,000,000 for the fiscal year ending September 30, 1981".

(3) Section 1132(e) is amended (A) by striking out "and" after "1977.", and (B) by inserting before the period a comma and the following: "$2,500,000 for the fiscal year ending September 30, 1979, $3,000,000 for the fiscal year ending September 30, 1980, and $3,500,000 for the fiscal year ending September 30, 1981".

HOME HEALTH SERVICES

SEC. 206. (a) Part A of title III is amended by inserting after section 311 the following new section:

"HOME HEALTH SERVICES

"SEC. 312. (a)(1) For the purpose of demonstrating the establishment and initial operation of home health agencies (as defined in section 1861(o) of the Social Security Act) which will provide home health services (as defined in section 1861(m) of the Social Security Act) in areas in which such services are not otherwise available, the Secretary may, in accordance with the provisions of this section, make grants to public and nonprofit private entities to meet the initial costs of establishing and operating such agencies and expanding the services available through existing agencies, and to meet the costs of compensating professional and paraprofessional personnel during the initial operation of such agencies or the expansion of services of existing agencies.

"(2) In making grants under this subsection, the Secretary shall consider the relative needs of the several States for home health services and preference shall be given to areas within a State in which a high percentage of the population proposed to be served is composed of individuals who are elderly, medically indigent, or both.

"(3) Applications for grants under this subsection shall be in such form and contain such information as the Secretary shall by regulation prescribe.

"(4) Payments under grants under this subsection may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(5) There are authorized to be appropriated for grants under this subsection $14,000,000 for the fiscal year ending September 30, 1979, $16,100,000 for the fiscal year ending September 30, 1980, and $18,500,000 for the fiscal year ending September 30, 1981.

"(b)(1) The Secretary may make grants to public and nonprofit private entities to assist them in demonstrating the training of professional and paraprofessional personnel to provide home health services (as defined in section 1861(m) of the Social Security Act).

"(2) Applications for grants under this subsection shall be in such form and contain such information as the Secretary shall by regulation prescribe.

"(3) Payments under grants under this subsection may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(4) There are authorized to be appropriated for grants under this subsection $2,000,000 for the fiscal year ending September 30, 1979, $2,500,000 for the fiscal year ending September 30, 1980, and $3,000,000 for the fiscal year ending September 30, 1981.".

(b) Effective October 1, 1978, section 602 of Public Law 94-63 is repealed.

HYPERTENSION PROGRAMS

SEC. 207. (a) Part A of title III is amended by adding after section 312 (added by section 206 of this title) the following new section:

"HYPERTENSION PROGRAMS

"SEC. 313. (a) The Secretary may make grants to State health authorities to assist them in meeting the costs of providing programs for screening for, and the detection, diagnosis, prevention, and control (including referral for treatment) of, hypertension.

"(b) No grant may be made under subsection (a) unless an application therefor has been submitted to, and approved by, the Secretary. Such an application shall be in such form and be submitted in such manner as the Secretary shall by regulation prescribe and shall provide—

"(1) a complete description of the type and extent of the program which is to be provided by or through the applicant with a grant under subsection (a);

"(2) assurances satisfactory to the Secretary that the program to be provided under the grant applied for will be provided in accordance with the State health plan in effect under section 1524(c);

"(3) assurances satisfactory to the Secretary that the applicant will make such reports respecting the program as the Secretary may require; and

"(4) such other information as the Secretary may by regulation prescribe.

"(c) The Secretary shall determine the amount of any grant made under subsection (a). Payments under such grants may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(d)(1) Each recipient of a grant under subsection (a) shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such grant, the total cost of the undertaking in connection with which such grant was made, and the amount of that portion of the cost of the undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient of grants under subsection (a) that are pertinent to such grants.

"(e) The Secretary may provide technical assistance to State health authorities in connection with the operation of their hypertension programs.

"(f) The Secretary shall submit annually to the Congress a report (1) on the extent of the problems presented by hypertension, and (2) on the effectiveness of the activities assisted under grants under subsection (a).

"(g) There are authorized to be appropriated for grants under subsection (a) $28,800,000 for the fiscal year ending September 30, 1980, $33,000,000 for the fiscal year ending September 30, 1981, and $38,000,000 for the fiscal year ending September 30, 1982.".

(b) Section 317(f) is amended by striking out "hypertension,".

"LEAD-BASED PAINT POISONING PREVENTION PROGRAMS

SEC. 208. (a) Part of title III is amended by adding after section 314 the following new section:

"LEAD-BASED PAINT POISONING PREVENTION PROGRAMS

"SEC. 315. (a)(1) The Secretary may make grants to agencies of units of general local governments and to private nonprofit entities to assist them in meeting the costs of providing lead-based paint poisoning prevention programs.

"(2) For purposes of this section—

"(A) the term 'lead-based paint poisoning prevention program' means any program which provides for—

"(i) educational programs intended to communicate to parents, educators, and local health officials the health danger and prevalence of lead-based paint poisoning among children;

"(ii) the development and carrying out of intensive community testing programs designed to detect incidents of lead-based paint poisoning prompt medical treatment for such insure prompt medical treatment for such afflicted individuals;

"(iii) the development and carrying out of intensive followup programs to insure that identified cases of lead-based paint poisoning are protected against further exposure to lead-based paints in their living environment;

"(iv) the establishment of centralized laboratory facilities for analyzing biological and environmental lead specimens; and

"(v) any other actions which will reduce or eliminate lead-based paint poisoning; and

"(B) the term 'units of general local government' means (i) any city, county, township, town, borough, parish, village, or other general purpose political subdivision of a State, (ii) any combination of units of general local government in one or more States, (iii) an Indian tribe, and (iv) with respect to lead-based paint poisoning elimination activities, in their urban areas, the territories and possessions of the United States.

"(b) No grant may be made under subsection (a) unless an application therefor has been submitted to, and approved by, the Secretary. Such an application shall be in such form and be submitted in such manner as the Secretary shall by regulation prescribe and shall provide—

"(1) a complete description of the type and extent of the lead-based paint poisoning prevention program which is to be provided by or through the applicant with a grant under subsection (a);

"(2) assurances satisfactory to the Secretary that the program to be provided under the grant applied for will be provided in accordance with the State health plan in effect under section 1524(c);

"(3) assurances satisfactory to the Secretary that the applicant will make such reports respecting the program as the Secretary may require; and

"(4) such other information as the Secretary may by regulation prescribe.

"(c) The Secretary shall determine the amount of a grant made under subsection (a). Payments under such grants may be made in advance on the basis of estimates or by the way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants.

"(d)(1) Each recipient of a grant under subsection (a) shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such grant, the total cost of the undertaking in connection with which such grant was made, and the amount of that portion of the cost of the undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipent of grants under subsection (a) that are pertinent to such grants.

"(e) The Secretary may provide technical assistance to recipients of grants under subsection (a) in connection with the operation of their lead-based paint poisoning prevention programs.

"(f) The Secretary shall submit annually to the Congress a report (1) on the extent of the problems presented by lead-based paint, and (2) on the effectiveness of the programs assisted under grants under subsection (a).

"(g) There are authorized to be appropriated for grants under subsection (a) $14,000,000 for the fiscal year ending September 30, 1979, $16,100,000 for the fiscal year ending September 30, 1980, and $18,500,000 for the fiscal year ending September 30, 1981.".

(b) Effective October 1, 1979, titles I and II and sections 504 and 505 of the Lead-Based Paint Poisoning Prevention Act are repealed, and section 506 of such Act is redesignated as section 504.

EFFECT OF LEAD ON CHILD DEVELOPMENT

SEC. 209. The Secretary of Health, Education, and Welfare shall conduct a study to determine the long-term effect on child development of various levels of lead in blood. The Secretary shall report the results of such study to the Congress together with recommendations for such legislation as the Secretary determines is appropriate.

EMERGENCY MEDICAL SERVICES SYSTEMS

SEC. 210. (a) Section 1203(c) is amended (1) effective June 30, 1975, by striking out the first sentence of paragraph (2), (2) by striking out paragraph (3), and (3) by redesignating paragraphs (4) and (5) as paragraphs (3) and (4), respectively.

(b) Effective June 30, 1975, the first sentence of section 1204(b)(1) is repealed.

(c) Subparagraph (B) of section 1206(b)(1) is amended to read as follows:

"(B) No applicant may receive more than a total of five grants, contracts, or grants and contracts under this part, except that in determining the number of grants and contracts which an applicant received under this part, the Secretary shall not include any grant or contract received under section 1202(b)(1) or 1205.".

(d)(1) Section 1207(a)(1) is amended by striking out "sections 1203 and 1204" and inserting in lieu thereof "sections 1202, 1203, and 1204".

(2) Section 1207(a)(5) is amended by striking out "for the succeeding fiscal year" and inserting in lieu thereof "for each of the two succeeding fiscal years".

SELECT PANEL FOR THE PROMOTION OF CHILD HEALTH

SEC. 211. (a) The Secretary of Health, Education, and Welfare (hereinafter in this section referred to as the "Secretary") shall establish within the Office of the Secretary a Select Panel for the Promotion of Child Health (hereinafter in this section referred to as the "panel").

(b)(1) The panel, after reviewing all the significant medical, scientific, behavioral, and epidemiological studies concerning the promotion of child health and the prevention of childhood diseases and concerning the efficacy and efficiency of child health programs, shall—

(A) formulate specific goals with respect to the promotion of the health status of children and expectant mothers in the United States;

(B) develop a comprehensive national plan for achieving these goals and otherwise promoting the health of children in the United States; and

(C) transmit to the Secretary, to the Committee on Interstate and Foreign Commerce of the House of Representatives, and to the Committee on Human Resources of the Senate, not later than eighteen months after the date of the enactment of this Act, a report detailing the comprehensive national plan it has developed and recommendations for such administrative, legislative, and other actions as it deems appropriate to implement this plan and to otherwise promote the health of children in the United States.

(2) The panel shall include in its comprehensive national plan (developed under paragraph (1)(B)) recommendations with respect to—

(A) the appropriate type and quantity of preventive health care and other health services needed by children in general and by particular types of children at risk;

(B) the appropriate methods (and providers) for delivering and financing the delivery of such services;

(C) the appropriate methods for coordinating and consolidating, within an agency and between agencies, the administration of child health promotion programs;

(D) the need for research into the delivery of such services and the promotion of child health;

(E) the appropriate methods for instructing children and parents in methods of maintaining their health;

(F) the encouragement of innovative programs to promote child health;

(G) the appropriate methods (including demonstration programs) for applying research findings to delivery of health services to children and otherwise to promoting the health of children;

(H) the appropriate relationship between child health promotion programs and health planning organizations;

(I) the appropriate support of training of health personnel for child health promotion programs; and

(J) the appropriate technical assistance to States to implement child health promotion programs.

(c)(1) The panel shall be composed of the Assistant Secretary for Health and the Assistant Secretary for Planning and Evaluation, who shall serve as ex officio members, and of fifteen other members who shall be appointed by the Secretary not later than sixty days after the date of the enactment of this Act. Among members of the panel appointed by the Secretary, the Secretary shall appoint not less than three, nor more than five, individuals employed by the Department of Health, Education, and Welfare, and shall appoint representatives from the scientific, medical, allied health, mental health, preventive health, public health, and education professions, as well as consumers and representatives from State and local health agencies.

(2) The Secretary shall designate, at the time of appointment of members of the panel, one member to serve as chairperson and another to serve as vice chairperson of the panel.

(3) Members of the panel shall serve for the life of the panel and the Secretary shall appoint individuals to fill vacancies on the panel as they may arise.

(4) Each member of the panel (who is not a full-time officer or employee of the United States) shall be entitled to receive the daily equivalent of the annual rate of basic pay in effect for Grade GS–18 of the General Schedule for each day (including traveltime) during which the member is engaged in the actual performance of duties vested in the panel. All the members of the panel shall be allowed, while away from their homes or regular places of business in the performance of service for the panel, travel expenses (including per diem in lieu of subsistence) in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(d)(1) Upon the request of the panel, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the panel to assist the panel in carrying out its functions.

(2) The Secretary shall provide the panel with such administrative services and facilities as may be required to carry out its functions.

(e)(1) The panel may, for purposes of carrying out its functions, hold such hearings, sit and act at such times and places, take such testimony, receive such evidence, and appoint such advisory committees as it may deem advisable.

(2) The panel may secure directly from any department or agency of the United States information necessary to carry out its functions. Upon request of the chairperson of the panel, the head of each such department or agency shall, to the extent permitted by law, furnish the information and otherwise cooperate with the panel.

(f) The panel shall cease to exist ninety days after the date of submittal of the report described in subsection (b)(1)(C).

(g) There is authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1979, to carry out this section. Sums appropriated under this subsection shall remain available for expenditure until the date the panel ceases to exist.

Amend the title so as to read: "An Act to amend the Public Health Service Act and related health laws to revise and extend the programs of financial assistance for the delivery of health services, the provision of preventive health services, and for other purposes.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "To amend the Public Health Service Act and related health laws to revise and extend the programs of financial assistance for the delivery of health services, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill H.R. 12370 was laid on the table.

APPOINTMENT OF CONFEREES ON S. 2474

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate bill (S. 2474) and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida? The Chair hears none and, without objection, appoints the following conferees: Messrs. STAGGERS, ROGERS, SATTERFIELD, PREYER, SCHEUER, CARTER, and BROYHILL.

There was no objection.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I take this time to inquire of the distinguished majority leader as to whether he has any further plans calculated to keep honest Members of the House from their beds at this late hour?

Mr. WRIGHT. Mr. Speaker, will the distinguished minority leader yield?

Mr. RHODES. I would be glad to yield to my colleague, the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, we have thought well of the diversions that are available and have come up with a few. First, we would hope to go immediately to at least one conference committee report on which clearance has been received on all sides, and promises elicited, that the debate will be very brief. Nobody, surely, will ask for a recorded vote; that being a conference report on the District of Columbia Retirement Reform Act, which is noncontroversial.

Then, if papers which seem to have been lost, strayed or stolen can be relocated, we will act on three conference reports which similarly have been cleared around and about relating to health bills which the gentleman from Florida can identify, if the gentleman wants their specific identification, are located and if they in turn can be serially approved with a minimum of delay and debate, we would hope to get them on the floor, assuming the papers have been located.

Thereafter it would be our purpose to return to and complete consideration of the Amateur Sports Act, S. 2727, following which we would hope to take up the Endangered Species Act, H.R. 14104, on which I happily have been advised that all parties, including but not limited to the gentleman from Tennessee (Mr. BEARD), are happy about and on board.

Mr. DUNCAN of Tennessee. Mr. Speaker, if the gentleman will yield, we are not all on board. I have an amendment to that bill.

Mr. WRIGHT. The gentleman from Tennessee would fully qualify to offer an amendment.

If I have been properly informed, we perhaps could hope to conclude that much this evening. It is not anticipated that we would have debate on the Middle-Income Student Assistance Act tonight. If it would be permitted, we would appreciate being able to get a rule on it tonight, but we will not go into any debate on that bill tonight.

If there would be general cooperation all the way around, perhaps we could get that far.

Then it would be my purpose, immediately following this colloquy, to ask unanimous consent that when we adjourn tonight, we adjourn until 12 o'clock tomorrow. Then I would want to ask unanimous consent, out of respect for our two deceased colleagues, since their funerals are tomorrow, that any recorded votes on legislation arising between 12 o'clock and 4 o'clock shall be postponed until after 4 o'clock.

Mr. RHODES. Mr. Speaker, did I understand the distinguished majority leader to indicate that the rule on MISA would be brought up tonight? That is the Middle-Income Students Assistance Act.

Mr. WRIGHT. We would like to bring up the rule.

Mr. RHODES. I am advised from my side that there is serious opposition to that rule. It would be our hope that it would not be brought up tonight.

Mr. WRIGHT. All right.

Mr. RHODES. As far as the rest of the program is concerned, the extent to which peace has been made in areas which have been very controversial reminds me a lot of Camp David. The spirit is great, and I suggest we proceed to take care of all these salutary bills and then adjourn as soon as we possibly can.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, I think I get the drift. In the spirit of the lamb and the lion who shall lie down together.

Let us agree that we can finish the Endangered Species Act tonight, all things going well, and that we shall not seek to go further on the program this evening.

Mr. RHODES. Mr. Speaker, I congratulate the majority leader for his usual wisdom.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. Yes, of course, I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Speaker, I have asked the gentleman to yield so I could ask the distinguished majority leader a question.

I understand very forcefully from my constituents that the Senate has amended some kind of a bill dealing with film strips that we had sent over there yesterday, and they put a hospital cost containment bill on it in the Senate.

Can the distinguished majority leader tell us when we are going to take that bill up and who is going to handle it, so that we will know ahead of time when it is coming up?

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, I am sorry that I cannot respond with any intelligence to my colleague, the gentleman from Texas, because this is the first I had heard of that. It does not surprise me, however, because the so-called natural gas compromise bill, now having been

embodied into the total energy package, and appropriately so, comes under the name of a bill for the relief of one Jose Garcia, I believe. Some of these bills are a little hard for me to identify.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I would like to get some explanation. I am sure that the distinguished minority leader is informed that the Members of his party on the committee who are all cosponsors and members of the committee handling the Middle-Income Student Assistance Act are in favor of acting on the legislation. Do I understand someone not on the committee is objecting to proceeding with it?

Mr. RHODES. Yes. Two of the Members on our side have just informed me that they have serious opposition to the rule on that bill.

Mr. FORD of Michigan. Can they not vote against the rule?

Mr. RHODES. Well, I guess anybody can vote against the rule, but the problem is that there is intensive opposition at this hour of the night. It takes time, and time is golden right now.

Mr. FORD of Michigan. If the gentleman will yield further, we reached this stage last night, and we are reaching it again tonight. I wonder if the gentleman would consider it to be out of order if we are able to arrange with the leadership to take up the rule the first thing tomorrow.

Mr. RHODES. I have no way of knowing what the majority leadership intends to take up the first thing in the morning, but I do not think there is any feeling on the part of anybody on our side to prevent permanently this bill from coming up. Of course, the gentleman is aware of the ground rules which the majority leader has laid down so far as the business of the House from 12 o'clock to 4 o'clock is concerned.

Mr. FORD of Michigan. Yes, I am fully aware of that. But this is a piece of legislation which has many cosponsors.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Illinois.

Mr. ERLENBORN. I thank the gentleman for yielding.

Mr. Speaker, it is my understanding that there are several conference reports and two bills that have no controversy connected with them at the present time that might become quite controversial and time consuming should the rule be brought up.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield further?

Mr. RHODES. I yield to the gentleman.

Mr. FORD of Michigan. Mr. Speaker, I think I understood what my friend just said, that what he really is saying to us now is that if we attempt to get to the Middle-Income Student Assistance Act we will have trouble with other legislation not connected with it that will delay the adjournment of the House. I am saddened to hear that, after all of the years we have served together on the committee, because I think we should decide these things on the merits. But I am happy the gentleman yielded to me so that we can make it abundantly clear to the people of America and those concerned with this legislation just how it is being handled.

HOUR OF MEETING ON TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I do so only for one reason, and that is that some of us on the Committee on Rules will have to attend these funerals and wish to. I would hope that there would be no meetings of the Committee on Rules. I do know the gentleman has some vague connection with the activities of that committee.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION TO POSTPONE VOTES TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that any votes otherwise in order on legislation between the hours of 12 o'clock noon and 4 o'clock p.m. on tomorrow may be postponed until after 4 o'clock on tomorrow.

The SPEAKER pro tempore. The gentleman means rollcall votes?

Mr. WRIGHT. Rollcall recorded votes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ASHBROOK. Mr. Speaker, reserving the right to object, I assume that the majority leader means substantive issues and not procedural issues.

Mr. WRIGHT. If the gentleman will yield, that is correct.

Mr. ASHBROOK. That is the general understanding.

Mr. WRIGHT. That was the understanding we had last week.

Mr. ASHBROOK. And it worked very well, as the gentleman well knows.

Mr. Speaker, further reserving the right to object, during this period of respect we are going to be in session. Does the majority leader know what we will be handling during that period, what business of the House?

Mr. WRIGHT. If the gentleman will yield, Mr. Speaker, I would rather not give a specific list of everything that is coming up, because I do not know the order in which we are going to treat the schedule tomorrow. I want to leave the Speaker some flexibility.

Mr. ASHBROOK. Further reserving the right to object, could we have a guess?

Mr. WRIGHT. Yes, I could guess. There are a lot of things still on the schedule. There are three general debates yet to be concluded, and there are conference committee reports which are listed on the sheet known as "Tentative 11." There is general debate to be concluded on the Federal Reclamation Dams Safety Act, the Indian Child Welfare Act.

The conference report on the National Energy Act must be addressed tomorrow, and we hope that a conference report on the Tax Reduction Act will be available for us tomorrow. Then, there are other things that remain uncompleted on the program of unfinished business, but the precise order of these matters just is not available to me at this moment. I should like to postpone answering the gentleman's question because I do not want to mislead him.

Mr. ASHBROOK. Further reserving the right to object, I think we have been in the fortunate position in the last few weeks of never being misled. I think we want to keep it that way. Specifically, is it the intention of the leadership to bring up the energy conference report during that period of time?

Mr. WRIGHT. It is the intention of the leadership that the energy conference report shall not be voted upon in any event until after 4 o'clock. I think it would be foolish to complete all of the general debate and then postpone a vote, but I cannot tell the gentleman anything except that there will not be any vote on it until after 4 o'clock, and until after 4 o'clock there will not be a vote on anything else, I would hope not even on procedural motions. I recognize the rules provide certain rights to all Members, and Members have those rights available to them.

Mr. ASHBROOK. Further reserving the right to object, there will be a few of us here, and I think we will try to work to make sure there are no votes. During the last 5 days when we were home, we were very successful and there were no votes on the floor. Everything flowed very well. It would be my hope that we could do that tomorrow.

I would like a little more specificity, but understanding the problems of the majority leader during these last hours of the session, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

APPOINTMENT OF CONFEREES ON S. 2584, NUCLEAR REGULATORY COMMISSION AUTHORIZATIONS

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2584) to authorize appropriations for the Nuclear Regulatory Commission for fiscal year 1979, insist on the House amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona? The Chair hears none, and without objection, appoints the following conferees: Messrs. UDALL, BINGHAM, SHARP, STAGGERS, DINGELL, BAUMAN, and BROWN of Ohio.

There was no objection.

CONFERENCE REPORT ON H.R. 6536, DISTRICT OF COLUMBIA RETIREMENT REFORM ACT

Mr. DELLUMS. Mr. Speaker, I call up the conference report on the bill (H.R. 6536) to establish an actuarially sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits.

The Clerk read the title of the bill.

(For conference report and statement, see proceedings of the House of October 4, 1978.)

The SPEAKER pro tempore. Under the rule previously adopted, the conference report is considered as having been read.

The gentleman from California (Mr. DELLUMS) will be recognized for 30 minutes, and the gentleman from Connecticut (Mr. MCKINNEY) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Speaker, I yield myself such time as I may consume.

The House and Senate have reached agreement in conference on a thorough reform of the District of Columbia pension system for police officers, firefighters, judges, and teachers. The bill is a landmark in municipal pension reform.

The purposes of the bill are: First, to establish an actuarially sound retirement fund for policemen, firemen, teachers, and judges of the District of Columbia; second, to correct abuses of the system; third, to establish a retirement board to provide sound management to protect the benefits of participants and beneficiaries of the plans; fourth, to require the retirement board to comply with reporting and disclosure requirements similar to those found in the Employee Retirement Income Security Act of 1974 (ERISA); and fifth, to provide Federal assistance to the District of Columbia to finance the unfunded pension liabilities incurred before the establishment of home rule for the District.

In order to reduce pension costs the bill eliminates for present employees as well as new hires the aggravation clause for off-duty injuries. This provision, much abused in recent years, allows a member with an injury incurred prior to becoming a policeman or fireman to retire on full disability if his or her injury is "aggravated" by his or her duty. In addition to eliminating the aggravation clause the bills require more strict accounting for aggravation claims for on-duty injuries. With this action we have stopped the most significant area of abuse regarding District of Columbia pensions. Currently, because of previous Federal legislative and executive branch inaction, there exists a $2.1 billion unfunded pension fund liability. This massive debt seriously jeopardizes the District of Columbia. This conference bill authorizes $65 million annually for 25 years. This Federal funding will put the system on a firm actuarial basis.

A feature of the bill, developed in conference, is a mechanism that automatically triggers a significant reduction in the Federal authorization if the costs exceed a strict set limit. This assures tight management controls. Further, the General Accounting Office has been mandated to monitor the system and report to Congress.

These significant achievements have been made without seriously jeopardizing the established benefits of current employees. The bill is a stringent bill that eliminates abuses. It assures the workers a sound and assured pension program. It contains the changes and safeguards that assure the taxpayers that the system is well-managed. I strongly urge my colleagues to support this conference report.

Mr. Speaker, I would like to conclude by thanking the distinguished chairman of the full committee, the gentleman from Michigan (Mr. DIGGS), and my distinguished colleague, the Delegate from the District of Columbia (Mr. FAUNTROY), and my distinguished colleague, the gentleman from Kentucky (Mr. MAZZOLI), and certainly we appreciate the extraordinary work of my colleagues on the other side of the aisle, the gentleman from Connecticut (Mr. MCKINNEY) and the gentleman from Ohio (Mr. WHALEN).

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for yielding.

I would like to take this moment to commend my chairman, the gentleman from California (Mr. DELLUMS), for the tremendous leadership he has shown. Let me make mention of my friend, the distinguished gentleman from Kentucky (Mr. NATCHER), who had a big part to play in bringing about the fact that we are here tonight with this bill. I would like to publicly thank my colleague for his work. I believe the gentleman from California and the gentleman from Kentucky and the gentleman from Connecticut are responsible for this bill being here tonight.

Mr. Speaker, I rise in favor of the conference report to accompany H.R. 6536, the District of Columbia Retirement Reform Act.

First, I would like to acknowledge the outstanding work done on this bill by my distinguished colleague, Mr. DELLUMS, chairman of the Subcommittee on Fiscal Affairs. His prompt scheduling of hearings and expeditious conduct of the subcommittee markup and his skillful handling of our conference with the Senate has greatly improved this bill and brought it before the House in its final form.

I hope that the full House will approve this bill today so that appropriations for funding these programs can be requested early next year.

Action this year is important, because each year's delay in starting the funding adds about $170 million to the unfunded liability.

I would now like to take a few minutes to explain the major provisions of this bill.

H.R. 6536—a product of 3 years of research and hearings—is designed to relieve the pressure that spiraling pension costs will place on the District's budget. With a declining population and a dwindling tax base, the District cannot afford the rapidly escalating pay-as-you-go costs of its pension plans.

At present, police and firemen's pension costs are $50 for every $100 of active payroll. By the early 2000's pension payments will exceed payroll. We must act now, for as I noted earlier every year's delay adds $170 million to the unfunded liability.

The funding method in this bill is a modified net normal cost method virtually identical to the method in the Senate bill.

Under this system, the Federal Government will pay slightly over $65 million per year for 25 years to fully liquidate the unfunded liability as of October 1, 1978, for employees retired before January 1, 1975, the starting date of home rule.

These payments are much less than the over $80 million per year in the Senate bill, but somewhat higher than the nearly $50 million per year contained in the House bill.

However, the important point about this payment amount is not that it "splits the difference," but that it is based on an actuarially sound formula. At the end of the 25-year period of Federal funding, the District will have a financially sound pension system.

Congress created the District's pension system, but did not fund it. Then at the time of home rule, it turned over a staggering $2 billion liability to the District government. This conference report—by liquidating most of that liability and requiring that the District keep the fund solvent—discharges an important Federal responsibility for the financial soundness of the District.

This legislation has also been carefully drafted to prohibit conflict of interest and to insure proper fund management. To guard against pressure to invest in potentially risky local ventures, the bill provides that no funds may be invested in bonds, real estate, or agencies of the District of Columbia, Maryland, or Virginia. These provisions were endorsed by pension management experts as a necessary safeguard.

Further, the conference report creates an independent board of trustees composed of five members appointed by the District government and six members elected by active and retired employees. Pension plan participants and beneficiaries have a majority on the board to insure that the funds held in trust for their retirement will be well invested.

Also, the Pension Board operates under strict reporting and disclosure and fiduciary standards similar to those contained in ERISA for private sector pension plans. These restrictions insure that the pension funds will be managed only in the best interests of the retired employees.

Finally, because of the excessively high cost of the District's retirement system, the bill makes a number of changes in benefits.

The primary reason for the runaway costs of the District's pension plans is the inordinate number of disability retirements. During 1969 disability retirements were 98 percent of total retirements, these rates have dropped to

around 50 percent but are still exhorbitant compared to other cities including New York.

Most of these so-called disability retirements were based on the aggravation of an injury sustained during off-duty hours. This type of retirement is entirely eliminated by the conference report.

Also, new employees will retire under a percentage-of-disability system, and will have their disability annuities reduced based on outside earned income. These changes will remove the economic incentive for employees to "beat the system."

However, to be effective, these new controls must be effectively administered. To insure this, the conference report drastically reduces the Federal funding if the District's management of the disability retirement programs allows the cost of these programs to rise above 102 percent of the tougher cost standards of percentage-of-disability retirements.

Finally, to reduce the cost of regular retirement the conference report eliminates—for new employees—the 20 year and out retirement in favor of 25 years of service at 50 years of age.

These changes have helped us hold down the cost of this conference report while moving the District toward an actuarially sound system.

All in all, Mr. Speaker, I believe that this is a good bill and I urge the House to adopt the conference report.

Mr. DELLUMS. Mr. Speaker, I thank my colleague, the gentleman from Kentucky.

Had it not been for the gentleman's sponsorship of this bill, we might never have had it.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Speaker, in the interest of time I will content myself with saying I support the conference report.

I compliment the gentlemen for the fine work they have done.

This solves a problem which has been hanging over the District of Columbia for a long time.

I urge my colleagues to support the conference report.

Mr. DELLUMS. I thank my colleague, the gentleman from Virginia (Mr. HARRIS).

Mr. Speaker, I yield back the balance of my time.

Mr. McKINNEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report to accompany H.R. 6536 and urge its adoption.

This conference report represents a substantial effort on the part of the conferees to come to terms with the various differences contained in the House bill and the other body's amendment to that bill. Several of the differences encountered were major and the conferees worked diligently to produce a conference report that would be acceptable to both Houses.

One of the major differences that had to be wrestled with concerned the applicability of certain retirement benefit reforms to current employees. The House conferees were firm in stressing that the applicability of such reforms to current employees was of questionable legal and moral efficacy. On the other hand, a majority of the conferees of the other body was just as steadfast in its stance that the reforms should apply to current employees to preserve the integrity of the system by stemming the tide of what they felt is continuing abuse of the retirement benefits provided. This particular difference was so great that, at times, it threatened to scuttle the entire conference. However, not wanting to lose the opportunity at hand to reform the very liberal pension programs that we created for the District of Columbia; programs that, unchecked, threaten to push this city to the very brink of bankruptcy, we swallowed hard and we came up with the "great compromise."

That compromise, which you have already heard discussed, would enable current employees to receive the benefits that they bargained for when initially accepting employment with the District of Columbia government but, at the same time, place the burden of careful administration of the system upon the city government, where it rightfully belongs, to prevent additional abuse. Furthermore, the compromise that the conferees arrived at produced a bill that is very supportable. It gave both groups of conferees a peg upon which to hang their hats. The majority group from the other body, so concerned about continued abuse, felt comfortable about the controls placed on the system that the compromise afforded. Our own conferees, concerned about the justice of changing a benefits contract unilaterally in midstream, felt comfortable about the continuance of benefits to current employees that the compromise made possible.

In sum, Mr. Speaker, your conferees and the conferees of the other body worked long and hard to resolve those major differences that existed between the two Houses. There is no question that we have made some concessions, but I earnestly believe that we have defended and abided by the intent and the desires of this House. This conference report is full of compromises similar to the one I have just described, but they are compromises that have been reached only through long and careful deliberation. Like any compromise, there will be some who are displeased by it and others who will be pleased, but, considered in its totality, the conference report provides a sound and feasible approach to the reform of the District of Columbia's pension systems for police, firefighters, teachers, and judges.

Finally, I would like to attest to the diligence and hard work of the Members in conference and their respective staffs. Reform of the city's pension systems was an extremely difficult subject to deal with and I wish to pay tribute to all of those who participated in the conference.

● Mr. DELLUMS. Mr. Speaker, this bill represents a significant milestone in defining Federal and District responsibilities in the post-home-rule era. It establishes a partnership between the Federal and District Governments in solving a serious financial problem that easily might have driven the city to the brink of bankruptcy sometime in the next generation. These problems are the result of literally decades of inadequate funding and overly generous benefits that were established by acts of Congress long before their full effects were recognized. With this legislation, Congress sets the record straight, rightfully accepting responsibility for the sorry financial state of the retirement systems inherited by the District government under home rule. The Federal Government will discharge that responsibility by financing the pensions of employees who retired before home rule. For its part, the District will be responsible for benefits earned by employees on the payroll at the start of home rule, as well as for all new participants coming into the retirement system in the years ahead.

One of the most important features of this bill is the strong financial incentive it gives the District to tighten its administration of disability claims involving police officers and firefighters currently on the payrolls. If the actuary determines that disability costs are higher than they would be under a partial disability system, the District will lose Federal contributions and will have to make up the losses out of the city budget. This mechanism not only provides a clear goal to the District, but also expresses, in terms that are not in the least bit ambiguous, the will of Congress that the District must do what is necessary to bring disability costs within that standard.

Senate and House managers of this bill designed this penalty provision to put the District on notice that it must end the disability abuses that have dominated the headlines and eroded public confidence in the retirement system. For too long, the disability provisions of current law have been construed too liberally with little regard for their financial consequences or for the repeated concerns of Congress to reduce the number of disability claims. My colleague from Kentucky, the chairman of the Subcommittee on District of Columbia Appropriations, shares these concerns and has taken stringent budgetary action to force reforms in the disability system.

The penalty provisions of this bill repeat the same message Congress gave the city in the fiscal year 1979 Appropriations Act. In adopting these penalty procedures, however, we also recognize that complex actuarial formulas and assumptions will have a significant bearing on whether the Federal authorization will be reduced in any given year. Let me state for the record that our intent here is to make the present system more accountable, not to subject the District to an actuarial "Catch-22." The District should not be penalized for events it cannot control, but only if its performance in controlling disability claims falls short of the mark. If the penalty formula does not fulfill our expectations, it will be changed. I personally hope we will be able to do away with the penalty provisions altogether at some future point when the District shows convincingly that the disability program is no longer being abused.●

Mr. McKINNEY. I have no requests for time, Mr. Speaker, and I yield back the balance of my time.

Mr. DELLUMS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

DIRECTING CLERK OF THE HOUSE TO MAKE CORRECTIONS IN ENROLLMENT OF H.R. 6536—D.C. RETIREMENT REFORM ACT

Mr. DELLUMS. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 749) directing the Clerk of the House of Representatives to make corrections in the enrollment of the bill H.R. 6536, D.C. Retirement Reform Act, and ask unanimous consent for its immediate consideration.

The SPEAKER. Is there objection to the request from the gentleman from California?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 749

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 6536) to establish an actuarilly sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits, the Clerk of the House of Representatives shall make the following corrections:

(1) In the item relating to section 126 in the table of contents of the bill, insert "the" before "Funds".

(2) In the item relating to section 145 in the table of contents of the bill, strike out "Contribution for Excessive Costs of Police Officers and Fire Fighters' Disability Retirement" and insert in lieu thereof "contribution for excessive costs of police officers and fire fighters' disability retirement".

(3) In the item relating to section 181 in the table of contents of the bill, strike out "responsibility" and insert in lieu thereof "responsibilities".

(4) In the item relating to section 186 in the table of contents of the bill, strike out "of" and insert in lieu thereof "on".

(5) In the item relating to section 206 in the table of contents of the bill, strike out "Survivor's" and insert in lieu thereof "Survivors' ".

(6) In section 101(a) of the bill, insert a comma after "a result".

(7) In section 101(b)(3) of the bill, strike out "and" the first place it appears and insert in lieu thereof a comma.

(8) In section 102(7)(A) of the bill, strike out the fourth comma.

(9) In section 102(7)(B) of the bill, strike out "title II" and insert in lieu thereof "title 11".

(10) In section 102(19) of the bill, strike out the third comma.

(11) In section 122(a)(1) of the bill, strike out "Firemens' " and insert in lieu thereof "Firemen's".

(12) In section 123(b)(1)(C) of the bill, insert a comma after "31–725(b)(1)(ii))".

(13) In section 123(b)(1)(D) of the bill, insert a comma after "31–729(a))".

(14) In section 123(b)(1)(F) of the bill, insert a comma after "31–737)".

(15) In section 142(a)(1)(A) of the bill, strike out "were" and insert in lieu thereof ", if" and insert a comma after "retirement program".

(16) In section 142(b)(1)(D) of the bill, strike out "10 years" and insert in lieu thereof "ten fiscal years".

(17) In section 144(e)(1) of the bill, strike out "or" the first place it appears and insert in lieu thereof "and".

(18) In section 145(a)(1) of the bill, strike out "Police" the first place it appears and insert in lieu thereof "Policemen".

(19) In section 145(a)(2) of the bill, strike out "Police" and insert in lieu thereof "the Policemen".

(20) In section 145(b)(2) of the bill, strike out "calculation" and insert in lieu thereof "statement".

(21) In section 145(c) of the bill, strike out "lump sum" and insert in lieu thereof "lump-sum".

(22) In section 164(c) of the bill, strike out "the retirement program" and insert in lieu thereof "a retirement program",

(23) In the section headings of section 165 of the bill, strike out "PARTICIPANT'S" and insert in lieu thereof "PARTICIPANTS' ".

(24) In section 181(f)(3) of the bill, strike out "and" after "such fund".

(25) In section 187(a)(3)(B)(i) of the bill, strike out "violations" and insert in lieu thereof "violation",

(26) In section 187(b) of the bill, strike out "the amount" and insert in lieu thereof "an amount",

(27) In subsection (g)(5)(B)(iii) of the Policemen and Firemen's Retirement and Dis-Act, as proposed by section 204(b)(2) of the bill, insert "shall be" after "his annuity".

(28) In subsection (j)(3) of the Policemen and Firemen's Retirement and Disibility Act, as proposed by section 205(a)(2)(B) of the bill. strike out "(C)(i)" and insert in lieu thereof "(E)(i)".

(29) In the section heading of section 206 of the bill, strike out "SURVIVOR'S" and insert in lieu thereof "SURVIVORS' ".

(30) In the section heading of section 252 of the bill, strike out "JUDGE'S" and insert in lieu thereof "JUDGES' ".

(31) In section 253(a)(1) of the bill, strike out "(1) in the" and insert in lieu thereof "(A) in the", strike out "(2)" and insert in lieu thereof "(B)", strike out "(A)" and insert in lieu thereof "(i)", strike out "(i)" and insert in lieu thereof "(I)", strike out "(ii)" and insert in lieu thereof "(II)", and strike out "(B)" and insert in lieu thereof "(ii)".

(32) In section 253(b) of the bill, strike out "(A)" and "(B)" and insert in lieu thereof "(1)" and "(2)", respectively.

(33) In section 254(a) of the bill, insert "title 11 of" after "chapter 15 of" and insert a comma after "(9)(C)", after "(10)(C)", and after "11–1569(c)".

(34) In sections 206(b), 207(b), 208(b), 209(b), 253(c), and 254(c) of the bill, strike out "90" each place it appears and insert in lieu thereof "ninety".

(35) Amend the title so as to read "An Act to establish an actuarially sound basis for financing retirement benefits for police officers, fire fighters, teachers, and judges of the District of Columbia and to make certain changes in such benefits.".

Mr. DELLUMS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the concurrent resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 2416, NURSE TRAINING AMENDMENTS OF 1978

Mr. ROGERS. Mr. Speaker, I call up the conference report on the Senate bill (S. 2416) to amend title VIII of the Public Health Service Act to extend for 2 fiscal years the program of assistance for nurse training and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

(For conference report and statement, see proceedings of the House of today, October 13, 1978.)

The SPEAKER pro tempore. The gentleman from Florida (Mr. ROGERS) will be recognized for 30 minutes, and the gentleman from Kentucky (Mr. CARTER) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this conference report would amend title VIII of the Public Health Service Act to extend for 2 fiscal years the program of assistance for nurse training.

The legislation, which, in large measure, conforms to the House-passed bill, has four principal purposes.

First, it would extend the authorities of existing law with respect to nurse training including authorizations for construction grants, loan guarantees and interest subsidies, capitation grants, advanced nurse training programs and traineeships, nurse practitioner programs, and student loans and scholarships at the 1978 authorization level. It would increase the authorization of appropriations for special project grants by $5 million and allow the existing authority for financial distress grants, which has not been funded for 4 years, to lapse.

Second, it would add new authority to provide traineeships to professional nurses in training to become nurse anesthetists.

Third, it would require the conduct of a study and report to the Congress with respect to the need to continue the program of Federal financial support for nursing education.

Finally, it would encourage an increase in the supply of nurses in medically underserved areas by providing that loan forgiveness would only be authorized for nurses who agree to practice in underserved areas. Existing law authorizes loan forgiveness for virtually all practicing nurses regardless of location of employment.

In addition, the measure before us today includes one technical and three minor, substantive amendments.

First, it contains an amendment to section 113 of the bill to conform that section to the provisions of the Budget Control and Impoundment Act of 1974 to make it clear that any funds obligated to implement the section are limited by amounts available under an appropriation act and that no such funds could be obligated prior to October 1, 1978.

Second, it includes an amendment to section 781 of the Public Health Service Act—relating to the area health education centers program—which would amend the existing requirements that each medical and osteopathic school participating in an AHEC program conduct a program for the training of physician assistants or nurse practitioners. Under the amendment, only one such school within an AHEC program would have to conduct such a training program.

Third, it contains an amendment to section 802 of the Health Professions Educational Assistance Act of 1976 (Public Law 94-484) which would enable area health education centers which first received funding under section 774 of the Public Health Service Act before October 12, 1976, to continue to be eligible to receive support through fiscal year 1981 without meeting the new requirements for area health education centers under new section 781 of the act. This extension of eligibility for gradually diminishing Federal funding will provide the 11 original AHEC programs with a sufficient period of time in which to find alternative sources of State and local support.

Finally, it includes a minor amendment to the authority under section 748 of the Public Health Service Act—relating to traineeships for students in schools of public health—to permit students in schools of public health who received traineeship support during school year 1977-78 under the authority of old section 312 of the act to continue to be eligible for such support for school year 1978-79 whether or not they meet the new requirements of new section 748.

Under section 748 of the act, 45 percent of the traineeship funds awarded to a school of public health must be used to provide traineeships to individuals who have either a postbaccalaureate degree or 3 years work experience in a health services field and who intend to pursue a specified course of study. Unfortunately, in school year 1977-78, several schools made awards under the old authority to some 242 students beginning a 2-year course of study who do not meet the requirements of section 748 which superseded section 312. The amendment will enable these students to complete their education.

Mr. Speaker, I commend this conference report to my colleagues and urge its immediate adoption.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Speaker, I would just like to know when this conference report was filed.

Mr. ROGERS. This conference report was filed at 4 o'clock today.

Mr. VOLKMER. It has been filed since 4 o'clock?

Mr. ROGERS. Yes, it has been.

Mr. VOLKMER. Has it been printed?

Mr. ROGERS. Yes, it has.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the Senate amendment to the House amendment to S. 2416—the Nurse Training Amendments of 1978.

This legislation continues Federal support for the training of nurses for 2 years. Funds are authorized for:

Nurse practitioner programs;

Scholarships;

Loans and interest subsidies;

Advanced nurse training;

Special projects;

Traineeships for nurse anesthetists; and

Construction.

The bill retains the main provisions of the House-passed version—except for a few perfecting and technical amendments.

Mr. Speaker, the nursing profession is a committed and dedicated group of individuals whose services are essential to the provision of high quality health care.

We must do all we can to insure that our people have access to that care—and that there is an adequate supply of nurses in all parts of the country.

At the present time—there are still millions of Americans living in medically underserved areas—who lack access to nurses as well as doctors.

This legislation will help address that need by continuing Federal support for the training of various fields of nurse education.

I strongly urge adoption of this conference report.

Mr. BAUMAN. Would the gentleman yield?

Mr. CARTER. I yield to the gentleman from Maryland.

Mr. BAUMAN. Could we just ask, as a matter of passing interest, what the amount of money is in this bill?

Mr. ROGERS. If the gentleman will yield, certainly. The amount of money is $208 and $209 million. Actually it comes back to the House $6 million less than when it passed the House on a two-thirds vote.

Mr. BAUMAN. All of that is for nurses training and there are no other nonrelated amendments involved?

Mr. ROGERS. That is for nurses training.

Mr. BAUMAN. I thank the gentleman.

Mr. ROGERS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 2466, HEALTH SERVICES RESEARCH, HEALTH STATISTICS, AND HEALTH CARE TECHNOLOGY ACT OF 1978

Mr. ROGERS. Mr. Speaker, I call up the conference report on the Senate bill (S. 2466) to amend the Public Health Service Act to extend and revise the assistance programs for health services research and health statistics; to establish the Office of Health Technology, and for other purposes.

The Clerk read the title of the Senate bill.

(For conference report and statement see proceedings of the House of today, Friday, October 13, 1978.)

The SPEAKER pro tempore. The gentleman from Florida (Mr. ROGERS) will be recognized for 30 minutes and the gentleman from Kentucky (Mr. CARTER) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this report modifies and extends for a period of 3 years the authority of the National Center for Health Statistics and the National Center for Health Services Research at a funding level lower than those already approved by this body in adopting the House bill. It combines the provisions of the two measures that improved existing law with respect to the two centers.

In addition, it in effect splits the difference between the House and Senate provisions with respect to health care technology.

Specifically, the Senate bill authorized the establishment of an Office of Health Technology within HEW to conduct assessments of technology and provide recommendations based on those assessments. The House amendment authorized the establishment of a Center for Health Care Technology for similar purposes. The conference report conforms to the House amendment.

The Senate bill established a National Council on Health Care Technology to advise the Secretary on technology issues, conduct peer review of grant and contract authority, and disseminate criteria with respect to health care technology. The House amendment established an advisory council with similar responsibilities. The conference report establishes a national council, and combines the authorities afforded it by the Senate bill and those afforded the advisory committee in the House amendment.

In addition, the House amendment authorized a study of costs of environmentally related diseases and the establishment of guidelines on the effects on health of the environment and employment conditions. These provisions have been agreed to.

The conferees agreed to a Senate provision authorizing a mine workers study and to House technical and minor nonsubstantive provisions, principally with respect to the Health Professions Educational Assistance Act.

Mr. Speaker, this bill combines the best features of both bills. I urge its adoption.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report accompanying S. 2466, the Health Services Research, Health

Statistics, and Health Care Technology Act of 1978. The House and Senate bills closely resembled each other, and so this conference report closely parallels the original House bill. I would especially like to point out to my colleagues that this conference report authorizes a lower level of expenditures than the bill approved by the House. In fact, the total authorization is $51 million less.

Moreover, Mr. Speaker, the conference bill provides strong language to coordinate all of the health services research, health statistics, and health care technology assessment activities of the Federal Government to insure that duplication is curbed. In my opinion, this provision should insure that the funds expended under this bill are spent as effectively as possible.

In short, I believe that the conference report represents a good compromise, one which adheres closely to the bill already approved by the House. For this reason I would urge my colleagues to support this conference report.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman from Florida yield?

Mr. ROGERS. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, can the gentleman tell us how much this bill will cost?

Mr. ROGERS. Yes. This bill was $40 million less than the amount was when it passed the House. The bill as it passed the House was for $429 million. The bill is now $388 million for 3 years, spread over 3 years.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman.

Mr. MILLER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I am delighted to yield to the gentleman from Ohio.

Mr. MILLER of Ohio. Mr. Speaker, there seems to be a discrepancy in the figures which were given by the gentleman from Florida (Mr. ROGERS), who gave a figure of $41 million less, and the figure of the gentleman from Kentucky (Mr. CARTER), which was $51 million less. May I ask which is correct?

Mr. ROGERS. Mr. Speaker, I will yield to the gentleman from Kentucky to answer that.

Mr. CARTER. Mr. Speaker, I thank the gentleman for yielding.

My figures seem to be correct. I would say that they are.

Mr. MILLER of Ohio. They are both correct?

Mr. CARTER. It is $51 million less.

Mr. MILLER of Ohio. $51 million less is the correct figure?

Mr. CARTER. That is right.

Mr. ROGERS. I will accept that figure.

Mr. MILLER of Ohio. Mr. Speaker, I thank the gentleman.

Mr. ROGERS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 2534, HEALTH MAINTENANCE ORGANIZATION ACT AMENDMENTS OF 1978

Mr. ROGERS. Mr. Speaker, I call up the conference report on the Senate bill (S. 2534) to revise and extend the provisions of title XIII of the Public Health Service Act relating to health maintenance organizations, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

(For conference report and statement see prior proceedings of the House today.)

The SPEAKER pro tempore. The gentleman from Florida (Mr. ROGERS) will be recognized for 30 minutes, and the gentleman from Kentucky (Mr. CARTER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the Members are aware, the Health Maintenance Organization Amendments of 1978 passed this body on September 25, 1978, by a vote of 327 to 60. I am pleased to report to my colleagues that conferees have met and have agreed on a conference report which will strengthen and extend Federal assistance for the establishment and operation of health maintenance organizations.

This conference agreement retains all aspects of the House amendment which encourages the continued development of health maintenance organizations and which assure that all HMO's which are qualified by the Department of Health, Education, and Welfare are providing the required services in a manner prescribed by law. The agreement also combines several provisions of the Senate bill; but all of these provisions are consistent with the House amendment and all of them involve matters which have been considered by the House.

Mr. Speaker, if we are to effectively deal with the problem of rising health care costs, we must alter the structure of the present health care delivery system so that consumers and providers have incentives to control health care costs. Such incentives are basic to the operation of health maintenance organizations.

The legislation before us provides for the extension of and needed changes in the HMO program. It promotes the further development of HMO's, but it also includes provisions to help insure that federally assisted HMO's will become financially self-sufficient and that any fraud or abuse by HMO's will be detected.

The following is a brief explanation of the major provisions of the report:

HEALTH MAINTENANCE ORGANIZATION AMENDMENTS OF 1978—AGREEMENT OF CONFERENCE ISSUES

EXTENSION OF PROGRAM

The following authorizations are recommended for HMO feasibility, planning, initial development, training and technical assistance grants or contracts:

(In millions)

Fiscal year:	
1979	$31
1980	65
1981	68

INITIAL DEVELOPMENT

The Secretary is authorized to make grants up to $1,000,000 through September 30, 1979 and $2,000,000 thereafter for the initial development of a health maintenance organization. Initial development is defined to include the establishment of an HMO, the expansion of the services of an HMO, and the significant expansion of the membership of or the area served by an HMO.

INITIAL OPERATING LOANS

The total amount of loans available to an HMO for the costs of operation would be increased from the current limits of $2.5 million in total and $1 million per year to $4.5 million in total and $2 million per year in FY 1980. During FY '79 the Secretary may increase the current loans limits to the FY 1980 limits if he makes a written determination that such additional loans are necessary to preserve the fiscal soundness of the operation and to protect it against the risk of insolvency. If the Secretary makes such a determination, he must notify within thirty days the Committee on Human Resources of the Senate and the Committee on Interstate and Foreign Commerce of the House of his decision.

The Secretary is authorized to take such action as he deems appropriate to protect the interest of the United States in the event of a default on a loan made or guaranteed under Title XIII.

LOANS FOR AMBULATORY CARE FACILITIES

New loan authority is created to allow the Secretary to make loans for projects for the acquisition or construction of an ambulatory health care facility. A limit of $2.5 million for each ambulatory health care facility of an HMO is established.

CONTINUING DEVELOPMENT ASSISTANCE

Activities for which grants for initial development may be made are expanded to include the expansion of services of an HMO.

MANAGEMENT TRAINING AND TECHNICAL ASSISTANCE

An HMO intern training program is established beginning in fiscal year 1979. No separate authorization for the program is provided. Authority for a technical assistance program is also provided.

EMPLOYEE HEALTH BENEFIT PLANS

Certain employers must arrange, with employee consent, for the employee's contribution for HMO membership to be paid through payroll deductions. Those employers include all employers which provide payroll deductions for employees' contributions for health benefits or provide a health benefit plan to which no employee contribution is required.

Clarifying language is included regarding the types of health maintenance organizations which must be offered by an employer.

FINANCIAL DISCLOSURE AND ENROLLMENT PRACTICES

Financial information, including a consolidated financial statement where the HMO is related to an organization by common ownership or control, and information regarding the ownership of a health maintenance organization must be filed at such times as the Secretary prescribes. The Secretary will evaluate the information reported to him and report to the Congress on the actions he considers necessary with respect to that information. Penalties are provided for failure to file the information.

The Secretary will promulgate regulations regarding the enrollment of members who are entitled to Medicaid.

ORGANIZATION REQUIREMENTS

Students who are full time at an accredited institution of higher education may be enrolled for a payment that is not fixed under a community rating system.

HMO's will be required to have administrative and managerial arrangements satisfactory to the Secretary.

A public HMO will be permitted to have an advisory board to which it may delegate policymaking authority. The advisory board must be composed so that at least one third of its membership will be members of the HMO and so that it includes equitable representation from medically underserved populations served by the HMO.

REQUIREMENTS FOR THE PROVISION OF SERVICES

An HMO may, during its first four fiscal years, enter into contracts with physicians other than members of its staff, a medical group or an individual practice association without limitation as to the amount of the contracts. In the fifth fiscal year the amounts paid for physicians services under such contracts may not exceed 15% of the total estimated amount to be paid to physicians for the provision of physicians' services (30% in rural areas).

An HMO will be permitted to seek reimbursement for the cost of services provided to a member who is entitled to benefits under a workmen's compensation law or an insurance policy.

A member of an HMO shall be reimbursed by the organization for his expenses in securing basic health services other than through the organization if services were medically necessary and immediately required because of unforeseen illness, injury or condition.

An HMO will be required to make a good faith effort to provide health services in the event of a natural disaster or riot, civil insurrection or any other similar event not within the control of the HMO.

An HMO will not be required to provide services which the Secretary determines, upon the application of an HMO, to be unusual or infrequently provided, and not necessary for the protection of an individual's health.

SOCIAL SECURITY ACT AMENDMENTS

The prohibition in Federal law regarding conflicts of interest of active and former officers and employees of the Federal government will be extended to State or local officers or employees who are responsible for the expenditure of substantial amounts of the Medicaid fund and to each individual who formally was such an officer or employee and to each partner of such an officer or employees.

Section 1122 of the Social Security Act which provides for review by State Health Planning Agencies of capital expenditures proposed to be made by health care facilities is modified to provide that the development of facilities and services of an HMO is covered in the same manner as other health care facilities and organizations.

ADMINISTRATION OF THE PROGRAM

The current requirements relating to the administrative locations within HEW of the HMO program are repealed.

PROGRAM MANAGEMENT EVALUATION

The Controller General will evaluate the policies and procedures for the management of the grant and loan programs and the amounts of assistance available under such programs and report to the Congress not later than May 1, 1979.

APPLICATION REQUIREMENT

The Secretary is authorized to make grants and contracts for HMO feasibility studies regardless of the financial position of the applicant. In providing all other support the Secretary will not require the applicant to sue all available assets for the project if such a requirement would jeopardize the fiscal soundness of the applicant.

WAIVER OF POLICYMAKING BODY REQUIREMENTS

There will be no waiver of policymaking body requirements for HMO's which have been operated since January 1, 1974 by a commercial insurance carrier or by a nonprofit carrier which provides hospital service benefits or medical surgical benefits or both.

FUNDING UNDER OTHER AUTHORITIES FOR THE PROVISION OF HEALTH SERVICES ON A PREPAID BASIS

Authority for the use of funds under sections 319 (Migrant Health) and 330 (Community Health Centers) will be addressed in the Health Services Extension Act of 1978 (S. 2474).

Mr. Speaker, it is my belief that this conference report includes the best features of the House amendment and the Senate bill. I recommend it to the House without reservation.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report accompanying S. 2534, the health maintenance organization amendments of 1978. This report closely parallels the original House bill except in a few instances. In fact, most of the Senate amendments accepted by the conferees are designed to strengthen the administration of the HMO program.

For example, the Senate bill included a provision which put a ceiling on the amount an individual HMO could receive in initial development grants. This conference report contains that provision.

Another Senate amendment on HMO's requires the comptroller general to evaluate the adequacy and effectiveness of the policies and procedures used by HEW to provide loans to HMO's. Again, the conference report contains this provision.

I am also happy to report that the report retains an amendment which I offered which requires HEW to assure that HMO's are competently managed before providing grants and loans to them. I believe that this is a significant improvement in the HMO program.

In an effort to avoid abuses which have unfortunately occurred in the past, the report includes provisions from both the House and Senate bills which require HMO's to meet financial reporting requirements similar to those included in the medicare-medicaid fraud and abuse amendments approved last year. The report also includes provisions authorizing the secretary to regulate the marketing practices of HMO's as well.

Mr. Speaker, I believe that this conference report represents a reasonable response to the problems of the HMO program and these amendments will go a long way to insure that the program is prudently managed. For these reasons, I would urge favorable consideration of this conference report.

Thank you, Mr. Speaker.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman from Florida yield?

Mr. ROGERS. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, can the gentleman from Florida (Mr. ROGERS) tell us how much this bill is?

Mr. ROGERS. Yes. Actually we had $177 million in the Senate bill and $151 million in our bill. The conference bill comes out at $164 million, which is split.

Mr. ROUSSELOT. It is $164 million?

Mr. ROGERS. Yes.

Mr. ROUSSELOT. A year?

Mr. ROGERS. Three years.

Mr. ROUSSELOT. It is spread over the 3 years?

Mr. ROGERS. That is right, over the 3 years.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DERWINSKI. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Members will record their votes by electronic device.

Mr. DERWINSKI. Mr. Speaker, I withdraw my point of order.

The SPEAKER pro tempore. The Chair will advise the gentleman that the request comes too late. The Chair has announced the vote. In the absence of a quorum, the vote is automatic.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 309, nays 33, not voting 88, as follows:

Mr. Runnels with Mr. Harrington.

Mr. HARSHA changes his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMATEUR SPORTS ACT OF 1978

Mr. DANIELSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the Senate bill (S. 2727) to promote and coordinate amateur athletic activity in the United States, to recognize certain rights for U.S. amateur athletes, to provide for the resolution of disputes involving national governing bodies, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the Senate bill (S. 2727), with Mr. KREBS in the chair.

The Clerk read the title of the Senate bill.

The CHAIRMAN. When the Committee rose on Wednesday, October 11, 1978, all time for general debate on the bill had expired.

Pursuant to the rule, the bill considered as having been read for amendment under the 5-minute rule.

The bill is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Amateur Sports Act of 1978".

"SEC. 103. As used in this Act, the term—

"(1) 'amateur athlete' means any athlete who meets the eligibility standards established by the national governing body for the sport in which the athlete competes;

"(2) 'amateur athletic competition' means a contest, game, meet, match, tournament, regatta, or other event in which amateur athletes are permitted to compete;

"(3) 'amateur sports organization' means a not-for-profit corporation, club, federation, union, association, or other group organized in the United States which sponsors or arranges any amateur athletic competition;

"(4) 'Corporation' means the United States Olympic Committee;

"(5) 'international amateur athletic competition' means any amateur athletic competition between any athlete or athletes representing the United States, either individually or as part of a team, and any athlete or athletes representing any foreign country;

"(6) 'National governing body' means an amateur sports organization which is recognized by the Corporation in accordance with section 201 of this Act; and

"(7) 'sanction' means a certificate of approval issued by a national governing body.".

OBJECTS AND PURPOSES OF THE CORPORATION

SEC. 204. Section 104 of the Act, as redesignated by section 201 of this Act, is amended to read as follows:

"SEC. 104. The objects and purposes of the Corporation shall be to—

"(1) establish national goals for amateur athletic activities and encourage the attainment of those goals;

"(2) coordinate and develop amateur athletic activity in the United States in order to foster productive working relationships among sports-related organizations;

"(3) exercise exclusive jurisdiction, either directly or through its constituent members or committees, over all matters pertaining to the participation of the United States in the Olympic Games and in the Pan-American Games, including the representation of the United States in such games, and over the organization of the Olympic Games and the Pan-American Games when held in the United States;

"(4) obtain for the United States, either directly or by delegation to the appropriate national governing body, the most competent amateur representation possible in each competition and event of the Olympic Games and of the Pan-American Games;

"(5) promote and support amateur athletic activities involving the United States and foreign nations;

"(6) promote and encourage physical fitness and public participation in amateur athletic activities;

"(7) assist organizations and persons concerned with sports in the development of amateur athletic programs for amateur athletes;

"(8) provide for the swift resolution of conflicts and disputes involving amateur athletes, national governing bodies, and amateur sports organizations, and protect the opportunity of any amateur athlete, coach, trainer, manager, administrator, or official to participate in amateur athletic competition;

"(9) foster the development of amateur athletic facilities for use by amateur athletes and assist in making existing amateur athletic facilities available for use by amateur athletes;

"(10) provide and coordinate technical information on physical training, equipment design, coaching, and performance analysis;

"(11) encourage and support research, development, and dissemination of information in the areas of sports medicine and sports safety;

"(12) encourage and provide assistance to amateur athletic activities for women; and

"(13) encourage and provide assistance to amateur athletic programs and competition for handicapped individuals, including, where feasible, the expansion of opportunities for meaningful participation by handicapped in-

dividuals in programs of athletic competition for able-bodied individuals.".

POWERS OF THE CORPORATION

SEC. 205. Section 105 of the Act, as redesignated by section 201 of this Act, is amended to read as follows:

"SEC. 105. (a) The Corporation shall have perpetual succession and power to—

"(1) serve as the coordinating body for amateur athletic activity in the United States;

"(2) represent the United States as its national Olympic committee in relations with the International Olympic Committee and the Pan-American Sports Organization;

"(3) organize, finance, and control the representation of the United States in the competitions and events of the Olympic Games and of the Pan-American Games, and obtain, either directly or by delegation to the appropriate national governing body, amateur representation for such games;

"(4) recognize eligible amateur sports organizations as national governing bodies for any sport which is included on the program of the Olympic Games or the Pan-American Games;

"(5) facilitate, through orderly and effective administrative procedures, the resolution of conflicts or disputes involving any amateur athlete, coach, trainer, manager, administrator, official, national governing body, or amateur sports organization;

"(6) sue and be sued;

"(7) make contracts;

"(8) acquire, hold, and dispose of real and personal property as may be necessary for its corporate purposes;

"(9) accept gifts, legacies, and devises in furtherance of its corporate purposes;

"(10) borrow money to carry out its corporate purposes, issue notes, bonds, or other evidences of indebtedness therefor, and secure the same by mortgage, subject in each case to the laws of the United States or of any State;

"(11) provide financial assistance to any organization or association, other than a corporation organized for profit, in furtherance of the purposes of the Corporation;

"(12) approve and revoke membership in the Corporation;

"(13) adopt and alter a corporate seal;

"(14) establish and maintain offices for the conduct of the affairs of the Corporation;

"(15) publish a newspaper, magazine, or other publication consistent with its corporate purposes; and

"(16) do any and all acts and things necessary and proper to carry out the purposes of the Corporation.

"(b) The Corporation shall adopt and may amend a constitution and bylaws not inconsistent with the laws of the United States, except that the Corporation may amend its constitution only if it—

"(1) publishes in its principal publication and in the Federal Register a general notice of the proposed alteration of the constitution, including the substantive terms of the alternation, the time and place of the Corporation's regular meeting at which the alteration is to be decided, and a provision informing interested persons that they may submit materials as authorized in subparagraph (2); and

"(2) gives to all interested persons, prior to the adoption of any amendment, an opportunity to submit written data, views, or arguments concerning the proposed amendment for a period of at least 30 days after the date of publication of the notice in the Federal Register.".

MEMBERSHIP IN THE CORPORATION

SEC. 206. Section 106 of the Act, as redesignated by section 201 of this Act, is amended by—

(a) inserting "(a)" immediately before "Eligibility" therein; and

(b) adding at the end thereof the following new subsection:

"(b) In its constitution and bylaws, the Corporation shall establish and maintain provisions with respect to its governance and the conduct of its affairs for reasonable representation of:

"(1) amateur sports organizations recognized as national governing bodies in accordance with section 201 of this Act;

"(2) amateur athletes who are actively engaged in amateur athletic competition or who have represented the United States in international amateur athletic competition within the preceding 10 years;

"(3) amateur sports organizations which conduct a national program or regular national amateur athletic competition in two or more sports which are included on the program of the Olympic Games or the Pan-American Games on a level of proficiency appropriate for the selection of amateur athletes to represent the United States in international amateur athletic competition; and

"(4) individuals not affiliated or associated with any amateur sports organization who in the Corporation's judgment represent the interests of the American public in the activities of the Corporation.".

USE OF OLYMPIC DESIGNATIONS

SEC. 207. Section 110 of the Act, as redesignated by section 201 of this Act, is amended to read as follows:

"SEC. 110. (a) Without the consent of the Corporation, any person who—

"(1) falsely or fraudulently represents to be a member or a representative of the Corporation or of one of its constituent organizations for the purpose of soliciting, collecting, or receiving money or material;

"(2) wears or displays the emblem of the Corporation for the purpose of inducing the mistaken belief that such person is or has been a member or a representative of the Corporation or of one of its constituent organizations; or

"(3) uses for the purpose of trade, to induce the sale of any goods or services, or to promote any theatrical exhibition, athletic performance, or competition—

"(A) the emblem of the International Olympic Committee, consisting of five interlocking rings;

"(B) the emblem of the Corporation, consisting of an escutcheon having a blue chief and vertically extending red and white bars on the base with five interlocking rings displayed on the chief;

"(C) any other Olympic trademark, trade name, sign, symbol, or insignia made or colored in imitation of, or confusingly similar to, the emblem, trade name, or any trademark of the International Olympic Committee or of the Corporation; or

"(D) the words 'Olympic', 'Olympian', 'Olympiad', 'Citius Altius Fortius', or any combination, simulation, or confusingly similar derivative thereof tending to cause confusion, to cause mistake, to deceive, or to falsely suggest a connection with the Corporation or any Olympic activity;

shall be liable subject to suit in a civil action by the Corporation for the remedies provided in subsection (c) of this section. However, any person who actually used, or whose assignor actually used, such trademark, trade name, emblem, sign, symbol, insignia, or words for any lawful purpose prior to September 21, 1950, shall not be deemed forbidden by this lawfully prior to September 21, 1950.

"(b) The district courts of the United States shall have original jurisdiction and the courts of appeal of the United States shall have appellate jurisdiction of all actions arising under subsection (a) of this section, without regard to the amount in controversy or to diversity or lack of diversity of the citizenship of the parties.

"(c) When a violation of any provision of this section is established in any civil action arising under this section, the Corporation shall be entitled to—

"(1) obtain injunctive relief upon such terms as the court considers reasonable to prevent a violation or threatened violation of this section;

"(2) recover the profits which the defendant accrued as a result of such violation;

"(3) recover any damages sustained by the Corporation; and

"(4) recover costs of the action, including, at the discretion of the court, the amount of reasonable attorney's fees.

"(d) The Corporation may authorize contributors and suppliers of goods or services to use the trade name of the Corporation as well as any Olympic trademark, symbol, insignia, or emblem of the International Olympic Committee or of the Corporation in advertising that the contributions, goods, or services were donated, supplied, or furnished to or for the use of, approved, selected, or used by the Corporation or United States Olympic or Pan-American team or team members.".

ANNUAL REPORT

SEC. 208. Section 113 of the Act, as redesignated by section 201 of this Act, is amended to read as follows:

"SEC. 113. The Corporation shall, on or before the first day of June in each year, transmit simultaneously to the President and to the Congress a detailed report of its operations for the preceding calendar year, including an accounting of the financial status of the Corporation and a comprehensive description of the activities and accomplishments of the Corporation during the preceding year. The report may include recommendations for additional legislation or other action which the Corporation considers necessary or desirable for attaining its objectives. Copies of the report shall be made available to interested persons at a reasonable cost.".

ATHLETE'S OPPORTUNITY TO PARTICIPATE

SEC. 209. Title I of the Act, as amended by this Act, is further amended by adding at the end thereof the following new section:

"SEC. 114. In its constitution and bylaws, the Corporation shall establish and maintain provisions for the swift and equitable resolution of disputes involving the opportunity of an amateur athlete, coach, trainer, manager, administrator, or official to participate in the Olympic Games, the Pan-American Games, world championship competition and any other amateur athletic competition which may be designated by the Corporation.".

NATIONAL GOVERNING BODIES

SEC. 210. The Act, as amended by section 1 of this Act, is further amended by adding at the end thereof the following new title:

"TITLE II—NATIONAL GOVERNING BODIES

"SEC. 201. (a) For any sport which is included on the program of the Olympic Games or the Pan-American Games, the Corporation is authorized to recognize as a national governing body an amateur sports organization which files an application and is eligible for such recognition, in accordance with the provisions of subsection (b) of this section. The Corporation shall recognize only one national governing body for each sport for which an application is made and approved. Prior to the recognition of a national governing body under the authority granted under this title and in accordance with the procedures and requirements of this section, the Corporation shall hold a hearing opening to the public on the application for such recognition. The Corporation shall publish notice of the time, place, and nature of the hearing. Publication shall be made in a regular issue of the Corporation's principal publication at

least 30 days, but not more than 60 days, prior to the date of the hearing.

"(b) No amateur sports organization is eligible to be recognized or is eligible to continue to be recognized as a national governing body unless it—

"(1) is incorporated under the laws of any of the several States of the United States or the District of Columbia as a not-for-profit corporation having as its purpose the advancement of amateur athletic competition, and has the managerial and financial capability to plan and execute its obligations;

"(2) submits an application for recognition, in such form as the Corporation shall require, as a national governing body and, upon application, submits a copy of its corporate charter and bylaws and any additional information as is considered necessary or appropriate by the Corporation;

"(3) agrees to submit, upon demand of the Corporation, to binding arbitration by American Arbitration Association in any controversy involving its recognition as a national governing body, as provided for in section 205 of this title, or involving the opportunity of any amateur athlete, coach, trainer, manager, administrator or official to participate in amateur athletic competition, as provided for in the Corporation's constitution and bylaws;

"(4) demonstrates that it is autonomous in the governance of its sport, in that it independently determines and controls all matters central to such governance, does not delegate such determination and control, and is free from outside restraint, and demonstrates that it is a member of no more than one international sports federation which governs a sport included on the program of the Olympic Games or the Pan-American Games;

"(5) demonstrates that its membership is open to any individual who is an amateur athlete, coach, trainer, manager, administrator, or official active in the sport for which recognition is sought, or to any amateur athlete, coach, trainer, manager, administrator, or official active in the sport for which recognition is sought, or to any amateur sports organization which conducts programs in the sport for which recognition is sought, or to both;

"(6) provides an equal opportunity to amateur athletes, coaches, trainers, managers, administrators, and officials to participate in amateur athletic competition, without discrimination on the basis of race, color, religion, age, sex, or national origin, and with fair notice and opportunity for a hearing to any amateur athlete, coach, trainer, manager, administrator, or official before declaring such individual ineligible to participate;

"(7) is governed by a board of directors or other such governing board whose members are selected without regard to race, color, religion, national origin or sex, except that, in sports where there are separate male and female programs, it provides for reasonable representation of both males and females on such board of directors or other such governing board;

"(8) demonstrates that its board of directors or other such governing board includes among its voting members individuals who are actively engaged in amateur athletic competition in the sport for which recognition is sought or who have represented the United States in international amateur athletic competition in the sport for which recognition is sought within the preceding 10 years, and that the membership and voting power held by such individuals is not less than 20 percent of such membership and voting power held in that board of directors or other such governing board;

"(9) provides for reasonable representation on its board of directors or other such governing board for any amateur sports organization which, in the sport for which recognition is sought, conducts, on a level of proficiency appropriate for the selection of amateur athletes to represent the United States in international amateur athletic competition, a national program or regular national amateur athletic competition, and ensures that such representation shall reflect the nature, scope, quality, and strength of the programs and competitions of such amateur sports organization in relation to all other such programs and competitions in such sport in the United States;

"(10) demonstrates that none of its officers are also officers of any other amateur sports organization which is recognized as a national governing body;

"(11) provides procedures for the prompt and equitable resolution of grievances of its members;

"(12) does not have eligibility criteria relating to amateur status which are more restrictive than those of the appropriate international sports federation; and

"(13) demonstrates, if it is an amateur sports organization seeking recognition as a national governing body, that it is prepared to meet the obligations imposed on a national governing body under section 202 of this Act.

"(c)(1) Except as provided in paragraph (2), any amateur sports organization which on the date of enactment of this title is recognized by the Corporation to represent a particular sport shall be considered to be the national governing body for that sport. Such an organization is exempt for a period of 2 years from the date of enactment of this title from meeting the requirements of subsection (b) of this section, and during the 2-year period shall take the necessary actions to meet such requirements if it desires to retain its recognition. After the expiration of the 2-year period, such an organization shall continue as the national governing body for that sport unless the Corporation determines that such organization is not in compliance with the requirements of subsection (b) of this section, in which event the Corporation shall—

"(A) suspend the recognition of such national governing body;

"(B) revoke the recognition of such national governing body; or

"(C) extend the 2-year period for not longer than 1 year, if the national governing body has proven by clear and convincing evidence that, through no fault of its own, it needs additional time to comply with such requirements.

If, at the end of the extension period referred to in subparagraph (C) of this paragraph, the national governing body has not complied with such requirements, the Corporation shall revoke the recognition of such national governing body. Any such national governing body aggrieved by the Corporation's determination under this subsection may submit a demand for arbitration in accordance with section 205(c) of this title.

"(2) Notwithstanding the provisions of paragraph (1), the Corporation may suspend or revoke the recognition of a national governing body during the 2-year period if such suspension or revocation is for the same reason as the Corporation could have revoked or suspended such national governing body prior to the date of the enactment of this title.

"(d) Within 61 days after recognizing an amateur sports organization as a national governing body, in accordance with subsection (a) of this section, the Corporation shall recommend and support in any appropriate manner such national governing body to the appropriate international sports federation as the representative of the United States for that sport.

"SEC. 202. (a) For the sport which it governs, a national governing body is under duty to—

"(1) develop interest and participation throughout the United States and be responsible to the persons and amateur sports organizations it represents;

"(2) minimize, through coordination with other amateur sports organizations, conflicts in the scheduling of all practices and competitions;

"(3) keep amateur athletes informed of policy matters and reasonably reflect the views of such athletes in its policy decisions;

"(4) promptly review every request submitted by an amateur sports organization or person for a sanction (A) to hold an international amateur athletic competition in the United States; or (B) to sponsor United States amateur athletes to compete in international amateur athletic competition held outside the United States, and determine whether to grant such sanction, in accordance with the provisions of subsection (b) of this section;

"(5) allow an amateur athlete to compete in any international amateur athletic competition conducted under its auspices or that of any other amateur sports organization or person, unless it establishes that its denial was based on evidence that the organization or person conducting the competition did not meet the requirements stated in subsection (b) of this section;

"(6) provide equitable support and encouragement for participation by women where separate programs for male and female athletes are conducted on a national basis

"(7) encourage and support amateur athletic sports programs for handicapped individuals and the participation of handicapped individuals in amateur athletic activity;

"(8) provide and coordinate technical information on physical training, equipment design, coaching, and performance analysis; and

"(9) encourage and support research, development, and dissemination of information in the areas of sports medicine and sports safety.

"(b) As a result of its review under subsection (a)(4) of this section, if a national governing body does not determine by clear and convincing evidence that holding or sponsoring an international amateur athletic competition would be detrimental to the best interest of the sport, the national governing body shall promptly grant to an amateur sports organization or person a sanction to—

"(1) hold an international amateur athletic competition in the United States, if such amateur sports organization or person—

"(A) pays to the national governing body any required sanctioning fee, if such fee is reasonable and nondiscriminatory;

"(B) demonstrates that—

"(i) appropriate measures have been taken to protect the amateur status of athletes who will take part in the competition and to protect their eligibility to compete in amateur athletic competition,

"(ii) appropriate provision has been made for validation of records which may be established during the competition,

"(iii) due regard has been given to any international amateur athletic requirements specifically applicable to the competition,

"(iv) the competition will be conducted by qualified officials,

"(v) proper medical supervision will be provided for athletes who will participate in the competition, and

"(vi) proper safety precautions have been taken to protect the personal welfare of the athletes and spectators at the competition, and

"(C) submits to the national governing body an audited or notarized financial report of similar events, if any, conducted by the amateur sports organization or person; or

"(2) sponsor United States amateur athletes to compete in international amateur athletic competition held outside the United States, if such amateur sports organization or person—

"(A) pays to the national governing body any required sanctioning fee, if such fee is reasonable and nondiscriminatory;

"(B) submits a letter from the appropriate entity which will hold the international amateur athletic competition certifying that—

"(i) appropriate measures have been taken to protect the amateur status of athletes who will take part in the competition and to protect their eligibility to compete in amateur athletic competition,

"(ii) appropriate provision has been made for validation of records which may be established during the competition,

"(iii) due regard has been given to any international amateur athletic requirements specifically applicable to the competition,

"(iv) the competition will be conducted by qualified officials,

"(v) proper medical supervision will be provided for athletes who will participate in the competition, and

"(vi) proper safety precautions have been taken to protect the personal welfare of the athletes and spectators at the competition; and

"(C) submits a report of the most recent trip, if any, to a foreign country which the amateur sports organization or person sponsored for the purpose of having United States amateur athletes compete in international amateur athletic competition.

"SEC. 203. For the sport which it governs, a national governing body is authorized to—

"(1) represent the United States in the appropriate international sports federation;

"(2) establish national goals and encourage the attainment of those goals;

"(3) serve as the coordinating body for amateur athletic activity in the United States;

"(4) exercise jurisdiction over international amateur athletic activities and sanction international amateur athletic competition held in the United States and sanction the sponsorship of international amateur athletic competition held in the United States;

"(5) conduct amateur athletic competition, including national championships, and international amateur athletic competition in the United States, and establish procedures for the determination of eligibility standards for participation in such competitions, except for that amateur athletic competition specified in section 206 of this title;

"(6) recommend to the Corporation individuals and teams to represent the United States in the Olympic Games and the Pan-American Games; and

"(7) designate individuals and teams to represent the United States in international amateur athletic competition (other than the Olympic Games and the Pan-American Games) and certify, in accordance with applicable international rules, the amateur eligibility of such individuals and teams.

"SEC. 204. The Corporation may review all matters relating to the continued recognition of a national governing body and may take such action as it considers appropriate, including, but not limited to, placing conditions upon the continued recognition of the national governing body. The district courts of the United States shall have authority to enjoin the commission of any act of a national governing body which is inconsistent with the requirements of sections 201(b) and 202 of this title. The Corporation shall have standing to apply for an injunction, except to the extent that the conferral of such standing is inconsistent with the Constitution of the United States.

"SEC. 205. (a)(1) Any amateur sports organization or person which belongs to or is eligible to belong to a national governing body may seek to compel such national governing body to comply with the requirements of sections 201(b) and 202 of this title by filing a written complaint with the Corporation. Such organization or person may take such action only after having exhausted all available remedies within such national governing body for correcting deficiencies, unless it can be shown by clear and convincing evidence that those remedies would have resulted in unnecessary delay. The Corporation shall establish procedures for the filing and disposition of complaints received under this subsection. A copy of the complaint shall also be served on the applicable national governing body.

"(2) Within 30 days after the filing of the complaint, the Corporation shall determine whether the organization has exhausted its remedies within the applicable national governing body, as provided in paragraph (1) of this subsection. If the Corporation determines that any such remedies have not been exhausted, it may direct that such remedies be pursued before the Corporation will further consider the complaint.

"(3)(A) Within 90 days after the filing of a complaint under paragraph (1) of this subsection, if the Corporation determines that all such remedies have been exhausted, it shall hold a hearing to receive testimony for the purpose of determining if such national governing body is in compliance with the requirements of sections 201(b) and 202 of this title.

"(B) If the Corporation determines, as a result of the hearings conducted pursuant to this subsection, that such national governing body is in compliance with the requirements of sections 201(b) and 202 of this title, it shall so notify the complainant and such national governing body.

"(C) If the Corporation determines, as a result of hearings conducted pursuant to this subsection, that such national governing body is not in compliance with the requirements of sections 201(b) and 202 of this title, it shall—

"(i) place such national governing body on probation for a specified period of time, not to exceed 180 days, which it considers necessary to enable such national governing body to comply with such requirements, or

"(ii) revoke the recognition of such national governing body.

"(D) If the Corporation places a national governing body on probation pursuant to this paragraph, it may extend the probationary period if the national governing body has proven by dear and convincing evidence that, through no fault of its own, it needs additional time to comply with such requirements. If, at the end of the period allowed by the Corporation, the national governing body has not complied with such requirements, the Corporation shall revoke the recognition of such national governing body.

"(b)(1) Any amateur sports organization may seek to replace an incumbent as the national governing body for a particular sport by filing with the Corporation a written application for such recognition. Such application shall be filed (A) within the 1-year period after the final day of any Olympic Games, in the case of a sport for which competition is held in the Olympic Games or in both the Olympic and Pan-American Games; or (B) within the 1-year period after the final day of any Pan-American Games, in the case of a sport for which competition is held in the Pan-American Games and not in the Olympic Games. If two or more organizations file applications for the same sport, such applications shall be considered in a single proceeding.

"(2) Any application filed under this subsection shall be filed with the Corporation by registered mail. The Corporation shall establish procedures for the filing and disposition of applications received under this subsection. A copy of any such application for recognition shall also be served on the applicable national governing body. The Corporation shall inform the applicant for recognition that its application has been received.

"(3) Within 180 days after receipt of an application filed under this subsection, the Corporation shall conduct a formal hearing to determine the merits of the application. The Corporation shall publish notice of the time and place of such hearing in a regular issue of its principal publication at least 30 days, but not more than 60 days, prior to the date of the hearing. In the course of such hearing, the applicant and the national governing body shall be given a reasonable opportunity to present evidence supporting their respective positions. During such hearing, the applicant amateur sports organization must establish by a preponderance of the evidence that it meets the criteria for recognition as a national governing body under section 201(b) of this title, and that—

"(A) the national governing body does not meet the criteria of section 201(b) or 202; or

"(B) it more adequately meets the criteria of section 201(b), is capable of more adequately meeting the criteria of section 202, and provides or is capable of providing a more effective national program of competition, than the national governing body in the sport for which it seeks recognition.

"(4) Within 30 days of the close of the hearing required under this subsection, the Corporation shall—

"(A) uphold the right of the national governing body to continue as the national governing body for its sport;

"(B) revoke the recognition of the national governing body and declare a vacancy in the national governing body for that sport;

"(C) revoke the recognition of the national governing body and recognize the applicant as the national governing body; or

"(D) decide to place the national governing body on probation of not to exceed 180 days, pending the compliance of the national governing body, if such national governing body would have retained recognition except for a minor deficiency in one of the requirements of section 201(b) or 202 of this title.

If the national governing body does not comply within the prescribed time period, the Corporation shall revoke the recognition of the national governing body and either recognize the applicant as the national governing body, or declare a vacancy in the national governing body for that sport.

"(5) Within 61 days after recognizing an amateur sports organization as a national governing body, in accordance with this subsection, the Corporation shall recommend and support in any appropriate manner such

national governing body to the appropriate international sports federation as the representative of the United States for that sport.

"(c)(1) The right to review by any party aggrieved by a determination of the Corporation under the requirements of this section or section 201(c) shall be to any regional office of the American Arbitration Association. Such demand for arbitration shall be submitted within 30 days of the determination of the Corporation. Upon receipt of such a demand for arbitration, the Association shall serve notice on the parties to the arbitration and on the Corporation, and shall immediately proceed with arbitration according to the commercial rules of the Association in effect at the time of the filing of the demand, except that—

"(A) the arbitration panel shall consist of not less than three arbitrators, unless the parties to the proceeding mutually agree to a lesser number;

"(B) the arbitration hearing shall take place at a site selected by the Association, unless the parties to the proceeding mutually agree to the use of another site; and

"(C) the arbitration hearing shall be open to the public.

"(2) The arbitrators in any arbitration are empowered to settle any dispute arising under the provisions of this Act prior to making a final award, if mutually agreed to by the parties to the proceeding and achieved in a manner not inconsistent with the constitution and bylaws of the Corporation.

"(3) Each contesting party may be represented by counsel or by any other duly authorized representative at the arbitration proceeding. The parties may offer any evidence which they desire and shall produce any additional evidence as the arbitrators believe necessary to an understanding and determination of the dispute. The arbitrators shall be the sole judges of the relevancy and materiality of the evidence offered. Conformity to legal rules of evidence shall not be necessary.

"(4) The arbitrators shall have the authority to issue subpenas to compel the attendance and testimony of witnesses and the production of documents, if the arbitrators reasonably believe them to be necessary or advisable for a better understanding of the dispute. In case of contumacy or refusal to obey such a subpena, the district courts, upon petition of the arbitrators, shall have jurisdiction to issue to such person an order requiring compliance with such subpena. Failure to obey such an order is punishable by such court as a contempt of court.

"(5) All decisions by the arbitrators shall be by majority vote unless the concurrence of all is expressly required by the contesting parties.

"(6) Final decision of the arbitrators shall be binding upon the involved parties, if such award is not inconsistent with the constitution and bylaws of the Corporation.

"(7) The hearings may be reopened, by the arbitrators upon their own motion or upon the motion of any contesting party, at any time before a final decision is made, except that, if any contesting party makes such a motion, all parties to the decision must agree to reopen the hearings if such reopening would result in the arbitrators' decision being delayed beyond the specific period agreed upon at the beginning of the arbitration proceedings.

"(8) The district courts of the United States shall have jurisdiction to enforce decisions of the arbitrators. Such action may be brought by any party to the final decision.

"SEC. 206. Any amateur sports organization which conducts amateur athletic competition, participate in which is restricted to a specific class of amateur athletes (such as high school students, college students, members of the Armed Forces, or similar groups or categories), shall have jurisdiction over such competition. If such an amateur sports organization wishes to conduct international amateur athletic competition to be held in the United States, or sponsor international amateur athletic competition to be held outside the United States, it shall obtain a sanction from the appropriate national governing body.".

FINANCIAL ASSISTANCE

SEC. 211. (a) The Secretary of Commerce (hereinafter in this section referred to as the "Secretary") is authorized to award grants to the Corporation to assist in the development of amateur athletics in the United States. The Corporation may apply to the Secretary for funds available under this section, and shall use such funds consistent with the provisions of the Act. The Secretary shall approve any application which meets the requirements of this section, and award grants to the Corporation, in a total sum not exceeding (1) $18,000,000 to finance the development and operation of any programs approved by the Corporation and consistent with the provisions of this Act; and

(2) $12,000,000 to finance feasibility studies to assist in determining appropriate locations for training centers, to finance the administration and operation of such centers, and to finance an information retrieval service for the analysis and dissemination of sports medicine information.

As used in this section, the term "training centers" means sites selected by the Corporation for use in furthering amateur sports development, research, and education across a broad range of sports, including the collection, analysis, and dissemination of technical sports information.

(b) Each application for funds available under this section shall be in such form as the Secretary provides and shall contain provisions to assure that such funds are disbursed in accordance with the provisions of this section. For the purpose of review or audit, the Secretary shall have access to any books, documents, papers, and records which are relevant to any grant received under this section.

(c) Consistent with the purposes of the Act, the use of the funds available under this section shall be at the full discretion of the Corporation, except that not more than 20 percent of such funds may be provided to organizations which are not members of the Corporation.

(d) There are authorized to be appropriated to the Secretary not to exceed $30,000,000 in fiscal year 1979, such sums to remain available until expended.

(c) The Secretary shall conduct a feasibility study to determine the cost of, need for, and most appropriate means of providing continuing funding to the Corporation for the construction and operation of training centers and sports medicine research facilities. The Secretary shall submit to the Congress the results of the study, together with his recommendations, within 6 months after the date of enactment of this Act.

TRANSFER OF PROPERTY

SEC. 212. Notwithstanding the provisions of the Federal Property and Administrative Services Act of 1949, as amended, the Administrator of General Services is authorized to transfer excess real property to the United States Olympic Committee without compensation. The Committee may accept and shall administer such property in the furtherance of amateur athletic activities. If any such property ceases to be utilized by the United States Olympic Committee for the conduct of such activities, it shall be returned to the United States, to be utilized or disposed of as the Administrator of General Services shall determine.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

Mr. DANIELSON. Mr. Chairman, I ask unanimous consent that the committee amendments be considered en bloc, except for the committee amendment striking lines 8 through 21, on page 19, and adding a new section 113 to the charter in lieu thereof.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The Clerk will report the committee amendments en bloc.

The Clerk read the committee amendments as follows:

Committee amendments: Page 2, lines 1 through 24; page 3, lines 1 through 24;

Page 4, lines 1 through 24; page 5, lines 1 through 14:

Strike all of title I of the bill on pages 2, 3, and 4; and the language of title II of the bill through page 5, line 14, and insert:

OLYMPIC COMMITTEE REORGANIZATION

SECTION 1. (a) The Act entitled "An Act to incorporate the United States Olympic Association", approved September 21, 1950 (36 U.S.C. 371 et seq.), hereinafter in this Act referred to as "the Act", is amended in the first section—

(1) by striking out "That the following persons, to wit:" and inserting in lieu thereof the following:

TITLE I—CORPORATION

"SEC. 101. The following persons, to wit:";

(2) in the first sentence by striking out "corporation" before the period and inserting in lieu thereof "Corporation"; and

(3) by amending the last sentence thereof to read as follows: "The Corporation shall maintain its principal offices and national headquarters in such place in the United States as is determined by the Corporation, and may hold its annual and special meetings in such places as the Corporation shall determine."

(b) The Act is further amended by striking out sections 2 through 12 and inserting in lieu thereof the following:

"SEC. 102. A majority of the persons named in section 101 of this Act, or their successors, are hereby authorized to meet to complete the organization of the Corporation by the adoption of a constitution and bylaws, the election of officers, and by doing all things necessary to carry into the effect the provisions of this Act."

Page 5, line 22: Strike "are permitted to".

Page 6, line 15: Strike "body.'." and insert "body."

Page 6, lines 16 through 18: Strike the language contained in lines 16 through 18 of page 6 of the bill.

Page 6, line 24: Strike "in order" and insert "directly relating to international amateur athletic competition, so as".

Page 8, line 20: Strike "individuals.'." and insert

individuals; and

(14) encourage and provide assistance to amateur athletes of racial and ethnic minorities for the purpose of eliciting the participation of such minorities in amateur ath-

letic activities in which they are underrepresented.

Page 8: Strike lines 21, 22 and 23 of the bill.

Page 9, line 2: Strike "States;" and insert: "States directly relating to international amateur athletic competition;"

Page 9, line 19: Strike "involving" and insert "which involve any of its members and".

Page 9, line 21: Strike "organization;" and insert:

organization and which arise in connection with their eligibility for and participation in the Olympic Games, the Pan-American, world championship competition, or other protected competition as defined in the constitution and by-laws of the Corporation;

Page 10, line 23: After "States" insert "or of any State".

Page 10, line 25, Page 11, line 1: Strike "and in the Federal Register".

Page 11, line 6: Strike "sub-".

Page 11, line 11: Strike "30" and insert "60".

Page 11, lines 12 and 13: Strike "in the Federal Register."."

Page 11, lines 14 through 20: Strike the language in lines 14 through 20 of page 11 and insert:

SEC. 106. (a) Eligibility for membership in the Corporation shall be determined in accordance with the constitution and bylaws of the Corporation.

Page 11, line 24: Strike "of:" and insert "of-".

Page 12, line 18: Strike "Corporation."." and insert

Corporation.

SEC. 107. The Corporation shall be nonpolitical and, as an organization, shall not promote the candidacy of any person seeking public office.

SEC. 108. The Corporation shall have no power to issue capital stock or to engage in business for pecuniary profit or gain.

SEC. 109. The Corporation may acquire any or all of the assets of the existing unincorporated association, known as "The United States Olympic Association", upon discharging or satisfactorily providing for the payment and discharge of all the liabilities of such unincorporated association.

Page 12, lines 19 through 25; page 13, lines 1 through 25; and page 14, lines 1 and 2: Strike the language in lines 19 through 25 of page 12, lines 1 through 25 of page 13 and lines 1 and 2 of page 14, and insert:

SEC. 110. (a) Without the consent of the Corporation, any person who uses for the purpose of trade, to induce the sale of any goods or services, or to promote any theatrical exhibition, athletic performance, or competition—

(1) the symbol of the International Olympic Committee, consisting of five interlocking rings;

(2) the emblem of the Corporation, consisting of an escutcheon having a blue chief and vertically extending red and white bars on the base with five interlocking rings displayed on the chief;

(3) any trademark, trade name, sign, symbol, or insignia falsely representing association with, or authorization by, the International Olympic Committee or the Corporation; or

(4) the words "Olympic", Olympiad", "Citius Altius Fortius", or any combination or simulation thereof tending to cause confusion, to cause mistake, to deceive, or to falsely suggest a connection with the Corporation or any Olympic activity;

Page 14, line 3: Strike "liable" and insert "subject to suit".

Page 14, line 4: Strike "subsection (c) of this section." and insert: "the Act of July 5, 1946 (60 Stat. 427; popularly known as the Trademark Act of 1946)."

Page 14, lines 5 through 24, and page 15, lines 1 through 7: Strike the language after "used" in line 5 of page 14 through "ney's fees." in line 7 of page 15, and insert:

the emblem in subsection (a)(2), or the words, or any combination thereof, in subsection (a)(4) for any lawful purpose prior to September 21, 1950, shall not be prohibited by this section from continuing such lawful use for the same purpose and for the same goods or services. In addition, any person who actually used, or whose assignor actually used, any other trademark, trade name, sign, symbol, or insignia described in subsections (a)(3) and (4) for any lawful purpose prior to enactment of this Act shall not be prohibited by this section from continuing such lawful use for the same purpose and for the same goods or services.

Page 15, line 8: Strike "(d)" and insert "(b)".

Page 15, line 10: Strike "Olympic"

Page 15, line 16: Strike "members.'." and insert:

members.

(c) Corporation shall have exclusive right to use the name "United States Olympic Committee"; the symbol described in subsection (a)(1); the emblem described in subsection (a)(2); and the words "Olympic", "Olympiad", "Citius Altius Fortius" or any combination thereof subject to the preexisting rights described in subsection (a).

Page 15, following line 16, insert:

SEC. 111. As a condition precedent to the exercise of any power or privilege granted or conferred under this Act, the Corporation shall file in the office of the secretary of state, or similar office, in each State the name and post-office address of an authorized agent of the Corporation in such State upon whom local process or demands against the Corporation may be served.

SEC. 112. The right to alter, amend, or repeal this Act at any time is hereby expressly reserved.

Page 16, lines 7 through 10: Strike the language in lines 7 through 10 of page 16.

Page 10, line 13: After "involving" insert "any of its members and relating to".

Page 16, lines 17 and 18: Strike the language in lines 17 and 18 and insert: "or other such protected competition as defined in such constitution and bylaws."

Page 16, line 20: Strike "210." and insert "2.", and after "by" insert "section 1".

Page 18, line 13: Strike "by" and insert "conducted in accordance with the commercial rules of".

Page 20, line 11: After "reasonable" insert "direct".

Page 35: lines 22 through 25, page 36, lines 1 through 6: Strike the language in lines 22 on page 35 through line 6 on page 36.

Page 36, line 7: Strike "(5)" and insert "(4)".

Page 36, line 10: Strike "(6)" and insert "(5)".

Page 36, line 13: Strike "(7)" and insert "(6)".

Page 36, lines 21, 22, 23: Strike the language in lines 21, 22, and 23 of page 36.

Page 37, line 3: After "have" insert "exclusive".

Page 37, line 11: Strike "Commerce" and insert "the Treasury".

Page 37, lines 20 through 25, page 38, lines 1 through 9: Strike "exceeding—" in line 20, and the language in lines 21 of page 37 through line 9 of page 38, and insert:

exceeding $30,000,000 to finance the development and operation of any programs approved by the Corporation consistent with section 104 of the Act as amended by this Act.

Page 38, lines 17 through 25, page 39, lines 1 through 7: Strike the language of subsections (c), (d), and (e) of the bill in lines 17 of page 38 through line 7 of page 39, and insert:

(c) There are authorized to be appropriated to the Secretary not to exceed $30,000,000 in fiscal year 1980, such sums to remain available until expended.

Page 39, lines 8 through 19: Strike all of the language contained in lines 8 through 19 of page 39.

Mr. DANIELSON (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DANIELSON. Mr. Chairman, with respect to the amendments which I have mentioned, they were discussed in quite some detail in general debate. These are largely amendments to the charter of the U.S. Olympic Commission. There is no dispute on them that I am aware of, and I urge the adoption of these amendments.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Chairman, I appreciate my colleague yielding. Actually, the amendments which we are called on to adopt conform the bill to precisely that bill which was voted on on September 26, the week before last, by the House, by a vote of 244 to 158. That is to say, that was the vote previously on the amendments which the gentleman has just offered as the committee amendments.

Mr. DANIELSON. The gentleman's comment, I believe, is correct. I do not remember the vote, but we did have this bill up before under suspension and there was a majority of the vote in favor of passage of the bill, but not a two-thirds majority. I do not remember the vote, but otherwise the statement is correct in all respects.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I thank the gentleman for yielding. As the gentleman knows, the basic controversy in this bill is the authorization for $30 million. The other day the gentleman from Ohio (Mr. KINDNESS) proposed that

there be a new ordering of the way in which this fund is to be distributed in the U.S. Olympic Committee, and that did not prevail.

I wonder if the chairman of the subcommittee from the Committee on the Judiciary, the manager of this bill, would explain precisely what these $30 million will be used for when under the bill they will be transferred directly and openly to the U.S. Olympic Committee, a private group.

Mr. DANIELSON. I thank the gentleman for raising this question. I respectfully request that he defer until we get to the financial section. The only portion pending before the committee at the moment is other parts of the bill that have nothing to do with the financial aspects of the bill.

The gentleman will recall that in my request I asked that we consider the amendments en bloc except for certain amendments that we are not yet talking about, the financial amendments.

Mr. DRINAN. If the gentleman will yield further, will there be opportunity in the deliberations for a motion to strike the $30 million?

Mr. DANIELSON. There not only will be such an opportunity, but I understand such an opportunity will be taken.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

The CHAIRMAN. The Clerk will read the remaining committee amendment.

The Clerk read as follows:

Committee amendment: Page 15, lines 17 through 24, and page 16, lines 1 through 6: Strike the language of lines 17 through 24 of page 15, and lines 1 through 6 of page 16 and insert:

SEC. 113. The Corporation shall, on or before the first day of June in each year, transmit simultaneously to the President and each House of Congress a detailed report of its operations for the preceding calendar year, including a full and complete statement of its receipts and expenditures and a comprehensive description of the activities and accomplishments of the Corporation during the preceding year. Copies of the report shall be made available by the Corporation to interested persons at a reasonable cost.

AMENDMENT OFFERED BY MR. MICHEL TO THE COMMITTEE AMENDMENT

Mr. MICHEL. Mr. Charman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. MICHEL to the committee amendment: In the language proposed to be inserted by the committee amendment insert "(a)" immediately following "Sec. 113." and immediately following the words "reasonable cost." add the following new subsection:

"(b) The Corporation shall, on or before the first day of June in each year, transmit simultaneously to the Speaker of the House of Representatives and to the President of the Senate a detailed report of those grants authorized to the Corporation pursuant to the provisions of section 211 of the Act and a full and complete statement of the expenditures of such funds made available. The report shall be referred to the Committee on Appropriations of each House and shall include a detailed and comprehensive description of those programs which the Corporation anticipates it will finance during the next fiscal year out of such funds made available pursuant to the provisions of section 211 of the Act. The Corporation shall continue to transmit the report required under this subsection (b) until the total sums made available under secion 211 of the Act have been expended."

Mr. MICHEL. Mr. Chairman, I offer this amendment to the committee amendment for two reasons:

First, it will give assurance to those who have raised concerns—and, I think, legitimate concerns—about the possibility of tax dollars being unwisely spent. Under my amendment, the Congress will receive a "detailed report" of all grants made to the Corporation pursuant to the provisions of section 211 of the act and a full and complete statement of the expenditure of such funds will be made available. Furthermore, we will learn not only how the Corporation has spent the funds—but also how they plan to spend the funds during the next fiscal year. In short, it is a "watch-dog" amendment. The Committee on Appropriations of each House will receive a copy of this report and Members can be assured these committees will make certain that the provisions of the act are adhered to.

The second reason I offer this amendment is to demonstrate the willingness on the part of those of us who support this bill to do all we can to make it work. Perhaps this is, after all, as important as the watch-dog function itself. All too often we see bills introduced, debated, voted on, passed, and then allowed to live a life of their own, almost totally free of congressional oversight.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I commend the gentleman from Illinois for offering this amendment.

I would urge adoption of the amendment offered by the gentleman from Illinois (Mr. MICHEL). I think it adds responsibility to a piece of legislation that needs an added measure of responsibility, and I think it is the only responsible action for us to take at this point.

I urge its adoption.

Mr. DANIELSON. Mr. Chairman, I have no objection to the amendment. I think it assists in improving an otherwise very bad part of the bill and I urge its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. MICHEL) to the committee amendment.

The amendment to the committee amendment was agreed to.

The CHAIRMAN. The question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: On page 41, strike line 10 and all that follows through line 23.

On page 42, strike line 12 and all that follows through line 21.

Mr. VOLKMER. Mr. Chairman, this amendment strikes the provision for the financial assistance, the total amount of $30 million. It will leave nothing in the bill for the funding for the Olympic amateur athletics.

I know that many of you personally feel that we really should provide the funding they are requesting, and I believe there are also recommendations for additional funds, and even though I know many Members are strong supporters of not only professional but amateur athletics in this country, you run into, at least I do, the conflicting principle, the question of whether this Congress should go into funding a private organization with taxpayers funds, such as this, and for this purpose, and what it will lead to.

I am not going to take a lot of time because we discussed this subject when we were under suspension of the rules. But I know that the taxpayers, at least my taxpayers, or many of them, are quite concerned with how their taxpayers' money is being used. I question, and I think you can ask yourselves the question, if you would actually ask your taxpayers if they were willing to pay that little extra money, whatever it may be, for this purpose, I question whether they would say yes at this time.

I also question the principle of the Congress beginning to get more and more involved in our amateur athletics.

You know, with some people—and I have seen the bumper stickers back home, and some people have talked to me about the Post Office and how it is run, and then when you talk about the national health care, and then they say, look what they are doing to the postal service, and I am wondering what Congress will eventually do to the Olympics and amateur athletics, if we start down this road.

I also wonder what will happen to the private funding which the Olympic Committee has lived on and done well with in the past? I wonder what will happen when it becomes known that Congress gives $30 million this year and why can they not give $50 million next year, and I wonder whether the same people who contributed before will continue to contribute as they have in support of the Olympic Committee, or will they say, oh, well, let the Congress do it from now on. Or, if we go to the full funding, eventually, then I wonder what they are going to say.

Should we also not have a lot to say about amateur athletics in this country?

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman for yielding.

I rise in strong support of the gentleman's amendment. He and I serve on the same committee; and of course, that bill came through our committee. I think the gentleman has hit the nail right on the head, and that is that this is $30 million this year, and it is going to be $50 million or $75 million. There are going to be magnificent sums of money in the future.

Mr. Chairman, I think the gentleman and I and probably every Member of the House, in watching the Olympians on television, vicariously live out every one of their deeds and have the gooseflesh that comes when the Star Spangled Banner is played at the end of the victorious performance. However, that does not mean, that type of national feeling on our part, that we have to be patsies to this, in a sense, robbing of the national treasury. That is what it simply amounts to.

Mr. Chairman, I understand the feelings of the House. I very seldom take the well to speak on any kind of issue. I would say that this is a very important matter; and if constituents of those Members who are yelling "Vote" were to be confronted with a $30 million tax bill, I would suspect that those Members would not be screaming for a vote.

Mr. Chairman, let me just suggest that the gentleman from Missouri (Mr. VOLKMER) can improve the bill by his amendment. We will have a bill which will solve some of the jurisdictional problems, but get away from the basic difficulty of adding all this Federal taxpayer money to this bill.

Mr. Chairman, I commend the gentleman from Missouri.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I, too, commend the gentleman.

I would want to shorten this matter. I am not going to delay it. It is midnight, and we want to have a vote on this question.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has expired.

Mr. VOLKMER. Mr. Chairman, I ask unanimous consent to be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. LLOYD of California. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

PARLIAMENTARY INQUIRY

Mr. ASHBROOK. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. ASHBROOK. Mr. Chairman, under the rules of the House, I understand that a Member must stand in order to object.

The CHAIRMAN. The Chair will state that the gentleman from California (Mr. LLOYD) did stand at the time.

Mr. ASHBROOK. Fine. I thank the Chair.

Mr. WRIGHT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I had not expected to enter this debate, but I have in my hand a copy of a speech which was prepared for delivery on October 6, 1 week ago today, by our colleague, the late Ralph Metcalfe.

With your permission, Mr. Chairman, I simply want to read a few pages from the speech which probably was the last public statement prepared for delivery by our late colleague.

In the course of that speech, Mr. Metcalfe said the following:

> This Commission came into being because it was obvious to anyone even remotely acquainted with amateur sports that incessant, petty disputes among sports bodies were severely hampering our athletes performances in the Olympics and other international competition. Our declining performances in international competition does not reflect well for the image this country has abroad. Our prestige in the Olympic arena is waning, while the prestige of countries which subsidize their athletes is beginning to surpass ours.
>
> Concern has been expressed about the one-time only $30 million authorization contained in this bill. This one-time only $30 million authorization is inseparable from the purposes of this bill. Without this money, the bill is rendered meaningless. Without this modest amount, the delicately achieved compromises worked out among rival sports bodies will unravel and be lost.
>
> $18 million of this money would be used for comprehensive reorganization and reform of the U.S. Olympic Committee. $12 million of this money will be used to implement a sports medicine information system and to help finance the operation and maintenance of training centers.
>
> Frankly, these monies will by no means be sufficient for the U.S. Olympic Committee to carry out its expanded mandate. However, at least the monies will give the U.S. Olympic Committee a start. I, therefore, urge my colleagues to oppose any amendments to delete or reduce this critical one-time funding.
>
> My distinguished colleagues: This is a landmark bill for the development and improvement of amateur sports in our country. For the first time in over fifty years, we are presented with the opportunity to end the bitter jurisdictional disputes among rival sports organizations. These disputes have hurt the innocent party, the amateur athlete, and have resulted in declining performances by our athletes in olympic and other international amateur competition.

As I say, I had not intended to get in the debate, but I simply felt, out of respect and honor for our colleague, that I should report to the Members what he had prepared to say in this immediate connection and what he would have said had he been with us this evening.

Mr. KEMP. Mr. Chairman, would the majority leader yield?

Mr. WRIGHT. Of course, I yield to my friend, the gentleman from New York.

Mr. KEMP. I appreciate the gentleman's yielding. I also appreciate his reading the remarks of our colleague, Ralph Metcalfe.

I had the privilege of serving on the President's Commission on U.S. Olympic Sports with the gentleman from Illinois, Mr. Metcalfe, and our colleagues, the gentleman from Illinois (Mr. MICHEL) and the gentleman from California (Mr. MINETA). The gentleman from Illinois, Mr. Metcalfe, served on that Commission with a great deal of distinction and a great deal of effort, and he took quite seriously, as well as painfully, this dispute that has gone on for so long between the AAU and the NCAA.

I assume that my colleagues remember that General MacArthur in the 1950's tried to mediate the dispute between the AAU and the NCAA, and it failed. Also Attorney General Robert Kennedy in the mid-1960's tried to mediate it, and that failed. Then Labor Negotiator Ted Kheel referred the dispute in the late 1960's, and that failed.

As the gentleman pointed out, and as our colleague, the gentleman from Illinois, Mr. Metcalfe, worked so long to accomplish, this is the chance to bring these two governing bodies under the jurisdiction of a national governing body. That is the U.S. Olympic Committee, and I think it is, as the gentleman has pointed out, a one-shot opportunity to bring about a climate in our country where we might not only have better competition in terms of international competition, but we might provide, as the gentleman points out not only in his letter but from the well, more opportunity for minorities, for women, for handicapped sports competition.

I strongly support the gentleman's taking the well and bringing to the attention of our colleagues the very profound statement of our friend and colleague, the late Honorable Ralph Metcalfe. I thank the gentleman from Texas (Mr. WRIGHT) for bringing it up.

Mr. WRIGHT. I thank the gentleman for his comments.

Mr. KINDNESS. I move to strike the requisite number of words.

Mr. Chairman, I have before me the budget summary submitted by the U.S. Olympic Committee to the subcommittee of the Committee on the Judiciary showing how they would intend to spend the $30 million. We have now heard enough of general expressions of how wonderful the purposes are for which this money is going to be spent. Let us be a little more specific as to what is really intended and see if the Members agree with what is intended by the U.S. Olympic Committee with respect to the use of this money. The $750,000 out of $18 million is to be spent for a management improvement program over a 4-year period, the initial survey to cost $300,000, the follow-up in the second year to cost $150,000, the follow-up and evaluation in the third year, $150,000 more, and the evaluation in the fourth year, $150,000.

Administration—note this: computer systems. Hardware in the first year, $1 million; software in the first year, $300,000, in the second year, $200,000, for a total of a half million dollars. Paid staff: a total of $6.6 million over the 4-year period—$1.2 million the first year, and $1.8 million each of the other three years.

U.S. Olympic Committee support services, $600,000 in the first year, and $200,000 in each of the three succeeding years.

Now for development—about which we have heard so much: for the athletes, $367,000 in the first year, and maintenance of approximately evening out to about $750,000 a year in the three following years; the same approximately for coaches and the same approximately for officials.

There is $18 million we are talking about. The other $12 million was aimed, according to their budget, at sports medicine and general equipment requirements and fixed operating expenses.

That in the version of the bill passed by the other House is turned around to be used for feasibility studies to determine how many training centers there are going to be and where they are going to be.

I submit to you, we do not know what the money is really going to be used for if the bill is left in its present form.

I would submit that the amendment of the gentleman from Missouri has a certain amount of merit to it. I do not really expect that the House is going to adopt that approach. I will be offering a perfecting amendment which would strike this financial assistance section and substitute completely language that would direct the money toward the national training centers. As to their development and their expenses for salaries and administrative costs, it would be directed more closely to the athletes, the coaches, the trainers and health personnel in the operation and maintenance of those training centers where we are going to get closer to helping the athletes themselves. If there is any place we belong with the taxpayers' money, that is it.

So I would urge, there is another choice to be made. You can support the amendment of the gentleman from Missouri (Mr. VOLKMER) or this other approach, but either way we have got to do something better than currently we are doing.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I appreciate the gentleman's remarks, if he does want to develop at least national training centers to provide more competition and more opportunity for people to take part in those Olympic sports; but I want to remind the gentleman that there are 35 separate Olympic and Pan American sports games. Each one would be autonomous under this national U.S. Olympic Committee. Much of the money is going to set up 35 separate autonomous sports committees that would help govern themselves under the umbrella organization, as the gentleman from Illinois (Mr. MICHEL) pointed out in his remarks just a couple weeks ago; so when the gentleman talks about staff, this staff is not going to burgeon into the bureaucracy of the U.S. Olympic Committee. It is going to develop the opportunity to grow into Olympic sports, 35 of those Pan American sports; so it will provide what the gentleman wants to accomplish by governing those sports and elevating those sports to international competition.

Mr. KINDNESS. Mr. Chairman, I think there is a difference as to how close we really are to helping our potential enemies.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment of the gentleman from Missouri.

Mr. Chairman, I know the hour is late. I am just as tired as anybody here.

You know, this is really a comical situation. Some of the same people who have been saying, "Let's get the Federal bureaucracy off our backs. Let us not spend money on any new programs. Let us not invade areas which are in the private sector," are now advocating not only spending $30 million on amateur athletics, which is something that the Federal Government has never traditionally spent money on, but they are trying to restructure this corporation, the U.S. Olympic Committee, so it will become the tzar of all amateur athletic activities in the United States.

If you do not believe me, turn to page 10 of the bill.

It says:

The Corporation—

That is the U.S. Olympic Committee—

shall have perpetual succession and power to—

"(1) serve as the coordinating body for amateur athletic activity in the United States directly relating to international amateur athletic competition;

Well, that sounds innocent enough. It is just relating to international amateur competition.

Then go on to paragraph (5):

"(5) to facilitate, through orderly and effective administrative procedures, the resolution of conflicts or disputes which involve any of its members and any amateur athlete, coach, trainer, manager, administrator, official, national governing body, or amateur sports organization * * *

Then we go over to the section that deals with the so-called autonomous body, starting on page 20. This is all the governing bodies of all these different sports associations.

And it says:

No amateur sports organization is eligible to be recognized or is eligible to continue to be recognized as a national governing body unless it—

And then there is a long series, page after page, of all the conditions that it is going to have to meet to be recognized. If it is not recognized, then it is not going to get any of this $30 million we are so generously contributing out of the taxpayers' pockets.

Let me suggest that I certainly agree with the gentleman from Ohio (Mr. KINDNESS) that maybe as an afterthought it would be good to specify what this money ought to go for, but let us be honest. It is only an afterthought. Nobody started to do anything about this until the bill lost when it was up on suspension.

I suggest to the Members that if we really mean it, we should be serious about cutting spending so we can have the kind of tax cuts the gentleman from Buffalo, N.Y., wants.

Mr. MICHEL. Mr. Chairman, will the gentleman yield for a correction?

Mr. SEIBERLING. Yes, I yield to the gentleman from Illinois.

Mr. MICHEL. Mr. Chairman, that budget came down from the Olympic Committee before that. It did not come down after the bill was defeated; it was here before.

Mr. SEIBERLING. Mr. Chairman, the gentleman is absolutely right, but that is not the budget the gentleman from Ohio (Mr. KINDNESS) intends to offer. The budget that the Olympic Committee has offered now has $18 million in it to implement reorganization of the national governing bodies as autonomous and effective entities. How autonomous are they going to be when the price of getting any of this $30 million kitty is that they have to meet all the conditions specified in this nice bureaucratic boondoggle?

Mr. MCKINNEY. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Connecticut.

Mr. MCKINNEY. Mr. Chairman, does the gentleman have any idea how autonomous they are now? Does the gentleman have any idea of what one has to have to be accepted in amateur sports?

Mr. SEIBERLING. All I am looking at is the bill.

Mr. MCKINNEY. Does the gentleman know?

Mr. SEIBERLING. That has nothing to do with how autonomous they are now. This is what we are dealing with now.

Mr. MCKINNEY. Is the gentleman claiming that if they are autonomous now, they are a controlled monopoly?

Mr. SEIBERLING. I am claiming that the U.S. Olympic Committee is not the czar of amateur athletics in the United States.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I thank my colleague for his statement. I agree with him. I think it is a little strange for them to come in and expect the sentinels on the door of the Treasury Department will open it up for $30 million whenever professional sports or something of that type comes along.

I think this is a particularly interesting thing, because we keep hearing that if the $30 million is not there, the entire agreement falls apart. We can only ask ourselves what kind of an agreement they have if it takes the cement of $30 million to put it together.

Mr. SEIBERLING. Mr. Chairman, I thank the gentleman.

I merely ask all the Members, are they going to go back home and say to their voters in 3 weeks that we voted $30 million for something that is useless and unnecessary to the people of the United States, as this bureaucratic monstrosity is?

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(On request of Mr. VENTO, and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, one of the strengths we have had in amateur athletics has come really from the grassroots of the country and not from the top down. That is what the bill proposes to do. I do not

think anyone would deny that it is in some respects a monopoly.

There are some organizations that do organize along various lines of activities in this country today, but the essence of those organizations is excellence and it is quality. It is not on the basis of whether or not they fill the requirements set out in this bill. It is not based on the requirement, for instance, on page 40 of the bill that "Any amateur sports organization which conducts amateur athletic competition, participation in which is restricted to a specific class of amateur athletes . . . shall have exclusive jurisdiction over such competition."

It is based on competition. One can go out and start his own organization if he does not like what is going on. To some extent it is a monopoly, but we do not have this in the United States Code today, and I do not think we ought to put it there.

Someone implied earlier that there is an agreement between the AAU, the NCAA, and all these other organizations, that they agree about this. Some may agree, but not all of them agree. There is not complete agreement with this.

Mr. Chairman, I think we ought to take the money out of this bill, and, frankly, I think we ought to defeat this bill and come back with something we can agree on.

Mr. Chairman, S. 2727, the Amateur Sports Act of 1978, pursues a laudable goal—the strengthening of our Nation's Olympic program. Many of the concepts embodied in this legislation would greatly contribute to the development of our Nation's amateur athletes and our successes on the international playing fields. I commend my colleagues for the time and efforts that they have spent on this issue and support their continued attention to this important matter. However, in the efforts to build a strong Olympic program, an essential cornerstone has been omitted—the rights of the amateur athlete.

Mr. Chairman, the rights of the amateur athlete are crucial to any comprehensive sports program. American amateur athletics is replete with examples of amateur athletes who unwittingly run afoul with a faceless bureaucracy and as a result find their athletic careers destroyed. We are all aware of the many cases of athletes who are declared ineligible for some alleged violation and who have no recourse to appeal the decision. Such instances are not limited to any one athletic organization and unless we move to insure some protection for the amateur athlete, these examples will increase. As my colleagues are aware, the Interstate and Foreign Commerce Subcommittee on Oversight and Investigations has held oversight hearings on NCAA practices. While I do not wish to single out the examples on NCAA abuses, I do feel that some of the testimony presented during these hearings is representative of the plight of the amateur athlete and underlines the need for an amateur athlete's bill of rights. The subcommittee heard story after story of student athletes who had been accused of some minor violation; had been threatened or misinformed during the investigation; had been denied the right to be represented by counsel; had been denied the right to face and cross-examine his accusers and denied access to their testimony; and who faced a punishment that had been determined by the NCAA and not the institution that conducts the investigation. We would be remiss in not correcting this abuse.

The athlete's rights is further restricted by section 206 of the act. Under this provision, the NCAA, the AAU, the YMCA or any amateur sports organization would have complete control over its members. Any athlete who wished to participate in a different organization's event would in effect be denying the "exclusive jurisdiction" of his member organization and undoubtedly would incur their wrath for his "independence".

Mr. Chairman, the desire to improve our Olympic program is a commendable effort. To do so at the expense of the individual student athlete is wrong and should not occur. Before Congress makes any commitment to our amateur athletes' program, we must insure that the rights of the athlete are protected. For this reason I urge my colleagues to oppose S. 2727.

Mr. SEIBERLING. Mr. Chairman, to show how autonomous they are, under this bill the organizations have to agree to submit to binding arbitration on any topic either external or internal in order to get any support from this organization.

Mr. McKINNEY. Mr. Chairman, I will be very brief. I just want to say that following JACK KEMP, or anyone else, here is a guy who can barely walk across the floor without tripping across a board. I am not an athlete, but I spent a great deal of time trying to help the Olympic ski team and the Olympic riding team. I will tell the Members something. We are sitting here talking about a Nation that is laughed out of the sport's field in this world. Not only do we not give our kids a chance in the Olympics, but we have built bureaucratic monstrosities. Talk to the athletes. I am not one. Do not talk to the organizations. They do not allow independent athletes to participate. These are monopolies that are bigger than any monopoly we have ever discussed in this entire Congress.

Some are not a member of the club. That is a personal remark. Sure, if you go to the right university, you may be acknowledged. But ask the universities, some of the Catholic Jesuit colleges. It could be they are being recognized, but just as likely not. We have kids in this country who can never participate in the Olympics because they are outsiders. These are harsh words. But I want anyone from one of these organizations to come into my office and tell me that we give kids in this country a fair break in the Olympics, for training, and a fair break in organized sports. These organizations are worse than country clubs that we used to argue about giving equal opportunity.

In sports today, if you are in you are in, if you are out—quit—you will never pass the rules of the club.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from New York.

Mr. KEMP. I appreciate the gentleman's yielding.

Mr. Chairman, the gentleman has made an outstanding point and that is that the athletes themselves, the vast majority of them, are in support of this bill. There have been some telegrams to us, a telegram from John Naber, a 1976 Olympic swimmer winner, from Micki King Rogue, a member of the AAU Diving Committee, Kenneth Moore, a member of the AAU Men's Track and Field Committee, Doris Brown Heritage, Athlete Member, AAU Women's Track and Field Committee. They all say the AAU athletes support passage of this bill. They go on to point out that the "AAU officials do not represent views of athletes," as my friend, the gentleman from Connecticut, pointed out. "The fact that these AAU officials convey to Congress their own personal views and not those of athletes underlines the importance of passage of the Amateur Sports Act. A major objection of the bill is to give athletes more representation."

I heartily concur with what the gentleman said, and I appreciate his bringing this to the attention of the Members.

Mr. McKINNEY. Mr. Chairman, I thank the gentleman for his remarks and I urge the body to support full funding.

Ms. HOLTZMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I will try to speak in less than 1 minute, and I simply want to advise the House that my concern about this amendment has nothing to do with the purpose. I think we ought to be supporting amateur athletics, and I think we ought to be supporting it fully and not stint in any respect. But this bill gives $30 million, without any standards, without any requirements. The Secretary of the Treasury is being mandated—not given discretion, but mandated—to fulfill any grant application. There are no standards as to what the money can be spent on. It can be spent wholly on salary, it can be spent wholly on travel, it can be spent on something that will not advance amateur athletics. That is my concern. I do not think we would ever vote $30 million on any bill without any kind of guidelines. I would hope that the Members of the House would recognize that that is the objection we have.

Mr. HEFTEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would hope that if we were going into business tonight with $30 million of our money that we would have a better conception of what we were going to do and how we were going to do it. I do not think at 12:30 this morning we are qualified to spend $30 million of anybody's money for what I have heard so far. I would hope that we would take a noble position and put it to work in another session of this Congress to do it as though it makes sense, and that we will be proud of what we have done.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

The question was taken, and on a division (demanded by Mr. MICHEL) there were—ayes 54; noes 42.

So the amendment was agreed to.

The CHAIRMAN. If there are no further amendments under the rule Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KREBS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the Senate bill (S. 2727) to promote and coordinate amateur athletic activity in the United States, to recognize certain rights for U.S. amateur athletes, to provide for the resolution of disputes involving national governing bodies, and for other purposes, pursuant to House Resolution 1413, he reported the Senate bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks with respect to the Senate bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

CONTRACT DISPUTES ACT OF 1978

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 11002) to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Contract Disputes Act of 1978".

DEFINITIONS

SEC. 2. As used in this Act—

(1) the term "agency head" means the head and any assistant head of an executive agency, and may "upon the designation by" the head of an executive agency include the chief official of any principal division of the agency;

(2) the term "executive agency" means an executive department as defined in section 101 of title 5, United States Code, an independent establishment as defined by section 104 of title 5, United States Code (except that it shall not include the General Accounting Office): a military department as defined by section 102 of title 5, United States Code, and a wholly owned Government corporation as defined by section 846 of title 31, United States Code, the United States Postal Service, and the Postal Rate Commission;

(3) the term "contracting officer" means any person who, by appointment in accordance with applicable regulations, has the authority to enter into and administer contracts and make determinations and findings with respect thereto. The term also includes the authorized representative of the contracting officer, acting within the limits of his authority;

(4) the term "contractor" means a party to a Government contract other than the Government;

(5) the term "administrator" means the Administrator for Federal procurement Policy appointed pursuant to the Office of Federal Procurement Policy Act;

(6) The term "agency board" means an agency board of contract appeals established under section 8 of this Act; and

(7) The term "misrepresentation of fact" means a false statement of substantive fact, or any conduct which leads to a belief of a substantive fact material to proper understanding of the matter in hand, made with intent to deceive or mislead.

APPLICABILITYY OF LAW

SEC. 3. (a) Unless otherwise specifically provided herein, this Act applies to any express or implied contract (including those of nonappropriated fund activties described in sections 1346 and 1491 of title 28, United States Code) entered into by an executive agency for—

(1) the procurement of property, other than real property in being;

(2) the procurement of services;

(3) the procurement of construction, alteration, repair or maintenance of real property; or,

(4) the disposal of personal property.

(b) With respect to contracts of the Tennessee Valley Authority, the provisions of this Act shall apply only to those contracts which contain a disputes clause requiring that a contract dispute be resolved through an agency administrative process. Notwithstanding any other provision of this Act, contracts of the Tennessee Valley Authority for the sale of fertilizer or electric power or related to the conduct or operation of the electric power system shall be excluded from the Act.

(c) This Act does not apply to a contract with a foreign government, or agency thereof, or international organization, or subsidiary body thereof, if the head of the agency determines that the application of the Act to the contract would not be in the public interest.

MARITIME CONTRACTS

SEC. 4. Appeals under paragraph (g) of section 8 and suits under section 10, arising out of maritime contracts, shall be governed by the Act of March 9, 1920, as amended (41 Stat. 525, as amended; 46 U.S.C. 741–752) or the Act of March 3, 1925, as amended (53 Stat. 1112, as amended; 46 U.S.C. 781–790) as applicable, to the extent that those Acts are not inconsistent with this Act.

FRAUDULENT CLAIMS

SEC. 5. If a contractor is unable to support any part of his claim and it is determined that such inability is attributable to misrepresentation of fact or fraud on the part of the contractor, he shall be liable to the Government for an amount equal to such unsupported part of the claim in addition to all costs to the Government attributable to the cost of reviewing said part of his claim. Liability under this subsection shall be determined within 6 years of the commission of such misrepresentation of fact or fraud.

DECISION BY THE CONTRACTING OFFICER

"SEC. 6. (a) All claims by a contractor against the govenment relating to a contract shall be in writing and shall be submitted to the contracting officer for a decision. All claims by the government against a contractor relating to a contract shall be the subject of a decision by the contracting officer. The contracting officer shall issue his decisions in writing, and shall mail or otherwise furnish a copy of the decision to the contractor. The decision shall state the reasons for the decision reached, and shall inform the contractor of his rights as provided in this Act. Specific findings of fact are not required, but, if made, shall not be binding in any subsequent proceeding. The authority of this subsection shall not extend to a claim or dispute for penalties or forfeitures prescribed by statute or regulation which another Federal agency is specifically authorized to administer, settle, or determine. This section shall not authorize any agency head to settle, compromise, pay, or otherwise adjust any claim involving fraud.

(b) The contracting officer's decision on the claim shall be final and conclusive and not subject to review by any forum, tribunal, or Government agency, unless an appeal or suit is timely commenced as authorized by this Act. Nothing in this Act shall prohibit executive agencies from including a clause in government contracts requiring that pending final decision of an appeal, action, or final settlement, a contractor shall proceed diligently with performance of the contract in accordance with the contracting officer's decision.

(c)(1) A contracting officer shall issue a decision on any submitted claim of $50,000 or less within sixty days from his receipt of a written request from the contractor that a decision be rendered within that period. For claims of more than $50,000, the contractor shall certify that the claim is made in good faith, that the supporting data are accurate and complete to the best of his knowledge and belief, and that the amount requested accurately reflects the contract adjustment for which the contractor believes the government is liable.

(2) A contracting officer shall, within sixty days of receipt of a submitted certified claim over $50,000—

(A) issue a decision; or

(B) notify the contractor of the time within which a decision will be issued.

(3) The decision of a contracting officer on submitted claims shall be issued within a reasonable time, in accordance with regulations promulgated by the agency, taking into account such factors as the size and complexity of the claim and the adequacy of the information in support of the claim provided by the contractor.

(4) A contractor may request the agency board of contract appeals to direct a contracting officer to issue a decision in a specified period of time, as determined by the board, in the event of undue delay on the part of the contracting officer.

(5) Any failure by the contracting officer to issue a decision on a contract claim within the period required will be deemed to be a decision by the contracting officer denying the claim and will authorize the commencement of the appeal or suit on the claim as otherwise provided in this Act. However, in the event an appeal or suit is so commenced in the absence of a prior decision by the contracting officer, the tribunal concerned may, at its option, stay the proceedings to obtain a decision on the claim by the contracting officer.

CONTRACTOR'S RIGHT OF APPEAL TO BOARD OF CONTRACT APPEALS

SEC. 7. Within ninety days from the date of receipt of a contracting officer's decision under section 6, the contractor may appeal such decision to an agency board of contract appeals, as provided in section 8.

AGENCY BOARDS OF CONTRACT APPEALS

SEC. 8. (a)(1) Except as provided in paragraph (2) an agency board of contract appeals may be established within an executive agency when the agency head, after consultation with the Administrator, deter-

mines from a workload study that the volume of contract claims justifies the establishment of a full-time agency board of at least three members who shall have no other inconsistent duties. Workload studies will be updated at least once every three years and submitted to the Administrator.

(2) The Board of Directors of the Tennessee Valley Authority may establish a board of contract appeals for the Authority of an indeterminate number of members.

(b)(1) Except as provided in paragraph (2), the members of agency boards shall be selected and appointed to serve in the same manner as hearing examiners appointed pursuant to section 3105 of title 5 of the United States Code, with an additional requirement that such members have had not fewer than five years' experience in public contract law. Full-time members of agency boards serving as such on the effective date of this Act shall be considered qualified. The chairman and vice chairman of each board shall be designated by the agency head from members so appointed. The chairman of each agency board shall receive compensation at a rate equal to that paid a GS–18 under the General Schedule contained in section 5332, United States Code, the vice chairman shall receive compensation at a rate equal to that paid a GS–17 under such General Schedule, and all other members shall receive compensation at a rate equal to that paid a GS–16 under such General Schedule. Such positions shall be in addition to the number of positions which may be placed in GS–16, GS–17, and GS–18 of such General Schedule under existing law.

(2) The Board of Directors of the Tennessee Valley Authority shall establish criteria for the appointment of members to its agency board of contract appeals established in subsection (a)(2), and shall designate a chairman of such board. The chairman of such board shall receive compensation at a rate equal to the daily rate paid a GS–18 under the General Schedule contained in section 5332, United States Code for each day he is engaged in the actual performance of his duties as a member of such board. All other members of such board shall receive compensation at a rate equal to the daily rate paid a GS–16 under such General Schedule for each day they are engaged in the actual performance of thier duties as members of such board.

(c) If the volume of contract claims is not sufficient to justify an agency board under subsection (a) or if he otherwise considers it appropriate, any agency head shall arrange for appeals from decisions by contracting officers of his agency to be decided by a board of contract appeals of another executive agency. In the event an agency head is unable to make such an arrangement with another agency, he shall submit the case to the Administrator for placement with an agency board. The provisions of this subsection shall not apply to the Tennessee Valley Authority.

(d) Each agency board shall have jurisdiction to decide any appeal from a decision of a contracting officer (1) relative to a contract made by its agency, and (2) relative to a contract made by any other agency when such agency or the Administrator has designated the agency board to decide the appeal. In exercising this jurisdiction, the agency board is authorized to grant any relief that would be available to a litigant asserting a contract claim in the Court of Claims.

(e) An agency board shall provide to the fullest extent practicable, informal, expeditious, and inexpensive resolution of disputes, and shall issue a decision in writing or take other appropriate action on each appeal submitted, and shall mail or otherwise furnish a copy of the decision to the contractor and the contracting officer.

(f) The rules of each agency board shall include a procedure for the accelerated disposition of any appeal from a decision of a contracting officer where the amount in dispute is $50,000 or less. The accelerated procedure shall be applicable at the sole election of only the contractor. Appeals under the accelerated procedure shall be resolved, whenever possible, within one hundred and eighty days from the date the contractor elects to utilize such procedure.

(g)(1) The decision of an agency board of contract appeals shall be final, except that—

(A) a contractor may appeal such a decision to the Court of Claims within one hundred twenty days after the date of receipt of a copy of such decision, or

(B) the agency head, if he determines that an appeal should be taken, and with the prior approval of the Attorney General, transmits the decision of the board of contract appeals to the United States Court of Claims for judicial review, under section 2510 of title 28, United States Code, as amended herein, within one hundred and twenty days from the date of the agency's receipt of a copy of the board's decision.

(2) Notwithstanding the provisions of paragraph (1), the decision of the board of contract appeals of the Tennessee Valley Authority shall be final, except that—

(A) a contractor may appeal such a decision to a United States district court pursuant to the provisions of section 1337 of title 28, United States Code within one hundred twenty days after the date of receipt of a copy of such decision, or

(B) The Tennessee Valley Authority may appeal the decision to a United States district court pursuant to the provisions of section 1337 of title 28, United States Code, within one hundred twenty days after the date of the decision in any case.

(h) Pursuant to the authority conferred under the Office of Federal Procurement Policy Act, the Administrator is authorized and directed, as may be necessary or desirable to carry out the provisions of this Act, to issue guidelines with respect to criteria for the establishment, functions, and procedures of the agency boards; (except for a board established by the Tennessee Valley Authority); and

(i) Within one hundred and twenty days from the date of enactment of this Act, all agency boards, except that of the Tennessee Valley Authority, of three or more full time members shall develop workload studies for approval by the agency head as specified in section 8(a)(1).

SMALL CLAIMS

SEC. 9. (a) The rules of each agency board board shall include a procedure for the expedited disposition of any appeal from a decision of a contracting officer where the amount in dispute is $10,000 or less. The small claims procedure shall be applicable at the sole election of the contractor.

(b) The small claims procedure shall provide for simplified rules of procedure to facilitate the decision of any appeal thereunder. Such appeals may be decided by a single member of the agency board with such concurrences as may be provided by rule or regulation.

(c) Appeals under the small claims procedure shall be resolved, whenever possible, within one hundred twenty days from the date on which the contractor elects to utilize such procedure.

(d) A decision against the Government or the contractor reached under the small claims procedure shall be final and conclusive and shall not be set aside except in cases of fraud.

(e) Administrative determinations and final decisions under this section shall have no value as precedent for future cases under this Act.

(f) The Administrator is authorized to review at least every three years, beginning with the third year after the enactment of the Act, the dollar amount defined in section 9(a) as a small claim, and based upon economic indexes selected by the Administrator adjust that level accordingly.

ACTIONS IN COURT: JUDICIAL REVIEW OF BOARD DECISIONS

SEC. 10. (a)(1) Except as provided in paragraph (2), and in lieu of appealing the decision of the contracting officer under section 6 to an agency board, a contractor may bring an action directly on the claim in the United States Court of Claims, notwithstanding any contract provision, regulation, or rule of law to the contrary.

(2) In the case of an action against the Tennessee Valley Authority, the contractor may only bring an action directly on the claim in a United States district court pursuant to section 1337 of title 28, United States Code, notwithstanding any contract provision, regulation, or rule of law to the contrary.

(3) Any action under paragraph (1) or (2) shall be filed within twelve months from the date of the receipt by the contractor of the decision of the contracting officer concerning the claim, and shall proceed de novo in accordance with the rules of the appropriate court.

(b) In the event of an appeal by a contractor or the Government from a decision of any agency board pursuant to section 8, notwithstanding any contract provision, regulation, or rules of law to the contrary, the decision of the agency board on any question of law shall not be final or conclusive, but the decision on any question of fact shall be final and conclusive and shall not be set aside unless the decision is fraudulent, or arbitrary, or capricious, or so grossly erroneous as to necessarily imply bad faith, or if such decision is not supported by substantial evidence.

(c) In any appeal by a contractor or the Government from a decision of an agency board pursuant to section 8, the court may render an opinion and judgment and remand the case for further action by the agency board or by the executive agency as appropriate, with such direction as the court considers just and proper, or, in its discretion and in lieu of remand it may retain the case and take such additional evidence or action as may be necessary for final disposition of the case.

(d) If two or more suits arising from one contract are filed in the Court of Claims and one or more agency boards, for the convenience of parties or witnesses or in the interest of justice, the Court of Claims may order the consolidation of such suits in that court or transfer any suits to or among the agency boards involved.

(e) In any suit filed pursuant to this Act involving two or more claims, counterclaims, cross-claims, or third-party claims, and where a portion of one such claim can be divided for purposes of decision or judgment, and in any such suit where multiple parties are involved, the court, whenever such action is appropriate, may enter a judgment as to one or more but fewer than all of the claims, portions thereof, or parties.

SUBPENA, DISCOVERY, AND DEPOSITION

SEC. 11. A member of an agency board of contract appeals may administer oaths to witnesses, authorize depositions and discovery proceedings, and require by subpena the attendance of witnesses, and production of books and papers, for the taking of testimony or evidence by deposition or in the hearing of an appeal by the agency board. In case of contumacy or refusal to obey a subpena by a person who resides, is found, or transacts business within the jurisdiction of a United States district court, the court, upon application of the agency board through the Attorney General, or upon application by the board of contract appeals of the Tennessee Valley Authority, shall have jurisdiction to issue the person an order requiring him to

appear before the agency board or a member thereof, to produce evidence or to give testimony, or both. Any failure of any such person to obey the order of the court may be punished by the court as a contempt thereof.

INTEREST

SEC. 12. Interest on amounts found due contractors on claims shall be paid to the contractor from the date the contracting officer receives the claim pursuant to section 6(a) from the contractor until payment thereof. The interest provided for in this section shall be paid at the rate established by the Secretary of the Treasury pursuant to Public Law 92-41 (85 Stat. 97) for the Renegotiation Board.

APPROPRIATIONS

SEC. 13. (a) Any judgment against the United States on a claim under this Act shall be paid promptly in accordance with the procedures provided by section 1302 of the Act of July 27, 1956, (70 Stat. 694, as amended; 31 U.S.C. 724a).

(b) Any monetary award to a contractor by an agency board of contract appeals shall be paid promptly in accordance with the procedures contained in subsection (a) above.

(c) Payments made pursuant to subsections (a) and (b) shall be reimbursed to the fund provided by section 1302 of the Act of July 27, 1956, (70 Stat. 694, as amended; 31 U.S.C. 724a) by the agency whose appropriations were used for the contract out of available funds or by obtaining additional appropriations for such purposes.

(d)(1) Notwithstanding the provisions of subsection (a) through (c), any judgment against the Tennessee Valley Authority on a claim under this Act shall be paid promptly in accordance with the provisions of section 9(b) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831(h)).

(2) Notwithstanding the provisions of subsection (a) through (c), any monetary award to a contractor by the board of contract appeals for the Tennessee Valley Authority shall be paid in accordance with the provisions of section 9(b) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831(h)).

AMENDMENTS AND REPEALS

SEC. 14. (a) The first sentence of section 1346(a)(2) of title 28, United States Code, is amended by inserting before the period a comma and the following: "except that the district courts shall not have jurisdiction of any civil action or claim against the United States founded upon any express or implied contract with the United States or for liquidated or unliquidated damages in cases not sounding in tort which are subject to sections 8(g)(1) and 10(a)(1) of the Contract Disputes Act of 1978".

(b) Section 2401(a) of title 28, United States Code, is amended by striking out "Every" at the beginning and inserting in lieu thereof "Except as provided by the Contract Disputes Act of 1978, every".

(c) Section 1302 of the Act of July 27, 1956, as amended (70 Stat. 694, as amended; 31 U.S.C. 724a), is amended by adding after "2677 of title 28" the words "and decisions of boards of contract appeals".

(d) Section 2414 of title 28, United States Code, is amended by striking out "Payment" at the beginning and inserting in lieu thereof "Except as provided by the Contract Disputes Act of 1978, payment".

(e) Section 2517(a) of title 28, United States Code, is amended by striking out "Every" at the beginning and inserting in lieu thereof "Except as provided by the Contract Disputes Act of 1978, every".

(f) Section 2517(b) of title 28, United States Code, is amended by inserting after "case or controversy" the following: ", unless the judgment is designated a partial judgment, in which event only the matters described therein shall be discharged,".

(g) There shall be added to subsection (c) of section 5108 of title 5, United States Code, a paragraph (17) reading as follows:

"(17) the heads of executive departments or agencies in which boards of contract appeals are established pursuant to the Contract Disputes Act of 1978, and subject to the standards and procedures prescribed by this chapter, but without regard to subsection (d) of this section, may place additional positions, not to exceed seventy in number, in GS-16, GS-17, and GS-18 for the independent quasi-judicial determination of contract disputes, with the allocation of such positions among such executive departments and agencies determined by the Administrator for Federal Procurement Policy on the basis of relative case load."

(h)(1) Section 2510 of title 28, United States Code, is amended by—

(A) inserting "(a)" immediately before such section; and

(B) adding the following new subsection at the end thereof:

"(b)(1) The head of any executive department or agency may, with the prior approval of the Attorney General, refer to the Court of Claims for judicial review any final decision rendered by a board of contract appeals pursuant to the terms of any contract with the United States awarded by that department or agency which such head of such department or agency has concluded is not entitled to finality pursuant to the review standards specified in section 10(b) of the Contracts Disputes Act of 1978. The head of each executive department or agency shall make any referral under this section within one hundred and twenty days of the receipt of a copy of the final appeal decision.

"(2) The Court of Claims shall review the matter referred in accordance with the standards specified in section 10(b) of the Contracts Disputes Act of 1978. The Court shall proceed with judicial review on the administrative record made before the board of contract appeals on matters so referred as in other cases pending in such court, shall determine the issue of finality of the appeal decision, and shall, as appropriate, render judgment thereon, take additional evidence, or remand the matter pursuant to the authority specified in section 1491 of this title.".

(2)(A) The section heading of such section is amended to read as follows:

"§ 2510. Referral of cases by the Comptroller General or the head of an executive department or agency.".

(B) The item relating to section 2510 in the table of sections for chapter 165 of title 28, United States Code, is amended to read as follows:

"2510. Referral of cases by the Comptroller General or the head of an executive department or agency.".

(i) Section 1491 of title 28, United States Code, is amended by adding the following sentence at the end of the first paragraph thereof: "The Court of Claims shall have jurisdiction to render judgment upon any claim by or against, or dispute with, a contractor arising under the Contract Disputes Act of 1978.".

SEVERABILITY CLAUSE

SEC. 15. If any provision of this Act, or the application of such provision to any person or circumstances, is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

EFFECTIVE DATE OF ACT

SEC. 16. This Act shall apply to contracts entered into one hundred twenty days after the date of enactment. Notwithstanding any provision in a contract made before the effective date of this Act, the contractor may elect to proceed under this Act with respect to any claim pending then before the contracting officer or initiated thereafter.

Mr. DANIELSON (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. YATES. Mr. Speaker, reserving the right to object, I do so to ask the gentleman from California what this bill does.

Mr. DANIELSON. Mr. Speaker, if the gentleman will yield, the Senate amendment to this bill simply reinstates existing law on the burden of proof on an appeal from a contract disptue.

Mr. YATES. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California to dispense with further reading?

Mr. KINDNESS. Mr. Speaker, further reserving the right to object, would the gentleman from California agree that the workmanship in the bill passed by the other body perhaps does not measure up to the workmanship of the bill that came out of the gentleman's subcommittte, but that indeed it is a step in the right direction, and while failing in some respects to be quite such a perfect product, we are at that point in the legislative session when it is necessary to move ahead with what we have that the other body has already adopted, and he would recommend the agreement to his request on the basis that maybe it is not as perfect but it is very close to what needs to be done?

Mr. DANIELSON. Mr. Speaker, I agree with the gentleman's statement and urge adoption of the measure.

Mr. HARRIS. Mr. Speaker will the gentleman yield?

Mr. KINDNESS. Mr. Speaker, I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Speaker, I agree with the gentleman's comments. This offers a statutory basis for the resolution of contract disputes. I compliment the gentleman on the work done by the committee and I am pleased to join with him in asking for the granting of this unanimous-consent request tonight.

Mr. KINDNESS. Mr. Speaker, I agree with the gentleman from Virginia and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California to dispense with further reading?

There was no objection.

The SPEAKER. Is there objection to the first request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 3084, HOUSING AND COMMUNITY DEVELOPMENT AMENDMENTS OF 1978

Mr. ASHLEY submitted the following conference report and statement on the Senate bill (S. 3084) to amend and extend certain Federal laws relating to housing, community, and neighborhood development and preservation, and related programs, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 95-1792)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3084) to amend and extend certain Federal laws relating to housing, community, and neighborhood development and preservation, and related programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Housing and Community Development Amendments of 1978".

TITLE I—COMMUNITY AND NEIGHBORHOOD DEVELOPMENT AND CONSERVATION

REHABILITATION LOANS AND LOAN INSURANCE

SEC. 101. (a) Section 312 of the Housing Act of 1964 is amended—

(1) by striking out the undesignated paragraph which follows subsection (a)(3) and inserting in lieu thereof the following new undesignated paragraph:

"The Secretary shall, in making loans under this section, give priority to applications by low and moderate income persons who own the property to be rehabilitated and will occupy such property upon completion of the rehabilitation, including applications by condominiums and cooperatives in which the residents are principally of low and modern income. For the purpose of the preceding sentence, the term 'low and moderate income' means income which does not exceed 95 per centum of the median income for the area.";

(2) by striking out subsection (c)(3) and inserting in lieu thereof the following:

"(3) The loan shall bear interest at such rate as the Secretary determines to be appropriate, but not to exceed 3 per centum per annum for loans to families with adjusted incomes of not more than 80 per centum of the median income for the area. For loans to families with adjusted incomes above 80 per centum of the median income for the area, as determined by the Secretary, the Secretary may establish interest rates based on adjusted family income, ranging from above 3 per centum to a rate determined by the Secretary, but in no case may any such rate exceed the current average market yield on outstanding marketable securities of the United States with remaining periods to maturity comparable to the terms of loans made pursuant to this section, adjusted to the nearest one-eighth of 1 per centum. The Secretary may prescribe such other charges adequate in the judgment of the Secretary to cover administrative costs and possible losses under the program.";

(3) by inserting the following before the semicolon at the end of subsection (c)(4)(A): ", or if such refinancing is deemed necessary by the Secretary to minimize displacement of existing tenants of a multifamily property";

(4) by striking out "$50,000" in subsection (c)(4)(B) and inserting in lieu thereof "$100,000";

(5) by striking out "and not to exceed $60,000,000 for the fiscal year beginning on October 1, 1977" in subsection (d) and inserting in lieu thereof "not to exceed $60,000,000 for the fiscal year beginning on October 1, 1977, and not to exceed $245,000,000 for the fiscal year beginning on October 1, 1978";

(6) by adding at the end of subsection (d) the following: "Of the amounts available for loans under this section during the fiscal year beginning October 1, 1978, the Secretary may utilize not more than $60,000,000 for rehabilitation loans for multifamily properties."; and

(7) by adding at the end thereof the following new subsection:

"(i) The Secretary may not, after 270 days following the date of the enactment of this subsection, make any loan under this section with respect to any property unless the Secretary has determined that the improvements to such property, upon completion of the rehabilitation, will meet cost-effective energy conservation standards prescribed by the Secretary.".

(b) Section 312 of such Act is amended by adding at the end thereof the following:

"(i) Rehabilitation loans under this section for multifamily properties shall be subject to the following additional limitations and conditions:

"(1) The property must meet the requirements of subsection (a) and—

"(A) be located in a low- or moderate-income neighborhood; or

"(B) have a majority of tenants of low and moderate income

All such loans must be consistent with an overall community development strategy developed pursuant to title I of the Housing and Community Development Act of 1974.

"(2) The property must have fewer than 100 units, except where the Secretary determines that a loan under this section is essential to meet the community development needs of a neighborhood and alternative sources of financing are not available.

"(3) The Secretary shall enter into an agreement with the investor-owner of a multifamily property which is to be rehabilitated with a loan under this section to limit, for a period of at least five years, the increased rent caused by the rehabilitation.

"(4) The Secretary shall minimize involuntary displacement caused by rehabilitation loans under this section with respect to multifamily properties.

"(j) In conjunction with the annual report required under section 113(a) of the Housing and Community Development Act of 1974, the Secretary shall submit to the Congress a report on the rehabilitation loan program under this section. Such report shall include a summary of the use of funds under this section, particularly with regard to the types of neighborhoods and persons aided under this section, and an evaluation of progress made toward community development goals under this section. As soon as feasible, but not later than December 1, 1979, the Secretary shall submit to Congress an interim report evaluating the use of funds under this section for multifamily properties, with legislative recommendations for improving the overall effectiveness of Federal assistance for the rehabilitation of multifamily properties.".

(c)(1) Section 203(k) of the National Housing Act is amended to read as follows:

"(k)(1) The Secretary may, in order to assist in the rehabilitation of one- to four-family structures used primarily for residential purposes, insure and make commitments to insure rehabilitation loans (including advances made during rehabilitation) made by financial institutions on and after 180 days following the date of the enactment of the Housing and Community Development Amendments of 1978. Such commitments to insure and such insurance shall be made upon such terms and conditions which the Secretary may prescribe and which are consistent with the provisions of subsections (b), (c), (e), (i), and (j) of this section, except as modified by the provisions of this subsection.

"(2) For the purpose of this subsection—

"(A) the term 'rehabilitation loan' means a loan, advance of credit, or purchase of an obligation representing a loan or advance of credit, made for the purpose of financing—

"(i) the rehabilitation of an existing one- to four-unit structure which will be used primarily for residential purposes;

"(ii) the rehabilitation of such a structure and the refinancing of the outstanding indebtedness on such structure and the real property on which the structure is located; or

"(iii) the rehabilitation of such a structure and the purchase of the structure and the real property on which it is located; and

"(B) the term 'rehabilitation' means the improvement (including improvements designed to meet cost-effective energy conservation standards prescribed by the Secretary) or repair of a structure, or facilities in connection with a structure, and may include the provision of such sanitary or other facilities as are required by applicable codes, a community development plan, or a statewide property insurance plan to be provided by the owner or tenant of the project.

"(3) To be eligible for insurance under this subsection, a rehabilitation loan shall—

"(A) involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Secretary shall approve) in an amount which does not exceed, when added to any outstanding indebtedness of the borrower which is secured by the structure and the property on which it is located, the amount specified in subsection (b)(2); except that, in determining the amount of the principal obligation for purposes of this subsection, the Secretary shall establish as the appraised value of the property and amount not to exceed the sum of the estimated cost of rehabilitation and the Secretary's estimate of the value of the property before rehabilitation;

"(B) bear interest at a rate permitted by the Secretary for mortgages insured under this section; except that the Secretary may permit a higher rate of interest to be applied to the loan with respect to the period beginning with the making of the loan and ending with the completion of the rehabilitation or such earlier time as the Secretary may determine;

"(C) be an acceptable risk, as determined by the Secretary; and

"(D) comply with such other terms, conditions, and restrictions as the Secretary may prescribe.

"(4) Any rehabilitation loan insured under this subsection may be refinanced and extended in accordance with such terms and conditions as the Secretary may prescribe, but in no event for an additional amount or term which exceeds the maximum provided for in this subsection.

"(5) All funds received and all disbursements made pursuant to the authority established by this subsection shall be credited or charged, as appropriate, to the General Insurance Fund, and insurance benefits shall be paid in cash out of such Fund or in debentures executed in the name of such Fund. Insurance benefits paid with respect to loans insured under this subsection shall be paid in accordance with paragraphs (6) and (7) of section 220(h), except that any reference to 'this subsection' in such paragraphs shall be construed as referring to this subsection.".

(2) Section 203(c) of such Act is amended—

(A) by striking out "subsection (n) is" in the first proviso and inserting in lieu thereof "subsections (n) and (k) are"; and

(B) by inserting "or (k)" after "subsection (n)" the second time it appears in such proviso.

(3) The proviso in the first sentence of section 302(b)(1) of such Act is amended by inserting "or section 203(k)" after "title VIII" in clause (3).

URBAN HOMESTEADING

SEC. 102. (a) Section 810(f) of the Housing and Community Development Act of 1974 is amended—

(1) by inserting "and the Administrator of Veterans' Affairs" after "Secretary" the first place it appears; and

(2) by inserting "or the Administrator" after "Secretary" the second place it appears.

(b) The first sentence of section 810(g) of such Act is amended—

(1) by striking out "and" immediately following "fiscal year 1977,"; and

(2) by inserting the following before the period at the end thereof: ", and not to extend $26,000,000 for the fiscal year 1979".

COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM AMENDMENTS

SEC. 103. (a) Section 104(a)(4)(A) of the Housing and Community Development Act of 1974 is amended by inserting "owners of homes requiring rehabilitation assistance," after "large families,".

(b) Section 104(a)(4)(B)(i) of such Act is amended by inserting "including existing rental and owner occupied dwelling units to be upgraded and thereby preserved," after "existing dwelling units,".

(c) Section 104(a) of such Act is amended by inserting after "expected to reside in the community" in paragraphs (3)(C) and (4)(A) the following: " "as a result of existing or projected employment opportunities in the community (and those elderly persons residing in or expected to reside in the community), or as estimated in a community accepted State or regional housing opportunity plan approved by the Secretary,".

(d) Section 104(c) of such Act is amended by adding the following new sentence at the end thereof: "The Secretary may not disapprove an application on the basis that such application addresses any one of the primary purposes described in paragraph (3) to a greater or lesser degree than any other, except that such application may be disapproved if the Secretary determines that the extent to which a primary purpose is addressed is plainly inappropriate to meeting the needs and objectives which are consistent with the community's efforts to achieve the primary objective of this title.".

(e) Section 105(a)(11) of such Act is amended to read as follows:

"(11) relocation payments and assistance for displaced individuals, families, businesses, organizations, and farm operations, when determined by the grantee to be appropriate to the community development program;".

(f) The last sentence of section 107(a)(8) of such Act is amended to read as follows: "The Secretary may also provide, directly or through contracts, technical assistance under this paragraph to such governmental units, or to a group designated by such a governmental unit for the purpose of assisting that governmental unit to carry out its Community Development Program.".

(g) Section 119(c) of such Act is amended—

(1) by striking out "and" at the end of clause (4);

(2) by striking out the period at the end of clause (5) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(6) include a statement analyzing the impact of the proposed urban development action program on the residents, particularly those of low and moderate income, of the residential neighborhood, and on the neighborhood, in which the program is to be located.".

(h) Section 119(e) of such Act is amended by inserting before "and feasibility" the following: "impact of the proposed urban development action program on the residents, particularly those of low and moderate income, of the residential neighborhood, and on the neighborhood, in which the program is to be located;".

(i) Title I of such Act is amended by adding at the end thereof the following new section:

"FAIR PARTICIPATION FOR SMALL COMMUNITIES

"SEC. 120. No community shall be barred from participating in any program authorized under this title solely on the basis of population, except as expressly authorized by statute.".

EFFECTIVE DATE

SEC. 104. The amendments made by this title shall become effective October 1, 1978.

TITLE II—HOUSING ASSISTANCE PROGRAMS

OPERATING ASSISTANCE FOR TROUBLED MULTIFAMILY HOUSING PROJECTS

SEC. 201. (a) The purposes of this section are to provide assistance to restore or maintain the financial soundness, to assist in the improvement of the management, and to maintain the low- to moderate-income character of certain projects assisted or approved for assistance under the National Housing Act or under the Housing and Urban Development Act of 1965.

(b) The Secretary of Housing and Urban Development (hereinafter referred to in this section as the "Secretary") may make available, and contract to make available, to such extent and in such amounts as may be approved in appropriation Acts, financial assistance to owners of rental or cooperative housing projects meeting the requirements of this section. Such assistance shall be made on an annual basis and in accordance with the provisions of this section.

(c) A rental or cooperative housing project is eligible for assistance under this section only if such project—

(1)(A) is assisted under section 236 or the proviso of section 21(d)(5) of the National Housing Act, or under section 101 of the Housing and Urban Development Act of 1965; except that, in the case of any such project which is not insured under the National Housing Act such assistance may not be provided before October 1, 1979; or

(B) met the criteria specified in subparagraph (A) of this paragraph before the acquisition of such project by the Secretary and has been sold by the Secretary, subject to a mortgage insured or held by the Secretary and subject to an agreement (in effect during the period of assistance under this section) which provides that the low- and moderate-income character of the project will be maintained; except that, with respect to projects sold after October 1, 1978, assistance shall be available for a period not to exceed three years; and

(2) meets such other requirements consistent with the purposes of this section as the Secretary may prescribe.

(d) No assistance may be made available under this section unless the Secretary has determined that—

(1) such assistance, when considered with other resources available to the project, is necessary and, in the determination of the Secretary, will restore or maintain the financial soundness of the project and maintain the low- and moderate-income character of the project;

(2) the assistance which could reasonably be expected to be provided over the useful life of the project will be less costly to the Federal Government than other reasonable alternatives by which the Secretary could maintain the low- and moderate-income character of the project;

(3) the owner of the project, together with the mortgagee in the case of a project not insured under the National Housing Act, has provided or has agreed to provide assistance to the project in such manner as the Secretary may determine;

(4) the project is or can reasonably be made structurally sound, as determined on the basis of information obtained as a result of an onsite inspection of the project;

(5) the management of the project is being conducted by persons who meet minimum levels of competency and experience prescribed by the Secretary; and

(6) the project is being operated and managed in accordance with a management-improvement-and-operating plan which is designed to reduce the operating costs of the project, which has been approved by the Secretary, and which includes the following: (A) a detailed maintenance schedule; (B) a schedule for correcting past deficiencies in maintenance, repairs, and replacements; (C) a plan to upgrade the project to meet cost-effective energy efficiency standards prescribed by the Secretary; (D) a plan to improve financial and management control systems; (E) a detailed annual operating budget taking into account such standards for operating cost in the area as may be determined by the Secretary; and (F) such other requirements as the Secretary may determine.

(e) Prior to making assistance available to a project, the Secretary shall consult with the appropriate officials of the unit of local government in which such project is located and seek assurances that—

(1) the community in which the project is located is or will provide essential services to the project in keeping with the community's general level of such services;

(2) the real estate taxes on the project are or will be no greater than would be the case if the property were assessed in a manner consistent with normal property assessment procedures for the community; and

(3) assistance to the project under this section would not be inconsistent with local plans and priorities.

(f)(1) The Secretary may, with respect to any year, provide assistance under this section, and make commitments to provide such assistance, with respect to any project in any amount which the Secretary determines is consistent with the project's management-improvement and operating plan described in subsection (d)(6) and which does not exceed the sum of—

(A) an amount determined by the Secretary to be necessary to correct deficiencies in the project which exist at the beginning of the first year with respect to which assistance is made available for the project under this section, which were caused by the deferral of regularly scheduled maintenance and repairs or the failure to make necessary and timely replacements of equipment and other components of the project, and for which payment has not previously been made;

(B) an amount determined by the Secretary to be necessary to maintain the low- and moderate-income character of the project by reducing deficiencies, which exist at the beginning of the first year with respect to which assistance is made available for the project under this section and for which payment has not previously been made, in the reserve funds established by the project owner for the purpose of replacing capital items; and

(C) an amount not greater than the amount by which the estimated operating expenses (as described in paragraph (2) of this subsection) for the year with respect to which such assistance is made available exceeds the estimated revenues to be received (as described in paragraph (2) of this subsection) by the project during such year.

(2) The estimated revenues for any project under paragraph (1)(C) of this subsection with respect to any year shall be equal to the sum of—

(A) the estimated amount of rent which is to be expended by the tenants of such project during such year, as determined by the Secretary without regard to section 236(f)(1) of the National Housing Act;

(B) the estimated amount of rental assistance payments to be made on behalf of such tenants during such year, other than assistance made under this section;

(C) the estimated amount of assistance payments to be made on behalf of the owner of such project under section 221(d)(5) or section 236 of the National Housing Act during such year; and

(D) other income attributable to the project as determined by the Secretary;

except that—

(E) in computing the estimated amount of rent to be expended by tenants, the Secretary shall provide that (i) at least 25 percent (or such lesser percentage as is provided for under any other Federal housing assistance program in which such tenant is participating) of the income of each such tenant is included, or (ii) in the case of a tenant paying his or her own utilities, a percentage of income which is less than 25 percent and which takes into account the reasonable costs of such utilities; except that no amount shall be provided for any tenant under clause (i) or (ii) which exceeds the fair market rental charge as determined pursuant to section 236(f)(1) of the National Housing Act for such tenant; and

(F) in computing the estimated amount of rent to be expended by tenants and the estimated amount of rental assistance payments to be made on behalf of such tenants, the Secretary may permit a delinquency-and-vacancy allowance of not more than 6 per centum of the estimated amount of such rent and payments computed without regard to such allowance; except that, with respect to the first three years in which assistance is provided to a project under this section, the Secretary may permit such allowance for such project to exceed such 6 percent by an amount which the Secretary determines is appropriate to carry out the purposes of this section.

For purposes of computing estimated operating expenses of any such project with respect to any year, the Secretary shall include all estimated operating costs which the Secretary determines to be necessary and consistent with the management-improvement-and-operating plan for the project for such year, including, but not limited to, taxes, utilities, maintenance and repairs (except for maintenance and repairs which should have been performed in previous years), management, insurance, debt service, and payments made by the owner for the purpose of establishing or maintaining a reserve fund for replacement costs. The Secretary may not include in such estimated operating expenses any return on the equity investment of the owner in such project.

(3) In order to carry out the purposes of this section, the Secretary may, notwithstanding the provisions of section 236(f)(1) of the National Housing Act, provide that, for purposes of establishing a rental charge under such section, there may be excluded from the computation of the cost of operating a project an amount equivalent to the amount equivalent to the amount of assistance payments made for the project under this section.

(4) Any assistance payments made pursuant to this section with respect to any project shall be made on an annual basis, payable at such intervals, but at least quarterly, as the Secretary may determine, and may be in any amount (which the Secretary determines to be consistent with the purpose of this section), except that the sum of such assistance payments for any year may not exceed the amount computed pursuant to paragraph (1) of this subsection. The Secretary shall review the operations of the project at the time of such payments to determine that such operations are consistent with the management-improvement-and-operating plan.

(g) The Secretary is authorized to issue such rules and regulations as may be necessary to carry out the provisions and purposes of this section, including regulations requiring the establishment of a project reserve or such other safeguards as the Secretary determines to be necessary for the financial soundness of any project for which assistance payments are provided.

(h) There is authorized to be appropriated, for the purpose of providing financial assistance under this section, an amount (in addition to any amount appropriated for use under this section pursuant to section 236(f)(3)(B) of the National Housing Act) not to exceed $74,000,000 for the fiscal year 1979. Any amounts appropriated under this section shall remain available until expended.

(i) Effective October 1, 1978, section 236 of the National Housing Act is amended—

(1) in subsection (f)(3)—

(A) by inserting "(A)" after "(3)";

(B) by striking out "The" in the second sentence and inserting in lieu thereof "For each fiscal year prior to the fiscal year 1979, the"; and

(C) by adding at the end thereof the following:

"(B) The Secretary shall utilize amounts credited to the fund described in subsection (g) on or after October 1, 1978, for the sole purpose of carrying out the purposes of section 201 of the Housing and Community Development Amendments of 1978. No payments may be made from such fund unless approved in an appropriation Act. No amount may be so approved for any fiscal year beginning after September 30, 1979."; and

(2) by striking out the third and fourth sentences of subsection (g).

TENANT PARTICIPATION IN MULTIFAMILY HOUSING PROJECTS

SEC. 202. (a) The purpose of this section is to recognize the importance and benefits of cooperation and participation of tenants in creating a suitable living environment in multifamily housing projects and in contributing to the successful operation of such projects, including their good phsyical condition, proper maintenance, security, energy efficiency, and control of operating costs. For the purpose of this section, the term "multifamily housing project" means a project which is eligible for assistance as described in section 201(c) of this Act.

(b) The Secretary shall assure that—

(1) where the Secretary's written approval is required with respect to an owner's action and the Secretary deems it appropriate, tenants have adequate notice of, reasonable access to relevant information about, and an opportunity to comment on such actions (and in the case of a project owned by the Secretary, any proposed disposition of the project) and that such comments are taken into consideration by the Secretary;

(2) project owners not interfere with the efforts of tenants to obtain rent subsidies or other public assistance;

(3) leases approved by the Secretary provide that tenants may not be evicted without good cause or without adequate notice of the reasons therefor and do not contain unreasonable terms and conditions; and

(4) project owners do not impede the reasonable efforts of tenants to organize.

(c) The Secretary shall promulgate regulations to carry out the provisions of this section not later than 90 days after the date of enactment of his Act.

MANAGEMENT AND PRESERVATION OF HUD-OWNED MULTIFAMILY HOUSING PROJECTS

SEC. 203. (a) It is the policy of the United States that the Secretary of Housing and Urban Development (hereinafter referred to as the "Secretary") shall manage and dispose of multifamily housing projects which are owned by the Secretary in a manner consistent with the National Housing Act and this section. The purpose of the property management and disposition program of the Department of Housing and Urban Development shall be to manage and dispose of projects in a manner which will protect the financial interests of the Federal Government and be less costly to the Federal Government than other reasonable alternatives by which the Secretary can further the goals of—

(1) preserving the housing units so that they can remain available to and affordable by low- and moderate-income families;

(2) preserving and revitalizing residential neighborhoods;

(3) maintaining the existing housing stock in a decent, safe, and sanitary condition;

(4) minimizing the involuntary displacement of tenants; and

(5) minimizing the need to demolish projects. The Secretary, in determining the manner by which a project shall be managed or disposed of, may balance competing goals relating to individual projects in a manner which will further the achievement of the overall purpose of this section.

(b) The Secretary is authorized, in carrying out this section—

(1) to dispose of a multifamily housing project owned by the Secretary on a negotiated, competitive bid, or other basis, on such terms as the Secretary deems appropriate considering the low- and moderate-income character of the project and the requirements of subsection (a) of this section, to a purchaser determined by the Secretary to be capable of (A) satisfying the conditions of the disposition; (B) implementing a sound financial and physical management program; (C) responding to the needs of the tenants and working cooperatively with resident organizations; (D) providing adequate organizational, staff and financial resources to the project; and (E) meeting such other requirements as the Secretary may determine; and

(2) to contract for management services for a multifamily housing project, owned by the Secretary, on a negotiated, competitive bid, or other basis at a price determined by the Secretary to be reasonable, with a manager the Secretary has determined is capable of (A) implementing a sound financial and physical management program, (B) responding to the needs of the tenants and working cooperatively with resident organizations, (C) providing adequate organizational, staff, and other resources to implement a management program determined by the Secretary, and (D) meeting such other requirements as the Secretary may determine.

(c) Except where the Secretary has determined on a case-by-case basis that it would be clearly inappropriate, given the manner by which an individual project is to be managed or disposed of pursuant to subsection (a) of this section, the Secretary shall seek to—

(1) maintain all occupied multifamily housing projects owned by the Secretary in a decent, safe, and sanitary condition; and

(2) to the greatest extent possible, maintain full occupancy in all multifamily housing projects owned by the Secretary.

(d)(1) Whenever tenants will be displaced as a result of the disposition of, or repairs to, a multifamily housing project owned by the Secretary, the Secretary shall identify tenants who will be displaced, and shall notify all such tenants of their pending displacement and of any relocation assistance which may be available.

(2) The Secretary shall seek to assure the maximum opportunity for any such tenant—

(A) to return, whenever possible, to a repaired unit;

(B) to occupy a unit in another multifamily housing project owned by the Secretary;

(C) to obtain housing assistance under the United States Housing Act of 1937; or

(D) to receive any other available relocation assistance as the Secretary determines to be appropriate.

(e) Notwithstanding any other provision of law, whenever the Secretary is requested to accept assignment of a mortgage insured by the Secretary which covers a multifamily housing project, and the Secretary determines that partial payment would be less costly to the Federal Government than other reasonable alternatives for maintain-

ing the low- and moderate-income character of the project, the Secretary may request the mortgagee in lieu of assignment, to accept partial payment of the claim under the mortgage insurance contract and to recast the mortgage, under such terms and conditions as the Secretary may determine. As a condition to a partial claim payment under this section, the mortgagor shall agree to repay to the Secretary the amount of such payment and such obligation shall be secured by a second mortgage on the property on such terms and conditions as the Secretary may determine.

(f) For the purpose of this section, the term "multifamily housing project" means a multifamily project which is, or prior to acquisition by the Secretary was, assisted under section 236, the proviso of section 221(d)(5) of the National Housing Act, or section 101 of the Housing and Urban Development Act of 1965, and which is insured under the National Housing Act.

(g) The Secretary shall issue such rules and regulations as may be necessary to carry out the provisions of this section within 90 days after the date of enactment of this Act.

HOUSING ACCESS

SEC. 204. The Secretary shall require any purchaser of a multifamily housing project owned by the Secretary which is sold on or after October 1, 1978, to agree not to refuse unreasonably to lease a vacant dwelling unit in the project which rents for an amount not greater than the fair market rent for a comparable unit in the area as determined by the Secretary under section 8 of the United States Housing Act of 1937 to a holder of a certificate of eligibility under that section solely because of such prospective tenant's status as a certificate holder.

HOUSING FOR THE HANDICAPPED

SEC. 205. (a) Section 202 of the Housing Act of 1959 is amended by adding at the end thereof the following new subsection:

"(h) Of the amounts made available in appropriation Acts for loans pursuant to subsection (a)(4)(C) for the fiscal year commencing on October 1, 1978, not less than $50,000,000 shall be available for loans for the development of rental housing and related facilities specifically designed to meet the needs of handicapped (primarily nonelderly) persons. The Secretary shall take such steps as may be necessary to assure that—

"(1) funds made available pursuant to this subsection will be used to support innovative methods of meeting the needs of handicapped persons by providing a variety of housing options, ranging from small group homes to independent living complexes; and

"(2) housing and related facilities assisted under this subsection will provide handicapped persons occupying units within such housing with an assured range of services specified under subsection (f) and the opportunity for optimal independent living and participation in normal daily activities, and will facilitate access by such persons to the community at large and to suitable employment opportunities within such community.".

(b) The second sentence of section 202(a)(4)(C) of such Act is amended—

(1) by striking out "in any fiscal year" immediately after "under this section"; and

(2) by striking out "for such year" immediately after "authority established".

(c) Section 202(d)(3) of such Act is amended by inserting "the cost of moveables necessary to the basic operation of the project as determined by the Secretary," immediately after "related facilities,".

(d) Section 202(d)(2) of such Act is amended to read as follows:

"(2) The term 'corporation' means any incorporated private institution or foundation—

"(A) no part of the net earnings of which insures to the benefit of any member, founder, contributor, or individual;

"(B) which has a governing board (i) the membership of which is selected in a manner to assure that there is significant representation of the views of the community in which such project is located and (ii) which is responsible for the operation of the housing project assisted under this section; and

"(C) which is approved by the Secretary as to financial responsibility.".

LOW-INCOME HOUSING

SEC. 206. (a) Section 5(c) of the United States Housing Act of 1937 is amended—

(1) by striking out "and" immediately after "October 1, 1976," in the first sentence;

(2) by inserting immediately after "on October 1, 1977," in the first sentence the following: "and by $1,195,043,000 on October 1, 1978";

(3) by striking out the second and fourth sentences; and

(4) by inserting "and on and after October 1, 1978," immediately after "October 1, 1976," in the third sentence.

(b) Section 5(c) of such Act is amended by inserting after the fourth sentence the following: "Of the additional authority to enter into contracts for annual contributions provided on October 1, 1978, and approved in appropriation Acts, the Secretary shall make available not less than $50,000,000 for modernization of low-income housing projects.".

(c) Section 3(2)(D) of such Act is amended by striking out "10" in the first proviso and inserting in lieu thereof "15".

(d) (1) Section 8 of such Act is amended by adding at the end thereof the following new subsection.

"(i) In entering into contracts under this section with respect to substantially rehabilitated dwelling units, the Secretary shall provide that—

"(1) the maximum monthly rent permitted for the assisted units be not greater than the amount permitted under subsection (c) or a lesser amount which the Secretary determines is appropriate taking into consideration the investment of the owner in the assisted units and such other factors as the Secretary determines to be relevant;

"(2) the assisted units be rehabilitated to a level which meets but does not exceed applicable codes and standards for decent, safe, and sanitary housing which are prescribed by the Secretary;

"(3) all the dwelling units in the housing structure in which the assisted units are located meet applicable codes and standards prescribed by the Secretary for decent, safe, and sanitary housing;

"(4) the term of any such contract does not exceed the maximum term permitted under subsection (e)(1) or a shorter term which the Secretary determines is appropriate taking into consideration the amount of investment of the owner in the assisted units and such other factors as the Secretary determines to be relevant; and

"(5) the assisted units meet cost-effective energy efficiency standards prescribed by the Secretary.".

(2) The amendment made by this subsection shall become effective with respect to contracts entered into on or after 270 days following the date of enactment of this Act.

(e) Section 8(e) of such Act is amended by adding at the end thereof the following:

"(5) For the purpose of upgrading and thereby preserving the Nation's housing stock, the Secretary is authorized to make assistance payments under this section directly or through public housing agencies pursuant to contracts with owners or prospective owners who agree to upgrade housing so as to make and keep such housing decent, safe, and sanitary through upgrading which involves less than substantial rehabilitation, as such upgrading and rehabilitation are defined by the Secretary. The Secretary is authorized to prescribe such terms and conditions for contracts entered into under this section pursuant to this paragraph as the Secretary determines to be necessary and appropriate, except that such terms and conditions, to the maximum extent feasible, shall be consistent with terms and conditions otherwise applicable with respect to other dwelling units assisted under this section. The Secretary is also authorized to make assistance available under this section pursuant to this paragraph to any unit in a housing project which, on an overall basis, reflects the need for such upgrading.".

(f) Section 8 of such Act is amended by adding at the end thereof the following new subsection:

"(j)(1) The Secretary may enter into annual contributions contracts under this subsection for the purpose of assisting lower income families by making rental assistance payments with respect to real property on which is located a mobile home which is owned by any such family and utilized by such family as its principal place of residence. In carrying out this subsection, the Secretary may (A) enter into annual contributions contracts with public housing agencies pursuant to which such agencies may enter into contracts to make such assistance payments to the owners of such real property, or (B) enter into such contracts directly with the owners of such real property.

"(2) Contracts entered into pursuant to this subsection shall establish the maximum monthly rent (including maintenance and management charges) which the owner is entitled to receive for each space on which a mobile home is located and with respect to which assistance payments are to be made. The maximum monthly rent shall not exceed by more than 10 per centum the fair market rental established by the Secretary periodically (but not less than annually) with respect to the market area for the rental of real property suitable for occupancy by families assisted under this subsection. The provisions of subsection (c)(2) of this section shall apply to the adjustments of maximum monthly rent under this subsection.

"(3) The amount of any monthly assistance payment with respect to any family assisted under this subsection shall be the difference between 25 per centum of one-twelfth of the annual income of such family and the sum of—

"(A) the monthly payment made by such family to amortize the cost of purchasing the mobile home;

"(B) monthly utility payments made by such family, subject to reasonable limitations prescribed by the Secretary; and

"(C) the maximum monthly rent permitted with respect to the real property which is rented by such family for the purpose of locating its mobile home;

except that in no case may such assistance exceed the total amount of such maximum monthly rent.

"(4) Each contract entered into under this subsection shall be for a term of not less than one month and not more than 180 months.

"(5) The Secretary may prescribe other terms and conditions which are necessary for the purpose of carrying out the provisions of this subsection and which are consistent with the purposes of this subsection.".

(g) Section 9(c) of such Act is amended—

(1) by striking out "and" immediately following "on or after October 1, 1976,"; and

(2) by inserting immediately before the period at the end thereof the following: ", and not to exceed $729,000,000 on or after October 1, 1978".

(h) The amendments made by this section, except the amendment made by section (d), shall become effective on October 1, 1978.

PUBLIC HOUSING SECURITY

SEC. 207. (a) This section may be cited as the "Public Housing Security Demonstration Act of 1978".

(b) (1) The Congress finds that—

(A) low-income and elderly public housing residents of the Nation have suffered substantially from rising crime and violence, and are being threatened as a result of inadequate security arrangements for the prevention of physical violence, theft, burglary, and other crimes;

(B) older persons generally regard the fear of crime as the most serious problem in their lives, to the extent that one-fourth of all Americans over 65 voluntarily restrict their mobility because of it;

(C) crime and fear of crime have led some residents to move from public housing projects;

(D) an integral part of successfully providing decent, safe, and sanitary dwellings for low-income persons is to insure that the housing is secure;

(E) local public housing authorities may have inadequate security arrangements for the prevention of crime and vandalism; and

(F) action is needed to provide for the security of public housing residents and to preserve the Nation's investment in its public housing stock.

(2) It is, therefore, declared to be the policy of the United States to provide for a demonstration and evaluation of effective means of mitigating crime and vandalism in public housing projects, in order to provide a safe living environment for the residents, particularly the elderly residents, of such projects.

(c) (1) The Secretary of Housing and Urban Development shall promptly initiate and carry out during the fiscal year beginning on October 1, 1978, to the extent approved in appropriation Acts, a program for the development, demonstration, and evaluation of improved, innovative community anticrime and security methods, concepts and techniques which will mitigate the level of crime in public housing projects and their surrounding neighborhoods.

(2) In selecting public housing projects to receive assistance under this section, the Secretary shall assure that a broad spectrum of project types, locations and tenant populations are represented and shall consider at least the following: the extent of crime and vandalism currently existing in the projects; the extent, nature and quality of community anticrime efforts in the projects and surrounding areas; the extent, nature and quality of police and other protective services available to the projects and their tenants; the demand for public housing units in the locality, the vacancy rate, and extent of abandonment of such units; and the characteristics and needs of the public housing tenants.

(3) In selecting the anticrime and security methods, concepts and techniques to be demonstrated under this section, the Secretary shall consider the improvement of physical security equipment for dwelling units in those projects, social and environmental design improvements, tenant awareness and volunteer programs, tenant participation and employment in providing security services, and such other measures as deemed necessary or appropriate by the Secretary. Particular attention shall be given to comprehensive community anticrime and security plans submitted by public housing authorities which (i) provide for coordination between public housing management and local law enforcement officials, or (ii) coordinate resources available to the community through programs funded by the Law Enforcement Assistance Administration, the Department of Health, Education, and Welfare, the Department of Labor, the Community Services Administration, and ACTION, or other Federal or State agencies.

(4) In carrying out the provisions of this section, the Secretary shall coordinate and jointly target resources with other agencies, particularly the Law Enforcement Assistance Administration, the Department of Health, Education, and Welfare, the Department of Labor, the Community Services Administration, and ACTION.

(d) The Secretary shall initiate and carry out a survey of crime and vandalism existing in the Nation's public housing projects. The survey shall include the nature, extent and impact of crime and vandalism and the nature and extent of resources currently available and employed to alleviate crime and vandalism in public housing.

(e) The Secretary shall report to the Congress not later than eighteen months after the date of enactment of this Act. Such report shall include the results of the survey on crime and vandalism in public housing; findings from the demonstration and evaluation of various methods of reducing the level of crime; and legislative recommendations, if appropriate for (A) a comprehensive program to increase security in public housing projects and (B) increasing the coordination between anticrime programs of other State and Federal agencies that may be used by public housing authorities. Any recommendations shall include estimated costs of such programs.

(f) Of the additional authority approved in appropriation Acts with respect to entering into annual contributions contracts under section 5(c) of the United States Housing Act of 1937 for the fiscal year beginning on October 1, 1978, the Secretary may utilize up to $12,000,000 of such authority in the fiscal year beginning on October 1, 1978, for the establishment of the public housing security demonstration program authorized by this section.

SECTION 8 HOUSING FOR LARGE FAMILIES

SEC. 208. (a) The Secretary of Housing and Urban Development shall conduct a study for the purposes of examining alternative means of encouraging the development of housing to be assisted under section 8 of the United States Housing Act of 1937 for occupancy by large families which reside in areas with a low-vacancy rate in rental housing.

(b) The Secretary shall report to the Congress, no later than one year after the date of enactment of this Act, for the purpose of providing legislative recommendations with respect to the study described in subsection (a).

SOLAR ENERGY SYSTEMS

SEC. 209. (a) It is the purpose of this section to promote and extend the application of viable solar energy systems as a desirable source of energy for residential single-family and multifamily housing units.

(b) (1) The Secretary, in carrying out programs and activities under section 312 of the Housing Act of 1964, section 202 of the Housing Act of 1959, and section 8 of the United States Housing Act of 1937, shall permit the installation of solar energy systems which are cost-effective and economically feasible.

(2) For the purpose of this Act, the term "solar energy system" means any addition, alteration, or improvement to an existing or new structure which is designed to utilize wind energy or solar energy either of the active type based on mechanically forced energy transfer or of the passive type based on convective, conductive, or radiant energy transfer or some combination of these types to reduce the energy requirements of that structure from other energy sources, and which is in conformity with such criteria and standards as shall be prescribed by the Secretary in consultation with the Secretary of Energy.

(c) In carrying out subsection (b), the Secretary shall take such steps as may be necessary to encourage the installation of cost-effective and economically feasible solar energy systems in housing assisted under the programs and activities referred to in such subsection taking into account the interests of low-income homeowners and renters, including the implementation of a plan of action to publicize the availability and feasibility of solar energy systems to current or potential recipients of assistance under such programs and activities.

(d) The Secretary shall, in conjunction with the Secretary of Energy, transmit to the Congress, within eighteen months after the date of enactment of this Act, a report setting forth—

(1) the number of solar units which were contracted for or installed or which are on order under the provisions of subsection (b) (1) of this section during the first twelve full calendar months after the date of enactment of this Act; and

(2) an analysis of any problems and benefits related to encouraging the use of solar energy systems in the programs and activities referred to in subsection (b).

TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS

EXTENSION OF FEDERAL HOUSING ADMINISTRATION MORTGAGE INSURANCE PROGRAMS

SEC. 301. (a) Section 2(a) of the National Housing Act is amended by striking out "November 1, 1978" in the first sentence and inserting in lieu thereof "October 1, 1979".

(b) Section 217 of such Act is amended by striking out October 31, 1978" and inserting in lieu thereof "September 30, 1979".

(c) Section 221(f) of such Act is amended by striking out "October 31, 1978" in the fifth sentence and inserting in lieu thereof "September 30, 1979".

(d) Section 235(m) of such Act is amended by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1979".

(e) Section 236(n) of such Act is amended by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1979".

(f) Section 244(d) of such Act is amended—

(1) by striking out "October 31, 1978" in the first sentence and inserting in lieu thereof "September 30, 1979"; and

(2) by striking out "November 1, 1978" in the second sentence and inserting in lieu thereof "October 1, 1979".

(g) Section 245 of such Act is amended by striking out "October 31, 1978" in the third sentence and inserting in lieu thereof "September 30, 1979".

(h) Section 809(f) of such Act is amended by striking out "October 31, 1978" in the second sentence and inserting in lieu thereof "September 30, 1979".

(i) Section 810(k) of such Act is amended by striking out "October 31, 1978" in the second sentence and inserting in lieu thereof "September 30, 1979".

(j) Section 1002(a) of such Act is amended by striking out "October 31, 1978" in the second sentence and inserting in lieu thereof "September 30, 1979".

(k) Section 1101(a) of such Act is amended by striking out "October 31, 1978" in the second sentence and inserting in lieu thereof "September 30, 1979".

EXTENSION OF FLEXIBLE INTEREST RATE AUTHORITY

SEC. 302. Section 3(a) of the Act entitled "An Act to amend chapter 37 of title 38 of the United States Code with respect to the veterans' home loan program, to amend the

National Housing Act with respect to interest rates on insured mortgages, and for other purposes", approved May 7, 1968, as amended, is amended by striking out "November 1, 1978" and inserting in lieu thereof "October 1, 1979".

EXTENSION OF EMERGENCY HOME PURCHASE ASSISTANCE ACT OF 1974

SEC. 303. Section 3(b) of the Emergency Home Purchase Assistance Act of 1974 is amended by striking out "November 1, 1978" and inserting in lieu thereof "October 1, 1979".

COMPREHENSIVE PLANNING

SEC. 304. (a) The second sentence of section 701(e) of the Housing Act of 1954 is amended by striking out "and not to exceed $75,000,000 for the fiscal year 1978" and inserting in lieu thereof "not to exceed $75,000,000 for the fiscal year 1978, and not to exceed $57,000,000 for the fiscal year 1979".

(b) The second sentence of section 701(c) of such Act is amended by striking out "biennially" and inserting in lieu thereof "triennially".

(c) Section 701(d)(2) of such Act is amended by striking out "biennially" and inserting in lieu thereof "at least triennially" and by striking out "two" and inserting in lieu thereof "three".

(d) Section 701(m) of such Act is amended by adding at the end thereof the following:

"(5) The term 'Indian tribal group or body' means any Indian tribe, band, group, and nation, including Alaska Indians, Aleuts, and Eskimos, and any Alaskan Native Village, of the United States, which is considered an eligible recipient under the Indian Self-Determination and Education Assistance Act (Public Law 93-638) or under the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512).".

RESEARCH AUTHORIZATIONS

SEC. 305. (a) Title V of the Housing and Urban Development Act of 1970 is amended by striking out in the second sentence of section 501 "and not to exceed $60,000,000 for the fiscal year 1978" and inserting in lieu thereof "not to exceed $60,000,000 for the fiscal year 1978, and not to exceed $62,000,000 for the fiscal year 1979".

(b) Such title is further amended by adding at the end thereof the following new section:

"CONVERSIONS

"SEC. 510. In carrying out activities under section 501, the Secretary is authorized to conduct demonstrations to determine the feasibility of expanding homeownership opportunities in urban areas and encouraging the creation and maintenance of decent, safe, and sanitary housing in such areas by utilizing techniques including, but not limited to, the conversion of multifamily housing properties to condominium or cooperative ownership by individuals and families.".

(c) The Secretary of Housing and Urban Development shall conduct a study of the feasibility of underground construction of residential housing and changes in housing codes and financing which may be necessary as the result of the adoption of this construction method. The Secretary shall transmit a final report no later than one year after the date of enactment of this Act to the Congress containing the findings and conclusions made as a result of such study, along with any legislative recommendations which the Secretary determines should be enacted with respect to the subject of such study.

NEW COMMUNITIES

SEC. 306. Section 720(a) of the Housing and Urban Development Act of 1970 is amended by striking out "November 1, 1978" and inserting in lieu thereof "October 1, 1979".

EXTENSION OF CRIME INSURANCE AND RIOT REINSURANCE PROGRAMS

SEC. 307. (a) Section 1201 of the National Housing Act is amended—

(1) by striking out, in subsection (b)(1), "October 31, 1978" and inserting in lieu thereof "September 30, 1980";

(2) by striking out, in subsection (b)(1)(A), "October 31, 1981" and inserting in lieu thereof "September 30, 1983"; and

(3) by striking out, in subsection (b)(2), "October 31, 1978" and inserting in lieu thereof September 30, 1981".

(b) Section 1211 of such Act is amended by adding the following new subsection at the end thereof:

"(c) At least one-third of the voting members of every board of directors, board of governors, advisory committee, and other governing or advisory board or committee for each plan described in subsection (b) shall be individuals who are not employed by, or otherwise affiliated with, insurers, insurance agents, brokers, producers, or other entities of the insurance industry.".

(c) Section 1211(b) of such Act is amended by striking out "and" at the end of paragraph (9), by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and", and by adding the following new paragraph at the end thereof:

"(11) Notwithstanding any other provision of this section, on and after January 31, 1979, no risk within the plan shall be insured at a rate higher than the rates or advisory rates set by the principal State-licensed rating organization for essential property insurance in the voluntary market; except that this provision shall not be deemed to prohibit the application to any such risk, on a nondiscriminatory basis, of condition charges for substandard physical conditions within the control of the applicant for insurance as set by the principal State-licensed rating organization for the voluntary market.".

EXTENSION OF NATIONAL FLOOD INSURANCE PROGRAM

SEC. 308. (a) Section 1319 of the National Flood Insurance Act of 1968 is amended by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1980".

(b) Section 1336(a) of such Act is amended by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1980".

FLOOD INSURANCE STUDIES

SEC. 309. Section 1376(c) of the National Flood Insurance Act of 1968 is amended by striking out "and not to exceed $108,000,000 for the fiscal year 1978" and inserting in lieu thereof the following: ", not to exceed $108,000,000 for the fiscal year 1978, and not to exceed $114,000,000 for the fiscal year 1979.".

FEDERAL HOUSING ADMINISTRATION GENERAL INSURANCE FUND

SEC. 310. Section 519(f) of the National Housing Act is amended by inserting the following before the period: ", which amount shall be increased by $165,000,000 on October 1, 1978".

MULTIFAMILY MORTGAGE INSURANCE

SEC. 311. (a) The last sentence of section 207(c) of the National Housing Act is amended by striking out "eight" and inserting in lieu thereof "five".

(b) Section 241(d) of such Act is amended by adding at the end thereof the following: "At any sale under foreclosure of a mortgage on a project or facility which is not insured under this Act but which is senior to a loan assigned to the Secretary pursuant to subsection (c), the Secretary is authorized to bid, in addition to amounts authorized under section 207(k), any sum up to but not in excess of the total unpaid indebtedness secured by such senior mortgage, plus taxes, insurance, foreclosure costs, fees, and other expenses. In the event that, pursuant to subsection (c), the Secretary acquires title to, or is assigned, a loan covering a project or facility which is subject to a mortgage which is not insured under this Act, the Secretary is authorized to make payments from the General Insurance Fund on the debt secured by such mortgage, and to take such other steps as the Secretary may deem appropriate to preserve or protect the Secretary's interest in the project or facility.".

MORTGAGE INSURANCE FOR NONRESIDENT CARE FACILITIES

SEC. 312. (a) Section 232(a) of the National Housing Act is amended—

(1) by inserting the following immediately before the period at the end of paragraph (1): ", including additional facilities for the nonresident care of elderly individuals and others who are able to live independently but who require care during the day"; and

(2) by inserting the following immediately before the period at the end of paragraph (2): ", including additional facilities for the nonresident care of elderly individuals and others who are able to live independently but who require care during the day".

(b) Section 232(b)(2) of such Act is amended by inserting immediately after "nursing services;" in the first sentence the following: "(3) a 'nursing home' or 'intermediate care facility' may include such additional facilities as may be authorized by the Secretary for the nonresident care of elderly individuals and others who are able to live independently but who require care during the day;".

CONDOMINIUM MORTGAGE INSURANCE

SEC. 313. (a) The first sentence of section 234(c) of the National Housing Act is amended by inserting immediately after "less units" in the proviso of clause (2) the following: ", or twelve or more units in the case of a multi-family project the construction of which was completed more than a year prior to the application for mortgage insurance,".

(b) The third sentence of section 234(c) of such Act is amended by inserting "(100 per centum if the mortgagor is a veteran as defined under section 203(b)(2) of this Act)" after "centum" in clause (A)(i).

PURCHASE OF FEE SIMPLE TITLE

SEC. 314. Section 240(c)(2) of the National Housing Act is amended by adding "($30,000, if the property is located in Hawaii)" immediately after "$10,000".

NATIONAL NEIGHBORHOOD POLICY ACT

SEC. 315. The National Neighborhood Policy Act is amended by striking out "one year in section 204(c) and inserting in lieu thereof "fifteen months".

HOUSING AND URBAN DEVELOPMENT DAY CARE CENTER FACILITIES

SEC. 316. Section 7(n) of the Department of Housing and Urban Development Act is amended to read as follows:

"(n) Notwithstanding any other provision of law, the Secretary is authorized by contract or otherwise to establish, equip, and operate a day care center facility or facilities, or to assist in establishing, equipping, and operating interagency day care facilities for the purpose of serving children who are members of households of employes of the Department. The Secretary is authorized to establish or provide for the establishment of appropriate fees and charges to be chargeable against the Department of Housing and Urban Development employees or others who

are beneficiaries of services provided by any such day care center. In addition, limited start-up costs may be provided by the Secretary in an amount limited to 3 per centum of the first year's operating budget, but not to exceed $3,500.".

SALE OF SURPLUS FEDERAL LAND FOR HOUSING

SEC. 317. (a) The first and second sentences of section 414(a) of the Housing and Urban Development Act of 1969 are amended to read as follows: "Notwithstanding the provisions of the Federal Property and Administrative Services Act of 1949, any Federal surplus real property within the meaning of such Act may, in the discretion of the Administrator of General Services, be transferred to the Secretary of Housing and Urban Development at the Secretarys request for sale or lease by the Secretary at its fair value for use in the provision of housing to be occupied predominantly by families or individuals of low and moderate income, assisted under a Federal housing assistance program administered by the Secretary or under a State or local program found by the Secretary to have the same general purpose, and for related public commercial or industrial facilities approved by the Secretary. Prior to any disposition of Federal surplus real property to an entity other than a public body, the Secretary shall notify the governing body of the locality where such property is located of the proposed disposition and no such disposition shall be made if the local governing body, within ninety days of such notification, formally advises the Secretary that it objects to the proposed disposition, unless the Secretary determines (1) that the proposed disposition would be consistent with any approved housing assistance and community development plans developed by such body pursuant to the Housing and Community Development Act of 1974, or (2) in cases where such plans are not available, that there is a need for low- and moderate-income housing taking into consideration any applicable State housing plans, and that there is or will be available in the area public facilities and services adequate to serve any housing proposed in conjunction with the proposed disposition.".

(b) Subsection (b) of section 414 of such Act is amended to read as follows:

"(b) As a condition of any disposition by the Secretary of Federal surplus real property under this section to an entity other than a public body, the Secretary shall obtain such undertakings as the Secretary may consider appropriate to assure that the property will be used, to the maximum practicable extent, in the provision of housing and related facilities to be occupied by families or individuals of low and moderate income for a period of not less than thirty years. If during such period the property is used for any purpose other than the purpose for which it was disposed of, it shall revert to the United States (or, in the case of leased property, the lease shall terminate) unless the Secretary and the Administrator, after the expiration of the first twenty years of such period, have approved the use of the property for such other purposes.".

INCREASE IN GOVERNMENT NATIONAL MORTGAGE ASSOCIATION MORTGAGE PURCHASE AUTHORITY AND LIMITS

SEC. 318. (a) The third clause of the proviso in section 302(b)(1) of the National Housing Act is amended by striking "if the original principal obligation thereof exceeds or exceeded $33,000 (or such higher amount not in excess of $38,000 as the Secretary may by regulation specify in any geographical area where he finds that cost levels so require), for each family residence or dwelling unit covered by the mortgage (plus an additional $2,500 for each such family residence or dwelling unit which has four or more bedrooms)" and inserting in lieu thereof "if the original principal obligation thereof exceeds or exceeded $55,000 in the case of property upon which is located a dwelling designed principally for a one-family residence; or $60,000 in the case of a two- or three-family residence; or $68,750 in the case of a four-family residence; or, in the case of a property containing more than four dwelling units, $38,000 per dwelling unit (or such higher amount not in excess of $45,000 per dwelling unit as the Secretary may by regulation specify in any geographical area where the Secretary finds that cost levels so require) for that part of the property attributable to dwelling use".

(b) Section 305(c) of such Act is amended by striking out "and by $2,000,000,000 on July 1, 1969" and inserting in lieu thereof "by $2,000,000,000 on July 1, 1969, and subject to approval in an appropriation Act, by $500,000,000 on October 1, 1978".

NATIONAL INSTITUTE OF BUILDING SCIENCES

SEC. 319. Section 809(h) of the Housing and Community Development Act of 1974 is amended by inserting after "1978" the following: ", and any amounts not appropriated in fiscal years 1977 and 1978 may be appropriated in any fiscal year through 1982".

TITLE I HOME IMPROVEMENT LOANS FOR MULTIFAMILY DWELLINGS

SEC. 320. The first sentence of section 2(b) of the National Housing Act is amended by striking out "$25,000", "$5,000", and "twelve years" in the third proviso in clause (3) and inserting in lieu thereof "$37,500", "$7,500", and "fifteen years", respectively.

AMENDMENTS TO THE FEDERAL HOME LOAN MORTGAGE CORPORATION ACT

SEC. 321. (a) Paragraph (1) of subsection 305 of the Federal Home Loan Mortgage Corporation Act is amended by inserting the following before the period at the end of the first sentence thereof: "or from any mortgagee approved by the Secretary of Housing and Urban Development for participation in any mortgage insurance program under the National Housing Act".

(b) Paragraph (1) of subsection (a) of section 305 of the Federal Home Loan Mortgage Corporation Act is amended by adding at the end thereof the following new sentences: "The Corporation may establish requirements, and impose charges or fees, which may be regarded as elements of pricing, for different classes of sellers or services, and for such purposes the Corporation is authorized to classify sellers or servicers according to type, size, location, assets, or, without limitation on the generality of the foregoing, on such other basis or bases of differentiation as the Corporation may consider necessary or appropriate to effectuate the purposes or provisions of this Act. The Corporation may specify requirements concerning, among other things, (A) minimum net worth; (B) suprevisory mechanisms; (C) warranty compensation mechanisms; (D) prior approval of facilities; (E) prior origination and servicing exeprience with respect to different types of mortgages; (F) capital contributions and substitutes; (G) mortgage purchase volume limits; and (H) reduction of mortgage purchases during periods of borrowing. With respect to any particular type of seller, the Corporation shall not be required to make available programs involving prior approval of mortgages, optional delivery of mortgages, and purchase of other than conventional mortgages to an extent greater than the Corporation elects to make such programs available to other types of eligible sellers. Any requirements specified by the Corporation pursuant to the preceding three sentences must bear a rational relationship to the purposes or provisions of this Act, but will not be considered discriminatory solely on the grounds of differential effects on types of eligible sellers. Insofar as is practicable, the Corporation shall make reasonable efforts to encourage participation in its programs by each type of eligible seller.".

(c) The amendments made by this section shall become effective at the end of the two hundred and ten calendar days after enactment of this Act, but not before January 31, 1979, or on such earlier date as the Federal Home Loan Mortgage Corporation may prescribe.

SALE OF ACQUIRED PROPERTY TO COOPERATIVES

SEC. 322. Section 246 of the National Housing Act is amended to read as follows:

"SALE OF ACQUIRED PROPERTY TO COOPERATIVES

"SEC. 246. In any case which the Secretary sells a multifamily housing project acquired as the result of a default on a mortgage which was insured under this Act to a cooperative which will operate it on a nonprofit basis and restrict permanent occupancy of its dwellings to members, or to a nonprofit corporation which operates as a consumer cooperative as defined by the Secretary, the Secretary may accept a purchase money mortgage, or upon application of the mortgagee, insure a mortgage under this section upon such terms and conditions as the Secretary determines are reasonable and appropriate, in a principal amount equal to the value of the property at the time of purchase, which value shall be based upon a mortgage amount on which the debt service can be met from the income of property when operated on a non-profit basis after payment of all operating expenses, taxes, and required reserves; except that the Secretary may add to the mortgage amount an amount not greater than the amount of prepaid expenses and costs involved in achieving cooperative ownership, or make such other provision for payment of such expenses and costs as the Secretary deems reasonable and appropriate. Prior to such disposition of a project, funds may be expended by the Secretary for necessary repairs and improvements.".

"SECONDARY MORTGAGES ON INSURED PROPERTIES

SEC. 323. Title V of the National Housing Act is amended by adding at the end thereof the following new section:

"SECONDARY MORTGAGES ON INSURED PROPERTIES

"SEC. 528. In carrying out the provisions of title II of this Act with respect to insuring mortgages secured by a one- to four-family dwelling unit, the Secretary may not deny such insurance for any such mortgage solely because the dwelling unit which secures such mortgage will be subject to a secondary mortgage or loan made or insured, or other secondary lien held, by any State or local governmental agency or instrumentality under terms and conditions approved by the Secretary.".

LEGISLATIVE REVIEW

SEC. 324. Section 7 of the Department of Housing and Urban Development Act is amended by adding at the end thereof the following new subsection:

"(o)(1) Notwithstanding any other provision of law, the Secretary shall transmit to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives an agenda of all rules or regulations which are under development or review by the Department. Such an agenda shall be transmitted to such Committees within 30 days of the date of enactment of this subsection and at least semiannually thereafter.

"(2)(A) Any rule or regulation which is on any agenda submitted under paragraph (1) may not be published for comment prior to or during the first period of 15 calendar days of continuous session of Congress which occurs after the date on which such agenda was transmitted. If within such period, either Committee notifies the Secretary in writing that it intends to review any rule or regulation or portion thereof which appears on the agenda, the Secretary shall submit to both Committees a copy of any such rule or regulation, in the form it is intended to be proposed, at least 15 calendar days of continuous session prior to its being published for comment in the Federal Register.

"(B) Any rule or regulation which has not been published for comment before the date of enactment of this subsection and which does not appear on an agenda submitted under paragraph (1) shall be submitted to both such Committees at least 15 calendar days of continuous session of Congress prior to its being published for comment.

"(3) No rule or regulation may become effective until after the first period of 20 calendar days of continuous session of Congress which occurs after the day on which such rule or regulation is published as final. If within such 20-day period, either Committee has reported out or been discharged from further consideration of a joint resolution of disapproval or other legislation which is intended to modify or invalidate the rule or regulation or any portion thereof, the rule or regulation or portion thereof so addressed shall not become effective for a period of 90 calendar days from the date of Committee action or discharge unless the House to which such Committee reports has rejected such resolution or legislation, in which case the rule or regulation may go into effect only after the expiration of the 20 calendar days described in the first sentence of this paragraph if the other House does not have such a resolution or legislation pending or adopted, and if the requirements of section 553 of title 5, United States Code, are met.

"(4) The provisions of paragraphs (2) and (3) may be waived upon the written request of the Secretary, if agreed to by the Chairmen and Ranking Minority Members of both Committees.

"(5) Congressional inaction on any rule or regulation shall not be deemed an expression of approval of the rule or regulation involved.

"(6) For purposes of this subsection—

"(A) continuity of session is broken only by an adjournment of Congress sine die;

"(B) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of calendar days of continuous session of Congress; and

"(C) the term 'rule or regulation' does not include the setting of interest rates pursuant to section 3 of Public Law 93-301.".

INCREASED MORTGAGE CEILINGS FOR MORTGAGE INSURANCE PROGRAMS

SEC. 325. (a) Section 221(d)(3)(ii) of the National Housing Act is amended—

(1) by striking out "$16,860", "$18,648", "$22,356", "$28,152", and "$31,884" and inserting in lieu thereof "$21,563", "$24,662", "$29,984", "$38,379", and "$42,756", respectively; and

(2) by striking out "$19,680", "$22,356", "$26,496", "$33,120", and "$38,400" and inserting in lieu thereof "$22,692", "$26,012", "$31,631", "$40,919", and "$44,917", respectively.

(b) Section 221(d)(4)(ii) of such Act is amended by striking out "$18,450", "$20,625", "$24,630", "$29,640", and "$34,846", in the matter preceding the first semicolon and inserting in lieu thereof "$19,406", "$22,028", "$26,625", "$33,420", and "$37,870", respectively.

FHA-INSURED MORTGAGE REFINANCING OF HOSPITALS

SEC. 326. Section 223(f) of the National Housing Act is amended by—

(1) inserting before the period at the end of the first sentence thereof the following: "or the refinancing of existing debt of an existing hospital.";

(2) striking out "property" in the second sentence and inserting in lieu thereof "multifamily housing project"; and

(3) adding at the end thereof the following new sentence:

"In the case of refinancing of an existing hospital the Secretary shall prescribe such terms and conditions as the Secretary deems necessary to assure that—

"(A) the refinancing is employed to lower the monthly debt service costs (taking into account any fees or charges connected with such refinancing) of such existing hospital;

"(B) the proceeds of any refinancing will be employed only to retire the existing indebtedness and pay the necessary cost of refinancing on such existing hospital;

"(C) such existing hospital is economically viable; and

"(D) such existing hospital has received such certifications from a State agency designated in accordance with section 604(a)(1) or section 1521 of the Public Health Service Act for the State in which the hospital is located as the Secretary deems necessary and appropriate and comparable to the certification required for hospitals insured under section 242 of this Act and that such State agency additionally certify that the services being provided by such existing hospital at the time of refinancing are appropriate as determined pursuant to section 1523(a)(6) of the Public Health Service Act.".

TITLE IV—CONGREGATE SERVICES

SHORT TITLE

SEC. 401. This title may be cited as the "Congregate Housing Services Act of 1978".

FINDINGS

SEC. 402. The Congress finds that—

(1) congregate housing, coordinated with the delivery of supportive services, offers an innovative, proven, and cost-effective means of enabling temporarily disabled or handicapped individuals to maintain their dignity and independence and to avoid costly and unnecessary institutionalization;

(2) a large and growing number of elderly and handicapped residents of public housing projects and of nonprofit projects for the elderly and handicapped face premature and unnecessary institutionalization because of the absence of or deficiencies in the availability, adequacy, coordination, or delivery of the supportive services required for the successful development of adequate numbers of congregate housing projects; and

(3) supplemental supportive services, available on a secure and continuing basis, are essential to a successful congregate housing program.

DEFINITIONS

SEC. 403. For the purpose of this title—

(1) the term "congregate housing" means (A) low-rent housing which, as of January 1, 1979, was built or under construction, with which there is connected a central dining facility where wholesome and economical meals can be served to such occupants; or (B) low-rent housing constructed after, but not under construction prior to, January 1, 1979, connected with which there is a central dining facility to provide wholesome and economical meals for such occupants;

(2) the term "congregate services programs" means programs to be undertaken by a public housing agency or a nonprofit corporation to provide assistance, including personal assistance and nutritional meals, to eligible project residents who, with such assistance, can remain independent and avoid unnecessary institutionalization;

(3) the term "elderly" means sixty-two years of age or over;

(4) the term "eligible project resident" means elderly handicapped individuals, nonelderly handicapped individuals, or temporarily disabled individuals, who are residents of congregate housing projects administered by a public housing agency or by a nonprofit corporation;

(5) the term "handicapped" means having an impairment which (A) is expected to be of long-continued and indefinite duration, and (B) substantially impedes an individual's ability to live independently unless the individual receives supportive congregate services; such impairment may include a functional disability or frailty which is a normal consequence of the human aging process;

(6) the term "personal assistance" means service provided under this title which may include, but is not limited to, aid given to eligible project residents in grooming, dressing, and other activities which maintain personal appearance and hygiene;

(7) the term "professional assessment committee" means a group of at least three persons appointed by a local public housing agency or a nonprofit corporation and shall include qualified medical professionals and other persons professionally competent to appraise the functional abilities of elderly or permanently disabled adult persons, or both, in relation to the performance of the normal tasks of daily living;

(8) the term "temporarily disabled" means an impairment which (A) is expected to be of no more than six months' duration, and (B) substantially impedes an individual's ability to live independently unless the individual receives supportive congregate services; and

(9) the term "nonprofit corporation" means any corporation responsible for a housing project assisted under section 202 of the Housing Act of 1959.

AUTHORIZATION TO ENTER INTO CONTRACTS

SEC. 404. The Secretary of Housing and Urban Development (hereinafter referred to as the "Secretary") is authorized to enter into contracts with local public housing agencies under the United States Housing Act of 1937 (hereinafter referred to as "public housing agencies") and with nonprofit corporations, utilizing sums appropriated under this title, to provide congregate services programs for eligible project residents in order to promote and encourage maximum independence within a home environment for such residents capable of self-care with appropriate supportive congregate services. Each contract between the Secretary and a public housing agency or nonprofit corporation shall be for a term of not less than three years or more than five years and shall be renewable at the expiration of such term. Each public housing agency or nonprofit corporation entering into such a contract shall be reserved a sum equal to its total approved contract amount from the moneys authorized and appropriated for the fiscal year in which the notification date of funding approval falls.

CONGREGATE SERVICES PROGRAM

SEC. 405. (a) Congregate services programs assisted under this title must include full meal service adequate to meet nutritional

needs, and may also include housekeeping aid, personal assistance, and other services essential for maintaining independent living.

(b) No services funded under this title may duplicate services which are already affordable, accessible, and sufficiently available on a long-term basis to eligible project residents under programs administered by or receiving appropriations through any department, agency, or instrumentality of the Federal Government or any other public or private department, agency, or organization.

(c) A public housing agency or nonprofit corporation applying for assistance shall consult with the Area Agency on Aging (or, where no Area Agency on Aging exists, with the appropriate State agency under the Older Americans Act of 1965) in determining the means of providing services under this title and in identifying alternative available sources of funding for such services.

(d) Prior to the submission of a final application for either new or renewed funding under this title, a public housing agency and a nonprofit corporation shall present a copy of a proposed application to the Area Agency on Aging (or, where no Area Agency on Aging exists, to the appropriate State agency under the Older Americans Act of 1965) for review and comment. Such agency and nonprofit corporation shall consider such review and comment in the development of any final application for either new or renewed funding under this title.

(e)(1) When nonelderly handicapped individuals are included among the eligible project residents, the public housing agency and nonprofit corporation shall consult with the appropriate local agency, if any, designated by applicable State law as having responsibility for the development, provision, or identification of social services to permanently disabled adults, for the purpose of determining the means of providing services under this title and of identifying alternative available sources of funding for such services.

(2) Such public housing agency and nonprofit corporation shall also, prior to the submission of a final application for either new or renewed funding under this title, present a copy of the proposed application to such appropriate local agency for review and comment. The public housing agency and nonprofit corporation shall consider such review and comment in the development of any final application for either new or renewed funding under this title.

(f) Any nonprofit corporation or public housing agency receiving assistance under this title may provide congregate services directly to eligible project residents or may, by contract or lease, provide such services through other appropriate agencies or providers.

(g) Nonprofit corporations and public housing agencies receiving assistance for congregate services programs under this title shall be required to maintain the same dollar amount of annual contribution which they were making, if any, in support of the provision of services eligible for assistance under this title before the date of the submission of the application for such assistance unless the Secretary determines that the waiver of this requirement is necessary for the maintenance of adequate levels of services to eligible project residents. If any contract or lease entered into by a public housing agency or nonprofit corporation pursuant to subsection (f) of this section provides for adjustments in payments for services to reflect changes in the cost of living, then the amount of annual contribution required to be maintained by such public agency or nonprofit corporation under the preceding sentence shall be readjusted in the same manner.

(h) Each nonprofit corporation and public housing agency shall establish fees for meal service and other appropriate services provided to eligible project residents. These fees shall be reasonable, may not exceed the cost of providing the service, and shall be calculated on a sliding scale related to income which permits the provision of services to such residents who cannot afford meal and service fees. When meal services are provided to other project residents, fees shall be reasonable and may not exceed the cost of providing the meal service.

(i) The Secretary shall establish standards for the provision of services under this title, and, in developing such service standards, the Secretary shall consult with the Secretary of the Department of Health, Education, and Welfare and with appropriate organizations representing the elderly and handicapped, as determined by the Secretary.

ELIGIBILITY FOR SERVICES

SEC. 406. (a) The identification of project residents eligible to participate in a congregate services program assisted under this title, and the designation of the services appropriate to their individual functional abilities and needs, shall be made by a professional assessment committee. Such committee shall utilize procedures which insure that the process of determining eligibility of individuals for services under this title shall accord such individuals fair treatment and due process and a right of appeal of such determination of eligibility, and shall also assure the confidentiality of personal and medical records.

(b) Other residents may participate in a congregate meal service program assisted under this title if the local public housing agency or nonprofit corporation determines that the participation of these individuals will not adversely affect the cost-effectiveness or operation of the program.

(c) Any public housing agency or nonprofit corporation receiving assistance under this title shall notify the Secretary of any change in the membership of the professional assessment committee within thirty days of such change. Such notification shall list the names and professional qualifications of new members of the committee.

(d) Procedures shall be established to insure that changes in the membership of the professional assessment committee are consistent with the requirements of section 403 (7) of this title.

APPLICATION PROCEDURES

SEC. 407. (a) An application for assistance under this title shall include—

(1) a plan specifying the types and priorities of the basic services the public housing agency or nonprofit corporation proposes to provide during the term of the contract; such plan must be related to the needs and characteristics of the eligible project residents and, to the maximum extent practicable, provide for the changing needs and characteristics of all project residents; such plan shall be determined after consultation with eligible project residents and with the professional assessment committee;

(2) a list of names and professional qualifications of the members of the professional assessment committee;

(3) the fee schedule established pursuant to section 405(h) of this title;

(4) any comment received in connection with any review of a proposed application pursuant to section 405(d) or 405(e)(2); and

(5) a statement affirming (A) that the nonprofit corporation or public housing agency has followed the consultation procedures required in subsections (c), (d), and (e) of section 405, and (B) that such application complies with subsection (b) of such section.

(b) The Secretary shall establish appropriate deadlines for each fiscal year for the submission of applications for funding under this title and shall notify any public housing agency and nonprofit corporation applying for assistance under this title of acceptance or rejection of its application within ninety days of such submission.

(c) Within twelve months prior to the submission of an application for renewed funding under this title, each nonprofit corporation and public housing agency shall review the performance, appropriateness, and fee schedules of their congregate services program with eligible project residents and with the professional assessment committee. The results of such review shall be included in any application for renewal and shall be considered in the development of the application for renewal by the nonprofit corporation or public housing agency and in its evaluation by the Secretary.

EVALUATION OF APPLICATION AND PROGRAMS

SEC. 408. (a) In evaluating applications for assistance under this title, the Secretary shall consider—

(1) the types and priorities of the basic services proposed to be provided, and the relationship of such proposal to the needs and characteristics of the eligible residents of the projects where the services are to be provided;

(2) how quickly services will be established following approval of the application;

(3) the degree to which local social services are adequate for the purpose of assisting eligible project residents to maintain independent living and avoid unnecessary institutionalization;

(4) the professional qualifications of the members of the professional assessment committee; and

(5) the reasonableness of fee schedules established for each congregate service.

(b) In evaluating programs receiving assistance under this title, the Secretary shall—

(1) establish procedures for the review and evaluation of the performance of nonprofit corporations and public housing agencies receiving assistance under this title, including provisions for the submission of an annual report, by each such nonprofit corporation and public housing agency, which evaluates the impact and effectiveness of its congregate services program; and

(2) publish annually and submit to the Congress, a report on and evaluation of the impact and effectiveness of congregate services programs assisted under this title. Such report and evaluation shall be based, in part, on the evaluations required to be submitted pursuant to paragraph (1).

FUNDING PROCEDURES

SEC. 409. (a) The Secretary shall establish procedures—

(1) to assure timely payments to nonprofit corporations and public housing agencies for approved assisted congregate services programs with provision made for advance funding sufficient to meet necessary startup costs;

(2) to permit reallocation of funds approved for the establishment of congregate services in existing public housing projects and projects assisted under section 202 of the Housing Act of 1959 if the services are not established within six months of the notification date of funding approval;

(3) to assure that where such funding has been approved for the establishment of congregate services for public housing projects and projects assisted under section 202 of the Housing Act of 1959 under construction or approved for construction, these services

shall be in place at the start of the project's occupancy by tenants requiring such services for maintaining independent living;

(4) to establish accounting and other standards in order to prevent any fraudulent or inappropriate use of funds under this title; and

(5) to assure that no more than 1 per centum of the funds appropriated under this title for any fiscal year may be used by public housing agencies and nonprofit corporations for evaluative purposes as required by section 408(b)(1).

(b) The Secretary shall establish a reserve fund, not to exceed 10 per centum of the funds appropriated in each fiscal year for the provision of services under this title, in order to supplement grants awarded to public housing agencies and nonprofit corporations under this title when, in the determination of the Secretary, such supplemental adjustments are required to maintain adequate levels of services to eligible project residents.

MISCELLANEOUS PROVISIONS

SEC. 410. (a) Each public housing agency and nonprofit corporation shall, to the maximum extent practicable, utilize elderly and permanently disabled adult persons who are residents of public housing projects or projects assisted under section 202 of the Housing Act of 1959, but who are not eligible project residents, to participate in providing the services assisted under this title. Such persons shall be paid wages which shall not be lower than whichever is the highest of—

(1) the minimum wage which would be applicable to the employee under the Fair Labor Standards Act of 1938, if section 6(a)(1) of such Act applied to the resident and if he or she were not exempt under section 13 thereof;

(2) the State or local minimum wage for the most nearly comparable covered employment; or

(3) the prevailing rates of pay for persons employed in similar public occupations by the same employer.

(b) No service provided to a public housing resident or to a resident of a housing project assisted under section 202 of the Housing Act of 1959 under this title, except for wages paid under subsection (a) of this section, may be treated as income for the purpose of any other program or provision of State or Federal law.

(c) Individuals receiving services assisted under this title shall be deemed to be residents of their own households, and not to be residents of a public institution, for the purpose of any other program or provision of State or Federal law.

(d) The Secretary may issue regulations to carry out the provisions of this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 411. (a) To carry out the provisions of this title, there are authorized to be appropriated—

(1) for fiscal year 1979, not to exceed $20,000,000;

(2) for fiscal year 1980, not to exceed $25,000,000;

(3) for fiscal year 1981, not to exceed $35,000,000; and

(4) for fiscal year 1982, not to exceed $40,000,000.

(b) Sums appropriated pursuant to this section shall remain available until expended.

AMENDMENT TO THE UNITED STATES HOUSING ACT OF 1937

SEC. 412. Section 7 of the United States Housing Act of 1937 is amended by striking out the second sentence and inserting in lieu thereof the following: "As used in this section, the term 'congregate housing' means (1) low-rent housing which, as of January 1, 1979, was built or under construction, with which there is connected a central dining facility where wholesome and economical meals can be served to such occupants; or (2) low-rent housing constructed after, but not under construction prior to, January 1, 1979, connected with which there is a central dining facility to provide wholesome and economical meals for such occupants. Such occupants of congregate housing may also be provided with other supportive services appropriate to their needs under title IV of the Housing and Community Development Amendments of 1978."

TITLE V—RURAL HOUSING

AUTHORIZATIONS

SEC. 501. (a) Section 513(b) of the Housing Act of 1949 is amended by inserting after "October 31, 1978" the following: ", and not to exceed $48,000,000 for the fiscal year ending September 30, 1979."

(b) Section 513(c) of such Act is amended by inserting before the semicolon at the end thereof the following: ", and not to exceed $38,000,000 for the fiscal year ending September 30, 1979".

(c) Section 513 of such Act is amended by striking out clause (d) and inserting in lieu thereof the following: "(d) not to exceed $10,000,000 for research and study programs pursuant to subsections (b), (c), and (d) of section 506 for the fiscal year ending September 30, 1979;".

(d) Section 514 of such Act is amended by striking out "$25,000,000" in subsection (d) and inserting in lieu thereof "$38,000,000 (subject to approval in an appropriation Act)".

(e) Section 515(b)(5) of such Act is amended by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1979".

(f) Section 517(a)(1) of such Act is amended by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1979".

(g) Section 523(f) of such Act is amended—

(1) by striking out "November 1, 1978" and inserting in lieu thereof "October 1, 1979";

(2) by striking out "October 31, 1978"; and inserting in lieu thereof "September 30, 1979"; and

(3) by striking out "$10,000,000" and inserting in lieu thereof "$16,500,000".

(h) Section 523(g) of such Act is amended by inserting before the period at the end of the first sentence the following: ", and not to exceed $3,000,000 for the fiscal year ending September 30, 1979".

(i) Section 525(c) of such Act is amended by inserting after the first sentence the following new sentence: "There are also authorized to be appropriated for the fiscal year ending September 30, 1979, not to exceed $5,000,000 for the purpose of subsection (a) and not to exceed $5,000,000 for the purpose of subsection (b).".

RURAL HOUSING RESEARCH

SEC. 502. (a) Subsection (b) of section 506 of the Housing Act of 1949 is amended to read as follows:

"(b) The Secretary is further authorized and directed to conduct research, technical studies, and demonstrations relating to the mission and programs of the Farmers Home Administration and the national housing goals defined in section 2 of this Act. In connection with such activities, the Secretary shall seek to promote the construction of adequate farm and other rural housing, with particular attention to the housing needs of the elderly, handicapped, migrant and seasonal farmworkers, Indians, and other identifiable groups with special needs. The Secretary shall conduct such activities for the purposes of stimulating construction and improving the architectural design and utility of dwellings and buildings.".

(b) Section 506 of such Act is amended by adding the following new subsection at the end thereof:

"(f)(1) The Secretary shall conduct a study of housing which is available for migrant and settled farmworkers. In conducting such study, the Secretary shall—

"(A) determine the location, number, quality, and condition of housing units which are available to such farmworkers and the cost assessed such farmworkers for occupying such units;

"(B) recommended legislative, administrative, and other action (including the need for new authority for such action) which may be taken for the purpose of improving both the availability and the condition of such housing units; and

"(C) determine the possible roles which individual farmworkers, farmworker associations, individual farmers, farmer associations, and public and private nonprofit agencies can perform in improving the housing conditions of farmworkers.

"(2) The Secretary shall transmit the results of the study described in paragraph (1) to each House of the Congress within one year after the date of the enactment of this subsection.".

APPEALS PROCEDURES

SEC. 503. Section 510 of the Housing Act of 1949 is amended by redesignating paragraphs (g), (h), and (i) as paragraphs (h), (i), and (j), respectively, and by inserting the following new paragraph after paragraph (f):

"(g) issue rules and regulations which assure that applicants denied assistance under this title or persons or organizations whose assistance under this title is being substantially reduced or terminated are given written notice of the reasons for denial, reduction or termination and are provided at least an opportunity to appeal an adverse decision and to present additional information relevant to that decision to a person, other than the person making the original determination, who has authority to reverse the decision;".

DOMESTIC FARM LABOR HOUSING

SEC. 504. Section 514 of the Housing Act of 1949 is amended by adding at the end thereof the following:

"(g) The Secretary may waive the interest rate limitation contained in subsection (a)(2) and the requirement of section 501(c)(3) in any case in which the Secretary determines that qualified public or private nonprofit sponsors are not currently available and are not likely to become available within a reasonable period of time and such waiver is necessary to permit farmers to provide housing and related facilities for migrant domestic farm laborers, except that the benefits resulting from such waiver shall accrue to the tenants, and the interest rate on a loan insured under this section and for which the Secretary permits such waiver shall be no less than one-eighth of 1 per centum above the average interest rate on notes or other obligations which are issued under section 511 and have maturities comparable to such a loan.".

SPONSORS PRIORITY

SEC. 505. Section 516(e) of the Housing Act of 1949 is amended by adding at the end thereof the following: "The Secretary shall not give priority for funding under this section to any one of the groups listed in subsection (a) over any of the others so listed.".

ASSISTANCE TO PERSONS RECEIVING LOANS TO PROVIDE OCCUPANT-OWNED, RENTAL, AND COOPERATIVE HOUSING

SEC. 506. (a) Section 521(a)(1) of the Housing Act of 1949 is amended—

(1) by inserting "(A)" after "SEC. 521. (a) (1)";

(2) by striking out everything in the first sentence after "one-eighth of 1 per centum" and inserting in lieu thereof a period; and

(3) by inserting the following at the end thereof:

"(B) From the interest rate so determined, the Secretary may provide the borrower with assistance in the form of credits so as to reduce the effective interest rate to a rate not less than 1 per centum per annum for such periods of time as the Secretary may determine for applicants described in subparagraph (A) if without such assistance such applicants could not afford the dwelling or make payments on the indebtedness of the rental or cooperative housing.

"(C) For persons of low income under section 502 or 517(a) who the Secretary determines are unable to afford a dwelling with the assistance provided under subparagraph (B) and when the Secretary determines that assisted rental housing programs (as authorized under this title, the National Housing Act, and the United States Housing Act of 1937) would be unsuitable in the area in which such persons reside, the Secretary may provide additional assistance, pursuant to amounts approved in appropriation Acts and for such periods of time as the Secretary may determine, which may be in an amount not to exceed the difference between (i) the amount determined by the Secretary to be necessary to pay the principal indebtedness, interest, taxes, insurance, utilities, and maintenance, and (ii) 25 per centum of the income of such applicant.

"(D) With respect to borrowers under section 502 or 517(a) who have received assistance under subparagraph (B) or (C), the Secretary shall provide for the recapture of all or a portion of such assistance rendered upon the disposition or nonoccupancy of the property by the borrower. In providing for such recapture, the Secretary shall make provisions to provide incentives for the borrower to maintain the property in a marketable condition. Notwithstanding any other provision of law, any such assistance whenever rendered shall constitute a debt secured by the security instruments given by the borrower to the Secretary to the extent that the Secretary may provide for recapture of such assistance.

"(E) Except for Federal or State laws relating to taxation, the assistance rendered to any borrower under subparagraphs (B) and (C) shall not be considered to be income or resources for any purpose under any Federal or State laws including, but not limited to, laws relating to welfare and public assistance programs.

"(F) Loans subject to the interest rates and assistance provided under this paragraph (1) may be made only when the Secretary determines the needs of the applicant for necessary housing cannot be met with financial assistance from other sources including assistance under the National Housing Act and the United States Housing Act of 1937.

"(G) Interest on loans under section 502 or 517(a) to victims of a natural disaster shall not exceed the rate which would be applicable to such loans under section 502 without regard to this section.

"(H) The aggregate principal amount of loans made to borrowers receiving assistance pursuant to subparagraph (C) shall not exceed $440,000,000.".

(b) Section 517(j) of such Act is amended by striking out "(2)" in paragraph (4).

RURAL RENTAL ASSISTANCE

SEC. 507. Section 521(a)(2)(A) of the Housing Act of 1949 is amended—

(1) by striking out "the owners" in the first sentence and inserting in lieu thereof "public and private nonprofit owners";

(2) by inserting "congregate, or cooperative" after "rental" the second time it appears in the first sentence; and

(3) by inserting ", by a loan under section 514," immediately after "section 515 for elderly or handicapped housing" in clause (i) of the second sentence.

STUDY OF EMERGENCY POTABLE WATER AND SEWAGE PROGRAM

SEC. 508. (a) The Secretary of Agriculture shall—

(1) carry out a study to determine the approximate number of rural housing units without access to sanitary toilet facilities, potable water, or access to both sanitary toilet facilities and potable water, as defined under regulations established by the Secretary; and

(2) prepare a projection of the cost of implementing an emergency program to provide sanitary toilet facilities and potable water supplies for all such housing units over a two-year period.

(b) Not later than six months after the date of enactment of this Act, the Secretary of Agriculture shall report to the Congress the results of the study and projection under subsection (a).

STUDY OF PROBLEMS CAUSED BY REMOTE CLAIMS

SEC. 509. (a) The Secretary of Agriculture (hereafter referred to in this section as "Secretary") shall make a detailed study of the problems associated with obtaining title insurance by persons in rural areas with respect to real property encumbered by remote claims or other remote encumbrances which prevent such persons from receiving the full benefit of the use of such property, including the benefit of assistance provided under this title. The Secretary shall, in making such study, consider and develop findings and conclusions with respect to—

(1) the extent of such problems as they pertain to the lawful rights of such persons;

(2) the location and amount of land affected by such problems;

(3) the nature, extent, and effectiveness of remedies to such problems presently available, or proposed, under State law;

(4) the potential impact (with respect to existing Federal, State, and local laws) of such remote claims and encumbrances and of any reasonable remedies determined necessary for resolving the problems created for persons by such remote claims or encumbrances;

(5) the liability and losses which might accrue to the Federal Government as a result of each of the remedies considered in the study conducted under this section; and

(6) other issues which the Secretary determines shall be considered, after consulting with the Secretary of Housing and Urban Development.

(b) Not later than March 1, 1979, the Secretary shall transmit to the Congress an interim report on the study conducted under this section. In addition, the Secretary shall, not later than one year after the date of the enactment of this Act, transmit a final report to the Congress. Such final report shall contain the findings and conclusions of the Secretary with respect to the study made under this section. In addition, such final report shall include—

(1) recommendations for Federal legislative actions necessary to implement reasonable remedies to the problems studied under this section; and

(2) recommendations for legislative actions which may be undertaken by State and local governments for the purposes of providing such remedies.

TITLE VI—NEIGHBORHOOD REINVESTMENT CORPORATION

SHORT TITLE

SEC. 601. This title may be cited as the "Neighborhood Reinvestment Corporation Act".

FINDINGS AND PURPOSE

SEC. 602. (a) The Congress finds that—

(1) the neighborhood housing services demonstration of the Urban Reinvestment Task Force has proven its worth as a successful program to revitalize older urban neighborhoods by mobilizing public, private, and community resources at the neighborhood level; and

(2) the demand for neighborhood housing services programs in cities throughout the United States warrants the creation of a public corporation to institutionalize and expand the neighborhood housing services program and other programs of the present Urban Reinvestment Task Force.

(b) The purpose of this title is to establish a public corporation which will continue the joint efforts of the Federal financial supervisory agencies and the Department of Housing and Urban Development to promote reinvestment in older neighborhoods by local financial institutions working cooperatively with community poeple and local government, and which will continue the nonbureaucratic approach of the Urban Reinvestment Task Force, relying largely on local initiative for the specific design of local programs.

ESTABLISHMENT OF CORPORATION

SEC. 603. (a) There is established a National Neighborhood Reinvestment Corporation (hereinafter referred to as the "corporation") which shall be a body corporate and shall possess the powers, and shall be subject to the direction and limitations specified herein.

(b) The corporation shall implement and expand the demonstration activities carried out by the Urban Reinvestment Task Force.

(c) The corporation shall maintain its principal office in the District of Columbia or at such other place the corporation may from time to time prescribe.

(d) The corporation, including its franchise, activities, assets, and income, shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority, except that any real property of the corporation shall be subject to State, territorial, county, municipal, or local taxation to the same extent according to its value as other real property is taxed.

BOARD OF DIRECTORS; ESTABLISHMENT

SEC. 604. (a) The corporation shall be under the direction of a board of directors made up of the following members:

(1) the Chairman of the Federal Home Loan Bank Board;

(2) the Secretary of Housing and Urban Development;

(3) a member of the Board of Governors of the Federal Reserve System, to be designated by the Chairman of the Board of Governors of the Federal Reserve System;

(4) the Chairman of the Federal Deposit Insurance Corporation;

(5) the Comptroller of the Currency; and

(6) the Administrator of the National Credit Union Administration.

(b) The Board shall elect from among its members a chairman who shall serve for a term of two years, except that the Chairman of the Federal Home Loan Bank Board shall serve as Chairman of the Board of Directors for the first such two-year term.

(c) Each director of the corporation shall serve ex officio during the period he holds the office to which he is appointed by the President.

(d) The directors of the corporation, as full-time officers of the United States, shall serve without additional compensation but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of their duties as directors of the corporation.

(e) The directors of the corporation shall adopt such bylaws, policies, and administrative provisions as are necessary to the functioning of the corporation and consistent with the provisions of this title.

(f) The presence of a majority of the board members shall constitute a quorum.

(g) The corporation shall be subject to the provisions of section 552 of title 5, United States Code.

(h) All meetings of the board of directors will be conducted in accordance with the provisions of section 552b of title 5, United States Code.

OFFICERS AND EMPLOYEES

SEC. 605. (a) The board shall have power to select, employ, and fix the compensation and benefits of such officers, employees, attorneys, and agents as shall be necessary for the performance of its duties under this title, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, classification, and General Schedule pay rates, except that no officer, employee, attorney, or agent of the corporation may be paid compensation at a rate in excess of the highest rate provided for GS–18 of the General Schedule under section 5332 of title 5, United States Code.

(b) The directors of the corporation shall appoint an executive director who shall serve as chief executive officer of the corporation.

(c) The executive director of the corporation, subject to approval by the board, may appoint and remove such employees of the corporation as he determines necessary to carry out the purposes of the corporation.

(d) No political test or political qualification shall be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, agent, or employee of the corporation or of any recipient, or in selecting or monitoring any grantee, contractor, or person or entity receiving financial assistance under this title.

(e) Officers and employees of the corporation shall not be considered officers or employees of the United States, and the corporation shall not be considered a department, agency, or instrumentality of the Federal Government. The corporation shall be subject to administrative and cost standards issued by the Office of Management and Budget similar to standards applicable to non-profit grantees and educational institutions.

POWERS AND DUTIES

SEC. 606. (a) (1) The corporation shall continue the work of the Urban Reinvestment Task Force in establishing neighborhood housing services programs in neighborhoods throughout the United States, supervising their progress, and providing them with grants and technical assistance. For the purpose of this paragraph, a neighborhood housing services program may involve a partnership of neighborhood residents and representatives of local governmental and financial institutions, organized as a State-chartered non-profit corporation, working to bring about reinvestment in one or more neighborhoods through a program of systematic housing inspections, increased public investment, increased private lending, increased resident investment, and a revolving loan fund to make loans available at flexible rates and terms to homeowners not meeting private lending criteria.

(2) The corporation shall continue the work of the Urban Reinvestment Task Force in identifying monitoring, evaluating, and providing grants and technical assistance to selected neighborhood preservation projects which show promise as mechanisms for reversing neighborhood decline and improving the quality of neighborhood life.

(3) The corporation shall experimentally replicate neighborhood preservation projects which have demonstrated success, and after creating reliable developmental processes, bring the new programs to neighborhoods throughout the United States which in the judgment of the corporation can benefit therefrom, by providing assistance in organizing programs, providing grants in partial support of program costs, and providing technical assistance to ongoing programs.

(4) The corporation shall continue the work of the Urban Reinvestment Task Force in supporting Neighborhood Housing Services of America, a nonprofit corporation established to provide services to local neighborhood housing services programs, with support which may include technical assistance and grants to expand its national loan purchase pool and may contract with it for services which it can perform more efficiently or effectively than the corporation.

(5) The corporation shall, in making and providing the foregoing grants and technical and other assistance, determine the reporting and management restrictions or requirements with which the recipients of such grants or other assistance must comply. In making such determinations, the corporation shall assure that recipients of grants and other assistance make available to the corporation such information as may be necessary to determine compliance with applicable Federal laws.

(b) To carry out the foregoing purposes and engage in the foregoing activities, the corporation is authorized—

(1) to adopt, alter, and use a corporate seal;

(2) to have succession until dissolved by Act of Congress;

(3) to make and perform contracts, agreements, and commitments;

(4) to sue and be sued, complain and defend, in any State, Federal, or other court;

(5) to determine its necessary expenditures and the manner in which the same shall be incurred, allowed, and paid, and appoint, employ, and fix and provide for the compensation of consultants, without regard to any other law, except as provided in section 608(d);

(6) to settle, adjust, and compromise, and with or without compensation or benefit to the corporation to release or waive in whole or in part, in advance or otherwise, any claim, demand, or right of, by, or against the corporation;

(7) to invest such funds of the corporation in such investments as the board of directors may prescribe;

(8) to acquire, take, hold, and own, and to deal with and dispose of any property; and

(9) to exercise all other powers that are necessary and proper to carry out the purposes of this title.

(c) (1) The corporation may contract with the Office of Neighborhood Reinvestment of the Federal home loan banks for all staff, services, facilities, and equipment now or in the future furnished by the Office of Neighborhood Reinvestment to the Urban Reinvestment Task Force, including receiving the services of the Director of the Office of Neighborhood Reinvestment as the corporation's executive director.

(2) The corporation shall have the power to award contracts and grants to—

(A) neighborhood housing services corporations and other nonprofit corporations engaged in neighborhood preservation activities; and

(B) local governmental bodies.

(3) The Secretary of Housing and Urban Development, the Federal Home Loan Bank Board of the Federal home loan banks, the Board of Governors of the Federal Reserve System and the Federal Reserve banks, the Federal Deposit Insurance Corporation, and the Comptroller of the Currency, the National Credit Union Administration or any other department, agency, or other instrumentality of the Federal Government are authorized to provide services and facilities, with or without reimbursement, necessary to achieve the objectives and to carry out the purposes of this title.

(d) (1) The corporation shall have no power to issue any shares of stocks, or to declare or pay any dividends.

(2) No part of the income or assets of the corporation shall inure to the benefit of any director, officer, or employee, except as reasonable compensation for services or reimbursement for expenses.

(3) The corporation may not contribute to or otherwise support any political party or candidate for elective public office.

REPORTS AND AUDITS

SEC. 607. (a) The corporation shall publish an annual report which shall be transmitted by the corporation to the President and the Congress.

(b) The accounts of the corporation shall be audited annually. Such audits shall be conducted in accordance with generally accepted auditing standards by independent certified public accountants who are certified by a regulatory authority of the jurisdiction in which the audit is undertaken.

(c) In addition to the anuual audit, the financial transactions of the corporation for any fiscal year during which Federal funds are available to finance any portion of its operations may be audited by the General Accounting Office in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States. The financial transactions of the corporation shall be audited by the General Accounting Office at least once during each three years.

(d) For any fiscal year during which Federal funds are available to finance any portion of the corporation's grants or contracts, the General Accounting Office, in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States, may audit the grantees or contractors of the corporation.

(e) The corporation shall conduct or require each grantee or contractor to provide for an annual financial audit. The report of each such audit shall be maintained for a period of at least five years at the principal office of the corporation.

AUTHORIZATION

SEC. 608. (a) There are authorized to be appropriated to the corporation to carry out this title not to exceed $12,500,000 for fiscal year 1979.

(b) Funds appropriated pursuant to this section shall remain available until expended.

(c) Non-Federal funds received by the corporation, and funds received by any recipient from a source other than the corporation, shall be accounted for and reported as receipts and disbursements separate and distinct from Federal funds.

(d) The corporation shall prepare annually a business-type budget which shall be

submitted to the Office of Management and Budget, under such rules and regulations as the President may establish as to the date of submission, the form and content, the classifications of data, and the manner in which such budget program shall be prepared and presented. The budget of the corporation as modified, amended, or revised by the President shall be transmitted to the Congress as a part of the annual budget required by the Budget and Accounting Act, 1921. Amendments to the annual budget program may be submitted from time to time.

TITLE VII—NEIGHBORHOOD SELF-HELP DEVELOPMENT

SHORT TITLE

SEC. 701. This title may be cited as the "Neighborhood Self-Help Development Act of 1978".

FINDINGS AND PURPOSE

SEC. 702. (a) The Congress finds and declares that—

(1) existing urban neighborhoods are a national resource to be conserved and revitalized wherever possible, and that public policy should promote governmental and private programs and activities that further that objective;

(2) to be effective, neighborhood conservation and revitalization efforts must involve the fullest possible support and participation of those most directly affected at the neighborhood level; and

(3) an effective way to obtain such support and participation at the neighborhood level is through neighborhood organizations accountable to residents of a particular neighborhood with a demonstrable capacity for developing, assessing, and carrying out projects for neighborhood conservation and revitalization.

(b) Therefore, the purposes of this title are (1) to provide grants and other forms of assistance to qualified neighborhood organizations to undertake specific housing, economic or community development, and other appropriate neighborhood conservation and revitalization projects in low- and moderate-income neighborhoods, which are in need of preservation and revitalization, and (2) in the process of providing such assistance, to increase the capacity of neighborhood organizations to utilize and coordinate resources available from the public and private sectors and from the residents and neighborhoods themselves, in conserving and revitalizing such neighborhoods.

DEFINITIONS

SEC. 703. As used in this title—

(1) the term "neighborhood organization" means a voluntary, nonprofit organization which (A) is broadly representative of the neighborhood in which the project will be located (and may include representatives of local business, financial and other governmental and nongovernmental entities), (B) is accountable to neighborhood residents with respect to the project being proposed, (C) has as an objective the preservation and revitalization of such neighborhood, and (D) is found by the Secretary to have a proven record or demonstrable capacity for developing resources for, and effectively implementing neighborhood conservation and revitalization programs and projects;

(2) the term "neighborhood conservation and revitalization projects" includes, but is not limited to, (A) locally initiated programs for housing rehabilitation or the creative reuse or improvement of existing housing; (B) conservation and revitalization of neighborhood retail business areas and the recycling of vacant or underutilized industrial sites, public facilities, and privately owned businesses for the purpose of expanding employment opportunities and neighborhood economic development; and (C) energy conservation and weatherization projects; and

(3) the term "Secretary" means the Secretary of Housing and Urban Development.

AUTHORITY TO PROVIDE ASSISTANCE

SEC. 704. (a) The Secretary is authorized to make grants and to provide other forms of assistance to neighborhood organizations for effectively preparing and implementing specific housing, economic and community development, and other appropriate neighborhood conservation and revitalization projects within a particular neighborhood, and to assist such organizations in implementing such projects in partnership with local government and other public and private entities.

(b) Grants and other forms of assistance may be made available under this section only if—

(1) the assistance will be used for a specific project which is related to and supportive of a conservation or revitalization strategy for the neighborhood in which the project will be located;

(2) the project will, to the extent feasible, include a self-help component which involves a contribution of time or resources by neighborhood residents;

(3) the project will directly benefit the residents of a low- or moderate-income neighborhood;

(4) the project will, to the extent feasible, involve leveraging of resources available from the private sector;

(5) the project will, to the extent feasible, involve the coordination of resources available from the local, State, or Federal Government;

(6) the applicant demonstrates that the residents of the neighborhood where the project will be located, and particularly residents who will be directly affected by the project, have been actively involved in and supportive of the selection of the project, and will continue to be involved in project development, implementation, and evaluation through an effective and continuing participation mechanism; and

(7) the applicant provides evidence that identified funding sources support the project and can make funds available contingent on the progress of the project.

(c) Grants and other forms of assistance made available under this section shall be used primarily for preparing and the implementation of specific neighborhood housing, economic, and community development projects. No grant or other assistance or portion thereof shall be made available under this section for (1) planning functions which are not directly combined with project implementation, (2) a public works project such as street repair which is not associated with the specific project being funded under this section, (3) operation of a social service program which is not associated with the specific project being funded under this section, (4) an economic development project which will not primarily benefit the residents of the neighborhood in which it will be located, (5) operating costs of a community group which are not associated with the specific project being funded under this section, or (6) other purposes which the Secretary may determine are not consistent with the purposes of this title.

(d) Grants and other forms of assistance may be made available under this title only if the application contains a certification by the unit of general local government within which the neighborhood to be assisted is located that such assistance is consistent with, and supportive of the specific objectives of that unit of government including housing and community development, economic development, and neighborhood conservation or revitalization activities being carried out by such unit.

(e) The Secretary shall consult with the heads of other Federal departments and agencies having responsibilities related to the purposes of this title, including the Community Services Administration, with respect to (1) general standards, policies, and procedures to be followed in the administration of this title, and (2) particular assistance actions or approvals which the Secretary believes to be of special interest or concern to one or more of such departments and agencies. The Secretary shall ensure the close coordination of activities assisted under this title with other related Federal, State, and local assistance programs, including the programs of the community services Administration, and, with respect to particular assistance actions or approvals, ensure a maximum commitment by the neighborhood organization of its own financial and other resources toward the assisted project.

APPROPRIATIONS

SEC. 705. There are authorized to be appropriated for the purpose of carrying out this title not to exceed $15,000,000 for each of the fiscal years 1979 and 1980. Any amount appropriated pursuant to this section shall remain available until expended.

TITLE VIII—LIVABLE CITIES

SHORT TITLE

SEC. 801. This title may be cited as the "Livable Cities Act of 1978".

FINDINGS

SEC. 802. The Congress finds and declares—

(1) that artistic, cultural, and historic resources, including urban design, constitute an integral part of a suitable living environment for the residents of the Nation's urban areas, and should be available to all residents of such areas, regardless of income;

(2) that the development or preservation of such resources is a significant and necessary factor in restoring and maintaining the vitality of the urban environment, and can serve as a catalyst for improving decaying or deteriorated urban communities and expanding economic opportunities, and for creating a sense of community identity, spirit, and pride; and

(3) that the encouragement and support of local initiatives to develop or preserve such resources, particularly in connection with federally assisted housing or community development activities or in communities with a high proportion of low-income residents, is an appropriate function of the Federal Government.

PURPOSE

SEC. 803. The primary purpose of this title is to assist the efforts of States, local governments, neighborhood and other organizations to provide a more suitable living environment, expand cultural opportunities, and to the extent practicable, stimulate economic opportunities, primarily for the low and moderate income residents of communities and neighborhoods in need of conservation and revitalization, through the utilization, design or development of artistic, cultural, or historic resources.

DEFINITIONS

SEC. 804. For the purpose of this title—

(1) the terms "art" and "arts" include, but are not limited to, architecture (including preservation, restoration, or adaptive use of existing structures), landscape architecture, urban design, interior design, graphic arts, fine arts (including painting and sculpture), performing arts (including music, drama, and dance), literature, crafts, photography, communications media and film, as well as

other similar activities which reflect the cultural heritage of the Nation's communities and their citizens;

(2) the term "nonprofit organization" means an organization in which no part of its net earnings inures to the benefit of any private stockholder or stockholders, individual or individuals and, if a private entity, which is not disqualified for tax exemption under section 501(c)(3) of the Internal Revenue Code of 1954 by reason of attempting to influence legislation and does not participate in or intervene in (including the publishing or distribution of statements) any political campaign on behalf of any candidate for public office; such organizations may include States and units of local government (including public agencies or special authorities thereof), regional organizations of local governments and nonprofit societies, neighborhood groups, institutions, organizations, associations or museums;

(3) the term "project" means a program or activity intended to carry out the purposes of this title, including programs for neighborhood and community-based arts programs, urban design, user needs design, and the encouragement of the preservation of historic or other structures which have neighborhood or community significance;

(4) the term "Secretary" means the Secretary of Housing and Urban Development;

(5) the term "Chairman" means the Chairman of the National Endowment for the Arts;

(6) the term "Department" means the Department of Housing and Urban Development; and

(7) the term "Endowment" means the National Endowment for the Arts.

GRANTS TO OR CONTRACTS WITH ORGANIZATIONS

SEC. 805. (a) The Secretary is authorized to make grants to, or enter into contracts with, nonprofit organizations for the purpose of enabling such organizations to undertake or support in cities, urban communities, or neighborhoods, projects which the Secretary, in consultation with the Chairman, determines will carry out the purposes of this title and which—

(1) have substantial artistic, cultural, historical, or design merit,

(2) represent community or neighborhood initiatives which have a significant potential for conserving or revitalizing communities or neighborhoods, and for enhancing community or neighborhood identity and pride, and

(3) meet the criteria established jointly by the Secretary and the Chairman pursuant to this section.

(b) The Secretary and the Chairman shall establish jointly criteria and procedures for evaluating and selecting projects to be assisted under this title. Such criteria shall address, but need not be limited to—

(1) artistic, cultural, historical, or design quality;

(2) the degree of broadly based, active involvement of neighborhood residents, community groups, local officials, and persons with expertise in the arts with the proposed project;

(3) the degree of or the potential for utilization or stimulation of assistance or cooperation from other Federal, State, and local public and private sources, including arts organizations;

(4) the feasibility of project implementation, including the capability of the sponsor organization;

(5) the potential contribution to neighborhood revitalization and the creation of a sense of community identity and pride;

(6) the potential for stimulating neighborhood economic and community development, particularly for the benefit of persons of low and moderate income; and

(7) the potential of utilization of the project by neighborhood residents, particularly residents of low and moderate income, senior citizens, and handicapped persons.

(c) No assistance shall be made under this title except upon application therefor submitted to the Secretary in accordance with regulation and procedures established jointly by the Secretary and the Chairman.

(d) Prior to the approval of any application for assistance under this title, the Secretary shall consult with the Chairman and, in accordance with regulations and procedures established jointly by the Secretary and the Chairman, seek the recommendations of State and local officials and private citizens who have broad knowledge of or experience or expertise in, community and economic development and revitalization, and of such officials and citizens who have broad knowledge of, or expertise in, the arts.

(e) The Secretary, in cooperation with the Chairman, shall prescribe regulations which require that specific portions of the cost of any projects assisted under this title shall be provided from sources other than funds made available under this title. Such matching requirements may vary depending on the type of applicant, and the Secretary may reduce or waive such requirements solely in order to take account of the financial capacity of the applicant.

(f) Grants and other assistance may be made available under this title only if the application contains a certification by the unit of general local government in which the project will be located that the project is consistent with an supportive of the objectives of that government for the area in which the project is located.

(g) Funds made available under this title shall not be used to supplant other public or private funds.

(h) No more than 10 per centum of the funds appropriated for any fiscal year under section 807 shall be available for administrative expenses.

COORDINATION AND DEVELOPING OF PROGRAM WITH OTHER FEDERAL AND NON-FEDERAL PROGRAMS

SEC. 806. The Secretary shall coordinate the administration of the provisions of this title in cooperation with other Federal agencies and assure that projects assisted under this title are coordinated with efforts undertaken by State and local public and private entities, including arts organizations.

AUTHORIZATION OF APPROPRIATIONS

SEC. 807. There are authorized to be appropriated for carrying out the purposes of this title not to exceed $5,000,0000 for fiscal year 1979, and not to exceed $10,000,000 for fiscal year 1980. Any amounts appropriated under this section shall remain available until expended.

TITLE IX—MISCELLANEOUS

REPORT ON MOBILE HOME CONSTRUCTION AND SAFETY STANDARDS

SEC. 901. (a) The first sentence of section 626(a) of the National Mobile Home Construction and Safety Standards Act of 1974 is amended—

(1) by striking out "March 1 of each year" and inserting in lieu thereof "July 1 of every other year beginning with calendar year 1978"; and

(2) by striking out "preceding calendar year" and inserting in lieu thereof "two preceding calendar years".

(b) The second sentence of section 626(a) of such Act is amended by striking out "such year" in clauses (1), (2), and (5) and "the year" in clause (6) and inserting in lieu thereof "such years" in each such clause.

STATEMENT OF POLICY AND STUDY ON HOUSING DISPLACEMENT

SEC. 902. The Congress declares that in the administration of Federal housing and community development programs, consistent with other program goals and objectives, involuntary displacement of persons from their homes and neighborhoods should be minimized. In furtherance of the objective stated in the preceding sentence, the Secretary of Housing and Urban Development shall conduct a study on the nature and extent of such displacement, and, not later than January 31, 1979, shall report to the Congress on recommendations for the formulation of a national policy to minimize involuntary displacement caused by the implementation of the Department's programs, and to alleviate the problems caused by displacement of residents of the Nation's cities due to residential and commercial development and housing rehabilitation, both publicly and privately financed. In carrying out such study, the Secretary shall (1) consult with representatives of affected public interest groups, government, and the development and lending industries; (2) provide data on the nature and scope of the displacement problem, both past and projected, and identify steps needed to improve the availability of such data; and (3) report fully on the current legal and regulatory powers and policies of the Department to prevent or compensate for displacement by its own programs.

REHABILITATION GUIDELINES

SEC. 903. Title V of the Housing and Urban Development Act of 1970 is amended by adding at the end thereof the following:

"REHABILITATION GUIDELINES

"SEC. 511. (a)(1) The Secretary shall develop model rehabilitation guidelines for the voluntary adoption by States and communities to be used in conjunction with existing building codes by State and local officials in the inspection and approval of rehabilitated properties.

"(2) Such guidelines shall be developed in consultation with the National Institute of Building Sciences, appropriate national organizations of agencies and officials of State and local governments, representatives of the building industry, and consumer groups, and other interested parties.

"(3) The Secretary shall publish such guidelines for public comment not later than one year after the date of enactment of this section, and promulgate them no later than eighteen months after such date of enactment.

"(4) The Secretary may furnish technical assistance to State and local governments to facilitate the use and implementation of such guidelines.

"(b) The Secretary shall report to Congress not later than thirty-six months after the date of enactment of this section regarding (1) actions taken by State and local governments to adopt guidelines or their equivalents, and (2) recommendations for further action.".

ALASKA HOUSING PROGRAM

SEC. 904. (a) Subsection (a) of section 1004 of the Demonstration Cities and Metropolitan Development Act of 1966 is amended to read as follows:

"(a) The Secretary of Housing and Urban Development (hereinafter referred to as the 'Secretary') may make loans and grants on the basis of need to the regional native housing authorities duly constituted under the laws of the State of Alaska for the purpose

of providing planning assistance, housing rehabilitation, and maintaining an adequate administrative structure in conjunction with the provision of housing and related facilities for Alaska residents.".

(b) Subsection (b) of such section is amended by inserting before the period at the end thereof the following: ", except that the Secretary may make a grant in excess of such limitation in any case, after consultation with State officials".

PAPERWORK REDUCTION

SEC. 905. (a) The Congress finds and declares—

(1) that various departments, agencies, and instrumentalities of the Federal Government with responsibilities involving housing and housing finance programs, require, approve, use or otherwise employ a variety of different forms as residential mortgages (or deeds of trust or similar security instruments) as notes secured by those mortgages, and for applications, appraisals and other purposes, and that such duplication of forms constitutes a paperwork burden that adds to the costs imposed on the Nation's homeowners and home buyers;

(2) that unnecessary paperwork impairs the effectiveness of Federal housing and housing finance programs;

(3) that both single-family and multifamily programs are affected; and

(4) that simplification of paperwork imposed by Federal housing and housing finance programs would contribute to achieving the Nation's housing goals by reducing housing costs.

(b)(1) Insofar as it is practicable and to the extent that such action would result in a reduction in paperwork and regulatory burden, the Department of Housing and Urban Development and the Veterans' Administration shall employ in their respective programs—

(A) uniform single-family and multifamily note and mortgage forms;

(B) a uniform application form for mortgage approval and commitment for mortgage insurance;

(C) a uniform form for computation of the monthly net effective income of applicants;

(D) a uniform property appraisal form;

(E) a uniform settlement statement which shall satisfy the requirements of the Real Estate Settlement Procedures Act; and

(F) such other consolidated or simplified forms, the consolidation or simplification of which the Secretary of Housing and Urban Development and the Administrator of Veterans' Affairs mutually agree would contribute to a reduction in the paperwork and regulatory burden of housing and housing finance programs administered by the agencies.

(2) Each agency may employ riders, addenda, or similar forms of modification agreements to adapt such uniform forms to its respective programs and policies, consistent with the goals of minimizing the use and extent of such modification agreements and maximizing the suitability of such forms for the use of all participants, public and private.

(3) To the extent permitted by law, the President may require the Farmers Home Administration and the Administrator of the Farmers Home Administration to comply with the requirements of this section if such compliance will contribute to a reduction in the paperwork and regulatory burden of housing and housing finance programs administered by the agency.

(c) The Director of the Office of Management and Budget shall coordinate and monitor the development and implementation by Federal departments and agencies of the efforts required by subsection (b) and shall report to the Congress on such development and implementation as part of each report required under Public Law 93-556.

HOUSING PRODUCTION REPORT

SEC. 906. Section 1603 of the Housing and Urban Development Act of 1968 is amended to read as follows:

"REPORT ON GOALS

"SEC. 1603. Not later than January 20 of each year, the President shall transmit to the Congress a report which—

"(1) reviews the progress made in achieving housing production objectives during the preceding year, and in the event that proposed objectives are not achieved, identifies the reasons for the failure;

"(2) projects the level, composition, and general location of production and rehabilitation activity during the current year, and reassesses the availability of required resources;

"(3) specifies Federal programs and policies to be implemented or recommended in order to achieve the objective;

"(4) updates estimates of the housing needs of lower income families, analyzing these needs, insofar as possible, by type of household, housing need, including households with specialized needs, and general location, and in addition, reassesses the capacity of each Federal housing program to serve the needs identified;

"(5) reviews the progress made in achieving goals of conserving and upgrading older housing and neighborhoods, expanding homeownership and equal housing opportunities, and assuring reasonable shelter costs;

"(6) reports on progress made toward developing new methods for measuring and monitoring progress in achieving these goals; and

"(7) identifies legislative and administrative actions which will or should be adopted or implemented during the current year to support achievement of the goals.".

AMENDMENTS TO INTERSTATE LAND SALES FULL DISCLOSURE ACT

SEC. 907. (a) Section 1403(a) of the Interstate Land Sales Full Disclosure Act is amended—

(1) by inserting "condominium," after "commercial," in clause (3);

(2) by inserting after " 'adverse claims' do not refer to" in clause (10) the following: "United States land patents or Federal grants and reservations similar to United States land patents, nor to"; and

(3) by striking out the matter which precedes "when—" in clause (11) and inserting in lieu thereof the following:

"(11) the sale or lease of real estate which is zoned by the appropriate governmental authority for industrial or commercial development or which is restricted to such use by a declaration of covenants, conditions, and restrictions which has been recorded in the official records of the city or county in which such real estate is located,".

(b) Section 1403 of such Act is amended—

(1) by redesignating subsection (b) as subsection (c); and

(2) by inserting after subsection (a) thereof the following:

"(b) Unless the method of disposition is adopted by the purpose of evasion of this title, the requirements of sections 1405 through 1400 shall not apply to the sale or lease of a lot which is located within a municipality or county where a unit of local government specifies minimum standards for the development of subdivision lots taking place within its boundaries, when—

"(1) the subdivision meets all local codes and standards and is either zoned for single family residences or, in the absence of a zoning ordinance, is limited exclusively to single family residences;

"(2) the lot is situated on a paved, public street or highway which has been built to a standard acceptable to the unit of local government in which the subdivision is located or a bond or other surety acceptable to the municipality or county in the full amount of the cost of the improvements has been posted to assure completion to such standards and the unit of local government has accepted or is obligated to accept the responsibility of maintaining the public street or highway;

"(3) at the time of closing, potable water, sanitary sewage disposal, and electricity have been extended to the lot or the unit of local government is obligated to install such facilities within 180 days. For subdivisions which do not have a central water or sewage disposal system, rather than installation of water or sewer facilities, there must be assurances that an adequate potable water supply is available year-round and that the lot is approved for the installation of a septic tank;

"(4) the contract of sale requires delivery of a warranty deed to the purchaser within 180 days after the signing of the sales contract;

"(5) a policy of title insurance is issued in connection with the transaction showing that, at the time of closing, title to the lot purchased or leased is vested in the seller or lessor subject only to such exceptions as may be approved in writing by the purchaser or lessee prior to recordation of the deed or execution of the lease;

"(6) each and every purchaser or spouse has made a personal, on the lot inspection of the lot purchased or leased, prior to signing of a contract to purchase or lease; and

"(7) there are no direct mail or telephone solicitations or offers of gifts, trips, dinners, or other such promotional techniques to induce prospective purchasers or lessees to visit the subdivision or to purchase or lease a lot.".

COST-BENEFIT ANALYSIS OF FIELD REORGANIZATIONS

SEC. 908. Section 7 of the Department of Housing and Urban Development Act is amended by adding at the end thereof the following:

"(p) A plan for the reorganization of any regional, area, insuring, or other field office of the Department of Housing and Urban Development may take effect only upon the expiration of 90 days after publication in the Federal Register of a cost-benefit analysis of the effect of the plan on each office involved. Such cost-benefit analysis shall include, but not be limited to—

"(1) an estimate of cost savings supported by background information detailing the source and substantiating the amount of the savings;

"(2) an estimate of the additional cost which will result from the reorganization;

"(3) a study of the impact on the local economy; and

"(4) an estimate of the effect of the reorganization on the availability, accessibility, and quality of services provided for recipients of those services. Where any of the above factors cannot be quantified, the Secretary shall provide a statement on the nature and extent of those factors in the cost-benefit analysis.".

And the House agree to the same.

JOINT EXPLANATORY STATEMENTS OF COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3084) to amend and extend certain Federal laws relating to housing, community, and neighborhood development and preservation, and related programs, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

TITLE I—COMMUNITY DEVELOPMENT
SECTION 312 REHABILITATION LOANS

Priorities

The Senate bill contained a provision to give priority in the section 312 rehabilitation loan program to families that meet section 8 income requirements. The House amendment provided that priority be given to low and moderate income owner occupants, and in condominium and cooperative projects, to persons principally of low and moderate income. The conference report contains the House provision with an amendment that specifically set the income threshold for these loans at 95 percent of the median income in the area.

Authorization

The Senate bill contained a provision authorizing for appropriation for section 312 rehabilitation loans an amount not to exceed $370 million for fiscal year 1979 and the same amount for fiscal year 1980. The House amendment contained a provision authorizing for appropriation an amount not to exceed $245 million for fiscal 1979 only. The conference report contains the House provision.

Energy conservation standards

The House bill contained a provision that was not contained in the Senate amendment requiring that 180 days after enactment of this Act that improvements made in properties assisted with section 312 rehabilitation loans must meet cost-effective, energy conservation standards. The conference report contains the House amendment with an amendment requiring such standards to be met 270 days after enactment of this Act.

Flexible interest rate

The Senate bill contained a provision authorizing the Secretary to set the rate for section 312 loans above 3 percent for families above 80 percent of median area income and limited the rate not to exceed the current Treasury borrowing rate plus one-eighth percent The Secretary was further authorized to maintain an interest rate no greater than 3 percent for families at 80 percent of median income or lower, and for multifamily housing. The House amendment was similar except that it provided that the Secretary may set the interest rate above 3 percent for persons whose income exceeds 95 percent of the median area income, but the rate cannot exceed a rate determined by the Secretary of the Treasury taking into consideration the current Treasury borrowing rate. It required, further, that the HUD Secretary, in setting the rate, shall consider the condition, location, and use of the property, the nature of the rehabilitation, the income of the applicant, and other factors deemed relevant. The conference report contains the Senate provision with an amendment which would permit section 312 multifamily loans to have interest rates above 3 percent.

The conferees intend that the Secretary will, as a general proposition, apply the higher rates to more affluent borrowers, but the Secretary may permit the lower rate where it is necessary to make the rehabilitation feasible, taking into account the borrower's ability to pay. For interest rates for multifamily loans, the conferees expect the Secretary to set such rates at a level necessary to make the rehabilitation of the property feasible at rents affordable by the prospective tenants of the property.

Refinancing

The Senate bill contained a provision not contained in the House amendment permitting the use of section 312 loans for refinancing existing indebtedness if Secretary determines such loan is necessary to minimize tenant displacement in multifamily housing. The conference report does not contain the Senate provision.

The conferees are aware that there may be instances where the rehabilitation of multifamily structures might lead to the displacement of low and moderate income tenants even though the Secretary exercises caution in selecting properties for rehabilitation such that displacement is minimized. In instances where displacement is expected to result from the inability of the low and moderate income tenants to pay the higher rents caused by the rehabilitation, the conferees would authorize the Secretary to use section 312 loans to refinance existing indebtedness in addition to financing the rehabilitation required. The conferees wish to stress, however, that they expect the Secretary to use this authority sparingly and that owners of such multifamily structures not be permitted to withdraw their equity. The conferees wish to emphasize that it is their intention that the Secretary shall utilize criteria in selecting multifamily structures for rehabilitation which will minimize displacement and may approve the use of section 312 loans for refinancing only if she is assured that the benefit of the subsidy fully accures to the tenants.

Set-asides

The Senate bill contained a provision designating that $175 million must be made available for multifamily rehabilitation, and $70 million for urban homesteading for each of fiscal year 1979 and fiscal year 1980. Additionally, the Senate provision allowed that the Secretary may alter these amounts in either year if necessary after consideration of (a) the needs for different types of rehabilitation and (b) the capacity of State and local governments to administer such programs. The conference report contains the Senate provision with an amendment directing the Secretary to make no more than $60 million of section 312 loans for multifamily housing provisions and that no funds be specifically set aside for urban homesteading. The conferees wish to make clear, however, that the Secretary should assure that sufficient section 312 funds are available for urban homesteading.

Additional section 312 multifamily limitations and conditions property location

Property location: The Senate bill would provide that a multifamily property, to receive a loan under this program, must be (a) in a low or moderate income neighborhood, as designated by a unit of local government for community development purposes, or (b) have a majority of low and moderate income tenants and be in a neighborhood characterized by substantial private investment and rising property values resulting in tenant displacement, and the loan be used to minimize displacement. The House had no provision.

The conference report contains the Senate provision with an amendment specifying that multifamily loans can be made only in low and moderate income neighborhoods or for buildings occupied by a majority of low and moderate income tenants, and clarifying that in either instance the property must be in an area already qualified for section 312 lending. The conferees expect that in making section 312 loans in other than low and moderate income neighborhoods the Secretary will give priority to multifamily properties in which the low and moderate income tenants would be displaced if section 312 financing were not available and that such financing would in fact prevent such displacement. The conferees wish to emphasize, however, that the Secretary, as a matter of general policy, is to employ criteria that will result in selecting projects whose rehabilitation will cause minimal involuntary displacement and she has determined that other rehabilitation approaches are unavailable or inappropriate for a particular project.

Community development strategy: The Senate bill contained a provision not contained in the House amendment requiring that multifamily loans must be consistent with a community development strategy principally benefiting low and moderate income persons. The conference report contains the Senate provision with an amendment specifying that for a section 312 multifamily loan to be made, the proposed rehabilitation would have to be consistent with a local community development strategy developed pursuant to title I of the Housing and Community Development Act of 1974.

Property size: The Senate bill contained a provision that was not contained in the House amendment, requiring that in order to be eligible for section 312 loan assistance the property must be fewer than 100 units, except where the Secretary determines that the loan is essential to community development needs, and there are no alternative sources of financing. The conference report contains the Senate provision.

Property size priorities: The Senate bill contained a provision that was not contained in the House amendment requiring that the

preponderence of 312 multifamily loans shall be for properties of 30 units or less, except that the Secretary must allow localities maximum flexibility in meeting needs identified in their HAPs. The conference report does not contain the Senate provision. The conferees, however, are interested in directing the use of these loans to multifamily properties of about 30 or fewer units in size which the conferees are aware as often being most in need of assistance, but which are sometimes not considered large enough to attract developers.

Section 8 tie-in: The Senate bill provided that where section 8 assistance is needed to minimize displacement, application for such assistance must be made in conjunction with the application for the section 312 multifamily loan; the Secretary shall make such assistance available to the maximum extent possible, and for as long as feasible; the Secretary may also contract with the investor-owner to assure that a unit so assisted will remain available for low and moderate income housing for as long a time period as is feasible. The House had no provision.

The conference report contains the Senate provision with an amendment requiring that whenever tenants will be displaced as a result of section 312 lending in multifamily structures the Secretary shall notify such low and moderate income tenants that they are to be displaced and that they may be eligible for relocation assistance. In addition, the Secretary shall seek to assure a maximum opportunity for such tenants to return to the rehabilitated unit; to occupy another unit owned or assisted by the Secretary; to obtain assistance under the United States Housing Act of 1937; or to receive other relocation assistance deemed appropriate by the Secretary. The conferees wish to clarify their intent that this amendment is directed toward meeting the needs of tenants who are involuntarily displaced after the Secretary has applied the criteria suggested by the conferees in selecting rehabilitation projects such to minimize displacement and after determining that the section 312 financing is appropriate for the project. The conferees are concerned that in providing that housing assistance under the United States Housing Act of 1937 may be used to assist tenants displaced as a result of section 312 loans, an inducement to owners of multifamily properties may be created. This would not be desirable, and the conferees expect the Secretary to take steps to prevent such inducement from occurring.

Rent restrictions: The Senate bill contained a provision that was not contained in the House amendment requiring that the Secretary must enter into an agreement with the owner of the multifamily property receiving a section 312 loan, to limit rent increases caused by the rehabilitation for at least 5 years. The conference report contains the Senate provision.

Provisions for sound management: The Senate bill contained a provision that was not contained in the House amendment requiring that prior to approval of a multifamily section 312 loan, the Secretary shall consider whether the owner is likely to provide sound management of the project and shall require an adequate plan for future management. The conference report does not contain the Senate provision. The conferees expect, however, that the Secretary will insure that in all multifamily properties assisted with section 312 loans that there will be an adequate plan for the sound management of the property. Additionally the conferees expect that the Secretary will assure that, over the life of the loan, the management plan is carried out.

Disclosure to tenants: The Senate bill contained a provision that was not contained in the House amendment requiring prior to approval of a section 312 multifamily loan, that the Secretary must be sure that there is a program for informing tenants of the terms of the loan, its possible effects on rents, and possible sources of rental assistance for eligible tenants. The conference report does not contain the Senate provision. The conferees, however, direct the Secretary to assure that tenants in multifamily properties assisted with section 312 loans will be informed of the terms of the loan and their effects on rents as well as the sources of possible rental assistance.

Assistance to investor-owners: The Senate bill contained a provision that was not contained in the House amendment requiring that the Secretary provide the maximum possible technical assistance to investor-owners, particularly small investor-owners of multifamily projects. The Senate provision is not contained in the conference report.

Tax syndication financing: The Senate bill contained a provision that was not contained in the House amendment requiring that the Secretary shall adopt measures to limit the use of a section 312 loan in conjunction with tax syndication financing, except where the combination is needed to assure the project's feasibility. The conference report does not contain the Senate provision. However, the conferees intend that the Secretary will, in determining the interest rate and the amount of the loan, take into consideration the amount of the equity and the value of the tax preference to assure that the return to the owners is reasonable.

Multifamily temporary displacement: The Senate bill contained a provision that was not contained in the House amendment requiring that the Secretary shall make the maximum effort to minimize displacement caused by multifamily section 312 loans. The conference report contains the Senate provision with an amendment requiring that the Secretary shall minimize involuntary displacement caused by multifamily section 312 loans. The conferees wish to make clear that in such efforts to minimize displacement, the Secretary should take displacement into account in selecting and approving multifamily properties for section 312 loan assistance.

Use of private funds: The Senate bill contained a provision that was not contained in the House amendment requiring the Secretary to encourage the use of private funds in conjunction with section 312 multifamily financing where such use is feasible and does not increase displacement. The Senate provision is not contained in the conference report. The conferees do intend that the Secretary should encourage, to the maximum feasible extent, the use of private capital in the multifamily rehabilitation and they expect the Secretary to limit section 312 multifamily loans to situations where it is necessary to cause the rehabilitation of the property to occur. In determining the amount of the loan and the interest rate, the conferees believe that the Secretary should also take into consideration the value of the tax preference items available to the owners, as well as their projected cash return on equity.

Additional terms: The Senate bill contained a provision that was not contained in the House amendment authorizing that the Secretary may impose additional limitations and conditions on availability and use of funds. The conference report does not contain the Senate provision.

Section 312 loans for urban homesteading

Fund allocation/demonstration program: The Senate bill contained a provision that was not included in the House amendment authorizing the Secretary to set aside a portion of the funds for urban homesteading for a demonstration program of homesteading involving multifamily properties on a national basis. The Senate provision is not contained in the conference report.

Limitation: The Senate bill contained a provision that was not contained in the House amendment limiting the use of section 312 funds for locally developed homesteading programs only to programs meeting the requirements of section 810(b) of the Housing and Community Development Act of 1972. The conference report does not contain the Senate provision.

Reports on section 312 loan program

The Senate bill contained a provision that was not contained in the House amendment requiring that in conjunction with the annual report on the community development block grant program, the Secretary must submit a report on section 312 program which includes a summary of the use of section 312 funds and an evaluation of the progress made toward community development goals. As soon as feasible, but not later than December 1, 1979, an interim report on the use of section 312 funds for multifamily properties with legislative recommendations for improving overall effectiveness must be submitted to the Congress. The conference report contains the Senate provision.

Program extension

The Senate bill contained a provision that was not contained in the House amendment extending the section 312 loan program for an additional year, through fiscal year 1980. The conference report does not contain the Senate provision.

REHABILITATION LOAN INSURANCE

Authority

The House amendment contained a provision, not contained in the Senate bill, which amended section 203(k) of the National Housing Act to provide the Secretary authority to insure rehabilitation loans made by financial institutions for the rehabilitation of one-to-four family structures used primarily for residential purposes. The conference report contains this provision in its entirety.

Definitions

The House amendment contained several definitions not contained in the Senate bill which have been retained in the conference report.

Rehabilitation loan

The House amendment contained a provision, not contained in the Senate bill, which is also contained in the conference report defining the term "rehabilitation loan" as a loan, advance of credit, or purchase of an obligation representing a loan or advance of credit, made for the purpose of financing (1) the rehabilitation of an existing one-to-four unit structure (primarily used for residential purposes), (2) the rehabilitation of such structure and refinancing of the outstanding indebtedness on such structure and real property on which it is located, and (3) the rehabilitation of such structure and purchase of the structure and real property.

Rehabilitation

The House amendment contained another provision, not included in the Senate bill, which is also contained in the conference report defining "rehabilitation" as the improvement (including an improvement designed to meet energy conservation standards) or repair of a structure, or facility in connection with a structure, as required by applicable codes, community development plan, or statewide property insurance plan.

Eligibility

The House amendment, but not the Senate bill, provided that to be eligible for insurance, the rehabilitation loan shall involve a principal obligation that does not exceed, when added to any outstanding indebtedness of the borrower, the amounts specified in subsection 203(b)(2) of the National Housing

Act. The conference report contains this provision.

Interest rate

The House amendment contained a provision not included in the Senate bill, and contained in the conference report providing that the rehabilitation loan shall bear interest at the rate of mortgages under section 203, except, that a higher rate may be permitted during the rehabilitation period.

Acceptable risk and other conditions

The House amendment contained a provision not included in the Senate bill, providing that the Secretary must determine that the loan is an acceptable risk and that it complies with such other conditions and restrictions as the Secretary shall prescribe. The conference report contains this provision.

Refinancing

The House amendment contained a further provision not included in the Senate bill, which provided that a loan made under this section can be refinanced and extended, as the Secretary may prescribe, but in no event can the loan be extended longer than permitted under section 203(b). The conference report contains this provision.

General insurance fund and insurance premiums

The House amendment contained a provision, not contained in the Senate bill, which provided that all funds received, and disbursements made under this authority, shall be credited or charged to the General Insurance Fund; Insurance benefits shall be paid in cash or in debentures of the Fund; and that premium charges fixed for this section may be different from those fixed for mortgages under other provisions of 203, except they may not exceed 1 percent per year. The conference report contains this provision.

GNMA purchasing authority

The House amendment contains a provision not included in the Senate bill, but included in the conference report providing that GNMA may purchase rehabilitation loans insured under section 203(k), without existing GNMA limitations on principal obligations.

URBAN HOMESTEADING

Authorization

The Senate bill contained a provision that authorized an appropriation of not to exceed $26 million for fiscal year 1979, for section 810(g) of the Housing and Community Development Act of 1974, the Urban Homesteading Program. The House amendment contained a provision that authorized an appropriation of not to exceed $25 million for fiscal year 1979. The conference report contains the Senate provision.

Eligibility

Neighborhood: The Senate bill contained a provision that was not contained in the House amendment authorizing that the Secretary may provide for homesteading in areas not being upgraded, if appropriate, and if such action is requested by the State or local government unit or agency involved. The Senate provision is not contained in the conference report.

Veterans' Administration: The Senate bill contained a provision that was not contained in the House amendment to make Veterans' Administration properties eligible for homesteading and to require the Veterans' Administration to publish a list of all such eligible properties and, also, to authorize the Secretary to acquire for homesteading purposes such eligible property. The conference report contains the Senate provision.

Grants

Administrative costs: The Senate bill contained a provision that was not contained in the House amendment authorizing the Secretary to make grants to local governments or agencies participating in the Urban Homesteading Program of amounts not to exceed $60,000 each for administrative costs. The conference report does not contain the Senate provision.

The Senate bill contained a provision that was not contained in the House amendment permitting the Secretary to make grants to State and local units of government and agencies to pay off mechanics or tax liens on properties acquired by such units of government and agencies and to be used in an Urban Homesteading Program. The maximum amount of such a grant would be the lesser of $5,000 or the amount of the lien; however, the aggregate of such grants could not exceed $36 million. The conference report does not contain the Senate provision.

Authorization: The Senate bill contained a provision that was not contained in the House amendment that authorized an appropriation of an amount not to exceed $45 million in fiscal year 1979 in order to carry out the grant program. The conference report does not contain the Senate provision.

Section 312 funds for homesteading

Per property: The Senate bill contained a provision, not found in the House amendment, that established for each urban homesteading property, that an $8,000 section 312 rehabilitation loan must be made available by the Secretary out of the section 312 loan funds set-aside for urban homesteading. The conference report does not contain the Senate provision.

Fund availability: The Senate bill contained a provision, not found in the House amendment, that established that any amount of the proposed set-aside funds available and not used, shall remain available for not to exceed one year for the rehabilitation of other properties in accordance with this section. The conference report does not contain the Senate provision.

COMMUNITY DEVELOPMENT BLOCK GRANT AMENDMENTS

HAP categories

The Senate bill provided that in developing housing assistance plans communities must include the relative proportion of existing rental and owner-occupied units to be upgraded and thereby preserved. Owners of homes requiring rehabilitation assistance would be added by the Senate bill as a category of lower income persons to be assessed in the housing assistance plan. The House amendment provided that the housing assistance plans be expanded only to include the relative proportion of existing units to be upgraded and thereby preserved. The conference report adopts the Senate provision.

Expected to reside

The House amendment contains a provision not found in the Senate bill which defines the term "expected to reside" for purposes of the CDBG Housing Assistance Plan as those persons expected to reside as a result of existing or projected employment opportunities in the community.

The conference report contains the House provision amended to include the elderly who may be expected to reside in the community regardless of their employment status and to permit the term "expected to reside", alternatively, to mean those persons expected to reside in the community as reflected in a community approved state or regional housing allocation plan approved by the Secretary. The provision, as amended, is intended to clearly state the basis upon which a community can be required to develop its housing assistance goals. A community need not set the number of units under the expected to reside element of its housing assistance plan goals at a level greater than that which is needed to accommodate the existing or projected employment opportunities in the community and the elderly who may reasonably be expected to reside there. However, this provision is not intended to preempt a state or judicial requirement that a community undertake a greater share of the responsibility in meeting the housing needs of lower income families. If a community voluntarily accepts a higher level, pursuant to a state or regional housing opportunity plan which the Secretary has approved, that higher level also should be included in the HAP.

The conferees believe that the Secretary should encourage communities to participate in such housing opportunity plans through the use of incentive bonus allocations of section 8 authority, increased section 701 funding for the state or areawide agencies, community development block grant funds and other existing authorities. In particular, the conferees expect the Secretary to actively utilize the authority conferred by section 107(a)(2) of the Housing and Community Development Act of 1974 which provides that grants may be made "to states and units of general local government which join in carrying out housing and community development programs that are areawide in scope."

The conferees wish to emphasize that the amendment is in no way intended to diminish the Congressional commitment made in the Housing and Community Development Act of 1974 and in the Fair Housing Act of 1968 to promote fair housing opportunities in the administration of all housing and community development programs.

Application disapproval

The House amendment contained a provision that the Secretary may not disapprove an application because it stresses any one of the CDBG primary purposes of section 104(c)(3) to a greater or lesser degree than any other; the primary purposes would be of a coequal nature. The Senate bill had no provision. The conference report contains the House provision with an amendment which deletes the term "co-equal" and which provides that the Secretary may disapprove an application if she determines that the extent to which a primary purpose is addressed is plainly inappropriate to meeting the needs and objectives which are consistent with the community's efforts to achieve the primary objective of the Act.

The conferees agreed that the primary purposes were not to be considered as coequal in a quantitative sense, but that each could, in the light of the individual community's need, be the principal means for achieving the primary objective of the act.

The conferees wish to reaffirm that the primary objective of the CDBG program is the development of viable urban communities by providing decent housing and a suitable living environment and expanding economic opportunities, principally for persons of low and moderate income. Under the program, each applicant community has a clear responsibility to identify its housing and community development needs, and to develop a program which over a three-year period meets these needs, while principally benefiting low and moderate income persons.

As provided in the statute, the overall objective is to be achieved through activities which carry out three broad national purposes: activities which benefit low and moderate income families, aid in the prevention or elimination of slums or blight or meet particular urgent community development needs, as approved by the Secretary. The spending priorities identified in CDBG applications represent a strategic choice for a community based on its judgment as to which combination of approaches will best serve the overall objective of the program, subject to the Secretary's authority to determine whether the activities to be undertaken are plainly inappropriate in meeting the needs or objectives identified by the community.

The Secretary's responsibility in this process is statutorily defined. The community's application must be approved unless the Secretary finds one of three things:

(1) that a community's description of its community and housing needs is plainly inconsistent with generally available facts and data; or

(2) that the activities to be undertaken by the community are plainly inappropriate to meeting the needs and objectives identified by the community; or

(3) that the community's application does not comply with the act or other applicable laws.

There has, however, been some confusion over how the Secretary is to go about making these findings. The amendment is designed to make clear that a determination to disapprove cannot be made simply because an application gives greater or lesser weight to one spending priority in relation to the others, and that any percentage limitations on the level of funds to be allocated shall be strictly avoided, except for review purposes, in order to take account of unique community needs.

It is the position of the conferees that the Secretary's review of each application (in the context of the three tests listed above) is a review to determine whether the activities designated by the community in its three-year plan are designed to achieve the overall objective of the program. However, the amendment provides that the Secretary may disapprove an application if the extent to which a primary purpose is being addressed is plainly inappropriate to meeting the needs and objectives which are consistent with the community's efforts to achieve the primary objective of the Act. An application could be disapproved even though the activity was clearly eligible and fits a primary purpose if the Secretary determined in light of the primary objective of the Act that the activity is plainly inappropriate to meeting the community's identified needs or objectives.

UDAG

Neighborhood impact: The Senate bill contained a provision not found in the House amendment which would require UDAG applications to analyze, and the Secretary to use a UDAG selection criterion, the impact of the proposed UDAG program on the residents, particularly those of low and moderate income, of residential neighborhood and on the neighborhood, in which the program is to be located. The conference report contains the Senate provision.

UDAG Eligibility: The Senate bill contained a provision that was not contained in the House amendment to redefine the requirements of the Urban Development Action Grant (UDAG) program, in order to make eligible for grants under this program cities and urban counties that contain areas within them exhibiting conditions of severe economic and physical distress. The conference report does not contain the Senate provision. The conferees, however, are aware that many cities and urban counties that are not presently eligible to participate in the UDAG program do contain areas that are severely distressed both economically and physically. The conferees are also aware that there is concern over the redirection of UDAG funds from presently-eligible cities and urban counties to cities and urban counties that are not presently eligible to participate in the program.

The conferees, therefore, believe the Secretary of HUD should study these issues and report to the authorizing Committees of the Congress by no later than March 31, 1979. This study shall include, but not be limited to, a determination of the problems which presently ineligible cities have in meeting the needs of distressed areas, an analysis of the ability of such communities to meet these needs without additional Federal assistance, the need for special criteria which can be used to measure levels of economic and physical distress substantially comparable to those otherwise applicable for eligible cities in areas of cities and urban counties that are presently not eligible to participate in the UDAG program, and shall include specific recommendations to enable, if feasible, the UDAG program to meet the conditions in presently ineligible cities and urban counties containng areas of physical and economic distress.

Access to CD programs

The Senate bill provided that no community could be barred from participating in any program authorized under Title I of the Housing and Community Development Act of 1974 solely on the basis of population, except as expressly authorized by statute. The House amendment provided that the Secretary could not establish requirements that limit or exclude the access of any community from community development assistance based on the population of such community, except as expressly authorized by statute. The conference report adopts the Senate provision.

Technical assistance

The House amendment contained a provision not found in the Senate bill which provided that the technical assistance authorized by section 107(a)(8) of the Housing and Community Development Act of 1974, is to be provided by the Secretary, directly or through contracts, to units of government, or to a group designated by such a governmental unit for the purpose of assisting the governmental unit to carry out its community development program. The conference report contains the House provision.

Effective data

The House amendment provided that the provisions of Title I would become effective October 1, 1978; except the provisions concerning (1) the "expected to reside" clarification, (2) technical assistance to local governments, and (3) application disapproval, would become effective on the date of enactment of this Act. The Senate bill did not have a similar provision. The conference report contains the House provision.

TITLE II—HOUSING ASSISTANCE PROGRAMS

FINANCIAL ASSISTANCE TO TROUBLED ASSISTED HOUSING PROJECTS

Purpose

The Senate bill contained a provision which stated the purpose of this section as being to provide assistance to restore or maintain the financial soundness, and to maintain the low and moderate income character, of certain projects covered by mortgages insured or assisted under the National Housing Act. The House amendment was similar, except it also had as a purpose the improved management of these projects. The conference report adopts the Senate provision with the added purpose to assist in the improvement of the management of the projects.

Authority

The Senate bill authorized the Secretary to provide financial assistance to owners of rental and cooperative housing projects meeting this section's requirements. The House amendment was similar, except the Secretary's authority was subject to approval in appropriation acts. The conference report adopts the House provision.

Program eligibility

The Senate bill made projects initially assisted or approved for assistance under sections 236 or the proviso section 221(d)(5) of the National Housing Act, or section 101 of the HUD Act of 1965, eligible for assistance, except that projects not insured under the National Housing Act could not be provided assistance before October 1, 1979. The House amendment was similar, except there was no provision for those projects approved for assistance, nor that they meet these criteria only initially. The conference report adopts the House provision.

The House amendment also contained three conditions upon which assistance is predicated relating to local governmental relationships to the project: (1) the community in which the project is located has evidenced a commitment to providing essential services to the project; (2) the taxes on the project are no greater than if the project was assessed according to normal property assessment procedures for that community; and (3) the appropriate unit of local government had been consulted to insure that assistance to a project under this program was consistent with local plans. The conference report contains the House provisions amended so that these conditions would not be required to meet prior to funding, rather, the Secretary would be directed to consult with appropriate local officials and seek assurance that: (1) the community in which the project is located is or will provide essential service to the project in keeping with the general level of such services in the community; (2) the taxes on the project are or will be no greater than if the project was assessed according to the community's normal procedures; and (3) assistance under this program would not be inconsistent with local plans and priorities. The conferees expect that the Secretary will actively and affirmatively seek these assurances from the pertinent local officials. The conferees anticipate that the Secretary will receive these assurances prior to making assistance available unless there are extenuating circumstances.

Use of assistance

The Senate bill contained a provision authorizing the Secretary to provide assistance in an amount consistent with this program, not to exceed the difference between estimated operating costs and project income. The House amendment authorized assistance in any amount consistent with the management-improvement plan and which did not exceed (a) an amount necessary to correct deficiencies caused by the deferral of regular maintenance, (b) an amount necessary to maintain the low and moderate income character of the project by reducing capital item reserve funds, and (c) an amount not greater than the operating deficit. The conference report adopts the House provision.

Estimated project revenue

The Senate bill computed overall estimated project revenue as the sum of (a) the amount of the rent to be paid by tenants, (b) amount of rental assistance payments made on behalf of tenants, (c) the amount of subsidy to be paid to the owner (such assistance specifically included interest differentials or any other payments to a mortgagee), and (d) other income. The House amendment was similar, except (a) in estimating anticipated rental income, section 236(f) of the National Housing Act was to be disregarded, and (b) there was no specific identification in the estimate of assistance to owners of interest differentials. The conference report adopts the House provision.

Tenant contribution

The House amendment had a requirement, not included in the Senate bill, that in computing estimated rent, at least 25 percent of each tenant's income was to be included, or if the tenant pays his or her own utilities, a percentage less than 25 percent taking into account those utility costs, except the total rent could not be more than the fair market rent. The conference report adopts the House provision with an amendment which permits the Secretary to employ an amount less than 25 percent of income in the computation if that lesser amount is provided for under another federally assisted housing program in which the tenant is a participant. The purpose of this amendment is to assure

that the tenant's contribution is not over counted in the calculation of estimated rental income. The conferees also wish to make clear that the computation of the tenant contribution can be based on the most recent tenant income certification. It is not the intent of the conferees to require the Secretary to undertake a new income certification procedure.

Delinquency and vacancy allowance

The House amendment also required, though the Senate bill did not, that any delinquency and vacancy allowance not exceed six percent of the estimated rent, except that the Secretary could permit a higher level if she deemed it appropriate during the first two years in which a project receives assistance under the program. The conference report adopts the House provision amended to permit the Secretary to allow a vacancy and delinquency allowance of greater than six percent during the first three years of assistance rather than two years as in the House amendment. The conferees intend to monitor the use and workability of this provision and if difficulties are encountered they expect the Secretary to recommend appropriate legislative remedies.

Estimated project operating expenses

The House amendment included restrictions on the calculation of estimated project expenses not included in the Senate bill. It specifically excluded the return on the owner's equity as an operating expense, and also required that the operating costs be consistent with the management-improvement plan and provided for the inclusion of the owner's reserve fund as an expense. The conference report adopts the House provision.

Payment schedule

The Senate bill required that payments under this program be made on an annual basis. The House amendment further required that the assistance be payable in at least quarterly intervals, and that the Secretary review the project's management improvement and operating plan at the time of payment. The conference report adopts the House provision. The Secretary in reviewing the plan should take into account any unanticipated uncontrollable cost increases which occurred during the previous quarter and where she deems it appropriate to adjust the project's budget to reflect them. It is, however, the view of the conferees that such adjustments should be held to a minimum and made only where absolutely necessary.

Discretionary adjustments

The Senate bill had a provision, not included in the House amendment, authorizing the Secretary to make discretionary adjustments in the annual operating budget and the amount of assistance as necessary to reflect changes in the project's income and operating expenses. The conference report does not contain this provision.

Regulations

The Senate bill authorized the Secretary to issue regulations, and specified inclusion of regulations requiring establishment of a reserve fund or other similar safeguards of a project's financial soundness. The House amendment was similar, but did not specify regulations requiring a reserve fund. The conference report adopts the Senate provision.

Authorization

The Senate bill provided authorizations for appropriations of $74 million for fiscal year 1979 and $96 million for fiscal year 1980 in addition to funds made available out of the section 236 reserve fund and all appropriated funds were to remain available until expended. The House amendment provided only an authorization appropriations of $74 million for fiscal year 1979 in addition to funds made available out of the section 236 reserve fund. The conference report contains the House provision amended to provide that all appropriated funds will remain available until expended.

The Senate bill contained a provision which required that all excess rental charges credited to the section 236 reserve fund after September 30, 1977, be merged with and be in addition to any funds appropriated for the program and such excess rental charges collected after September 30, 1978, be credited to and be in addition to any appropriation for the program. The House amendment provided that the tax and utility subsidy program authorized by section 236 of the National Housing Act would be repealed effective October 1, 1978, and that all funds in the Section 236 reserve fund after October 1, 1978, could only be used, subject to approval in an appropriations act, for the program authorized by this section but that no such funds could be so approved for any fiscal year beginning after September 30, 1979. The conference report contains the House provision amended such that only funds credited to the section 236 reserve fund after October 1, 1978, would be limited to use in the program authorized by this section. The conferees adopted this amendment so as to not prejudice the pending dispute between the Department and a class of tenants over the previous lack of use of the section 236 tax and utility subsidy program. Should a disposition of the dispute be made which leaves unobligated funds in the section 236 reserve fund, the conferees expect that legislative action will be taken to make such funds available for the program authorized by this section.

TENANT PARTICIPATION IN MULTIFAMILY HOUSING PROJECTS

Purpose

The Senate bill contained a provision not contained in the House amendment which stated a recognition of the importance and benefits of cooperation and participation of tenants in creating a suitable living environment and contributing to the successful operation of multifamily housing projects. The conference report contains the Senate provision.

Definition of multifamily housing projects

The Senate bill contained a provision, not in the House amendment, which defined a multifamily housing project as one which (1) is covered by a mortgage insured under the National Housing Act and assisted or approved for assistance under sections 236 or the proviso in section 221(d)(5) of the National Housing Act or under section 101 of the Housing and Urban Development Act of 1965, or (2) met the foregoing criterion and has been acquired and sold by the Secretary subject to a mortgage insured or held by the Secretary to a purchaser with whom, at the time of sale, there is an agreement to maintain the low-to-moderate income character of the project, or (3) is owned by the Secretary or covered by a mortage insured under the National Housing Act, or held by the Secretary, and is serving predominately low- and moderate-income tenants. The conference report contains the Senate provision amended to conform the definition of a multifamily housing project to that contained in the definition of an eligible project in section 201(c) of this act.

Program

The Senate bill contained a provision not in the House amendment which required the Secretary to adopt such measures as deemed appropriate to assure that: (1) tenants have adequate notice of, reasonable access to relevant information about, and an opportunity to comment on, major actions affecting rents, physical condition, or management of multifamily projects, and in the case of a HUD-owned project, disposition of the project; (2) owners cooperate in assisting tenants in obtaining rent subsidies or other assistance; (3) tenants are not evicted without good cause or adequate notice of the reasons therefor; and (4) owners cooperate with resident tenant organizations and do not interfere with the right of tenants to organize.

The conference report contains the Senate provision amended so that the Secretary shall assure that: (1) where the Secretary's written approval is required with respect to an owner's action, and the Secretary deems it appropriate, tenants have adequate notice of, reasonable access to relevant information about, and an opportunity to comment on such actions, and in the case of a HUD-owned project, disposition of the project and that such comments are taken into consideration by the Secretary prior to granting approval for the action; (2) owners not interfere with the efforts of tenants to obtain rent subsidies or other assistance; (3) leases approved by the Secretary provide that tenants may not be evicted without good cause or adequate notice of the reasons therefor, and do not contain unreasonable terms and conditions; and (4) owners do not impede the reasonable efforts of resident tenant organizations to represent their members or the reasonable efforts of tenants to organize.

The conferees recognize that tenants, together with owners, mortgagees and the Secretary of HUD must be concerned with the long-term physical and economic well-being of assisted multifamily housing projects. To better assure that the potential benefit of tenants' experience is reflected in the operation of a project, the Secretary has been directed to assure that with respect to those major actions of an owner for which the Secretary's written approval is required, and for which the Secretary believes that tenants have a significant contribution to make in assisting in the formulation of the Secretary's decision, tenants have an opportunity to provide such input to the Secretary and that the Secretary will consider the tenant comments in a timely manner and avoid delay. The conferees do not envision that the Secretary will require such input in all of the Secretary's decisions affecting a project, such as releases from residual receipts accounts, but only major actions such as rent increases, a change in ownership or management, a conversion of use, release of security, a demolition, or major physical alterations to the project.

With respect to rent subsidies or other public assistance, owners are to make available to residents any information prepared and distributed to the project by the Department of Housing and Urban Development regarding such programs and assistance.

Funding

The Senate bill contained a provision not in the House amendment which authorized the Secretary, in carrying out the other provisions of the section, to prescribe standards for compliance which might include approval of reasonable expenditures from project income to support resident tenants' organizations. The conference report does not contain this provision. The conferees believe that the Secretary now has authority to approve reasonable expenditures from project funds to pay for tenant activities related to the project. The conferees wish to indicate that this authority includes, for example, the approval of expenditures necessary to make meeting spaces available to tenants and representative tenant organizations in situations where charges are normally imposed for the use of such facilities. Clearly, project owners are not to be permitted to unreasonably withhold the use of such spaces when requested by representative tenant organizations.

Discretion

The Senate bill had a provision not found in the House amendment which authorized the Secretary to take such actions and prescribe such standards for compliance as the

Secretary deemed appropriate to effectuate the purposes of this section. The conference report does not contain this provision but does include language which postpones the effective date of the section for ninety (90) days following the effective date of this Act so as to permit the Secretary to prepare and promulgate regulations implementing this section.

MANAGEMENT AND PRESERVATION OF HUD-OWNED MULTIFAMILY HOUSING PROJECTS

Declaration of policy and objectives

The Senate bill contained a provision not in the House amendment providing that the goals of the property management and disposition program of HUD shall be to dispose of projects in the least costly fashion while still furthering the policy objectives of: preserving housing units available and affordable to low- and moderate-income families, revitalizing residential neighborhoods, maintaining existing housing stock, minimizing displacement and demolishing projects only as a last resort. The Secretary was authorized to balance these competing goals in a manner the Secretary deems will further the overall purpose of the section.

The conference report states that the purpose of the property management and disposition program of HUD shall be to manage and dispose of projects in a manner which will protect the financial interests of the federal government and be less costly to the federal government than other reasonable alternatives by which the Secretary can further the goals of:

(1) preserving the housing units so that they can remain available to and affordable by low- and moderate-income families;

(2) preserving and revitalizing residential neighborhoods;

(3) maintaining the existing housing stock in a decent, safe and sanitary condition;

(4) minimizing the involuntary displacement of tenants; and

(5) minimizing the need to demolish projects.

It also provides that the Secretary, in determining the manner by which a project shall be managed or disposed of, may balance competing goals in individual projects so as to further the achievement of the overall purpose of this section.

Authority and evaluation of potential purchasers and managers

The Senate bill contained a provision not in the House amendment which provided that notwithstanding the provisions of the Federal Property and Administration Services Act of 1949 or any other law, the Secretary would be authorized to: (1) dispose of HUD-owned multifamily projects on a negotiated, competitive bid or other basis to a qualified purchaser after considering the low- and moderate-income character of the project and the goals of this section; and (2) to contract for management's services on a negotiated, competitive bid, or other basis. The Senate bill also provided that in evaluating the qualifications of potential managers and purchasers of multifamily projects, the Secretary must consider, among other factors: (a) ability to implement sound financial management, (b) ability to provide sound physical management, (c) ability to respond to the economic and social needs of lower income tenants, and work cooperatively with resident organizations, (d) responsiveness of the proposed management plan to the needs of the property and the residents, (e) adequacy of organizational, staff and financial resources, and (f) the cost of services.

The conference report deletes the reference to the Federal Property and Administration Services Act or any other laws and provides that the Secretary is authorized to dispose of a multifamily housing project owned by the Secretary on a negotiated, competitive bid, or other basis, on such terms as the Secretary deems appropriate considering the low- and moderate-income character of the project and the goals and requirements of this section, to a purchaser determined by the Secretary to be capable of (1) satisfying the conditions of the disposition; (2) implementing a sound financial and physical management program; (3) responding to the needs of the tenants and working cooperatively with resident organizations; (4) providing adequate organizational, staff and financial resources to the project; and (5) meeting any other requirements as the Secretary may impose.

In addition, the conference report provides that the Secretary is authorized to contract for management services for a HUD-owned multifamily housing project on a negotiated, competitive bid, or other basis at a price determined by the Secretary to be reasonable, with a manager the Secretary has determined is capable of satisfying the similar requirements as those imposed on a purchaser except there is no requirement dealing with the condition of disposition.

Secretary's maintenance duty and full occupancy

The Senate bill contained a provision not in the House amendment which provided that the Secretary shall maintain all occupied, HUD-owned multifamily projects in a decent, safe and sanitary condition, and that the Secretary maintain full occupancy in such projects.

The conference report contains these two provisions, but provides an exception to these obligations where the Secretary has determined on a case-by-case basis that such policies would be clearly inappropriate given the manner in which the Secretary has determined an individual project will be managed or disposed of pursuant to the goals of this section.

Tenant and neighborhood participation in project maintenance

The Senate bill contained a provision not contained in the House amendment requiring the Secretary to make reasonable efforts to encourage the employment and training of tenants of HUD-owned housing projects and residents of the neighborhcods in which these projects are located in the repairs and maintenance of these projects. The conference report does not contain this requirement; however, the conferees believe that substantial benefits may be obtainable from such efforts and that the Secretary is encouraged to maximize opportunities for such employment.

Technical assistance for developing cooperatives to purchase projects

The Senate bill contained a provision not contained in the House amendment which authorized the Secretary to consult with and furnish technical assistance to tenants and organizations for the purpose of developing nonprofit cooperatives which will purchase HUD-owned multifamily projects, and to develop tenant management capabilities. The conference report does not contain this provision. However, the conferees believe that the Secretary now has the authority to initiate such efforts and wish to encourage the use of the Department's existing technical assistance resources to assist in the conversion of HUD-owned projects to tenant ownership and in the development of tenant management capabilities.

Tenant displacement

The Senate bill contained provisions, not included in the House amendments, which provided that whenever tenants will be displaced as a result of the disposition of, or repairs to, a multifamily HUD-owned project, the Secretary shall notify such tenants of pending displacement and the relocation assistance to be provided. In addition, the Secretary would be required to seek to assure maximum opportunity for any displaced tenant to return to a repaired unit, to occupy a unit in another project owned by the Secretary, to obtain assistance under the U.S. Housing Act of 1937, or receive such relocation assistance as the Secretary deems appropriate.

The conference report contains these provisions. In determining the level of relocation assistance to be provided in specific instances, the Secretary should consider both the need and the income of the displaced tenants.

Alternatives to assignment of an insured mortgage

The Senate bill contained a provision not contained in the House amendment which provided that whenever the Secretary is requested to accept assignment of a mortgage insured by the Secretary covering certain types of multifamily housing projects, and the Secretary determined that partial payment of a claim would be least costly to the federal government than other reasonable alternatives for maintaining the low- and moderate-income character of the project, the Secretary could request the mortgagee, in lieu of assignment, to accept partial payment of the claim under the mortgage insurance contract, and recast the mortgage. The provision also provided that, as a condition of such partial payment, the mortgagor agree to repay the amount of such payment to the Secretary with this obligation secured by a second mortgage on the project. The Secretary was provided the authority to define the terms and conditions of both the recast first mortgage and the new second mortgage.

The conference report contains the Senate provision. The conferees believe that in limited instances this new authority may be a very useful additional tool which the Secretary might utilize to effectuate the overall goals of the National Housing Act and of the Congress as set forth in this section. The conferees wish to make explicit that a mortgagee's participation in such an arrangement would be purely voluntary and based on its determination that such an arrangement would be in its own best interest. The conferees expect that this authority will be used sparingly and direct the Secretary to consult with the appropriate committee of both the Senate and the House of Representatives on guidelines for its use, and at least, during the initial period of its use, to periodically report to the committee on those specific instances in which the authority is being utilized.

The conferees believe that this new authority, together with other policies of the Department with respect to troubled multifamily housing projects and the disposition of HUD-owned projects such as the assignment and modification of mortgagees, workout arrangement, and transfers of assets from nonprofit sponsors to limited dividend owners, must be coordinated and utilized in a consistent manner. The conferees accordingly direct the Secretary to take steps to assure that these activities and policies are consistent and effectively coordinated, and the conferees intend to carefully monitor and review policy development and implementation in these areas.

Definition of multifamily housing project

The Senate bill contained a provision defining "multifamily housing projects" for the purposes of this section as a multifamily project determined by the Secretary to be serving predominately low- and moderate-income tenants. The House amendment contained no such provision. The conference report defines this term to mean a multifamily project which is or prior to acquisition by the Secretary was assisted under section 236 or the proviso of section 221(d)(5) of the National Housing Act or under section 101 of the Housing and Urban Development Act of 1965, and insured under the National Housing Act.

Housing access

The Senate bill contained a provision, not included in the House amendment, providing that the Secretary require any purchaser of a HUD-owned multifamily project to agree not to refuse unreasonably to lease a vacant dwelling unit which rents for an amount not greater than the fair market rent for a comparable unit in the area, as determined under section 8 of the U.S. Housing Act of 1937 to a holder of a certificate of eligibility under that section solely because such prospective tenant is a certificate holder. The conference report contains the Senate provision with an amendment providing that this requirement pertains only to a project sold on or after October 1, 1978.

HOUSING FOR THE ELDERLY AND HANDICAPPED

The House amendment contained a provision not found in the Senate bill which provides that a corporation for purposes of the section 202 program must, in addition to existing requirements, have a governing board which has been selected so as to assure significant representation of the views of the community and that the board is responsible for the operation of the section 202 project. The conference report contains the House provision. This provision is intended to increase the involvement of local residents in the development and operation of section 202 housing projects, however, the conferees wish to make clear that this increase in local involvement is not intended to limit the participation of national nonprofit organizations in the program.

The conferees are aware that there has been some confusion over whether chronically mentally ill persons are eligible for section 202 housing. It is the view of the conferees that many chronically mentally ill persons could fulfill the statutory definition of handicapped and thus would be made eligible for section 202 housing. The conferees wish to make clear that it was never the intent of Congress to exclude chronically mentally ill persons from participating in the section 202 program. However, the conferees are aware that the housing needs of some chronically mentally ill persons may differ from those of other handicapped persons and that the Department has not heretofore had experience with providing housing for such persons. The conferees therefore expect that the Secretary will promptly develop criteria and standards for housing for the chronically mentally ill so that such persons can become active participants in the program. In this regard, the conferees believe that the current HUD demonstration can provide an ongoing useful basis for evaluating such criteria and standards.

LOW-INCOME HOUSING

Set-asides

The Senate bill required a set-aside from the annual contributions contract authority provided for fiscal year 1979 of at least $50 million for the modernization of conventional public housing projects and of $30 million for a new homeowner's rehabilitation assistance program. The House amendment deleted, as of October 1, 1978, the set-aside of funds from the annual contributions contract authority for the modernization of public housing projects. The conference agreement contains the Senate provision amended to delete the set-aside for the homeowner's rehabilitation assistance program.

The conferees are very concerned about the physical conditions of existing public housing projects and believe that increased amounts of funding must be directed to modernize and restore these projects to decent, safe and sanitary conditions. The conferees are concerned that the Department may be adopting an inconsistent position in urging communities to accept greater amounts of public housing while not making sufficient funds available to upgrade, preserve and modernize existing projects. In addition, while fully supporting the Department's efforts to upgrade some of the nation's largest, worst, but still salvageable projects, the conferees strongly believe that modernization funds should be made available to all existing projects which require these funds regardless of their size. It appears inconsistent for HUD to encourage the allocation of public housing units in smaller, scattered, and decentralized packages and not fully support the modernization of existing smaller projects.

Although the conference report does not contain the homeowners rehabilitation assistance program, the conferees wish to encourage the rehabilitation of one-to-four family dwelling units by persons of all incomes. To this end, the conferees have expanded the section 312 rehabilitation loan program and amended section 203(k) of the National Housing Act. In addition, community development funds are available if communities wish to utilize such funds for this purpose. Both section 235 of the National Housing Act and the low-rent public housing program provide authority to assist efforts by lower-income families to become homeowners. Efforts are also underway by the Neighborhood Reinvestment Corporation in supporting the Neighborhood Housing Services of America to address the problems of homeownership and neighborhood revitalization. In order that both Houses may consider recommendations for possible inclusion in next year's legislation, the conferees direct the Secretary to submit a report to Congress by March 15, 1979, which examines existing authorities and programs with a view toward increasing, maintaining, and coordinating opportunities for rehabilitation and homeownership by lower-income families. The report should include an examination of the desirability of a section 8 program of the type proposed in the Senate bill or other assisted housing programs, as well as counseling and special programs, as a means to assist lower-income homeowners. The Secretary may include in this report legislative recommendations which she believes necessary to carry out these objectives. The conferees agree that both bodies will review the Secretary's report in their hearings on housing legislation next year.

Consistency with Housing Assistance Plans (HAPs)

The House amendment contained a provision not included in the Senate bill which made applicable to additional annual contributions contract authority provided on or after October 1, 1978, the requirement that programs under the U.S. Housing Act of 1937 be administered to provide assistance for new, substantially rehabilitated and existing units to the maximum extent consistent with the allocation formula under section 213(d) of the 1974 Housing and Community Development Act and with communities' Housing Assistance Plans. The conference report contains this provision.

Notice to vacate

The House amendment contained a provision not included in the Senate bill which gave the owner of a section 8 project the right to give notice to vacate in accordance with such State and local laws as the Secretary has determined give adequate protection to the tenants, and in accordance with the determination of the public housing authority pursuant to review procedures approved by the Secretary. The conference report does not contain this provision.

Section 8 substantial rehabilitation

The House amendment contained a provision dealing with section 8 substantial rehabilitation that was not included in the Senate bill. The House amendment provided that the maximum rent could not be greater than the fair market rents for new or existing section 8 units, or a lesser amount that would be appropriate taking into consideration the owner's investment in the assisted units, and other relevant factors. The assisted units were to be rehabilitated to a level not beyond applicable codes and standards and had to meet cost-effective, energy efficiency standards. In addition, all units of the building in which the assisted units are located had to meet applicable codes and standards for decent, safe and sanitary housing as prescribed by the Secretary. The maximum term for assistance contracts on substantial rehabilitated units could not exceed the maximum established for new section 8 units under existing law or a shorter term if determined to be appropriate because of the owner's investment or other relevant factors. Finally, this subsection would be effective for contracts entered into or or after 180 days after enactment. The conference report contains the House provision amended so that the subsection would be effective 270 days after enactment.

Contracts to upgrade

The Senate bill contained a provision not included in the House amendment which (notwithstanding any other provision of section 8) authorized assistance payments to owners or prospective owners who agreed to upgrade housing and, thereby, preserve it through upgrading which is less than substantial rehabilitation; assistance could be made to any unit in a project which, overall, needed upgrading. The conference report contains this provision amended to delete the phrase "notwithstanding any other provision of section 855.

Percentage of nonelderly

The Senate bill contained a provision not included in the House amendment which under section 8 or public housing consists of a single person who is not disabled, displaced, the remaining member of a tenant family, nor 62 years of age or older, nor more than 20 percent of the units under the jurisdiction of any public housing agency should be occupied by such persons. The conference agreement contains this provision amended to change the percentage limitation to 15 percent.

Effective date

The House amendment contained a provision not included in the Senate bill which established that the amendments of this section, except for the subsection on section 8 assistance for substantial rehabilitation; became effective on October 1, 1978. The conference report contains this provision.

PUBLIC HOUSING SECURITY DEMONSTRATION

Findings

Both the Senate bill and the House amendment set forth Congressional findings that low-income and elderly public housing residents are being threatened as a result of inadequate security arrangements to prevent physical violence, theft, burglary and other crimes and that an integral part of successfully providing decent, safe and sanitary dwellings for low-income persons is to insure that the housing is secure. In addition, the Senate bill declared that living in an unsecure housing environment has forced these residents to restrict their lives and use of the environment because of concern about crime; that residents are abandoning public housing projects at a time when there is an increasing demand for public housing units; that higher vacancy rates and heavy financial losses of management in some cases have led to abandonment of public housing projects; that local public housing authorities have inadequate security arrangements for the prevention of crime and vandalism and lack specific operating funds to provide security; and that action is needed to provide for

the security of these residents and to preserve the Nation's investment in its public housing stock.

The House amendment declared that: older persons generally regard the fear of crime as the most serious problem in their lives; crime and the fear of crime have led some residents to move from public housing; and public housing authorities may have inadequate security arrangements for the prevention of crime and vandalism. The conference report includes the House provision amended to add a finding that action is needed to provide for the security of public housing residents and to preserve the Nation's housing stock.

Policy

Both the Senate bill and the House amendment declared that the policy of the United States is to provide for the demonstration and evaluation of more effective means of mitigating crime and vandalism in public housing projects. The Senate bill, in addition, established as a policy, the development of a comprehensive program for reducing crime and vandalism in all the Nation's public housing projects. The House amendment declared the purpose of the policy was to provide a safe living environment, particularly for the elderly residents of public housing projects. The conference report contains the House provision.

Program authority

The Senate bill directed the Secretary of HUD to initiate promptly a program for the development, demonstration, and evaluation of improved, innovative community anticrime and security methods to reduce crime in public housing projects and their surrounding neighborhoods. The House amendment is similar except it limits the Secretary to initiating and carrying out the program during the fiscal year beginning on October 1, 1978, and to the extent approval in appropriation Acts. The conference report includes the House provision.

Project selection

The Senate bill and the House amendment both provided that in selecting projects to receive assistance under this section, the Secretary must consider the extent of crime and vandalism, the nature and quality of community anticrime efforts in the projects and surrounding areas, the nature and quality of police and other protective services to the projects, the vacancy rate and demand for public housing in the locality, and the extent of abandonment of public housing units. In addition, the Senate bill stated that priority must be given to plans submitted by public housing authorities which provide for the restoration of abandoned dwelling units, coordination between public housing management and local government in providing security and social services to the projects and tenants, and maximum opportunity for tenant involvement and employment in the security programs. The House amendment required the Secretary to assure, in selecting projects, that a broad spectrum of project types, locations and tenant populations are represented. The conference agreement contains the House provision.

Coordination of resources

The Senate bill provided that the Secretary must make every effort to coordinate and jointly target resources with other agencies in carrying out this demonstration program—particularly the Law Enforcement Assistance Administration, the Department of Health, Education and Welfare, the Department of Labor, Community Services Administration, and ACTION. The House amendment directed the Secretary, in selecting anitcrime and security methods to be demonstrated, to give particular attention to comprehensive plans submitted by public housing authorities which provide for coordination between housing management and local law enforcement officials or coordination of resources available through LEAA, HEW, the Department of Labor, CSA, ACTION, or other State or Federal agencies. The conference agreement contains both the House and Senate provisions.

Survey and report

Both the Senate bill and the House amendment directed the Secretary of HUD to carry out a survey of crime in public housing projects in the Nation, and report to the Congress within 18 months after the date of enactment. The report must include information on the level of crime and vandalism, findings from the demonstration and evaluation of various methods of reducing crime levels, recommendations for a comprehensive program to provide increase security to all public housing projects, and the estimated costs of such program. In addition, the House amendment directed the Secretary to (1) survey the nature and extent of resources currently available and employed to alleviate crime and vandalism in public housing; and (2) make legislative recommendations for increasing the coordination between anticrime programs of other State and Federal agencies that may be used by public housing authorities. The conference report contains the House provision.

Authorization

The Senate bill authorized that not more than $10 million from fiscal 1979 funds appropriated for the public housing operating subsidy program be used for this program. The House amendment directed that not more than $12 million from fiscal 1979 funds appropriated for HUD's assisted housing contract authority be used for this program. The conference report contains the House provision. The conferees clearly intend that the $12 million be available only to provide single-year grants for fiscal year 1979 and are not to be used to fund long-term contracts under this demonstration program. The conferees further intend that (except for up to $1 million) the funds authorized for this program not be counted as a portion of the $50 million set-aside for modernization contracts.

SECTION 8 DEMONSTRATION

The House amendment contained a provision that was not contained in the Senate bill directing the Secretary to conduct a demonstration to determine new methods for improving the section 8 program to encourage owners to make wider use of it for low income families, especially those who have more than two children, in areas with low vacancy rates. The Secretary was permitted to use additional annual contributions contract authority, subject to appropriations, to carry out the proposed study; and was directed to report the results of the study to both Houses annually during the period in which it was being carried out. The conference report contains the House provision amended so that the Secretary is required to examine alternative means of encouraging section 8 housing development for large families in low vacancy areas, and to report to Congress with any legislative recommendations within a year.

SECTION 8 HOMEOWNERS' REHABILITATION ASSISTANCE

Set-aside

The Senate bill contained a provision not found in the House amendment which would authorize a set-aside of not less than $30 million in fiscal year 1979 from section 8 funds for assistance payments to lower income homeowners who obtain private rehabilitation loans. The conference report does not contain this provision.

Contract term

The Senate bill had a provision not found in the House amendment which provided that each contract entered into under this program must be for a term of not less than one month nor more than 180 months. The conference report does not contain this provision.

Program

Eligible units: The Senate bill had a provision not found in the House amendment which provided that the Secretary may contract with PHAs so that the PHAs may make assistance payments with respect to loans to finance the rehabilitation of one-to-four family units owned and occupied by lower income families where the rehabilitation is carried out in accordance with a plan for rehabilitation meeting requirements, or contained in, an applicable HAP. Where the local PHA has extended such assistance, the PHA, local government agency, or nonprofit neighborhood entity designated by the local government or the Secretary, would be required to provide homeowner counseling and monitoring concerning the extent of rehabilitation activities and the eligibility of contractors to conduct such rehabilitation. The conference report does not contain this provision.

Amount of assistance: The Senate bill contained a provision not found in the House amendment which provided that the amount of assistance would be the lesser of the monthly costs of principal, interest, and other amounts of repayment of the loan, or an amount equal to the difference between the contribution to monthly housing costs made by the homeowner pursuant to section 8(c)(3) of the U.S. Housing Act of 1937 and the total monthly housing cost. These assistance payments would be periodically paid to the lender in accordance with the Secretary's regulations. The conference report does not contain this provision.

Eligible types of loans: The Senate bill contained a provision not found in the House amendment which provided that no contract could be entered into except with respect to loans: (A) made by federally chartered or insured financial institutions, or other entities approved by the Secretary or by the applicable unit of local government in accordance with the Secretary's regulations; (B) which finance activities approved by the applicable unit of local government, or which could be financed under home improvement loans under Title I of the National Housing Act; (C) which finance rehabilitation activities by the owner, or by contractors approved by the applicable unit of local government; and (D) which have terms not in excess of those under Title I of the National Housing Act. The conference report does not contain this provision.

Regulations: The Senate bill contained a provision not found in the House amendment which authorized the Secretary to issue such regulations as are necessary to assure that the costs of rehabilitation would not exceed the costs necessary to meet local housing codes or other appropriate standards. The conference report does not contain this provision.

SOLAR UNITS

Purpose

The Senate bill contained a section that was not included in the House amendment which was designed to encourage the installation of solar energy systems in assisted residential housing projects. The Senate bill declared that the purpose of the section is to promote the application of viable solar energy installations as the most dependable, pollution-free, and desirable source of energy for residential housing units. The conference report includes the Senate provision amended to state that viable solar energy systems are a desirable source of energy for residential housing.

Authority

The Senate bill authorizes the Secretary of HUD to permit the installation of solar

units which are economically feasible in residential housing assisted through the section 312, section 202, and section 8 programs. The conference report amends the Senate provision to require that the solar energy systems be cost-effective, as well as economically feasible. Cost-effective means that over the useful life of the solar system, sufficient nonrenewable energy will be saved to pay for the cost of the system including financing costs. The conferees expect that HUD will develop guidelines to assist builders in determining what solar systems will be cost-effective given regional differences in climate and projected energy costs. In no event do the conferees expect fair market rent levels to be increased to cover the cost of solar energy systems.

Definitions

The Senate bill included the following items in the definition of solar units: active and passive solar thermal energy equipment; photovoltaic cells; devices or techniques which conserve energy by increasing the energy efficiency of existing equipment, methods of operation or systems which use fossil fuels and which are on the Energy Conservation Measures List of the Secretary of Energy; equipment whose primary purpose is the production of energy from wood, biological waste, grain or other biomass source, district heating equipment; hydroelectric power equipment, wind energy conversion equipment, or engineering, architectural, consulting or other professional services necessary for the use of the solar units. The conference agreement amends the Senate provision to define a "solar energy system" as any addition, alteration, or improvement to an existing or new structure which is designed to utilize wind energy or solar energy either of the active type based on mechanically forced energy transfer or of the passive type based on convective, conductive, or radiant energy transfer or some combination of these types to reduce the energy requirements of that structure from other energy sources, and which is in conformity with such criteria and standards as shall be prescribed by the Secretary of the Department of Housing and Urban Development in consultation with the Secretary of Energy.

Guidelines

The Senate bill also contained a provision directing the Secretary of HUD to develop within twelve months of enactment, guidelines to determine the long-term economic feasibility of solar units. The conference report does not contain this provision. The conferees expect that existing FHA minimum property standards, amended, if necessary, to cover solar energy systems as defined in this section, will provide adequate guidelines as to the quality of, and construction standards for, solar systems permitted under this section. However, the conferees expect that HUD will develop additional guidelines to assist builders in determining what solar systems will be cost-effective given regional differences in climate and projected energy costs.

Promotion

The Senate bill contained another provision directing the Secretary of HUD to take the steps necessary to promote the installation of economically feasible solar units in residential housing, taking into account the interests of low-income homeowners and renters. Those actions were to include publicizing the availability and feasibility of solar units to current or potential recipients of assistance from HUD. The conference agreement amends the Senate provision to direct the Secretary of HUD to encourage the installation of solar energy systems in residential housing assisted through the section 8, section 202, and section 312 programs.

Report

The Senate bill contained a requirement that within 18 months of enactment, the Secretary of HUD, in conjunction with the Secretary of Energy, should report to Congress regarding: (1) the number of solar units contracted for or installed as a result of this provision within the first 12 months of enactment; (2) the number of solar units projected to be contracted for or installed under all HUD programs by the end of calendar year 1985, and recommendations for increasing this number given a reasonable range of economic assumptions and specifying alternative Federal incentives that could be used; (3) recommendations regarding the most effective Federal incentive for increasing the affordability of solar units in residential housing during the first five years after the installation of such units; and (4) an analysis of the feasibility of using community-scale solar energy and other alternative energy approaches and then applicability to community development activities.

The conference report amends the Senate provision to require the Secretary of HUD, in conjunction with the Secretary of Energy, to report to Congress within 18 months of enactment regarding the effectiveness of this solar program. The report is to include the number of solar systems contracted for, installed, or under order within the section 8, section 202, and section 312 programs during the first 12 months after enactment and an analysis of any problems and benefits related to encouraging the use of solar systems in these programs.

TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS

COMPREHENSIVE PLANNING ASSISTANCE

The Senate bill contained a provision authorizing an appropriation of not to exceed $57 million for fiscal year 1979 for section 701 comprehensive planning assistance. The House amendment contained a provision authorizing an appropriation of not to exceed $65 million for fiscal year 1979. The conference report contains the Senate provision.

FEASIBILITY STUDIES

The House amendment and the Senate bill contained a provision authorizing the HUD Secretary to conduct demonstrations to determine the feasibility of expanding homeownership opportunities in urban areas through the conversion of multifamily housing to condominium or cooperative ownership by individuals and families. The Senate bill contained an additional provision allowing for other techniques besides conversion to cooperatives and condominiums for expanding homeownership opportunities. The conference report contains this Senate provision.

The House amendment contained a provision authorizing the HUD Secretary to conduct a study of the feasibility of underground residential housing and changes in housing codes and financing which may therefore be necessary; a preliminary report to both Houses at the end of the first year after enactment and a final report within 2 years, with both findings and legislative recommendations. The Senate bill contained no provision. The conference report contains the House provision with an amendment deleting the preliminary report and reducing the period for the study to 1 year from 2 years.

CRIME INSURANCE AND RIOT REINSURANCE

The House amendment contained provisions authorizing the HUD Secretary to provide new crime insurance and riot reinsurance through September 30, 1979; to continue existing crime insurance and riot reinsurance coverage through September 30, 1982; and extending to September 30, 1979, the submission date for the Secretary's plan for liquidation of these insurance programs. The Senate bill authorized the HUD Secretary to provide new crime and riot reinsurance through September 30, 1981, extending existing crime and riot reinsurance coverage through September 30, 1984, and extending the submission date for the Secretary's plan for liquidation of these insurance programs until September 30, 1982.

The conference report contains the Senate provisions with an amendment providing for new crime and riot reinsurance through September 30, 1980, continuing existing crime and riot reinsurance coverage through September 30, 1983, and extending the submission date for the Secretary's plan for liquidation of these insurance programs through September 30, 1981.

FAIR PLAN RATES

The House amendment contained a provision not included in the Senate bill providing that on and after January 31, 1979, no risk insured under a FAIR plan shall be at a rate higher than the rates set by the principal State-licensed rating organization for essential property insurance in the voluntary market; except this provision does not prohibit the non-discriminatory application to any such risk of condition charges for substandard physical conditions within the control of the applicant as set by the principal State-licensed rating organization. The conference report contains the House provision.

FLOOD INSURANCE

The House amendment contained provisions authorizing the HUD Secretary to provide new flood insurance through September 30, 1979, and to provide subsidized flood insurance under HUD's emergency program in communities (for which no actuarial rates and elevation studies have yet been completed) through September 30, 1979. The Senate bill authorized the HUD Secretary to provide new flood insurance through September 30, 1980, and extended the emergency program through September 30, 1980. The conference report contains the Senate provisions.

NATIONAL NEIGHBORHOOD POLICY ACT

The Senate bill contained provisions authorizing the National Commission on Neighborhoods' study to be submitted within 15 months (rather than 1 year) from date when NNPA funds first became available and increasing from $1 million to $1,500,000 the authorization for the NNPA. The House amendment contained no provision. The conference report contains the Senate provision authorizing the additional time for the National Neighborhood Commission to complete its study, but contains no provision for additional funding authority.

HUD DAY CARE CENTERS

The Senate bill contained a provision authorizing the HUD Secretary to establish one or more day care center facilities as well as to participate in the establishment of interagency day care facilities for children of households of HUD employees, and to establish appropriate fees and charges, and also authorized the Secretary to provide limited start-up costs for any such facilities in an amount limited to 3 percent of the first years' operating budget, but not to exceed $3,500. The House amendment contained a similar provision but did not authorize the Secretary to provide limited start-up costs for such facilities. The conference report contains the Senate provision.

SALE OF SURPLUS LAND FOR HOUSING

The Senate bill contained a provision revising certain provisions of the Housing and Urban Development Act of 1969 so as to permit surplus Federal real property to the Secretary of HUD for sale or lease at its fair value for use as housing to be occupied by predominantly low and moderate income families or individuals assisted under a Federal housing program, a State or local program with the same general purpose, and for related public commercial or industrial facilities approved by the Secretary. Prior to any such disposition to a nonpublic body, the Secretary would be required to notify the local unit of government, and could not dis-

pose of the property if such disposition is objected to within 90 days by the local government. However, the Senate provision authorized the Secretary to override the objections of the local governing body if Secretary determines that (1) the proposed disposition would be consistent with any approved housing assistance and community development plans developed by the local body pursuant to the Housing and Community Development Act of 1974, or (2) in cases where such plans are not available, that there is a need for low- and moderate-income housing, taking into consideration any applicable State housing plans, and that there are or will be public facilities available in the area adequate to serve any housing project proposed in conjunction with the proposed disposition of Federal lands.

The House amendment contained a provision similar to the provision in the Senate bill, except that the provision in the House amendment contained no authority for the Secretary to override the objections of the local government.

The conference report contains the Senate provision. The conferees wish to make clear that the authority provided the Secretary to override the objections of the local government is limited and is intended to give the Secretary only the same authority which the Secretary now has to approve applications for assistance under various federally assisted housing programs pursuant to section 213 of the Housing and Community Development Act of 1974. In every instance where the disposition of federal surplus property is for the purpose of making land available for low and moderate income housing and where a housing assistance plan exists, such disposition must be pursuant to a housing assistance plan adopted by the particular community in which the property is located.

INCREASE IN GNMA PURCHASE AUTHORITY AND LIMITS

The House amendment contained provisions providing that the maximum original principal obligation of most mortgages which may be purchased by GNMA under section 305 of the National Housing Act would be increased to $50,000 for a one-family residence; $55,000 for a two- or three-family residence; $62,500 for a four-family residence, and for a property with more than four dwelling units, $38,000 per unit ($45,000 in high-cost areas).

The Senate bill contained provisions providing that the maximum principal mortgage obligation able to be purchased by GNMA is increased to $60,000 for a one-family residence; $65,000 for a two- or three-family residence; $75,000 for a four-family residence; and for a property with more than four dwelling units, $38,000 per dwelling unit ($45,000 in high-cost areas). The Senate bill further provided that the aggregate amount of purchasing authority for purchase of mortgages by GNMA is increased by $500 million, subject to approval in an appropriation act on October 1, 1978.

The conference report contains the Senate provisions with an amendment increasing the principal mortgage obligation able to be purchased by GNMA to $55,000 for a one-family residence, $60,000 for a two-to- three-family residence, and $68,750 for a four-family residence.

NATIONAL INSTITUTE OF BUILDING SCIENCES

The House amendment contained a provision providing authorizations for the National Institute of Building Sciences not appropriated for fiscal years 1977 and 1978 shall be available for appropriation through fiscal year 1979. The Senate bill contained a similar provision but provided that the amounts appropriated for fiscal year 1977 and fiscal year 1978 shall be available through fiscal year 1982. The conference report contains the Senate provision.

SECONDARY MORTGAGES ON INSURED PROPERTIES

The House amendment contained a provision amending title V of the National Housing Act by adding a new section: in carrying out title II of the Act with respect to insuring mortgages secured by a one-to-four family dwelling unit, the Secretary may not deny such insurance for any such mortgage solely because the dwelling unit will be subject to a secondary mortgage or loan, or other secondary lien, held by any State or local governmental agency under terms approved by the Secretary. The Senate amendment contained no provision. The conference report contains the House provision.

REGULATORY REVIEW PROCEDURE

Both the House and the Senate bills contained provisions related to the review of agency regulations.

The House amendment contained a provision not included in the Senate bill which gave either House of Congress the power to veto any rule or regulation of the Department of Housing and Urban Development. The provision required that simultaneous with prescribing any rule or regulation (except rules governing the FHA interest rate) the Secretary should transmit a copy to the Senate and the House; the regulation would not become effective if within 90 calendar days of continuous session of Congress after the date that the rule is prescribed, either House of Congress adopted a resolution disapproving the specific matter of the rule or regulation; if, at the end of 60 calendar days of continuous session after the date that the rule is prescribed, no committee of either House has reported or been discharged from further consideration of a resolution disapproving the regulation, and neither House has adopted such a resolution, the rule or regulation would go into effect immediately; congressional inaction on, or rejection of, a resolution of disapproval would not be deemed an expression of approval of the regulation involved.

The Senate bill contained a provision directing the Secretary of HUD, not later than January 1, 1979, and not later than such date in each year thereafter, to publish in the Federal Register an agenda of regulations expected to be considered in that fiscal year.

Prior to publication of a proposed regulation, the Secretary was required to conduct a thorough analysis of the regulation and its impact, including a cost-benefit analysis, an analysis of the extent the regulation duplicates or contradicts existing regulations and an assessment of any increased record keeping and reporting requirements caused by the new regulations. A summary of this analysis was to be included when the proposed regulation was published.

The conference agreement contains a substitute amendment which combines and modifies both the Senate and House provisions. The amendment would require the Secretary of HUD, within 30 days of enactment and at least every 6 months thereafter, to submit to the Banking Committees of both Houses an agenda of rules or regulations which are under development or review by the Department. If within 30 calendar days of continuous session of Congress after the agenda has been transmitted either Committee notifies the Secretary that it intends to review any rule or regulation, the Secretary shall submit to both Committees a copy of any such rule or regulation at least 15 calendar days of continuous session prior to its being published for comment in the Federal Register. No rule or regulation may become effective within 20 calendar days of continuous session. After the date on which such rule or regulation is published as final, if within such 20-day period, either Committee has reported out or has been discharged from further consideration of a resolution of disapproval or other legislation which is intended to modify or invalidate the rule or regulation or portion thereof, the rule or regulation shall not become effective for a period of 90 calendar days of continuous session from the date of the Committee action unless the House to which such Committee reports has rejected such resolution or legislation. In that case, the rule or regulation may go into effect any time after the expiration of the 20 calendar days in which the Committee is required to act, provided that the other House does not have such a resolution or legislation pending or adopted.

The submission of the rule or regulation to the Committees 15 days prior to its being published for comment in the Federal Register and the 20 days waiting period after the rule or regulation has been published as final may be waived upon written request of the Secretary, if agreed to by the Chairmen and Ranking Minority Members of both Committees.

Congressional inaction on any rule or regulation does not indicate Congressional approval of such rule or regulation. Rules or regulations establishing FHA interest rates are exempt from the requirements of this section. For purposes of this section, continuity of a session of Congress is broken only by an adjournment of Congress sine die and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of calendar days of continuous session of Congress.

In adopting this provision, the conferees did not include the principle of a legislative veto of administrative actions. Instead the amendment formalizes a procedure designed to assure a constructive consultative relationship between Congress and the Executive Branch.

The intent is to encourage cooperation and to develop a spirit of comity. The conferees expect that the formality of this procedure will not stand in the way of such cooperation but will increase it. The conferees also expect that the 90 day deferral provision will only be followed where either Committee believes that the proposed regulations violate the intent of Congress. Since the 15 day consultative period is designed to provide an opportunity for misinterpretations to be resolved, the conferees expect that the 90 day deferral period will rarely be invoked.

Each Committee will establish its own procedures regarding the method adopted for requesting submission of rules or regulations prior to publication for comment in the Federal Register. In addition, each Committee will determine whether or not a resolution or other legislation considered by that Committee is intended to modify or invalidate a rule or regulation.

However, in order to prevent a rule or regulation from going into effect, either the House or the Senate Committee must report out of Committee, within the initial 20 day period following the date on which such rule or regulation is published as final, a disapproving resolution or legislative modification. If subsequently one of the two Houses rejects a resolution or legislative provision designed to modify or invalidate a rule or regulation, that rule or regulation could go into effect on the date such action is taken or the effective date set forth in such final publication, if later, but not earlier than the required 20 day period, unless the Committee of the other House has reported out a resolution or other legislation affecting the same rule or regulation within the same initial 20 day period. In the case of a rule or regulation being deferred by action of either Committee, the period of deferral shall be continuous and does not begin again at the start of a new Congress.

Finally, the conferees want to clarify that when the Secretary determines a waiver from the review procedure for specified rules and regulations is necessary, the waiver becomes effective when the Committee Chairman and Ranking Minority Member of both Houses

indicate their concurrence with the Secretary's determination.

FHA MULTIFAMILY MORTGAGE LIMITS

Non-elevator section 221(d)(3)

The House amendment contained a provision increasing the mortgage limits for nonprofit, non-elevator structures insured under section 21(d)(3) of the National Housing Act from: $16,860 to $18,450 per family unit without a bedroom; $18,648 to $20,625 per family unit with one bedroom; $22,356 to $24,630 per family unit with two bedrooms; $28,152 to $29,640 per family unit with three bedrooms; $31,884 to $34,846 per family unit with four or more bedrooms.

The Senate bill increased these limits from: $16,860 to $20,601 per unit without a bedroom; $18,648 to $26,007 for a one bedroom; $22,356 to $31,768 for a two bedroom; $28,152 to $41,292 for a three bedroom; $31,884 to $45,392 for four or more bedrooms.

The conference report contains the Senate provision with an amendment increasing these limits as follows: $21,563 without bedroom; $24,662 for one bedroom; $29,984 for two bedrooms; $38,379 for three bedrooms: $42,756 for four or more bedrooms.

Elevator section 221(d)(3)

The House amendment contained a provision increasing the mortgage limits for projects of elevator-type structures from: $19,680 to $20,962 per family unit without a bedroom; $22,356 to $24,030 per family unit with one bedroom; $26,496 to $29,220 per family unit with two bedrooms; $33,120 to $37,800 per family unit with three bedrooms; $38,400 to $41,494 per family unit with four or more bedrooms.

The Senate bill contained a provision increasing the limits from: $19,680 to $23,268 per unit without a bedroom; $22,356 to $26,673 for a one bedroom unit; $26,496 to $32,434 for two bedrooms; $33,120 to $41,958 for three bedrooms; $38,400 to $46,058 for four or more bedrooms.

The conference report contains the Senate provision with an amendment increasing these limits as follows: $22,692 without bedrooms; $26,012 for one bedroom; $31,631 for two bedrooms; $40,919 for three bedrooms; $44,917 for four or more bedrooms.

Section 207 rental housing

The Senate bill contained a provision amending section 207(c)(3) of the National Housing Act to increase the mortgage limits attributable to dwelling use from: $19,500 to $21,900 per family unit without a bedroom; $21,600 to $24,600 per unit with one bedroom; $25,800 to $30,300 per unit with two bedrooms; $31,800 to $38,100 per unit with three bedrooms; $36,000 to $43,158 per unit with four or more bedrooms.

The House amendment contained no provision and none is contained in the conference report.

Section 213 cooperative housing

The Senate bill contained a provision amending section 231(b)(2) of the National Housing Act to increase the mortgage limits from: $19,500 to $21,900 per family unit without a bedroom; $21,600 to $24,600 per one bedroom unit; $25,800 to $30,300 per two bedroom unit; $31,800 to $38,100 per three bedroom unit; $36,000 to $43,158 per unit with four or more bedrooms.

The House amendment contains no provision and none is contained in the conference report.

Section 220(d)(3) rehabilitation and neighborhood conservation

The Senate bill contained a provision amending section 220(d)(3)(B)(iii) of the National Housing Act to increase mortgage limits from: $19,500 to $21,900 per unit without a bedroom; $21,600 to $24,600 per one bedroom unit; $25,800 to $30,300 per two bedroom unit; $31,800 to $38,100 per three bedroom unit; $36,000 to $43,158 per unit with four or more bedrooms.

The House amendment contains no provision and none is contained in the conference report.

Section 221(d)(4) profit oriented housing

The Senate bill contained a provision amending section 221(d)(4) of the National Housing Act to increase mortgage limits from: $18,450 to $20,362 per unit without a bedroom; $20,625 to $23,430 per one bedroom unit; $24,630 to $28,620 per two bedroom unit; $29,640 to $37,200 per three bedroom unit; $34,846 to $40,894 per unit with four or more bedrooms.

The House amendment contained no provision. The conference report contains the Senate provision with an amendment increasing the mortgage limits as follows: $19,406 without a bedroom; $22,028 for one bedroom; $26,625 for two bedrooms; $33,420 for three bedrooms; $37,870 for four or more bedrooms.

Section 231(c)(2) housing for elderly

The Senate bill contained a provision amending section 231(c)(2) of the National Housing Act increasing mortgage limits from: $18,450 to $20,362 per family unit without a bedroom; $20,625 to $23,430 per one bedroom unit; $24,630 to $28,620 per two bedroom unit; $29,640 to $37,200 per three bedroom unit; $34,846 to $40,894 per unit with four or more bedrooms.

The House amendment contained no provision and none is contained in the conference report.

Section 234(e)(3) condominimum housing

The Senate bill contained a provision amending section 234(e)(3) of the National Housing Act increasing mortgage limits from: $19,500 to $21,900 per family unit without a bedroom; $21,600 to $24,600 per one bedroom unit; $25,800 to $30,300 per two bedroom unit; $31,800 to $38,600 per three bedrcom unit; $36,000 to $43,158 per unit with four or more bedrooms.

The House amendment contained no provision and none is contained in the conference report.

FHA INSURED MORTGAGE REFINANCING

The Senate bill contained a provision providing that the existing debt of an existing hospital may be refinanced under the section 223(f) of the National Housing Act if the Secretary has determined that it is economically viable, and has received certification under section 604(a)(1) or 1521 of the Public Health Service Act (which the Secretary deems comparable to certification required for hospitals insured under section 242 of the National Housing Act). The provision also specifies that the existing requirements under section 223(f) with respect to refinancing of property located in older declining areas are applicable only in the case of refinancing multifamily housing projects.

The House amendment contained no provision. The conference report contains the Senate provision with an amendment specifying: that refinancing should only be employed to lower the debt service costs, taking into account any fees or charges connected with such refinancing of the existing hospital; that the proceeds of any refinancing will be employed only to repay the existing indebtedness; that the existing hospital is economically viable; and that such existing hospital has received certification from the appropriate State agency that the services being provided by the hospital at the time of refinancing are appropriate as determined pursuant to section 1523(a)(6) of the Public Health Service Act.

The Conferees intend that States shall carefully review the appropriateness of health services provided by hospitals seeking refinancing under this program at the time of refinancing. However, such review does not necessarily require a review de novo if that State determines that the services have been recently assessed.

The Conferees note that there has been a record of extensive coordination between HUD and HEW's Bureau of Health Planning and Resources Development in administering Sections 241 and 242 of this Act. The conferees expect that the hospital refinancing permitted by the language added to section 223(f) will be administered as consistently as possible with the procedures by which hospital loans or loan guarantees are administered under Titles VI and XVI of the Public Health Service Act. Such consistency should assist in the attainment of health planning and cost containment objectives.

TITLE IV—RURAL HOUSING

RURAL HOUSING AUTHORIZATIONS

The Senate bill contained a provision to increase FmHA authorizations by stipulating specific amounts for each program for each fiscal year. The House amendment provided for such increases by adding to the cumulative level of appropriations for such programs. The conference report contains the Senate provision.

Section 504 rehabilitation loans and grants

The Senate bill authorized an appropriation of $48 million for fiscal year 1979 for the section 504 rehabilitation program. The House amendment authorized a cumulative appropriations level of $150 million. The conference report contains the Senate provision.

Section 516 domestic farm labor housing

The Senate bill authorized an appropriation of $38 million for fiscal year 1979 for section 516 domestic farm labor housing grants. The House amendment authorized a cumulative appropriations level of $115 million. The conference report contains the Senate provision.

Section 506 research

The Senate bill authorized an appropriation of $5 million for fiscal year 1979 for section 506 research. The House amendment authorized an appropriation of $10 million. The conference report contains the House provision.

Section 525 counseling and technical assistance

The House amendment contained a provision that authorized for appropriation $5 million for section 525 counseling and $5 million for section 525 technical assistance. The Senate bill did not contain this provision. The conference report contains the House provision.

Section 523(g) self-help fund

The Senate bill authorized for appropriation an additional $3 million for fiscal year 1979 for the section 523(g) self-help development fund for loans with interest rates of below three percent. The House amendment did not contain such a provision. The conference report contains the Senate provision.

Section 514 farm labor housing loans

The Senate bill authorized an appropriation of $38 million for fiscal year 1979 for section 514 farm labor housing loans in any one fiscal year. The House amendment contained a similar provision but subjected the authorization to appropriation acts. The conference report contains the House provision.

RESEARCH

General authority

The House amendment contained a provision not in the Senate bill, directing the Secretary to conduct research, technical studies and demonstrations. The conference report contains the House provision with an amendment limiting the purpose of such research

to activities aimed at stimulating construction and improving architectural design and utility of dwellings and buildings. The conferees wish to make clear that the Secretary will address such factors as energy conservation in carrying out the research program authorized in this section.

Farm worker housing study

The Senate bill contained a provision requiring a study of migrant farm worker housing. The House amendment contained a provision requiring a study of migrant and settled farm worker housing and also requiring the Secretary to determine possible roles that individual farm workers and farmers, farm workers and farmer associations, and public and private nonprofit agencies can perform. The conference report contains the House provision.

NOTICE REQUIREMENT

The Senate bill contained a provision requiring the Secretary to provide an applicant who is denied FmHA assistance written notice as to the reason for such denial and additionally required an appeals procedure for applicants whose assistance was denied, reduced or terminated which included the following: (1) a written notice of the right to appeal an adverse decision, (2) an opportunity to appeal to an impartial official having the authority to reverse the decision, (3) an opportunity to inspect records pertaining to the decision, and have the decision of the appeals officer in writing, with reason, and (4) have the appeals decision reviewed by the Secretary; upon successful appeal, the appellant is entitled to receive all benefits withheld as a result of the original adverse decision. The House amendment provided only that an applicant denied assistance must receive written notice as to the reasons for such denial. The conference report contains the Senate provision amended to require the Secretary to issue rules and regulations assuring applicants who are denied assistance or persons and organizations whose assistance is substantially reduced or terminated, written notice of the reasons for such denial reduction or termination and an opportunity to appeal and to present additional information in support of such appeal to a person other than the person who made the original decision and who has the authority to reverse the adverse decision.

The conferees expect that the Secretary will insure that such appeals procedure will include at least a written notice of the ability to appeal an adverse decision, an opportunity to appeal to a person who had no role in making the original determination and who has the authority to reverse the decision, an opportunity to inspect agency records relevant to the initial decision, to present additional relevant information and to receive the reviewing official's final decision with supporting reasons in writing. This procedure should apply to all persons or organizations, including tenants in FmHA financed dwelling units, whose assistance has been denied, substantially reduced or terminated.

NOTICE PRIOR TO FORECLOSURE

The Senate bill contained a provision not in the House amendment requiring the Secretary prior to initiating a foreclosure or transfer action to provide the borrower with adequate notice and give consideration to the availability of a moratorium on payments. The conference report does not contain this provision. The conferees are concerned about the high rate of delinquencies in FmHA housing programs. Therefore, the Secretary is directed to improve the servicing of its loans, provide counselling to borrowers and take other measures to cure delinquencies before they become so serious as to require foreclosure or transfer.

ELIGIBILITY FOR RURAL RENTAL ASSISTANCE

The House amendment contained a provision that was not contained in the Senate bill to expand the eligibility for section 521 rural rental assistance to allow assistance to congregate and cooperative housing projects and projects financed only by section 514 loans. The conference report contains the House provision with an amendment limiting rural rental subsidies on projects financed only by section 514 loans to public and private not-for-profit owners.

HOMEOWNER SUBSIDIES

Insured loans

The Senate bill contained a provision establishing a new deep subsidy program for very low income homeowners who cannot afford FmHA one percent interest credit assistance. The House amendment contained a similar provision, but required the Secretary to provide such assistance only in areas found to be unsuitable for rental housing assistance. The conference report contains the House provision.

The conferees are concerned that homeowners subsidies meet the special housing assistance needs in rural areas where there is little or no prospect of very low income families in substandard housing being served by existing FmHA and HUD rental housing assistance programs. These are generally remote rural areas having widely dispersed populations of less than 2500 persons. The conferees wish to emphasize their intent that the purpose of the homeowner subsidies is primarily to meet the housing assistance needs of these families in these particular areas.

Accordingly, the conferees in adopting the House provision wish to make clear that in determining that an area is unsuitable for assisted rental housing the Secretary should base his findings on actual and current conditions in the area rather than on arbitrary, national criteria. The conferees expect that the Secretary shall make a determination as to whether or not assisted rental housing is feasible to build and manage in the area taking into consideration the density of the population, the adequacy of public facilities, the availability of public services and similar factors. Additionally, the conferees expect the Secretary to take into consideration the availability of public and private sponsors of assisted rental housing. While the conferees do not wish to arbitrarily restrict homeowner subsidies from being used where such entities are found by the Secretary to be available but unwilling to provide the needed assisted rental housing, they do expect that prior to using home ownership subsidies, the FmHA will show that it has made reasonable efforts toward developing an effective assisted rental housing delivery system in such areas. The conferees are concerned that rural homeowner subsidies not be used simply as a substitute for existing assisted rental housing programs.

Recapture of subsidy

The Senate bill contained a provision authorizing the Secretary to recapture the section 502 housing subsidies and to provide borrowers incentives and relocation allowances. The House amendment contained a similar provision, except it required recapture and did not authorize relocation allowances. The conference report contains the House provision.

The conferees do not intend that the recapture of assistance provisions for section 502 housing be retroactive. The Secretary, therefore, is directed to apply such recapture provisions only to loans made after the enactment of this Act.

The conferees also wish to make clear that the Secretary is expected to insure that recapture is possible when the property is refinanced or transferred. Accordingly, the Secretary is directed to use liens or other similar means for assuring such recapture. However, the conferees intend that recapture extend only to the value of the property and therefore the Secretary should not extend recapture to any other assets held by the borrower.

The conferees intend that the Secretary will always insure that there is an incentive to the borrower to maintain the property. Therefore in determining the extent of recapture, the Secretary is directed to permit the borrower to keep at least an amount determined to be an adequate incentive for maintaining the property in those instances where it has been demonstrated to the satisfaction of the Secretary that the borrower has adequately maintained the property. Accordingly, the conferees expect that there will be periodic inspections of the property and that borrowers will be notified of any deficiencies in satisfying their maintenance obligations.

Availability of assistance

The Senate bill contained a provision that would have made homeowner subsidy assistance available only when the housing needs of the applicant could not be met from other sources, including the section 235 and 236 programs. The House amendment contained a similar provision, except that it specified "other sources" as including the National Housing Act and the U.S. Housing Act of 1937. The conference report contains the House provision.

Additional requirements

The House amendment contained a provision not included in the Senate bill limiting to $440 million the aggregate principal amount of deep homeowner subsidy loans. The conference report contains the House provision.

WAIVER OF CREDIT REQUIREMENTS

The Senate bill contained a provision that would authorize the Secretary to waive the credit elsewhere requirement for farm labor housing loans and in such cases permitting the interest rate on such loans to be greater than one percent but no greater than the Treasury's cost of borrowing. The House bill did not contain this provision. The conference report contains the Senate provision with an amendment limiting the Secretary's authority to waive the credit elsewhere requirement to migrant farm worker housing in areas where no public or private nonprofit sponsor is available and the loan is necessary to provide such housing. It would also establish as the interest rate for such loans the Treasury borrowing rate and would require that the benefits accruing from such loans go to the tenants. The conferees are concerned that the principal underlying FmHA as a lender of last resort be upheld. They are aware, however, that in some instances much-needed housing for farm laborers would not be provided if the Secretary were not permitted to waive the credit elsewhere and below market interest rate restrictions in FmHA programs. These instances have been brought to the attention of the conferees and are the result of situations where, because of the seasonal nature of farm work, a stream of rents is not sufficiently available to satisfy private lenders. Consequently, working farm owners are required to pledge farm assets as security for farm labor housing loans if they wish to provide the much-needed housing. The conferees consider this to result in an undue burden on these particular farm owners whose income is derived primarily from operating farms. Accordingly, the conferees expect that the Secretary will waive the credit elsewhere and interest rate provisions where he finds these conditions to obtain. In doing so, however, the conferees are concerned that the Secretary insure that the full benefits of the below market rate be passed on to the tenants taking into consideration their wage and fringe benefit levels and not accrue to the owners. Furthermore, the conferees expect that in administering this program, the

instances wherein the waiver is provided by the Secretary will be largely the exception rather than the rule, in recognition of the fact that in many areas of the nation the demand for these limited funds is comprised of many public and not-for-profit sponsors ready and available to provide these housing accommodations.

SPONSOR PRIORITIES

The Senate bill contained a provision, not included in the House amendment, to require that the Secretary not give funding priority under section 516(e) to any one of the groups authorized to sponsor domestic farm labor housing. The conference report contains the Senate provision.

DEFINITION OF RURAL AREAS

The Senate bill contained a provision not contained in the House amendment which provided that, as of January 1, 1978, communities with populations between 10,000 and 20,000 no longer needed to be outside a SMSA for their residents to be eligible for FmHA assistance. The conference report does not contain the Senate provision. The conferees wish to make clear, however, that Farmers Home Administration is expected to interpret section 520 of the Housing Act of 1949 in a manner that would benefit residents of local communities and not administratively restrict their access to FmHA assistance. Accordingly, in defining the terms "rural" and "rural areas," the Farmers Home Administration is instructed to use the latest official United States Census data, except where the community presents more recent and reliable population counts.

Study of remote title claims

The Senate bill contained a provision that required the Secretary to conduct a study of remote title claims which prevent rural persons from the full use of their property and required that a report be submitted by March 1, 1979. The House amendment was similar, except the report was not due until one year after enactment of this Act. The conference report contains the House provision with an amendment requiring submission of an interim report on March 1, 1979, and a full report one year after enactment of this Act.

TITLE V—CONGREGATE SERVICES

FINDINGS

The Senate bill set forth congressional findings that: 1) innovative and comprehensive means are required to enable frail and handicapped individuals to remain in their homes; 2) congregate housing supplemented by supportive services is a proven, cost-effective means for preventing the unnecessary institutionalization of the elderly and these services can similarly assist handicapped persons; 3) in spite of existing statutes which encourage the Secretary of Housing and Urban Development to develop congregate housing for low-income persons, insufficient congregate housing has been built; 4) since the coordinated delivery of social services necessary for a successful congregate housing program has not occurred, increasing numbers of elderly public housing residents and younger handicapped persons may thus be unnecessarily and prematurely institutionalized; 5) to be a successful program and to meet the needs of the growing number of frail older Americans living in public housing projects, congregate housing and supportive services must be available as a coordinated package which receives secure and continuous funding.

The House amendment established Congressional findings that: congregate housing, together with supportive services, is a proven and cost-effective means of enabling temporarily disabled elderly or handicapped individuals of all ages to maintain their dignity and independence and to avoid unnecessary institutionalization; deficiencies presently exist in the availability, adequacy, coordination or delivery of supportive services so that large numbers of public housing residents face premature and unnecessary institutionalization; and supplemental supportive services available on a continuing basis are essential to a viable congregate housing program.

The conference report includes the House provision amended to emphasize in addition that: the coordination of congregate housing with the delivery of supportive services is an innovative as well as a proven and cost-effective means of avoiding the costly and unnecessary institutionalization of handicapped or temporarily disabled adults; many residents of housing projects for elderly and handicapped adults built by nonprofit sponsors, as well as many residents of public housing projects, face premature and unnecessary institutionalization because of the absence of supportive services; and in order to create a successful congregate housing program, supplemental supportive services must be available on a secure and continuing basis.

DEFINITIONS

Congregate housing

For purposes of this program and as an amendment to section 7 of the United States Housing Act of 1937, the Senate bill defined congregate housing as low rent housing constructed after, but not under construction prior to, January 1, 1979, connected with which there is a central dining facility to provide wholesome and economical meals for its occupants. The House amendment was similar but added a requirement that some or all of the dwelling units were not to have kitchen facilities. The conference agreement contains the Senate provision amended so that congregate housing built after January 1, 1979, may contain dwelling units that do not have kitchens. The conferees believe that public housing authorities and private nonprofit sponsors should have flexibility to determine whether or not congregate housing projects to be built after January 1, 1979, should contain dwelling units without individual kitchens. Such flexibility would allow congregate housing sponsors to design projects that adequately respond to unique local needs. However, to promote independence, socialization and psychological health among the congregate housing residents, the conferees strongly encourage, wherever appropriate, the inclusion of at least a kitchenette or half-kitchen in each individual dwelling unit.

Eligible project residents

The Senate bill defined eligible project residents as handicapped elderly individuals, nonelderly handicapped individuals or temporarily disabled households who are residents of congregate housing projects of public housing agencies or nonprofit corporations. The House definition was similar except that temporarily disabled individuals were eligible only if they were elderly. The conference agreement contains the Senate provision amended to refer to temporarily disabled individuals, not households.

Handicapped

The Senate bill and the House amendment defined the term "handicapped" to mean an impairment which: is expected to be long-term, substantially impedes an individual's ability to live independently, and is such that his ability to live independently could be improved by more suitable housing conditions. The impairment could include a functional disability or frailty which is a normal consequence of the aging process. In addition, the Senate bill, unlike the House amendment, stated that an impairment may include a developmental disability as defined in section 102(7) of the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963. The conference agreement contains the House provision amended to clarify that the impairment is such that it substantially impedes an individual's ability to live independently unless the individual receives supportive congregate services. The conferees intend that an impairment include a developmental disability such as cerebral palsy, autism, epilepsy and mental retardation.

Professional assessment committee

The Senate bill and the House amendment defined "professional assessment committee" as a group of at least three persons including medical professionals and other persons professionally competent to appraise the functional abilities of elderly or permanently disabled adults in relation to the performance of the tasks of daily living. In addition, the Senate provision specified five activities of daily living that the professional assessment committee should evaluate to determine whether the project residents need assistance. The conference agreement contains the House provision. The conferees expect that the assessment committee, in determining who should receive the supportive services available under this program, should evaluate potential eligible residents on the basis of their ability to perform one or more daily living activities such as eating, bathing, grooming, dressing, toileting and ambulating.

Temporarily disabled

The Senate bill and the House amendment defined "temporarily disabled" to mean an impairment which: is expected to last no more than six months; substantially impairs an individual's ability to live independently, and is such that the ability to live independently may be improved by more suitable housing conditions. In addition, the Senate provision required that the impairment must be such that it may result in displacement from a congregate housing project. The conference agreement contains the House provision amended to clarify that the impairment must substantially impede an individual's ability to live independently unless the individual receives supportive services.

Household

The Senate provision contained a definition not found in the House amendment. "Household" meant one or more persons residing in a public housing project or a project assisted under section 202 of the Housing Act of 1959. The conference agreement does not contain this provision.

AUTHORIZATION TO ENTER INTO CONTRACTS

The Senate bill contained a provision not included in the House amendment which specified that each public housing agency or nonprofit corporation entering into a contract with HUD for the provision of supportive services should be reserved a sum equal to its total approved contract authority from the monies authorized and appropriated for the fiscal year in which the agency or corporation is notified of funding approval. The conference agreement contains this provision amended to refer to contract amount instead of contract authority.

CONGREGATE SERVICES PROGRAM

Both the Senate bill and the House amendment required that when nonelderly handicapped individuals are included as eligible project residents the applicant sponsors should consult with appropriate local agencies having responsibility for the development, provision or identification of social services to permanently disabled adults in order to determine the means of providing services under this program. In addition, the House amendment required consultation regarding the identification of alternative sources of funding that are available for such services. The conference report contains the House provision.

MAINTENANCE OF EFFORT

The Senate bill contained a provision requiring sponsors receiving assistance under this program to maintain the same level of services and annual financial contribution

that they were making for supportive services, prior to the initial date on which the sponsor was notified that funding was approved. The House amendment required the sponsor to maintain the same level of services and financial support as of the date the application for assistance was submitted. The conference report contains the House provision.

ELIGIBILITY FOR SERVICES

Meal service

The Senate bill provided that elderly and permanently disabled residents of the congregate facility who are not otherwise eligible for the supportive services provided by this program could participate in the meal service program if the sponsor determined their participation would not adversely affect the cost effectiveness or operation of the meal service program. The House amendment permitted all residents of the congregate facility to participate in the meal service if the same determination were made. The conference report contains the House provision. These residents will be expected to pay reasonable fees which do not exceed the cost of providing the meal service.

Eligibility determination procedures

The Senate bill contained a provision requiring that the process developed for determining eligibility for the services should accord the individual applicants fair treatment, due process and a right to appeal the eligibility determination. In addition, the confidentiality of personal and medical records should be assured. The House amendment directed the professional assessment committee to follow a selection procedure which accorded individuals fair treatment and due process. The conference agreement contains the House provision amended to require, in addition, that the professional assessment committee follow procedures for reviewing eligibility determinations and for assuring the confidentiality of personal and medical records.

CONTINUITY OF PROFESSIONAL ASSESSMENT COMMITTEE

The Senate bill also contained a provision not found in the House amendment which required that the public housing agency or nonprofit corporation sponsoring the congregate services program notify the HUD Secretary of any changes in the membership of the professional assessment committee within 30 days of such change. Any changes in the committee should be consistent with the procedures established for appointing the original members of the committee. The conference agreement contains the Senate provision.

APPLICATION PROCEDURES

Both the Senate and House provisions required that the applicant sponsor submit a service plan which was developed after consultation with eligible project residents and with the professional assessment committee. In additon, the Senate bill required that where these services were to be provided in a new, unoccupied project such consultation should be carried on as part of the occupancy interview process. The conference report does not contain this provision. The conferees expect that the provisions requiring the sponsor to develop service plans after consulting with the Area Agency on Aging and with the appropriate local agency responsible for developing or identifying social services for permanently disabled adults will be adequate for purposes of applying for funds for a new, unoccupied project. However, the conferees expect that the sponsors will be continually sensitive to the needs of project residents and particularly in the case of new, unoccupied projects, plans may be revised in order to meet needs not identified until after the residents occupy the facility. The reserve fund established by the Secretary may be used to meet these unforeseen changes in service needs.

The Senate bill contained a provision not included in the House amendment requiring that any application for funding include any comments regarding the service plan received from the Area Agency on Aging and from the appropriate local agency responsible for developing or identifying social services for permanently disabled adults. The conference report includes this provision.

EMPLOYMENT OF PROJECT RESIDENTS

The Senate bill contained a provision not included in the House amendment which limited the number of hours a week an elderly or permanently disabled adult who was not eligible to receive the supportive services himself but who lived in the public housing or 202 project assisted under this title, could be employed to provide the services authorized by this program. The conference report does not contain this provision. The conferees, however, encourage sponsors to employ elderly or permanently disabled residents on a part-time basis where possible and practical to do so.

Authorization of appropriations

The Senate bill authorized appropriations of not to exceed $20 million for fiscal 1979, $25 million for fiscal 1980, $35 million for fiscal 1981, $40 million for fiscal 1982 and $45 million for fiscal 1983. The Senate bill also directed the Secretary of HUD to establish specific procedures for the recapture of unused contract authority, the utilization of unused reserve funds and the reallocation of unexpended funds. The House amendment authorized the same level of appropriations for fiscal years 1979, 1980 and 1981, and directed that any appropriated sums remain available until expended. The conference report includes an authorization of $40 million for fiscal 1982 and retains the House language regarding appropriated funds remaining available until expended.

The conferees believe the report the Secretary of HUD is to produce annually will be very useful and will assist Congress in determining whether the program should be expanded. The report should include an analysis of the number of people served, the types of services provided, the cost per person, the extent of the coordination achieved between HEW and HUD, and the extent to which this program avoids or creates a duplication of existing programs. Since this is a new program designed to remedy the specific problem that occurred when HEW funds for supportive services could not be effectively coordinated with congregate facilities financed through HUD, the conferees are particularly interested in whether the unique features of this program have been successful in preventing the premature institutionalization of elderly and handicapped persons or whether it merely duplicates services available through existing HEW programs.

TITLE VI—NEIGHBORHOOD REINVESTMENT CORPORATION ACT

POWERS AND DUTIES

Both the Senate bill and the House amendment created the Neighborhood Reinvestment Corporation. The Senate bill authorized the Corporation, among other duties and powers, to continue the work of the Urban Reinvestment Task Force in sponsoring neighborhood housing services programs and to sponsor and replicate other experimental neighborhood preservation projects. The Corporation was also directed to continue development of Neighborhood Housing Services of America, as a secondary market operation.

The House amendment was similar to the Senate provision except it referred to the Neighborhood Housing Services of America as a demonstration program and the Corporation was given discretionary, instead of mandatory, authority to provide assistance in the form of grants and technical assistance to the loan purchase pool. The conference report contains the Senate provision amended to make discretionary the Corporation's authority to provide such assistance. The conferees are particularly interested in following the development of this new loan purchase pool mechanism closely and expect the Corporation, in its annual reports to Congress, to address in detail the activities of the Neighborhood Housing Services of America. This analysis will be particularly useful to Congress in determining whether a loan purchase pool of this type should be operated by established federally related secondary market institutions.

BOARD OF DIRECTORS

Election of Chairman

The Senate bill provided that the Chairman of the Corporation should be the Chairman of the Federal Home Loan Bank Board. The House amendment directed the Board of the Corporation to elect from among its members a Chairman who would serve for two years; however, the Chairman of the Federal Home Loan Bank Board would serve as the Chairman for the first two-year term. The conference report contains the House provision.

Board meetings

The Senate bill directed that all meetings of the Board be open unless closed by majority vote of the Board. The House amendment required that all meetings of the Board be conducted in accordance with the Government in the Sunshine Act. The conference report contains the House provision.

FINANCIAL CONTROL

The Senate bill provided that the Corporation would not be considered a department agency or instrumentality of the Federal Government. The House amendment amended the Government Corporation Control Act so that the Corporation would be considered a wholly owned government corporation. The conference report contains the Senate provision amended to require that the General Accounting Office audit the Corporation at least once every three years. In addition, the Corporation will be subject to administrative and cost standards issued by the Office of Management and Budget.

The conferees expect that the Corporation will be made subject to those circulars issued by the Office of Management and Budget which establish reasonable and appropriate standards for administrative and cost accounting procedures related to property disposition, procurement, competitive bidding, travel, transportation, consultant costs, reporting and maintenance of records. The conferees are aware that some of the standards defined or delineated in those circulars would not be appropriate to the operation of the Corporation, given its unique status. For instance, since the Corporation is receiving a direct appropriation instead of a grant from a federal agency, some reporting requirements will necessarily differ from those included in the OMB circulars. However, the conferees believe that the circulars establish reasonable standards of financial management and administrative accountability that should be followed in the operations of the Corporation. In looking to OMB to ensure that these standards are imposed, the conferees expect that OMB shall recognize the flexible and nonbureaucratic manner in which the Urban Reinvestment Task Force, predecessor to the Corporation, has operated in the past, that such flexibility has been integral to the success of its efforts and that its continued success requires a sensitivity to the necessity for reasonable controls that do not burden the Corporation with unnecessary requirements.

AUTHORIZATION

The Senate bill authorized appropriations of not to exceed $15 million for fiscal year

1979, $20 million for fiscal 1980 and $30 million for fiscal 1981. The House amendment authorized $8.5 million for fiscal year 1979. The conference agreement contains the Senate provision amended to a single year authorization of $12.5 million for fiscal year 1979.

TITLE VII—MISCELLANEOUS

HOMEOWNERS LOAN ACT AMENDMENT

The Senate bill included a provision not in the House amendment which would amend the Homeowners Loan Act of 1933 so that Federal savings and loan associations would be authorized to invest up to five percent of their assets in real property located in areas in which physical improvement activities assisted under the Community Development Block Grant Program are being carried out in a concentrated manner. The conference report does not contain this provision.

DISPLACEMENT STUDY

The Senate bill contained a provision not found in the House amendment in which the Congress declares that the Federal Government, in administering its housing and CD programs, should take the utmost care to minimize the displacement of persons from their homes and neighborhoods. The provision also provides that the Secretary shall conduct a study on the nature and extent of the displacement problem, and report to Congress by January 31, 1979, with recommendations for the formulation of a national policy to minimize displacement due to other public or private development. In conducting the study the Secretary is required to: (1) consult with affected public, governmental and industry groups; (2) provide data on nature and scope of problem (past and projected) and identify steps to improve data availability; and (3) report fully on current legal and regulatory powers and policies of HUD with respect to displacement. The conference report contains the Senate provision amended so that the Congressional declaration is that the Federal Government in the administration of its housing and CD programs and consistent with other program goals and objectives should minimize involuntary displacement of people from their homes and neighborhoods.

The conferees believe that the study required by this provision is of great importance. The conferees recognize that there are no easy answers on how to balance a strong desire to minimize involuntary displacement with the other important goals and objectives of the Department's housing and community development programs. The conferees expect the Secretary to carefully examine this question as it relates to each of her programs and include her findings in the study. Additionally, the conferees wish to make clear that the Congressional declaration contained in this provision does not confer any additional authority on the Secretary over what she now has under existing Federal law.

In addition, the conferees understand that the Department has narrowly interpreted the Uniform Relocation Act to exclude displacement caused by certain public or private actions which have been undertaken with the use of federal funds. The validity of this interpretation is currently before the courts. Both the Senate bill and the House amendment contained a provision which would enable localities to use Community Development Block Grant funds to provide relocation payments and other assistance to persons who are displaced by private or public activities, when such payments or assistance are appropriate to the locality's community development plan. The conferees wish to make clear that the enactment of that provision shall not be read as an endorsement of any interpretation of the URA; rather, the adopted provision is intended to permit CDBG funds to be used for relocation payments, whether or not the displacement is covered by the URA.

REHABILITATION GUIDELINES

The Senate bill contained a provision that was not contained in the House amendment directing the Secretary to develop rehabilitation guidelines in consultation with NIBS and other appropriate parties for voluntary adoption by States and localities, and to provide technical assistance for their implementation; also, the Secretary was to publish the guidelines within a year and promulgate them within 18 months of enactment; the Secretary was also required to report to Congress on the utilization of the guidelines with recommendations for further action. The conference report contains the Senate provision with an amendment which allows rather than requires the Secretary to offer technical assistance.

The conferees in accepting the Senate amendment are aware that considerable efforts to establish a workable set of rehabilitation guidelines are underway in a number of States and by organizations including private model code organizations. The conferees believe that these State and private organizations should be consulted with and involved in all aspects of the process of developing such guidelines. The conferees are aware that such involvement and consultation will not only reflect different regional conditions and prevent duplication of work already accomplished but it will greatly aid in the ultimate implementation of such guidelines at the State and local level.

DEPARTMENTAL REORGANIZATION

The Senate bill contained a provision not included in the House amendment which provided that no funds available to HUD during fiscal years 1978 or 1979 may be expended for the reorganization or transfer of any function of an area, field, or insuring office which relates to multifamily housing, community planning and development, or related technical services. The conference report does not contain the Senate provision.

ALASKA HOUSING PROGRAM

The Senate bill contained a provision not found in the House amendment would amend section 1004(a) of the Demonstration Cities Act to:

(1) Direct the Secretary to make loans and grants on the basis of need to Alaska regional native housing authorities for the purpose of providing planning assistance, housing rehab, and maintaining an adequate administrative structure for housing facilities for Alaska residents;

(2) Delete requirements for an approved statewide housing program; and

(3) Repeal the provision limiting grants to 75 percent of the cost of the housing constructed under the program.

The conference report contains the Senate provision amended so that rather than directing the Secretary to make loans and grants she is authorized to make such loans and grants, and rather than repealing the 75 percent limitation on grants the Secretary is permitted to waive the limitation on a case-by-case basis after consulting with the pertinent state officials.

INTERSTATE LAND SALES

The Senate bill contained a provision amending the Interstate Land Sales Full Disclosure Act which was not included in the House amendment. The Senate bill provided an exemption for the sale or lease of any improved land on which there is a condominium or on which a condominium is to be built within 2 years and excluded U.S. land patents and similar Federal grants or reservations from the Act's definition of "liens, encumbrances, and adverse claims."

The bill also exempted real estate which is restricted for commercial or industrial purposes by a declaration of covenants, conditions, and restrictions which have been recorded in the official records of the county where this real estate is located.

The bill created 3 new exemptions from the registration and disclosure requirements of the Act (but not from the fraud provisions). The first exemption was for sales operations which are intrastate or almost intrastate in nature. Under this exemption, a sales operation would be considered to be intrastate or almost intrastate in nature if not more than 5 percent of the lots sold or five lots sold, whichever is greater, in a calendar year were sold to residents of another State. Sales under this exemption must meet the following conditions: (a) The lot must be free and clear of all liens, encumbrances, and adverse claims; (b) the purchaser and/or spouse must make a personal on-site inspection of the lot; and (c) the developer must supply the purchaser with a written instrument designating a person within the purchaser's State of residence as the developer's agent of process.

For the purpose of this exemption, the terms "liens," "encumbrances," and "adverse claims" would not refer to U.S. land patents, property reservations, commonly conveyed or dedicated to local bodies or public utilities, taxes and assessments imposed by a State or public body having authority to assess and tax property or to beneficial property restrictions, provided: (a) The developer, prior to entering into a contract, provides the purchaser with a descriptive and concise statement setting forth all such reservations, taxes, and assessments which apply to the lot being purchased or leased; and (b) receipt of this statement has been acknowledged in writing by the purchaser or lessee.

The second exemption was for the sale or lease of real estate by a developer to a resident of another State when the principal residence of the purchaser is within a radius of 100 miles from the property purchased. To qualify for this exemption the following conditions must be met: (a) The lot must be free and clear of all liens, encumbrances, and adverse claims; (b) the purchaser and/or spouse must make an on-site inspection of the lot; (c) the developer must supply the purchaser with a written instrument designating a person within the purchaser's State of residence as the developer's agent of process; and (d) the developer must execute a written affirmation to the effect that these three requirements have been complied with on a form promulgated by the Secretary setting forth the name and address of the developer, legal description of the subdivision, the affirmation and the developer's legal signature. In addition, this section would require that (a) the developer, prior to entering into a contract, provide the purchaser with a descriptive and concise statement setting forth any reservations, taxes and assessments which apply to the lot being purchased or leased; and (b) receipt of this statement must be acknowledged in writing by the purchaser or lessee.

Sales under the 100 mile exemption would not be subject to the 5 percent limitation contained under the first exemption. But the number of sales made under the 100 mile exemption would be added to the sales made under the first exemption to arrive at the total number of sales made in one year by a developer for purposes of the 5 percent out-of-State sales limitation contained in the first exemption.

The third exemption was for the sale or lease of real estate located within a municipality or county whose governing body specifies minimum standards for the development of subdivision lots taking place within its boundaries, when seven conditions are met:

"(1) the subdivision meets all local codes and standards and is either zoned for single family residences or, in the absence of a zoning ordinance, is limited exclusively to single family residences; (2) the real estate is situated on a paved, public street or highway built to a standard acceptable to the municipality or county, or a bond or other surety acceptable to the municipality or

county in the full amount of the cost of the improvements has been posted to assure completion to such standards, and that authority has accepted or has agreed to accept the responsibility of maintaining the street; (3) at the time of closing, potable water, sanitary sewage disposal and electricity have been extended to the real estate, or the municipality or county has agreed to install such facilities within 180 days. For subdivisons which do not have a central water or sewage disposal system, rather than installation of water or sewer facilities, there must be assurances that an adequate potable water supply is available year-round or that the land is approved for the installation of septic tanks; (4) the contract of sale requires delivery of a warranty deed to the purchaser within 180 days of the signing of the sales contract; (5) a policy of title insurance or title opinion is issued in connection with the transaction showing that at the time of closing, title to the real estate purchased or leased is vested in the seller or lessor (but lease recordation is required); (6) each purchaser or his or her spouse has made a personal on the lot inspection of the real estate which he purchased or leased, prior to the signing of a contract to purchase or phone solicitations or offers of gifts, trips, dinners, or other such promotional techniques to induce prospective purchasers or lessees to visit the subdivision or to purchase or lease a lot."

The Senate bill also amended the statute of limitations for the Act so that no action could be brought by a purchaser more than three years after signing a contract or lease, notwithstanding delivery of a deed to a purchaser on the sale or assignment to attend part of the purchasers contract or agreement.

The conference report contains four of the Senate provisions, those dealing with: condominiums, real estate restricted for commercial or industrial use, U.S. land patents and fully improved single family homesites. The fully improved single family homesite exemption was accepted with minor clarifying amendments. This exemption applies only to the sale of lots located within counties and municipalities which have established minimum standards for the development of subdivision lots.

The conferees agree that this exemption is justified in such regulated jurisdictions because an important part of the protection which the Congress wishes to assure to purchasers already exists. Before a builder can sell even a single lot in a regulated jurisdiction, he often must gain approval from a number of local and state government agencies, including planning, zoning and environmental review boards; public works, public health and engineering departments; local utility districts and city councils or boards of supervisors. Usually lot sizes must meet certain minimums; soil compaction and/or percolation requirements must be met; the land cannot lie in an environmentally sensitive area or too close to an airport flight pattern; and plans must show access for fire equipment. It is expected that the exemption for the improved single family homesite will apply only in those jurisdictions that specify minimum standards for the development of subdivision lots.

In addition, the conferees recognize that a comprehensive reform of the Interstate Land Sales Full Disclosure Act needs to be accomplished in order to deal with specific problems faced by small land developers and land purchasers that have been brought to the attention of the conferees but which were not adequately addressed in the amendments rejected by the conference committee. The conferees have been hampered in their deliberations by a lack of adequate data derived from the experience of the Office of Interstate Land Sales in the administration of the Act. The conferees therefore direct the Secretary of HUD to report to Congress by March 1, 1979, regarding the experience of OILSR in: (1) administering the on-site inspection statutory exemption; (2) administering the 300 lot limited offering regulatory exemption; and (3) reaching administrative settlements regarding various kinds of fraudulent practices. The conferees are particularly interested in an analysis of the problems that have occurred in these three categories as they relate to land developments that are sold only (or primarily) to intra state customers and as they relate to developments of various sizes ranging from 50 to 400 lots. This information will be crucial to assist the respective House and Senate committees as they consider legislative reform of the Act next year.

TREATMENT OF SOCIAL SECURITY BENEFIT INCREASES

The House amendment provided that social security benefit increases occurring after May 1978, shall not be considered as income for the purposes of determining the eligibility for or amounts of assistance available to individuals or families under the U.S. Housing Act of 1937, the National Housing Act, the HUD Act of 1965, or the Housing Act of 1949. The term "social security benefit increases" after May 1976, was defined as any part of a monthly benefit payment under the insurance program established under title II of the Social Security Act which results from a cost-of-living increase in benefits becoming effective after May 1978, which constitutes a general benefit increase within the meaning of section 215(i)(3) of such act. These provisions were not contained in the Senate bill and the conference report does not contain these provisions.

HOUSING PROGRAM PAPERWORK REDUCTION

Findings and program

The Senate bill contained findings that the various Federal agencies responsible for housing and housing finance programs require and use a variety of different forms as residential mortgages, as notes secured by these mortgages, and for applications, appraisals and other purposes, and such duplication of forms constitute a paperwork burden that adds to the costs of homeowners and buyers; that unnecessary paperwork impairs the effectiveness of Federal housing programs; that simplification of paperwork in the housing programs would contribute to achieving the Nation's housing goals by reducing costs; that the responsible Federal agencies have made inadequate attempts to reduce unnecessary paperwork and the resultant costs; and that the Commission on Federal Paperwork has recommended that the agencies reduce the paperwork involved in their housing programs.

The House amendment contained similar findings, but did not include findings that responsible Federal agencies have made inadequate attempts to reduce unnecessary paperwork and resultant costs or reference to the recommendations of the Paperwork Commission. The conference report contains the House provision.

Task force

The Senate bill provided that the President shall establish an Interagency Task Force on reduction of paperwork in housing programs chaired by the Director of OMB which shall submit to Congress a plan and timetable for implementing the recommendations of the Paperwork Commission. The House amendment had no such provision and the provision is not contained in the conference report.

OMB coordination

The Senate bill required that the Director of OMB coordinate and monitor the implementation of the efforts required of HUD and the VA to make uniform their forms, report to the Congress on such implementation and shall coordinate and monitor the plan and timetable for implementing the Paperwork Commission's recommendations. The House amendment was similar, but did not contain the requirement that the Director of OMB coordinate and monitor the implementation of the Paperwork Commission's recommendations. The conference report contains the House provision, however, the conferees believe that the Director should carefully monitor the implementation of these recommendations and take steps to assure that prompt action is taken on them.

Staffing by OMB

The Senate bill contained a provision relating to the Task Force, not included in the House amendment, which required the Director of OMB to assign or secure the staff necessary for the Task Force to complete its duties. The conference report does not include this provision.

Consultation by the Task Force

The Senate bill contained an additional provision relating to the Task Force, not contained in the House amendment, which required the Task Force to consult with the private sector, public interest groups and the general public that will be affected by this section of the bill. The conference report does not include this provision.

NEW COMMUNITIES

The Senate bill contained a provision that was not contained in the House amendment to change the term "New Community Assistance Projects" as used under Title IV of the Housing and Urban Development Act of 1968 to have the same meaning as "New Community Assistance Projects" in Title VII of the Housing and Urban Development Act of 1970. The conference report does not contain this provision. The conferees learned that Jonathan, a Title IV new community assistance project embracing the City of Chaska, Minnesota, is the only federally-assisted new community that is not eligible for all Title VII grant assistance. The conferees also learned that Jonathan, as with many federally-assisted new community projects, is in severe financial difficulty and is being acquired by the Secretary. Foreclosure proceedings have been initiated by the Secretary and are pending action by the U.S. District Courts. Therefore, the conferees consider that any such action affecting this project would be inappropriate at this time.

COST-BENEFIT ANALYSIS OF HUD REORGANIZATION

The Senate bill contained a provision which was not included in the House amendment providing that a plan for the reorganization of any regional, area, insuring, or other field office of the Department of HUD may take effect only upon the expiration of 90 days after publication in the Federal Register of a cost-benefit analysis of the effect of the plan on each office involved. The analysis would include: (1) an estimate of cost savings; (2) an estimate of the additional cost that will result from the reorganization; (3) a study of the impact of the local economy; (4) an estimate on the effect of the reorganization on the availability, accessibility, and quality of services provided for recipients. Where any of these factors cannot be quantified, the Secretary would provide a statement on the extent of those factors in the cost-benefit analysis. The conference report contains this provision.

The intent of this amendment is to assure that (1) the Department, when proposing a nationwide plan to transfer any of its operations from one field office (regional, area or service office, to another considers the cost and benefits of such a plan and the impact of the plan on the various localities involved, and (2) that the public and Congress will be notified of the Department's intent to implement such a plan by publication in the

Federal Register of a cost/benefit analysis of the plan. It is intended that this amendment apply to those reorganization plans which are (a) proposed by the Department in the future, (b) are national in scope, and (c) effect a reduction or transfer in the location or amount of services provided by the Department to the recipient of its services. This amendment is not intended to apply to or restrict the internal operations or organization of the Department (such as the establishment of new or combination of existing organization units within a field office, the duty stationing of employees in various locations to provide on-site service, or the establishment or closing, based on workload, of small, informal offices such as valuation stations.) The amendment is also not intended to restrict the movement or geographic location of the offices of the Department in any given metropolitan area.

HOUSING PRODUCTION REPORTS

The Senate bill contained a provision, that was not included in the House amendment, which required the President, not later than January 20 of each year, to submit to Congress a report which: (1) reviews the progress made in achieving housing production objectives during the preceding year, and if relevant, identifies the reasons for any failure to reach the proposed objectives; (2) projects the level, composition, and general location of production and rehab activity for the current year, and reassess the availability of required resources; (3) specifies Federal programs and policies to be implemented or recommended to achieve the objective; (4) updates the estimates of the housing needs of lower income families in a detailed fashion as to type of need and household and location; (5) reviews the progress made in achieving goals of conserving and upgrading older housing and neighborhoods, expanding homeownership and equal housing opportunities, and assuring reasonable shelter costs; (6) reports on progress made toward developing new methods for measuring progress in achieving these goals; and (7) identifies legislative and administrative actions which will or should be adopted during the current year to achieve these goals. The conference report contains this provision.

TITLE VIII—NEIGHBORHOOD SELF-HELP DEVELOPMENT

The Senate bill contained provisions not in the House amendment which authorized a new program to provide grants and other assistance to qualified neighborhood organizations to undertake neighborhood conservation and revitalization projects.

FINDINGS

The Senate bill contained findings that: (1) existing urban neighborhoods are a national resource to be conserved and revitalized, and that public policy should promote that objective; (2) to be effective such revitalization efforts should maximize the support and participation of those directly affected at the neighborhood level; and (3) an effective way to obtain such participation at the neighborhood level is through neighborhood organizations with a demonstrable capacity for developing and carrying out revitalization projects. The conference report contains the Senate provision.

PURPOSE

The Senate bill provided that assistance under this program would be available to qualified neighborhood organizations to undertake specific housing and revitalization projects (1) in low and moderate income neighborhoods or (2) for the benefit of low and moderate income residents of other neighborhoods which need revitalization. An additional purpose would be to increase the capacity of neighborhood organizations to utilize and coordinate public, private and neighborhood resources. The conference report deletes the provision which provided that qualified projects could be in other than low and moderate income neighborhoods, but for the benefit of low and moderate income residents and limits eligible projects to those in low and moderate income neighborhoods which need conservation and revitalization. In addition, the conference report includes residents themselves as a group to be included in the effort to increase coordination.

DEFINITIONS

Neighborhood organization

The Senate bill defined an eligible neighborhood organization as a voluntary, nonprofit organization which (a) is broadly representative of the neighborhood in which the project will be located, (b) is accountable to neighborhood residents, (c) has as an objective the revitalization of the neighborhood, and (d) is found by the Secretary to have a demonstrable capacity for developing and implementing neighborhood revitalization programs. The conference report contains the Senate provision with an amendment indicating that this organization may include representatives of local businesses, financial and other public and private entities.

Neighborhood conservation and revitalization projects

The Senate bill defined a "neighborhood conservation and revitalization project" as including but not limited to: (a) locally conceived programs for housing rehabilitation and the creative reuse and improvement of existing housing, (b) revitalization of neighborhood retail business areas and the recycling of vacant industrial sites for the purpose of creating employment opportunities and neighborhood economic development, and (c) energy conservation and weatherization projects. The conference report contains this definition with a few minor amendments intended to make clearer that the specific types of projects enumerated in this section are illustrative only and that eligible neighborhood conservation and revitalization projects are not limited to those types specifically enumerated in the title.

AUTHORITY

The Senate bill provided that grants and assistance were to be made for planning and carrying out specific development, conservation and revitalization projects. The conference report contains the Senate provision amended to provide that grants and assistance are to be made for preparing and implementing specific projects rather than for planning and carrying out such projects. The conferees wish to emphasize that HUD should become involved in assisting a project after it had its planning essentially completed (except architectural, engineering or similar types of specific plans), had tangible local support, and was moving well toward its implementation, rather than being simply at its earliest or initial planning or conceptual stages.

APPROPRIATE GRANTS

The Senate bill enumerated six specific criteria for eligible projects. Grants and other forms of assistance would be made available only if: (1) the assistance will be used for a specific project related to a revitalization strategy for a specific neighborhood; (2) the project will include a self-help component involving a contribution of time or resources by neighborhood residents; (3) the project will directly benefit residents of a low and moderate income neighborhood, or low and moderate income residents of other neighborhoods; (4) the project will involve leveraging of resources available from the private sector; (5) the project will involve the coordination of resources from the local, State or Federal Governments; and (6) the applicant demonstrates that the residents of the neighborhood (particularly those who will be directly affected) have been actively involved in and supportive of the selection of the project, and will continue to be involved in the project through an ongoing neighborhood participation mechanism. The conference report contains the Senate provision with two specific changes and the addition of a seventh criterion.

The second criterion, relating to a self-help component, was amended to indicate that a self-help component which involves a contribution of time or resources by neighborhood residents is not an absolutely essential element in determining project eligibility, but rather an element to be desired and encouraged whenever possible.

The third criterion, was amended to conform to the amendment made to the Purposes provision of the Senate bill deleting from eligibility projects which were not located in low and moderate incomes, but were for the benefit of low and moderate income residents of other neighborhoods.

An additional criterion necessary for eligibility, relating to the identification of funding sources, was added to require written verification that funding sources identified in the application do, in fact, support the project and can make the identified funds available to the project as the project progresses.

INELIGIBLE PROJECTS

The Senate bill enumerated several items which were not eligible for funding. These were: (1) planning functions not combined with project implementation; (2) a public works project, such as street repair, not connected with the specific funded project; (3) operation of a social service program not connected to a specific project; (4) an economic development project which will not primarily benefit the residents of the neighborhood in which it will be located; (5) operating costs of a community group not connected with a specific project; (6) other purposes which the Secretary may determine are not consistent with purposes of this title.

The conference report contains the Senate provision. The conferees wish to indicate that while the operation of a social service program or the operating costs of a community group, specifically associated with a funded project are eligible items, these costs should be funded only for a brief, start-up period after which other funds should be identified by the local community to supplant funds made available pursuant to this title. The conferees do not believe this start-up period should extend beyond two or three years.

CERTIFICATION BY LOCAL GOVERNMENT

The Senate bill provided that assistance could be made available under this title only after the unit of general local government within which the neighborhood to be assisted is located certified that the proposed assistance is consistent with, and supportive of, the objectives of that unit of government. The conference report contains the Senate provision with amendments that require that the application submitted by the applicant organization contain this certification by the local government and that this certification indicate that the project is consistent with, and supportive of, the specific objectives of that local government.

CONSULTATION WITH OTHER FEDERAL AGENCIES

The Senate bill contained a provision requiring the Secretary of HUD to consult with other federal departments and agencies having responsibilities related to the purposes of this title. The conference report retains this provision.

AUTHORIZATION

The Senate bill authorized an appropriation not to exceed $15 million for each of the fiscal years 1979 and 1980. The conference report contains this provision.

TITLE IX—LIVABLE CITIES

The Senate bill contained a provision not in the House amendment which authorized a new program to provide assistance to States, neighborhoods and other organizations to enable such organizations to undertake or support projects aimed at revitalizing urban communities and neighborhoods, provide a more suitable living environment, expand cultural opportunities, and indirectly stimulate economic opportunities for the residents of urban communities and neighborhoods.

FINDINGS

The Senate bill contained findings that: (a) artistic, cultural and historic resources, including urban design, are an integral part of a suitable living environment for residents of urban areas and that such resources should be available to all regardless of income; (b) the development and preservation of such resources are necessary to the vitality of the urban environment and can serve as a catalyst for improving urban communities; and (c) the encouragement and support of local initiatives, particularly in connection with federally assisted housing or community development activities or in communities with a high proportion of low-income residents, is an appropriate federal function. The conference report contains this provision.

PURPOSE

The Senate bill provided that the primary purpose of the title was to further efforts to revitalize communities and neighborhoods and to provide a more suitable living environment, expanded cultural opportunities and indirectly stimulate economic opportunities for their residents, particularly low and moderate income residents. The conference report provides that the purpose of the title is to assist the efforts of public and private groups to provide a more suitable living environment, expand cultural opportunities, and to the extent practicable, stimulate economic opportunities, all primarily for low and moderate income residents of communities and neighborhoods in need of conservation and revitalization.

DEFINITIONS

The Senate bill contained a number of definitions which have been retained with a few technical changes in the conference report.

Art and arts

The terms "art" and "arts" are defined as including, but not limited to, architecture, landscape architecture, urban design, interior design, graphic arts, fine arts, performing arts, literature, crafts, photography, communications media and film, as well as activities which reflect a cultural heritage.

Nonprofit organization

The definition contained in the Senate bill has been technically revised and included in the conference report.

The term "nonprofit organization" is defined as meaning an organization in which no part of its net earnings inures to the benefit of any private stockholder or stockholders, individual or individuals and, if a private entity, which is not disqualified for tax exemption under section 501(c)(3) of the Internal Revenue Code of 1954 by reason of attempting to influence legislation and does not participate in or intervene in any political campaign on behalf of any candidate for public office. Such organizations may include states and units of local government, regional organizations of local governments and nonprofit societies, neighborhood groups, institutions, organizations, associations or museums. The conferees also wish to indicate that an eligible private entity would not have to possess a section 501(c)(3) exemption but only that it would not be disqualified from receiving one by virtue of the degree of its activity in attempting to influence legislation or participate in political campaigns on behalf of any candidate for public office.

Project

The Senate bill and the conference report define project as a program or activity intended to carry out the purpose of this title including programs for neighborhood and community based arts programs, urban design, user needs design, and the encouragement of the preservation of historic and other structures being of neighborhood or community significance.

Other definitions

The Senate bill and the conference report define the term "Secretary" to mean the Secretary of the Department of Housing and Urban Development; the term "Chairman," to mean the Chairman of the National Endowment for the Arts; the term "Department" to mean the Department of Housing and Urban Development; and the term "Endowment" to mean the National Endowment for the Arts.

AUTHORITY

The Senate bill would have authorized the Secretary to make grants or contract or make other arrangements with nonprofit organizations (or, in appropriate cases, as determined by the Secretary, to enter into contracts with profitmaking organizations). The conference report contains language which limits this authority to the making of grants or contracts with nonprofit organizations. The conferees believe that eligible nonprofit organizations could, in turn, make arrangements as provided in their agreements with the Secretary and in accordance with HUD's applicable regulations and procedures, with other groups, which could include profitmaking organizations. The change contained in the conference report is intended to clarify that the direct contemplated relationship in this program is between the Department and nonprofit organizations.

The Senate bill also provided that eligible projects must carry out the purposes of the title and (1) have substantial artistic, cultural, or urban design merit; (2) represent community or neighborhood initiatives which have a significant potential for revitalizing communities or neighborhoods, enhancing civic identity and pride for the residents, particularly low and moderate income residents of urban areas; and (3) meet the criteria jointly established by the Secretary and Chairman of the National Endowment for the Arts.

The conference report provides that eligible projects (1) have substantial artistic, cultural, historical or design merit; (2) represent community or neighborhood initiatives which have a significant potential for conserving or revitalizing communities and neighborhoods, and enhancing civic identity and pride; and (3) meet the criteria jointly established by the Secretary and Chairman of the National Endowment for the Arts. The conference report retains the Senate provision regarding criteria for evaluating and selecting projects; however, the conferees recognize that the extent to which any eligible project may meet these criteria will vary and that the primary purpose of these criteria is to act as a tool for use by the Secretary and Chairman in evaluating and ranking prospective projects.

ELIGIBLE PROJECTS

The Senate bill contained a provision requiring the Secretary and Chairman to establish criteria and procedures for evaluating and selecting projects to be assisted which criteria shall address, but need not be limited to, the following factors: (1) artistic, cultural, historic, or urban design quality; (2) the degree of broadly-based, active community participation and involvement by local officials and artists in the proposed project; (3) the degree of, or potential for, utilization of assistance from other federal, state, and local public or private sources; (4) the feasibility of project implementation, including the sponsor's capability; (5) the potential contribution to neighborhood revitalization and civic pride; (6) the potential for stimulating neighborhood economic and community development, particularly for the benefit of low and moderate income persons; and (7) the potential utilization by neighborhood residents, particularly residents who are of low and moderate income, senior citizens, and handicapped persons. The conference report contains this provision with minor technical changes. The conferees wish to indicate that each project may not meet each enumerated criteria and that the Secretary and Chairman may also utilize additional criteria in their evaluation.

APPLICATION FOR FINANCIAL ASSISTANCE

Procedural compliance

The Senate bill contained a provision which is also contained in the conference report requiring applications to be submitted in accordance with regulations and procedures established by the Secretary and the Chairman.

Consultation with local officials and chairman

The Senate bill contained a provision requiring the Secretary and Chairman to seek the recommendations of state and local officials and private citizens knowledgeable in community and economic development and revitalization, and of such officials and citizens knowledgeable in the arts. The conference report contains this Senate provision.

OTHER FUNDING

The Senate bill required the Secretary, in cooperation with the Chairman, to prescribe regulations which would require that a specific portion of the cost of any assisted project be provided from sources other than funds made available by this title which could be reduced or waived by the Secretary taking into account the financial capacity of the applicant. The conference report contains this Senate provision modified so as to clarify that in cooperation with the Chairman, the Secretary would have the discretionary authority to establish a set of financial matching requirements which might vary depending on the type of applicant and which might be reduced or waived solely on the basis of the financial capacity of the applicant.

ELIGIBILITY OF SPONSOR ORGANIZATIONS

The Senate bill contained a provision which defined an eligible organization. The conference report does not contain this provision as its substance was incorporated into the definition of a nonprofit organization contained in the definitions section of this title.

CONSISTENCY WITH THE OBJECTIVES OF THE APPLICABLE UNIT OF LOCAL GOVERNMENT

The Senate bill contained a provision requiring the Secretary and Chairman to establish procedures for eliciting the cooperation of local officials in assuring that no project be approved which would be inconsistent with the objectives of the unit of local government within which such projects would be carried out, including the cultural and community development and neighborhood preservation and revitalization plans and activities of that government. The conference report contains a substitute provision which provides that grants and assistance may be made available only if the application submitted by the applicant contains a certification by the unit of general local government that the project is consistent with, and supportive of, the objectives of that government for the area in which the project will be located.

The conferees wish to insure the involvement of the local government (where it is

not the applicant) earlier in the application process than was necessarily required in the Senate bill. In addition, the conference report requires an affirmative indication that an eligible project is consistent with, and supportive of, the objectives of that government for the area of the city in which the project would be located.

PROHIBITION AGAINST SUBSTITUTION

The Senate bill contained a prohibition against utilizing funds under this title to supplant non-federal funds. The conference report contains the Senate provision amended to prohibit the use of funds authorized for this program to supplant federal, as well as non-federal funds.

ADMINISTRATIVE EXPENSES

The Senate bill provided that no more than ten percent of the funds appropriated for any fiscal year be available for administrative expenses. The conference report contains this provision.

ADMINISTRATIVE COORDINATION

The Senate bill provided that insofar as practicable the Secretary coordinate the administration of the provisions of this title, and encourage the coordination of activities assisted under this title with existing Federal, State and local public and private programs. The conference report amends this provision to strengthen the Secretary's responsibility to coordinate the administration of this program in cooperation with other Federal agencies and to assure, rather than encourage, the coordination of assistance under this title with related efforts undertaken by State and local governments and private groups.

AUTHORIZATION

The Senate bill authorized an appropriation not to exceed $5 million for fiscal year 1979, and not to exceed $10 million for fiscal year 1980. The conference report contains this provision.

NATIVE LATEX COMMERCIALIZATION ACT OF 1978

Mr. FOLEY, Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 1816) to amend the Public Works and Economic Development Act of 1965 to authorize a program of research, development, and demonstration of guayule rubber production and manufacture as an economic development opportunity for the Southwestern States, with a Senate amendment to the House amendment thereto, and concur in the Senate amendment to the House amendment with an amendment.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendment, as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment, insert:

That this Act may be cited as the "Native Latex Commercialization and Economic Development Act of 1978".

SEC. 2. (a) Congress recognizes that natural latex rubber is a commodity of vital importance to the economy, the defense, and the general well-being of the Nation. The United States is totally dependent upon foreign sources for its supplies of natural (Hevea) latex, which total about one million tons per year. Synthetic rubber, manufactured from petroleum feedstocks, cannot be substituted for natural rubber.

(b) Congress further recognizes that certain plant species of the genus Parthenium (Guayule), native to Texas and the Republic of Mexico, as well as other plants, are known to contain commercial quantities of extractable rubber. During World War II, through research carried out by the Secretary of Agriculture in the Emergency Rubber Project, the United States demonstrated that Parthenium latex is a promising and realistic substitute for Hevea latex.

(c) Congress further recognizes that additional research and development are needed, especially into methods for increasing latex yields, before commercialization of native Parthenium latex or other hydrocarbon-containing plants by private industry is feasible.

(d) Congress further recognizes that the development of a domestic natural rubber industry, based on Parthenium and other hydrocarbon-containing plants, would not only relieve the Nation's dependence upon foreign latex sources but also convey substantial economic benefits to peoples living in arid and semiarid regions of the United States. Such an industry would comprise the agricultural production of the hydrocarbon-containing plants and the development of commercial processing and manufacturing facilities to extract the latex and other products.

(e) Congress further recognizes that ongoing research into the commercialization of native latex has been conducted by the Department of Agriculture and by the Department of Commerce through the regional commissions and that these research efforts should be continued and expanded.

(f) It is the policy of Congress, therefore, to provide for the development and demonstration of economically feasible means of culturing and manufacturing Parthenium and other hydrocarbon-containing plants for the extraction of natural rubber and other products to benefit the Nation and promote economic development.

SEC. 3. As used in this Act—

(a) The term "State" means each of the fifty States, the District of Columbia, and the Commonwealth of Puerto Rico.

(b) The term "Secretaries" means the Secretary of Agriculture and/or the Secretary of Commerce acting each separately or jointly.

(c) The term "commercialization" means the stage in the development or advancement of a technology at which point private enterprise is willing to invest in a full-scale production facility.

(d) The term "native" means hydrocarbon-containing plants which may be cultured in North America, especially members of the genus Parthenium known as Guayule.

(e) "Regional Commissions" means the Regional Action Planning Commissions established pursuant to title V of the Public Works and Economic Development Act of 1965.

SEC. 4. (a) There is hereby established a Joint Commission on Guayule Research and Commercialization, hereinafter referred to as the Joint Commission. The function of the Joint Commission shall be to assist the Secretaries in carrying out the purposes of this Act.

(b) The Joint Commission shall consist of the following members: The individuals designated by the Secretary of Agriculture from among the staff of his Department; three individuals designated by the Secretary of Commerce at least two of whom shall be Federal Cochairmen of Regional Commissions engaged in the support of native latex research, development, demonstration, or commercialization activities and one of whom shall be selected from among the members of his Department; a representative of the Bureau of Indian Affairs of the Department of the Interior; and a representative of the National Science Foundation.

(c) The Joint Commission shall be headed by a Chairman. The Secretary of Agriculture shall designate one of the two members from his Department to serve as Joint Commission Chairman during the first two-year period following the enactment of this Act, and the Secretary of Commerce shall designate one of the two members from his Department as Joint Commission Chairman during the second two-year period following the enactment of this Act. And the same process of designating Joint Commission Chairmen shall be followed in ensuing years.

(d) The Secretaries may delegate to the Joint Commission one or more of their responsibilities under this Act and transfer to the Joint Commission funds appropriated to carry out the purposes of this Act as they deem appropriate to achieve the purposes of this Act, and the Joint Commission is authorized to carry out such functions and expend such funds to achieve the purposes of the Act.

(e) The Joint Commission shall—

(1) develop a plan establishing goals, timetables, and tasks to be undertaken in carrying out the purposes of this Act;

(2) establish broad policy for implementing the plan carrying out the purposes of this Act;

(3) establish criteria for evaluating and awarding contracts for research, development, and demonstration projects, and

(4) review and advise the Secretaries with respect to grants, contracts, and other project expenditures.

(f) The Secretaries are authorized to provide without reimbursement such administrative support services, including the detail of staff personnel not to exceed a total of five persons from each Department, as the Joint Commission may need to carry out its functions.

(g) One year after the enactment of this Act, and each year thereafter, the Joint Commission shall provide to the Congress a report on the implementation of the Act. Such report shall (1) recommend specific directions for further research, development, and other works, and (2) recommend funding levels for various elements of the overall project.

(h) To the maximum extent possible, the Secretaries and the Joint Commission shall seek the advice of the scientific, engineering and business communities with respect to the activities carried out under this Act. The Secretaries and the Commission shall specifically seek the advice of persons with expertise in appropriate fields of agricultural research in land grant colleges and other universities, in State agricultural experiment stations, and in other appropriate organizations; and, persons with expertise in rubber manufacturing and commerce in private enterprise and other appropriate organizations.

SEC. 5. The Secretary of Agriculture shall conduct, sponsor, promote, and coordinate basic and applied research, technology devel-

opment, and technology transfer leading to effective and economical methods for large-scale culturing of plantations and the extraction of latex from Parthenium or other hydrocarbon-containing plants. Such research shall include, but not be limited to—

(a) carrying out extensive seed collections from wild plants in Texas, Mexico, and other areas and borrowing or purchasing seeds from other sources;

(b) developing a stockpile of Parthenium seeds, such stockpile to be appropriately classified and stored in a suitable facility;

(c) carrying out breeding and selection programs for the purpose of improving latex yields, expanding insect and disease resistance, and broadening the ranges of drought and cold tolerance of the Parthenium plant;

(d) establishing a system of experimental plantings in arid and semiarid regions of the United States having suitable climatic and soil conditions for the culture of Parthenium;

(e) carrying out specific studies on the effects of irrigation on plant growth and latex yield and survival potential;

(f) developing equipment needed to carry out nursery operations, planting, cultivating, harvesting, transporting the crop, and other necessary agricultural activities;

(g) further refining present extraction technologies and future extraction technologies, including technologies which utilize solar energy; and

(h) establishing and maintaining a bank of all pertinent research data on native latex including extant United States Government publications and records from the emergency rubber project. Such data shall be made available to other Federal and State agencies and private persons who are interested or involved in native latex research, development, or manufacture.

SEC. 6. The Secretary of Commerce is authorized and directed to initiate and carry out research, technology development, technology transfer, and demonstration projects to test and demonstrate the economic feasibility of the manufacture and commercialization of natural rubber from Parthenium or other hydrocarbon-containing plants. Such research may be carried out through the Regional Commissions or otherwise and shall include but not be limited to—

(a) conducting research and development on extraction and processing techniques;

(b) economic analysis of the production of native latex, including usable byproducts;

(c) studying the environmental, social, and economic impacts of the commercial development of native latex;

(d) evaluating the commercial marketability of Parthenium and rubber derived from other hydrocarbon-containing plants;

(e) further refining present extraction and manufacturing technologies and future extraction and manufacturing technologies, including technologies which utilize solar energy, and

(f) developing pertinent material and records on manufacturing of natural rubber which shall be available to other Federal and State agencies and private persons who are interested in or involved in natural rubber development, or manufacture.

SEC. 7. The Secretaries, in consultation with the Secretary of State, are authorized and encouraged to enter into cooperative projects with the Government of Mexico in order to accomplish appropriate aspects of the research and development provided for in this Act. Such cooperative projects should include, but not be limited to, projects to determine the economic feasibility of latex extraction and processing.

SEC. 8. The Secretaries are authorized to accept financial or other assistance from any State or public agency to aid in carrying out the provisions of this Act and to enter into contracts with respect to such assistance and to enter into agreements with any State or public agency for the purpose of demonstrating, transferring, or applying results of research or methods of economic development relating to native latex.

SEC. 9. In carrying out the provisions of this Act, the Secretary of Agriculture is authorized to—

(a) make grants to States, education institutions, scientific organizations, and Indian tribes as defined in the Indian Self-Determination and Education Assistance Act (Public Law 93-638, 25 U.S.C. 450), and enter into contracts with such institutions and organizations and with industrial or engineering firms;

(b) acquire the services of biologists, agronomists, foresters, geneticists, chemists, engineers, economists, and other personnel by contract or otherwise;

(c) utilize the facilities of Federal and State scientific laboratories;

(d) establish and operate necessary facilities and plantations to carry out the continuous research, testing, development, and programing necessary to effectuate the purposes of this Act;

(e) acquire secret processes, technical data, inventions, patent applications, patents, licenses, land and interest in land (including water rights), facilities, and other property or rights by purchase, license, lease, or donation;

(f) assemble and maintain pertinent and current literature and publications, patents and licenses, land and interests in land;

(g) cause onsite inspections to be made of promising projects, domestic or foreign, and, in the case of projects located in the United States, cooperate and participate in their development when the Secretary determines that the purpose of this Act will be served thereby;

(h) foster and participate in regional, national, and international conferences relating to native latex culture;

(i) coordinate, correlate, and publish information with a view to advancing the development of native latex technology; and

(j) cooperate with other Federal departments and agencies, with State and local departments, agencies, and instrumentalities, and with interested persons, firms, institutions, and organizations.

SEC. 10. In carrying out the provisions of this section, the Secretary of Commerce, acting through the Regional Commissions, or otherwise is authorized to—

(a) make grants to States, education, institutions, scientific organizations, and Indian tribes as defined in the Indian Self-Determination and Education Assistance Act (Public Law 93-638, 25 U.S.C. 450), and enter into contracts with such institutions and organizations and with industrial or engineering firms;

(b) acquire the services of biologists, agronomists, foresters, geneticists, engineers, economists, and other personnel by contract or otherwise;

(c) utilize the facilities of Federal and State institutions and other scientific laboratories;

(d) establish and operate necessary facilities and pilot plants to carry out the continuous research, testing, development, and programing necessary to effectuate the purposes of this section;

(e) acquire secret processes, technical data, invention, patent applications, patents, licenses, land and interests in land (including water rights), plants and facilities, and other property or rights by purchase, license, lease, or donation; and

(f) foster and participate in regional, national, and international conferences relating to natural rubber manufacture.

SEC. 11. In carrying out the provisions of this Act, the Secretaries and the Joint Commission shall insure that their activities are closely coordinated with the activities of other Federal agencies such as the Department of the Interior, National Science Foundation, Bureau of Indian Affairs, Department of Energy, Department of Defense, Treasury Department, Federal Preparedness Agency, and others in order to prevent duplication of effort, insure compatibility with ongoing programs and policies, and to fully exploit the opportunities inherent in the culture and manufacture of native latex.

SEC. 12. Relative to the definitions of, title to, and licensing of inventions made or conceived in the course of or under any contract or grant pursuant to this Act, and notwithstanding any other provisions of law, the provisions of sections 9 and 10 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908-9) shall govern.

SEC. 13. The Secretary of Agriculture and the Secretary of Commerce may dispose of any latex, resin, wax, pulp, and any other byproducts resulting from operations under this Act. All moneys received from dispositions under this section shall be paid into the Treasury as miscellaneous receipts.

SEC. 14. The Secretary of Agriculture and the Secretary of Commerce may issue rules and regulations necessary to effectuate the purposes of this Act.

SEC. 15. The Secretary of Agriculture and the Secretary of Commerce shall submit to the President and the Congress, no later than December 31, 1980, and each year thereafter through 1982, a report on the status of the research, development, and other work underway under this act. Such report shall (1) recommend specific directions for further research, development and other work, and (2) recommend funding levels for various elements of the overall project.

SEC. 16. (a) There is authorized to be appropriated to the Secretary of Agriculture $2,500,000 for each of the fiscal years ending September 30, 1980, and September 30, 1981, and $5,000,000 for each of the fiscal years ending September 30, 1982, and September 30, 1983, to carry out the purposes of this Act. Funds appropriated under this paragraph shall be available for obligation until the last day of the fiscal year after the year for which such funds are authorized.

(b) There is authorized to be appropriated to the Secretary of Commerce $2,500,000 for each of the fiscal years ending September 30, 1980, and September 30, 1981, and $5,000,000 for each of the fiscal years ending September 30, 1982, and September 30, 1983, to carry out the purposes of this Act. Funds appropriated under this paragraph shall be available for obligation until the last day of the fiscal year after the year for which such funds are authorized.

(c) No more than 3 per centum of funds authorized under subsections (a) and (b) shall be available for administration and management of the program.

(d) Notwithstanding any other provision of this Act the authority to enter into contracts shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriations Acts.

The Clerk read the House amendment to the Senate amendment to the House amendment, as follows:

Add at the end of the Senate amendment to the House amendment a new section 17 as follows:

SEC. 17. Section 320 of the Agricultural Adjustment Act of 1938 as added by the Act of September 3, 1974 (88 Stat. 1089; 7 U.S.C. 1314f) is amended by adding a new sentence at the end thereof as follows: "Notwithstanding any other provision of law, no marketing quota penalties shall be assessed as a result of the marketing of 1975 crop Maryland tobacco (Type 32) which was determined through the application of the

Federal Standards of Inspection and Identification of quota types to be Burley tobacco (Type 31) under the provisions of this section.".

Mr. FOLEY (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the amendment, and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. WAMPLER. Mr. Speaker, reserving the right to object, I do so in order to yield to the gentleman from Washington (Mr. FOLEY) so he may explain the legislation.

Mr. FOLEY. Mr. Speaker, I rise in support of S. 1816, as amended, the Native Latex Commercialization and Economic Development Act of 1978. The bill would direct the Secretaries of Agriculture and Commerce to coordinate research on the commercialization of latex from hydrocarbon containing plants, the most significant of which is a plant indigenous to the American Southwest known as guayule.

S. 1816, as it initially passed the Senate on May 26, 1978, authorized the Secretary of Commerce, acting through title V regional commissions to carry out research and demonstration projects to test and demonstrate economic feasibility of commercialization of native rubber. The bill contained an advisory committee to assist the Secretary of Commerce in carrying out the program. The bill authorized expenditures of $20 million over 4 years.

On September 19 the House passed H.R. 12559, a similar bill, and adopted the Senate number. The House bill directed the Secretary of Agriculture to carry out and coordinate research on the commercialization of native latex and establish an advisory committee to assist the Secretary. The House bill contained authorizations of $55 million over a 4-year peroid.

During the past several weeks attempts have been made to establish a middle ground between these two bills which would be acceptable to all parties concerned. S. 1816, as amended and passed again by the Senate on October 7, represents such an attempt and I believe the result is the best which could have been achieved given the differences between the two bills and the limited time with which we have had to work.

The major point of difference between the two measures was the agency which would coordinate and carry out the program. The House measure had the entire program in Agriculture and the Senate in Commerce. Rather than giving the entire program to one or the other agency the amended bill placed responsibility for the different research and development efforts within the agency best equipped to handle them. The Department of Agriculture is responsible for plant breeding, seed collecting, establishing plantations, developing equipment necessary for planting, cultivation and harvesting, and further refining of extraction technologies. The Department of Commerce is responsible for developing extraction and processing techniques, conducting economic analyses, studying the effects of native latex commercialization, and further refining present extraction and manufacturing technologies.

In order that the activities of both agencies be coordinated in a manner which will maximize the use of available resources, the amended bill would establish a joint commission on Guayule. The Commission contains three members each from the Departments of Agriculture and Commerce and one member each from the National Science Foundation and the Bureau of Indian Affairs. The chairmanship of the Commission rotates annually between Agriculture and Commerce designees. Since the Joint Commission is given responsibility for establishing goals, policies, and timetables and reviewing and advising the secretaries with respect to grants, contracts and other expenditures, the possibility of overlapping efforts is eliminated. The Joint Commission is also responsible for providing the Congress with yearly reports on the implementation of the act.

This is a unique arrangement for a unique program. I know that in some instances the organizational arrangement embodied in S. 1816 as amended might be viewed as a precedent for other programs. I want to assure my colleagues that such is not the case. This arrangement is tailored to meet the specific needs of guayule commercialization. Other legislative attempts to utilize this type of arrangement will be viewed on their own merit since passage of this bill will not imply that it must serve as a model for other programs.

S. 1816, as amended, provides funding levels below those in the House bill. It contains authorizations of $30 million for 4 years with half of each year's authorization going to each agency. The levels are $5 million for each of the first 2 years and $10 million for the last 2 years.

This legislation is of critical importance since the development of a domestic source of natural latex is necessary for the future well-being of our rubber industry and the security and prosperity of the United States. Enactment of this legislation will have several direct and indirect benefits:

It will help reduce our dependence on foreign latex sources, many of which are located in politically unstable areas of the globe.

It will reduce our consumption of synthetic latex which is derived from petroleum, thus reducing our foreign oil imports.

By reducing rubber and oil importation, it will help to stabilize the balance of trade.

It will provide for agricultural and commercial development in areas of the Southwest which exhibit chronic unemployment.

And, finally, it will promote the development of a solar grown, renewable resource which will help conserve the world's dwindling petroleum supplies.

The benefits which will be derived from this legislation are so great that further delay in enactment is unwarranted. I believe that S. 1816, as amended, represents a reasonable compromise and I urge my fellow Members to support it.

Mr. WAMPLER. Mr. Speaker, further reserving the right to object, I want to take this opportunity to state that I concur in the statement of the gentleman from California (Mr. BROWN) and I wish to make the additional point that future agricultural research legislation should not be patterned after the form of this bill. I think we all understand the special circumstances under which this bill originated. It is most unlikely that such circumstances will arise again.

I would also like to discuss briefly the amendment dealing with tobacco.

This morning, by a unanimous vote, the Committee on Agriculture ordered reported H.R. 14782, a bill to waive the assessment of marketing quota penalties on certain 1975 crop Maryland type 32 tobacco.

In 1975, 144 farmers in Virginia, Tennessee, and North Carolina planted Maryland type 32 tobacco thinking in good faith that such action would be consistent with a new tobacco law enacted the previous fall. Unfortunately however, a long legal battle ended 3 years later with a determination that this tobacco was classified as type 31 burley tobacco. Type 32 Maryland tobacco is not under price support, marketing quota or acreage allotment because producers voted in a referendum against bringing it under the price support program.

The tobacco produced and marketed in the three States as Maryland type 32 was once graded as such by court-appointed graders. A USDA inspector also graded the tobacco as burley. Ultimately, the court accepted the USDA grading as burley. Later the U.S. Courts of Appeals upheld the lower courts' action. On September 19, 1978, the USDA sent letters to the 144 growers informing them of the penalties they face for marketing burley tobacco. The penalties include adjustments of marketing quotas for the marketing years 1976 through 1979, and the imposition of fines totaling $136,087.

The Department of Agriculture has agreed to forestall any penalty collection or assessment activities pending the consideration of remedial legislation.

I, along with Messrs. JONES, chairman of the Tobacco Subcommittee, QUILLEN, DUNCAN, and NEAL, have introduced H.R. 14287, legislation designed to waive all penalty assessments. This legislation calls for no expenditures of Government funds and applies to this specific case only.

In summary, let me again stress that the producers involved are basically small operators with limited incomes. By virtue of the application of present law, they face severe financial losses. All of these growers acted in good faith and sincerely believed the tobacco they grew to be Maryland type 32.

I would also like to stress for the legislative history of this bill that it is in no way intended to overrule or negate the opinion of the U.S. court of appeals or the U.S. district court. The judicial remedy was exhausted. The Department of Agriculture won its case in court. We

are now dealing with a legislative remedy only.

Let me say too that this legislative remedy is a unique one. It is not, nor should it be, a precedent for any tobacco grower who violates the quota provisions of the 1938 act to seek legislative relief from his Congressman. I support the tobacco program and want to do all I can to keep the discipline and the integrity of the program intact.

The circumstances here are indeed unique because the growers involved were not intentional violators; they were instead producers who planted type 32 tobacco believing it to be outside the quota restraints of the 1974 amendments.

This is a one-shot amendment and I hope it will not be cited as a basis for excusing other violations of the quota provisions of the law.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

● Mr. THORNTON. Mr. Speaker, I join my colleagues on the Science and Technology Committee and on the Agriculture Committee in urging the House to adopt S. 1816 as amended by the Senate.

I think there are several aspects of this program which are worth emphasizing. One is that while the potential for rubber extraction from the guayule plant was determined without a doubt through the emergency rubber project in World War II, today the commercial viability is not nearly as clear. In order for a domestic rubber industry to be developed and be successful, substantial additional research and development is needed. That is what this bill would do. It would provide, for a limited number of years, a Federal effort aimed at bringing the yield of the guayule plant and the associated cultivation, harvesting, extraction, and manufacturing technologies to a point where the private sector could take over.

The funding in the bill for this purpose is equally modest. The bill would provide over the 4-year period a total of $30 million to be divided equally by the Department of Agriculture and the Department of Commerce. I believe that, following the completion of this 4-year period, it may well be necessary to provide funding for another period of years but I want to state that this is not an open-ended program. We all expect that within a reasonable number of years, probably about a dozen or so, substantial advances will be made so that private industry can step in.

Another important point worth emphasizing is that this effort is not starting from scratch. Not only do we have the experience of the emergency rubber project 35 years ago, but several Federal agencies are now supporting small but significant efforts. The Regional Commissions, as noted in the Senate report on this legislation, is supporting several projects on guayule in the Southwest. The National Science Foundation has been supporting several basic research-oriented projects on the biology of guayule. And the Agriculture Department similarly has several small, individual projects proceeding at this time.

This bill is intended to build on and augment these ongoing efforts. I am hopeful that the Joint Commission, on which all the interested parties in the executive branch will be represented, will serve as a vehicle for carrying forward a stronger and more vigorous research and commercialization program.

I urge my colleagues to support this legislation.●

● Mr. TEAGUE. Mr. Speaker, the House has returned to the Senate this bill with an amendment. I have reviewed the bill and I believe it is the best possible way in which to move forward this important program.

The bill, as amended, is the result of detailed discussions between the staffs of the committees involved. On the House side, the Science and Technology Committee and the Agriculture Committee held joint hearings on the House version of this legislation and on the subcommittee level the markup was also held jointly. Our two committees have worked closely on this bill and I am glad to say that we are in agreement on the desirability of passing S. 1816 as amended. I am glad also to note that we have had the participation of the Honorable ROBERT ROE, chairman of the Subcommittee on Economic Development in the Public Works Committee, and his staff. They too support this bill.

S. 1816 as amended is clearly a compromise. The original House bill placed the entire program in the Agriculture Department while the original Senate bill placed it in the Regional Development Commission of the Commerce Department. Thus the emphasis in the original Senate bill was clearly on economic development while the emphasis in the House bill was on the agricultural research necessary as a foundation for the program. The compromise returns the authority for carrying out these respective aspects of the program in the two Departments. It would provide authority to the Secretary of Commerce for the technology advancement and the economic development. And it would give authority to the Secretary of Agriculture to carry out and fund the agricultural research.

To coordinate these efforts and to provide a leading role in moving the entire program forward the bill would establish a joint commission on guayule research and commercialization. The joint commission would have responsibility for development of a long-term plan and for advising the two Secretaries on grants and contracts to be made under the program. The bill would also authorize the joint commission to carry out any of the functions logged in both the Secretaries. I hope that the commission, to the maximum extent possible, will be given the operating functions which are the responsibilities which the Secretary would have under the bill. I believe that while the split authority for the program is a necessary compromise, and it is the best that could be worked out with the many committees involved, it is no doubt desirable to have a single entity responsible for the bulk of activities and the joint commission has the potential of serving that role.

Mr. Speaker, the advances made to date on a very modest scale, and our experience during the Second World War, strongly indicate that guayule rubber could make a very significant contribution to the reduction of our balance of payments. Today our Nation is totally dependent for its supply of natural rubber on imports from abroad. Guayule rubber could within a decade make it possible for us to substantially reduce that dependence. S. 1816 as amended can serve as a vehicle for commercializing a native guayule rubber industry and I urge the Senate to take final action on this bill so that planning can begin.●

The SPEAKER. Is there objection to the initial request of the gentleman from Washington?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the bill S. 1816.

The Speaker. Is there objection to the request of the gentleman from Washington?

There was no objection.

AMENDING PERISHABLE AGRICULTURAL COMMODITIES ACT, 1930

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 976) an act to amend the Perishable Agricultural Commodities Act, 1930, relating to practices in the marketing of perishable agricultural commodities", with a Senate amendment to the House amendments and concur in the Senate amendment.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendments as follows:

In lieu of the matter proposed to be inserted by the House amendment to the text of the bill, insert:

SECTION 1. (a) Effective January 1, 1979, section 1 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499a), is amended by—

(1) in subsection (6), striking out "$100,000" and inserting in lieu thereof "$200,000"; and

(2) in subsection (7), striking out "$100,000" and inserting in lieu thereof "$200,000".

(b) Section 1 of the Perishable Agricultural Commodities Act, 1930, is further amended by inserting in subsection (6) immediately after "(C) no person buying any commodity" the following: "other than potatoes", except that no person buying potatoes for processing solely within the State where grown shall be deemed or considered to be a dealer under subsection (6) of section 1, as amended by this subsection, until January 1, 1982.

SEC. 2. Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c(b)), is amended by—

(1) inserting immediately before the period at the end of the second sentence the following: "and to be furnished thereafter";

(2) striking out "$100" in the third sen-

tence and inserting in lieu thereof the following: "150, plus $50 for each branch or additional business facility operated by the applicant in excess of nine such facilities, as determined by the Secretary. Total annual fees for any applicant shall not exceed $1,000 in the aggregate";

(3) inserting immediately after "referred to above:" in the fourth sentence the following: "*Provided*, That the amount of money accumulated and on hand in the special fund at the end of any fiscal year shall not exceed 25 percent of the projected budget for the next following fiscal year:"; and

(4) inserting "*further*" immediately after "*Provided*" in the fourth sentence.

SEC. 3. Section 13 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499m), is amended by renumbering subsections (b) through (e) as subsections (c) through (f) and adding a new subsection (b) as follows:

"(b) The Secretary or the Secretary's duly authorized agents, in order to insure that the prompt payment provision of section 2(4) of this Act is being complied with, shall from time to time inspect the accounts, records, and memoranda of any commission merchant, dealer, or broker determined in a formal disciplinary proceeding under section 6(b) of this Act to have violated such provision. The Secretary may also require that any such commission merchant, dealer, or broker furnish, maintain, and from time to time adjust a surety bond in form and amount satisfactory to the Secretary as assurance that such commission merchant's, dealer's, or broker's business will be conducted in accordance with this Act and that such commission merchant, dealer, or broker will pay all reparation awards, subject to its right of appeal under section 7(c) of this Act: *Provided*, That if such surety bond is furnished, maintained, and adjusted as required by the Secretary, the Secretary shall not thereafter inspect the accounts, records, and memoranda of such commission merchant, dealer, or broker under this subsection more than once a year. If any such commission merchant, dealer, or broker refuses to permit such inspection or fails or refuses to furnish, maintain, or adjust such surety bond, the Secretary may publish the facts and circumstances and, by order, suspend the license of the offender until permission to make such inspection is given or such surety bond is furnished, maintained, or adjusted.".

SEC. 4. Section 3(b) of the Farm Labor Contractor Registration Act of 1963 (7 U.S.C. 2042(b)) is amended by—

(1) striking out "or" at the end of paragraph (8), striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and "or"; and

(2) adding at the end thereof a new paraparagraph (10) as follows:

"(10) any person who would be required to register solely because the person is engaged in any such activity solely for the purpose of supplying full-time students or other persons whose principal occupation is not farmwork to detassel and rogue hybrid seed corn or sorghum for seed and to engage in other incidental farmwork for a period not to exceed four weeks in any calendar year: *Provided*, That such students or other persons are not required by the circumstances of such activity to be away from their permanent place of residence overnight: *Provided further*, That such students or other persons, if under 18 years of age, are not engaged in providing transportation in vehicles caused to be operated by the contractor.".

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I do so to ask whether all the amendments to the bill are germane.

Mr. FOLEY. Mr. Speaker, if the gentleman will yield, all of the amendments to the bill are germane with one exception. The Senate added a provision, if the gentleman will yield further, which would exempt from the registration requirement of the Farm Labor Contractor Registration Act persons who contract for the services of students who live at home to detassle and rogue hybrid seed corn or sorghum for seed for not more than 4 weeks a year.

Mr. BAUMAN. I thank the gentleman for his response.

Mr. FOLEY. Mr. Speaker, will the gentleman yield further?

Mr. BAUMAN. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, we passed this bill last week after amending it to substitute for the language of the Senate the text of the bill (H.R. 13845) which the House had approved by a rollcall vote of 399 to 7. The Senate has now amended the bill further and returned it to the House. The Senate amendment includes substantially all of the provisions which the House approved although some have been slightly amended. I believe that we now have a bill which will accomplish the objectives of the legislation earlier passed by the House and, at the same time, accommodate the concerns of the other body.

The principal purpose of this legislation, of course, is to increase the statutory ceiling on the license fees which the Secretary of Agriculture may assess in order to enforce the Perishable Agricultural Commodities Act. As we sent this bill to the Senate last week, it provided for an increase in the statutory license fee ceiling from the present $100 per year to $150 per year, plus up to $50 for each additional branch location. There was an aggregate maximum of $1,000. The Senate has accepted this provision with an agreement which would exempt from the additional fee the first nine branch locations.

The House legislation would have increased the volume of perishable agricultural commodities which a retailer may purchase or a broker may sell before becoming subject to license from the present $100,000 per year to $150,000 per year. The Senate amendment increases this exemption to $200,000 per year. The larger exemption is designed to take account of the fact that the wholesale prices of these commodities have doubled since the $100,000 exemption level was established nearly 10 years ago.

The measure passed by the House last week brought intrastate potato processors under regulation but permitted the Secretary in cases of hardship to postpone application of this provision to any processor until as late as January 1, 1982. The Senate amendment brings the potato processors under regulation but exempts all such processors from the licensing requirement until January 1, 1982.

The House measure authorized the Secretary to audit and require a bond of any person found in a formal disciplinary proceeding to have violated the prompt pay requirements of the act. The Senate has accepted this provision.

Finally, the Senate amendment contains a provision not found in the House measure which would exempt from the registration requirements of the Farm Labor Contractor Registration Act persons who contract for the services of students who live at home to detassel and rogue hybrid seed corn or sorghum for seed for not more than 4 weeks a year. While this provision did not originate in the House, we understand that it is not in conflict with the provisions of that act. It will facilitate the opportunities of high school and college students to finance their education through summer employment.

Mr. Speaker, as I have just explained, the Senate amendment incorporates substantially intact most of the provisions passed by the House with a few changes which we believe to be unobjectionable. The Perishable Agricultural Commodities Act program has served the country well for nearly half a century. We believe it is vital that this program be continued with adequate funding. We believe this bill will facilitate that by permitting increased license fees and making other needed regulatory adjustments. I urge my colleagues to support this bill.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill S. 976 just considered in the House.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 14104, ENDANGERED SPECIES ACT AMENDMENTS OF 1978

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1423 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1423

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee on the Whole House on the State of the Union for the consideration of the bill (H.R. 14104) to authorize appropriations to carry out the Endangered Species Act of 1973 through fiscal year 1981, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, the bill shall read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on

the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1423 provides for the consideration of H.R. 14104 (the Endangered Species Act Amendments of 1978).

This is a simple open rule. It provides for 1 hour of general debate with the time equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries. The bill is to be read for amendment under the 5-minute rule and any germane amendment would be in order.

The rule provides for a waiver of points of order against the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act. This section of the Budget Act prohibits the consideration of any bill which authorizes the enactment of new budget authority for a fiscal year unless the bill has been reported on or before May 15 preceding the beginning of the fiscal year.

Section 3 and 4 of H.R. 14104 authorizes the enactment of new budget authority for fiscal year 1979. Since the bill was not reported until September 25, 1978, it would be subject to a point of order under the Budget Act.

However, a predecessor bill, H.R. 10883, an authorization measure very similar to H.R. 14104, was reported on March 31, 1978 and prior to the Budget Act cutoff. In order to facilitate orderly consideration of the measure, the Committee on Rules voted to grant a waiver for H.R. 14104 rather than complicate the amendment process for the originally reported bill.

Mr. Speaker, H.R. 14104 provides authorizations to carry out the provisions of the Endangered Species Act through fiscal year 1981. The bill authorizes $25.5 million for fiscal year 1979; $28 million for fiscal year 1980 and $30.5 million for fiscal year 1981. The bill also provides a mechanism for the resolution of otherwise irreconcilable conflicts between the implementation of any federally permitted, licensed or funded activity and the protection of any endangered or threatened species and its critical habitat.

Mr. Speaker, while there has been controversy concerning the bill, I am not aware of any great opposition to the rule. I urge my colleagues to adopt House Resolution 1423 so that we may proceed to the consideration of H.R. 14104.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a 1-hour open rule permitting the consideration of the Endangered Species Act Amendments of 1978, H.R. 14104. The first reading of the bill is to be dispensed with, and section 402(a) of the Congressional Budget Act (the May 15 reporting deadline) is waived.

The purpose of H.R. 14104 is to provide $85.5 million in authorizations to enforce the Endangered Species Act for an additional 3 years. The bill establishes an Endangered Species Committee and requires the formation of review boards to examine the decisions of the Secretary of the Interior as to whether an agency's action would be hazardous to endangered species and their critical habitat area. Such a determination by the Secretary would prohibit the agency's action. Except in special cases, such as cases relating to international treaty obligations as determined by the Secretary of State or cases pertaining to disaster areas declared by the President, the Endangered Species Committee would make the final governmental decision by either approving or disapproving the agency's action. If an agency exemption is granted for pertinent reasons, any person may obtain judicial review of the decision.

Hardly any Member of Congress has escaped the effects of the Endangered Species Act. This well-intentioned law has served to delay and, in many instances, completely halt important public works projects with unimpeachable cost/benefit ratios. In my own congressional district, 40 birds (Mississippi sand mill cranes) have blocked for over 2 years the construction of an interchange on Interstate Highway 10, which is to serve the heaviest industrial area in my State.

Now, not all of us have snail darters, furbish louseworts, or sand hill cranes in our districts; but we do have a vested interest in making the agency in charge of enforcing the provisions of the act conform to its original intent. There is an in-depth report by the General Accounting Office which is due to be published in March of 1979. It is my understanding that this report will reveal numerous problems with the manner in which the Fish and Wildlife Service is administering the act. The worst abuses, I am told, have occurred in the listing process whereby species of plants or animals have been listed as endangered without even a scintilla of adequate supporting evidence, while others that were listed at one time were withdrawn just as arbitrarily.

This proposed bill, although it makes many important and constructive changes in the Endangered Species Act, does not complete the task. We need more review by the authorizing committee, and we need the benefit of GAO's report before we extend the act for another 3 years. I am advised that there will be an amendment to shorten the three year authorization contained in H.R. 14104. I urge the members to support this amendment and, in doing so, to realize they are taking a significant step in the direction of improvement.

Mr. Speaker, I have no objection to the adoption of the rule at this time.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, am I right that this is really a rule which will help us to reenact the Endangered Species Act? Am I right in my recollection that the act expires in the absence of a new act?

Mr. LOTT. It would expire.

Mr. WHITTEN. Then what we are considering is whether to retain a program, and I have many questions to which I need answers, both from the Public Works Subcommittee and the Interior Subcommittee.

How any Supreme Court or any other court can say that the clear intention of the Congress was to bring about the actions that have been taken, I cannot see.

Speaking from memory, the act requires the Secretary of the Interior to make a survey of the country, and from that to determine that the species does not exist in other areas. That has not been done.

Not only is that true, but the act provides that these endangered species shall be moved in many areas or in many sections. That has not been done. The gentleman's district is one example.

Through a private conversation with the Secretary of the Interior, we had his cooperation in relieving the highway which was cut in two, Highway No. 10 of the Interstate System. We got that matter resolved.

Therefore, if anybody reads this—and I refer to the courts—he will find that the act as we have it now clearly shows that Congress never intended that this act be used to stop the development of our country, in my opinion.

Not only that, but I have in my pocket a statement by the head of the fisheries and wildlife activity in the Department of the Interior which says that they are sick and tired of this act being used to stop the progress and development of this country.

Mr. Speaker, I just wanted to make it clear that this is not a rule to amend the act. It is to reinstate the act. There is every reason in the world to study this act very carefully.

Mr. Speaker, I had a conversation with my good friend, the chairman of this committee, when this bill was up before. At that time I had an understanding that this act would correct the things I am talking about, and I can cite chapter and verse as well as questions and answers from the hearings had at that time.

I see here that in spite of the good intentions, we have not had a great degree of success. This matter could lend itself, as I said, to more of the very problems we have now, except that it could be stretched out much longer because there are more and more people to whom one talks who are for reenacting this bill and not correcting it.

Mr. BUCHANAN. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Alabama.

Mr. BUCHANAN. Mr. Speaker, I agree with the remarks of my colleague from Mississippi.

However, I would like to point out to the Members of this body that the appropriation authorization does not repeal the basic act.

Mr. LOTT. That is correct.

Mr. BUCHANAN. The committee has made essential improvements in the bill which they are recommending to us, and some of us are going to do our dead-level best to perfect it even further on the floor of the House.

Right now the city which I represent

has a half billion dollars of orderly, even model, development threatened by two small minnow-like fish because of the very things my colleague from Mississippi is talking about.

I think the best chance to do something about that kind of situation in my district and elsewhere is to pass this rule, to move forward with this bill, and help some of us perfect it as we go along.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman from Mississippi yield?

Mr. LOTT. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. I thank the gentleman for yielding. I certainly want to associate myself with the remarks just made by the distinguished gentleman from Alabama and urge the adoption of the rule so that we can proceed to consider this important legislation.

I realize that many of the complaints that have been pressed by those like the gentleman from Mississippi and others are justified, and that there has been a certain inflexibility in the administration of this act in the past since its adoption, I believe, in 1973, in the celebrated case of the snail darter and the case of the furry bush lousewort, and some other matters of that kind that have led Members to think this is an action that should not be extended. But I think that they will find if we proceed to a discussion of the act that an exemption procedure has been wisely provided for in the amendment offered by the committee, the authorizing committee, and that the difficulties that have admittedly existed in the past with respect to the administration of this act can be cured by an amendment.

I, therefore, urge the adoption of the rule.

Mr. FLOWERS. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Alabama.

Mr. FLOWERS. I thank the gentleman for yielding.

I am, of course, encouraged by what I have heard from my distinguished friend, the gentleman from Illinois, and my dear colleague, the gentleman from Alabama, and the problem he enumerated I share because our districts are joined where this problem occurs.

By the clock on the wall and the clock on my arm it is 10 minutes to 1 on the day we are supposed to sine die adjourn; is that not correct? And we are going to have a full, free, and fair discussion of this act here today, tonight, and tomorrow? And we are going to conference and are going to pass it and are going to come up with something fair and equitable? And we are going to rely on the bureaucrats down there to do what we ask them to do here in the dark of the night? You people have got more faith in the system than I do, I will tell you that.

Mr. LOTT. I would like to respond to the gentleman because this has gone on long enough, and it is late. Neither the gentleman nor I set this on this schedule at this time and we should not question it.

But I would like to make one further point now, a point made by the gentleman from Alabama. The act does not expire; the authorization expires; and there is a very strong likelihood that we would have some additional projects that would be held up without this legislation being passed because of the public works contracts that are included in the act.

This is not the best solution, but it certainly is better than what we have got on the books right now, and I would hope that if the rule is accepted and this legislation is passed, it is for a reduced period of time.

Mr. FLOWERS. Will the gentleman yield further?

Mr. LOTT. I will be glad to yield to the gentleman.

Mr. FLOWERS. I thank the gentleman.

Is the gentleman saying that we are going to get more in terms of reasonable decisionmaking by the bureaucrats by giving them an extension of time and more authorization for more bureaucrats and more money than by keeping them under the gun? That is what the gentleman is trying to do right now.

Mr. LOTT. If we accept this rule and go to general debate, as late as it is, there are a number of amendments that have been agreed to here, and others that are going to be passed tonight, that will improve the situation.

Mr. BEARD of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Tennessee.

Mr. BEARD of Tennessee. I thank the gentleman for yielding.

I do not believe there has been anyone on the floor who has fought this bill as I have as far as its being inflexible with the law. As the Supreme Court ruled in the Telleco Dam case, it is totally inflexible with the law. They threw the ball back into the court where it belongs, and that is this Congress.

I have to reemphasize the point: There is no way we are going to solve any of the problems if we do not come up with this new piece of legislation. If we let the present act remain on the books as it is, which has been termed totally inflexible by the Supreme Court, then all of these problems under litigation now will not be solved at all for at least a year. We have got a 500-staff GAO report that will be forthcoming in February, and I hear this report points out many critical problems.

The committee has agreed not to ask for a third authorization but to accept an 18-month extension so that next year they can start and continue every oversight hearing with the results of the GAO report and, I think, with some amendments they have accepted that I am going to be introducing.

With the mood of the committee, we have at least got our foot on first base. We are striking out if this act remains on the books as it is written today.

So if you and I want to see the bill changed very much, I plead with you, let us get on with it.

Mr. LOTT. I have no further requests for time, and I yield back the remainder of my time.

Mr. SISK. Mr. Speaker, I yield myself 2 minutes, and I yield to my colleague, the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Speaker, I thank the gentleman very much.

One of the monsters we have not mentioned tonight, which has been the cause of a lot of difficulty in the Houston area in Texas, is called the Houston toad. I want you all to know they have not located it, but they know it is there. They are looking for it every night and they generally start hunting about 2 o'clock. I do not think they could see a toad by 2 o'clock in the morning if they had four of them staring at them.

I just do not know if we pass this rule, is there any indication from the author of the bill and the manager of the bill that we might just possibly accept a few amendments that would cause the economic impact of these monsters that might be sneaking out at 4 o'clock in the morning?

Mr. MURPHY of New York. Mr. Speaker, I can assure the gentleman that will not be the case. I will be happy to join in the search.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield further, may I say there are many endangered species. I was going along with maintaining, preserving or protecting them but the evidence in this instance, and we can cite many instances where they have gone out and sought unknown species they never heard of to exist and sought to use them.

Let me quote one paragraph from the Director of the U.S. Fish and Wildlife Service:

> As you know, people who find the need to stop projects they cannot stop in some other way will use the Act and the species involved to achieve that end, which is a prostitution of the Act, and it denies the value of the creature involved, in my judgment.

I am reading from the answer given by Mr. Greenwalt, Director of the Fish and Wildlife Service, from the CONGRESSIONAL RECORD of June 16, 1978, page 17929.

We have let them go find something that they never knew existed, to stop the progress and the real environment of this country. I just wanted to bring it up to have a chance to consider these facts, if this bill is going to be before the Congress.

Mr. SISK. Mr. Speaker, as I indicated early on, there are a number of horror stories in connection with endangered species. I recognize this.

I understand this may be a little controversial.

Unless there is a desire on the part of my colleague to yield further time, Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO ATTEND THE FUNERAL OF THE LATE HONORABLE GOODLOE E. BYRON

The SPEAKER. Pursuant to House Resolution 1430, the Chair appoints as members of the Funeral Committee of the late Honorable GOODLOE E. BYRON the following Members on the part of the House:

Mr. LONG, Maryland; Mr. MITCHELL, Maryland; Mrs. HOLT, Maryland; Mr. BAUMAN, Maryland; Mrs. SPELLMMAN, Maryland; Ms. MIKULSKI, Maryland; Mr. STEERS, Maryland; Mr. MONTGOMERY, Mississippi; Mr. NICHOLS, Alabama; Mr. ALEXANDER, Arkansas; Mr. JONES, Tennessee; Mr. HILLIS, Indiana; Mr. SYMMS, Idaho; Mr. MCDONALD, Georgia; and Mr. WON PAT, Guam.

APPOINTMENT OF MEMBERS TO ATTEND THE FUNERAL OF THE LATE HONORABLE RALPH METCALFE

The SPEAKER. Pursuant to House Resolution 1422, the Chair appoints as members of the funeral committee of the late Honorable Ralph Metcalfe the following Members on the part of the House:

Mr. PRICE, Illinois; Mr. BRADEMAS, Indiana; Mr. MICHEL, Illinois; Mr. DERWINSKI, Illinois; Mr. ROSTENKOWSKI, Illinois; Mr. SHIPLEY, Illinois; Mr. ANDERSON, Illinois; Mr. FINDLEY, Illinois; Mr. MCCLORY, Illinois; Mr. YATES, Illinois; and Mr. ANNUNZIO, Illinois.

Mr. ERLENBORN, Illinois; Mr. RAILSBACK, Illinois; Mr. CRANE, Illinois; Mr. MURPHY, Illinois; Mr. MADIGAN, Illinois; Mr. O'BRIEN, Illinois; Mrs. COLLINS, Illinois; Mr. MIKVA, Illinois; Mr. HYDE, Illinois; Mr. RUSSO, Illinois; and Mr. SIMON, Illinois.

Mr. FARY, Illinois; Mr. CORCORAN, Illinois; Mr. DIGGS, Michigan; Mr. NIX, Pennsylvania; Mr. HAWKINS, California; Mr. LEGGETT, California; Mr. CONYERS, Michigan; Mr. HANLEY, New York; Mr. BIAGGI, New York; Mrs. CHISHOLM, New York; and Mr. CLAY, Missouri.

Mr. STOKES, Ohio; Mr. DELLUMS, California; Mr. MITCHELL, Maryland; Mr. RANGEL, New York; Mrs. BURKE, California; Mr. GILMAN, New York; Miss JORDAN, Texas; Mr. FORD, Tennessee; Mr. AKAKA, Hawaii; and Mr. FAUNTROY, District of Columbia.

POSTAL REFORM THREATENED WITH DEATH OF H.R. 7700

(Mr. HANLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks).

Mr. HANLEY. Mr. Speaker, as this Congress ends, I feel it is imperative to bring to the attention of my colleagues that H.R. 7700, the Postal Service Act of 1978, a bill that passed the House overwhelmingly, is left languishing in the Senate.

This is of grave concern to me because this is not a minor piece of legislation, that was hastily drafted, nor is it a bill of such little consequence that it can be put off until next year with no ill effects. On the contrary, this is a comprehensive piece of legislation drafted after extensive hearings at which we heard from the most knowledgeable experts in the field of postal matters. It is certainly an understatement to say that this bill is timely. While H.R. 7700 addresses the long-range future of the Postal Service, it also seeks to alleviate the fiscal morass that the service is sinking into at the present time.

It received broad support in the House because it approaches postal problems in a frank and direct manner—recognizing that we have to pay a price for good postal service. This bill abolishes the "break-even" concept by continuing the current $92 million annual public service appropriation through fiscal year 1984 and authorizing additional public service funds, provided they are detailed by function by the Postal Service by February 1 of each year. It would also provide for a Presidentially appointed Postmaster General as well as a veto of nationwide service changes—for example, a cutback in 6-day delivery.

I know that all of my colleagues are deluged with constituent complaints about inadequate postal services, and that in most instances their frustrations and disappointments are justified.

The House of Representatives has always recognized that problems exist, and we have never shirked from our responsibility to address them. Strong examples of our concern are the overwhelming votes of 399 to 14 in 1976 on a resolution opposing the precipitous closing of post offices and a vote of 377 to 9 last year on a resolution opposing the cessation of Saturday delivery. In the last Congress, I sponsored H.R. 8603, which became Public Law 94-421. The major provisions of this law include a moratorium on postal rate increases, service cuts, and most post office closings; a requirement that the Postal Service submit its annual budget to Congress and testify on the budget before the appropriate Senate and House committees; authorization for appropriations to be applied against accumulated debt; and Senate confirmation of Postal Rate Commissioners. This Congress, after full debate we successfully voted out H.R. 7700 by an overwhelming vote of 384 to 11, on April 6, 1978.

Each of these votes indicates that the House of Representatives has taken the pulse of the American people and found conclusively that they want improved postal services and that they want their elected representatives to have more control over what has too often been a capricious postal service.

The American people want a return to the traditional qualities of the Postal Service. They want reliable postal services at reasonable rates. It is obvious that these qualities were more in evidence before postal reorganization than they are now.

The House should be congratulated for consistently facing up to its legislative responsibilities in this most important area.

However, I am afraid that the praise stops here.

Candidate Carter was an advocate of postal reform. In one of his campaign statements he said:

> The Republican experiment in postal management is five years old. The American people are now paying higher rates for a lower grade of postal service than they did before Richard Nixon turned the Post Office into the United States Postal Service in 1971. If I am elected President, I will take quick steps to make our Postal Service efficient and dependable once again.

President Carter refused to support postal reform. It is inconceivable but true that this administration became the major obstacle in the path of any constructive postal legislation this Congress. In a press conference held on January 10, 1978, a publisher of a weekly newspaper, Mr. Walter Grunfeld, asked the President how he felt about postal reform in general and H.R. 7700 in particular. He responded:

> It is a very complicated bill and far-reaching in its impact. It would have a very adverse effect on the federal budget. I think that in general—I don't want to say conclusively—but in general, the Congress and the President ought to stay out of the Administration of the Post Office itself.

He went on to say:

> My guess is that the majority of the Members of Congress agree with the position that I have outlined to you.

I had hoped that the overwhelming House vote on H.R. 7700 would have made the President pause and reassess his position. He obviously did not do that.

The President's efforts to thwart postal reform failed in the House, however, he persisted and succeeded in the Senate.

Senate action on a postal bill was delayed until the House passed H.R. 7700. There was no demonstration of a sense of urgency associated with the Senate bill. It was ready for final consideration so late in the session that any chance that the Senate would have the opportunity to act was minimal.

President Carter has stated that one of the major goals of his administration is to avoid "crisis management" in Government. He could have achieved this laudable goal vis-a-vis the Postal Service if he had supported H.R. 7700. This makes his opposition to this bill all the more difficult to fathom.

By ignoring the Postal Service, the President is flirting with disaster. The disaster I am referring to is the ultimate demise of the Postal Service as we know it.

The President's attitude can only be interpreted to mean that he feels that the U.S. Postal Service is on a safe course and that no harm can come from ignoring it. One somehow gets the impression that both President Carter and Postmaster General Bolger feel they can simply will the Postal Service into financial self-sufficiency. It could be said that they are wearing blinders, or looking through rose-colored glasses, that in fact they are approaching the financial posture of the Postal Service in an unrealistic and ultimately self-defeating fashion.

On May 12, 1978, the Postal Rate Commission released its recommended decision on the most recent rate increase. In that discussion the Commission stated that:

> Without doubt the Postal Service is in severe financial straits. As Senator Stevens aptly stated during debates on H.R. 8603, "if the U.S. Postal Service was in fact a private business, it would be bankrupt."
>
> As of September 30, 1977, the postal service had a deficit in equity of $588 million, compared to a surplus as of July 1, 1971, of $1,686 million. In 1976, the postal service's financial position was sufficiently precarious that it had to seek additional appropriations from Congress which resulted in its obtaining a $1 billion subsidy. Yet the erosion of the

Postal Service's financial condition has continued unabated; losses of nearly $688 million in fiscal year 1977 (originally estimated at $203 million) offset 69 percent of the subsidy and, in addition, losses are projected for the period October 1, 1977, to March 24, 1978, of $357 million.

In addition to the Rate Commission, the Commission on Postal Service in its report issued in April 1977, recommended increased public service appropriations. The Commission warned that:

If the Postal Service continues to operate in a "business as usual" manner a 28 cent stamp and correspondingly higher rates in all other classes will very probably be reached by 1985. They suggested, however, that the bleak picture that emerges from a "business as usual" posture is not inevitable.

The Commission concluded that an increase in public service appropriations is essential.

On June 13, 1978, Postmaster General Bolger testified before the subcommittee I chair on Postal Operations and Services. I think it would be safe to characterize his attitude while testifying on the Postal Service budget as extremely confident and enthusiastic. It was difficult for me to reconcile his attitude with the bleak figures we were there to examine. He indicated that taking into consideration the rate increase that he had just gotten that he "did not anticipate the deficit going much above the $650 million figure" for fiscal year 1978. It seems obvious that with that kind of deficit the Postal Service is not going to break-even any time soon.

The Postal Service is faced with mounting deficits and the constant threat of declining volume. Yet Postmaster General Bolger is on record as opposing any additional Postal Service funding. He feels that present law is still a viable framework within which the Postal Service can operate and that the break-even concept is still an attainable goal. He has also promised that there will be no rate hikes or service cuts for at least 2 years.

Certainly we should applaud the Postmaster General's commitment to balance the Postal Service books without raising rates or diminishing services.

President Carter obviously believes that the Postal Service will prosper while functioning under the constraints of current law.

I am awed by their unabated optimism.

Apparently, we can expect that with good management, a bit of mysticism, and a touch of magic that the Postal Service will flourish.

I hope that Postmaster General Bolger will be able to keep his commitment to the American people.

I hope that President Carter will be able to look back at his decision to abandon postal reform and be confident that he made the right choice.

As far as the Congress is concerned, we are entering a period of watching and waiting. The administration and the Postal Service rejected H.R. 7700, and now they have the opportunity to show us the wisdom in that incredible decision.

I sincerely hope that the President is right—because if he is wrong—all Americans will pay a heavy price for a "crisis in management" situation of his own making.

WILSON PRAISES OUTGOING LETTER CARRIER PRESIDENT JOE VACCA

(Mr. CHARLES H. WILSON of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. CHARLES H. WILSON of California. Mr. Speaker, in the wake of the recent difficult contract negotiations between the postal unions and management, we have now learned that the National Association of Letter Carriers, in a vote announced earlier this week, has rejected the reelection bid of President J. Joseph Vacca.

I just want to take this opportunity to say that Joe Vacca was one of the finest, most decent men I have had the privilege to deal with here in Washington. He was a knowledgeable and competent union leader who greatly aided the cause of his membership both on Capitol Hill and in negotiations with postal management. He was a responsible leader, not a hothead and, sadly, this may have proved detrimental to his reputation in some quarters.

At any rate, Joe will be missed.

Columnist Bob Williams of the Federal Times has also taken note of Joe's impending departure from his post as NALC President. His fine article, "A Winner in My Book," follows:

A WINNER IN MY BOOK

(By Bob Williams)

J. Joseph Vacca, a straightforward, decent man, whose commitment to his craft and his people is beyond dispute, has been defeated in his second bid for the NALC presidency by New York City carrier boss Vincent R. Sombrotto.

I regret Joe's passing from the postal scene. In the four or five years that I have known Joe, I have witnessed, nose-to-nose, his many triumphs and I have seen this quiet, often awkward, man prevail over a host of professional and personal agonies.

Following his narrow election win over Sombrotto in 1976, Joe told me that his first goal was to "bind this union together."

As often happens in real life, Joe never got the chance. He became the target of petty union politicians whose cheap shots and dirty tricks are clearly evident to anyone who has even a passing acquaintance of NALC.

His achievements—and there are many—have been belittled, ignored and exploited by a disgrunted bunch of hasbeens or neverweres. But one gives grudging credit to his detractors, they were after all successful in duping a majority of the 220,000-member letter carrier clan.

Who stood up for Joe in 1977 when he and his team averted a move in Congress to kill the six-day week and with it tens of thousands of letter carrier jobs? And who will be around to applaud the future NALC powers-that-be when the five-day week is unveiled in 1979 or 1980?

And who gave Joe and his administration a pat on the back when they scored a steady series of other legislative, legal and arbitration victories?

I suspect we will have the answer when the final election tally is disclosed soon.

Joe's most serious ordeal has not yet been mentioned. As he said at the outset of 1978, his staying power in the union hinged almost entirely on the outcome of collective bargaining.

That he was instrumental in negotiating a solid settlement in the face of a worsening national economic crisis is remarkable. That Joe and his colleagues in the other unions fulfilled the bargaining mandates and more of their respective members is extraordinary.

His own naysayers notwithstanding, Joe had to contend with a nearly bankrupt employer, a meddling President and in addition to all that public hostility that was erupting at government workers in general.

Not a particularly auspicious juncture for bargaining, one thinks.

The coup de grace was AFL–CIO president George Meany's off-the-mark and inadvertently malicious assessment of the tentative contract. It couldn't have come at a more inopportune time.

As one of Joe's brother union officers told me:

"I don't mind losing that much. But to be ousted for all the wrong reasons is hard to take."

I went to another labor honcho. This guy, who is prominent in a separate union, said:

"Joe did a lot of things within the union to make it more effective. He beefed up the professional staff and thus improved services to the members. In collective bargaining he extracted numerous work rule concessions from the postal service."

But this admitted friend of Vacca suggested that Joe's reluctance or inability to claim the limelight made him "invisible" to the membership.

And this trait, considered laudable in all but politicians and hucksters of every stripe, may have been Joe's undoing. He wasn't a blowhard. And Joe couldn't dominate a convention of big city letter carriers. Chicago proved that.

But Joe has the sort of shortcomings I like.

His earnest, soft-spoken approach says much good about the man. His elemental instinct for fair play may have been construed as weakness by his opponents, but he earned my respect and the goodwill of many postal scene watchers here in Washington.

Joe may have lost the election, but he remains a winner in my book.

VIGIL FOR FREEDOM

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, I am pleased to join the "vigil for freedom" on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of that government's repressive emigration policies.

I bring to the attention of my colleagues the case of Mr. Nahum Fraizinger, a 30-year old Russian citizen whose attempts to obtain permission and emigrate to join his parents in Israel have been met with a long series of refusals and frustrations.

Nahum's parents first requested permission to emigrate in 1956. When they reapplied in 1969, they were refused on the grounds that Nahum was serving in the Army. They were finally permitted to leave in 1973.

Nahum served in the Army from 1969 to 1970 as an ordinary recruit with no access to any state secrets or military information.

He was promised that he would be allowed to leave 3 years ago, but he still waits; 8 years have passed since he was

demobilized, 3 years over the time prescribed by the Soviets for the so-called "secrecy" period to elapse.

In 1975, the U.S.S.R. was one of 35 nations to sign the Helsinki Final Act, which committed the signatory nations to pursue policies consistent with basic principles of human rights, including the reunification of divided families whose members live in different countries, religious freedom, minority rights, and free travel between countries.

But judging by their restrictive emigration policies, the Soviet Government has exhibited a complete disregard for the human rights provisions of the final act.

In a clampdown on Jewish emigration, the Soviet Government has drastically reduced the number of Jewish citizens permitted to leave Russia from over 35,000 in 1973 to about 1,100 a month through 1976.

An informal group established to monitor the Soviet's compliance with the Helsinki accords has instead harassed or imprisoned Jewish citizens. Individuals seeking to emigrate face long waits before receiving their papers, repeated refusals, firings from employment, disruption of mail and telephone service, surveillance, and many other forms of intimidation.

This contrasts with life in our country where too often we have a tendency to take our freedoms for granted. It is my sincere hope that, as a result of this "vigil for freedom," more people become aware of the Soviet Union's blatant violations of the human rights provisions in the Helsinki accords.

Mr. Speaker, Nahum Fraizinger has suffered a great deal because of his simple desire to live in peace and freedom. It is my hope that this "vigil for freedom" will strengthen our resolve to assist Nahum, and the many others like him.

A VIGIL FOR FREEDOM: VINIAMIN AND TANYA LEVICH

(Mr. WAXMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAXMAN. Mr. Speaker, it is with a sense of hope that I make today's contribution to our vigil for freedom on behalf of Viniamin and Tanya Levich. Viniamin Levich is one of the world's most renowned physical chemists. For more than 6 years, he and his wife Tanya have been refused permission to emigrate to Israel—even though the Soviet authorities had promised that his entire family could leave. Their son, Yevgeny, did manage to emigrate. The Leviches have been cruelly separated from their son ever since.

Dr. Levich's fame and notoriety made him a special target for ostracism. He was stripped of his chair at Moscow University. He has been barred from conducting research. His work can no longer be published in the Soviet Union. Acting under official encouragement, his colleagues and Soviet professional societies have spurned any association with him.

This has taken an enormous toll on Viniamin and Tanya. She has, in fact, suffered two heart attacks in recent months, and remains in poor health. Finally, in utter desperation last year, Dr. Levich issued a plea to the world for assistance in securing his freedom.

It has not gone unanswered. I have sent several letters, cosigned by dozens of my colleagues, to President Brezhnev urging that the injustices against the Leviches be ended. Additionally, I visited the Leviches in Moscow last March, and expressed personally the concern of many of their friends to both them and all of the Soviet authorities I met. In May, I met with their son, Yevgeny, who was visiting from Israel on a personal mission for their freedom.

Until recently, there had never been any response by the Soviet authorities to these expressions of concern. But finally, in September, Senator KENNEDY returned from the Soviet Union with word that 18 families will be permitted to emigrate in the near future, among them Viniamin and Tanya Levich.

All of us who have been so involved with them were overjoyed with the news. It is my fervent prayer that these hopes will be wholly fulfilled.

We are in the beginning days of the Jewish new year. May this year see Viniamin and Tanya Levich reunited with their family in freedom.

FSQS NEEDS QUALIFIED ADMINISTRATOR

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. ASHBROOK. Mr. Speaker, as a member of the House Education and Labor Committee I am very interested in policies of the Department of Agriculture's Food Safety and Quality Service which affect school food programs. In this regard I have been deeply concerned over the status of the office of administrator of the service. My concern involves the appointment of a qualified person to replace Dr. Robert Angelotti as Food Safety and Quality Service Administrator.

As I stated in a speech before the House on September 7, the appointment of Sydney Butler to the Acting Administrator of the Service is disturbing to all those interested in the efficient operation of that important agency. This is due to Mr. Butler's complete lack of scientific-technological education or training.

The office of Director of the Food Safety and Quality Service should properly be occupied by a person qualified in the scientific-technological disciplines which relate to matters affecting health and safety. Despite this obvious prerequisite, Assistant Agriculture Secretary Carol Tucker Foreman, who has jurisdiction over the Food Safety and Quality Service, named Mr. Butler as Acting Administrator.

Mr. Butler is a lawyer, the younger brother of Landon Butler, who is a White House aide to Hamilton Jordon. In 1976, Sydney Butler participated in the Presidential campaign of Jimmy Carter. These would appear to be his sole "qualifications" for being named Acting Administrator of the Food Safety and Quality Service. His appointment by Assistant Secretary Foreman seems, therefore, a glaring example of political patronage replacing genuine qualifications in filling a position important to the administration of programs and policies which affect the quality and safety of the Nation's food supply.

It is with this thought in mind that I have written to the chairman and the ranking minority member of the House Committee on Agriculture asking that action be taken to expedite the replacement of Sydney Butler by a qualified Administrator of the Food Safety and Quality Service at the earliest possible moment. Following is the text of my letter:

As a member of the House Education and Labor Committee, I am especially interested in the Department of Agriculture's Food Safety and Quality Service. The Service plays an important policy role in the operation of school food programs subsidized by the Federal Government.

I am writing in regard to the appointment of a permanent Director of the Food Safety and Quality Service to replace Dr. Robert Angelotti who recently resigned. The importance of the position of Director was reflected by your Committee's vigorous investigation of the Food Safety and Quality Service under Dr. Angelotti.

Considering the outcome of that investigation, I believe it essential to the integrity and efficiency of the Service that the person who succeeds Dr. Angelotti as Director be qualified both as to experience and background in the highly technical matters that come under its jurisdiction. In this regard, I am concerned over the present occupancy of the position of Acting Director of the Food Safety and Quality Service by Sydney Butler, a political appointee who is neither qualified by education nor experience to hold a position requiring scientific and technological expertese. Mr. Butler's occupancy of the Acting Director position should be terminated and a suitably qualified permanent replacement named.

The Department of Agriculture's continued delay in replacing Dr. Angelotti can only have a deleterious effect on Federal school programs and policies. I therefore ask that you and your fellow members of the House Agriculture Committee take such action as is necessary to expedite the appointment of a qualified permanent Director of the Food Safety and Quality Service at the earliest possible time.

VIGIL FOR FREEDOM: THE CASE OF ISAAC ZLOTVER

(Mrs. FENWICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. FENWICK. Mr. Speaker, I am pleased to join in the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry and coordinated by Representative WILLIAM BRODHEAD of Michigan. Today, I would like to remind Members of the House of the case of Isaac Zlotver, a tragic example of the as yet unfulfilled promise of the Helsinki accord. Mr. Zlotver, who is nearing 60, first applied with his wife to leave the Soviet Union 4 years ago. They wished to join their daughter, who had emigrated to Israel in 1971, and her husband and

child. Mrs. Zlotver died of cancer last year, after having been refused an exit visa numerous times. Mr. Zlotver, now ill himself with terminal cancer, still awaits positive action on his own repeated appeals for permission to emigrate.

What can possibly be gained by refusing this dying man the opportunity to see his daughter again and to meet his grandson for the first time? Do the Soviet authorities want him to die alone, separated from all of his loved ones? The official reason which has been given by the Russian Government is that Mr. Zlotver, who once served in the Soviet military, might be privy to state secrets. The fact that his term of service ended nearly 14 years ago casts considerable doubt on the credibility of such an explanation, however.

As a signatory to the Helsinki accords of 1975, the Soviet Union agreed to assist in the reunification of families such as that of Isaac Zlotver. It is sad indeed that this family and many others like them have consistently been turned down by the Soviets in their efforts to become reunited.

Mr. Zlotver is dying. At last report, one of his kidneys had ceased to function. He is receiving radiation treatment, but his days are clearly numbered. His one urgent wish is to see his daughter and her family before he dies. The people of the United States, of the 34 other countries which signed the accords at Helsinki, and of the rest of the world are waiting to see if the Government of the Soviet Union will allow Isaac Zlotver to die alone in Sverdlosk, or if it will permit him to rejoin his loved ones for the very few days that are left him.

VLADIMIR SLEPAK AND HIS FAMILY

(Ms. HOLTZMAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks and to include extraneous material.)

Ms. HOLTZMAN. Mr. Speaker, I am pleased to have the opportunity to join with my distinguished colleagues in the vigil for freedom for Soviet Jewry and to call particular attention to the desperate plight of Vladimir Slepak and his family.

During a visit to the Soviet Union, I had the privilege of meeting Vladimir Slepak. He is an extremely courageous man and has undergone extraordinary punishment as a result of his desire to be reunited with his family in Israel. Since first applying for an exit visa in 1970, Vladimir Slepak has been without a job. He and his wife, Maria, have suffered continual harassment, interrogations, illegal searches and preventive detentions. Their son, Leonid has been forced to go into hiding to avoid army draft.

Recently, Vladimir and Maria Slepak were arrested for hanging a banner from their Moscow apartment with the plea: "Let us go to our son in Israel." The couple was charged with "malicious hooliganism" which carries a maximum penalty of 5 years in a labor camp. Vladimir and Maria were both found guilty and Vladimir was sentenced to exile in Siberia. Maria, who suffers from a bleeding ulcer, apparently faces a similar sentence.

Vladimir Slepak and his family have committed no crime. They are simply Jews who wish to emigrate to their homeland, Israel. Their imprisonment is a serious violation of basic human rights and further evidence of the Soviet Union's callous disregard of the Helsinki accords, requiring the reunification of families.

It is our responsibility to focus the world's attention on the Soviet Union's contemptuous attitude toward thousands of Jews who wish to flee. Our own commitment to the struggle for freedom of emigration for Soviet Jews and for human rights around the world must never falter. I hope that the efforts of the House of Representatives in calling attention to the Vladimir Slepak family's plight and that of others will make the Soviet Union change its harsh policy of arbitrarily refusing persons the right to emigrate to Israel.

A TRIBUTE TO THE HONORABLE OTIS G. PIKE

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 60 minutes.

Mr. ADDABBO. Mr. Speaker, coming to Congress with me in the winter of 1961 was a unassuming young fellow from way out on Long Island, N.Y., someplace, our retiring colleague, OTIS PIKE.

Well, 18 years later, I think it is fair to say that OTIS PIKE has spoken up for himself and the people he represents.

There have been generals who winced as he discussed their flying desks, and there have been generals who groaned as he discussed their ability to collect extra money for flight time each month for years, only to retire on disability which just happened to pay more. And there have been Pentagon purchasing agents who blanched when he questioned why they paid $10 or $15 for bolts that ordinary citizens could buy for 15 cents.

And there have been Presidents who fumed when he told them straight out that they and their people lied to the Congress. And there have been Members of Congress who fussed when he told the people that some Members tend to pose one way and then vote another when it is not so easy to see.

OTIS PIKE has had a lot to say in 18 years in this House, and almost all of it has been self-evident to people who were willing to keep their eyes open and look hard at what goes on around them. Those of us who serve here in this House owe OTIS PIKE a debt of thanks for helping to keep us straight, for helping to keep the Government overall straight, and for helping to convince the Nation at large that there are Members of Congress who tell it like it is.

There is no doubt in anyone's mind that had he desired to stay in the Congress, OTIS could have done so for year upon year to come. The people of his congressional district have voted two ways for years. They vote for Republicans and they vote for OTIS PIKE. They have done so because they have known from the beginning that OTIS PIKE was an independent man not bound by party dictates, not swayed from the truth by pretty words and a man who would come home to them to tell them the truth about what he was doing in their behalf down South.

Next year, our colleague would like to move one flight up and operate out of the House press gallery. He will do well if that comes to be, because he writes as sparingly and as entertainingly as he speaks, and you know how well he does that.

But before this session ends, I feel it only proper to inform the House that this down-east New Yorker who would rather more often fish than do anything else you can think of, has other talents that ought to come to the attention of the membership.

He was, for instance, a charter member of the Block Island Chamber Music group, perhaps the only musical group in America which has been banned in every State it has performed in. This is perhaps due as much to the group's enthusiasm as to its music, but it is nevertheless a distinction worth noting. It is Mr. PIKE's function within this group to play a stringed instrument called a ukulele, and to lead the audience in group singing, should the audience remain. It should be noted that the group most generally plays in locations where the audience is captive—on a boat, for instance—or where the audience is paid to stay—in his office, as an instance.

It is perhaps also fair to note that when Mr. PIKE plays with this group he is always reelected to office.

In the one known instance where he went around New York State playing and singing by himself, he was quickly removed from the Democratic senatorial primary.

You may or may not know that OTIS fought a gallant, if losing, battle in that primary. He was outspent by huge amounts and even his drive and determination could not help in so large a State as New York. That he did as well as he did, armed only with his force of persuasion, is a tribute to the impression he made on people far removed from eastern Long Island where his strength was.

And strong he was—and is—out in eastern Long Island where year after year, outspent and outnumbered, OTIS PIKE goes out and talks to the people and wins election after election.

He grew up in Riverhead, Long Island, learning to boat and fish and respect the land and the people who work it. He went to Princeton University, went back to New York City for his law degree, and then went home to marry his lovely wife, Doris, begin a law practice, and raise a family in the only house he has called home.

He made one abortive try for local office in Riverhead, and the residents out there sensibly rejected him, knowing the office was not demanding enough to hold his attention. Two years later, running with John Kennedy in 1960, the people of the First Congressional District sent him to Congress, and they have kept him here ever since.

Like the people he comes from and

represents, he is an independent-minded man who finds humor in the silly pretentiousness of people, including himself. He prefers to strip away the rhetoric and get down to basics, though God knows when he seeks to use rhetoric to make a point, he knows how. But it is the essentials of life he is interested in, whether it be what is contained in proposed legislation or in knowing how something mechanical works.

That curiosity, mixed with a quick and nimble mind, has made him a formidable foe of the fast-shufflers, the wheeler-dealers and departmental budget officers who sought to hide a goodie here or there during congressional hearings.

That probably also helped him during World War II when he was a Marine dive bomber and night fighter pilot who piled up 120 missions in the Far East and won five medals for bravery.

It is interesting to note that until a few years ago OTIS still made his final decisions on new aircraft by going out and flying them himself, rather than taking the word of the Pentagon and their performance abilities.

It has been a good 18 years that I have served with OTIS in this House, taking the good and the bad together. He is leaving this House bearing scars of battle, and he has worked for each and every one of them, and I know he bears them proudly. It is always a sad occasion when a Member leaves this House. It is more sad when a Member leaves with so many productive years still ahead. But somehow, I cannot believe that we are seeing this gentleman head off toward the sunset, never to be heard from again.

No, I suspect that as we look up from our duties next year, we shall see that face peering down from above, mentally composing the words that he will write to chop us to pieces for our failings. And if that be true, we had all better revise and extend the things we are planning to say about him tonight. It is never too early to get on the good side of the member of the press.

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DOWNEY. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, this Congressman from Suffolk County, N.Y., participates in this special order for his distinguished senior colleague and neighbor with sadness and with fear.

Sadness because, with OTIS PIKE's retirement, Congress is losing a brilliant and very special Member. Fear, because this Congressman knows that, no matter what he says, OTIS PIKE could say it better. Sadness because Congress will miss its most accomplished ukulele player, and Long Island will miss its most distinctive voice. Fear because, if he reads this, OTIS will calculate how much each of these words is costing the American taxpayer.

I must assume that OTIS PIKE will read these magical words, perhaps as he steams out of Shinnecock Inlet in pursuit of his aquatic friends. Therefore, I will practice the prudence that the yankee from Long Island has tried to teach me. I will keep my remarks short. Very short.

OTIS, thanks for leading the way, and thanks for everything. Keep in touch, and good luck in the world of punditry.

Because OTIS has yet to teach me all he knows, I will not close with that snappy and meaningful closing paragraph. Because of an obligation to history and a desire to fill in my colleagues on something that Congressman PIKE's constituents have known since March, I would like to reveal—for the first time in the CONGRESSIONAL RECORD—the real reason for the retirement of the statesman from Riverhead:

YOUR CONGRESSMAN OTIS G. PIKE REPORTS FROM WASHINGTON

A couple of weeks ago, in a speech which attracted more attention than it was worth, I said that one of the things which had become a bore after 25 years in politics was the business of being expected to work all day and then go to meetings, receptions or dinners every night.

No sooner had that remark been publicized than the invitation came. The President and Mrs. Carter requested the presence of Congressman and Mrs. Pike at dinner on Washington's Birthday. Not breakfast. Not a coffee and arm twist session. Not a reception or a party. Dinner. Through some inexcusable chain of incompetence in the social secretaries of five separate Presidents over an 18 year period the invitation to dinner which all those Presidents surely intended to send had never reached my desk before. You have had trouble with your mail, too.

Naturally, one assumed it was black tie. Naturally, one was wrong. It WAS tie, however. Fires burned merrily under mantels over which assorted Presidents and the likes of Ben Franklin peered benignly down upon the scene. One was offered the warmth of the fires and tomato or orange juice before dinner. For the desperatly cold, there was white wine. There was also something called cassis, which I drank because I'd tried each of the others over the years and found them lacking something. It was lacking from the cassis, too, but it was pleasant.

There were little cards to tell us which table to sit at and big men to point out where the tables were. Being an avowed social climber I will mention casually the fact that I sat only 6 feet (6'3½", actually) from the President. I suppose I must also mention that that was from the middle of his back to the middle of mine, for we sat at different tables and faced in different directions. We sometimes do. I'm glad I didn't have to face him, for the last time I was invited to eat at the White House (breakfast) I complained about the food. It was much better this time. Fine, in fact. Worth retiring for.

● Mr. DE LA GARZA. Mr. Speaker, the other day I sat down for the first time and tried to imagine the House without OTIS PIKE. More specifically, I tried to picture the state of this Nation's economy if it was not for OTIS PIKE. And Mr. Speaker, I could not, and I am afraid to.

A special order for OTIS is an appropriate way for the Members to share our thoughts about this fine gentleman who represents the First District of New York, and I am delighted to participate. Because special attention should be drawn to the extraordinary work OTIS has done to keep this country on an even financial keel. As one who has been working for a constitutional amendment to balance the Federal budget, I know how important this work is, and I would like to help, in a small way, to let others know as well.

Suffolk County, an agricultural area like my own Texas district, is known for its potatoes in particular, and the fertility of its soil in general. OTIS PIKE is a down-to-earth fellow who is living proof that the Empire State still represents itself with men and women of vision and dedication. We are all going to miss this fine man.●

● Mr. RICHMOND. Mr. Speaker, I am pleased to have this opportunity to express my friendship and great admiration for my colleague, OTIS PIKE, who is retiring from the House after 18 years of dedicated service.

OTIS PIKE has a remarkable sense of humor. He is an excellent raconteur, with a ready and incisive wit. He has been consistently erudite and impressive in debate in this Chamber throughout his career.

Whether in matters of economics, health, trade, the budget, or national security, OTIS brings his good judgment and intelligence to bear and usually makes the right decision.

OTIS PIKE has a refreshingly straightforward manner. He has the rare and wonderful ability of telling you exactly what he thinks—on the issues, or on any subject you happen to be discussing with him.

We wish him well in all his future endeavors. We will miss him.●

● Mr. ROSENTHAL. Mr. Speaker, earlier this year the House was given some news which was received with sadness.

Our colleague, OTIS G. PIKE, announced that he was no longer continuing his career in the Congress, as the Representative from the First District of New York.

OTIS was born in Suffolk County, which he has represented so well since 1961. He is a tried and true New Yorker, having been educated there, practiced law there, and returned to his home there after distinguished service during World War II in the South Pacific.

He is active in business and in the community in Suffolk, and will be permanently returning to the fold at the end of this Congress. He will be warmly welcomed with open arms.

We have all enjoyed our friendship with OTIS, and we will miss his lighthearted humor, and his never-ending assistance.

We have been much impressed by his ability and capacity to absorb the ever-increasing demands of the Congress, and he is much admired and respected by all of us who have worked alongside of him over these past few years, and who are personally aware of the tremendous amount of time and effort he has contributed to the accomplishments of the House.

He will be sorely missed from the Halls

of Congress, but he leaves with much affection from his colleagues, and our best wishes for the future.●

● Mr. HUGHES. Mr. Speaker, this is a sad occasion for Members of the House of Representatives. The retirement of Congressman OTIS PIKE will leave a gaping hole in our ranks.

OTIS PIKE was blessed with an unerring sense of humor that serves both him and this body well. He could always be counted on when tempers flared and the nights wore on during lengthy sessions to save the day with some bon mot that was guaranteed to get things back on the right track.

They say that wit and wisdom are born with a man. Maybe OTIS PIKE just developed these gifts a little more than most. In any event, we are blessed by his presence.

We will miss him in the next session and I am happy to join with his many friends in wishing him well in the days ahead.●

● Mr. UDALL. OTIS PIKE's distinguishing mark was always a special kind of class and style. He came here with it and he leaves with it intact.

Few people around here had his ability to cut through the clouds of confusion to the guts of a problem. Few could do it with such humor and verve and telling effect.

Few among us have had his intellectual honesty—to follow where logic led.

There seems to be something very basic going on in the House of Representatives these days. Like the Washington Redskins, a lot of the older players are leaving. One of the most thoughtful and valuable of this group was OTIS PIKE.

He is moving on—and I am sad to see him leave.●

● Mr. COLLINS of Texas. Mr. Speaker, when Congress loses OTIS PIKE of New York, we will be losing one of the finest men that ever served in Congress. It is a rare occasion when you can describe a person as both a "gentleman and a scholar." We often know one or the other but rarely do you find the combination, and OTIS PIKE exemplifies the best of both.

In Congress we take ourselves in such a serious manner that we do not get to see a twinkle of a smile very often. But anytime you walk over to the floor with OTIS PIKE, you will always have an upbeat because he is able to laugh at himself, at the rest of us, and even at Congress in all of its pompous splendor.

I hope that OTIS PIKE stays active in our congressional legislative activities. I think of him more as a Will Rogers, or maybe as a modern Mark Twain. His keen insight and deep perspective is stimulating and delightful. I will always remember OTIS and I will always be proud to say that I had an opportunity to serve in Congress with OTIS PIKE. He is a man of character and integrity. He is a man of principle. He is a man of intellect whose concise and effective statements on the floor will be missed. OTIS PIKE is one of the greatest.●

● Mr. MURPHY of Illinois. Mr. Speaker, I would like to pay tribute to a man I greatly admire, OTIS G. PIKE of New York. As my colleagues know, OTIS is retiring at the end of this 95th Congress.

OTIS PIKE has been one of the House's most eloquent and independent voices during his 18 years in the House. For that reason, he has established himself as one of the most respected members of this body.

All of us who know him will miss OTIS, whose thoughtful and conscientious work has been deservedly rewarded by his constituents in all nine congressional elections.

I wish the very best to my good friend, OTIS PIKE, and hope that he finds challenges in the private sector equal to the capabilities and talents he has shown here as an exceptional Member of Congress.●

● Mr. MONTGOMERY. Mr. Speaker, if there is one thing our colleague from the First District of New York, OTIS PIKE, has taught us during his 18 years of service it is the value of personal integrity. He has always been a man of deep conviction and more importantly he has voted those convictions on the House floor regardless of the political consequences.

In many ways OTIS PIKE has been the conscious of the House with his well chosen words which put issues into clear perspective. We always knew where OTIS stood on any given issue and also knew that his decision had only been reached after thoughtful consideration of all the facts.

We can all be grateful that we had the privilege to serve with OTIS and could benefit from his leadership and from his dedication to those ideals which made this a great deliberative body.●

● Mr. ULLMAN. Mr. Speaker, I am grateful for this opportunity to join tribute to OTIS PIKE, a man of rare energy, talent and courage.

Since he first arrived in Washington nearly 18 years ago, OTIS has been one of the most fiercely independent Members in the House. That independence, coupled with ample powers of persuasion and persistent attention to detail, have marked him for leadership on some of the most complex and controversial issues to confront the Congress in the last two decades.

Nine consecutive terms in the House speak volumes about how OTIS has served his constituents. His service to the Congress and the Nation as a longtime member of the Committee on Armed Services and chairman of the Select Committee on Intelligence has been no less accomplished.

It has been a special privilege to serve with OTIS on the Committee on Ways and Means for the last 4 years. He has made important contributions to the work of the committee in circumstances fraught with difficulty.

I am personally grateful for his counsel, his assistance, and—equally important—his good will. OTIS PIKE has helped make the House a better, more pleasant place to serve.

I wish him well, but I am sorry to see him go.●

● Mr. PERKINS. Mr. Speaker, our good friend and distinguished colleague, OTIS PIKE, has eloquently stated the causes which impell him to his separation from us.

I respect those causes, and I respect him for his forthright decision. But I wish he could have seen things otherwise, and stood for reelection this autumn.

The House needs Members like OTIS PIKE, just as the country needs men of his character and capacity, and his sensitivity to the needs of the American people in this last quarter of the 20th century.

It has been a great privilege for me to serve with OTIS PIKE for these past 18 years. I know how much he has given to his district, and how great his contributions to the work of nine Congresses during five Presidencies.

I know that a man like OTIS PIKE will not vegetate after leaving the Congress, and that he will find other ways in which to give of his great talents for the common good.

In whatever undertaking he pursues in the future, I am sure the good wishes of every Member of this House go with him. We shall sorely miss him in this Chamber.●

● Mr. McHUGH. Mr. Speaker, when Congressman OTIS PIKE leaves us this year, the House of Representatives will be losing one of its most intelligent, conscientious and incisive Members. We will be saying goodbye to one of our wisest friends.

When I was first elected to the House, I was impressed by the quality of OTIS PIKE's dedication to his responsibilities. It was from his example that many other younger Members and I learned many valuable lessons, including the importance of effective service to our districts, and the need for responsible execution of committee assignments. He also taught us how to laugh at ourselves.

It was in this last respect that he served as a conscience for many of us. His good humor among us was always characterized by rigorous honesty and self-knowledge, and his example invited us all to strive for excellence in the fulfillment of our responsibilities. Through his example and his wit, he taught us to take our duties very seriously, but not to take ourselves too seriously.

I will always be very grateful to him for his example and his friendship. He is a fine gentleman who will be sorely missed around here, but remembered with great warmth and affection. I will always be prouder of my membership in this body because he has been a colleague.●

● Mr. BINGHAM. Mr. Speaker, I appreciate the opportunity to join in paying tribute to the gentleman from Suffolk County, N.Y., OTIS PIKE.

Whenever OTIS rose to speak in the well of the House, the hubbub subsided. This was not only because he enjoyed the Pikean wit, but also because OTIS was known to be a Member who thought for himself and whose views were worth listening to. His remarks were characterized by another all too rare quality: brevity.

I never had the privilege of serving on a committee with OTIS PIKE, but I enjoyed working with him on matters of concern to the New York delegation.

I regret that our colleague decided to retire from the House, although his reasons for doing so were understandable.

I am sure that all of us wish him and his family many happy and productive years down the road ahead.●

● Mr. DERWINSKI. Mr. Speaker, it is a special pleasure for me to join in paying tribute to OTIS PIKE, who after 18 years of outstanding service will be retiring from his duties as Representative of the First District of New York.

OTIS has been a devoted public servant throughout his career, and is one of the ablest men serving in Congress. He has faithfully represented the people of New York with great effectiveness, setting an example of leadership and fairness which is a tribute to the great institution of this body.

His firm wisdom and skilled expertise has helped to lead this Nation toward more responsible fiscal policies. As a member of both the Committee on Ways and Means and the Budget Committee, OTIS has certainly demonstrated his dedication to solving our economic problems.

He will long be remembered by us for his loyalty to principle and his dedication to the interests of his constituents and to the benefit of each and every American.

We will certainly miss OTIS' wise counsel and leadership, but I join with my colleagues in wishing him and his wife, Doris, a long and enjoyable retirement.●

● Mr. COUGHLIN. Mr. Speaker, I join today in paying affectionate tribute to my good friend and colleague the gentleman from New York (Mr. PIKE) as he retires from this body.

OTIS and I have served together in the House for 10 tumultuous years and, though we have stood on opposite sides of the aisle, our sparring has been of the friendliest sort. In fact, I have always suspected that at heart ours was more a lingering Princeton-Yale rivalry than one owing to party allegiance.

OTIS' many significant contributions to the important work of the Ways and Means and Budget Committees should give him a sense of a job well done during his years in Congress. We shall all miss his colorful personality, his sometimes biting wit, and his frequent eloquence. OTIS has never hesitated to pierce the balloons of pretentiousness when that needed to be done. I hope he will continue to do so.

I am very pleased to learn that retirement may not take OTIS very far from us, perhaps no farther than the House press galleries. I look forward to continuing our long and happy association, and I hope in the future OTIS will continue to favor us from time to time with his clever verse and exuberant ukulele playing. I wish OTIS the very best in the new endeavors.

In closing my remarks today, I cannot resist the temptation to pay a little lighthearted tribute to OTIS in a short verse of my own:

Otis Pike is a man of mirth
As honest as the clay of earth.
With financial disclosure, he tried to say,
We surely will come to rue the day.
So off he went with style and wit,
And told the world—to sit on it.●

● Mr. MURPHY of New York. Mr. Speaker, OTIS PIKE has been an outstanding Member of the House of Representatives since 1960. He has served on the Budget Committee, the Ways and Means Committee, and the Joint Economic Committee with great distinction, even faced with the international acceptance of the fact that economics is probably the world's most boring science. He proved the adage, however, that nothing is interesting if you are not interested in it. His devotion to mastery of the boring science made him a leader to be reckoned within matters economic, and a man to whom we all have turned for leadership and guidance in a complicated field.

OTIS PIKE, former fighter pilot in World War II, expert on our Nation's defense as a member of the Armed Services Committee, was as diligent to the needs and duties in his district. So beloved by the people of Peconic that he was referred to affectionately as "Our OTIS."

OTIS PIKE also brought to this Chamber one of the rarest of talents: The gift of laughter. In our daily business concerning the most urgent matters of this Nation, we have all too often been guilty of becoming the very caricature of stodginess so often attributed to the Congress. OTIS PIKE'S sense of humor never allowed us to reach the extreme, however, bringing to mind G. B. Shaw's view of humor that "life does not cease to be funny when people die, any more than it ceases to be serious when people laugh." OTIS PIKE gave us all a necessary perspective to laugh at ourselves and our troubles, and to succeed in spite of both.

It has been said of retirement that few men have the character to remain idle. OTIS PIKE may be one man who does.●

● Mr. SKUBITZ. Mr. Speaker, I take great pleasure in joining the many friends of our colleague, OTIS PIKE, in paying tribute to his many years of service to the people of this Nation. Few Members of this body have served their country—in peace and in war—with the degree of distinction and dedication that has typified OTIS' career.

Before coming to the House, OTIS had already distinguished himself as a marine pilot, having flown 120 combat missions in the Pacific during World War II, for which he was awarded five air medals. Having distinguished himself in war, OTIS' criticism of wasteful military spending as a Member of the House has been both heeded and, in many cases, needed.

OTIS has earned a much deserved reputation as one of the most conscientious, and most dedicated Members of this body. His forthright manner of handling issues has earned OTIS the respect of his colleagues of both sides of the aisle.

OTIS' presence will be sorely missed when the 96th Congress convenes in January. I wish OTIS all the happiness and peace of mind in retirement that he so richly deserves.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to Hon. OTIS G. PIKE, who is retiring this year at the close of the 95th Congress after having served nine terms in the House of Representatives.

OTIS PIKE has given almost two decades of dedicated and devoted service to his constituents of the First District of New York, and has compiled an outstanding record during his distinguished career. His diligent efforts as a member of the Joint Economic Committee and the House Budget Committee have been both fruitful and beneficial to the citizens of this Nation, and indeed, these successful efforts have made America a more prosperous and productive country.

Few men have given more of themselves to good government, or have a more compassionate understanding of human problems than has OTIS PIKE. As a member of the House Ways and Means Committee, he has been in the forefront of efforts to implement meaningful solutions and effective action on behalf of individual citizens caught in the bewildering maze of the Federal tax laws.

OTIS is a fine legislator and a distinguished leader, and he will be missed by both his constituents and his colleagues.

I extend to OTIS PIKE my best wishes for a healthy and happy retirement.●

● Mr. BOLAND. Mr. Speaker, I take this opportunity to join my colleagues in paying tribute to OTIS PIKE under this special order.

OTIS PIKE will always have a special place in my memory. Whenever he strode to the well, the House was assured of thoughtful and eloquent exposition of the issue at hand. His remarks have been often repeated, often quoted. He has always been an exciting and stimulating speaker. Most importantly, he has been able to combine a keen wit with good commonsense. The CONGRESSIONAL RECORD will deem somehow incomplete without an OTIS PIKE statement.

Most of us were quite surprised when OTIS PIKE announced his retirement last winter. His retirement statement is a very heartfelt document that takes a good hard look at a congressional career. It has been widely reproduced and widely hailed as a classic.

OTIS PIKE, the Representative, has indicated that one of his new careers will be as OTIS PIKE, the writer. His knowledge of the workings of this body are certain to lead to some fine writing on Congress. We can be sure that his views will be tough, honest, and uncompromising. I am looking forward to reading his columns on the activities of the House. He will certainly keep us on our toes.

Mr. Speaker, OTIS PIKE, in announcing his retirement, said, "It's time to cruise on other waters." I wish him smooth sailing and the best of luck.●

● Mr. FLOWERS. Mr. Speaker, when I count the blessings that have come my way in the last 10 years while being privileged to serve here in the "People's House"—the House of Representatives—right at the top of this list are the close, personal friendships that have developed with other Members. We may come from different places with widely different backgrounds, but there is surely something special here that allows a depth of friendship which is hard to find.

Today we honor one such friend to me—the gentleman from New York, OTIS FIKE. Lawyer, scholar, a man of letters, boatsman, fisherman, and on and on. OTIS is one of a kind—a rarity even for this place. His wit has helped us see ourselves a little more clearly. His candor and forthrightness and intellectual honesty are not exceeded by anyone I have ever known. He has truly served

the public interest while representing his district and his people well for 18 years. OTIS PIKE has been the kind of Congressman that makes this system of ours work.

I shall always treasure his warm friendship and wish him every success in his future careers and much happiness to go with it.●

● Mr. LUNDINE. Mr. Speaker, I join today with my colleagues in the House and particularly with my colleagues in the New York State delegation, to wish the very best for the future to my friend and colegislator, OTIS PIKE.

Few Members of this House have exercised the candor and eloquence both in this Chamber and outside, which Mr. PIKE has since he became a Member of Congress. He has remained proof to newer Members that one can vote on each issue as he or she sees fit while continuing to be respected by constituents and fellow legislators.

Mr. PIKE's service on the House Ways and Means Committee, his sharp eye for fair and commonsense compromise and approaches to problems, his important contributions to the new congressional budget process, and his dedication to national and New York needs will make him a most difficult legislator to replace.

I add my thanks from the people of New York State and the Nation for the job which Mr. PIKE has done here since his election to the House. And I add my most sincere hopes for his success and his full enjoyment of the years which will follow this retirement from public service.●

● Mr. RUSSO. Mr. Speaker, when I heard that my distinguished colleague OTIS PIKE was retiring from Congress, my first concern, of course, was preretirement counseling.

The eloquent gentleman from New York in his colloquy with me on my amendment for prepurchase housing counseling had so persuasively outlined the arguments for establishing counseling programs for many of our major life decisions, that I deeply regret that we did not have time to establish a preretirement counseling program here.

Had we had such a program in operation, surely we could have pointed out the risk to the Congress involved in his departure. We do not always work in harmony around here, for example, but OTIS, clearly a man of note, provided the tunes and lyrics that could keep us whistling as we worked. (Who will ever forget the memorable, "We are all so pure?") What are we to do without these musical refreshments?

OTIS, candid, wise, and witty, has been a valuable voice in the Congress, and his leaving is a loss for the forces working for Government efficiency, and fine humor. With a sort of innocence of style, this capable gentleman could devastate an opponent with a carefully turned phrase and a wry observation. Is the world out there ready for this? What of the pitfalls that await him? Has he carefully considered the hidden costs involved in trading the Well for the pen?

I suppose it is too late now, but certainly this should be a lesson for us all. When a talented Member like OTIS PIKE can pack up his insights and ukulele (there is no truth to the rumor that he has a try-out for the Gong Show), we have to improve our system. I think the answer is preretirement counseling. I trust my friend from New York will agree.

However, as in other matters, whether we find ourselves in agreement or not, I respect and admire him as a legislator, and value his friendship. I wish him the best.●

● Mr. MITCHELL of New York. Mr. Speaker, it has been said many times that this Chamber will not be the same without the wit and wisdom of our distinguished colleague, OTIS PIKE. That is so true.

It has been a privilege for me to work with Congressman PIKE on matters of importance to our State and Nation. I have enjoyed the relationship and have benefited from his observations gained over many years of distinguished public service.

He is a man of candor, an individual who has never been timid about expressing his views and has never been one to forego a difficult decision until he is able to test the wind of public opinion to see which way it is blowing. In short, OTIS PIKE is a man who is guided by conscience and conviction and I have always found him one to do what he thinks is right and let the chips fall where they may.

It is my understanding that we will not be denied exposure to the wit and wisdom of our retiring colleague because reports I have heard indicate that he is about to launch a journalistic career. I wish him well in this undertaking.●

● Mr. OBEY. Mr. Speaker, OTIS PIKE is the most charming nay sayer in this House. He has courage, wit, and flair. He is tenacious. He knows better than most how to use humor to make a point.

He did not reach his decisions in this House for convenience sake. I never knew him to compromise on an essential.

He has been a brilliant Member of Congress. He has played the role of skeptic well. We will miss him.●

● Mr. BRINKLEY. Mr. Speaker, I am honored to take this moment to commend the Honorable OTIS PIKE of New York, U.S.A., as he retires from the U.S. House of Representatives.

A fond recollection of mine is his policy of placing a call himself when he wishes to speak telephonically with his colleagues. He said it was a pet peeve of his for Members to call him through their secretary and keep him holding on the line until the calling Member came on. His time, he said, was just as valuable as that of his peer. I have followed that admonition myself because of my respect and admiration for the man, as demonstrated by this small but important characteristic. Simply put, it can be summed up in one word—considerateness.

John Kennedy once said, "For those to whom much is given, much is required." OTIS PIKE has fulfilled this description in every sense—as a conscientious and faithful public servant who genuinely cares for those he represents. We shall remember him, and we shall miss him.●

● Mr. RODINO. Mr. Speaker, I want to express my appreciation to Congressman OTIS PIKE for his devoted service to this Congress for the past 18 years. When he retires at the end of this Congress, he will carry with him many proud memories. As a member of the House Armed Services Committee and then as a member of the Committee on Ways and Means, OTIS PIKE has distinguished himself as one of the most thoughtful, well-prepared and insightful individuals in Congress. His trademark has been his quick wit and his ability to encourage us to take time to laugh at ourselves occasionally. His very human approach to the problems which confront us will be missed.

Mr. Speaker, OTIS PIKE is my friend and colleague and I wish him well in his future endeavors.●

● Mr. FREY. Mr. Speaker, I would like to join with his many friends and colleagues in thanking OTIS PIKE for his tremendous service to this country. OTIS has served our country in military service and in many years in the Congress. His record has been one that we all can be proud of. In my opinion, there was no more effective debater on the floor of Congress than OTIS. He could get his point across seriously or with humor, having the ability to judge the mood of the House and to respond thereby. He was never afraid to take on a tough fight and would not back away from those things he believed deeply in.

On a personal basis one of the nicest things about the House is the ability to get to know, to respect and to enjoy some tremendous people. I am fortunate enough to be able to call OTIS a personal friend and I definitely do feel fortunate. We have had the privilege of being together on many occasions, including some band concerts, and I have always found our discussions and associations most enjoyable and interesting. The State of New York and the people of this country are going to lose, in the true sense of the word, a great American. OTIS deserves his retirement although I know he will remain active in many areas. I hope our association continues past these Halls of Congress.

Good luck, OTIS, and God speed.●

● Mr. DRINAN. Mr. Speaker, the Congress and the country have been fortunate in sharing for 18 years the talents of OTIS G. PIKE. He brought to the House a splendid education and a broad background of personal and professional experience.

In the Congress he has served with distinction on the Committee on Ways and Means, the Budget Committee, and the Joint Economic Committee. He has been extraordinarily diligent in becoming one of the best informed persons in the House.

All of us will remember OTIS PIKE for his good humor and his very pleasant personality. But I and countless others will remember particularly the absolute integrity of mind and spirit which was the very soul of OTIS PIKE. He thought problems through and he voted according to his convictions and his conscience.

He was unwavering once he had made his final judgment.

I have no doubt that OTIS PIKE has another rich career opening up before him. He could do so many things that his problem in selecting another career will be the abundance of riches.

We wish him well. We shall miss his example and inspiration. He has enriched all of us and we are profoundly grateful.●

● Mr. WOLFF. Mr. Speaker, I rise today to pay tribute to my good friend and colleague, the gentleman from New York (Mr. PIKE) who at the conclusion of this Congress brings to a close 18 years of distinguished congressional service to the Nation, the State of New York, and to the people of the First District of New York.

Since 1964 I have had the privilege of serving with OTIS PIKE in this body. During that time I have found him to be witty, outspoken, eloquent, sometimes constructively irreverent, and always skeptical of big government and excessive Federal spending.

My friend OTIS, a graduate of Princeton and Columbia Universities, has an outstanding record of public and patriotic service which has brought him status as a World War II hero, and acclaim as a lawyer and justice of the peace. Of late he has been a hard-working and distinguished member of the House Committees on the Budget and Ways and Means.

Throughout his tenure in Congress, OTIS PIKE has stood up and spoken out forcefully for his convictions. He has been a defender of the oppressed and the downtrodden, and an outspoken advocate for human rights and human freedom.

When OTIS PIKE sees an injustice he seeks to correct it. When OTIS PIKE sees a need for reform, he acts to improve the situation. These are qualities he has brought to this House, and these are qualities which will be sorely missed in the future.

Congressman PIKE begins his voluntary retirement at a young age. His opportunities to contribute to his Nation are not over. I suspect—and hope—that we have not heard the last of the gentleman from New York. Just as his presence has been felt in this House, so it, too, will be felt as he continues his life as a private citizen.

Yet despite being in the forefront of the political scene, and despite years of service in the public spotlight, OTIS PIKE is, and remains a private man. He leaves this Congress now to resume his privacy, to be able to reflect, to analyze, and to view the contemporary political scene from a new perspective. The gentleman has earned the right of such privacy. In the words of Justice Brandeis, "the right to be let alone is the most comprehensive of rights and the right most valued in civilized man," OTIS PIKE has fought long for the rights of others; it is only fitting that he now benefit from the future for OTIS PIKE.●

Mr. Speaker, I join with my colleagues in extending our best wishes for the fruits of his hard labor.

TRIBUTE TO HON. JIM MANN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. DAVIS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. DAVIS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my Special Order on today, a tribute to the Honorable JIM MANN.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DAVIS. Mr. Speaker, I rise to pay tribute to one of our colleagues who is leaving our midst after representing the people of his district for 10 years. I am talking about the Member from the Fourth District of South Carolina, the dean of our delegation, the Honorable JIM MANN. Much to the regret of his many friends here and at home, he is retiring from this body at the end of this term.

I would describe him as a great barrister, who practiced law in his district prior to his election to Congress. Indeed he served as solicitor of the 13th Judicial Circuit establishing an enviable record of success that may never be equaled. I do not honor him just for these accomplishments because they are but an infinitesimal part of his record. He has achieved far more than that.

As an attorney myself, I realize how hard he worked at doing his duty with dedication and compassion. A man of enormous energy, JIM served his community in a civic capacity as well. He worked hard as a member of the Greenville County Planning Commission. At a time when his community needed his drive and determination to overcome the impact of the loss of Donaldson Air Force Base, JIM turned that terrible economic blow into a windfall for his people. His attitude of "can do" was infectious in those trying times. The people of his district decided his energy and determination would serve to improve their country as well as it had served to improve his district, so they sent him here, to the U.S. House of Representatives.

In his 10 years of service in this body, he contributed so much that it would be impossible to enumerate it all. Let me just say that without him, this House is diminished.

I remember when he bled along with all of us when this Nation's highest office was wounded by Watergate. JIM MANN did what he had to do.

But again, I do not honor him just for these accomplishments, because to do so would be less than enough. Today, people are referred to as "super," giants among men, and great leaders. To simply honor a man with words seems too little somehow. I submit a different approach to this issue. I would call on the Members of the 95th Congress to honor JIM MANN by emulating him. Emulating his devotion to duty, family and God. Emulating his total dedication to his country. That would be a proper honor for JIM MANN. That way, we will not miss him quite so much, and the vacuum he leaves will not be quite so great.

Mr. FLOWERS. Mr. Speaker, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Speaker, when I count the blessings that have come my way in the last 10 years while being privileged to serve here in the "People's House"—the House of Representatives—right at the top of this list are the close, personal friendships that have developed with other Members. We may come from different places with widely different backgrounds, but there is surely something special here that allows a depth of friendship which is hard to find.

The distinguished gentleman from South Carolina and I began our service in Congress at the same time and were both assigned to the Committee on the Judiciary. We have worked together on many issues here in the House, and it is a great pleasure for me to join in honoring him here today.

JIM MANN has a rare gift of intellect, and his ability to quickly grasp and assess a situation is as good as I have ever seen. His knack for gentle but clear expression still amazes me—as it does others who work with him.

In the summer of 1974—during the impeachment inquiry—JIM MANN and the rest of us on the committee were called to "account" so to speak. When our very system was being tested in the most critical constitutional crisis in over 100 years, he certainly handled himself in the highest tradition of statesmanship. Afterward, one writer likened him to one of the Founding Fathers.

Having been there with him, and sharing the pressure and the heartache, I can attest to his understanding and his courage and his dedication. JIM MANN has served ably and well in this House, and the country is far better off that he happened to be here at a certain time in history. I am proud to count him as one of my closest friends.

I have known JIM and his fine family well for 10 years, and I wish them all every success and much happiness in the years ahead.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Texas.

● Mr. BROOKS. Mr. Speaker, I would like to join with my many colleagues in commending Congressman JIM MANN for his decade of service to our country in the House of Representatives.

I have had the privilege of serving with JIM on the Judiciary Committee where he has amply demonstrated his integrity and dedication to the discharge of his duties.

JIM MANN served his country in World War II in the regular Army and in peacetime in the Army Reserve.

After a distinguished career in the private practice of law and as a State representative, he was first elected to the Congress in 1968. He has been reelected without opposition.

I join my colleagues in this tribute to

JIM MANN and extend my personal and sincere best wishes for a happy retirement and success in future endeavors.●

Mr. HUBBARD. Mr. Speaker, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Kentucky.

Mr. HUBBARD. Mr. Speaker, I thank the gentleman from South Carolina for yielding. Would he please allow me to give a word of tribute to my dear friend and colleague, OTIS PIKE of New York?

Mr. DAVIS. I would be glad to.

Mr. HUBBARD. I know I am out of order, but I would like to make these remarks.

Mr. Speaker, an extraordinarily high number of Members are retiring from the Congress this year for many different reasons—some have trouble with the folks back home, some are not happy here, some are quite old. One of those who is leaving for none of those reasons is Congressman OTIS G. PIKE of New York.

While I have not known Congressman PIKE as well as I would have liked to, you cannot serve with a Member for 4 years without learning quite a lot about him. We all know of his delightful sense of humor. We all know of his extremely high intelligence. We have admired his courage in standing up and fighting for causes that he believed in, even when the odds were greatly stacked against him. He has certainly made the House of Representatives a far more interesting place than it would have been without him.

While I am sorry to see him go, I can concede that I am, personally, benefiting from his departure. It is my good fortune to have with me part time, and hopefully in January full time, his office manager, Betty Orr.

I wish him well in whatever his new career may be and both his former office manager Betty Orr and I can always assure him a warm welcome in the office of the First Congressional District of Kentucky.

Mr. DAVIS. Mr. Speaker, I thank the gentleman from Kentucky for bringing up those remarks. Tonight we honor two great men who are retiring. Maybe OTIS PIKE is going to join that third estate or fourth estate or fifth estate, or maybe they will not even give him a card to get into the press gallery because of his inside knowledge here. Let me say that without doubt this country is better for OTIS PIKE's service and for JIM MANN's service.

Maybe they differed in the two different areas they served and represented, but when they were brought together on great problems to meet the needs of this great country, be it textiles or maybe the needs of the Grumman Co. and the F–14, in a common defense, let me say one thing plain and simple: OTIS PIKE will be missed; JIM MANN will be missed, but we who have served with them will be enriched for having been able to walk these hallowed halls together with two men with different views, different attitudes, but a common goal.

Mr. HUBBARD. Mr. Speaker, will the gentleman yield once again?

Mr. DAVIS. I yield to the gentleman from Kentucky.

Mr. HUBBARD. Mr. Speaker, in addition to my comments concerning my good friend, Congressman OTIS PIKE, indeed I would be remiss if I did not also extend to my colleague and dear friend JIM MANN of South Carolina my congratulations upon his many outstanding successes as a Member of the House of Representatives; to wish him the very best of everything, including Godspeed in the years to come.

Mr. DAVIS. I thank the gentleman.

Mr. DANIELSON. Mr. Speaker, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Speaker, I thank the gentleman for yielding. You know, I got all the way back to my office before I realized that this was JIM MANN'S special order, and I thank the gentleman for providing it. I will extend my remarks, but I want to say right now that JIM MANN is one of the finest gentlemen and finest lawyers I ever worked with. There are one or two I would want to include within the scope of that, including the present Speaker pro tempore sitting up there, the gentleman from Alabama (Mr. FLOWERS), but I come back here with a great deal of fondness for both of them.

Mr. DAVIS. Mr. Speaker, let me in closing just say that we in South Carolina have been grateful for the services of JIM, but also we have been grateful for the support of his lovely wife Virginia, his tremendous family, and the true knowledge that JIM MANN and his whole family were true South Carolinians, never really parochial to their own district, but servants of all the people of our State and of our country.

And, JIM, we only wish you well, Godspeed, God's love, good health and happiness in your retirement. We will miss you.

● Mr. COUGHLIN. Mr. Speaker, JIM MANN is known for his dedicated work on the House Judiciary Committee, particularly during the tumultuous time of impeachment. He is known for his consistent knowledge of legislation that comes before this House, whether originating from his committees or not. He is known for his thoughtfulness and balance when looking at difficult issues.

He is known, too, for his able leadership in the area of textile trade policymaking. That leadership will be sorely missed not only by millions of textile workers but by those of us who so heavily relied on his knowledge, expertise and advice in the complex and often confusing arena of international trade.

As chairman of the Informal House Textile Committee from 1975 to 1978, JIM established a strong House base of support for this most import-sensitive industry. He did so largely through his own personal time and efforts, through his unceasing attention to detail, trends and even possibilities. JIM possessed an insight into the intricacies of trade policy decisions that was enviable—and that many of us in this House depended upon. Got a question on a textile or apparel related problem? See JIM MANN!

His retirement will truly leave a void, though through his efforts we can now call upon our new Congressional Textile Caucus ably chaired by JIM'S fellow South Carolinian KEN HOLLAND. Still, I would like to be able to take advantage of JIM'S counsel when the need arises, and I hope he is planning to spend some of his time in the Capital City and to be available for consultation.

Knowing JIM'S abilities, Mr. Speaker, I am certain there will be great success in his future. So for myself, I will wish JIM MANN and his lovely wife, Virginia, all happiness in their new endeavors.●

● Mr. RODINO. Mr. Speaker, though it is of course an honor to pay tribute to our friend JIM MANN, it is with real regret that I join in this special order.

It is with regret because the departure of JIM MANN will leave a void in the leadership ranks of the Committee on the Judiciary. It is with regret because we will miss his quiet eloquence. It is with regret because we will lose from this body a friend and a man of conscience.

Mr. Speaker, I have been privileged to serve with JIM MANN on the Judiciary Committee for many years. And we will long remember that he served on the committee at a time when 38 lawyer/legislators were called upon to do a job they had not sought. And no less than the constitutional integrity of our system of Government was at stake. JIM MANN more than rose to that occasion. He set a standard of conscience, of judgement, and of principle that can serve as an example for years into the future.

In recent years, JIM served as the chairman of the Subcommittee on Criminal Justice that processed some of the most complex legislation that came before this House. And that challenge, too, JIM met with talent and with quiet grace.

Mr. Speaker, I hope JIM MANN will consider us his friend for many fruitful years to come. Though he leaves our ranks, he can go with our best wishes and with the knowledge that he will always be fondly remembered.●

● Mr. FUQUA. Mr. Speaker, one of our most respected friends and colleagues will be retiring at the close of the 95th Congress. JAMES ROBERT MANN, better known to all his many friends as JIM, will end 10 years of dedicated service to the people of South Carolina and the Nation.

A valued legislator of exceptional ability, he has served with distinction and has been the guardian of criminal justice as chairman of the Judiciary's Subcommittee on Criminal Justice.

His wisdom and counsel have been highly valued by so many of us over the years. While watching the national interests of our country, JIM never neglected the needs and problems of his South Carolina district, the mark of a truly devoted and sensitive public servant.

His career and service to this House will soon be history, but we here will remember him not only with respect, but compassion as a friend and leader.●

● Mr. BRINKLEY. Mr. Speaker, it is with great pleasure that I commend the Honorable JIM MANN, of South Carolina, for his dedicated service in the U.S. House of Representatives. With the best interests of the people he represents always foremost in mind, he has acted as a knowledgeable and progressive legislator. As a close friend, we know him as a warm and sincere individual.

The excellence of JIM's service on the Judiciary Committee stands out in my mind, and we shall always remember the splendid example he portrayed during the impeachment hearings.

A poet once wrote, " 'Tis the human touch in this world that counts." JIM MANN is one of those uncommon men who possess that human touch, and the people of his district and the Nation have been made better for it.

I wish this wise and gentle man of the new South much happiness in the years ahead.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable JAMES R. MANN, who has served 10 years in the House of Representatives as a distinguished Congressman representing the people of the Fourth District of South Carolina. It has been a truly rewarding personal experience for me to have known him as a colleague and I am honored to have served with him during the last five Congresses.

JIM MANN has proven himself a devoted and capable legislator as a member of the House District of Columbia Committee and the House Select Committee on Narcotics Abuse and Control, and has served his constituents well as head of the House Ad Hoc Committee on Textiles, where he worked with dedication to solve the problems of job losses to Americans due to the imports from abroad of textile products.

Few men have given of themselves to good government, or have a more compassionate understanding of human problems than has JIM MANN as the chairman of the Subcommittee on Criminal Justice of the House Judiciary Committee. He has been in the forefront in upholding the highest standards of justice for all citizens, and he has compiled an outstanding record of excellence and achievement.

JIM is a fine legislator and a distinguished leader, and he will be missed by both his constituents and his colleagues.

I extend to JIM MANN my best wishes for a healthy and happy retirement from the Congress as he continues his career in devotion to the highest principles.●

● Mr. LEHMAN. Mr. Speaker, I rise to join with the other Members in paying tribute and saying my formal goodbye to our valued colleague, JAMES R. MANN of South Carolina.

The House of Representatives will miss JIM MANN, who has brought so much intellectual honesty, dignity, and real class to all his dealings in Congress.

JIM has class in the best sense of the word, for he is also a simple and humble man. He has been a kind gentleman in a world too often thoughtless and rude. He remains a refreshing human being and, I am proud to say, my friend.

I wish JIM MANN health and happiness in his retirement, and hope he will not stay away too long.●

● Mr. THORNTON. Mr. Speaker, when this session of Congress comes to a close, so will the congressional career of a friend of this body, the gentleman from South Carolina, JAMES R. MANN.

For 10 years, JIM MANN has been an untiring champion of his South Carolina constituents and an active and forceful presence in the legislative proceedings of this House.

It was a great privilege for me to serve on the Judiciary Committee with JIM. During the tense days of the Judiciary Committee hearings on the impeachment resolutions, I watched him bring wisdom and a keen sense of reason, foresight, and objectivity to bear on the problems this Nation faced. JIM MANN provided a strong, steady hand and calm, deliberative judgment.

His leadership helped bring our Nation through the gravest constitutional crisis since the Civil War.

JIM MANN, we in the House are all grateful for your exceptional contributions, and I want personally to wish you great happiness in your future endeavors.●

● Mr. PIKE. Mr. Speaker, I am making my exit from Congress in a lot of distinguished company this year and none more so than our greatly admired and respected colleague, JIM MANN of South Carolina. I have always felt a special affinity personally—if not always politically—for our colleagues in the so-called "Southern" delegation and JIM epitomizes all that is best and admirable in whatever that regional label is meant to signify. In only 10 years' time he has managed to make a mark that many of us with longer tenure by far would have been pleased and proud to leave behind as a legislative epitaph.

At no period in our history was there ever a greater need for the best legal minds to be available to the House Judiciary Committee than in the early years of this decade, and it must have been an all-wise providence watching over us that saw to it that JIM MANN's would be one of those brought to bear on one of the most crucial and agonizing decisions ever to face a Congress of the United States. His courage, his judicial restraint and wisdom, more than equal to the challenge, have reflected great honor and credit on us all and have greatly embellished his own. I am proud to add my salute for a job well done to our distinguished colleague, JIM MANN.●

Mr. BUTLER. Mr. Speaker, JIM MANN has decided to retire from this august body at the end of this session. JIM and I have been friends for many years and his departure will be a personal loss. But, even more than that, his departure will mean the absence of a legal scholar in our midst. As many will recall, during his service on the House Judiciary Committee, JIM came to national attention because of his constitutional expertise and his dedication to justice, and the public began to think a little more kindly of us all. His 10 years here have encompassed a traumatic decade and his name will be included in the history books wherein is recorded the names of those who put the survival of our system above professional survival.

I worked with JIM behind closed doors during the judiciary hearings on the Presidential impeachment and know his capacity for quiet leadership. We sat together during the confirmations of the only two nonelected Vice Presidents our country has had. We heard a sitting President of the United States testify before our subcommittee. I know JIM to be incisive, intelligent and, above all, fair.

He has been a dedicated servant to the best interests of his South Carolina constituency and his country. He served as chairman of the House Informal Textile Committee for more than 2 years and has long championed Federal policies which recognize the national need for a healthy textile industry. He has been a key member of those committees exploring ways to eliminate the damage being done to our society and particularly our young people by drug abuse.

JIM MANN will be missed. He leaves, however, with our sincere best wishes for a happy, healthy future and great success in his new endeavors.

Mr. WOLFF. Mr. Speaker, JIM MANN's most famous accomplishment in this body was no doubt his leadership role in the House Judiciary Committee's impeachment proceedings. That he was fair and deliberate; that he was thoughtful and judicial; that his oratory and bearing were remindful of the Founding Fathers; cannot be denied. He brought great credit to this House in those difficult days, Mr. Speaker, and credit to our Nation.

But it is important to remember that JIM MANN brings those same qualities to bear in his congressional work every day. If the House is cacophonous, JIM can be counted on to provide quiet reason. If we are argumentative, he can smooth the troubled waters. If we lose sight of our objective, he has that unique ability to cut through the extraneous and bring us back on the main path. In short, JIM MANN is the kind of Representative this country needs; he will be missed by his district, his State of South Carolina, and his country.

And I personally will miss him, Mr. Speaker, although I hope and trust our friendship will endure, though JIM leaves the House. His outstanding work on the Select Committee on Narcotics Abuse and Control, which I chair, has helped to stem the flow of dangerous narcotics to our shores and cut our addict population substantially. As he embarks on new and I know successful ventures, I would remind JIM MANN that we are still in need of his counsel in these Halls.

Mr. McCLORY. Mr. Speaker, it is, of course, with mixed emotions that I rise to pay tribute to our colleague from South Carolina, and my friend, Congressman JAMES MANN. JIM MANN's decision to voluntarily retire from this body appears to reflect an attitude all too prevalent among my colleagues. I am confident myself that JIM MANN's decision and that of others of his youthful years who are leaving us at the end of the 95th Congress results from pressures and demands which tax our human capabilities to the utmost—requiring almost continuous service from which there appears to be liberation only through retirement from this body.

In the case of JIM MANN, he has assumed major responsibilities in the U.S. House of Representatives, of which I am personally and intimately aware. As a long time colleague on the House Judiciary Committee, including more recently in his capacity as chairman of

the Criminal Justice Subcommittee, I have noted the diligence and tireless application to his tasks which only my Judiciary Committee colleagues and members of the committee staff can fully appreciate.

Mr. Speaker, one aspect of JIM MANN's painstaking and conscientious work occurred during the historic and yet tragic period of the impeachment proceedings of 1974. During that period JIM MANN emerged as a leader on the majority side who individually undertook the drafting of several of the articles of impeachment. JIM MANN's work in this respect is recorded now in many of the anthologies which have been published concerning those dramatic and trying experiences of our House Judiciary Committee. As one of those who participated actively with JIM MANN in this virtually unprecedented task of drafting those articles, I can attest personally to his careful and thoughtful work, his strict adherence to the constitutional bases upon which our committee undertook to act—and his determination to reflect the views of the large majority of his colleagues—and not merely his personal concepts—based upon the evidence which our committee had received.

Mr. Speaker, in his more recent responsibilities relating to the proposed revision of the Federal Criminal Code, JIM MANN has demonstrated restraint and sound judgment in guiding his Subcommittee toward responsible action. He has recognized the importance of embodying in the proposed Federal Criminal Code the established law of our land while resisting the desires of some to use this overhaul of our Federal criminal laws as a vehicle for radical change.

Mr. Speaker, on a purely personal basis I would like to note that JIM MANN is a thoroughly friendly individual—gentle but firm, loyal, conscientious—and guided by the highest principles of the legal profession and of responsible public service.

Throughout his entire experience JIM MANN has been supported by his devoted wife Virginia who will appreciate equally with JIM MANN the freedom which accompanies retirement from this important yet active body. My wife Doris and I extend to JIM and Virginia Mann our good wishes for active and rewarding lives and much happiness.

Mr. CHAPPELL. Mr. Speaker, it is understatement when I suggest that the absence of JIM MANN, our colleague from South Carolina, will be sorely felt by the 96th Congress.

There is no doubt that he will be missed in these Chambers. JIM MANN has always represented the rational approach and his calm and judicious instincts have led us time and again to turn to him for his always thoughtful and valuable guidance.

The people of Spartanburg and Greenville counties in South Carolina can thank JIM for his efforts on behalf of the textile industry, which is that district's lifeblood. As chairman of the House Informal Textile Committee and organizer of the Textile Caucus, JIM has illustrated his understanding and appreciation of the people and place of which he is a product.

The State of South Carolina, too, owes JIM MANN its gratitude. As leader of the State's delegation in the House, JIM has been an inspiration to his fellow Carolinians, and a leader worthy of sincere respect.

People throughout the Nation will join South Carolinians in their deepfelt appreciation of JIM MANN. As an esteemed member of the Judiciary Committee, and chairman of the Subcommittee on Criminal Justice, he has spoken for the voice of reason. As the "watchman in the night" of the Watergate era and, more recently, as this body's foremost expert on criminal justice, his strength and straightforward sense of purpose have acted as a guidepost when it seemed that none could be found.

Mr. Speaker, I have found it difficult to use the word retirement as I join my colleagues today in expressing our respect and gratitude to JIM for having given us 10 years of service and leadership. JIM has demonstrated in his 30 years of public service and devotion to his district, his State, and his Nation that he is the consummate "man of the people". I do not think that will change when JIM leaves Congress.

THE RETIREMENT OF CONGRESSMAN OTIS PIKE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 5 minutes.

● Mr. GREEN. Mr. Speaker, the House is suffering the loss of one of its most unique Members in the retirement of Congressman OTIS PIKE, who has represented the First District of New York for the past 18 years.

I know I speak for many of my colleagues in expressing regret at OTIS' departure from our Chambers, because his intellect, good sense, and ever-present humor made him someone quite special to work with.

I want to wish Congressman PIKE the very best of luck in the future and convey to him the sense of loss the entire New York delegation feels in his departure from the House.●

FEDERAL AGENCY RULEMAKING IMPROVEMENTS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. BROYHILL) is recognized for 15 minutes.

● Mr. BROYHILL. Mr. Speaker, I have today introduced a bill entitled "The Federal Agency Rulemaking Improvements Act." This bill is designed to require a more responsible approach to rulemaking by the various regulatory agencies throughout the Federal Government and its goal is to reduce the tremendous and constantly increasing costs of Government regulation.

There is no doubt that inflation is one of the most serious problems facing this Nation today. It instills fear and anguish among the elderly and poor who are finding it increasingly difficult to afford everyday necessities; it sharply reduces the purchasing power of consumers; it reduces the amount of goods and services sold, and, ultimately, it results in lower production, fewer jobs, and a reduction in consumer goods. The causes of, and the cures for, inflation are in most instances incredibly complex and quite elusive. However, it has become increasingly clear in recent years that the Federal Government itself it contributing to inflation in a very significant manner and this contribution is increasing at an alarming annual rate.

Current and reliable studies and recent congressional hearings have indicated that Federal Government regulation costs the American economy well in excess of $100 billion per year and this figure may exceed $135 billion by the end of calendar year 1979. In addition, there seems to be no end in sight. Barry Bosworth, the Director of the Council on Wage and Price Stability, recently stated that new regulations now being developed will add more than $35 billion to the cost of Government regulation. This nonsense is totally unacceptable and must be dealt with promptly.

There is no question that some regulation is indispensible in the complex society in which we live today. However, there is also no question that many of the Federal regulations now in the law are ineffective, ill conceived, inadequately developed, and are drafted with an abundance of ambiguities. Anyone who observes the Federal regulatory process with even a passing interest quickly becomes aware that the regulatory agencies too frequently demonstrate an unwillingness to properly consider the full ramifications of their regulations and how such regulations will impact on our national economy. Another frequently observed fact is that regulatory agencies too often develop regulations without simultaneously considering the nature and volume of recordkeeping and reporting necessary to adequately implement and enforce their proposals. In short, too many of our regulatory agencies perform incomplete and sloppy work.

President Carter recently issued Executive Order 12044 which specifies new procedures which executive agencies are required to follow in developing rules and regulations. While this is a step in the right direction and one which the President should be commended for taking, it is still deficient in many respects. The bill which I have introduced draws heavily from the concepts contained in this Executive order but it contains additional and necessary requirements which unfortunately were not made a part of this Executive order. For example, it extends the requirements to the independent agencies which were exempted from the provisions of the Executive order. It also places some additional and indispensible responsibilities on the agencies and provides for a mechanism to assure some degree of uniformity among the agencies in their implementation of the requirements of this bill.

Summarized briefly, the provisions of this bill would require that regulatory agencies perform the following responsibilities in connection with any proposed rulemaking and with review of existing rules and regulations:

First. In any notice of proposed rulemaking, each agency shall include:

A detailed statement which describes the specific purpose of the rule and the purpose that will be served by such rule, as well as the scope and applicability of such proposed rule;

A statement which describes each regulatory and nonregulatory alternative which was considered by the agency in connection with such proposed rule;

A discussion of the reasons for the selection of such proposed rule as the most effective means for the achievement of the policy goals of the agency, taking into account the costs and benefits associated with each regulatory and nonregulatory alternative considered by the agency; and

An economic impact analysis of the proposed rule which shall include, among other things, the direct and indirect costs associated with compliance with such proposal, the potential inflationary or recessionary effects of such proposal, the effects of such proposal on employment, the effects on competition among businesses and industries affected by such proposed rule, the effects of such proposal on consumer costs, and the impact of such rule on recordkeeping and reporting requirements.

Second. In regard to the issuance of a final rule, the agency shall include a statement which is signed by the head of the agency indicating that such final rule is not in conflict with any existing rule prescribed by that agency or any other agency as well as a statement that such final rule shall not be interpreted in such a manner as would make such rule in conflict with any existing rule. This provision is designed to place greater responsibility on the agency head regarding the final work product that comes out of the agency.

Third. There is an additional requirement contained in this proposal that each agency review its existing rules at least once every 5 years to determine if the rule is still necessary and if it is carrying out the purposes it was originally designed to carry out at the time it was initially prescribed. Also, there is a requirement that each agency periodically publish in the Federal Register an agenda of rules which will be under consideration and a list of the agencies' regulatory priorities. The enforcement of these provisions is accomplished by allowing any person to file a petition in an appropriate circuit court of the United States alleging that a given agency has not complied with the requirements of this act. Upon a finding that the agency had not in fact complied with the requirements of this act, the court would order the agency to suspend further rulemaking proceedings relating to the rule which is the subject of the petition until the agency can show to the satisfaction of the court that it has come in compliance with the requirements of this bill. These sanctions are neither harsh nor unnecessary. The rulemaking proceeding is entirely under the control and direction of the agency involved. If an independent third party—the court—finds that an agency is not complying with certain requirements of law, it is entirely reasonable to require it to cease further action in the matter until it comes into compliance. I think that we will find rapid action by an agency which has to suffer the embarrassment of such a court order. I fully anticipate that the remarks of the various agencies will include the stock expressions of concern that these requirements will hamstring the agency, will absorb large amounts of its resources, and will delay response to national problems. On the other hand, it will be interesting to see which agencies will openly admit that they are not already undertaking the actions required by this bill in the development of their rules and regulations.

This Government has, over the years, adopted a policy of resolving most of our national problems through the mechanism of administrative rules and regulations. The impact of these rules and regulations has very obviously become enormous. Under such circumstances, it should be apparent to even the most uninformed that a meaningful, workable, and viable solution to any problem cannot be developed unless certain very basic matters are carefully analyzed, and opportunities are given to the public to see and comment on each critical aspect of the agencies' decisionmaking process.

This bill simply says to the agencies that if you are not doing the things that you obviously should be doing in the development of rules and regulations, we will mandate that you mend your ways and start proceeding in a more responsible manner.

I will await with a good deal of interest the comments of the various agencies regarding this proposal. I fully intend to reintroduce this measure at the beginning of the 96th Congress. I have no pride of authorship in this proposal and should the agencies or others interested in this matter offer meaningful, responsible, and constructive suggestions regarding needed changes in this bill, I will not hesitate to make such changes prior to my reintroduction of this bill in the next Congress.

At this point in the RECORD, I include the text of the "Federal Agency Rulemaking Improvements Act."

H.R. 14332

A bill to amend title 5, United States Code, to establish certain procedural and other requirements designed to ensure that rules prescribed by Federal agencies are necessary, reasonable, and compatible with congressional goals and policies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Agency Rulemaking Improvements Act".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress hereby finds that—

(1) Federal regulation of the Nation's businesses and industries is increasing at a dramatic annual rate;

(2) many Federal rules applicable to such businesses and industries are ill-conceived and inadequately developed, and are drafted in ambiguous and confusing language;

(3) Federal agencies too frequently have been unwilling to properly consider the ramifications of rules prescribed by such agencies and the manner in which such rules will affect the national economy;

(4) agencies too often develop rules without taking into account the nature and amount of recordkeeping and reporting necessary to adequately implement and enforce such rules;

(5) agencies frequently fail to carry out proper and complete reviews of existing rules in order to determine if proposed rules would impose inconsistent or overlapping requirements upon persons required to comply with such rules, and

(6) as a result of the magnitude of Federal regulation, and the ineptitude of agencies in developing rules, Federal regulation often has placed significant and unnecessary burdens upon the national economy and welfare, including—

(A) substantially increased costs to consumers, with current estimates exceeding $100,000,000,000 annually;

(B) high entry barriers in many of the Nation's businesses and industries and numerous other adverse effects on competition in the marketplace;

(C) the imposition of inequitable demands and burdens on individuals with limited means and on small organizations and small businesses; and

(D) inefficient use of the resources of agencies, enormous waste of Federal funds, and actions which often are inconsistent with national health, safety, economic, and public welfare goals.

(b) It is the purpose of this Act to establish procedural and other requirements applicable to agency rulemakings which are designed to ensure that—

(1) agencies will prescribe rules only after the need for regulatory action, and the purposes of such action, are clearly established;

(2) meaningful regulatory and nonregulatory alternatives are considered and analyzed by an agency before the agency undertakes any regulatory action;

(3) compliance costs, paperwork, and other burdens to the public imposed by agency rules are minimized;

(4) the heads of agencies will review and revise rulemaking procedures, with a view toward giving the public sufficient notice of future regulatory action;

(5) the heads of agencies will review rules to avoid conflict or duplication with existing rules; and

(6) rules are written in clear, readily understandable, and unambiguous language which specifically describes the scope and applicability of such rules.

AMENDMENT TO TITLE 5, UNITED STATES CODE

SEC. 3. (a) Chapter 5 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter.

"SUBCHAPTER IV—AGENCY RULEMAKING REQUIREMENTS

"§ 591. Definitions

"For purposes of this subchapter—

"(1) the term 'agency' means each authority of the Federal Government, whether or not it is within or subject to review by another agency, but such term does not include—

"(A) the Congress;

"(B) the courts of the United States;

"(C) the governments of the territories or possessions of the United States;

"(D) the government of the District of Columbia;

"(E) agencies composed of representatives of the parties or of representatives of organizations of the parties to the disputes determined by them;

"(F) courts martial and military commissions;

"(G) military authority exercised in the field in time of war or in occupied territory; or

"(H) functions conferred by sections 603, 604, 608, and 609 of the National Housing Act (12 U.S.C. 1738, 1739, 1743, 1744), the Contract Settlement Act of 1944 (41 U.S.C. 101 et seq.), section 13 and former section

32(b)(2) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622, 1641(b)(2)), section 4 and sections 201 through 212 of the Housing and Rent Act of 1947 (50 U.S.C. App. 1884, 1891–1902), and section 203 of the Defense Production Act Amendments of 1952 (50 U.S.C. App. 1894a);

"(2) the term 'Committee' means the Interagency Review Committee established in section 597(a);

"(3) the term 'rule' means the whole or a part of an agency statement of general or particular applicability and future effect designed to implement or prescribe law or policy, including the approval or prescription for the future of rates, wages, corporate or financial structures or reorganizations of such structures, prices, facilities, appliances, services, or allowances for such structures, or of valuations, costs, or accounting, or practices bearing on any of the foregoing, but such term does not include—

"(A) interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice;

"(B) rules prescribed with respect to a military or foreign affairs function of the Federal Government;

"(C) rules relating to Federal Government procurement;

"(D) rules prescribed in accordance with the provisions of section 556 and section 557 of this title; or

"(E) rules prescribed after an agency publishes in the Federal Register a statement indicating that the agency has determined that—

"(i) such rules are prescribed in response to an emergency (in which case the agency shall include in such statement the reasons for such determination); or

"(ii) the prescription of such rules is governed by short-term time limitations established by or under any statute or court order; and

"(4) the term 'rulemaking' means agency process for formulating or amending a rule.

"§ 592. Requirements applicable to proposed rules

"Each agency, in connection with carrying out any proposed rulemaking, shall—

"(1) prepare a statement relating to the need for and the purposes and applicability of, the proposed rule involved in accordance with section 593 of this title;

"(2) prepare a statement containing an analysis of regulatory and nonregulatory alternatives to such proposed rule in accordance with section 593 of this title; and

"(3) carry out an economic impact analysis of such poposed rule in accordance with section 594 of this title.

"§ 593. Statement relating to need for proposed rules and analysis of alternatives

"Each agency include in the general notice of proposed rulemaking required in section 553(b) of this title—

"(1) a statement which—

"(A) describes in specific terms the need for the proposed rule involved and the purpose which will be served by such proposed rule;

"(B) indicates the legal basis for the prescription of such proposed rule; and

"(C) specifies the scope and applicability of such proposed rule; and

"(2) a statement which—

"(A) describes each regulatory and nonregulatory alternative which was considered by the agency in connection with preparation of such proposed rule;

"(B) discusses the reasons for selection of such proposed rule as the most effective means for the achievement of the policy goals and purposes of the agency, taking into account the costs and benefits associated with each regulatory and nonregulatory alternative considered by the agency; and

"(C) indicates the manner in which the economic impact analysis prepared by the agency in accordance with section 594 of this title was taken into account in connection with selecting the proposed rule as the most effective means for the achievement of the policy goals and purposes of the agency.

"§ 594. Economic impact analysis

"(a) Each agency, in connection with carrying out any proposed rulemaking, shall prepare an economic impact analysis of the proposed rule involved. Such analysis shall examine—

"(1) the direct and indirect costs associated with compliance with such proposed rule;

"(2) the potential inflationary or recessionary effects of such proposed rule;

"(3) the direct or indirect effects which such proposed rule may have on employment;

"(4) the effects which such proposed rule may have on competition in businesses and industries affected by such proposed rule, with particular attention to any competitive effects upon small businesses;

"(5) the effects which such proposed rule may have on consumer costs, with particular attention to effects upon economically depressed segments of the national population;

"(6) the impact of such proposed rule on productivity in businesses and industries affected by such proposed rule;

"(7) the impact of such proposed rule on international trade, with particular attention to effects upon the balance of payments of the United States: and

"(8) the impact of such proposed rule on recordkeeping and reporting requirements, including—

"(A) an estimate of the number of, and a description of the classes of, persons who would be required to maintain records, submit reports, and fulfill other information-gathering requirements under such proposed rule; and

"(B) an estimate of the nature and amount of information which would be required to be contained in such reports, the frequency of such reports, and the costs associated with complying with such recordkeeping, reporting, and other information-gathering requirements.

"(b) Each agency which prepares an economic impact analysis in accordance with subsection (a) shall take such analysis into account in preparing the statement required in section 593(2) of this title.

"(c) Copies of each economic impact analysis prepared by an agency in accordance with subsection (a) shall be made available by such agency for public inspection and copying during normal business hours, subject to the payment of a reasonable fee to cover any cost of such copying.

"§ 595. Requirements applicable to final rules

"(a)(1) Each statement prepared by an agency under section 593 of this title in connection with a proposed rulemaking, and included in the general notice of proposed rulemaking, shall be included by appropriate reference in the publication of the final rule in the Federal Register.

"(2) If any agency makes any change or alteration in any statement specified in paragraph (1) before publication of the final rule, then the agency shall include in such publication a detailed explanation of the nature of, and reasons for, each such change or alteration.

"(b) Each agency shall prepare a statement, which shall be signed by the head of the agency and shall be included in the publication of the final rule involved in the Federal Register, indicating that the head of the agency has reviewed such final rule and that—

"(1) such final rule is stated in clear, readily understandable, and unambiguous language which specifically describes the scope and applicability of such final rule;

"(2) such final rule is not in conflict with any existing rule prescribed by the agency or by any other agency;

"(3) such final rule shall not be interpreted or otherwise construed in such a manner as would make such rule in conflict with any existing rule prescribed by the agency or by any other agency; and

"(4)(A) such final rule is not duplicative of any existing rule prescribed by the agency or any other agency; or

"(B) in any case in which such final rule is duplicative of any such existing rule, there is a need for such duplication.

In any case in which a final rule is duplicative of any existing rule, the statement required in this subsection shall include a description of such duplication, together with an explanation of the need for such duplication.

"§ 596. Implementation of rulemaking requirements

"(a) Each agency shall prescribe rules designed to carry out the requirements of this Act. Such rules are deemed to be within the exclusion specified in section 591(3)(A) of this title and shall not be subject to the requirements of this subchapter or of subchapter II of this chapter.

"(b) Each agency shall submit rules proposed to be prescribed under subsection (a) to the Interagency Review Committee not later than 180 days after the effective date of this subchapter.

"§ 597. Interagency review of proposed rules

"(a) There is hereby established an interagency committee to be known as the Interagency Review Committee.

"(b) The Committee shall—

"(1) review proposed rules submitted to the Committee by agencies in accordance with section 596(b) of this title;

"(2) determine the manner in which such proposed rules may be revised or otherwise adapted to ensure that agencies will carry out the requirements of this subchapter in a consistent manner; and

"(3) not later than 180 days after the end of the 180-day period specified in section 596(b) of this title, submit a report to each agency and to each House of the Congress which—

"(A) describes unresolved inconsistencies and other problems identified by the Committee during its review of proposed rules submitted to it under section 596(b) of this title;

"(B) includes recommendations of the Committee regarding the manner in which such inconsistencies and other problems may be addressed in order to ensure that agencies will carry out the requirements of this subchapter in a consistent manner; and

"(C) contains model rules developed by the Committee, based upon proposed rules submitted to the Committee, which are designed to demonstrate approaches which may be used by agencies in carrying out the requirements of this subchapter.

"(c)(1) Each agency which is required to prescribe rules under section 596(a) of this title shall appoint a supervisory employee of the agency to serve as a member of the Committee. Such appointments shall be made during the 180-day period specified in section 596(b) of this title. Members shall serve for the life of the Committee. Any vacancy in the Committee shall be filled in the same manner as the original appointment.

"(2)(A) Members of the Committee shall receive no additional pay on account of their service on the Committee.

"(B) While away from their homes or regular places of business in the performance of services for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed inter-

mittently in the Federal Government service are allowed expenses under section 5703 of this title.

"(3) For purposes of this subsection, the term 'supervisory employee' means—

"(A) an individual holding a position in an agency at GS–16, GS–17, or GS–18 of the General Schedule or at level I, II, III, IV, or V of the Executive Schedule or who is in a position at a comparable or higher level on any other Federal pay scale; and

"(B) an officer or employee of an agency who has primary responsibility for the prescription of rules under section 596(a) of this title.

"(d) The chairman of the Committee shall be elected by the members of the Committee.

"(e) The Director of the Office of Management and Budget shall be responsible for organizing the initial meeting of the Committee. After such initial meeting, the Committee shall meet at the call of the chairman or a majority of the members of the Committee.

"(f) Upon request of the Committee, the head of each agency may detail, on a reimbursable basis, any of the personnel of such agency to the Committee to assist it in carrying out its functions under this section.

"(g) The Administrator of General Services shall provide to the Committee on a reimbursable basis such administrative support services as the Committee may request.

"(h) The Committee shall cease to exist 60 days after submitting the report required in subsection (b)(3).

"§ 598. Agency review of rules

"(a) Each agency shall review each rule prescribed by such agency not later than 5 years after such rule is prescribed (and not later than the end of each 5-year period thereafter) in order to determine whether—

"(1) such rule continues to be necessary, taking into account technological and other developments, any changes in economic and other conditions, and any changes in the policies and priorities of the agency, which have occurred since such rule was initially prescribed;

"(2) such rule is carrying out the purposes it was designed to carry out at the time it was initially prescribed;

"(3) such rule is in conflict with, or is duplicative of, any existing rule prescribed by the agency or any other agency;

"(4) the language of such rule should be simplified or clarified; and

"(5) such rule should be amended or repealed.

"(b) Each agency shall, not later than 5 years after the effective date of this subchapter, review each rule prescribed by such agency which is in effect on such date of enactment in order to make the determinations specified in subsection (a) with respect to each such rule.

"(c) Each agency, in making the determinations required in subsection (a) and subsection (b), shall take into account—

"(1) the number and nature of complaints, comments, and suggestions received by the agency with respect to the rule involved; and

"(2) the nature and extent of any burdens imposed by such rule upon persons required to comply with such rule, as compared to the effectiveness of such rule in achieving the purposes for which it was initially prescribed.

"(d) Each agency shall publish each determination required in this section, together with a summary of the reasons for such determination, in the Federal Register.

"§ 599. Establishment of regulatory priorities

"(a) Each agency shall, not later than 2 years after the effective date of this subchapter (and not later than the end of each 2-year period thereafter), publish in the Federal Register a listing of the regulatory priorities of the agency during the succeeding 2-year period.

"(b)(1) Each agency shall—

"(A) publish in the Federal Register, on a semiannual basis during each fiscal year, an agenda of rules which will be under development or review during such fiscal year; and

"(B) publish in the Federal Register, not later than 30 days before the beginning of each fiscal year, a schedule of the dates on which such agendas will be published during such fiscal year.

"(2) Each such agenda published by an agency shall—

"(A) contain a brief description of each rule listed in such agenda, together with a statement relating to the need, and the legal basis, for such rule; and

"(B) include a list of existing rules which are scheduled for review by the agency in accordance with section 10 during the period covered by such agenda.

"(3) No such agenda may be published in the Federal Register unless it is approved by the head of the agency involved before such publication.

"(4) Any listing of regulatory priorities or agenda of rules published by an agency under this subsection may be modified by such agency at any time. Notice of such modification shall be published in the Federal Register by the agency, together with an explanation of the reasons for the modification.

"§ 600. Judicial review

"(a) If any agency fails to comply with any procedural requirement established in this subchapter, then any person may file a petition for judicial review in an appropriate circuit court of the United States not later than 60 days after such failure to comply.

"(b) Upon the filing of a petition under subsection (a), the court shall have jurisdiction to review the action of the agency involved, and if the court finds that the agency has failed to comply with any procedural requirement the court shall have authority to order the agency to suspend further rulemaking proceedings relating to the rule which is the subject of the petition until such agency is in compliance with the procedural requirements of this subchapter.

"(c) The judgment of the court in any action brought under this section shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification, as provided in section 1254 of title 28.".

(b) The analysis for chapter 5 of title 5, United States Code, is amended by adding at the end thereof the following:

"SUBCHAPTER IV—AGENCY RULEMAKING REQUIREMENTS

"591. Definitions.
"592. Requirements applicable to proposed rules.
"593. Statement relating to need for proposed rules and analysis of alternatives.
"594. Economic impact analysis.
"595. Requirements applicable to final rules.
"596. Implementation of rulemaking requirements.
"597. Interagency review of proposed rules.
"598. Agency review of rules.
"599. Establishment of regulatory priorities.
"600. Judicial review.".

CONFORMING AMENDMENTS

SEC. 4. Section 553(b) of title 5, United States Code, is amended—

(1) in paragraph (2) thereof, by striking out "and" at the end thereof;

(2) in paragraph (3) thereof, by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) the statements required in section 593 of this title.".

EFFECTIVE DATES

SEC. 5. The amendments made by this Act shall apply to proposed rulemakings which commence after the 18-month period beginning on the date of the enactment of this Act. Section 598(b) of tile 5, United States Code, as added by this Act, shall take effect on the date of the enactment of this Act.●

REAL ECONOMIC GROWTH IS CRUCIAL TO STRENGTHENING OUR SOCIAL SECURITY SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

● Mr. KEMP. Mr. Speaker, the strength, the stability, of the social security system is a responsibility which weighs heavily on my shoulders. There are millions of people in this country who are dependent, some almost solely, on the social security system.

The question is: How can we strengthen the social security system, assuring an adequate funding of it, without increasing the burden on the workers and producers who share the paying of social security taxes?

There is an answer: It is the adoption of economic growth policies which will foster the total expansion in the economy required to generate adequate social security tax revenues without increasing their rates on either business or the workers.

Let me explain in more detail.

MORE TOTAL GROWTH MEANS GREATER GAINS FOR ALL PERSONS

The United States is about to experience its first year of a $2 trillion GNP. But it could have been $3 trillion.

How? Since 1950, the average annual growth of the U.S. economy in real terms has been 3.7 percent. Many other major industrialized countries have grown steadily at rates well in excess of 5 percent. If the United States had grown an average 1.5 percent faster each year since 1950, at a rate of 5.2 percent, its GNP would now be $3 trillion.

With that $3 trillion economy, incomes would be 50 percent higher than they are now. Jobs would be plentiful. Federal revenues this year would be $200 billion higher, enough to provide for funding of social security needs, a balanced budget, welfare reform, national health insurance, and unqustioned military preeminence, with enough left over to let us reduce payroll and income taxes instead of raising them. Of course, price stability—little or no monetary inflation—would have been another spinoff of the growth of real output and the balanced budget.

I do not mean to cry over spilt milk. My purpose is to illustrate the power of compound interest, and the benefits to be had from faster economic growth.

Faster growth, higher incomes, and plentiful jobs are exactly what the unemployed, the underprivileged, and the minorities of this country have been seeking for many years. It is no accident that the greatest gains in income jobs, and dignity for minority workers have come during periods of rapid economic expansion. The NAACP issued a clear call

earlier this year for a return to rapid economic growth and the creation of real jobs in the private sector. Bitter experience, dead-end public jobs programs has convinced many black leaders that young people need the skills which can be learned and benefits which can be earned in the production of goods and services.

THE SOCIAL SECURITY TAX INCREASE

The social security tax increases enacted this year have drawn sharp criticism even though they have not yet gone into effect. In fact, these tax increases are but the tip of the iceberg, unless there is adequate growth.

Benefits currently promised will require increases in social security taxes by 50 percent, from 12 percent of payroll to 18 percent of payroll, over the next 70 years, if real wages grow only as rapidly as the Social Security Administration predicts—1.75 to 2 percent a year. It is assumed by a growing number that the next generation will be unwilling to pay such taxes, either in the form of payroll taxes or sharply higher income taxes.

Recent polls show a decline in public support for the social security system. For these reasons, some have suggested reducing benefits or raising the retirement age to 68 for workers just entering the system. But these suggestions assume that nothing can be done to get income to raise more rapidly than the Social Security Administration anticipates. Yet if wages can be encouraged to grow, social security revenues will rise without a tax rate increase.

I believe that it is far better to increase real wages by 50 percent more than the social security planners predict, than to impose a 50-percent increase in the tax rate on currently expected real income. An increase in the annual U.S. growth rate by only 0.6 percent would produce such a wage increase within the 70-year planning period. To do this, we must bring about the needed increase in the rate of economic growth.

THE RELATIONSHIP BETWEEN SAVINGS AND GROWTH

Anyone hoping for more rapid economic growth must be concerned with savings. Only that part of national income which goes into savings is available to cover investment and the Government deficit. Paul A. Samuelson, the Nobel-laureate economist at Massachusetts Institute of Technology, has observed that "to the extent that people are willing to save—to abstain from present consumption and wait for future consumption—to that extent society can devote resources to new capital formation."

Once the Government chooses a deficit, the only way to get more investment without expanding our foreign debt is to raise savings. The ratio of investment to GNP basically determines the country's growth rate. Only by increasing savings can the real growth rate be raised. This is especially true in the face of a massive diversion of investment to nongrowth uses.

The Government could try to help growth by reducing Government spending to lower the deficit. However, a tax increase to reduce the deficit would reduce saving by reducing the after-tax return to saving and therefore would be counterproductive.

What then should be done?

One way of encouraging saving is to lower personal income tax rates across the board. This would allow every taxpayer to keep a higher percentage of the additional interest or dividends earned from additional saving, and, thus, would make saving more attractive.

Another approach would be to tax income only when it is spent, thereby not taxing net savings. A tax deduction for savings would be created. Any additions to savings accounts, checking accounts, stocks, and bonds over the year would be deducted from taxable income.

Other nations have out-saved and outgrown the United States by wide margins over the years.

American willingness to save is low, as this chart shows, and it has been diminishing. Meanwhile, saving rates abroad have risen. The following table traces these diverse trends over the last decade. In the six major industrial countries, it pinpoints consumer saving, as a percentage of consumer disposable, or after-tax, income.

Rate of saving

[In percent]

	1977	1967
United States	5.1	7.5
Canada	9.8	6.2
Britain	13.9	8.5
West Germany	14.0	11.3
France	16.1	15.9
Japan	21.5	18.5

THE EFFECT OF TAXES UPON GROWTH

One reason we do not save enough is our high tax rate structure. Tax rates are too high, and are getting higher as inflation pushes people into higher brackets. It is marginal income, the last few hundred dollars of the taxpayer's earnings, which falls into higher brackets and is taxed at a higher rate. The Government takes a larger slice out of the last few hundred dollars of each person's wages, profits, interest, and dividends, and lowers a taxpayer's interest in earning more money or adding to savings. Inflation is producing real tax increases of $7 to $9 billion per year on individuals. Millions of workers have seen their incomes taxed in higher and higher brackets.

These changes in marginal tax rates affect behavior. At the margin, leisure might be substituted for labor, because the reward to labor has fallen. Consumption could tend to replace saving and investment because the reward to saving and investment falls. These shifts in behavior cause real GNP, saving investment, and job creation to drop. This is one of the reasons for the severity of the 1974–1975 recession.

In the long run, inflation has another effect, a subtle but devastating influence on saving. Inflation acts through the tax system both to reduce personal saving, and to misdirect what saving is done into inefficient, even unprofitable investments, thereby reducing economic growth.

It begins to pay a taxpayer to look into the use of tax shelters when his income rises to the point where it is being taxed at marginal rates a bit in excess of 30 percent—$18,000 for a single taxpayer, $25,000 for those filing jointly). The number of taxpayers in those brackets has risen dramatically in the last 12 years. In 1965, less than 2 percent of taxable returns reached brackets above 30 percent. This year, the figure is nearly 10 percent. Taxpayers in these brackets have income roughly three times the median income. Thus, the percent of total personal saving which potentially could be lured into tax shelters has risen from perhaps 10 percent to about 30 percent since 1965. The middle class is being pushed into shelters in a big way.

At the present time, less than $3 billion is collected in tax revenues on existing taxable income by having marginal tax rates in excess of 50 percent. Much of the potentially taxable income in these brackets has been sheltered or simply not earned. To increase the taxes on this income group will only result in a lower tax take, as more of their income would be shifted to nontaxable forms of income.

The amount of income actually being directed into certain types of tax shelters has risen several hundred percent in the last few years. Many brokerage houses are finding it harder to interest customers in common stock, while finding it very difficult to keep up with the demand for tax exempt bonds and tax exempt mutual funds and unit trusts.

It is very likely that marginal tax rates have risen to the point where they are causing a substantial reduction in this country's growth rate. There is even a reasonable possibility that marginal tax rates are so high that they have actually reduced Federal revenue at least in some brackets.

INFLATION DEPRESSES THE GROWTH IN WAGES

Inflation depresses the growth of business activity, job formation, and wages by interfering dramatically with depreciation. The Tax Code only permits a tax deduction of the historical cost of plant and equipment. When inflation increases the cost of new plant and equipment, the firm finds that the money it has set aside for replacement is inadequate. It must use taxable income to supplement its depreciation allowances just to maintain its productive capacity—just to stand still. Thus, actual economic depreciation is understated, and real corporate profits are overstated. Inflation "disallows" the deduction of a real cost of doing business, increases the firm's tax liability, and reduces its ability to grow.

In some industries, real economic profits, after taxes, inflation, and real depreciation, are less than zero. The tax collector is eating into assets, and the industry is shrinking. Treasury Secretary Blumenthal has been quoted as saying, "I can't explain the stock market. I didn't understand the market when I was in business, and I don't understand it now." I am not surprised to hear that the Secretary of the Treasury does not understand the stock market. Yet, there is nothing mysterious about the behav-

ior of the stock market. The broadly based Standard and Poor's 500 index, expressed in real dollars, shows that stock prices have been accurately matching changes in real economic profits for years. After-tax real economic profits are less than they were in 1967.

THE ADMINISTRATION PACKAGE

What does the President propose to do in the face of all these problems?

First, he proposes to make the savings crisis worse by switching from a personal exemption to a tax credit, transferring money from people who tend to save to people who tend to spend.

Second, he reduced the size of the tax cut, letting people slide into higher tax brackets, and transferring even more money to the pro-spending, antisaving Government. Even under the original package, families earning more than $17,000 would face real tax increases by 1979 because of inflation, social security tax increases, and the switch to the tax credit. It will be worse now.

Third, he does nothing to end the double taxation of dividends, or index the tax code, or eliminate under-depreciation.

In short, the President is content to close the deficit by raising taxes instead of curbing spending. He has shown little concept of the link between saving and investment, or inflation and saving, or growth and social security.

If we want growth, we have to increase saving, whether it is saving by individuals, or retained earnings of corporations.

Then we have to make it worthwhile for business to invest that saving to provide real output, jobs, and the productivity and capacity growth we will need to provide for ever larger numbers of retirees without breaking the system.

To that end, Republicans in Congress have proposed several policy changes.

First, roll back social security tax increases, funding medicare out of general revenue while giving the medicare taxes to the general retirement fund.

Second, get at the long-term problems of the social security system by adjusting replacement ratios—initial benefit levels as a percent of wages, age of retirement, or other factors. Offset the depressing effect on saving that the system has.

Third, cut marginal tax rates sharply across the board. This will help saving and social security too, and discourage the use of wasteful tax shelters (Roth-Kemp).

Fourth, index the new lower tax rates so inflation would not undo the tax cut.

Fifth, develop a savings tax deduction or savings promotion program to raise the U.S. savings rate to fund the investment we need for growth.

Sixth, cut corporate tax rates sharply.

Seventh, switch to replacement cost depreciation. Trade in loopholes if necessary to get these two corporate tax reductions. These are more valuable than anything else (Stockman).

Eighth, eliminate, lower, or at least index capital gains taxation (Steiger).

Ninth, end waste in Federal spending. Even if tax cuts produce only a 50-percent return in revenue reflows and savings, ending $60 billion in fat in the budget would pay for these tax cuts.

Last, address structural unemployment and end the waste in CETA by reviving the type of program used after World War II to put veterans into real training programs in private firms.

Mr. Speaker, strengthening the social security system will be a major focus of my activity in the 96th Congress. I will do everything I can to bring about the kind of changes in policy conducive to the growth this country truly needs.●

PUBLIC POLICY AND THE CHANGING STRUCTURE OF AMERICAN AGRICULTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GRASSLEY) is recognized for 15 minutes.

● Mr. GRASSLEY. Mr. Speaker, as many of my colleagues know, before being elected to serve in Congress I was actively engaged in farming. By the standards in Iowa my farm could definitely qualify as a "family farm." It would also qualify as a "family farm" under the U.S. Department of Agriculture's definition of a family farm.

Presently, I serve as ranking minority member of the Family Farms, Rural Development, and Special Studies Subcommittee of the House Agriculture Committee. In both capacities I have witnessed the many problems facing the family farms in America. In many instances I fear that their very existence is threatened and I think the statistics will show that my fears are valid. It is my strongly held conviction that it is in the best interest of our country that the institution of the family farmer be maintained. Family farmers are the very backbone of our country. They possess the many qualities which make our country great.

Recently, the Congressional Budget Office released a background paper entitled "Public Policy and the Changing Structure of American Agriculture." The report points out that in 1945 there were 5.9 million farms with a farm labor force of nearly 11 million. Today, there are 2.7 million farms of about 4 million workers. The report points out that although the structure of agriculture is determined by the interaction of several factors, public policy is one of the most important. When providing some insight as to what the future holds, the CBO report states that "the public policies now in place insure a continuation of the current trend toward fewer, larger, and more specialized farms; nevertheless, the majority would continue to be family owned and operated." Mr. Speaker, the Members of Congress must closely analyze what is happening in this country to family farmers and make some sound judgments which are in our best interest. This is important to our Nation and it is especially important to the family farmers.

Mr. Speaker, the issue to which I have spoken earlier is the effects of public policy on family farmers. Now I would like to direct my comments on another point. Has there been an effort by processors and/or marketers to gain control of the production of agricultural products with the ultimate goal of putting the small family farmer out of business? Some individuals would contend that this is the case and that this threat to the independent family farmer has been taking place through vertical integration.

Mr. Speaker, for the benefit of my colleagues, following my remarks appears a summary of the background paper "Public Policy and the Changing Structure of American Agriculture." In addition, following the summary in an article which appeared in the November 11, 1964 edition of the Rocky Mountain Journal with the headline "Chains Open Fire on Family Farms." I would like to point out to my colleagues that this article appeared nearly 14 years ago. In my opinion, considering what has happened over the past 15 or so years, this article takes on added importance.

Mr. Speaker, whether the pressures come from public policy or from the processors and/or marketers, it is a recognized fact that family farmers have come under much strain in the last two decades and it appears these pressures will continue. This is an issue which is very important to all Americans, and I can assure my colleagues that I will be working to bring to their attention and to the attention of the American people the necessity of a viable family farm system.

PUBLIC POLICY AND CHANGING STRUCTURE OF AMERICAN AGRICULTURE

The structure of American agriculture is changing. Farms are becoming fewer in number, larger in size, highly specialized in production, and more dependent on the nonfarm sector. Old patterns of resource ownership, financing, and decision making are breaking down. And today some farmers who invested in new equipment and land to meet expanding export demand in the early 1970s face financial hardship due to lower world grain prices and inflation-fed production costs. These changes in the structural organization and performance of the U.S. farm sector raise three questions of interest to public policymakers:

How and why is the structure of agriculture changing?

What difference does it make—and to whom?

Are the major changes in structure taking us where we want to go? If not, can public policy be used to do something about it?

THE CHANGING FARM SECTOR

In 1945, there were 5.9 million farms, and a farm labor force (farm operators, hired workers, and unpaid family workers) of nearly 11 million; today, there are 2.7 million farms and about 4 million workers. Such substantial resource adjustments in farming are not surprising, given the steady introduction of new technology—particularly, farm mechanization. Big machines, such as a 4-wheel drive tractor, encourage farm-size growth by allowing a single operator to farm many more acres per unit of time. In what is described as "economic cannibalism from within agriculture," small farms are being replaced by much larger farms using modern machines and production practices to achieve higher incomes and a rising standard of living. As a result, a typical modern farm may now require

sophisticated managerial skills and a capital investment of a half-million dollars or more.

The structure of agriculture is determined by the interaction of several factors, but public policy is one of the most important. Although nearly all public programs are enacted to help family owned and operated farms, benefits are generally distributed in direct proportion to their volume of output, leaving little doubt that public policy has discouraged small farms. Commodity programs, which have been used to support and stabilize farm prices and incomes since the 1930s, provide an excellent example of the way in which public policies have created greater concentration in farming. Expansion-oriented farmers have converted program benefits—reduced uncertainty, higher market prices, and government payments—into additional land, modern machines, and highly specialized production processes. Since the benefits of commodity programs have been capitalized into land values, the programs reward the role of landowner rather than the role of farm operator or farm worker.

Federal tax policy extends special treatment to individuals engaged in agricultural production; encourages the conversion of farm income into capital gain, which is taxable at a lower rate; and allows investment tax credits and accelerated depreciation. These provisions tend to attract additional capital into farming, encourage rapid mechanization, and yield absolute benefits in direct proportion to taxable income. Once again, the final outcome is a capital-intensive agriculture with high land prices and fewer farms.

The impact on farm structure of other public policies are best described as mixed. For example, government-subsidized agricultural credit assists young farmers and small-scale farmers who cannot obtain credit elsewhere, but it also increases the supply of credit, thereby promoting the expansion of existing farms. And while many aspects of agricultural research and extension are neutral with respect to farm size, relatively more attention has been directed to the production and marketing problems of large farms.

CONSEQUENCES OF STRUCTURAL CHANGE

Despite these structural changes, the U.S. farm sector is highly heterogeneous. Today, there are many sizes and types of farms and many different production practices and marketing arrangements; in addition, there are substantial variations in the level, source, and stability of farm family income.

In 1977, there were 162,000 farms with annual gross sales of $100,000 or more. These "large farms" accounted for only about 6 percent of all farms, though they contributed 53 percent of total cash receipts from farming that year. Their average income per farm, which includes all off-farm income of the farm operator and his family, was nearly $48,000; 80 percent of that income came from farming.

About 70 percent of all farms in 1977—nearly 2 million farms—had annual gross sales of less than $20,000. The "small farms" accounted for only 11 percent of all cash receipts from farming. Their average income per farm operator family was estimated to be more than $15,000, but 85 percent of that income came from off-farm sources. Although the incidence of poverty among farm families has dropped dramatically during the last few decades, between 15 and 20 percent of the small-farm population today falls below the official "poverty line."

Farms can be classified according to the degree of their differentiation between capital ownership, management, and labor as well as according to the amount of their annual sales. Although there is no universally accepted definition of a family owned and operated farm, for statistical purposes, a family farm is commonly defined as any farm that annually uses less than 1.5 man-years of hired labor and is not operated by a hired manager. On the basis of that definition, an estimated 90 percent of all farms today as family farms. These farms play a leading role in food and feed grain production, dairying, most livestock enterprises, tobacco, and most diversified farming. Family farms vary widely according to their cash receipts; but together they account for 60 percent of total cash receipts from farming.

The remaining farms in U.S. agriculture today can be classified as industrialized farms, that is, forms that use assembly-line production techniques and have highly differentiated capital ownership, management, and labor; or larger-than-family farms—nonindustrialized farms that use more than 1.5 man-years of hired labor. Only 2 percent or less of all farms today are industrialized, but they account for from 15 to 20 percent of all cash receipts from farming. These farms are most often found in broiler chickens, sugar cane, citrus fruits, seed production, some processing fruits and vegetables, and cattle feeding. Larger-than-family farms (4 to 8 percent of all farms) contribute 20 to 25 percent of total cash receipts. These farms produce many kinds of agricultural commodities and they are most prevalent in the West and South, which have historically had larger than average farms.

As farms today are becoming more highly mechanized, specialized, and closely tied to the nonfarm sector, farmers compete vigorously for the limited amount of available farmland. The price of land is therefore rising, leaving established farm owners in a strong equity position, which they often use to finance newer machinery and to expand their land base. Some probable consequences of this ongoing process are:

Increasing reliance on production and marketing practices that requires large-scale and specialized farm operations;

Higher capital requirements for farming, making it difficult for young people to enter farming and creating cash flow problems for heavily indebted farmers when commodity prices fall;

Increasing displacement of farm operators and farmworkers who would prefer to remain in farming or who are not prepared for nonfarm employment;

Fewer farm families and workers to patronize businesses in rural communities, resulting in contraction of the local labor force, fewer public services, and reduced participation in social and civic organizations.

These steadily rising land prices, and favorable tax treatment, attract individuals and businesses to farmland as an investment opportunity and hedge against inflation rather than as a primary means of income. Pressure to separate land ownership from farming therefore mounts, and farmers may ultimately be outbid in the land market.

ALTERNATIVE FUTURE STRUCTURES

The public policies now in place ensure a continuation of the current trend toward fewer, larger and more specialized farms; nevertheless, the majority would continue to be family owned and operated. If current policies are pursued, there will be about 1.6 million farms in 2000, with returns to individual farmers varying greatly according to farm size and other farm resources. If policymakers desire, specific changes in public policies—for example, targeting the benefits of commodity programs to smaller, diversified farms—could decelerate the current structural trend and increase the number of farms, by .3 to .4 million, to 1.9 or 2.0 million in 2000. Alternatively, public policies could be used to reduce the production costs of large farms and encourage closer coordination with the nonfarm sector through contracting and direct ownership. These strategies would accelerate the current trend and would probably further decrease the number of farms, by .6 to .7 million, to 0.9 to 1.0 million in 2000.

Accelerating the current trend would primarily benefit the consumers and relatively few owners of the largest farms. Lower production costs and fewer farms might increase average net farm income by 25 percent and decrease retail food prices by 3 to 5 percent, as compared with continuing the current trend. This relative decline in retail food prices is based on the assumption that efficiencies gained from accelerating the current trend would be reflected forward to consumers. Under any alternative farm structure, retail food prices are expected to rise in future years, primarily because of increased processing and marketing services and higher wages.

Accelerating the current trend would, however, impose major costs on rural communities: total cash receipts to the farm sector would fall, farm employment would decline, and local economic activity would contract. Thus, though society would gain an efficiency-oriented farm sector under this option, farm income would be skewed in favor of a few large farms, rural communities would suffer, and the decrease in the number of farms would increase the possibility of interruptions in food supply.

Slowing down the current trend toward larger and fewer farms would stimulate income generation in local economies and rural communities, but this option would also lower average net farm income and raise food prices. As compared with continuing the current trend, the higher total cash receipts and higher employment in the farm sector under this option might cause secondary income generation to rise 15 percent, average net farm income might fall as much as 20 percent, and retail food prices might rise 3 percent. Federal budget costs would also increase, because decelerating the currrent structural trend would require more government support of farm incomes and rural industrialization. However, if continuing or accelerating the current trend led to substantial increases in federal spending in order to assist people displaced from farming, this difference could be reversed.

In short, in percentage terms, food price differences under the three alternatives considered here—continuing, decelerating, or accelerating the current trend toward larger and more specialized farms—appear modest, as compared with the trade-offs involved in total cash receipts to farming, the level and distribution of net farm income, and the viability of rural communities. Thus, the highly publicized conflict between farmers and consumers—higher commodity prices versus lower retail food prices—may not be a primary consideration in decisions concerning the future structure of agriculture.

[Rocky Mountain Journal, Nov. 11, 1964]

CHAINS OPEN FIRE ON FAMILY FARMS

(By Gene Cervi)

Abolition of the family farm was called for at the annual meeting of the National Association of Food Chains in Chicago in October by the organization's principal spokesman.

Never before has such open warfare been declared on a traditional segment of American society.

It is known, however, that since the end of World War II, the supermarkets have been in the steady process of vertically integrating small farmers and ranchers out of existence as farms got bigger and the farm folk sold the furniture and moved to town to work in mill and factory.

Clarence G. Adamy, executive vice president of the national chain store group, said flatly, in his October speech, "I do not believe this (the idea that agriculture is the province of family farmers) to be a sensible goal for mid-twentieth century American farm policy.

"Not only that, but I am opposed to the maintenance of the family farm," Adamy said in calling for a counter-attack on farm organizations fighting to get a fair share of the food dollar for the man who produces it.

A large part of the October meeting of chain stores was taken up with means and methods of countering, if not subverting, the investigations soon to be launched by the joint presidential-congressional National Commission on Food Marketing.

Speaker after speaker raised warning signals of unconscionable evidence that could come to light if the National Commission is diligent in examining supermarkets buying practices that by their nature and trend bring charges of illegal price-fixing and restraint of competition.

Inescapable facts and questions in the national food economy confronting the Commission are:

1. The cattle producers of America lost more than $2,500,000,000 in 1963. The question: Who got that money, since it didn't go to the consumer in the form of lower prices and it didn't go to labor in view of growing automation?

2. Since the end of World War II, beef prices at retail have increased 26 per cent, according to the Department of Agriculture, and prices paid to beef producers declined a minimum of 16 per cent.

3. Why was it possible for chains to make a profit seven years ago when there was a shortage and no imports of beef, when prices at retail were lower than they are today, and beef producers were getting 25 per cent more than they are today?

4. If there is a surplus of beef, as the chains contend and the producers deny, why doesn't the natural law of supply and demand operate to bring down the prices at retail?

5. Why did credit for small farm and ranch operations dry up progressively in the last 20 months until today only the largest commercial feed lots and the largest ranchers are conditioned to stay in business?

These are but a few of the matters that will be brought before the Commission. The chain stores are worried because they'll not look good when their practices and methods of squeezing producers come to light.

It is the strategy of the supermarkets to appeal to Congress through the customers they (the chains), currently are brainwashing.

The chains and the largest food processors are engaged in a gigantic saturation advertising campaign to convince the consumer that she never had it so good, and every possible effort is being exerted to hide the fact that thousands of farmers and ranchers are going broke.

Meanwhile, farm organizations are not idle in the face of Adamy's determination to wipe out their members.

Tipoff to the fact that the chains control food prices and have repealed the law of supply and demand was seen last month in the Ohio Farm Bureau demand that its parent organization, the American Farm Bureau, undertake to buy one of the largest chain stores. It is believed the organization has its eye on the management-plagued Atlantic & Pacific organization.

In St. Paul recently, The Minnesota Farmers Union passed resolutions barring food chains, packers and processors from operating farms, feedlots, egg factories or cow-pools.

Chain store spokesmen are so frightened that some of them see price controls in some form coming. They also hint at revolutionary measures to make all large chains utilities and have their rates of return fixed as in the current manner of private power utilities.

This type of hysteria among chain store spokesman can be attributed to severe cases of bad conscience.

After all, the 1963 question won't go away: Who DID get that $2.5 billion that the beef producers lost in one year? ●

THE CONTINUING TRAGEDY OF OCCUPATIONAL HAZARDS AND DISEASE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, during the month of June, the Chicago Sun-Times printed a series of articles on the dangers of working in many, many industries across the country, and on the lack of enforcement of occupational safety and health laws by the States and the Federal Government. I have had a number of these articles reprinted in the October 2–5 editions of the CONGRESSIONAL RECORD, and another in this series follows. I strongly urge my colleagues in the Congress to give these articles their most profound attention and consideration because deadly threats to the health and well-being of millions of Americans continue to exist and grow in number. The article follows:

[From the Chicago Sun Times, June 22, 1978]

THE WORKING WOUNDED

(By Michael Flannery)

Joe Banvich was once a brawny Lithuanian—the kind of guy who could heft a 20-pound jackhammer for 16 hours a day and still have energy to pinch hit in a neighborhood softball game.

Today, at 56, Joseph J. Banvich is a gaunt and ghostly invalid whose chest heaves with the mere effort of speaking. Talking between gulps of air, he said:

"I'm so weak . . . I can't wash my own body. Sometimes I wash my face . . . but it leaves me gasping . . for breath."

In the summer of 1941, 19-year old Joe had hired on at the foundry of U.S. Steel Corp.'s South Works. He labored for the next three decades in a cloud of dust as a chipper, chipping stray lumps of iron and foundry sand from metal molds.

The dust—containing billions of deadly, microscopic silica particles—was so thick that at times he could see no farther than an inch or two in front of his face. Meanwhile, silica was destroying the delicate tissue of his lungs. By 1973, the breath-robbing disease silicosis was so advanced that he was forced into a disability retirement.

Even when he can summon the strength to walk, Banvich is unable to move more than a few feet from the oxygen tank next to his bed. He is tethered to the tank by a plastic tube inserted in his nose.

Were that flow of pure oxygen cut off, Banvich would die like a fish out of water—unable to survive in the air around him, only 21 per cent of which is oxygen.

His devoted wife, Josephine, began to cry as she greeted a visitor at the door of their bungalow at 8450 S. Colfax. "My Joe is dying. The doctors say all he's got is 24 per cent of his lung capacity left. They can't figure out why he's not dead," she said.

Dust conditions in the foundry have not improved all that much since the era when Banvich hired on to judge from the findings of the Occupational Safety and Health Administration. OSHA found respirable silica levels at South Works last fall as much as 21 times above the federal standard.

At least 30 of 68 foundry workers and pensioners examined in April by the National Institute of Occupational Safety and Health were found to have silicosis symptoms, reported John Chico, president of United Steelworkers Local 65. The 325 workers in the foundry are waiting for final results of those tests to be made public later this month.

U.S. Steel has declined to comment. But in the March 1 issue of Cornerstone, a South Works company newsletter, retiring plant Supt. Victor H. Lindberg gave his view:

"I take extreme exception to the recent grandstanding forays by the OSHA agency and its allegations about South Works in light of our excellent safety record. At the same time I take exception to the remarks of a few *jerks* [emphasis added] within our own plant family whose only apparent goal is divisiveness and ultimate shutdown of a facility or facilities."

"Isn't that nice?" asked Mrs. Banvich.

"We're jerks? We're trying to shut the plant down? I'd like to have Mr. Lindberg come to my house. I'd like all the bosses at U.S. Steel to look at my Joe. He used to be a big man, he was a powerful man. Now he's skin and bones."

Banvich, who is 6-foot-1, weighs less than 150 pounds. Before he became chronically short-winded, he carried better than 180 pounds on his frame.

None of the confirmed victims of the disease who are still working will talk to reporters. Lindberg's threat of a shutdown, which they said has been repeated by foremen, has them frightened. Above all, many are afraid that if the company learns of their silicosis it will transfer them out of the foundry into lesser-paying jobs.

"You have to realize one thing—these guys are making good money," said John J. Kelly, a millwright in the foundry and a one-time union grievanceman. "It's real steady work these days, with lots of overtime. Some of these guys are walking out of there with $1,000 or $1,100 every two weeks. They don't want to lose a job like that, even if it kills them.

"Most of these people don't have much education and all they know how to do is foundry work. It's not a skilled trade—it's muscle and brawn and a willingness to work. It doesn't take a lot of book learning to chip or cast metal or ram sand into a mold."

Kelly, 60, of 10042 S. Perry, cited the case of former chipper Tom Bryant, who disclosed last year that doctors at Cook County Hospital had diagnosed him as one of the silicosis victims.

Cook County Hospital's Dr. Bertram Carnow said several foundrymen have "some of the worse cases of silicosis I have ever seen. They have terribly marked impairment of the lungs—the X-rays are incredible."

Bryant refused to be interviewed, but it was learned that the day after he publicized his illness, U.S. Steel sent him to a company doctor who diagnosed "hypertension" and ordered him on sick leave. His earnings dropped from a minimum $410 a week to the $142 sickness and accident benefit. After six months on enforced sick leave, Bryant was allowed to return to work as a $250 a week laborer, picking up litter.

Said Kelly: "Everybody else hates to think they might go the way of Mr. Tom Bryant—to laborer status. He has been humiliated and a lot of guys are thinking he should have never opened his mouth."

The onset of silicosis has been enough to scare at least one man out of the foundry,

however. Robert L. Samuel, 48, of 6822 S. Indiana, was diagnosed at Cook County Hospital recently.

"There is no job in the world that is worth my life," he asserted. "The doctor doesn't want me working around no dust at all. I started in that plant in 1951. I've been losing my breath for years. But I just thought it was part of getting older."

Samuel noted that management has always made face masks available to foundry employes, but only in the recent past has it required they be worn. In any event, the current masks are useful only in atmospheres containing dust up to five times the standard; they are no protection when silica levels reach 21 times the limit, according to OSHA.

"Respirators haven't ever been any good," said Samuel. "The respirator doesn't fit real tight around your face and that silica dust—it's powdered real fine. It finds a way into your lungs. To keep that dust out of there, you have got to take the silica out of the air altogether. This is what the company doesn't want to do. It costs too much money."

OSHA fined U.S. Steel $21,100 for health hazards in the foundry (including silica and noise levels). It hit the nation's largest steelmaker with another $215,800 in penalties for safety violations in the foundry and elsewhere at South Works. U.S. Steel is contesting those citations, as well as two others against South Works involving fines of $1,000 each.

OSHA, in preparation for what could become an epic legal battle with U.S. Steel, has hired an outside consultant to tour the foundry and to prepare a report on how much it would cost to bring the facility into compliance. Agency spokesmen admit that the expense may be considerable.

Iron and steel foundries, which employ about 247,000 persons, are ranked sixth among hazardous manufacturing industries by the Bureau of Labor Statistics in a soon to be published survey.

Edward E. Sadlowski, a former president of Local 65 who is now a union subdistrict director on the South Side, said, "It's a very sorry fact that in this society a worker often must trade off his physical well-being to earn a livelihood. Every day, there are literally thousands of people who choose between providing food for their families and suffering a premature, painful death."

He said that workers would not have to make that trade-off if their earnings were protected in the event they contracted an occupational disease and were forced to take what would normally be a lesser-paying job.

During the last contract negotiations, the Steelworkers for the first time scored advances in that direction, and Lloyd McBride, the man who defeated Sadlowski for president of the international union, has pledged to continue the effort. With such protection, the union argues, fewer workers would avoid physical checkups for fear of revealing a disease that might cost them their jobs.

The penalties imposed on South Works are the largest in OSHA's history. The agency was angered by what it perceived was a lack of good faith on the company's part.

OSHA charged that the company failed to comply with regulations requiring that each occupational illness be reported in a log. A death from silicosis, for example, was not logged and when OSHA inquired about other cases it believes it was misled.

Banvich, for one, said U.S. Steel told inquiring OSHA compliance officers that he had not been forced to retire because of disability.

"I'm no doctor," Banvich said, "but I know there have been a lot of deaths in that foundry that looked just like silicosis to me. Too many guys—young guys—died." ●

TRIBUTE TO EIGHT RETIRING MEMBERS OF TEXAS STATE DELEGATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 60 minutes.)

Mr. BROOKS. Mr. Speaker, I have requested this special order to honor a very special group of colleagues who will not be serving in the House next year. There is no way to adequately pay tribute to this group who will long be remembered and appreciated. I doubt if ever before has Congress lost such leadership, accomplishments, and service at one time from a State's delegation. The individual achievements are too numerous and lengthy to describe. I am afraid that the House of Representatives is going to greatly suffer from their absence in service and the varied expertise that these Members offer. Their collective service totals 190 years and these colleagues I speak of are the eight retiring members of my own congressional delegation from the State of Texas.

GEORGE MAHON's retirement will be a great loss not only to the west Texas district which he has represented since 1934 when he was elected to the 74th Congress but to our entire country. He is current dean of the House as well as dean of the Texas delegation. He has certainly distinguished himself in the 44 years he has so ably served. He is one of the most knowledgable men in the country on our appropriation process and has held the important position of chairman of the House Committee on Appropriations for the past 14 years. He has always been mindful of a sound fiscal policy and has exerted strong leadership in our national defense posture. His leadership and experience will be sorely missed.

W. R. "BOB" POAGE was elected to Congress from Waco, Tex., in 1936 and is second in terms of service in the House. He has served our country well as chairman of the House Committee on Agriculture and is one of the most knowledgable men in the world today on agriculture problems. He has been a real innovator in farm policy which has had an impact worldwide. We are all grateful for the leadership and guidance he has provided. He has set a splendid example for the service that he has provided for constituents.

OLIN E. "TIGER" TEAGUE took his seat in the House of Representatives on August 24, 1946. He received some of the highest honors given for bravery in combat during World War II. He is responsible for most major legislation affecting our veterans. He served as chairman of the House Committee on Veterans Affairs from 1955 through 1972. He has played a leading role in the development of our science and space programs and has been chairman of the Science and Technology Committee since the 93d Congress. He served ably as chairman to the Democratic Caucus in the 92d and 93d Congresses.

OMAR BURLESON was elected to the 80th Congress in 1947. He has served on the House Committee on Ways and Means since 1968 and has played a major role in passage of tax legislation. Prior to that he served as chairman of the House Administration Committee. As evidence of the high regard his constituents hold for him is the fact that during his tenure he has seldom had opposition in his reelection bids.

JOHN YOUNG was elected to Congress in 1956 to the 85th Congress. He has served with distinction on the Rules Committee. He was a stalwart member of the Joint Committee on Atomic Energy. Congressman YOUNG has worked hard and courageously for his country in war and in Congress and served his constituents loyally and well.

BARBARA JORDAN was elected to the 93d Congress in 1972. During these 6 years she has established a national reputation. She came to Congress well prepared having served with distinction as the first black woman to serve in the Texas State Senate. She was the keynote speaker at the 1976 Democratic National Convention. Her work on the House Judiciary Committee has been an invaluable contribution to our Nation.

DALE MILFORD has served the metropolitan area between Dallas and Fort Worth since his election to the House in 1972. He has worked hard as a member of the Science and Technology Committee and on the Public Works and Transportation Committee.

ROBERT "BOB" KRUEGER has served in the House since his election to the 94th Congress in 1974, after a distinguished academic career. He has worked hard and earned an enviable reputation on the House Committee on Interstate and Foreign Commerce.

I am grateful for having had the opportunity to have worked with each of these Members. They have earned our respect and admiration. They represented our Nation and their districts well.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I appreciate the gentleman yielding and I join him in paying tribute to this special group of great Americans.

Mr. VAN DEERLIN. Mr. Speaker, I doubt that there has ever been a time that so many members of seniority and distinction have departed from a single State delegation in Congress. Names like MAHON, POAGUE, TEAGUE, and BURLESON all convey a sense of permanence; it seems almost inconceivable that they will not be called out by the House Clerk convening the 96th Congress.

The late President John Kennedy once referred to the Arkansas delegation of the early sixties as "pound for pound, the most influential in Congress." The same, surely, could be said of the present Texas delegation—with emphasis, naturally, on some of the giants now retiring.

I am indebted to many of them for personal kindnesses. And few of us, I think, will soon forget the graciousness displayed by BOB POAGE on the occasion of his replacement as chairman of the House Agriculture Committee. He revealed himself then to be a man as big as Texas itself.

● Mr. COLLINS of Texas. Mr. Speaker, those of us who believe the "least governed are the best governed" are going to miss OMAR BURLESON. OMAR is one of the last of the great conservatives of the South. In this liberal Congress where there is such a strong swing toward big spending, more Government regulation, and expanding bureaucracies, the folks in west Texas can always count on OMAR BURLESON to vote with commonsense. He is against big spending, and he still believes that the best government is the local government at home. OMAR is a man of few words and when he gave something, it really counts. His down-to-earth spirit and his bills and amendments with logic will be a big loss to us in Congress. There are not many people in Congress who stand up on the hard votes and vote for America the way the Constitution was written. OMAR BURLESON is one of the strong handful of men who follow the traditions of our Founding Fathers. He is a great frontiersman exemplifying the finest of the western spirit.●

● Mr. DERWINSKI. Mr. Speaker, this year we will see the departure of eight members of the Texas delegation who have made great contributions to their constituencies, the Congress, and their country. Each in their own capacity has had a positive impact on the programs of our Nation's fiscal policies, our international position, and on the preservation of our national resources and our national heritage.

During his 44 years of dedicated service, GEORGE MAHON made many invaluable contributions to the people of this Nation who are greatly indebted to this diligent and devoted Member of the House. His chairmanship of the important Appropriations Committee has been an example of fine leadership and an inspiration to all of us. GEORGE will be remembered as a man of great ability, a conscientious and highly capable legislator and truly one of the giants of the House of Representatives.

BOB POAGE has distinguished himself as a man of integrity and ability and has been a leader in the Congress and for the State of Texas. I have had the pleasure of working closely with BOB on a number of international conferences in which he was a most effective spokesman for our country. BOB has been a hard-working and dedicated Member, whose special interest in agricultural matters has made him a strong leader for improving the quality of life for the American farmer. It was a great loss for the country and for the Congress when BOB POAGE was denied the chairmanship of the Agriculture Committee during the 94th Congress. His good and balanced judgment deserves a sincere word of gratitude from those who have benefited from his outstanding record of service for 42 years. BOB is truly one of our great Members.

OLIN "TIGER" TEAGUE, whose outstanding war record has served as a great example to all of us, is a man of strong convictions who has consistently displayed the courage to put principle ahead of party. He is a deeply dedicated legislator who has compiled an enviable record of achievement on the national level, while at the same time caring for the needs of his own constituency and his State. He has earned much respect for his devotion to the cause of good government.

DALE MILFORD, whose career as a Member came to an earlier than intended retirement, is a productive, sound, energetic legislator who has always shown a high standard of public service. His great personal integrity and honesty will certainly be missed, but I am certain that he will continue to make a worthwhile contribution to his State and to his country.

We have been fortunate to have OMAR BURLESON as a colleague and to benefit from his extraordinary legislative skill. I have enjoyed serving with OMAR on the International Relations Committee, and found him to be a steadfast and effective member.

JOHN YOUNG's work on the House Rules Committee has been significant in shaping responsible legislation which is devoted to the preservation of our system of government. JOHN has proven that he is dedicated to the best interests of his constituents and of this Nation.

BARBARA JORDAN, who possesses one of the most outstanding legal minds in Congress, has gained the respect and admiration for her courage to speak and act on her convictions. As an eloquent spokesman for the cause of good government, she has executed her duties with great distinction.

I want to heartily congratulate all those retiring Members of the Texas delegation for their handling of the responsibilities of their congressional assignments with intelligence and insight. We have lost the services of these respected and dedicated public servants, but I wish to add my sincerest wishes to them and the members of their families for long and happy years in retirement. They will be missed but their deeds and accomplishments shall be testimony to their service.

The State of Texas, and our country are better for the service of these eight able legislators.●

● Mr. MONTGOMERY. Mr. Speaker, I would like to take this moment to recognize one of the House of Representative's most respected colleagues, the gentlewoman from Texas, BARBARA JORDAN.

I feel it a great privilege to have had the opportunity to work with BARBARA JORDAN, a Member who is not only admired by her fellow Congressmen, but is also held in high regard by so many Americans.

It is her strong sense of integrity that I have been most impressed with. This quality has given her the insight to deal directly with the numerous sensitive pieces of legislation that have crossed her desk.

I appreciate the forthrightness and fairness that she has always shown me during her years as a Representative, and I regret that we will be losing such a respected Member from this legislative body.●

● Mr. MONTGOMERY. Mr. Speaker, one of my deepest personal regrets as we approach the end of the 95th Congress is that we are also seeing the end of 34 years of meritorious service by the gentleman from Texas, OLIN E. TEAGUE.

Of course, when you say OLIN TEAGUE people do not always know about whom you are speaking because he was always known as TIGER, which, I might add, was a most appropriate name. I say appropriate because Chairman TEAGUE would fight like a tiger, if it was necessary, to improve the lot of our Nation's veterans.

The veterans of this Nation have never had a better friend in the Congress or anywhere in the Government than TIGER TEAGUE. He was their champion at all times and in all places.

Mr. Speaker, I would also emphasize that TIGER TEAGUE has never shown any partiality to any one group of veterans. He has always dealt fairly with all veterans whether they served in World War I, World War II, Korea or Vietnam. To him a veteran was a veteran who deserved the tribute and thanks of a grateful nation for his or her many sacrifices.

I consider it a privilege to have served under TIGER TEAGUE when he was chairman of the House Veterans' Affairs Committee and appreciate the fairness with which he always treated other committee members. He always provided an opportunity for all Members to contribute to the work of the committee.

We shall miss TIGER TEAGUE but we can be thankful that he leaves as his legacy a sound foundation of veterans programs on which future Congresses can build.●

● Mr. MONTGOMERY. Mr. Speaker, I join with my many colleagues today to pay tribute to the many contributions BOB POAGE has made to this body over the last 42 years.

Chairman POAGE was the first chairman under whom I served when first elected in 1967. I shall always remember his kindness to me and his fairness in dealing with new members of the House Agriculture Committee.

Mr. Speaker, I also appreciate the staunch friend farmers of America had in BOB POAGE. Coming from a basically rural district, I can assure you that BOB POAGE has benefited the people of Mississippi's Third District through the beneficial legislation he has steered to passage.

Agricultural legislation is probably the most complicated to be considered by the Congress. It must always be finely tuned in order to assure a plentiful production at a realistic selling price to the farmer and a realistic cost to the consumer. This is never an easy task, but one which BOB POAGE has wrestled with quite successfully over the years. I believe his deep understanding of agricultural problems has benefited the Nation's farmers and consumers.

His retirement will leave a void in this body which will be difficult to fill, but we can all be thankful for our association with BOB POAGE over the years and the many contributions he has made to agriculture.●

● Mr. MONTGOMERY. Mr. Speaker, I appreciate the gentleman yielding and commend him for giving Members an opportunity to expound upon the many and outstanding contributions made by the Dean of the House during his 44 years of service.

There is so much to be said about GEORGE MAHON that one hardly knows where to begin. He is a man who has never sought the limelight, although he most certainly deserved it. He has always gone about his business in a quiet and methodical way to insure success in his every endeavor.

Mr. Speaker, one reason I so much regret Chairman MAHON's retirement is that this body will be losing a strong voice for fiscal responsibility. He has always preached the lesson of fiscal restraint and warned us of the evils of large Federal deficits. I appreciate the fact that Mr. MAHON has always tried to hold Federal spending down in order to reduce inflationary pressures.

One of my closest associations with Chairman MAHON has been through the congressional prayer breakfast group. He has been an inspiration to those of us who gather each Thursday morning and I can assure you that his presence will be missed. His religious convictions and spiritual guidance was helpful to all.

I join with my colleagues in wishing Chairman MAHON a fond farewell and wish for him the best in the years to come. We will miss you in body, but you shall always be with us in spirit.●

● Mr. MONTGOMERY. Mr. Speaker, I sincerely regret we will be losing the services of the gentleman from Texas at the end of this Congress. OMAR BURLESON has been a perfect example of the type of dedicated public official the people of America need. His 32 years of service have been marked by many outstanding contributions to this body and to our Nation.

He has been a strong voice on the Ways and Means Committee for a responsible tax policy in America. He has continually sought to ease the tax burden on individual Americans and small businesses. At the same time, his votes on the Budget Committee have indicated his desire for more restrained Federal spending in order to make it possible to provide meaningful tax reduction.

For the last 4 years I have had the privilege of having my office located almost across the hall from OMAR. Hearing comments made by many of his constituents as they leave his office leave no doubt that he is well respected in his congressional district and the State of Texas.

We shall all miss our colleague's sage advice and wise counsel in the years ahead, but at the same time we can feel fortunate that we were able to profit from his guidance during the time he served as our colleague.●

● Mr. MONTGOMERY. Mr. Speaker, in the brief time available to us today, it is difficult to fully explore the long and outstanding career of JOHN YOUNG. For the last 22 years we have been privileged to have him as a colleague in this body and prior to that he served with distinction on the local level as county attorney and county judge.

Of course, we are most familiar with his service here in the House and more particularly his membership on the Rules Committee. I shall always appreciate the courtesy and fairness JOHN YOUNG showed Members when they appeared before the Rules Committee. I have only had to appear a few times myself before the Rules Committee, but I am particularly grateful for the kindness which he showed me when I did appear.

We appreciate the 14th District of Texas for sharing JOHN YOUNG with us and giving this body and this Nation the benefit of his hard work and dedication.●

● Mr. COLLINS of Texas. Mr. Speaker, BARBARA JORDAN is an outstanding personality. I am proud that she is from Texas. Today we hear so much discussion about the need to help this person move forward or the need to help that person. Many friends have helped BARBARA JORDAN, but the reason you help BARBARA is because her magnetism does so much to enrich your own life. She has so much ability with her dynamic character.

I once asked BARBARA where she got her drive and her intellectual ambitions. She told me about her father whom she loved so dearly. Her dad not only worked at a full job in a warehouse but he also carried another job so that he could put his children through college. She said her dad's encouragement and pride gave her the strong motivation to study longer, work harder, and to always do her best.

When BARBARA JORDAN says something, folks stop and listen. She has the vocabulary of Webster, the diction of a Shakespeare scholar, and the sincerity of an evangelist Baptist preacher. BARBARA JORDAN is a warm, sincere, and lovable person. I am thrilled to see her going on to her new challenge at the University. I am even more thrilled to see her serve on so many of the great boards of directors for major national companies.

Sometimes they say that people are chosen because they are women. Sometimes they say that people are chosen because they are black. But I can tell you for sure, anybody that chooses BARBARA JORDAN for any responsibility, any elective office, or for any leadership position chose her because BARBARA JORDAN is the best.●

● Mr. RODINO. Mr. Speaker, in 1974, a black lawyer from Houston, Tex., addressed the Nation at a time of great constitutional trauma. She began by referring to the Preamble of the Constitution itself: "We, the people."

She went on:

> It is a very eloquent beginning. But when that document was compiled on the 17th of September in 1787 I was not included in that "We, the people". I felt somehow that George Washington and Alexander Hamilton just left me out by mistake. But through the process of amendment, interpretation, and court decision I have finally been included in "We, the people".

Mr. Speaker, no one who has served in this House in recent Congresses can say that he or she has not been touched by the enormous talents and the special grace of BARBARA JORDAN.

That it took so long for BARBARA JORDAN to be included in "We, the people" is a measure of our loss as a Nation.

That the day has come at least when we can draw upon such a rare public resource is a measure of our hope for the future.

We are saddened that BARBARA has chosen to leave the House at this stage of her public career. But we are the richer for her 6 years with us, and we know she will be a leading American figure for years into the future.

A personal note, if I might: BARBARA JORDAN brought a special flavor to the work of the Committee on the Judiciary. She represented all that was best about the committee, all that was constructive and unique about the House as a legislative body. She had a genius for the way this place worked and the way it was supposed to work. She took pride in the House of Representatives as an institution and I personally will feel the loss of her talents.

She could make a committee chairman look awfully good.●

● Mr. COLLINS of Texas. Mr. Speaker, all of us know GEORGE MAHON as the Dean of the House. But those of us who have known him as our neighbor from Texas know him as one of the finest gentlemen that ever served in Congress. Many times I visited out in west Texas from Lubbock to Midland and Odessa. Naturally, you would expect the Democrats to all say good things about him. But what warms your heart is to hear the deep admiration and respect that all of the Republicans in west Texas have for GEORGE MAHON.

It is not only that he is a hard worker who understands their problems, what they appreciate most is his warm and sincere personality. With all of his prominence as chairman of the Appropriations Committee, I never knew a friendlier chairman or a man with more humility.

And everyday I learned something new from him. The others would ride the escalators, but it was GEORGE who would run up the stairs beside them. As he reminded me, you get more exercise by running up steps than you do by riding up the escalator. That was GEORGE MAHON who we will always remember as the great chairman who was always on the move.●

● Mr. LONG of Louisiana. Mr. Speaker, my good friend and distinguished col-

league, the Honorable JOHN YOUNG, will be retiring from service in the House of Representatives following the adjournment of this Congress.

Congressman YOUNG has ably served both his district and the Nation for 22 years. As the interests of the 14th Congressional District are extremely diverse, I must compliment the gentleman on his ability to so often strike that delicate balance between the special needs of his district. JOHN YOUNG met the challenge of serving the varied, often opposing interests of his constituency with energy and enthusiasm.

As a fellow member of the Committee on Rules, I have developed an admiration for Mr. YOUNG's diligence and sound judgment. A major critic of the categorization of political stances as "conservative" or "liberal," JOHN YOUNG has consistently based his decisions on the merits of an issue, and has demonstrated great courage in adhering to what he believes is in our Nation's best interest.

JOHN and I both represent oil and gas producing States, and because of our interest in energy matters, we have often worked together in an effort to educate Members who have not had as much contact with the energy community. Congressman YOUNG is a persuasive, well informed spokesman on the issues, and I have benefited from the many occasions I have worked with him.

JOHN YOUNG has been a true friend to me, always at hand when he is needed, and I shall certainly miss him in the upcoming Congress. I consider myself very fortunate to have had the privilege of serving with the distinguished Representative from Texas.●

● Mr. TEAGUE. Mr. Speaker, as you know, I am one of a group voluntarily retiring from the Congress of the United States at the end of this term. After 32 years in the House, this action is a bitter-sweet experience. I have been very happy here. For 32 years this sphere of activity has been my career and the House has been my home. It is a deep emotional wrench to have to leave so many happy memories behind. However, there are also great consolations and the greatest of these is that I am "graduating" with the most distinguished group of Members of Congress ever to serve in this body. Over a half-hundred Members are retiring this year. It may not be a record, but it is very much a statistic as far as talent, integrity, dedication, and human decency are concerned. I cannot presume upon the patience of this body to recognize publicly by name and career all of my close friends and retiring colleagues, but would like to single out those within the Texas delegation who are retiring with me.

One-fourth of our State delegation is leaving this year. This means that Texas and the Nation will lose some 150 years of leadership, know-how and accumulated congressional influence at one time. The Congress will be losing, quite frankly, a memory bank and irreplaceable expertise with this exodus. Without saying, first recognition must be the Honorable GEORGE MAHON, 19th District of Texas and chairman of the House Committee on Appropriations, with 44 years of continuous service in this body. His name will stand alone on any distinguished service list and the Nation will be impoverished by his retirement.

My old friend and contemporary, the Honorable OMAR BURLESON of Anson, Tex., 17th Congressional District who came to the Congress shortly after me will also be retiring. We learned the ropes together; we have been exceptionally close friends. What more can I say about an individual who has been in my opinion one of the most effective Members of this body; one who is totally incapable of committing a dishonorable act of any sort and one who has served both his country and constituency with distinction.

And, Mr. Speaker, will the country ever have or see another individual so totally dedicated to the agricultural problems of this Nation than the Honorable W. R. "BOB" POAGE of the 11th District of Texas. I know of no man who knows more about agricultural legislation and agricultural problems than BOB POAGE. He is my next door neighbor in Texas, our districts adjoining one another and I learned much from him when I joined this body. After all he came to Congress in 1936 and has served with distinction for 42 years. He will be almost impossible to replace.

Next in this distinguished list of individuals is the Honorable JOHN YOUNG of Corpus Christi, representing the 14th Congressional District of Texas. Elected to this body 21 years ago, he has been an outstanding Member exemplifying the characteristics of those Members who have represented his district before him. He has served with distinction on one of the most important committees in the Congress, the House Committee on Rules and like the others his presence will be sorely missed.

BARBARA JORDAN, the brilliant Congressperson from Houston has been with us only 6 short years; but in that time she has made an enormous impression on everyone with whom she has dealt. She brought a heritage of courage and integrity to this House which will be sadly missed next year.

DALE MILFORD, who has represented a neighboring district and who has served on my Committee on Science and Technology and chaired the Subcommittee on Aviation and Transportation Research, doing an outstanding job for the country and his constituency. His presence will be sorely missed in the next Congress.

And finally, a word of recognition and appreciation to one of the younger Members of our delegation, the Honorable BOB KRUEGER, a completely educated Member with degrees from Southern Methodist, Duke, and Oxford. He is not retiring really, in the usual sense, but merely abandoning his seat to run for the Senate. Whether he is successful or not, this body will miss him.●

● Mr. COLLINS of Texas. Mr. Speaker, we are going to miss JOHN YOUNG on the Rules Committee of Congress. It is the quiet Congressmen who work hard that prove to be the most effective. On the tough votes, JOHN knew how to present the issue in the most objective fashion. I remember on an energy rule issue a few years ago where they said it was going to be a close vote. And JOHN YOUNG won the floor battle with over a 50 vote lead.

JOHN's great service to his constituents is an epic. His understanding of the economics of our Southwest area was broad and deep. JOHN YOUNG served long and faithfully in Congress. Those of us in Texas who knew him well, will miss his effective leadership up here in Washington.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable OLIN E. TEAGUE, who is retiring this year after over three decades of distinguished service in the House of Representatives as a result of wounds incurred during World War II when he served heroically as commander of the 1st Battalion of the 314th Infantry Regiment, 79th Division. Congressman TEAGUE was awarded the Silver Star with two clusters, the Bronze Star with two clusters, the Purple Heart with two clusters, the Combat Infantryman's Badge, and many other medals and awards too numerous to mention as a result of his admirable war record.

OLIN was first elected to the 79th Congress, and was reelected to every succeeding Congress through the present 95th Congress. During 18 years as chairman of the House Veterans' Affairs Committee, he worked with tireless devotion to improve the quality of life for our Nation's veterans, and authorized the Korean war veterans bill Public Law 550, which corrected the shortcomings of the World War II GI bill.

When he was honored in 1969 by the Veterans of Foreign Wars, receiving the VFW's Congressional Award, Chairman TEAGUE stated in his acceptance speech that:

> There are a lot of problems in America but there are a lot more things that are right with America, than there are that are wrong. * * * We must always strive to improve the quality of life for all our people, but sometimes it seems to me that we become so engrossed in these problems, so centered on what is wrong, that we seldom acknowledge what is right.

OLIN TEAGUE has also served as the chairman of the House Science and Technology Committee since the 93d Congress, and his diligent efforts have been most beneficial to the citizens of this Nation and have made America a more prosperous and productive country. He is a dedicated and devoted American, and a Congressman of outstanding ability, deep compassion, and courage. These qualities not only earned the respect of his colleagues but endeared him to his constituents of the Sixth District of Texas as well.

I extend to OLIN my best wishes for a healthy and happy retirement.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable GEORGE H. MAHON, the senior Member of the Texas delegation to Congress and the dean of the House of Representatives. It has been a truly rewarding personal experience for me to have known him as a colleague, and we have all depended on his experience and expertise for enlightened counsel and strong leadership. I am honored to have served with him during the 14 years I have been in the House of Representatives.

GEORGE was first elected to the 74th Congress in 1934 and was reelected to every succeeding Congress through the current 95th Congress. He has given close to a half century of dedicated and devoted service to his constituents of the Nineteenth District of Texas, and has compiled an outstanding record of excellence and splendid achievement during his distinguished career.

Chairman MAHON's diligent efforts as chairman of the House Appropriations Committee have been both fruitful and beneficial to the citizens of this Nation, and indeed, these successful efforts have made America a more prosperous and productive country. The admiration for GEORGE MAHON's leadership is not confined to the citizens of Texas, for he is respected by every Member of Congress, and his inspiring example will be sorely missed here in the House.

Seldom does one find a man of GEORGE MAHON's stature, a man so wholeheartedly dedicated and responsive to the needs of the people of the United States. GEORGE can retire with the assurance that through his efforts mankind has benefited, and there is no tribute higher than this. I extend to GEORGE MAHON my best wishes for a healthy and happy retirement.●

● Mr. COLLINS of Texas. Mr. Speaker, we will all miss TIGER's hearty pat on the back. It was as stimulating a greeting as anyone ever received. His friendly voice always had a smiling Texas twang in it. It always makes you feel good to be around TIGER TEAGUE.

When I think of the defense of America, I always think of TIGER as the greatest friend that American defense ever had. He was Congress most decorated hero from the World War. Where the bullets were flying, there was TIGER TEAGUE leading the way. And still he is the one in the Halls of Congress who was leading the way on every defense fight.

His congressional district was my neighbor. Everybody in my hometown appreciated and loved TIGER TEAGUE.

They say down in Bryan that he is the greatest Aggie that ever lived. They say for defense that he is the greatest spokesman the military ever had. But those of us from Texas all know that TIGER TEAGUE was as warm and loyal an American as we have ever had in Congress. There will never be another one like the TIGER.●

● Mr. GOLDWATER. Mr. Speaker, the retirement of eight members of the Texas delegation must rank with those sad periods of Texas history such as the fall of the Alamo and the admission of Alaska to the Union.

In California we are proud to have the largest congressional delegation, but for some reason we always have to check with the Texas delegation. Texas knows how to get things done. The people of Texas have a penchant for sending great people to the Congress.

The record speaks for itself, and when the definitive history of the House is written, just think of the pages that will be occupied by Chairman GEORGE MAHON and his legendary battles in behalf of the American taxpayer. Chairman MAHON knows as much about government finance as any person who ever lived, and if this Congress had listened to him a long time ago and practiced fiscal sanity, we would not be running deficits and double-digit inflation. He is a born leader, and we will not see his likes again.

I look also at BOB POAGE, a man that every farmer and consumer in America owes a debt of gratitude. The miraculous transformation of American agriculture is due to the leadership and foresight of people like BOB POAGE. He has fought for the farmer and never apologized for doing so. Our people eat better food, more variety of food, and less expensive food than an other nation on the globe, and you do not need to look further than BOB POAGE, as a symbolic reason why this miraculous result has taken place.

And, as we pay these deserving tributes, I am reminded of OMAR BURLESON who set the stage as the former chairman of the House Administration Committee for a more efficient and better organized House. OMAR knew how critical the Ways and Means Committee is to Texas and he resigned his chairmanship to go on Ways and Means. His leadership on that committee has been tremendous, and he has been the American taxpayer's friend.

But, Mr. Speaker, as much as I admire and respect all of our distinguished, retiring Texans, I must, in all candor, reserve the most profound and heartfelt words for my chairman—for Tiger TEAGUE. OLIN TEAGUE is one of the dearest friends a person could ask for. He has been my mentor—a man who tells it like it is and bases friendship on total honesty and candor. I have served under his leadership on the Science and Technology Committee, and there is no American alive who loves his country more and stands in its defense more than Tiger TEAGUE. You cannot mention one piece of veterans legislation since World War II or any success of America's space program without first mentioning Tiger TEAGUE. He is truly one of the greatest, most noble men it has ever been my privilege to know, and I shall miss his leadership as will the entire Congress, indeed, the Nation. TIGER always says, "Well, son, for a Republican, you aren't too bad." "TIGER," I say, "for a Democrat you are the greatest!

Mr. Speaker, it has also been my privilege to work with another great son of Texas—JOHN YOUNG. We served together on the Ad Hoc Energy Committee. Up to that time my contact with him had been rather limited and sporadic. Those 2 months on the committee revealed to me a quality that I wish more Members of the Congress possessed. Regardless of the pressure of colleagues or party leadership or general public interests, over and over again JOHN YOUNG voted as he genuinely believed the issue in question merited. His remarks and questions consistently referred to what was in the best interests of the Nation, what was fair and reasonable for both our free enterprise system and the consumer citizen, and what commonsense should have revealed to every member of the committee.

To his great credit, JOHN YOUNG remained throughout those trying and confused times, consistent, forthright, and dedicated.

Mr. Speaker, none of us will ever forget the great lady of the Texas Delegation—BARBARA JORDAN. Her sense of fair play, objectivity, and just plain commonsense is refreshing in a world that has become far too cynical. We are all aware of her tremendous intellect and outstanding legal talent, but I want to pay tribute to BARBARA JORDAN as a person. I do not think she has a mean bone in her body. She deals with all people, regardless of their station in life, with respect, dignity, and frankness. Frankly, I was shocked when she decided to leave us after such a short time in the Congress, but I have a feeling we will hear more from this wonderful, beautiful lady.

Mr. Speaker, it has also been an honor for me to serve on two committees—Public Works and Transportation and Science and Technology—with my dear friend, DALE MILFORD. No one loves aviation more or rises to its defense quicker than DALE MILFORD. He is an outstanding pilot and in the relatively short period DALE has served in the House, he has made his mark on aviation safety and the enhancement of a brighter safety picture for the future. I have enjoyed serving with DALE, and the American taxpayer has lost a great friend in DALE MILFORD.

Mr. Speaker, BOB KRUEGER is also leaving us to seek office in the other body. I want to pay a tribute to BOB, but inasmuch as he is involved in a campaign right now, I think BOB will understand that this should be done after the election.

Mr. Speaker, the people of Texas can be proud, because they have been well represented by our Texas colleagues who will be retiring this year.●

● Mr. COLLINS of Texas Mr. Speaker, seeing DALE MILFORD going back to Dallas is not like telling a colleague goodby He is a good Texan and those of us who knew him best, hope that he decides to come back home.

It has been a great honor to serve with DALE. He serves with depth and cooperation and is consistently working for the betterment of our entire community. His commonsense understanding of economics has been a bulwark of strength.

There are so many ways I would like to see America call on DALE I hope he continues in government leadership. I hope he considers coming back to Congress. Whatever he does in the interim, I hope he comes back to Dallas. The folks in our area consider him one of our finest neighbors. Welcome back to Dallas for a while, DALE. We will probably see you back soon in Washington.

● Mr. COLLINS of Texas. Mr. Speaker, BOB POAGE is a man of deep character. Many times we hear the old statement that "In Congress you have to go along to get along." This was never true of BOB POAGE. He has built one of the great careers of Texans who have served in Congress. On every issue he stood by the facts and always voted by his principles. BOB is a plain spoken man and you always know where he stands.

As long as BOB POAGE has been in Washington, you would think he would consider himself a legislator. But every time you talk to BOB, he tells you about the weather back home and how the crops are doing. I never saw a man as far away from Texas whose heart was still on the farm.

For honor, integrity, and strong character, BOB POAGE will always be remembered in history. He is a warm friend and a man of outstanding character.●

CONCERN OVER EVENTS IN NICARAGUA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRASER) is recognized for 5 minutes.

● Mr. FRASER. Mr. Speaker, I am submitting for the RECORD a letter to Secretary of State Vance signed by 86 congressional Members expressing their deep concern for the crisis in Nicaragua. The letter's message is clear: We applaud the administration's efforts to help mediate a peaceful solution to the Nicaraguan crisis, and at the same time urge the administration to suspend all assistance to the Somoza Government until this conflict is resolved. By continuing assistance to that government, our Government risks sending a misleading message of support to the Somoza regime during this time of civil strife in Nicaragua.

I would like to give my sincere thanks to all those Members who lent their support to this letter. I would also like to give a special appreciation to two staff members of my subcommittee, Josephine Weber and Carol Glassman, who performed an outstanding job in helping to bring this letter to the attention of congressional offices.

The text of the letter follows:

WASHINGTON, D.C.,
October 13, 1978.

HON. CYRUS R. VANCE,
Secretary, Department of State,
Washington, D.C.

DEAR MR. SECRETARY: We have been watching with great concern the events in Nicaragua over the past several weeks. The extent of opposition to the Somoza regime has become increasingly clear. A general strike which had the unanimous consent of the Nicaraguan Chambers of Commerce and Industry lasted five weeks. Repudiation of the Somoza government at all levels could not be more deeply felt or actively displayed.

The Nicaraguan crisis presents another key test for the administration's innovative Latin American policy based on mutual respect and understanding. We applaud Deputy Secretary Warren Christopher's statement before the Organization of American States last month, committing the United States to efforts that would permit the "Nicaraguan people themselves to engage in a peaceful and democratic process that would result in an end to their suffering . . ."

At the same time, however, we cannot be oblivious to the carnage the Nicaraguan Government is unleashing on its people by its excessive military force. We therefore strongly recommend that the administration suspend all aid to the Nicaraguan Government until the armed conflict is resolved and the Nicaraguan people are permitted to work through peaceful means to establish representative government. Providing assistance to the Somoza government during this time of civil strife would be ineffective and would only send a misleading message of support to a regime that becomes increasingly illegitimate in the eyes of the Nicaraguan people.

Your attention to these important matters is most appreciated.

Sincerely,

Donald M. Fraser, Tom Harkin, Millicent Fenwick, Berkley Bedell, Anthony C. Beilenson, Jonathan B. Bingham, Michael T. Blouin, David E. Bonior, Don Bonker, John Brademas, William M. Brodhead, John Buchanan, Yvonne B. Burke, John L. Burton, Phillip Burton, Bob Carr, Shirley Chisolm, Cardiss Collins, James C. Corman, Baltasar Corrada, and Ronald V. Dellums.

Weiss, Charles W. Whalen, Jr., and Lester L. Wolff.●

SUMMARY OF FINDINGS CONCERNING THE STATUS OF VIETNAM-ERA VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. TEAGUE) is recognized for 5 minutes.

● Mr. TEAGUE. Mr. Speaker, there have been complaints that the Congress has failed to provide adequate readjustment assistance for Vietnam-era veterans. For example, the Subcommittee on Education and Training, of the Veterans' Affairs Committee, of which I have been chairman during the 94th and 95th Congresses, has been criticized for being a stumbling block to favorable consideration of legislation to provide for a tuition bonus for veterans attending high cost schools and accelerated entitlement. It is argued that Vietnam-era veterans have special needs or have not received comparable assistance as was provided veterans of World War II, which Congress has not recognized.

On Tuesday, October 10, 1978, the President submitted a report on the progress of the Vietnam-era veteran, which has been printed as House Document 95–396. I have read a summary of the findings concerning the status of Vietnam-era veterans, which was the background and basis for the President's report on the progress of Vietnam veterans. I am especially pleased that the summary includes a comparison of the current GI bill with World War II and Korean conflict GI bills. As indicated therein, the benefits provided by Congress under the Vietnam-era GI bill compares most favorably with previous GI bills.

For example, today a veteran with as little as 18 months of active duty service in the Armed Forces is authorized 45 months of eligibility (5 school years) at the rate of $311 a month for a single veteran, with additional assistance for veterans with dependents. Forty-five months of school for a single veteran is about $14,000. In addition to this basic allowance, a veteran may also receive educational work/study allowances, tutorial assistance, special assistance for the educationally disadvantaged, and special educational assistance loans of up to $2,500 a school year—all of these programs were enacted by Congress in recognition of the special needs of Vietnam-era veterans. Further, while World War II veterans were entitled to a subsistence allowance, such allowance was subject to offset if a veteran had outside earnings. The summary indicates that the majority of Vietnam-era veterans are employed, but there is no limitation on the veterans' outside earnings.

In addition to education and training, the Vietnam-era veteran is entitled to a wide range of rights and benefits to which all other veterans of previous wars are entitled. As the report states, the Vietnam-era veterans are in the position of becoming the best educated group of veterans in our history. To date, the Nation has spent nearly $25 billion on GI bill assistance for Vietnam-era veterans as compared with $14 billion for World War II veterans and $4.5 billion for veterans of the Korean conflict. I believe that after reading the President's report, and the summary on which it is based, that a fair and reasonable person will agree that the Congress has not ignored the needs of the Vietnam-era veterans who are entitled to veterans benefits available to veterans of previous wars and, in addition, a number of programs tailored especially for Vietnam veterans in helping them to make a successful readjustment to civil life following their service in the Armed Forces.●

HON. JOSEPH A. LE FANTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. MINISH) is recognized for 60 minutes.

● Mr. MINISH. Mr. Speaker, since January of 1977, the citizens of New Jersey's 14th Congressional District have been represented by the Honorable JOSEPH A. LE FANTE, one of the ablest and finest Congressman ever to represent that district. JOE LE FANTE has made his mark on the 95th Congress and the citizens of New Jersey have benefited from his exemplary service in the House of Representatives.

JOE LE FANTE is a native of Hudson County. He was born in Bayonne, N.J.,

on September 8, 1928, and was educated in the Bayonne school system. He is the president of the Public Service Furniture Co. in Bayonne, and the vice president of the New Jersey Furniture Association. Congressman LE FANTE has a long history of public service beginning with his election to the Bayonne Municipal Council in 1962. He served as councilman until 1970. At this time he was elected to the New Jersey State Assembly. An assemblyman for 7 years, he was chosen as majority leader of the assembly in 1975 and speaker of the assembly in 1976. In November of 1976, JOE LE FANTE was elected to the U.S. Congress to represent the people of Hudson County. In each of these elected offices, JOE LE FANTE has demonstrated his sincere concern for the well-being of the people he represents. He has provided unparalleled constituent services to the citizens of the 14th Congressional District of New Jersey.

A man of exceptional abilities and tremendous empathy, JOE LE FANTE has distinguished himself in Congress as a proponent of progressive, people-oriented legislator, and as a skilled practitioner in the art of congressional compromise.

The House has been well served by his tenure in this body, for it is individuals of the stature of JOE LE FANTE who add to and sustain the confidence and trust of the American people in their public institutions, despite these cynical times.

His colleagues will miss him for we will lose a friend.

These Halls will miss him for they will have lost a dedicated public servant, deeply aware of and thankful for the historic opportunity afforded him to serve his Nation.

But most of all, the people will miss him, the people of his district and his State for whom he has worked so hard and labored so well.

Mr. Speaker, as JOE LE FANTE leaves the House of Representatives to go and serve the people of New Jersey in another capacity, I, for one, want him to know that the Congress has been enhanced by his presence in these Chambers and I am grateful to have served with him on Capitol Hill.●

HELSINKI COMMISSION OUTLINES BROAD ACCOMPLISHMENTS IN 95TH CONGRESS ACTIVITIES REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 15 minutes.

● Mr. FASCELL. Mr. Speaker, the Commission on Security and Cooperation in Europe this week published a report of its activities during the 95th Congress and I would like to summarize for the RECORD the contents of this document. Created in 1976 as an independent agency to monitor and encourage compliance with the 1975 Conference on Security and Cooperation in Europe (CSCE) at Helsinki, the Commission has carried out its responsibilities in a variety of ways.

The Commission's activities focused heavily on the Belgrade review conference which met from June 1977 to March 1978 to review implementation of the various cooperative measures contained in the CSCE Final Act signed by 35 nations. Initially, the Commission was instrumental in forming U.S. policy for the East-West conference and then played an important and active role as part of the U.S. delegation.

In addition to carrying out its monitoring and informational responsibilities in major international fora, the Commission has been extremely active on a day-to-day basis in promoting implementation of the military and security, economic and scientific, humanitarian and other goals of the Final Act.

During the past 2 years, extensive and continuing hearings held by the Commission have provided an important source of information on the State of CSCE implementation, particularly in the area of human rights. The Commission has also held a large number of meetings and staff interviews during the 95th Congress. These activities have resulted in a regular flow of background papers and reports prepared by the Commission which have been circulated in the Congress, media, and private sector.

Commissioners and staff during the past 2 years have held extensive meetings with officials of the executive branch to review and initiate CSCE policy. In addition, periodic consultations were held with officials of the other signatory governments. This activity by the Commission will intensify and expand in anticipation of the next major review conference scheduled for Madrid in 1980.

At the Belgrade meeting, the Commission supplied three members of the seven-member U.S. delegation to the June preparatory meeting. Eight Commissioners attended and participated in sessions of the main meeting while 14 staff members took part in numerous aspects of the fall meeting. In two of the most significant working groups, Basket III and Follow-up, U.S. representation was chaired by Commission staff members, with backup provided largely by Commission staff. In general terms, the Commission during the Belgrade meeting participated in committee and plenary activities, special projects, press relations, facilitating congressional and public visitors and handling of administrative details.

Since the close of the Belgrade meeting, the Commission's continuing involvement has been particularly apparent in the preparation and coordination of U.S. policy for additional CSCE-related meetings, including the experts meeting to prepare the Scientific Forum in Bonn. This meeting (together with two others scheduled for Montreaux in October of 1978 and Valetta in early 1979) was set up by the Belgrade conference to deal with special problems of North American and European cooperation that were too broad in scope to be effectively treated in Belgrade.

On a daily basis, much of the Commission's work has focused on individual violations of human rights, which fall into several categories: Emigration, family reunification, marriage, travel (all known as human contacts cases), political prisoners, human rights dissidents, religious, and national activists. The staff maintains extensive files on these cases and has compiled and regularly updates a list of unresolved human contacts cases.

During the 95th Congress, the Commission conducted a total of 18 days of hearings during which it probed the views of 79 witness on an array of issues related to the implementation of the Helsinki Accord. Specific hearing topics included East-West economic cooperation, family reunification, binational marriages, travel, religious liberty, minority rights, information flow, cultural and educational exchanges, and political repression. Hearing records are published on all of these. Among witnesses who testified were Secretary of State Cyrus Vance and Ambassador Arthur J. Goldberg, chairman of the U.S. delegation in Belgrade.

Although the Commission is an independent agency with three executive branch officials, the majority of Commissioners are Members of Congress. Hence, the Commission maintains a special relationship with the legislative branch and works closely with both individual Members and committees.

The Commission staff regularly responds to congressional inquiries, provides materials for the preparation of speeches and statements for the CONGRESSIONAL RECORD and generally functions as a clearinghouse for information about congressional activities on U.S.-European human rights and other Helsinki-related issues.

Among the most important of the Commission's numerous publications is its report, "Implementation of the Final Act of the Conference on Security and Cooperation in Europe: Findings and Recommendations 2 Years After Helsinki," published in August 1977. This comprehensive document provided a broad assessment of CSCE implementation progress 2 years after the signing of the Helsinki Final Act. Released as the substantive portion of the Belgrade review conference convened, the document, in many respects, reflected the position of the U.S. delegation. It was circulated widely among other delegations, the general public and the media. In general terms, the report found that the record of the first 2 years had been more productive than the Commission expected, though far short of the high promises detailed in the language of the Final Act.

Nongovernmental organizations have played an important role in the functioning of the Commission, which has maintained an intensive two-way flow of communications with these various groups. A significant amount of the casework that the Commission handles is originally referred by private organizations that range from groups with ethnic interests to agencies with broad humanitarian concerns such as the International League for Human Rights. These citizens

groups were kept current on Commission activities by mail and by means of frequently scheduled briefings. In effect, the Commission is geared to bring the particular concerns of private interest groups to government attention, while it helps to make government information accessible and government policy understandable to nongovernmental organizations.

The Commission's investigative activities and research in the field of human rights have also made it a valuable source of information for U.S. and foreign media. The Commission has provided information to the New York Times, the Washington Post, the Christian Science Monitor, the Wall Street Journal, Time, Newsweek, and others. Commissioners have appeared on such television shows as "Face the Nation" and "The Today Show." The Commission also supplied articles which have appeared in such journals as Foreign Policy and the Journal of the Atomic Scientists. In addition, the Commission works closely with the media elements connected to various U.S. Government agencies, such as the Voice of America and the Press Service of the International Communication Agency, Radio Free Europe, and Radio Liberty.●

THE PLIGHT OF THE KISHINEVSKY FAMILY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 5 minutes.

● Mr. DODD. Mr. Speaker, I am proud to join many of my colleagues in the House in participating in the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewery on behalf of Soviet Jewish families who wish to emigrate to Israel, but who have been denied exit visas by the Soviet Government.

Today, I would like to bring to my colleagues' attention the case of Moisey Aronovich Kishinevsky, his wife and infant daughter. The 32-year-old Mr. Kishinevsky, who is employed as a technician in Beltsy, Moldavian S.S.R., first applied for visas for his family in November 1974. The Kishinevsky family would like nothing more than to exercise a basic human right—that of the freedom to live where they wish. The Kishinevsky family simply wants to join the rest of their family in Israel. But the Soviet Union, in March 1975, refused to grant the necessary exit visas. Mr. Kishinevsky, who is not easily deterred, applied five more times, and was refused five times.

The Soviet Government has refused to grant Mr. Kishinevsky an exit visa for the spurious reason that he knows "state secrets." Mr. Kishinevsky did serve in the army from 1970–72, but surely time has elapsed for him to have forgotten any "state secrets" acquired during his term of duty.

It is my hope that this vigil for freedom will result in the issuance of visas for the Kishinevsky family as soon as possible.●

INTERNATIONAL WHALING COMMISSION DECISIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LEGGETT) is recognized for 10 minutes.

● Mr. LEGGETT. Mr. Speaker, a recent exchange of views in the editorial section of the Washington Post has made public some controversial aspects of the actions of the United States in the International Whaling Commission (IWC). An article entitled "Selling Out the Whales," authored by Lewis Regenstein, appeared in the Washington Post on September 14, 1978, which criticized the Carter administration for its position on the conservation of whales. This article was countered by a response appearing in the Washington Post on September 27, 1978, and authored by Mr. Richard A. Frank, who is the Administrator of the National Oceanic and Atmospheric Administration and U.S. Commissioner on the IWC. The Regenstein article was introduced to the CONGRESSIONAL RECORD in a statement by my colleague from California Hon. LEO J. RYAN on September 25.

In order to insure that a fair presentation is made of both sides in this matter, the reply by Mr. Frank to the Regenstein article is reproduced at the end of this statement.

I have found that I cannot agree entirely with the thoughts expressed in either the Regenstein article or the reply by Mr. Frank. Therefore, I would like to share some of my thoughts on the matter.

As chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment, I have on many occasions stated my full support for the U.S. policy that there should be a 10-year moratorium on all whaling in order to allow depleted stocks to recover. It is my belief that all that could reasonably be done to persuade the other nations who are members of the IWC of the desirability of a moratorium has indeed been done, and that such efforts continue to be made. However, as Mr. Frank points out, we have been unable to generate the support of a majority of IWC members, let alone the three-fourths that would be required for the IWC commission to adopt a moratorium.

I would point out here that even were we to achieve adoption of a moratorium by a three-fourths majority of the IWC, any nation not wishing to be bound by a moratorium could remove itself from such an obligation through a simple objection procedure. Surely if a moratorium were adopted, the major whaling nations would file such an objection and the moratorium would not be effective.

In light of this situation, I fully concur with the U.S. policy, as explained by Mr. Frank, that absent a moratorium we should support a procedure under which the member nations of the IWC set quotas at levels recommended by an IWC scientific committee based on the well-being of the whale stocks. Under the management procedure adopted by the IWC, stocks of whales are deemed to be protected and zero quotas are set if the stock level falls below 90 percent of that required for a maximum-sustained yield. If the stock is above this level, then it is placed in a sustained management category and quotas are set such that whales can be taken at a near maximum sustained yield level. The apparent disagreement between Regenstein and Frank on the changes in quota of North Pacific sperm whales are a product of this two-level system. In June of 1977, at a regular meeting of the IWC, the scientific committee presented evidence that the stocks of male sperm whales had fallen to just below the level required to keep them in the sustained management category. Accordingly, the IWC placed male sperm whales provisionally in the protected category and set a zero quota for 1978. The quota for females, which did not fall in the protected category, was provisionally set at 763. However, the Japanese challenged the validity of the scientific data and requested that the data and the quotas be reviewed at a special meeting later that year. This meeting took place in December 1977, at which time considerably better scientific data was available which raised the stock estimates of sperm whales above the estimates produced at the previous meeting. Accordingly, male sperm whales no longer were found to be in the protected catgeory and a new quota of 6,444 whales (5,105 males and 1,339 females) was set for 1978. This quota still represented a reduction from the 1977 quota of 7,200.

The scientific data concerning the abundance of whales in the oceans is very poor for most species. Whales roam over vast stretches of ocean and spend much of their time totally submerged. They are, therefore, very difficult to count accurately. Changes in the quotas of whales to be taken are then to be expected when scientific data improves as in the case of the sperm whale. The uncertainty with which 1978 sperm whale quotas was established is, indeed, regrettable. However, I am convinced that the United States has taken no action within the IWC that permits the possibility of extinction for any species of whales. Indeed, as Mr. Frank points out, at least in the case of the California gray whale, the conservation measures adopted by the IWC have led to a dramatic and permanent recovery of the once severely depleted stocks.

In the case of the bowhead whale, I recognize the extreme difficulty of balancing the need to protect the species and to insure legitimate subsistence needs and cultural continuity of our Alaskan Native populations: In this difficult matter, I have not always found myself in agreement with administration policy. However, I am pleased to note that the extensive research on bowhead whales conducted this year has proven that the remaining populations are considerably larger than had previously been thought, and I am satisfied that the extremely modest Eskimo subsistence quota of 18 bowhead whales now set by IWC

will pose no danger of further depletion of the bowhead. I also note with satisfaction that actions taken during the past year have dramatically decreased the number of bowhead whales which were struck by the Eskimo hunters but allowed to escape and die from their wounds in needless fashion.

The goal that we all share in the United States of preventing the destruction and extinction of the whales will undoubtedly continue to present a difficult path for us to follow. However, our best hope of achieving this goal is by rational adherence to the management plans of the IWC which themselves must be based on the soundest possible scientific evidence and assessment.

There follows Mr. Frank's article which addresses the administration position. I commend this article to my colleagues, together with the Regenstein article to which it constitutes a reply and which has previously appeared in the RECORD:

A "DETERMINED POLICY" TO PROTECT WHALES

(By Richard A. Frank)

The article "Selling Out the Whales," by Lewis Regenstein [op-ed, Sept. 14], failed to convey adequately the Carter administration's strong feelings about, and actions to achieve, protection of whales.

President Carter personally has done more than any other president to promote whale conservation. He attended the 1972 United Nations Conference on the Human Environment and argued strongly in favor of a 10-year moratorium on commercial whale-killing. During the presidential campaign in 1976, he spoke out clearly against whaling. In 1977, he sent an unprecedented presidential message to the International Whaling Commission (IWC), the multilateral agency that sets worldwide quotas, supporting a moratorium. Last year, the president signed into law legislation that bans commercial whaling within 200 miles of the U.S. coastline.

The Carter administration has continued to support a 10-year moratorium in bilateral discussions with other countries and at every meeting of the IWC. To our regret, the majority of IWC countries have refused to adopt the 10-year moratorium. In the interest of obtaining improved conservation of whales and reduced hunting more immediately, we have accepted the next best alternative, a procedure under which the member nations of the IWC set quotas at levels recommended by an IWC scientific committee based on the well-being of the whale stocks. Thus, political and economic considerations are no longer the determining factors as they once were. This procedure has fortunately resulted in a decrease in quotas at each IWC meeting, including decreases in 1977 and 1978. We have also been able to achieve selective moratoriums, such as a complete ban on the killing of fin whales and sei whales in the Southern Hemisphere.

Regenstein takes issue with a 1977 decision of the IWC to reduce the North Pacific sperm whale quota from 7,200 to 6,444 whales. That quota was recommended without dissent by the scientific committee, which included American whale experts such as the chairman of the U.S. Marine Mammal Commission, on the basis of the best available scientific evidence. The United States, which had committed itself—with the concurrence of the conservation community—to vote in favor of scientific committee decisions, concurred in the 13-to-1 IWC vote to adopt that quota.

Regenstein finds something ominous in my statements that we should be pleased that the gray whale population has increased substantially, and because of its increase is no longer on what is called the "protected list." The California gray whale was once severely depleted by commercial whaling to about one-third of its original stock. Through efforts of the U.S. government, the Mexican government and the environmental community, these marvelous animals have been protected from commercial whaling, and their population has more than doubled. No longer threatened with extinction, they therefore no longer fit the definition of the "protected list." Nonetheless, the U.S. government has unequivocally taken the position that they must have further protection and that no commercial whaling of gray whales should occur. At our initiative, a provision has been inserted in the IWC Convention to prevent commercial whaling for gray whales; each country in whose 200-mile fishing zone the gray whale migrates has agreed publicly it would not allow commercial whaling; and we have said that we would, under no circumstances, vote for renewed commercial taking of the gray whale.

The Carter administration has faced one difficult problem of satisfying our determined policy to protect endangered whales and of satisfying the policy of ensuring the subsistence needs of native peoples. Alaskan Eskimos have hunted the great bowhead whales for food for centuries. Because of non-Eskimo commercial whaling during the latter part of the 19th century, the bowhead whale population has decreased from many thousands to less than 3,000 animals. Although the bowhead whale herd is reduced, most experts in the field do believe that a small take for the next few years would not significantly affect the stock. The IWC has established a modest bowhead whale quota—18 whales for 1979—that allows the Eskimos to satisfy their legitimate subsistence needs but, on the other hand, does not jeopardize the well-being of the whales. The Eskimos would like a larger quota, and some people, like Regenstein, have argued for a smaller quota.

We all want to achieve the most effective measure to ensure that all whale stocks are never again threatened with depletion. We are committed to persuading all nations to accept and implement sound conservation measures toward that end, and I believe that we will.●

LABOR SURPLUS SET-ASIDE PROGRAM INCLUDES GRANTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 10 minutes.

● Mr. LAFALCE. Mr. Speaker, in the closing hours of this session, I would like to take this opportunity to clarify, both in the minds of the Members, and in the minds of all Federal Government contracting personnel, a question that may have arisen under the labor surplus set-aside program.

As you know, the labor surplus set-aside program requires that Government contracts be "set aside" for firms in areas of high unemployment (labor surplus areas) when "there is a reasonable expectation that offers will be obtained from a sufficient member of eligible concern so that awards will be made at reasonable prices."

The labor surplus set-aside program is embodied in Defense Manpower Policy No. 4A (32A C.F.R., part 134), which in turn is premised upon both Public Law 95-89, and three Executive orders. DMP-4A provides that—

It is the policy of the Federal Government to award appropriate contracts and *grants*, to execute agreements with, eligible labor surplus area concerns * * * (emphasis added).

The policy is unambiguous; grants are most certainly to be included within the program's embrace.

Oversight hearings held by the Subcommittee on Capital, Investment and Business Opportunities of the House Small Business Committee reinforced the need to integrate grants within the program. At hearings held October 12, 1977, representatives from the General Services Administration—who promulgated DMP-4A with the advice of a number of other procurement agencies—reaffirmed the commitment to include grants in the program. At subsequent hearings in April and June of 1978, much time was devoted to determining precisely which type of "grants" were amenable to the program.

Representatives from HEW indicated that nondiscretionary grants, such as social security benefits, medicaid, medicare, et cetera, cannot be targeted, nor could discretionary formula grants. However, they did indicate that discretionary grants were capable of being utilized under the program.

All the agencies with significant grant capability indicated to our subcommittee that they were developing procedures to utilize the labor surplus program to target these grants. The underlying basis for making grants applicable is that invariably the grant is essentially a procurement: it requires the grantee to undertake certain tasks, performances, et cetera, for the benefit of the Government in exchange for the amount of the grant.

On the 18th day of August 1978, President Carter signed an Executive order with respect to the labor surplus program. The order provided for apportioning responsibility among certain executive agencies for administering the labor surplus program. While that Executive order did not explicitly mention grants, they were nevertheless implicitly included. In fact, the order states that "Executive agencies shall emphasize procurement set-asides in labor surplus areas. * * *" The President evinced no intent to deviate from the previously established policy of including grants within the embrace of the term "procurement", and presumably intended to bring grants within the embrace of his directive.

In all events, throughout the remainder of this Congress, my subcommittee will continue to monitor the progress being made in the implementation of the labor surplus program. I would hope to see the program being used for both procurements, as well as for the award of discretionary grants.●

HONORING WILL DURANT

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Florida (Mr. PEPPER) is recognized for 10 minutes.

● Mr. PEPPER. Mr. Speaker, on November 5, 1978, the distinguished historian Will Durant will observe his 93d birthday. The Nation can join in celebrating this occasion as it calls to mind, once again, the monumental achievement of this man, whose writing has inspired millions of readers throughout the world to learn and understand history.

William James Durant was born on November 5, 1885, in North Adams, Mass. His early years were spent in Massachusetts and New Jersey. He earned the B.A. in 1907, the M.A. the following year, and the Ph. D. from Columbia University in 1917.

Dr. Durant first received public acclaim in 1926 with the publication of his book, "The Story of Philosophy," which, translated into 12 languages, has sold some 4 million copies.

A young Florida lawyer by the name of CLAUDE PEPPER was among the millions of Americans who read and remembered this book, which has been described as "a comprehensive survey of Western philosophy from Plato to John Dewey in the language of the average man."

Each year, Dr. Durant would embark on a lengthy lecture tour, a practice he was to continue for some 50 years. He spoke on every major campus in the country, and it was in the early 1930's that he came to speak at what is now Florida State University.

I was practicing law in Tallahassee, not long before my first campaign for the U.S. Senate. I was closely associated with the university. having been asked, as a member of Phi Beta Kappa, to initiate a chapter on the campus. I was acquainted with the president and various members of the faculty, so I was asked to meet this distinguished visitor at the train and serve as his escort for the duration of his stay.

I recall this as a most pleasant and productive encounter. A young man himself, he inspired conversation which was at once both delightful and intellectual. It was the sort of experience that is remembered and treasured by young people with a keen interest in history and government.

So it is with personal pleasure that I recall for our colleagues the achievements of this man—a man whose published works have spanned more than half a century and whose humor and understanding have enriched the lives of millions in America and abroad.

Will Durant has published 17 volumes. Since 1963, he has been joined as coauthor by Ariel, his talented wife and partner of 65 years. While each of their works has been widely acclaimed, they are perhaps best known for their 11-volume series, "The Story of Civilization," in which they undertook to explore centuries of history, beginning with Egyptian civilization and concluding with the age of Napoleon. The final installment, "The Age of Napoleon" was published in 1975, when Dr. Durant was 90 years of age. Their Dual Autobiography was published last year and is a warm personal account of their life together—a life enriched by friendship and association with major political, literary and social figures of the 20th century.

In all his works, Will Durant sought to make enjoyable what is, for many, an otherwise tedious task. His style has brought this observation:

> Dr. Will Durant, a pioneer in bringing the knowledge of the ages within the reach of the average man, is highly esteemed by students for taking the toil out of study.

It is, perhaps, this element of the Durants' work which won them the Pultizer Prize in 1968 and, in 1977, the Medal of Freedom. As an ardent student and interpreter of history, Durant knows well the benefits of understanding the past. But for those who would seek to use history to limit the future, Durant offers this caution:

> As a philosopher, I will not admit we are limited by what history has done in the past. I will not accept history as the sole governor of thought and action.

In "The Lessons of History," published in 1968, the Durants outlined their view of the rewards which come from a study of history. For them, it is not a stagnant, purely academic pursuit, but an adventure to nourish the spirit. They observed:

> To those of us who study history not merely as a warning reminder of man's follies and crimes, but also as an encouraging remembrance of generative souls, the past ceases to be a depressing chamber of horrors; it becomes a celestial city, a spacious country of the mind, wherein a thousand saints, statesmen, inventors, scientists, poets, artists, musicians, lovers, and philosophers still live and peak, teach and carve and sing.

As chairman of the Select Committee on Aging, I am well aware of the contributions which are made to our national life by the productive efforts of older citizens. Will and Ariel Durant exemplify the enormous role older Americans can and do play in our society. They are still very active. I am told that Dr. Durant works upwards of 10 hours each day, currently researching and writing a series of essays on the heroes of history.

Dr. Durant's love of history and the telling of it is matched by his love of life and the living of it. His is an inspirational story, one which deserves notice and commendation by all who repudiate the myths about old age, who see it not as a time of finalities, but as a time for continued learning, ongoing work, and productive endeavor.●

IN HONOR OF THE LATE RALPH H. METCALFE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Illinois (Mrs. COLLINS), is recognized for 5 minutes.

● Mrs. COLLINS of Illinois. Mr. Speaker, the response of my colleagues to the special order called to honor the memory of the late Honorable Ralph H. Metcalfe has been overwhelming. The respect that Ralph engendered among the Members is equalled only by the intensity with which he himself lived and worked to earn such admiration.

I take this occasion to submit for the record the following remarks made by President Jimmy Carter upon learning of Ralph's deatn on October 10:

> With deep regret I learned today of the death of Representative Ralph H. Metcalfe. His life was genuinely inspiring. As a famed Olympic sprinter, second only to Jesse Owens in 1936, as a strong, independent voice for the people of Chicago and most recently—as a visionary leader in the Panama Canal Treaty ratification, he was uncompromising in the pursuit of excellence.
>
> He stood always for equity. His political energy was invested always on behalf of his constituents, and his unexpected passing deprives his community, his colleagues and the Nation of a staunch and honest leader.●

THE INDIAN LEGISLATIVE RECORD OF THE 95TH CONGRESS AND A TRIBUTE TO CONGRESSMAN TENO RONCALIO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 10 minutes.

● Mr. UDALL. Mr. Speaker, I take a few minutes of the very valuable time of the House to comment on the record of the Committee on Interior and Insular Affairs on Indian legislation and to pay tribute to the member responsible for that record.

The Constitution of the United States confers plenary power on the Congress with respect to its relations with the Indian tribes and their affairs and Members. Under the rules of the House, this very important responsibility has been lodged primarily with the Interior Committee.

These people, once sovereign nations, were the original occupants of this land and, through inexorable march of history, have been displaced from their position in their own country. They have been pushed back onto small reservations, but, beset by inherent problems of their circumstance and assaulted by outside interests, they have clung tenaciously to their tribes, their lands, and their way of life.

While they lost much in our conquest of this continent, they have retained valuable rights and resources under our laws. Under treaties and statutes, they have retained rights to hunt and fish; rights to use water and the right to govern themselves within their reservations. These reservation lands, once thought to be barren and of no use or value to the white man, have often proven to be very valuable in oil, gas, coal, mineral, water, timber, and other resources.

The tribes are slowly developing the necessary capacity to exercise their rights and develop their resources. In a growing number of cases, they have exercised their right to go to court and fight for their rights and resources under our laws. In doing so, they have often adversely impacted on the economic interests of the non-Indian community and the inevitable conflicts have arisen.

Of course, there has been a reaction among the non-Indians to the legal victories of the Indians and this reaction has been felt in the halls of Congress. Unfortunately, in spite of the justness of their claims, there seems to be a growing resentment in the Congress against

the Indian people and their interests. This has had its effect upon legislation in the 95th Congress for the benefit of the Indians.

Still, I am proud of the record of the Interior Committee on Indian legislation. We have reported 35 Indian bills to the House. 24 have been signed into law and another 7 await the signature of the President. Two others, including the most important Indian Child Welfare bill, await final congressional action in the waning hours of this Congress.

Mr. Speaker, I ask unanimous consent to submit for the RECORD to appear at the end of my remarks the legislative achievements of the committee in the field of Indian affairs.

Mr. Speaker, I am proud of this record. Only two or three of these bills were of national significance, but everyone of them was important to all the Indians or to particular tribes. They each took a tremendous amount of the time and effort of the members of the committee and staff.

But no person was more important to this effort than the chairman of the Subcommittee on Indian Affairs and Public Lands, the gentleman from Wyoming and my good friend, TENO RONCALIO.

The legislative responsibility of my committee for Indian affairs is a hard, often unwanted, burden. The Indians are not a major political force in this country and the rewards for assuming this burden and championing their cause are few, if any.

When we organized the Interior Committee this Congress, there was little interest in assuming this responsibility and I found it necessary to combine the Indian Affairs Subcommittee with some other subcommittee. I asked TENO if he would consent to chair a combined Subcommittee on Indian Affairs and Public Lands and he graciously accepted the responsibility.

It came as no surprise to those of us who know TENO to discover that he discharged that obligation with vigor, passion, and fairness. I know that he has spent long hours and traveled great distances in doing so. When you include the many bills relating to public lands, I do not think that there is any subcommittee chairman in the House who has worked harder or who has reported and managed so much good legislation.

TENO is retiring this year after 10 years of long, productive, and honorable service in the House. The House will lose one of its most valuable Members. Though I have disagreed with TENO on several occasions, I have always respected him and considered him my friend. I will miss him as I know the other Members of the House will.

But most of all, the Indian people will miss him. He labored long and diligently in their interests and I know that they feel a debt of gratitude for his service.

RECORD OF THE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS ON INDIAN LEGISLATION IN THE 95TH CONGRESS

SIGNED INTO LAW

1. S.J. Res. 10—This resolution extends the time period the American Indian Policy Review Commission has to submit its report and authorizes funds for it, an additional $100,000. Not referred to Committee. P.L. 95-5 (February 17, 1977).

2. H.R. 4992 (Udall, Roncalio, Johnson of Colorado, Young of Alaska)—This bill amends the Indian Business Development Program which is title VI of the Indian Financing Act of 1974 by revising the appropriations authorization to extend it for another two years. H. Rept. 95-271, S. Rept. 95-304, P.L. 95-68.

3. H.R. 4585 (Roncalio)—Authorizes $2,250,000 to be spent for expenses of the Indian Claims Commission in FY 1978. It also allows for the transfer of cases from the Commission to the U.S. Court of Claims for settlement and subject to Supreme Court review. H. Rept. 95-234, S. Rept. 95-303, P.L. 95-69.

4. S. 667—Provides that 80 acres of Federal lands in Elko County, Nevada shall be held in trust by the United States for the Te-Moak Bands of Western Shoshone Indians. S. Rept. 95-237, H. Rept. 95-624, P.L. 95-133.

5. H.R. 8499(Young) Alaska Native Claims Settlement Act—Amends the Alaska Native Claims Settlement Act of 1971 to allow Sealaska Corporation, which was established in accordance with ANCSA to represent natives of Sealaska Region to select their land entitlements in the area withdrawn for selection by other village corporations. H. Rept. 95-712 No Senate Report, P.L. 95-178.

6. H.R. 6348 (Santini) (S. 103)— Provides that approximately 90 acres of Federal land located in Nevada be held in trust by the United States for the Ely Indian Colony, Nevada H. Rept. 95-619, S. Rept. 95-233, P.L. 95-191.

7. S. 1560 (H.R. 7259—AuCoin) Siletz Indian Tribe—Restores Federal recognition to the Confederated Tribes of the Siletz Indians of Oregon, and provides Federal services and benefits, furnished to other tribes, to the tribal members. S. Rept. 95-386, H. Rept. 95-623, P.L. 95-195.

8. S. 1509 (H.R. 8873—Runnels and Lujan) Lands for the Pueblo Cultural Center—Would allow 191 Indian Pueblos in New Mexico to convey their right to 11.6 acres of land in Albuquerque, New Mexico to the Federal government, who in return would accept it and hold the land in trust jointly for the Pueblos, so as to allow the existence of their cultural center. S. Rept. 95-445, H. Rept. 95-846, P.L. 95-232.

9. S. 838 (H.R. 2664—Abdnor) Black Hills Sioux Land Claims—Waives certain legal obstacles to permit the Sioux land claim to be considered on its merits. S. Rept. 95-112, H. Rept. 95-529, P.L. 95-234.

10. S. 773 (H.R. 3377—Steed) Wichita Land Claims—Allows the Wichita Indian Tribe of Oklahoma and those affiliated bands to file their claim with the Indian Claims Commission for lands taken by the U.S. without just compensation. S. Rept. 95-119, H. Rept. 95-597, P.L. 95-247.

11. H.R. 2540 (Ullman) Umatilla Inheritance—The bill modifies federal law in regard to inheritance of trust or restricted land on the Umatilla reservation so as to reduce the amount of land going out of Indian ownership. H. Rept. 95-820, S. Rept. 95-718, P.L. 95-264.

12. S. 482 (H.R. 3787—Runnels and Lujan) Zuni Indian Land Claim—The bill authorizes the Secretary of Interior to acquire 600 acres of land with religious significance for the Zuni Tribe. It also grants the tribe the right to file a claim with the Indian Claims Commission. S. Rept. 95-111, H. Rept. 95-953, P.L. 95-280.

13. S. 661 (H.R. 2497—Risenhoover)—Restores federal recognition to Ottawa, Peoria, and Wyandotte Indian tribes of Oklahoma. Also extends recognition to the Modoc Indians of Oklahoma by not making the act terminating the Klamath applicable to them. S. Rept. 95-574, H. Rept. 95-1019, P.L. 95-281.

14. S. 1582 (H.R. 8099—Udall) Ak Chin Water Rights—The bill settles the water rights and needs of the Ak Chin Indians and avoids the costly claims from being filed against the U.S. government and private parties. S. Rept. 95-460, H. Rept. 95-954, P.L. 95-328.

15. S. 1291 Conveying land to the Cheyenne-Arapaho—This bill provides that 120 acres in the state of Oklahoma shall be held in trust for the Cheyenne-Arapaho Tribes of Oklahoma, and certain other lands held in fee by the tribe shall also be held in trust. S. Rept. 95-239, H. Rept. 95-1309, P.L. 95-327.

16. S. 947 Conveying Lands to the Creek Nation—This bill gives the legislative authority necessary to transfer the 5 acre lot of land known as Yardeka Day School Land to the U.S. government to be held in trust for the Creek Nation of Oklahoma. S. Rept. 95-238. H. Rept. 95-1305, P.L. 95-329.

17. S. 785 (H.R. 9480—Santini) Conveying Land to Fallon Indians—This bill provides that 2,700 acres of the public domain shall be held in trust by the U.S. government for the use of the Paiute and Shoshone tribes of the Fallon Indian reservation. It also authorizes consolidation of land holding and allows for the construction of an irrigation system. S. Rept. 95-417, H. Rept. 95-1298, P.L. 95-337.

18. S.J. Res. 102 (H.J. Res. 738 Udall and Blouin)—The law requires the federal agencies to evaluate their policies and procedures and determine if their practices adversely impact upon the Indians' religious freedom and provides that the President shall submit a report thereon to Congress. S. Rept. 95-709, H. Rept. 95-1308, P.L. 95-341.

19. H.R. 8397 (Udall) Papaga Lands/Florence Village—This bill declares that a 20 acre tract of land, known as Florence Village. located in Pinal County, Arizona, and held in trust by the U.S. government for the Papago Indian Tribe shall be a part of the Papago reservation. H. Rept. 95-1020, S. Rept. 95-1133, P.L. 95-361.

21. S. 3069 (H.R. 13096—Pressler) Sisseton-Wahpeton—Gives a preference right to the Sisseton-Wahpeton Sioux Tribe of the Lake Traverse Reservation to purchase land held in trust for members of the tribe by the U.S. Government being offered for sale. S. Rept. 95-983, H. Rept. 95-1511, P.L. 95-398.

22. H.R. 12860 (Beard) (S. 3155) Rhode Island Land Claims—This act implements a compromise reached by the parties concerned with the Rhode Island Indian claim. It grants to the Narragansetts an amount of land and certain benefits and extinguishes any further claim of the land by the Narragansett and other tribes after a certain period of time. H. Rept. 95-1453, S. Rept. 95-972, P.L. 95-395.

23. S. 3002 (H.R. 12344—Rhodes et al.)—The bill provides for the settlement of various land and boundary disputes arising on the Salt River Indian reservation in Arizona between the Salt River Pima-Maricopa tribe and other private and public agencies. S. Rept. 95-2270, H. Rept. 95-1498, P.L. 95-399.

24. H.R. 10581 (McCormack) Yakima Judgment Distribution—This bill allows the award made to the Yakima Indians by the Indian Claims Commission to be distributed to the parents or guardians of the minors, which is an exception to a provision of the Indian Judgment Distribution Act. The bill was amended to also include the Mescalero Apache Tribe of New Mexico. H. Rept. 95-1304, S. Rept. 95-1193, P.L. 95-433.

AWAITING PRESIDENTIAL SIGNATURE

1. H.R. 9945 (Quillen) Amend Indian Claims Commission Act.—The bill amends the Indian Claims Commission Act to repeal a provision prohibiting former Commissioners from representing Indian tribes within two years of their tenure. As amended, the Commissioners would still be subject to

the one year limitation in the general conflict of interest law. H. Rept. 95–1510, S. Rept. —.

2. H.R. 14026 Kake, Alaska—This bill removes legal impediments to the transfer of title to certain lands owned by the Organized Village of Kake to the Kake Village Corporation so the land may be used as a construction site for a cold storage plant. H. Rept. 95–1615, S. Rept. —.

3. H.R. 23991 (Johnson of California) Susanville Rancheria—This bill provides that 120 acres of public land will be held in trust by the U.S. government for the Susanville Indian Rancheria of California. H. Rept. —, S. Rept. —.

4. H.R. 10600 (Udall) Hunter Private Relief—This bill allows Thomas Joseph Hunter and Rose Hunter, two employees of the BIA, to negotiate with the Papago Indians concerning the sale of their house, which otherwise would be prohibited by law. H. Rept. 95–1617, S. Rept. —.

5. H.R. 3924 (Lujan) (S. 2588) Santa Ana Pueblo—This bill would allow the U.S. government to hold in trust for the Santa Ana Pueblo 16,000 of public domain lands and 2,000 acres to be acquired by the Secretary of Interior from State school land to be held in trust for the tribe. H. Rept. 95–1219, S. Rept. 95–1132.

6. S. 2358 (H.R. 10240—Lujan) Zia Pueblo—This bill provides that the U.S. government will hold in trust 4,850 acres of public domain in Sandoval County, New Mexico, for the Pueblo of Zia, which will be used for grazing and religious purposes. S. Rept. 95–1131, H. Rept. 95–1220.

7. S. 1081 (H.R. 11894)—Risenhoover) Osage—The bill makes certain amendments, modification, and additions to the various laws relating ot the Osage Tribe of Indians of Oklahoma. S. Rept. 95–1157, H. Rept. 95–1459.

PENDING FINAL CONGRESSIONAL ACTION

1. H.R. 11091 (Udall)—Amends the Navajo-Hopi Settlement Act of December 22, 1974 with respect to the funding and operation of the Navajo and Hopi Indian Relocation Commission. H. Rept. 95–1017, S. Rept. 95–1158.

2. S. 1214 (H.R. 12533—Udall et al.)—Indian Child Welfare Act of 1974. Clarifies the jurisdiction of Indian tribes and States with respect to Indian child custody procedings; establishes minimum Federal standards and procedural safeguards for State proceedings with respect to Indian foster care or adoptive placement; and authorizes the Secretary of the Interior to fund Indian Child and Family Service programs. H. Rept. 95–1386, S. Rept. 95–597.●

ILLINOIS-MICHIGAN CANAL UPDATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN of Illinois. Mr. Speaker, many concerned citizens in my district, including representatives of the Illinois-Michigan Canal Foundation, have brought to my attention the need for recognition of the historical significance of the Illinois-Michigan Canal.

In particular, I would like to acknowledge Mr. Leonard E. Lock, Jr., an adviser to the foundation, who has worked diligently to research the fascinating history of the canal. For these reasons, I deemed it appropriate to introduce legislation requesting the Secretary of the Interior to conduct a study to determine the feasibility of the Illinois-Michigan Canal as a national historical park. The purpose for the introduction of the bill at this time is to, hopefully, begin actions necessary by the 96th Congress in order to initiate this important feasibility study.●

MILDRED NASLUND—AN OUTSTANDING EDUCATOR

(Mr. ANDERSON of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ANDERSON of California. Mr. Speaker, quality education for our children is something desired by all Americans. On December 3, 1978, Mildred Naslund will be honored for the many contributions she has made in making this wish a reality for many who reside in my home district. Mildred will be retiring from her post as one of 12 area superintendents for the Los Angeles School District. Hers has been a position of special responsibility, since under her jurisdiction are five senior high schools, eight junior high schools, and 48 elementary schools with a combined enrollment of 73,000. This gives her responsibility for the largest subdivision of the second largest school district in the Nation.

Mrs. Naslund is a native Californian. She was born and raised in Los Angeles where she attended schools which she now administers. Her college career took her through the University of Redlands, where she was student body president, and the University of Southern California where she received her masters degree in 1949. When she joined the Los Angeles district she quickly moved through the system gaining broad experience in her positions as teacher, elementary school principal, academic supervisor, teacher training coordinator, supervisor of teacher education in the personnel division, and associate superintendent in charge of the instructional planning division. When the school district was decentralized into 12 administrative areas in July of 1971, Mrs. Naslund was selected to supervise the largest of these, Area A.

The area A community schools are fortunate to have large groups of Spanish surname, Asian, black, and European students. This not only makes for richness in the community's cultural lifestyle and atmosphere, but also places unusual demands on educators. When Mrs. Naslund found traditional techniques inadequate to meet these special needs, she responded by creating new methods. Individual instructional programs for children were developed under her guidance after seeking the advice of parents. These were made available in learning media instructional centers in each of the five high school areas. The unique centers provided educational materials suited to a multiethnic teaching approach.

This example illustrates the most prominent and welcome trade mark of Mrs. Naslund's administrative style, her direct involvement of both educators and parents in educational planning. While most other school district subdivisions have only one advisory council to bring in citizen input, Mrs. Naslund established five such citizen boards. This and her constant presence at other community gatherings, made her available in a moment's notice when parents or community groups wanted to be heard on school issues.

Under Mrs. Naslund's guidance, Los Angeles schools in the South Bay made education a more practical and exciting experience by utilizing community resources as school aids. She initiated the "Triple Interface: Land-Air-Sea" curriculum which included a floating laboratory, geological field trips and studies of the atmosphere.

The Los Angeles school district will certainly miss the presence of this woman after she has retired from office. It is hard to imagine how one can replace someone who held such great responsibilities, and yet would never refuse a sincere request to discuss a school complaint or suggestion. The students, parents, and citizens of Los Angeles owe her many thanks for her many contributions to our school system.

My wife, Lee, joins me in congratulating Mrs. Naslund on her accomplishment-filled career and we offer her our best wishes in all her future pursuits.

DIRECT MARKETING—A PARTIAL SOLUTION TO A DIFFICULT PROBLEM

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

● Mr. BROWN of California. Mr. Speaker, in light of the House rejection of the Farmer-to-Consumer Direct Marketing Act recently, I thought it appropriate to draw my colleagues' attention to an excellent article that was placed in the July edition of the New Yorker.

This article does a superb job of pictorializing an inner-city farmers market—the fresh fruit and vegetables gleaming in the sun, the bustle of foot traffic moving among the stalls, the cash benefits to both farmers and urban consumers.

Such market have been started in various cities across the United States. People have organized to help encourage their formation. One such group is the agricultural marketing project in Tennessee which has been successful in starting more than 20 direct markets in that region. The budgets for these endeavors are less than shoestring ones and some help should be pointed in their direction.

Desire to cut back our spending programs is strong. But careful consideration should be given to the results of cutting these small amounts from the budget. Direct marketing is one area where a small monetary shot in the arm can slowly permeate the entire structure with beneficial results. Opposition to such programs is difficult to understand. The monetary and social advantages of direct marketing are incomparable to other food markets. The direct contact of farmers and consumers. The knowledge gained by inner city folks of the farmers' ways. The nutritious food fresh from the vine. The exchange of informa-

tion and better prices for both seller and buyer.

Hopefully, next year will bring greater understanding of what real assistance to farmers and consumers means. Farmers markets should exist in all of our cities, not just a few. The people want them and need them. To quote from the article:

The first place we went to was Fifty-ninth Street, and the people were fifteen deep waiting to get to the eggs. I couldn't believe it. There were just masses of faces. I looked at them and felt panic and broke into a cold sweat. They went after the corn so fast I just dumped it on the ground. The people fell on it, stripped it, threw the husks around. They were fighting, grabbing, snatching at anything they could get their hands on. I had never seen people that way, never seen anything like it. We sold a full truck in five hours. It was as if there was a famine going on. The people are quieting now * * * Quietly, in a single day in the Greenmarket, Rich has sold as many as fifteen hundred dozen eggs. In one day, nearly five thousand ears of corn. In one day, three-quarter of a ton of tomatoes.

The article follows:

A REPORTER AT LARGE: GIVING GOOD WEIGHT

You people come into the market—the Greenmarket, in the open air under the downpouring sun—and you slit the tomatoes with your fingernails. With your thumbs, you excavate the cheese. You choose your stringbeans one at a time. You pulp the nectarines and rape the sweet corn. You are something wonderful, you are—people of the city—and we, who are almost without exception strangers here, are as absorbed with you as you seem to be with the numbers on our hanging scales.

"Does every sink grow on your farm?"

"Yes, ma'am."

"It's marvellous. Absolutely every sink?"

"Some things we get from neighbors up the road."

"You don't have no avocados, do you?"

"Avocadoes don't grow in New York State."

"Butter beans?"

"They're a Southern crop."

"Who baked this bread?"

"My mother. A dollar twenty-five for the cinnamon. Ninety-five cents for the rye."

"I can't eat rye bread anymore. I like it very much, but it gives me a headache."

Short, born abroad, and with dark hair and quick eyes, the woman who likes rye bread comes regularly to the Brooklyn Greenmarket, at Flatbush and Atlantic. I have seen her as well at the Fifty-ninth Street Greenmarket, in Manhattan. There is abundant evidence that she likes to eat. She must have endured some spectacular hangovers from all that rye.

Farm goods are sold off trucks, vans, and pickups that come into town in the dark of the morning. The site shifts with the day of the week: Tuesdays, black Harlem; Wednesdays, Brooklyn; Fridays, Amsterdam at 102nd. There are two on Saturday—the one at Fifty-ninth Street and Second Avenue, the other in Union Square. Certain farms are represented everywhere, others at just one or two of the markets, which have been primed by foundation funds and developed under the eye of the city. If they are something good for the urban milieu—tumbling horns of fresh plenty at the people's feet—they are an even better deal for the farmers, whose disappearance from the metropolitan borders may be slowed a bit by the many thousands of city people who flow through streets and vacant lots and crowd up six deep at the trucks to admire the peppers, fight over the corn and gratefully fill our money aprons with fresh green city lettuce.

"How much are the tomatoes?"

"Three pounds for a dollar."

"Peaches?"

"Three pounds for a dollar twenty-five."

"Are they freestones?"

"No charge for the pits."

"How much are the tomatoes?"

"Three pounds for a dollar. It says so there on the sign."

"Venver the eggs laid?"

"Yesterday."

"Kon you eat dum raw?"

We look up from the cartons, the cashbox, the scales, to see who will eat the eggs raw. She is a good-looking big-framed young blonde.

"You bet. You can eat them raw."

"How much are the apples?"

"Three pounds for a dollar."

Three pounds, as we weigh them out, are anywhere from forty-eight to fifty-two ounces. Rich Hodgson says not to charge for an extra quarter pound. He is from Hodgson Farms, of Newburgh, New York, and I (who come from western New Jersey) have been working for him off and on for three months, summer and fall. I thought at first that I would last only a week, but there is a mesmerism in the selling, in the coins and the bills, the all-day touching of hands. I am often in charge of the peppers, and, like everyone else behind the tables by our truck, I can look at a plastic sack of them now and tell its weight.

"How much these weigh? Have I got three pounds?"

"That's maybe two and a quarter pounds you've got there."

"Weigh them, please."

"There it is. Two and a quarter pounds."

"Very good."

"Fantastic! Fantastic! You see that? You see that? He knew exactly how much it weighed."

I scuff a boot, take a break for a shiver in the bones. There are unsuspected heights in this game, moments that go right off the scale.

This is the Brooklyn market, in appearance the most cornucopian of all. The trucks are drawn up in a close but ample square and spill into its center the colors of the country. Greengage plums. Ruby Red onions. Yellow crookneck squash. Sweet white Spanish onions. Starking Delicious plums.

Fall pippins ("Green as grass and curl your teeth"). McIntoshes, Cortlands, Paulareds. ("Paulareds are new and are lovely apples. I'll bet they'll be in the stores in the next few years.")

Pinkish-yellow Gravensteins. Gold Star cantaloupes. Patty Pan squash.

Burpless cucumbers.

Cranberry beans.

Silver Queen corn. Sweet Sue bicolor corn, with its concise tight kernels, its well-filled tips and butts. Boston salad lettuce. Parris Island romaine lettuce. Ithaca iceberg crunchy pale lettuce. Orange tomatoes.

Cherry Bell tomatoes.

Moreton Hybrid, Jet Star, Setmore, Supersonic, Roma, Saladette tomatoes.

Campbell 38s.

Campbell 1327s.

Big Boy, Big Girl, Redpak, Ramapo, Rutgers London-broil thick-slice tomatoes.

Clean-shouldered, supple-globed Fantastic tomatoes. Celery (Imperial 44).

Hot Portugal peppers. Four-lobed Lady Bell glossy green peppers. Aconcagua frying peppers.

Parsley, carrots, collard greens.

Stuttgarter onions, mustard greens.

Dandelions.

The people, in their throngs, are the most varied we see—or that anyone is likely to see in one place west of Suez. This intersection is the hub if not the heart of Brooklyn, where numerous streets converge, and where Fourth Avenue comes plowing into the Flatbush-Atlantic plane. It is also a nexus of the race. "Weigh these, please." "Will you please weigh these?" Greeks. Italians. Russians. Finns. Haitians. Puerto Ricans. Nubians. Muslim women in veils of shocking pink. Sunnis in total black. Women in hiking shorts, with babies in their backpacks. Young Connecticut-looking pants-suit women. Their hair hangs long and as soft as cornsilk. There are country Jamaicans, in loose dresses, bandannas tight around their heads. "Fifty cents? Yes, dahling. Come on a sweetheart, mon." There are Jews by the minyan, Jews of all persuasions—white-bearded, black-bearded, split-bearded Jews. Down off Park Slope and Cobble Hill come the neobohemians, out of the money and into the arts. "Will you weigh this tomato, please?" and meantime let us discuss theatre, books, environmental impacts. Maybe half the crowd are men—men in cool Haspel cords and regimental ties, men in lipstick, men with blue eyelids. Corporate-echelon pinstripe men. Their silvered hair is perfect in coif; it appears to have been audited. Easy-going old neighborhood men with their shirts hanging open in the summer heat are walking galleries of abdominal and thoracic scars—Brooklyn Jewish Hospital's bastings and tackings. (They do good work there.) A huge clock is on a tower high above us, and as dusk comes down in the autumn months the hands glow Chinese red. The stations of the hours light up like stars. The clock is on the Williamsburgh Savings Bank building, a skyscraper full of dentists. They go down at five into the Long Island Rail Road, under us. Below us, too, are all the subways of the city, in ganglion assembled.

"How much are the cabbages?"

"Forty cents a head."

"O.K. Weigh one, please."

We look around at empty storefronts, at J. Rabinowitz & Sons' SECURITY FIREPROOF STORAGE, at three gold balls (Gem Jewelers Sales), at Martin Orlofsky's Midtown Florist Nursery. Orlofsky has successfully objected to our presence as competitors here, and we can tell neither plants nor flowers. "HAVE YOU HAD ANY LATELY? CLAMS, STEAMERS." Across Fourth Avenue from the Greenmarket is the Episcopal Church of the Redeemer, a century and a quarter old, with what seem to be, even in the brightest morning light, black saints in its stained-glass windows. Far down Fourth, as if at rest on the paved horizon, stands a tower of the Verrazano-Narrows Bridge. To the northwest rises the Empire State.

Not long after dawn, as trucks arrive and farmers begin to open boxes and set up wooden tables, a miscellany of whores is calling it a day—a gradual dispersal, quitting time. Their corner is Pacific and Fourth. Now and again, a big red Cadillac pauses at the curb beside them. The car's rear window is shaped like a heart. With some frequency, a squad car will slide up to the same curb—a week-in, week-out, endless duet with the Cadillac. The women hurry away. "Here come the law." The Greenmarket space, which lies between Atlantic and Pacific, was once occupied by condemned buildings—spent bars and liquor stores. The block is fenced and gravelled now, and is leased by the Brooklyn Academy of Music, which charges the Greenmarket seventy-five dollars a Wednesday. The market does not fill the lot—the rest is concession parking. Here in the din of the city, in the rivers of moving metal, some customers drive to the Greenmarket as if it were a roadside stand in Rockland County, a mall in Valley Stream.

On a sidewalk around the corner, people with a Coleman stove under a fifty-five-gallon drum are making sauce with our tomatoes. Tall black man in a business suit now picks up a slim hot pepper. Apparently he thinks it sweet, because he takes most of it with a single bite and chews it with anticipant relish. Three . . . two . . . one. The small red grenade explodes on his tongue. His eyeballs seem to smoke. By the fistful, he grabs cool stringbeans and stuffs them into his mouth.

I forget to give change to a middle-aged woman with bitter eyes. I charged her forty-

five cents for a pound and a third of apples and she gave me half a dollar. Now she is demanding her nickel, and her eyes are narrower than the sides of dimes. She is a round-shouldered person, beaky and short—short-changed. In her stare at me, there is an entire judiciary system—accusation, trial, and conviction. "You give me my nickel, mister."

"I'm sorry. I forgot. Here is your nickel."

She does not believe my mistake a mistake. She walks away in a white huff. Now she stops, turns, glowers. She moves on. Twice more, as she departs from the market, she stops, turns, and stares angrily back. I watch her all the way to the curb. She waves at the traffic and gets into a cab.

A coin will sink faster through bell peppers than it will through water. When people lose their money they go after it like splashing bears. Peppers everywhere. Peppers two deep over the apples, three deep over the plums. Peppers all over the ground. Sooner or later, the people who finger the eggs will spill and break the eggs, and the surface they walk on becomes a gray-and-yellow slurry of parking-lot gravel and egg—a Brooklyn omelette. Woman spills a dozen now. Her purse is hanging open and falling egg plops in. Eleven smash on the ground. She makes no offer to pay. Hodgson, who is young and whimsical, grins and shrugs. He is not upset. He is authentically amused. Always, without a sign of stress, he accepts such losses. The customer fingers another dozen eggs, and asks if we are sure they are good.

I err again, making change—count out four ones, and then a five, "and ten makes twenty."

The customer says, "I gave you a ten-dollar bill, not a twenty."

I look at her softly, and say to her, "Thanks very much. You're very nice."

"What do you mean I'm very nice? I gave you a ten-dollar bill. Why does that make me very nice?"

"I meant to say I'm glad you noticed. I'm really glad you noticed."

"How much are the tomatoes?"

"Weigh these, please."

"Three pounds for a dollar."

"How much the corn?"

"Ten cents an ear. Twelve for a dollar."

"Everything is so superior. I'd forgotten what tomatoes taste like."

"Will you weigh these, please?"

"The prices are so ridiculously cheap."

"How can you charge so little?"

"In nine years in the city, I've never seen food like this."

"How much are these?"

"Fifty-five cents."

"Wow! What a rip-off!"

"Three pounds for a dollar is too much for tomatoes. You know that, don't you? I don't care how good they are."

"How much are these?"

"A dollar-ten."

"A dollar-*ten*?"

"Three eggplants. Three and a half pounds. Three pounds for a dollar. You can have them for a dollar-ten."

"Keep them."

"In the supermarket, the vegetables are unspeakable."

"They are brought in from California."

"You can't see what you are getting."

"When the frost has come and you are gone, what will we do without you?"

Around the market square, some of the trucks have stickers on them: "NO FARMERS, NO FOOD." Alvina Frey is here, and Ronald Binaghi, from farms in Bergen County, New Jersey. John Labanowski and his uncle Andy Labanowski are from the black-dirt country, the mucklands, of Orange County, New York. Bob Engle and Jim Kent tend orchards in the Hudson Valley. Ed Milliman, the honey man, is from Lakeville, Connecticut; Joan Benack and Ursula Plock, the bakers, from Milan, New York. Ed and Judy Dart grow "organic" on Long Island, Richard Finch in Frenchtown, New Jersey. John Henry. Vincent Neglia. Ilija Sekulovski. Don Keller. Cleather Slade completes the ring. Slade is young, tall, paunchy, silent, and black. His wife, Dorothy, sell with him. She has a nicely lighted smile that suggests repose. Their family farmland is in Red Springs, North Carolina, but the Slades are mainly from Brooklyn. They make occasional trips South for field peas, collards, okra, yams, and for the reddest watermelons north of Chichicastenango.

Jeffrey Mack works for Hodgson part time. He has never seen a farm. He says he has never been out of the city. He lives five blocks away. He is eight years old, black. He has a taut, hard body, and glittering eyes, a round face. He piles up empty cartons for us and sometimes weighs tomatoes. On his better days he is some help.

"Jeffrey, that's enough raisin bread."

"Jeffrey, how many times do I have to tell you: get yourself out of the way."

"What are you doing here, Jeffrey? You ought to be in school."

He is not often pensive, but he is pensive for a moment now. "If you had a kid would you put him up for adoption?" he asks.

"What is that supposed to mean, Jeffrey? Why are you asking me that?"

"My mother says she's going to put me up for adoption."

With two, three, and four people working every truck, the farmers can occasionally take breaks, walk around—eat each other's apples, nectarines, and pears. Toward the end of the day, when their displays have been bought low and the crowd is becoming thin, they move around even more, and talk in small groups.

"What always surprises me is how many people are really nice here in the city."

"I was born in New York. My roots are here, you know. I'd throw away a bad cantaloupe, anything, so the people would come back."

"We have to leave them touch tomatoes, but when they do my guts go up and down. They paw them until if you stuck a pin in them they'd explode."

"They handle the fruit as if they were getting out all their aggressions. They press on the melons until their thumbs push through. I don't know why they have to handle the fruit like that. They're brutal on the fruit."

"They inspect each egg, wiggle it, make sure it's not stuck in the carton. You'd think they were buying diamonds."

"They're bag crazy. They need a bag for everything, sometimes two."

"They're nervous. So nervous."

"Today I had my third request from someone who wanted to come stay on the farm, who was looking for peace and quiet for a couple of days. He said he had found Jesus. It was unreal."

"I had two Jews in yarmulkes fighting over a head of lettuce. One called the other a kike."

"I've had people buy peppers from me and take them to another truck to check on the weight."

"Yeah, and meanwhile they put thirteen ears of corn in a bag, hand it to you, and say it's a dozen. I let them go. I only get after them when they have sixteen."

"They think we're hicks. 'Yeah,' I say. 'We're hicks and you're hookers. You're muggers and you breathe dirty air.'"

"I hardly smoke in the city. Down home I can smoke a whole pack of cigarettes and still have energy all night. You couldn't pay me to live here. I can't breathe."

If the farmers have a lot to say about their clients, they have even more to say about each other. Friendly from the skin out, they are deep competitors, and one thing that they are (in a sense) competing for is their right to be a part of the market. A high percentage of them seems to feel that a high percentage of the others should be shut down and sent away.

The Greenmarket was started in 1976. Farmers were recruited. Word got around. A wash of applicants developed. There was no practical or absolute way to check out certain facts about them—nor is there yet. For example, if some of the goods on a truck were not grown by the farmer selling them, who did grow them, and when, and where? The Greenmarket quickly showed itself to be a prime outlet for the retailing of farm produce. On a good day, one truck with an eighteen-foot box could gross several thousand dollars. So every imaginable kind of seller became attracted. The ever-present problem was that anyone in jeans with a rustic address painted on his truck could load up at Hunts Point, the city's wholesale fruit-and-vegetable center, and head out at 5 a.m. for the Greenmarket—a charter purpose of which was to help the regional farmer, not the fast-moving speculator, survive. Authentic farmers, moreover, could bring a little from home and a lot from Hunts Point. Wholesale goods, having been grown on big mass-production acreages (and often shipped in underripe from distant states), could be bought at Hunts Point and retailed—in some instances—at lower prices than the custom-grown produce of a small Eastern farm. Prices, however, were an incidental issue. The customers, the people of the city, believed—and were encouraged to believe—that when they walked into a Greenmarket they were surrounded by true farmers who had grown the produce they displayed and were offering it fresh from the farm. That was the purpose and promise of the Greenmarket—if not the whole idea, an unarguably large part of it—and in the instances where wholesale, long-distance, gassed-out goods were being presented (as some inevitably were) the principle was being subverted. In fact, the term Greenmarket had been coined—and registered in Albany—to set apart these markets in the public mind from certain "farmers' markets" around the city that are annually operated by Hunts Point hicks.

"Are you a farmer, or are you buying from an auction?" was a challenge the farmers began to fling around. Few were neighbors at home—in positions to know about each other. They lived fifty, a hundred, a hundred and fifty miles apart, and came to the city to compete as strangers. They competed in sales, and they competed in slander. They still do. To a remarkable—and generally inaccurate—extent, they regard one another as phonies.

"He doesn't even know what shoepeg corn is."

"Never trust a farmer who doesn't know shoe-peg corn."

"What exactly is shoe-peg corn?"

"Look at *him*. He has clean fingernails."

"I happen to know he has them manicured."

"I bust my hump seven days a week all summer long and I don't like to see people bring to market things they don't grow."

"Only farmers who are not farmers can ruin this market."

"These hustlers are going to work us off the block."

"There's farmers selling stuff they don't know what it is."

"What exactly is shoe-peg corn?"

"I like coming here. It gets me out of Vineland. Of course, you pick your ass off the night before."

"Look at Don Keller's hands. You can see the farm dirt in them."

"His nails. They'll never be clean."

"Rich Hodgson. See him over there? He has the cleanest fingernails in New York State."

"That Hodgson, he's nice enough, but he

doesn't know what a weed looks like. I'll tell you this: he's never even *seen* a weed."

Around the buildings of Hodgeson Farms are some of the tallest volunteers in New York, topheavy plants that sway overhead—the Eastern rampant weed. With everybody working ninety hours a week, there is not much time for cosmetics. For the most part, the buildings are chicken houses. Rich's father, Dick Hodgson, went into the egg business in 1946 and now has forty thousand hens. When someone in the city cooks a Hodgson egg, it has quite recently emerged from a chicken in a tilted cage, rolled onto a conveyor, and gone out pass a candler and through a grader and into a waiting truck. A possible way to taste a fresher egg would be to boil the chicken with the egg still in it.

Dick Hodgson—prematurely white-haired, drivingly busy— is an agrarian paterfamilias whose eighty-two-year-old mother-in-law grades tomatoes for him. His wife, Frances, is his secretary and bookkeeper. He branched into truck farming some years ago specifically to keep his daughter, Judy, close to home. Judy runs the Hodgsons' roadside stand, in Plattekill, and her husband, Jan Krol, is the family's vegetable grower, the field boss—more than a hundred acres now under cultivation. Rich, meanwhile, went off to college and studied horticulture, with special emphasis on the fate of tropical houseplants. To attract him home, his father constructed a greenhouse, where Rich now grows wandering Jews, spider plants, impatiens, coleus, asparagus ferns—and he takes them with him to Harlem and wherever else he is allowed to sell them. Rich, who likes the crowds and the stir of the city, is the farm's marketer.

The Greenmarket, even more than the arriving Hodgson, generation, has expanded Hodgson Farms. Before 1976, the family had scarcely twenty acres under cultivation and, even so, had difficulty finding adequate outlets for the vegetables Jan grew. The roadside stand moved only a minor volume. Much of the rest was sold in New Jersey, at the Paterson Market, with discouraging results. "Paterson is semi-wholesale," Rich says. "You have to sell in units of a peck or more. You're lucky if you get three dollars for a half bushel of tomatoes. You ask for more and all you hear all day is 'That's a too much a money. That's a too much a money.' " (A half bushel of tomatoes weighs twenty-six pounds, and brings at least eight dollars at the Greenmarket, giving good weight.) The Hodgsons tried the fruit-and-vegetable auction in Milton, New York, but the auctioneer's cut was thirteen per cent and the farmers were working for him. They also tried a farmers' market in Albany, but sold three bushels of peppers and a couple of bags of corn in one depressing day. They were more or less failing as small-scale truck farmers. Dick Hodgson's theory of family cohesion through agricultural diversification was in need of an unknown spray. NBC news presented a short item one evening covering the debut of the Greenmarket. The Hodgsons happened to be watching.

"The first place we went to was Fifty-ninth Street, and the people were fifteen deep waiting to get to the eggs. I couldn't believe it. There were just masses of faces. I looked at them and felt panic and broke into a cold sweat. They went after the corn so fast I just dumped it on the ground. The people fell on it, stripped it, threw the husks around. They were fighting, grabbing, snatching at anything they could get their hands on. I had never seen people that way, never seen anything like it. We sold a full truck in five hours. It was as if there was a famine going on. The people are quieter now."

Quietly, in a single day in the Greenmarket, Rich has sold as many as fifteen hundred dozen eggs. In one day, nearly five thousand ears of corn. In one day, three-quarters of a ton of tomatoes.

"How much are the tomatoes?"

"Fifteen hundred pounds for five hundred dollars."

Rich is in his mid-twenties, has a tumbling shag of bright-red hair, a beard that comes and goes. When it is gone, as now, in the high season of 1977, he retains not only a mustache but also a pair of frontburns: a couple of pelts that descend from either end of the mustache and pass quite close to his mouth on their way to his chin. He is about six feet tall and wears glasses. Their frames are pale blue. His energy is of the steady kind, and he works hard all day with an easygoing imperturbability—always bemused; always a controlled, sly smile. Rarely, he looks tired. On market days, he gets up at four, is on the Thruway by five, is setting up tables and opening cartons at seven, has a working breakfast around nine (Egg McMuffin), and, with only a short break, sells on his feet until six or seven, when he packs up to drive home, take a shower, drop into bed, and rise again at four. His companion, Melissa Mousseau, shares his schedule and sells beside him. There is no market on Mondays, so Rich works a fourteen-hour day at home. He packs cartons at the farm—cartons of cauliflowers, cartons of tomatoes—and meanders around the county collecting a load for Harlem. The truck is, say, the six-ton International with the Fruehauf fourteen-foot box—"Hodgson Farms, Newburgh, N.Y., Since 1946." Corn goes in the nose—corn in dilapidating lath-and-wire crates that are strewn beside the fields where Jan has been bossing the pickers. The pickers are Newburgh high-school students. The fields, for the most part, are rented from the State of New York. A few years ago, the state bought Stewart Air Force Base, outside Newburgh, with intent to lengthen the main runway and create an immense international freightport, an all-cargo jetport. The state also bought extensive farms lying off the west end of the base. Scarcely were the farmers packed up and on the road to Tampa Bay when bulldozers flattened their ancestral homes and dump trucks took off with the debris. The big freightport is still in the future, and meanwhile the milieu of the vanished farms is ghostly with upgrowing fields and clusters of shade trees around patches of smoothed ground where families centered their lives. The Hodgsons came upon this scene as farmers moving in an unusual direction. With the number of farms and farmers in steady decline in most places on the urban fringe, the Hodgsons were looking for land on which to expand. For the time being, rented land will do, but they hope that profits will be sufficient to enable them before long to buy a farm or two—to acquire land that would otherwise, in all likelihood, be industrially or residentially developed. The Greenmarket is the outlet—the sole outlet—that has encouraged their ambition. In the penumbral world of the airport land, there are occasional breaks in the sumac where long clean lines of Hodgson peppers reach to distant hedgerows, Hodgson cantaloupes, Hodgson cucumbers, Hodgson broccoli, collards, eggplants, Hodgson tomatoes, cabbages, corn—part vegetable patch, part disenfranchised farm, with a tractor, a sprayer, and a spreader housed not in sheds and barns but under big dusty maples. The family business is integrated by the spreader, which fertilizes the Greenmarket vegetables with the manure of the forty thousand chickens.

Corn in the nose. Rich drives to the icehouse, where he operates a machine that grinds up a three-hundred-pound block and sprays granulated snow all over the corn. Corn snow. He stops, too, at local orchards for apples, Seckel pears, nectarines, peaches, and plums. The Greenmarket allows farmers to amplify their offerings by bringing the produce of neighbors. A neighbor is not a wholesale market but another farmer, whose farm is reasonably near—a rule easier made than enforced. The Hodgsons pick things up— bread included—from several other farms in the county, but two-thirds to three-quarters of any day's load for the city consists of goods they grow themselves.

In the cooler of E. Borchert & Sons, the opiate aroma of peaches is overwhelming, unquenched by the refrigerant air. When the door opens, it frames, in summer heat, hazy orchards on ground that falls away to rise again in far perspective, orchards everywhere we can see. While loading half-bushel boxes onto the truck, we stop to eat a couple of peaches and half a dozen blue free plums. Not the least of the pleasures of working with Hodgson is the bounty of provender at hand, enough to have made the most sybaritic Roman prop himself up on one elbow. I eat, most days, something like a dozen plums, four apples, seven pears, six peaches, ten nectarines, six tomatoes, and a green pepper.

Eating his peach, Rich says, "The people down there in the city can't imagine this. They don't believe that peaches come from Newburgh, New York. They say that peaches come only from Georgia. People in the city have no concept of what our farming is like. They have no idea what a tomato plant looks like, or how a tomato is picked. They can't envision a place with forty thousand chickens. They have no concept how sweet corn grows. And the people around here have a false concept of the city. Before we went down there the first time, people up here said, 'You're out of your mind. You're going to get robbed. You're going to get stabbed.' But I just don't have any fears there. People in black Harlem are just as nice as people anywhere. City people generally are a lot calmer than I expected. I thought they would be loud, pushy, aggressive, and mean. But eighty per cent of them are nice and calm. Blacks and whites get along much better there than they do in Newburgh. Newburgh Free Academy, where I went to high school, was twenty-five per cent black. We had riots every year and lots of tension. Cars were set on fire. Actually, I prefer Harlem to most of the other markets. Harlem people are not so fussy. They don't manhandle the fruit. And they buy in quantity. They'll buy two dozen ears of corn, six pounds of tomatoes, and three dozen eggs. At Fifty-ninth Street, someone will buy one ear of corn for ten cents and want it in a bag. The reason we're down there is the money, of course. But the one-to-one contact with the people is really good—especially when they come back the next week and say, 'Those peaches were really delicious.' "

In the moonless night, with the air too heavy for much sleep anyway, we are up and on the road, four abreast: Anders Thueson, Rich Hodgson, David Hemingway. . . . A door handle is cracking my fifth right rib. Melissa Mousseau is not with us today, and for Hemingway it is the first time selling. He is a Newburgh teen-ager in sneakers and a red football shirt lettered "OKLAHOMA." Hemingway is marking time. He has mentioned January half a dozen ways since we started out, in a tone that reveres the word—January, an arriving milestone in his life, with a college out there waiting for him, and, by implication, the approach of stardom. Hemingway can high-jump seven feet. He remarks that the Greenmarket will require endurance and will therefore help build his stamina for January. He is black, and says he is eager to see Harlem, to be "constantly working with different people—that's a trip in the head by itself."

When the truck lurches onto the Thruway and begins the long rollout to the city, Hodgson falls asleep. Anders Thueson is driving. He is an athlete, too, with the sort of legs that make football coaches whistle softly. Thueson has small, fine features, light-

blue eyes, and short-cropped hair, Scandinavian yellow. He is our corn specialist, by predilection—would apparently prefer to count ears than to compute prices from weights. When he arrives in Harlem he will touch his toes and do deep knee bends to warm himself up for the corn.

Dawn is fully over Tappan Zee, the far end of the great bridge indistinct in mist. Don Keller, coming from Middletown, broke down on the bridge not long ago, rebuilt his starter at the toll-booth apron, and rolled into market at noon. Days later, Jim Kent's truck was totalled on the way to Greenmarket—Hudson Valley grapes, apples, peaches, and corn all over the road. Gradually now, Irvington and Dobbs Ferry come into view across the water—big square houses of the riverbank, molars, packed in cloud. In towns like that, where somnolence is the main resource, this is the summer of the business day. Hodgson wakes up for the toll. For five minutes he talks sports and vegetable prices, and again he dozes away. On his lap is a carton of double-yolk eggs. His hands protect them. The fingernails are clean. Hodgson obviously sees no need to dress like Piers Plowman. He wears a yellow chemise Lacoste. The eggs are for Derryck Brooks-Smith, a Brooklyn schoolteacher, who is a regular Hodgson city employee. Brooks-Smith is by appearances our best athlete. He runs long distances and lifts significant weights. He and Thueson have repeatedly tried to see who can be the first to throw an egg over an eight-story building on Amsterdam Avenue. To date their record of failure is one hundred per cent—although each has succeeded with a peach.

We arrive at six-fifteen, to find VanHouten, Slade, and Keller already setting up—in fact, already selling. People are awake, and much around and Dorothy Slade is weighing yams, three pounds for a dollar. Meanwhile, it is extremely difficult to erect display tables, open boxes, and pile up peppers and tomatoes when the crowd helps take off the lids. They grab the contents.

"Weigh these, please."

"May I have a plastic bag?"

"Wait—while I get the scales off the truck." The sun has yet to show above the brownstones.

This is the corner of 137th Street and Adam Clayton Powell Jr. Boulevard, known elsewhere in the city as Seventh Avenue. The entire name—Adam Clayton Powell Jr. Boulevard—is spelled out on the street sign, which, as a result, has a tip-to-tip span so wide it seems prepared to fly. The big thoroughfare itself is of extraordinary width, and islanded, like parts of Broadway and Park Avenue. A few steps north of us are the Harlem Performance Center and the Egbe Omo Nago African Music Center, and just east along 137th Street from our trucks is the Mother A.M.E. Zion Church. For the Tuesday Greenmarket, the street has been barricaded and cars sent out, an exception being an old Plymouth without tires that rests on flaking steel. On the front wall of the church is a decorous advertisement: "Marion A. Daniels & Sons, Funeral Directors." The block has four young sycamores, and contiguous buildings in every sort of shape from the neat and trim to broken-windowed houses with basements that are open like caves. On 137th Street beyond Adam Clayton Powell are two particularly handsome facing rows of brownstones, their cornices convex and dentilled, their entrances engrandeured with high ceremonious flights of stairs. Beyond our view west is abruptly shut off by the City College cliffs in St. Nicholas Park—the natural wall of Harlem.

The farm trucks are parked on the sidewalks. Displays are in the street. Broad-canopied green, orange, purple, and red umbrellas shield produce from the sun. We have an awning, bolted to the truck. Anders Thueson, with a Magic Marker, is writing our prices on brown paper bags, taping them up as signs. "Is plums spelled with a 'b'?" he asks.

Hemingway tells him no.

A tall slim woman in a straw hat says to me, "I come down here get broke every Tuesday. Weight these eggplants, please."

"There you are. Do you want those in a bag?"

"You gave me good weight. You don't have to give me bags."

Minerva Coleman walks by, complaining. She is short and acidulous, with graying hair and quick sardonic eyes. She wears bluejeans and a white short-sleeved sweatshirt. She has lived in this block twenty-three years. "You farmers come in too early," she says. "Why do you have to come in so early? I have to get up at four o'clock every Tuesday, and that don't make sense. I don't get paid."

Not by the Greenmarket, at any rate. Minerva works for Harlem Teams for Self-Help, an organization that is something like a Y.M.-Y.W.C.A. It is housed, in fact, in a former Y, the entrance to which is behind our truck. Minerva is Director of Economic Development. As such, she brought the Greenmarket to 137th Street—petitioned the city for it, arranged with the precinct to close off the street. While her assistants sell Harlem Teams for Self-Help shopping bags (fifteen cents), Minerva talks tomatoes with the farmers, and monitors the passing crowd. As the neighborhood kleptos come around the corner, she is quick to point them out. When a middle-aged man in a business suit appears on the scene wearing a sandwich board, she reads the message—"Harlem Team for Destroying Black Business"—and at once goes out of her tree. "What do you mean, 'destroying black business'? Who is destroying black business? What is destroying black business? Get your ass off this block. Can't you see this market is good for everybody? The quality and the price against the quality and the price at the supermarket—there's no comparison."

Exit sandwich board.

"How much are the apples?"

"Three pounds for a dollar, madam."

"Are they sweet?"

"You can eat them straight or bake them in a pie."

"Give me six pounds of apples, six pounds of tomatoes, and three dozen extra-large eggs. Here the boxes from the eggs I bought last week."

Mary Hill, Lenox Avenue. Florrie Thomas, Grand Concourse. Leroy Price, Bradhurst Avenue. Les Boyd, the Polo Grounds. Ylonia Phillips, 159th Street. Selma Williamson, 141st Street. Hattie Mack, Lenox Avenue. Ten in the morning and the crowd is thick. The sun is high and hot. People are drinking from fireplugs. A white cop goes by, the radio on his buttock small and volcanic, erupting: ". . . beating her for two hours." In the upstairs windows of the houses across the street, women sit quietly smoking.

"Are these peppers hot?"

"Those little ones? Yeah. They're hot as Hell."

"How do you know how hot Hell is? How do you know?"

The speaker is male and middle-aged, wears a jacket and tie, and is small, compact, peppery. He continues, "How do you know how hot Hell is? You been over there? I don't think you know how hot Hell is."

"Fifty cents, please."

The hundreds of people add up into thousands, and more are turning the corner—every face among them black. Rarely, a white one will come along, an oddity, a floating moon. Just as a bearded person becomes unaware of his beard and feels that he looks like everyone else, you can forget for a time that your own face is white. There are no reminders from the crowd.

Middle-aged man with a woman in blue. She reaches for the roll of thin plastic bags, tugs one off, and tries to open it. The sides are stuck together and resist coming apart. She looks up helplessly, looks at me. Like everyone else on this side of the tables, I am an expert at opening plastic bags.

"These bags are terrible," I tell her, rubbing one between my thumb and fingers. When it comes open, I hand it to her.

"Why, thank you," she says. "You're nice to do that for me. I guess that is the privilege of a lady."

Her husband looks me over, and explains to her, "He's from the old school." There is a pause, some handling of fruit. Then he adds, "But the old schools are closing these days."

"They're demolished," she says. "The building's gone."

They fill their sack with peppers (Lady Bell).

The older the men are here, the more likely it is that they are wearing suits and ties. Gray fedoras. Long cigars. The younger they are, the more likely it is that they are carrying shoulder-strapped Panasonics, turned on, turned up—blaring. Fortunately, the marke seems to attract a high proportion of venerable people, dressed as if for church, exchanging news and some opinion.

Among our customers are young women in laboratory smocks with small gold rings in the sides of their noses—swinging from a pierced nostril. They work in Harlem Hospital, at the end of the block, on Lenox Avenue.

Fat man stops to assess the peppers. His T-shirt says, "I Survived the Bermuda Triangle." Little boy about a foot high. His T-shirt says, "Man's Best Friend."

Our cabbages are in full original leaf, untrimmed, each one so broad and beautiful it appears to be a carnation from the lapel of the Jolly Green Giant. They do not fit well in collapsible shopping carts, so people often ask me to strip away the wrapper leaves. I do so, and sell the cabbage, and go back to weighing peppers, making change, more peppers, more change. Now comes a twenty-dollar bill. When I go into my money apron for some ones, a five, a ten, all I come up with is cabbage.

I prefer selling peppers. When you stay in one position long enough, a proprietary sense develops—as with Thueson and the corn. Hodgson, the true proprietor, seems to enjoy selling anything—houseplants and stringbeans, squash and pears. Derryck Brooks-Smith likes eggs and tomatoes. Hemingway is an apple man. Or seems to be. It is early to tell. He is five hours into his first day, and I ask how he is getting along. Hemingway says, "These women in Harlem are driving me nuts, but the Jews in Brooklyn will be worse." Across his dark face flies a quick sarcastic smile. "How you doing?" he asks me.

"Fine. I am a pepper seller who long ago missed his calling."

"You like peppers?"

"I have come to crave them. When I go home, I take a sackful with me, and slice them, and fill a big iron skillet to the gunwales—and when they're done I eat them all myself."

"Cool."

"These tomatoes come from a remote corner of Afghanistan," Derryck Brooks-Smith is saying to some hapless client. "They will send you into ecstasy." She is young, and appears to believe him, but she may be in ecstasy already. Brooks-Smith is a physical masterpiece. He wears running shorts. Under a blue T-short, his breasts bulge. His calves and thighs are ribbed with muscle. His biceps are smooth brown loaves. His hair is short and for the most part black, here and there brindled with gray. His face is fine-featured, smile disarming. He continues about the tomatoes: "The smaller ones are from Hunza, a little country in the Himalayas. The people of Hunza attribute their longevity to these

tomatoes. Yes, three pounds for a dollar. They also attribute their longevity to yogurt and a friendly family. I like your dress. It fits you well."

Brooks-Smith teaches at John Marshall Intermediate School, in Brooklyn. "A nice white name in a black neighborhood," he once remarked. He was referring to the name of the school, but he could as well have meant his own. He was born in the British West Indies. His family moved to New York in 1950, when he was ten. He has a master's degree from City University. "It is exciting for me to be up here in Harlem, among my own people," he has told me over the scale. "Many of them are from the South. They talk about Georgia, about South Carolina. They have a feeling for the farm a lot of people in the city don't have." He quotes Rimbaud to his customers. He fills up the sky for them with the "permanganate sunsets" of Henry Miller. He instructs them in nutrition. He lectures on architecture in a manner that makes them conclude correctly that he is talking about them. They bring him things. Books, mainly. Cards of salutation and farewell, anticipating his return to the school. "Peace, brother, may you always get back the true kindness you give." The message is handwritten. The card and its envelope are four feet wide. A woman in her eighties who is a Jehovah's Witness hands him a book, her purpose to immortalize his soul. She will miss him. He has always given her a little more than good weight. "I love old people," he say when she departs. "We have a lot to learn from them."

"This is where it is, man. This is where it is!" says a basketball player, shouldering through the crowd toward the eggplants and tomatoes, onions and pears. He is well on his way to three metres in height, and his friend is taller still. They wear red shorts with blue stripes and black-and-white Adidas shoes. The one who knows where it is picks up seven or eight onions, each the size of a baseball, and holds them all in one hand. He palms an eggplant and it disappears. "Man," he goes on, "since these farmers came here I don't hardly eat meat no more."

Now comes a uniformed racing cyclist—All-Sports Day at the Greenmarket. He is slender, trained, more or less thirty, and he seems to be on furlough from the Tour de France. He looks expensive in his yellow racing gloves, his green racing shoes. Partly walking, partly gliding, he straddles his machine. He leans over and carefully chooses peppers, apparently preferring the fire-engine-red ones. Brooks-Smith whispers to me, "That bicycle frame is a Carlton, made in England. It's worth at least five hundred dollars. They're rare. They're not made much anymore."

"That will be one dollar, please," I say to the cyclist, and he pays me with a food stamp.

Woman says, "What is this stuff on these peaches?"

"It's called fuzz."

"It was on your peaches last week, too."

"We don't take it off. When you buy peaches in the store, the fuzz has been rubbed off."

"Well, I never."

"You never saw peach fuzz before? You're kidding."

"I don't like that fuzz. It makes me itchy. How much are the tomatoes?"

"Three pounds for a dollar."

"Give me three pounds. Tomatoes don't have fuzz."

"I'm a bachelor. Give me a pound of plums." The man is tall, is wearing a brown suit, and appears to be nearing seventy. "They're only for me, I don't need more," he explains. "I'm a bachelor. I don't like the word 'bachelor.' I'm really a widower. A bachelor sounds like a playboy."

"Thirty-five cents, please. Who's next?"

"Will somebody lend me a dollar so I can get some brandy and act like a civilized human for a change?" We see very few drunks. This one wears plaid trousers, a green blazer, an open-collared print shirt. He has not so much as feigned interest in the peppers but is asking directly for money. "This is my birthday," he continues. "Happy birthday Gus. My mother and father are dead. If they were alive, I'd kick the hell out of them. They got me into this bag. For twenty years, I shined shoes outside the Empire State Building. And now I'm here, a bum. I need to borrow a dollar. Happy birthday, Gus."

Slade, opposite, is taking a break. He sits on an upturned tall narrow basket, with his head curled into his shoulder. Like a sleeping bird, he has drifted away. I need a break, too—some relief from the computations, the chaotic pulsations of the needle on the scale.

"Two and a quarter pounds at three pounds for a dollar comes to, let's see, seventy-five cents. Five and a half pounds at three for a quarter. That's three dollars."

"Even?"

"Even."

"Y'all going up every week. Y'all going to be richer than hell"

"How much are the nectarines?"

"Weigh these, please."

Turn. Put the fruit in the pan. Calculate. Turn again. Spin the plastic bag. Knot the top. Hand it over. Change a bill.

"You take food stamps?"

"Yes, but I can't give you change."

"How much are the green beans pounds for a dollar and with you in a minute next one—please."

I take off my money apron, give it to Rich, and drift around the market. I compare prices with the Van Houtens. I talk cows with Joe Hlatky. We are from the same part of New Jersey, and he once worked for the Walker-Gordon dairy, in Plainsboro, with its Rotolactor merry-go-round milking platform. Hlatky is a big, stolid man with a shock of blond hair not as neatly prepared as his wife's, which has been professionally reorganized as a gold hive. They work together, selling their sweet white corn and crimson tomatoes—not for nothing is it called the Garden State. Hlatky's twenty-one-year-old daughter, Juanita, often sells with him, too. She is a large-boned, strongly built, large-busted blonde like her mother. Hlatky says that he and his family are comfortable here in Harlem, feeling always, among other things, the appreciative good will of the people. I remember Minerva Coleman telling me that when the farmers came into Harlem the first Tuesday they were "a little nervous—but after that they were O.K." She went on to say, "You can tell when people don't feel quite secure. But now they come in here and go about their business and they don't pay nobody no mind. They like the people here better than anywhere else. I don't know why. I would assume they'd get ripped off a little bit—but not too much." And now Hlatky, standing on 137th Street weighing tomatoes, says again how much he likes this market, and adds that he feels safer here than he does in other parts of the city. He says, "I'll tell you the most dangerous place we sell at. The roughest part of the city we go to is Union Square." So rough, he confides, that when he goes there, on Saturdays, he takes along an iron pipe.

Hlatky today has supplemented his home-grown New Jersey vegetables with peaches from a neighbor in California. They are wrapped in individual tissues. They are packed and presented in a fine wooden box. He bought them at a wholesale market. Robert Lewis, assistant director of the Greenmarket, happens along and sees the peaches. Lewis is a regional planner about to receive an advanced degree from the University of Pennsylvania, a gentle person, slight of build, a little round of shoulder, with a bandanna around his throat, a daypack on his back, steel-rimmed spectacles—all of which contribute to an impression of amiable, academic frailty. He says to big Joe Hlatky, "Get those peaches out of sight!"

With an iron pipe, a single tap on the forehead could send Lewis to Heaven twice. Hlatky respects him, though, and is grateful to him, too, for the existence of the market. Hlatky says he will sell off these peaches, with a promise not to bring more—never again to bring to a Greenmarket so much as a single box of wholesale fruit.

"The peaches are from California," says Lewis. "They must go back on the truck."

Hlatky casts aspersions up one side of 137th Street and down the other. Has Lewis noticed Slade's beans, Hodgson's onions, Van Houten's lettuce, Sekulovski's entire load? He says he feels unfairly singled out. He knows, though, that without Lewis and Barry Benepe, who created and developed the Greenmarket, the Hlatky farm in New Jersey would be even more marginal than it is now. ("Here you can make double what you make wholesale. If I sold my stuff in a wholesale market, I couldn't begin to exist.") And while Lewis and Benepe might lack a certain shrewdness with regard to the origin of beans, they contribute an essential that no farmer could provide: a sophisticated knowledge of the city.

One does not just drive across a bridge with a load of summer squash, look around for a vacant lot, and create a farmers' market in New York. Tape of every color is in the way: community boards, zoning committees, local merchants, City Hall. In order to set up even one open-air market—not to mention five or six—it was necessary to persuade, and in many cases to struggle against, nine city agencies, which Benepe describes in aggregate as "an octopus without a head; pull off one tentacle and another has a grip." Benepe is an architect who has worked as a planner not only for the city government but also in Orange County, watching the orchards disappear. When he conceived of the Greenmarket, in 1974, it seemed "a natural answer to a twofold problem": Loss of farmland in the metropolitan area and a lack of "fresh, decent food" in the city. Moreover, farmers selling produce from their trucks would start conversations, help resuscitate neighborhoods, brighten the aesthetic of the troubled town. "It seemed too obvious to ignore," Benepe says. "But most obvious things do get ignored." Benepe, like Lewis, is a native of the city. Son of an importer of linen, he studied art history at Williams College (1950) and went on to M.I.T. His dress and appearance remain youthful. To the Greenmarket office, on Fortieth Street, he wears brown denim highwaters, polo shirts, and suede Wallabees. He has long sandy graying hair, a lithe frame, a flat stomach. He rides a bicycle around town. He has a steady gaze, pale-blue eyes. He knows where City Hall is. He once worked for the Housing and Redevelopment Board. To start the Greenmarket, he knew which doors to knock on, and why they would not open. He approached the Real Estate Department. "They seemed to think I wanted to rip them off." He affiliated the project with the Council on the Environment of New York City in order to be eligible to receive foundation funds. He tried the Vinmont Foundation, the Richmond Foundation, the Fund for the City of New York, the America the Beautiful Fund. Finally, the J. M. Kaplan Fund said it would match anything he raised elsewhere. He went back to the others, and enough came through. Of the Greenmarket's overall cost—forty-two thousand dollars in 1977—the farmers, renting space, pay a third.

Lewis, twenty years younger, was a colleague of Benepe in Benepe's urban-planning firm, and helped him start the market. They searched for sites where farmers would be welcome, where neighborhoods would be particularly benefitted, where local fruit-and-vegetable stores were unlikely to open fire. Lewis to a large extent recruited the farmers. He sought advice from Cornell and Rutgers, and wrote to county agents, and interviewed

people whose names the agents supplied. He went to roadside-marketing conferences, to farmers' associations, to wholesale outlets. Under his generally disarranged locks, his undefeated shrug, Lewis has a deep and patient intelligence that tends to linger over any matter or problem that comes within its scrutiny. If he is ready to rebuke the farmers (for selling West Coast peaches), he is also ready to listen, without limit, to their numerous problems and even more numerous complaints. Day by day, market to market, he is a most evident link between the farmers and the city. He binds them to it, interprets it for them. Son of a University professor, he has no idea what shoe-peg corn is, but he was born in Brooklyn Jewish Hospital, grew up in Crown Heights, and has a sense of neighborhoods, of urban ways, that reaches from Flatbush to the hem of Yonkers. He is not much frightened by Harlem or intimidated by Fifty-ninth Street. He is a city man, and, more important, he is an emeritus city kid.

After staring up the street for a while, Hlatky puts the peaches back on the truck.

"Cigarette lighters! Cigarette lighters!"

The Zippo man did not grow his produce down home. "Cigarette lighters!" Never mind where they're from. They're fifty per cent off and selling fast. While Lewis goes after the Zippo man—effecting an at best temporary expulsion—I return to my peppers.

"Give me two, please. Just two. I ain't got nobody with me. I live by myself. I throw food in the pot. I stick a fork in it. When it gets soft, I eat it."

"Lysol! Lysol!

A man has come along selling Lysol. He offers cans to Rich Hodgson and, at the same time, to a woman to whom Rich is selling apples. One result of Greenmarket's considerable success is the attraction it presents to street hucksters, not the Sabrett's-hot-dog sort of street venders, who are licensed by the city, but itinerant merchants of the most mercurial kind. Some conceal things under their jackets. They are readily identifiable because their arms hang straight, as whose would not with five pounds of watches on either wrist? They sell anything—ski hats, tooled-leather belts, turquoise rings, inflatable airplanes. They spread blankets on the sidewalk and sprinkle them with jewelry. Man comes by now selling his dog. They always try to sell to the farmers, who are possibly better customers than the customers. A guy came up to me once in Brooklyn and offered me a case of hot mangoes. I assume they were hot. What other temperature could they be when the caselot price was two dollars? Another day in Brooklyn, a man pulled up to the curb in an old Chevrolet sedan, opened the trunk, and began selling Finnish porgies. Cleaning them, he spilled their innards into a bucket and their scales fell like snow on the street.

As to nowhere else, though, such people are attracted to 137th Street. All day they come by, selling coconuts, guavas, and terminal-market cucumbers out of carts from the A. & P. "Crabs! Crabs!" The crab man has bright-red boiled blue crabs. Three for a dollar, they dangle from strings. Now a man arrives with a rolling clothes rack crammed with sweaters and pants. He wants eighteen dollars for a two-piece ensemble. "No, thanks" a woman tells him. "I don't want to go to jail." She turns to the peppers and glances up at me, saying, "If a cop came around the corner they'd drop that stuff and run." Now a young man and woman in turtlenecks and Earth shoes wheel up a grocery cart full of comic books, cotton hats, incense, and tube socks. He has a premature paunch. Her eyes are dreamy and the lids are slow. She leans on him in a noodly manner. She looks half asleep, while he looks half awake, as if they were passing each other in the middle of a long journey. "Tube socks! Incense! Tube socks!" The man fixes his attention on Rich. "It's going to get—I'm telling you—*cold* on that farm, man." The socks are still in the manufacturer's package, marked a dollar ninety-five a pair. "Cold, man, I'm telling you. Here's six pairs for five dollars." Sold.

Minerva Coleman, who has been watching, stares after the couple as they go. "That must have been a Long Island girl," she says. "A Harlem girl would know I'd break her ———."

There was a firehouse across the street once. It was razed, and a vest-pocket park is there now, smothly paved, with a chain-link fence, three strands of barbed wire, and a fan-shaped basketball backboard that (most weeks) has a net. When I am not turned toward the scale, and while I wait for customers to fill their plastic bags, I often watch the games across the street. Some of the boys who play there move like light, their gestures rehearsed, adroit. They go both ways, hit well from the outside. The game they play, almost to the exclusion of any other game, begins from the outside.

Say five, in all, are playing. One starts things off with a set from outside.

"How much are the peppers?"

"Three pounds for a dollar."

"Pick me out three pounds. I'll be back after I get some corn."

"Where are your beans? What happened to your beans today?"

The shooter hits five straight from twenty feet. He is a pure shooter. Now he misses. He and the four others go for the rebound. The one who gets the ball is now on his own to try to score, while everyone else tries to stop him. He dribbles right, into the one-on-four. He stops. Jumps. Shoots. Misses.

"Weigh these, please"

"Weigh mine, please."

Another player grabs the ball. Now he makes his moves, trying to score against the four others. The ball pulsates in his hands. His legs are flexed. His feet do not stir. He picks his moment, leaps, arches his back (ball behind his head), scores. The ball is handed to him. He goes outside and shoots an unguarded set. He hits. He shoots another. He misses. Someone else gets the rebound. Now it is four against that player as he tries to drive and score. He misses. The player who gets the rebound now faces the four others. . . .

"Mister, will you weigh these peppers? Do you want to sell them to me or not?"

"Sorry. Three and a half pounds. Take them for a dollar." Who wants to make change?

After a reverse pivot that is fluid beyond his years, the kid with the ball scores. He walks to the outside. He takes a free set. Swish. He hits again.

"Weigh these, please."

The shooter misses. The rebound goes high. All five are after it. The boy who grabs it turns and faces the mob.

We see the same game all over the city. Always, the player with the ball is alone, the isolated shooter, the incubating star—versus everyone else on the court. There is never a pass, a screen, a pick, a roll, a two-on-two, a two-on-three, a three-on-two, a teammate. I turn with some peppers and rattle the scale.

Bartley Bryt comes by and says a cop caught a thief who was ripping off Sekulovski. Bryt is young and white, in bluejeans. Pumas, and a rugger shirt. He is doing a summer job, helping administer the market. He is slim, good-looking, with a shock of light-brown hair—Dalton School, 1977.

I ask him how old the thief was.

"About forty-five," says Bryt. "The only elderly person I've ever seen stealing here. When there's trouble here, it's usually from kids, but there's not much trouble, because the community feeling is so great here. People are so nice to you. Where I live, people go in and turn on their air-conditioners and that's it."

"Where do you live?"

"Seventy-fifth Street between Park and Lexington."

"How much are the cucumbers?"

"Eight for a dollar."

"Give me some ham knuckles, too."

"No ham knuckles."

"I was here earlier and there was ham knuckles here."

"Not at this truck, ham knuckles."

"Bobby Van Houten has ham knuckles."

"Yeah. He's killing us."

"Look at all those people at his truck. They're ten deep."

"He'll gross five thousand dollars today if he takes home a cent."

"He buys the stuff at a slaughterhouse."

"I'd like to see those pigs he talks about."

"If he raises pigs, I raise bananas."

The Van Houtens, next to us, are working from a truck with an eighteen-foot box. There is no larger vehicle here. To secure their choice position—on the corner, at the mouth of the street—they arrived at four in the morning on the first Harlem Tuesday. Wherever you are at the start, you remain for the summer. The Van Houtens are nothing if not aggressive. With their high-piled fruit-and-vegetable displays and sixteen hundred pounds of ham hocks, hog jowls, and additional pig products coming out of a cooler on the truck, they are frenetically busy. Of the five people working there, four are named Van Houten. Like the Hodgsons', their operation is a family conglomerate. Behind the peaches and peppers is Jim Van Houten, stocky, cheerful, nervous, with a big lick of dark brown hair shading a round, thoughtful face. He is a Master of Business Administration (Cornell University). His wife Sue Ellen, is close to the cabbage. She brings paperbacks for lulls in the glut. Kay Van Houten, Jim's mother, is dark-haired, trim, youthful, and small. Tomatoes, peppers, jowls alike, she works tirelessly at the scales, the all-day conversion of weight to cash, which she accumulates in a steel box in the cab of the truck. Her other son, Bobby, while selling at least as much as anyone else, periodically leaps onto the truck, lights his pipe, heaves out produce, jumps off the truck, builds and rebuilds high displays, lights his pipe, and moves up and down, behind the tables exhorting, encouraging, assisting, scolding, spreading the contagion that seems to impel him, his need to get the best of the bazaar. Bobby has pale-blue eyes. He has patrician high cheekbones, turn-of-the-century sideburns, the heroic good looks of an archaic star. He is obviously the boss—the field boss, anyway, his father being the corporate mastermind, the absentee truckiord.

"They have a big place out in Pennsylvania."

"They *say* they have a big place out in Pennsylvania."

"Yeah. I happen to know they run a fruit stand in Rockland County."

"They buy their stuff wholesale and bring it from the stand."

"Bobby is a truck driver, not a farmer. He makes long hauls in big rigs."

"I seen him at Hunts Point."

"Look at the stuff on their truck—all those brand-new cartons of Lake Ontario celery."

"They got lettuce from upstate, too."

"Florida cabbages."

"Long Island potatoes."

"Pennsylvania my ass."

"You know the name of their place? It's called Van Houten's Hunts Point Farms."

The Van Houtens last year spent ten thousand dollars on seeds. Their place—near Orangeville, Pennsylvania—is on a tributary of the Susquehanna River, about a hundred and fifty miles west of New York. They rent a couple of hundred neighboring acres as well, so they have about five hundred under

cultivation. They work not just busily but feverishly—from dawn some distance into dark—with little time and probably less inclination to contemplate the scenery they are helping to preserve. Their farm is among the intervales where the Poconos and the Alleghenies reach toward one another in the central Appalachian uplift. Their terrain is like rising bread against backdrops of long, low mountains. These Pennsylvania ridges, steep-sided and flat-topped, run on for tens and even hundreds of miles. Knob Mountain, the nearest to the Van Houtens, stands high above the farm, its slopes mainly wooded but open, too, with fairways of upland pasture. There are red covered bridges, nut-colored unpainted barns, narrow crown roads among corn shocks in the autumn—pheasant land. It is a strangely mottled country, where, not many miles to the east, you can make your way in brilliant sunshine across long vistas of standing grain—pastures full of Guernseys, barns full of milk—all the while approaching a high plateau on which there is stationary cloud. When you go up there and out of the warm country-side you enter a spitting fog and before long come into the slippery streets of a small corroding city where atmospheric acids are eating the J. C. Penney and the town common is a huge anthracitic pit. Not much seems to link these plateau towns with the needle-point-sampler valleys that surround them—not much except, perhaps, the pheasant. The bird is curious and goes up there, too—pecks at the edges of the pit. On a coal-town street, I killed one with my car one day when I went out with Bob Lewis to visit the Van Houtens. The right front fender broke its neck and little else. I tossed it into the back seat and dressed it later at home, expecting pea coal to come out of its gizzard but discovering instead the pebbles of the valley. Stuffed with bread, raisins, and Greenmarket onions, it was as succulent a bird as ever climbed a hill.

The Van Houtens' packinghouse is a white barn in a state of picturesque dilapidation. The farmhouse is brick, square, solid, and Dutch, with a windowed cupola at the apex of a pyramidal roof. It is surrounded by heavy oaks and maples, and a hundred acres of field corn are visible from the kitchen. Bobby's parents have a place nearby, while he lives in the farmhouse with his wife, Anne, who is a schoolteacher, and their four children, including twins. He was wearing the same threadbare jeans and faded denim shirt he wears in New York, his belt buckle roughly a pound of steel, on which raised letters said "FIELD BOSS." We cruised in his pickup, climbed steep roadless hills, and crossed bottomlands crowded with cabbage—savoy cabbage, with its spinachlike cobbled leaves. Cucumbers, broccoli, collards, cauliflower, cantaloupes, eggplant, peppers, lettuce—Van Houten's "Hunts Point" Farms. "Yeah," said Bobby. "The good Lord made twenty-four hours in a day and seven days in a week, and we work every bit of it. We spray with parathion. We spend forty thousand a year for fertilizer and chemicals, and another two thousand for the chopper that spreads the chemicals. Parathion is deadly, but in three days it's dissipated. It will never take the place of DDT. It's not as safe, either. You can drink DDT straight. It won't hurt you. During the war, Italian prisoners were sprayed with DDT. No one ever died from it. The government hurt us bad when they took away the DDT."

There was a stock pond and a fenced-in woodlot, with pigs and cows among the hemlocks, cherries, and pines. Pigs were squealing and fighting for position around an Agway feeder. We leaned on the fence and watched. "Field-corn prices are dropping every week, and the futures are worse," said Bobby, with a suck and a puff and a dash of flame. He uses a steel cylindrical lighter that shoots a foot-long tongue of gas. "So right now it pays to put the field corn through the pigs. If the price goes up, it won't pay. Pigs go well behind cows. They run together. Pigs will eat what the cows won't eat. A third of corn goes through a cow. Pigs thrive on that stuff." Burlap bags soaked in crankcase oil were wrapped around the trunks of trees. After the pigs rub up against the trees the oil that coats them discourages lice. In a lean-to deep in the woodlot rested a pig three times the size of any of the other pigs. "The truck must have missed that one," Bobby said. "And more than once. Some of them hide in the woods when the truck comes. We have up to a hundred and fifty here at any one time. We send off about twenty a week. The slaughterhouse gives us extra jowls and knuckles for the New York market. No one around here eats that stuff. You'd be surprised what they do eat, though. When the testicles are sliced off, the more farmer farmers take them in and cook them. I throw them away." Standing nearby was a Mercedes-Benz diesel fifty-ton refrigeration unit, keeping cool the knuckles, jowls, spareribs, sausage, baloney, and smoked neck bones that within a few hours would be transferred to the truck for Harlem.

Van Houten Farms is a heavy supplier for Mrs. Smith's Pies, of Pottstown, Pennsylvania, where Mrs. Smith bakes ten thousand pumpkin pies an hour and uses Van Houten Boston marrow squash. They are grown by the no-till method. Just plant the seeds and let the field go—sixty-five acres, two thousand tons of squash, big orange bombs hidden under thatches of weed.

"Did you ever see ketchup before it went into a bottle?" Bobby said, turning into a field of tomatoes grown for the kitchens of Chef Boy-ar-dee. They appeared to have been harvested by migrant sauropods who had ripped whole vines from the soil and thrashed the tomatoes free. Hundreds of thousands—crushed and split—were now ready for delivery. On arrival at the plant they would be unloaded with a high-pressure hose—tomato slurry. We went up on a dome of channery shale, hundreds of feet above the surrounding terrain, where tomatoes grew wider than the spread of a man's hand, almost to the size of curling stones. The ground was so steep that, to hold the soil, rows of hay and sod were interspersed with the vines. While the low-ground tomatoes were on the way to Boy-ar-dee, these would be rolling toward Harlem.

The Van Houtens sell to Boy-ar-dee for three cents a pound. The tomatoes they take to Harlem return ten times that. They sell tomatoes at Hunts Point, too—for less than half of what they get in the Greenmarket. "Lots of times we don't make money selling wholesale. When corn goes at Hunts Point for two-seventy-five a box, there's nothing left for us." From big canneries to city sidewalks, they sell at every type of outlet. They have to—to dispense their considerable production. And, as one would imagine, their roadside stand is not a card table. Rather, it is a fair-sized store. It is close to the New York-New Jersey line, less than twenty miles north of the George Washington Bridge. "It attracts the carriage trade," Bobby said. "Cadillacs, Lincolns, Jaguars. We pay a hundred and seventy dollars a week in taxes there, and the customers are bitches. One Tuesday in Harlem, we had six salespeople working the counter. *Each* of the six grossed as much as the roadside stand for that day—and four people were working the stand. I'd rather wait on those people in Harlem anyway. I'd rather wait on them for ten hours than on our affluent trade at the stand for ten minutes. If I had my choice I'd take a market every day solid black. Second choice I'd take the Spanish, last of all the whites. They're a solid pain in the ———. They ask if something has sodium nitrite. Well, to preserve something, the only alternative is embalming fluid. Some woman gets out of a Lincoln Continental and peels back an ear of corn. 'Oooo, a worm!' she says. 'Do you use chemicals on this corn?' And I say, 'Lady, you can't have it both ways.' The people in Harlem appreciate our being there. We sell cabbage three heads for a dollar there. Three heads for a dollar is a good deal for those people and a good deal for us. They rarely complain. They tell you how nice the tomatoes are, how nice the sweet corn is. It gives you a nice feeling at the end of the day."

The Van Houtens are, as Bobby says it, "Blauvelt Holland Dutch," yielding only twenty years' seniority to Henry Hudson himself. Gerrit Hendricksen Blauvelt was their seminal patroon. His sons were part of a syndicate that bought the Tappan Patent, west of the Tappan Zee. "Oh, yeah, we're S.A.R., C.A.R., D.A.R. Both my mother and father are Blauvelts. I'm Blauvelts fourteen ways. The Van Houtens didn't come over until 1670. The house I grew up in was built in 1731." The original address was Muddy Brook, New York, a name that was changed a century ago—in an early example of suburban semantics—to Pearl River.

When Bobby was growing up, the family ran a dairy farm in Pearl River that is now three fathoms deep—a reservoir owned by the Hackensack Water Company. In 1953, when he was in kindergarten, he and Jim put up a table beside the road and sold vegetables from the family garden. With the money they took in, they bought their first TV. They planted a larger garden the next year, and bought an automatic washing machine for their mother. Four years later, they built the present stand. In the late sixties came the reservoir. "Dad and I were not going to be storekeepers. We didn't want to grow things on a few acres for window dressing and bring in all the rest—like most roadside stands." From Albany to Delaware, they searched for a farm, and, answering an ad, found the one in Pennsylvania. In the big woodlot where the pigs now hide were thirty-eight oaks, each with a girth of eight to ten feet, and coveted by cabinetmakers. These oaks were older than the nation—O.A.R. Fortunately, the previous farmer had repeatedly refused to sell them. As a result, the farm was in a position to make a payment on itself. The Van Houtens sold the trees.

Bobby, out of Pearl River High School, did not go on to college. "What could it teach me?" His extraordinarily integrated knowledge of what was coming to be called agribusiness would develop empirically on the farm, and his passion for the driving of behemoth trucks would develop on the road. Twenty-six hours here, thirty-three there, he often takes field corn from Orangeville to sell to cattlemen in Florida, and something in him lives for those journeys. "I know every route number going to and around the South, and that's worth something. It may not be worth much, but it's worth as much as Greek mythology." Once, in a big tandem-axle twin-screw sleeper-cab tractor-trailer, he started alone out of Vero Beach with twenty-five tons of Indian River oranges, and thirty-six hours and no pills later he delivered the fruit in Toronto. The air there was twenty below zero and he was still in his Florida shirtsleeves. He had supported his stamina with "sixteen gallons of coffee." He feels sheer contempt toward all the young drivers on pills.

Hanging around Hunts Point over the years, Bobby developed considerable admiration for the savoir-faire of a certain broker there. He once observed him taking on a buyer to whom he had sold rotting peppers. There had been a layer of good ones on the top. Now the buyer was back in a rage, and the broker was rising to the situation. Speaking with disarming and convincing candor, he succeeded in calming the man down. Then he sold him another load of peppers. As these, too, went out of the terminal, they

were split and seamy but covered with a healthy green-pepper veneer. Bobby said, "You're crazy. You're really crazy. That guy will kill you."

"Bobby, you don't understand," said the broker. "Think about it. And tell me a better way to get that man back here tomorrow."

"Yeah, this is some business," Bobby said, finishing the story. "We have friends in New Jersey, and they hope we'll have a cyclone, or a flood. We hope they'll have a hurricane. Things like that drive the prices up for the lucky ones. Every year has its own difficulties. In 1972, we had a dry, dry summer. We irrigate from two creeks, and they were running very low. We took a bulldozer and dammed both of them—ended them right here. People downstream all said it was the driest year they'd ever seen."

We went into the farmhouse for dinner with Bobby's wife, Anne, and his father, James, who has the air of a contented President retired on a farm in Pennsylvania—a big man with a baby's grin, a tan scalp, protruding ears, a swife staccato manner of speech. Like Hodgson *père*, though he runs the place, prepares the trucks for Bobby's trips to town. "Your market there in Harlem, now, your colored want a good heavy yellow corn," he observed, and went on to say that among the various outlets for their produce the Greenmarket, by a wide margin, is in every way the best. Anne set turkey before us and gravy, stuffing, and single tomato slices that overlapped their plates. "It's too good to be true," she said. "The Greenmarket is too good to be true." Before sitting down herself, she added a buttery-crusted peach pie that was above two inches thick. "Something will spoil it," she went on. "I know it will. It's just too good to be true."

"It's a land of plenty," Bobby said.

"It's a land of too much," said his father.

Monday evenings Bobby is loaded and away by nine. Over the mountains and through the Water Gap he runs four hours to Pearl River, where he sleeps two hours in the cab. Jim, who lives nearby, meets him at three, and they unload produce for the stand. They then load on onions, potatoes, fruit—the things they will sell in the city that they don't grow on the farm. By four-thirty, Bobby is away for Harlem. By six he is selling hard. Now, in the afternoon, he is still unflaggingly at it—displays descending, his mother and brother beside him, scales rocking gently like boats.

Bartley Bryt brings us the news. Like the rest of us, the Van Houtens keep their cab doors locked, but this afternoon for a short time someone forgot. The door (it was not the outside one but the door in *their* side of the truck) was left unlocked for perhaps fifteen minutes. We are watched more closely than we think, for in that brief lapse someone, somehow—coming possibly from under the truck—reached into the cab and took the steel box there, which contained upward of two thousand dollars. Without detectable changes of expression, the family continues to sell.

Brooklyn, and the pickpocket in the burgundy jacket appears just before noon. Melissa Mousseau recognizes him much as if he were an old customer and points him out to Bob Lewis, who follows him from truck to truck. Aware of Lewis, he leaves the market. By two, he will have made another run. A woman with deep-auburn hair and pale, nervous hands clumsily attracts the attention of a customer whose large white purse she is rifling. Until a moment ago, the customer was occupied with the choosing of apples and peppers, but now she shouts out, "Hey, what are you doing? Your hand is in my purse. What are you doing?" The auburn-haired woman not only has her hand in the purse but most of her arm as well. She withdraws it, and with intense absorption begins to finger the peppers. "How much are the peppers? Mister, give me some of these!" she says, looking up at me with a gypsy's dark, starburst eyes. "Three pounds for a dollar," I tell her, with a swift glance around for Lewis or a cop. When I look back, the pickpocket is gone. Other faces have filled in—people unconcernedly examining the fruit. The woman with the white purse has returned her attention to the apples. She merely seems annoyed. Lewis once sent word around from truck to truck that we should regularly announce in loud voices that pickpockets were present in the market, but none of the farmers complied. Hodgson shrugged and said, "Why distract the customers?" Possibly Fifty-ninth Street is the New York Pickpocket Academy. Half a dozen scores have been made there in a day. I once looked up and saw a well-dressed gentleman under a gray fedora being kicked and kicked again by a man in a green polo shirt. He kicked him in the calves. He kicked him in the thighs. He kicked him in the gluteal bulge. He kicked him from the middle of the market out to the edge, and he kicked him into the street. "Get your ass out of here!" shouted the booter, redundantly. Turning back toward the market, he addressed the curious. "Pickpocket," he explained. The dip did not press charges.

People switch shopping carts from time to time. They make off with a loaded one and leave an empty cart behind. Crime on such levels is a part of the background here, something in the urban air, so many parts per million. The condition is accepted with a resignation that approaches nonchalance. The Van Houtens' loss was extraordinary but theirs was by no means the only cash box that has been stolen. We lost one once in Brooklyn, with something like two hundred dollars. For various reasons, suspicion immediately attached itself to a part-time employee who was selling with us and probably handed the box in a bag to a confederate. The previous Wednesday, he had been working for another farmer, who discharged him for dishonesty. Now, just after our cash box disappeared, he began saying, and repeating, in an excited voice, "It's real, man. It's real. We don't like it but that's reality—reality, man—and there is nothing we can do." Rich felt there *was* something he could do. He said, "You're fired."

Politely, the man inquired if he could know the reason for his dismissal.

"Sure," Rich said. "I don't trust you."

"That's cool, man, cool," said our ex-employee. He took off his apron and was gone.

Most thievery is petty and is on the other side of the tables. As Rich describes it, "Brooklyn, Fifty-ninth Street, people rip off stuff everywhere. You just expect it. An old man comes along and puts a dozen eggs in a bag. Women choosing peaches steal one for every one they buy—a peach for me, a peach for you. What can you do? You stand there and watch. When they take too many, you complain. I watched a guy one day taking nectarines. He would put one in a plastic bag, then one in a pocket, then one in a pile on the ground. After he did that half a dozen times, he had me weigh the bag."

"This isn't England," Barry Benepe informed us once, "and a lot of people are pretty dishonest."

Now, in Brooklyn, a heavyset woman well past the middle of life is sobbing pitifully, flailing her arms in despair. She is sitting on a bench in the middle of the market. She is wearing a print dress, a wide-brimmed straw hat. Between sobs, she presents in a heavy Russian accent the reason for her distress. She was buying green beans from Don Keller, and when she was about to pay him she discovered that someone had opened her handbag—even while it was on her arm, she said—and had removed several books of food stamps, a telephone bill, and eighty dollars in cash. Lewis, in his daypack, stands over her and tells her he is sorry. He says, "This sort of thing will happen wherever there's a crowd."

Another customer breaks in to scold Lewis, saying, "This is the biggest rip-off place in Brooklyn. Two of my friends were pickpocketed here last week and I had to give them carfare home."

Lewis puts a hand on his forehead and, after a pensive moment, says, "That was very kind of you."

The Russian woman is shrieking now. Lewis attends her like a working dentist. "It's all right. It will be O.K. It may not be as bad as you think." He remarks that he would call the police if he thought there were something they could do.

Jeffrey Mack, eight years old, has been listening to all this, and he now says, "I see a cop."

Jeffrey has an eye for cops that no one else seems to share. (A squad car came here for him one morning and took him off to face a truant officer. Seeing his fright, a Pacific Street prostitute got into the car and rode with him.)

"Where, Jeffrey?"

"There." Jeffrey lifts an arm and points.

"Where?"

"There." He points again—at trucks, farmers, a falafel man.

"I don't see a policeman," Lewis says to him. "If you see one, Jeffrey, go and get him."

Jeffrey goes, and comes back with an off-duty 78th Precinct cop who is wearing a white apron and has been selling fruits and vegetables in the market. The officer speaks sternly to the crying woman. "Your name?"

"Catherine Barta."

"Address?"

"Eighty-five Eastern Parkway."

Every Wednesday, she walks a mile or so to the Greenmarket. She has lived in Brooklyn close to half her life, the rest of it in the Ukraine. Heading back to his vegetables, the officer observes that there is nothing he can do.

Out from behind her tables comes Joan Benack, the baker, of Rocky Acres Farm, Milan, New York—a small woman with a high, thin voice. Leaving her tropical carrot bread, her zucchini bread, her anadama bread, her beer bread, she goes around with a borrowed hat collecting money from the farmers for Catherine Barta. Bills stuff the hat, size 7—the money of Alvina Frey and John Labanowski and Cleather Slade and Rich Hodgson and Bob Engle, who has seen it come and go. He was a broker for Merrill Lynch before the stock market imploded, and now he is a blond-bearded farmer in a basketball shirt selling apples that he grows in Clintondale, New York. Don Keller offers a dozen eggs, and one by one the farmers come out from their trucks to fill Mrs. Barta's shopping cart with beans and zucchini, apples, eggplants, tomatoes, peppers, and corn. As a result, her wails and sobs grow louder.

A man who gave Rich Hodgson a ten-dollar bill for a ninety-five-cent box of brown eggs asks Rich to give the ten back after Rich has handed him nine dollars and five cents, explaining that he has some smaller bills that he wants to exchange for a twenty. Rich hands him the ten. Into Rich's palm he counts out five ones, a five, and the ten for a twenty and goes away satisfied, as he has every reason to be, having conned Rich out of nine dollars, five cents, and a box of brown eggs. Rich smiles at his foolishness, shrugs and sells some cheese. If cash were equanimity, he would never lose a cent. One day, a gang of kids began taking Don Keller's vegetables and throwing them at the Hodgson truck. Anders Thueson threw an apple at the kids, who then picked up rocks. Thueson reached into the back of the truck and came up with a machete. While Hodgson told him to put it away, pant legs went up, switch-

blades came into view. Part of the gang bombarded the truck with debris from a nearby roof. Any indication of panic might have been disastrous. Hodgson packed deliberately, and drove away.

Todd Jameson, who comes in with his brother Dan from Farmingdale, New Jersey, weighed some squash one day, and put it in a brown bag. He set the package down while he weighed something else. Then, reaching for the squash, he picked up an identical bag that happened to contain fifty dollars in rolled coins. He handed it to the customer who had asked for the squash. Too late, Todd discovered the mistake. A couple of hours later, though, the customer—"I'll never forget him as long as I live, the white hair, the glasses, the ruddy face"—came back. He said, "Hey, this isn't squash. I didn't ask for money, I asked for squash." Whenever that man comes to market, the Jamesons give him a bag full of food. "You see, where I come from, that would never, never happen," Todd explains. "If I made a mistake like that in Farmingdale, no one—no one—would come back with fifty dollars' worth of change."

Dusk comes down without further crime in Brooklyn, and the farmers are packing to go. John Labanowski—short, compact, with a beer in his hand—is expounding on his day. "The white people are educating the colored on the use of beet greens," he reports. "A colored woman was telling me today, 'Cut the tops off,' and a white woman spoke up and said, 'Hold it,' and told the colored woman, 'You're throwing the best part away.' They go on talking, and pretty soon the colored woman is saying, 'I'm seventy-three on Monday,' and the white says, 'I don't believe a word you say.' You want to know why I come in here? I come in here for fun. For profit, of course, but for relaxation, too. I like being here with these people. They say the city is a rat race, but they've got it backwards. The farm is what gets to be a rat race. You should come out and see what I—" He is interrupted by the reappearance in the market of Catherine Barta, who went home long ago and has now returned, her eyes hidden by her wide-brimmed hat, her shopping cart full beside her. On the kitchen table, at 85 Eastern Parkway, she found her telephone bill, her stamps, and her cash. She has come back to the farmers with their food and money.

West of the suburbs, thirty and more miles from Manhattan, the New Jersey-New York border terrain is precipitous and glaciated and—across a considerable area—innocent of high-speed roads. Minor roads run north and south, flanking the walls of hogback ridges—Pochuck Mountain, Bearfort Mountain, Wawayanda Mountain—but the only route that travels westward with any suggestion of efficiency is the Appalachian Trail. The landscape is remarkably similar to Vermont's: small clearings, striated outcroppings, bouldery fields; rail fences under hard maples; angular roads, not well marked, with wooden signs; wild junipers signalling, as they do, penurious soil; unfenced cemeteries on treeless hillsides; conflagrationary colors in the autumn woods. Moving among such scenes, climbing, descending, losing the way and turning back—remarking how similar to rural New England all this is—one sooner or later tops a rise where the comparison in an instant blinks out. Some distance below, and reaching as far as the eye can conveniently see, is a surface perfectly flat, and not merely flat but also level, and not only level but black as carbon. There are half a dozen such phenomena in this region, each as startling to come upon as the last. Across their smooth expanses, distant hills look like shorelines, the edges of obsidian lakes. The black surfaces were, indeed, once fluid and blue—lakes that stood for many centuries where north-flowing streams were blocked by this or that digital terminus of the retreating Laurentide glacier.

Streamborne silt and black organic muck gradually replaced the water—prognosticating Lake Mead, Lake Powell, Lake Sakakawea, and the Lake of the Ozarks some years hence when they have filled in solid behind their dams. The surface of the mucklands (as they are called) is not altogether firm. It will support a five-inch globe onion. For that matter, it will support a tractor—but it is not nearly dense enough to hold up a house. There are only a few sheds on the wide flats. People live on "islands," once and present islands, knobs that break through the black surface just as they did when it was blue. Pine Island, New York, is a town in a black-dirt sea—the largest and most productive muckland of them all. Maple Island, Merritts Island, Big Island, Black Walnut Island are spaced across it as well, and their clustered houses resemble small European farming communities. The fields surrounding them seem European, too, for the acreages of black dirt are rule off in small, familial segments, like vineyards in Valencia or the Côte d'Or. No fences, no hedgerows interrupt the vista or separate one farmer from another. Plots abut. The vegetables that come out of this rich organic soil are in their way as special as wines: tall celeries, moist beets, iceberg lettuce as crisp as new money, soft Boston salad lettuce, broccoli, cauliflower, carrots—and, above all, onions. What the beluga is to caviar the muckland is to the onion. Millions upon millions of onions are grown in the black dirt. Early flat onions. Hybrid onions. Red Globe, White Globe, Yellow Globe onions. Buccaneer, Bronze Age, Benny's Red Onions. Tokyo Long White Bunching Onions. Harvestmore, Ebenezer, Nutmeg Onions. Yellow sweet Spanish late mild onions. Everywhere you go and everywhere you look are bags and boxes and bushels of onions. Pine Island, where the crop is warehoused, is Onionapolis. The hot days are dry on the muckland. After leaving it, in the evening, farmers sometimes go hopping from island to island, have a beer or two at the Meadow Tavern, and two to four at Mike's Tavern, and four to eight at Leo's Tavern in order to be ready for the Red Onion, a sort of staging area, or base camp, as good a place as any to prepare an all-out assault on the Jolly Onion.

Onion boxes, in this early-autumn harvest season, are in random stacks across the level plain. All day long, harvesting rigs move slowly among them like floating dredges, scooping the powdery soil, "pulling onions." John Labanowski has been pulling onions for twenty days now, stirred toward delirium by the fine black dust, the hammering sun, the asynchronous cacophony of his odd machine. The lower end of a steel conveyor belt, which is angled toward the ground like a stairway, moves forward through the soft earth and nuzzles under the onions. The conveyor consists of runglike rods set apart so that dirt can fall through, but not as far apart as the diameter of an onion. Tops and all, the onions ride uphill. The tops are brittle and dry. Bolted to the rig is a fan that could fly a Jenny. It blows off the tops and scatters them downwind. Clean now, appearing just as they will in a market, the onions reach the top of the conveyor, turn a corner, and roll down a chute.

Andy Labanowski, John's uncle, is sitting on a cantilevered seat shoving crates into place beneath the downpour of onions. Roughly four hundred and fifty will fill a crate—in nine seconds. The crates are wooden and heavy. Their loaded weight is eighty pounds apiece. With his left hand, Andy begins to ease one (on rollers) off the harvester, and with his right hand he moves another one below the falling onions. Empty crates are piled on the harvester almost to the point of toppling, and John feeds them down to Andy while the whole grotesque contrivance is kept in motion by John's father, John Labanowski, who sits out in front on a steel-padded tractor—taciturn, enigmatic, in his visored cap and tinted glasses—and advances the enterprise at ten to the minus seven miles per hour. There are thunderheads along the border of the sky, but even if they were directly above us we could not hear the rumbling. Three separate engines power the rig. We are well into the afternoon now, four of us working this Orange County clipper ship. Our skins are as black as the four of spades. There are white doughnuts around the eyes. Old John has the look of a coal miner moments out of the shaft. His brother, Andy—spare, darkeyed, gregarious—is courting sunstroke under a Budweiser hat that has turned black. Young John, also called Yash, came to work in high-top leather boots, gray twill trousers, monkey-fist gloves, a blue porkpie hat, and a pink T-shirt—all of which now are solid black. He turns away from a gust of dirt. "You can get blowed out," he says. "Winds blow fine dirt so hard it sometimes cuts the tops. But don't worry. This dirt will never kill you. My father's sixty-three and he's still going."

A stone jams the conveyor, and John the elder stops the tractor, gets off, picks up a wrench, and crushes the stone. When Polish farmers first cleared the muckland, stones were hauled in and dumped on the soil to help it support the weight of horses. There are fifty Labanowskis in the valley now. Their cousins the Osczepinskis—who also go to Greenmarket—farm here, too. The harvester moves on. Its weight shakes the earth. The tenth part of an acre vibrates around us like a quaking bog. There are cracks in the dry muck—crevasses of a sort—that will go as much as six feet deep. Onions by the hundred are lost in the cracks. The soil is so rich it will burn. Now and then a farmer flicks a cigarette off his rig and starts a ground fire. Old John, who smokes, has put out three such fires on his fifty acres this summer. Blazing black dirt is not easily controlled. In 1964, there was a fire in which a couple of thousand acres of soil burned. The fire crossed many property lines. It was harvest time, and crated onions were stacks across the plain. Fifteen million onions roasted. The fallout quickened appetites in Greece. "There were big winds. You couldn't go nowheres evenings. The air was too thick to see." A tractor blew up. The fire engines of many towns and a firefighting helicopter converged upon the muckland without significant effect. The fire lasted more than a week, and went out under long heavy rains.

John's father, John, flies in chartered aircraft to spy on onions elsewhere in the state. He is the Francis Gary Powers of the Labanowskis. If black-dirt farmers know the stages of the harvest in competitive counties, they can decide whether to wait or pull. Labanowski and his wife and another farmer and Tex Sobiech, of the Pine Island vegetable association, hire a twin-engine plane at the airfield that was Stewart Air Force Base, and, taking off over Hodgson's Brussels sprouts, head north by northwest—to Canandaigua, Canastota, Batavia, Elba, Fulton, Oswego. They land in some places and snoop by car. They fly low over other checkpoints and bulbous destinations.

Lurching onward. It is now my turn to align the boxes under the thundering onion-fall. One small timing error and two hundred onions crash in your lap, spew out over the ground. I somehow lose a foot between two rollers, and nearly crack an ankle. "I guess that's dangerous," I remark, recovering the foot.

"On a farm, everything is dangerous," says Yash.

After thirty minutes of filling boxes, my arms feel as if they have gone eighteen innings each. I scarcely notice, though, under the dictates of the action, the complete concentration on the shifting of the crates, the hypnotic effect—veiling everything else in

this black-surfaced hill-bordered surreally level world—of the cascade of golden onions. Onions. Onions. Multilayered, multileveled, ovate, imbricated, white-fleshed, orange-scaled onions. Native to Asia. Aromatic when bruised. When my turn is over and a break comes for me, I am so crazed with lust for these bulbous herbs—that I run to an unharvested row and pull from the earth a one-pound onion, rip off the membranous bulb coat, bare the flesh, and sink my teeth through leaf after leaf after savory mouth-needling sweet-sharp water-bearing leaf to the flower-stalk that is the center and the secret of the onion. Yash at the end of the day will give me three hundred pounds of onions to take home, and well past the fall they will stand in their sacks in a corner of the kitchen—the pluperfect preservers of sweet, fresh moisture—holding in winter the rains of summer.

We quit in early evening, having filled two thousand crates with a hundred and fifty thousand pounds of onions, which would bring thirty thousand dollars at Greenmarket prices if only so many could move there. They will bring about eight thousand dollars at the current (and not attractive) wholesale price. They are five per cent of the Labanowski harvest. In the family's packinghouse on Big Island is a tall refrigerator filled to capacity with beer and surrounded by onion crates full of empty cans. We open sixteen cans to smooth off the day. Beer running down our arms streaks them white. We sit on onion crates with the building between us and the falling sun, and we look out over the black lake to forested hills called Mount Adam and Mount Eve. "Yeah, it gets to be a rat race here," says Yash. "In the city, sometimes, I slam things and screech at the customers. I don't know why. We've made a lot of friends there, you know. I sort of favor Brooklyn. The colored go for the big beets there. The whites go for the small beets. I don't know why. Everybody wants the Boston lettuce. I say, 'If I'd known you wanted to buy it this bad, I'd of grew a whole acre for you.' They like to bargain in Brooklyn. My cabbage is fifty cents a head, and they say they want three for a dollar. Tomatoes they watch the scale. I give them two pounds always for a pound and a half. Fifty-ninth Street? That's like high class. At Fifty-ninth Street, I get people with gloves."

Fifty-ninth Street in the rain, and—despite the awning—the apples and peppers are wet.

"Is there a towel?" a customer asks. She wears a white hat, no gloves.

"Excuse me?"

"A towel. Water weighs something, you know."

I give her three and a third pounds for three. "There you are, madam. I weighed your water."

I remember asking Derryck Brooks-Smith, before I'd ever been here, to describe the Fifty-ninth Street Greenmarket for me, and he said, "White people. *Mucho* white people—or ones passing for white. Be careful with nickels and dimes. People are more careful there than in any other market. Sixty per cent of them are richies, and people who are really making it, and upper middle class, but when you weigh something you have to defend what you say. They'll ask you, 'Why is this a dollar-ten, and not a dollar-five?' They are—shall we say?—a little tight."

Brown bags are breaking open, corn and potatoes spilling into mud. Nonetheless, as midday approaches, the crowd becomes ever more dense and compressed, moving between parallel rows of farmers in complex slow currents.

"Amazing!" I remark across the table. "So many people out in the rain."

"It's this or the supermarket," says a tall woman in a transparent coat, handing me a pack of pears.

"Two pounds even, at three for a dollar twenty-five—that's eighty-five cents, please."

"Twice forty-two is eighty-four."

"Eighty-four, then." Out of one wet dollar. My apron is filled with wet bills. When a twenty comes along, five minutes are required to change it.

"How much are the tomatoes?"

"Three pounds for a dollar."

"How much are the apples?"

"Three pounds for a dollar. It says so there on the sign."

"They are McIntoshes, are they not?"

"Why are they called McIntoshes?"

"After Charles Macintosh (1766–1843), who invented their waterproof skin."

"I'm finally discovering what real vegetables smell like."

"I never knew lima beans came in a pod."

"These beans, they don't snap."

"My bean hasn't snapped in years."

"Where is your lettuce? I'll take a head of lettuce."

"We don't have any lettuce. Try the Labanowskis, across the way."

The rain is not hurting their beautiful lettuce, and Yash is soaked to the skin. In salute, he lifts a Budweiser. People are formed around his truck in scrums. They press in from all sides, bent over, pushing hard, and now and again a head of lettuce flies out to the side. Between beers, the Labanowskis munch carrots. They pick up heads of lettuce and bite into them as if they were large green apples.

"If I had to stay on the farm seven days a week I'd go crazy!" shouts Yash, over the crowd.

"I'd say he went some time ago," mutters a man choosing peppers in a London Fog.

Across the sky immediately to the north of us run the improbable cables of the Roosevelt Island tramway, and from time to time a gondola appears, floating up and eastward, or slowly descending, suspended, increasing the sense of carnival in the scene that lies below. The Greenmarket occupies a quarter of an acre running from Fifty-ninth Street to Fifty-eighth along Second Avenue, bordered with fence-climbing vines and trees of heaven. The lot is rented from the city for a dollar a year. Not long ago it contained a row of shops and restaurants, and upstairs apartments—all of which were wiped out in the name of a fresh approach to the Queensboro Bridge. The approach road has not been built, but tall cooperatives have risen overhead—thirty-six floors and upward, with balconies sprocketing their sides and swimming pools deep in their kidneys. One building has a Rolls-Royce agency on the ground floor. The Greenmarket's obvious popularity at this address is not altogether welcomed by the people of the big co-ops, and through their community board they and others of the upper East Side have imposed some severe if not Draconian rules. No cider by the glass. No brownies by the square. No bread. No jam. No jelly. No houseplants. No balloons. No banners. No music (the market attracts enough riffraff as it is). No market, in fact, in the early or late season—an articulated suspicion that everything ever sold here has not been grown, as claimed, on regional farms.

"How many acres do you have up there?"

"A hundred and twenty."

"And how many chickens?"

"Forty thousand."

"*Forty thousand chickens?*"

"Four times ten to the fourth."

"Are they running loose?"

"They are not running anywhere."

"What do you feed them?"

"Grain products, plant-protein products, animal-protein products, processed grain by-products, dehydrated alfalfa meal with Ethoxyquin added as a preservative, ground limestone, salt, calcium iodate . . ." Prepared for the question, I am reading from a card. "Cobalt carbonate, copper oxide, copper sulfate, iron sulfate, manganous oxide, zinc oxide, methionine hydroxy analogue calcium, Vitamin A supplement, D-activated animal sterol, niacin, calcium pantothenate, riboflavin supplement, Vitamin B–12 supplement, menadione, dimethylpyrimidinol bisulfite, Vitamin E supplement, and folic acid."

"Just as I suspected. And how fresh are the eggs?"

Derryck Brooks-Smith—working Saturday, off from school—speaks up to answer. "They were laid, to be perfectly frank, two days ago or one day ago but not this morning."

"Oh. You call yourself a farmer. The eggs should be fresh."

"They *are* fresh. The yolks will stand up and yell at you. The average egg in a supermarket is three weeks away from the hen."

Brooks-Smith sells two dozen jumbos to a black man with seven bracelets on each wrist, hair in ringlets, and what appears to be about six pounds of tin around his neck. An occasional star comes in here, a face shot out of the midnight tube, and people also arrive in Lincolns, which they park in the Kinney next door. For the most part, though, they are everyday eye-shadowed urban Americans. A dog is in the market. Male. He is not loose. He is leashed. He is, nonetheless, in the market, and a woman makes a strong complaint. "Put up a sign! Keep them out! A person's legs are too precious!" she screams.

She has gained the attention of Bob Lewis. "This woman is referring to the fact that we don't allow dogs in here," Lewis says quietly to the dog's owner.

"She is crazy, too" says the owner, whose dog is six inches high.

The rain has ended and shafts of bright sun have broken through, with the result that mists are rising. An elderly woman tells me she walked a mile to be here. A big bald man in a button-down shirt is drinking beer from a one-quart can. The can is a brown bag. "The heaviest consumption of beer in the world is in Belgium," he informs us. "Belgium is one place where I believe I could get in trouble." He buys six pounds of apples and an ear of corn. There is a short man before us now in lemon-lime-cherry-and grape striped trousers and a shirt in bourbon, burgundy, and crème-de-menthe squares. He explains to a neighbor how to bake an eggplant. "Insert holes in it," he tells her, "or the thing will explode."

Man in a Harley-Davidson T-shirt over a gravid half-mast paunch. He wants the telephone number of the community board so he can call and complain that the farmers are not permitted to sell plants. The number is 679–2287, and Bob Lewis writes it, crossing the stems of the sevens.

Harley-Davidson: "That's a *seven?*"

"That's the way they write sevens in Europe."

"This isn't Europe. This is America. We've got too many Europeans here. And Spanish. What we need is more Americans, not Spanish. They came here—these animals—and won't learn English."

"Honey! Honey here!" shouts Brooks-Smith. (We have no honey. We never sell honey.)

"Eggs! Eggs! Get your eggs here!" shouts the honey man, across the way.

There is a rhythm in the movement of the crowd, in the stopping, the selecting, the moving on—the time unconsciously budgeted to assess one farm against another, to convict a tomato, to choose a peach. The seller comes to feel the rate of flow, and—for all the small remarks, the meeting of eyes—to feel as well the seclusion of anonymity that comes with the money aprons and the hanging scales. Rich Hodgson—handing them their blue free plums. They

don't know he skis in Utah. Melissa Mousseau—changing a twenty for a bag of pears. They don't know that she goes, too. Hemingway and Thueson, the athletes, have heard more encouraging sounds from other crowds. "If you charge for three pounds, give me three full pounds and not two pounds and fifteen ounces, boy."

By a blue Chevrolet panel truck, opposite us, the crowd's rate of flow is perceptibly arrested. The displays there are smaller than most, the list of items shorter. Some of the prices are higher. The zucchini is fifty cents a pound. The corn, the tomatoes, the green beans, the squash are not all superior to their counterparts around the market, and certainly not to ours. So why, then, does the crowd almost crystalize when they come to Alvina Frey? They don't know anything about her except her address (Chad's Farm, Mahwah, New Jersey), if they happen to notice it on the truck, but they can easily sense a consistent standard, a kind of personal signature, in the colors and textures before her.

"What the small farmer offers is fresher, more selected material," Alvina has said. "The small farmer throws away the bad stuff. If my produce is better than some people's, I'll charge more for it. Some of the other guys say I'm Fifth Avenue. I don't care."

She is trim and attractive, petite, with intensity in her narrow, gentle face, and gold earrings that swing and flash. Her hair is short and has flecks of gray in it. Her skin is richly tan, her eyes a bright pale blue. She wears tennis shoes and light-blue denims with bell bottoms and a striped cardigan that looks soft and expensive. At first glance she seems so Short Hills that one wonders whether she is playing, and whether she, as some others have done, starts from home empty and collects her goods on the way to market—hand-me-down potatoes, Hunts Point pears. From years in the sun, though, there are deep radial lines around her eyes. And now, toward the end of the season, her hands are rough, calloused, cracked, her fingers like small bananas. Her nails are split, and the skin that surrounds them is dark with terrarian stains.

She is very busy, and pressed for time, selling. But she takes time to educate, too. She tells people not to be impressed by fat cucumbers. The long thin ones have fewer seeds. To the universal question "Is the corn fresh?" she says, "You can tell for yourself." She reaches for an ear and holds it upside down. If the stem at the break is a damp, pale green, the corn has been off the stalk less than a day. After about twenty-four hours, the stem turns white and chalky, opaque. With more time, it turns various shades of brown. The stem at the break of the ear in her hand is damp, pale green.

"Are the beans fresh?"

"Eat one. If you can eat it and it's juicy and not stringy, it's fresh."

People may also sense when they linger close around Alvina Frey that she is—perhaps a little more than anyone else here—what the Greenmarket is about. Not far from the city, she works a long-established farm that, before the Greenmarket, was on its way to being cut up and sold. While the Hodgsons look for new ground and the Van Houtens have found it, Alvina is all but desperate to hold the farm she has, which her grandmother farmed before her. Her grandmother, in fact, cleared the land. The grandmothers name was Alwine Pelz, and she was born on a farm in Saxony in the eighteen-sixties, emigrating as an adult to New Jersey. Her husband was a loom mechanic, and he found a job in a Paterson mill while she looked through the country for a farm. Fifteen miles northeast of Paterson, in the township of Ho-Ho-Kus, she bought fifty-five acres, close by the New York State line. To irrigate her crops, she dug a well, and walled it with fieldstone, topped by four stone columns and a pagoda roof. With her husband's help, she then constructed a fieldstone barn. "She did what she knew how to do, my grandmother—she farmed. When my grandfather went to the mills in Paterson, he took her tomatoes, corn, beans, potatoes, beets—you name it—to the Island Market and sold them there. He went down with his horse and wagon. He didn't have a truck until the late twenties. My grandmother grew strawberries, too—two or three acres of them—and she had apples. She made cider, and I know damned well that during Prohibition she made hooch. She worked every day out in the fields until six months before she died. She was ninety-one years old. She farmed with horses. She never went in for anything mechanized. Neither did I, at first. Toward the end, when stuff grows high, you can't get in with a tractor. I had horses until fifteen years ago. About the only mechanical thing my grandmother ever had was the cider mill. It was steam-driven and made an awful racket. The ones that lived over the hill, they used to complain."

Her nearest neighbors are no longer over the hill. They are on the hill, around the hill, in the hill. The farm is on an old, blacktopped crown road that has become a suburban street, with a Little League field, swimming pools, trim lawns, and miniwheelbarows a foot high that have house numbers on their sides. The well is still there, however—its masonry tight, its water serving the farm. The stone barn is a high and beautiful structure that is now covered, like a superannuated college, with ivy.

The countryside Alvina remembers from her girlhood had many truck farms, dairy farms, separating what have become contiguous towns: a future that the New Jersey State Highway Department began to sketch in the nineteen-thirties, when it created what is now Route 17, a north-south bifurcation of Bergen County, its purpose being to bring the Catskills closer to the city. Alvina remembers the new road running through garden country with rich dark earth full of carrots, radishes, and beets. All of what is now Paramus—of what is now a levitated Levittown with houses checkered to the curve of the earth—was celeryland and lettuceland. Where Okonite and Minolta are now, Alvina's father, Frank Pelz, had a farm of his own. The day the new road opened he went down it with a load of cabbages. The truck body was not bolted on well, and the load shook loose—heads all over the road. Route 17 has come to be called a "butcher boulevard," and when heads roll on it now they are more likely to be human. Alvina is safe enough at six in the morning as the Chad's Farm truck moves south toward the city past the Olds-Toyota and the Swiss Chalet, past the Tiffany Diner and Pay Less Building Supply, past steak houses the size of high schools. Castle Auto Truck Parts (turrets, battlements). Car Crazy Eddie. The Value House. The Cottage Beautiful. McDonald's, Burger King, Shatzi's Hofbrauhaus (Bavarian half-timber). John Barleycorn's Restaurant. The Golden Plough (a barn full of steak and lobsters). The Jade Fountain ("Chinese-Polynesian"). Nasser Aftab's House of Carpets. When Route 17 opened, New Jersey had twenty-nine thousand farms. Today there are seventy-nine hundred. Only forty-eight are left in all of Bergen County, and one is Alvina Frey's.

After her grandmother was gone and her father, too, Alvina worked the place with her first husband, Chad Chodorowski, and for some years they sold all their produce wholesale, mainly in Paterson. Eventually they built a roadside stand. The day it opened, in 1968, Chad suffered a heart attack. A year later, he died. Alvina's grandmother had had ten children, most of whom helped her with the farm. Alvina has no children. She has reduced the acreage under cultivation to thirty-eight, and works it generally alone, with part-time help in the fields and in the stand. Her husband, Ed Frey, assists to some extent, but he is an excavator with a full-time business of his own, and while she is digging furrows he digs sewers and graves. "I love to see stuff grow. When it doesn't do well I could cry," she says. "But I don't like herbicide. The last time I used it was in tomatoes. I use as little chemical as I possibly can."

People who come regularly to the Greenmarket often bring things to Alvina. At Fifty-ninth Street, an elderly woman appears weekly with a container of orange juice for her. When there is no juice, Alvina sucks on the ice with which John Labanowski chills his beer. People take pictures of her. They invite her up for coffee. "I got one customer here at Fifty-ninth Street who's a drinker, male—a damned good-looking distinguished man, even if he drinks. He once brought me a hard-boiled egg in clear gelatin. Some kind of French dish. You don't like it, but you have to eat it." She receives weekly reports from a man who once bought a gourd. Following her directions, he cut holes in it and hung it out a twentieth-story window. A bird came to live in his gourd.

"I love the city—meeting different people, learning that all the things you learn about the city are not true. I see more people in the two markets I come to—Brooklyn and Fifty-ninth Street—than I do in several weeks in Mahwah at the stand. I wouldn't quit this for nothing in the world. The people are wonderful, and the market means a lot to them. They don't want anything to screw it up so we won't come in anymore."

A short time ago, Chad's Farm was drifting down a long and steady economic decline. In the wholesale markets, the middleman, in her opinion, wanted too much. In Paterson a couple of years ago, a half bushel of tomatoes brought four dollars and fifty cents. Now it brings five dollars, a difference that fails to compensate for the inflating costs of gasoline, fertilizer, utilities, containers, and dust. "I'm too small for Hunts Point and too big to make a living only out of a roadside stand. There was four of us—farmers—on my road once. When Johnny Werling went out of business he was forty. He finally had to get a job. That's rough—to farm all your life and then have to get a job. That's where I was headed when the Greenmarket came along. The Greenmarket is a godsend. Next year, I'd like to do different. I'd like to rent out my stand and come into the city every day."—JOHN MCPHEE.●

ANNOUNCEMENT AS TO VOTES

(Mr. DANIELSON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DANIELSON. Mr. Speaker, I was compelled to be absent from the floor of the House of Representatives for one rollcall vote on Thursday, May 25, 1978, and would like to announce how I would have voted had I been present.

Rollcall No. 379: The House, by a vote of 178 ayes to 109 noes, agreed to an amendment to H.R. 9400, authorizing actions for redress in cases involving deprivations of civil rights of institutionalized persons, that reinstates coverage for persons, that reinstates coverage for persons in jails, prisons, or other correctional institutions, but only permits the Attorney General to initiate a civil action in these areas when the court has transmitted a complaint or petition.

I would have voted "aye."

Mr. Speaker, due to compelling business in my congressional district, I was unable to be present for eight rollcall votes on Monday, June 5, 1978, for seven

MONDAY, JUNE 5, 1978

Rollcall No. 405: The House passed, by a vote of 336 yeas, H.R. 185, to amend section 2632 of title 10, United States Code, to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment. I would have voted "yea."

Rollcall No. 406: The House passed, by a vote of 344 yeas to 1 nay, H.R. 188, amended, to amend the Intervention on the High Seas Act to implement the Protocol Relating to Intervention on the High Seas in Cases of Marine Pollution by Substances Other Than Oil. I would have voted "yea."

Rollcall No. 407: The House passed, by a vote of 338 yeas to 9 nays, H.R. 12140, to amend the Federal Water Pollution Control Act to provide additional authorizations for certain operating programs under the act. I would have voted "yea."

Rollcall No. 408: The House passed, by a vote of 339 yeas to 1 nay, House Resolution 1213, the rule under which H.R. 12250—to designate the Boundary Waters Canoe Area Wilderness and to establish the Boundary Waters Canoe Area National Recreation Area—was considered. I would have voted "yea."

Rollcall No. 409: The House, by a vote of 213 ayes to 141 noes, agreed to an amendment to H.R. 12250, in the nature of a substitute, as amended by a substitute, that retains most of the provisions of the original bill, but eliminates the recreation area; establishes a mining protection area; and makes certain changes in motorboat use on specified lakes. I would have voted "aye."

Rollcall No. 410: The House passed, by a vote of 324 yeas to 29 nays, H.R. 12250, to designate the Boundary Waters Canoe Area Wilderness and to establish the Boundary Waters Canoe Area National Recreation Area. I would have voted "yea."

Rollcall No. 411: The House passed, by a vote of 344 yeas to 2 nays, House Resolution 1191, the rule under which H.R. 12481—to authorize appropriations for certain insular areas of the United States—was considered. I would have voted "yea."

Rollcall No. 412: The House passed, by a vote of 292 yeas to 54 nays, H.R. 12481, to authorize appropriations for certain insular areas of the United States. I would have voted "yea."

TUESDAY, JUNE 6, 1978

Rollcall No. 413 was a quorum call.

Rollcall No. 414: The House passed, by a vote of 340 yeas to 28 nays, H.R. 8394, amended, to provide for payments to local governments based upon the acreage of the National Wildlife Refuge System which is within their boundaries. I would have voted "yea."

Rollcall No. 415: The House passed, by a vote of 368 yeas, H.R. 12637, amended, to amend the North Pacific Fisheries Act of 1954. I would have voted "yea."

Rollcall No. 416: The House passed, by a vote of 268 yeas to 103 nays, H.R. 12668, amended, to establish a conservation program for the living marine resources of the Arctic and Southern Oceans. I would have voted "yea."

Rollcall No. 417: The House passed, by a vote of 322 yeas to 48 nays, House Resolution 1205, the rule under which H.R. 12240—to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the intelligence community staff, and the Central Intelligence Agency Retirement and Disability System—was considered. I would have voted "yea."

Rollcall No. 418: The House rejected, by a vote of 60 ayes to 312 noes, an amendment to H.R. 12240, that sought to strike the language requiring the Attorney General to notify the House and Senate permanent Select Committees on Intelligence of each admission of an alien which the Attorney General has reason to believe is excludable under certain provisions of the Immigration and Nationality Act. I would have voted "no."

Rollcall No. 419: The House passed, by a vote of 323 yeas to 43 nays, H.R. 12240. to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the intelligence community staff, and the Central Intelligence Agency Retirement and Disability System. I would have voted "yea."

Rollcall No. 420: The House passed, by a vote of 339 yeas to 21 nays, House Resolution 1206, providing for the consideration of H.R. 12426—to authorize the Secretary of the Treasury to provide financial assistance for the city of New York. I would have voted "yea."

WEDNESDAY, JUNE 7, 1978

Rollcall No. 421: The House, by a vote of 331 yeas to 15 nays, approved the Journal of Tuesday, June 6. I would have voted "yea."

Rollcall No. 422: The House passed, by a vote of 349 yeas to 24 nays, House Concurrent Resolution 561, authorizing the printing as a House document, the folder "The United States Capitol." I would have voted "yea."

Rollcall No. 423: The House passed, by a vote of 329 yeas to 50 nays, Senate Concurrent Resolution 89, authorizing the printing of additional copies of volume II of the Senate hearings entitled "Korean Influence Inquiry"—clearing the measure. I would have voted "yea."

Rollcall No. 424: The House passed, by a vote of 376 yeas to 1 nay, House Resolution 1218, the rule waiving certain points of order against H.R. 12930—making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1979. I would have voted "yea."

Rollcall No. 425: The House, by a vote of 80 ayes to 314 noes, rejected an amendment to H.R. 12930, that sought to increase the appropriation for the Bureau of Alcohol, Tobacco and Firearms by $4.2 million; and sought to strike the prohibition on using funds to enforce the Bureau's rules concerning firearms published on March 21, 1978. I would have voted "aye."

Rollcall No. 426: The House passed, by a vote of 297 yeas to 98 nays, H.R. 12930, making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1979. I would have voted "yea."

Rollcall No. 427 was a quorum call.

Rollcall No. 428: The House, by a vote of 201 ayes to 179 noes, agreed to an amendment to H.R. 12929—making appropriations for the Department of Labor, and Health, Education, and Welfare and related agencies for the fiscal year ending September 30, 1979—that reduces the appropriation for the Occupational Safety and Health Administration to the 1978 level, a reduction of $28.4 million. I would have voted "no."

Mr. Speaker, I was compelled to be absent from the floor of the House of Representatives during one rollcall vote on Thursday, July 13, 1978, and during one rollcall vote on Monday, July 17, 1978. I would like to announce how I would have voted had I been present.

THURSDAY, JULY 13

Rollcall No. 540: The House agreed, by a vote of 197 ayes to 195 noes, to a substitute amendment to H.R. 15, Education Amendments of 1978, that prohibits community education grants for any program being conducted in a community by another public agency, unless the Commissioner determines collaboration exists between the local education agency and the public agency. I would have voted "aye."

MONDAY, JULY 17

Rollcall No. 554: The House passed, by a vote of 376 yeas to 7 nays, House Resolution 1252, the rule under which H.R. 1069, Coal Pipeline Act, was considered. I would have voted "yea."

Mr. Speaker, due to compelling business in my congressional district during the week of July 24, 1978, I was unable to be present on the floor of the House of Representatives throughout the week, and would like to announce how I would have voted on each rollcall vote that week, had I been present.

MONDAY, JULY 24, 1978

Rollcall No. 587 was a quorum call.

Rollcall No. 588: The House passed, by a vote of 264 yeas to 10 nays, House Joint Resolution 946, to designate October 7, 1978, as "National Guard Day." I would have voted "yea."

TUESDAY, JULY 25, 1978

Rollcall No. 589 was a quorum call.

Rollcall No. 590: The House passed, by a vote of 390 yeas to 8 nays, H.R. 11823, to amend section 1331(c) of title 10, United States Code, to allow certain otherwise ineligible reservists to become eligible for retired pay. I would have voted "yea."

Rollcall No. 591: The House passed, by a vote of 372 yeas to 22 nays, H.R. 12349, amended, to provide for the Du-Noir Basin addition to the Washakie Wilderness. I would have voted "yea."

Rollcall No. 592: The House passed, by a vote of 346 yeas to 54 nays, H.R. 12973, amended, Social Services Amendments of 1978. I would have voted "yea."

Rollcall No. 593: The House passed, by a vote of 394 yeas to 4 nays, H.R. 11889, to amend title 38, United States Code, to increase from $100 to $200 the monthly rate of special pension payable to each person who has been awarded the Medal of Honor. I would have voted "yea."

Rollcall No. 594: The House passed, by a vote of 393 yeas to 9 nays, H.R. 11890, amended, to amend title 38 of the United States Code to provide that the survivors of a veteran who was rated totally and permanently service-connected disabled for a period of at least 10 years would be entitled to dependency and indemnity compensation as though the veteral had died from a service-connected disability. I would have voted "yea."

Rollcall No. 595: The House, by a vote of 244 yeas to 157 nays, agreed to the conference report on H.R. 12426, to authorize the Secretary of the Treasury to provide financial assistance for the city of New York—clearing the measure for Senate action. I would have voted "yea."

Rollcall No. 596: The House, by a vote of 276 yeas to 120 nays, agreed to the conference report on H.R. 11877, to authorize appropriations for fiscal year 1979 for the Peace Corps and to make certain changes in the Peace Corps Act—clearing the measure for the President. I would have voted "yea."

WEDNESDAY, JULY 26, 1978

Rollcall No. 597: The House, by a vote of 362 yeas to 2 nays, agreed to resolve itself into the Committee of the Whole. I would have voted "yea."

Rollcall No. 598: The House rejected, by a vote of 141 ayes to 260 noes, an amendment to H.R. 10285, Commodity Exchange Act amendments, that sought to permit States to pass and enforce State laws identical to those in the Commodity Exchange Act. I would have voted "no."

Rollcall No. 599: The House, by a vote of 273 ayes to 125 noes, agreed to an amendment to H.R. 10285, that requires the reporting of export sales to the Commission within 48 hours, and requires the Commission to then make this information public. I would have voted "no."

Rollcall No. 600: The House passed, by a vote of 401 yeas to 6 nays, H.R. 10284, to extend the Commodity Exchange Act, as amended, for 4 years. I would have voted "yea."

Rollcall No. 601: The House, by a vote of 214 ayes to 184 noes, agreed to an amendment to H.R. 3350, Deep Seabed Hard Minerals Act, as amended by a substitute, that gives the Commerce Department jurisdiction over deep seabed mining operations. I would have voted "no."

Rollcall No. 602: The House, by a vote of 199 ayes to 202 noes, rejected an amendment to H.R. 3350, that sought to require applicants for licenses and permits to submit comprehensive work plans. I would have voted "aye."

Rollcall No. 603: The House passed, by a vote of 312 yeas to 80 nays, H.R. 3350, to promote the orderly development of hard mineral resources in the deep seabed, pending adoption of an international regime relating thereto. I would have voted "yea."

Rollcall No. 604: The House, by a vote of 158 ayes to 224 noes, rejected an amendment to H.R. 7577, Economic Opportunity Act amendments, that sought to retain the ratio of Federal/State assistance contributions to community service agencies at 60 percent Federal/40-percent State. I would have voted "no."

Rollcall No. 605: The House passed, by a vote of 346 yeas to 38 nays, H.R. 7577, to amend the Economic Opportunity Act of 1964. I would have voted "yea."

THURSDAY, JULY 27, 1978

Rollcall No. 606: The House agreed, by a vote of 302 yeas to 44 nays, to Senate Conference Resolution 98, relating to adjournment to a date certain during the remainder of the 95th Congress—clearing the measure. I would have voted "yea."

Rollcall No. 607 was a quorum call.

Rollcall No. 608: The House rejected, by a vote of 197 ayes to 199 noes, an amendment to H.R. 12157, Export-Import Bank Act amendments, that sought to prohibit the Bank from financial transactions to establish or expand the production of commodities, unless the President certifies the commodity is not in surplus and its import would not substantially injure U.S. firms and employees producing the same or competing commodity. I would have voted "no."

Rollcall No. 609: The House rejected, by a vote of 103 ayes to 286 noes, an amendment to H.R. 12157, that sought to prohibit the Bank from participating in transactions with countries which the Secretary of State determines engage in a consistent pattern of gross violations of internationally recognized human rights. I would have voted "no."

Rollcall No. 610: The House rejected, by a vote of 90 ayes to 288 noes, an amendment to H.R. 12157, that sought to prohibit the Bank from participating in transactions unless the purchaser of exports endorses certain fair and equal employment principles. I would have voted "no."

Rollcall No. 611: The House, by a vote of 106 ayes to 266 noes, rejected an amendment to H.R. 12157, that sought to require the Bank to submit an evaluation to Congress, based on an analysis by the Nuclear Regulatory Commission, describing safety standards and nuclear practices of any country in which the Bank enters into transactions involving the sale of nuclear reactors. I would have voted "no."

Rollcall No. 612: The House passed, by a vote of 314 yeas to 47 nays, H.R. 12157, to amend and extend the Export-Import Bank Act of 1945. I would have voted "yea."

FRIDAY, JULY 28, 1978

Rollcall No. 613: The House agreed, by a vote of 304 yeas to 4 nays, to resolve itself into the Committee of the Whole. I would have voted "yea."

Rollcall No. 614: The House passed, by a vote of 254 yeas to 69 navs, H.R. 9400, to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the United States. I would have voted "yea."

Rollcall No. 615: The House, by a vote of 303 yeas to 5 nays, agreed to resolve itself into the Committee of the Whole. I would have voted "yea."

Rollcall No. 616: The House, by a vote of 87 ayes to 224 noes, rejected an amendment to H.R. 12434, Civil Rights Commission Amendments, that sought to delete provisions giving the Commission authority to study discrimination based on age or handicap status. I would have voted "no."

Rollcall No. 617: The House agreed, by a vote of 159 ayes to 125 noes, to an amendment to H.R. 12432, that prohibits the use of funds by the Commission to influence the passage or defeat of legislation before Congress or State legislatures, except where the Commission is requested to give an opinion. I would have voted "no."

Mr. Speaker, I was compelled to be absent from the floor of the House of Representatives during three rollcall votes on Friday, August 4, 1978, and during two rollcall votes on Tuesday, August 8, 1978. I would like to announce how I would have voted had I been present.

FRIDAY, AUGUST 4, 1978

Rollcall 647: The House, by a vote of 272 yeas to 7 nays, agreed to resolve itself into the Committee of the Whole. I would have voted "yea."

Rollcall 648: The House agreed, by a vote of 300 ayes to 29 noes, to an amendment to H.R. 12931, foreign assistance appropriations for fiscal 1979, as amended by a substitute, that reduces foreign military credit sales appropriations by $12.6 million, and that provides that not more than $2.5 million of the appropriations shall be available for Lebanon and not more than $8.5 million shall be available for Jordan. I would have voted "aye."

Rollcall 649: The House agreed, by a vote of 330 yeas to 7 nays, to House Resolution 1291, the rule waiving certain points of order against H.R. 13635, Department of Defense appropriations for fiscal 1979. I would have voted "yea."

TUESDAY, AUGUST 8, 1978

Rollcall 661: The House rejected, by a vote of 136 ayes to 222 noes, an amendment to H.R. 13635 that sought to reduce total appropriations in the bill not required by law by 1 percent. I would have voted "aye."

Rollcall 662: The House rejected, by a vote of 102 ayes to 252 noes, an amendment to H.R. 13635 that sought to reduce total appropriations in the bill not required by law by 2 percent. I would have voted "aye."

Mr. Speaker, I was compelled to be absent from the floor of the House of Representatives during one rollcall vote on Thursday, September 21, 1978, and would like to announce how I would have voted had I been present.

Rollcall No. 812: The House agreed, by a vote of 300 aves to 86 noes, to an amendment to H.R. 12611, Air Service Improvement Act of 1978, that provides that the CAB can deny a new route aurollcall votes on Tuesday, June 6, 1978, and for seven rollcall votes on Wednesday, June 7, 1978. I would like to announce how I would have voted had I been present.

thority only if the opposing party presents clear and convincing evidence the new service would not be consistent with public convenience and necessity. I would have voted "aye."

A TRIBUTE TO HON. JAMES J. DELANEY AND OTIS PIKE ON THEIR PROSPECTIVE RETIREMENT

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANLEY. Mr. Speaker, as was the wish of our Founding Fathers, every 2 years a number of the faces change in the Halls of Congress. For many and varied reasons, Members of one Congress do not return for the next. This year, the New York State delegation will feel this change acutely, as two of our leaders have decided they will not return for the 96th Congress.

JAMES J. DELANEY, our delegation chairman, is completing his 32nd year in the House. OTIS G. PIKE is in his 18th year as a Representative of the people. Together, they take half a century of National legislative experience with them as they return to private life.

Throughout their years in the Congress, JIM DELANEY and OTIS PIKE have been leaders, not only for their legislative ability but for their exemplary conduct. They always have been able to keep in perspective their duties and responsibilities as Representatives of the people. Through their long and illustrious careers, they have never become drunk with power, neglectful of the equality of their fellow Congressmen.

I will leave it to others to list the many accomplishments of these two men, for I will remember their service here not so much for what they did, though that indeed was considerable, but for how they did it: How they never lost their sense of humor, how they stood on principle under adverse circumstances, how they never compromised on what they felt was good for the people of the Nation and of New York State.

With the retirement of JIM DELANEY and OTIS PIKE, we are losing two giants of the House. We are losing two inexhaustible sources of wit and wisdom. We and the Nation owe them a great debt of thanks for their service.

May they be blessed with long life and abundant happiness as they move on to the next chapter in their lives.●

GENERAL ELECTRIC'S 100TH ANNIVERSARY

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANLEY. Mr. Speaker, today when we read regularly of the mind-boggling achievements in the fields of space technology, computer technology, medical technology and other intense specializations, it is most appropriate that we observe the 100th anniversary of the American company that more than any other, married scientific research to commerce. A marriage that has led to many of the advances mentioned.

I refer to the General Electric Co. A name as well known in the average household as in the greatest laboratories.

General Electric—an American success which traces its formation back to its predecessor, the Edison Electric Light Co., founded October 15. 1878, when a small group of investors raised $50,000 to support the incandescent lamp experiments of Thomas Alva Edison.

Merely the mention of Thomas Edison's name stirs a shadowy image of this incredibly inventive genius in the last quarter of the 19th century. His basic research into the control of electricity, underwritten by a few investors, proved that big business could benefit by supporting scientific experiments and simultaneously improve the lifestyles of a nation.

Edison's technical ingenuity coupled with the entrepreneurial energy of General Electric's early managers proved to be the magic formula for GE's storybook rise in the American business scene. That this chemistry occurred at a point in history when our Nation and its people were seeking to harness power for the manufacture and shipment of goods, and also to provide economical transportation for an increasingly mobile population, is a fact both fortuitous and predictable. For it was the success of Edison and GE in harnessing electricity to commercial applications, that led the way to hundreds of other technological supersteps.

It was only 100 New Year's Eves ago that the first functional electric light was demonstrated in Menlow Park, N.J. Just a speck of time in the calculations of history, yet how far we have traveled since then. Today we take it for granted when we flick a switch and a dark room is illuminated, an air-conditioner cools, a dishwasher operates. The convenience afforded by this harnessed power applied to everyday chores has changed our lives for the better, and a major part of the thanks is due to Thomas Edison and the General Electric Co.

I can personally attest, Mr. Speaker to the good effects the GE presence has in a community, both from an economic and a social standpoint.

It was shortly after World War II that the company opened its famous "Electronics Park" just outside the city of Syracuse. Not only did this result in the infusion of top management personnel into the community lifestream, thousands of new jobs opening up and the attendant of "supplier-companies" development, it brought a sense of stability and self-confidence so necessary for a large community struggling to get back to normal after the unsettling effects of the war.

GE not only brought stability to the central New York economy, it brought a sense of involvement in the social, and cultural aspects of the area thereby enriching both. It also brought worldwide attention to its Electronics Research Laboratory in Syracuse, for it was here in 1949 that the company's first magnetic drum memory digital computer was announced, followed by the first all-transistor radio and other firsts. In 1960 Dr. Ivar Giaever received the Nobel Prize for physics for his discoveries in superconductive tunneling.

General Electrics' foresight in encouraging basic scientific research and its talent in applying the results of this research to commerce is the key to GE's success. The benefits of this success are enjoyed by people the world over and most certainly by Americans.

Mr. Reginald H. Jones, the chairman of the board and General Electric's chief executive officer, summed up the company's approach eloquently in his 100th anniversary message:

> General Electric is an organization of creative people—only a very few of whose contributions can be recognized. (They) have led in developing and applying new concepts of professional management. Our annual awards for volunteer community activities invariably uncover a variety of riches in terms of our employees outstanding extra curricular services to society, and as for technology, GE people have been and continue to be, the world's most inventive force, garnering more patents and more industrial research awards for innovation than any other enterprise.
>
> Here in its Centennial Year, General Electric is, then, a diverse company, but one whose diversity is not a patchwork of unrelated assets. General Electric has roots. We are a product of history shaped and tempered by time. We have our legendary people, places and events.
>
> But we remain, above all, a future oriented organization of men and women who aim at making the next century, like the first, 100 years of progress for people.●

A TRIBUTE TO HON. WILLIAM F. WALSH AND HON. BRUCE CAPUTO

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANLEY. Mr. Speaker, as the 95th Congress draws to a close, it is most fitting and proper that we take a moment to salute those among us who have decided to leave this Chamber and move on to other endeavors.

We in the New York State delegation will be losing several of our distinguished colleagues, and I would like to make note of two in particular: WILLIAM F. WALSH and BRUCE F. CAPUTO.

Though he has represented the 23d District of New York for only one term, BRUCE CAPUTO has shown himself to be a hard-working, energetic, and conscientious Member of the House. His potential for leadership is obvious, as the Republican Party has chosen him to be its standard-bearer to run for the post of lieutenant governor of the State of New York in next month's election.

I feel a special sense of loss by the retirement from this body by my longtime friend BILL WALSH. BILL and I both grew up on the west side of Syracuse, N.Y. We have many of the same friends, we

patronize many of the same businesses. BILL has had a long and distinguished record of public service to his home community. Before being first elected to represent the 33d District of New York in 1972, BILL was elected as the Mayor of the city of Syracuse, in which position he served from 1962–69. He has held a number of other prominent positions, including commissioner of the New York State Public Service Commission.

Central New York is losing an outstanding public servant with the retirement of BILL WALSH. I know you join with me in wishing him and BRUCE CAPUTO abundant good health and great happiness as they move on to the next chapters in their lives.●

A HIGHLY SUCCESSFUL WELFARE REFORM PROGRAM, RHODE ISLAND

(Mr. ST GERMAIN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. ST GERMAIN. Mr. Speaker, for too long, we, as the lawmaking body of the Nation, have been chagrined when accounts are aired regarding gross abuse, neglect and mismanagement of various aspects of the welfare plan. One of the primary and often repeated complaints regarding the welfare system in that payments are going to persons who are able-bodied and capable of employment but who, for reasons which are often lost in the complex maze required to administer such a broad program, are receiving substantial amounts of public assistance.

And, for as long as these complaints have been brought to light, persons responsible for controlling such abuses have been unsuccessful in formulating a plan which would lead to substantial reform.

I am very proud to point out that my home city of Woonsocket, R.I., has formulated and successfully administered a welfare reform program which, over the past 20 months, has reduced the number of welfare cases by an amazing 62 percent and, in spite of the rise in the cost of living, reduced the total weekly cash payments by 47 percent.

The mayor of Woonsocket, the Honorable Gerard J. Bouley and the director of the Woonsocket Department of Human Resources, Mr. Gregory M. Bouley, should be commended for their efforts, which were instrumental in making this program an overwhelming success. In addition, the 58 businesses and companies which participated in the program by hiring persons formerly on the welfare roles should be commended and thanked.

I would like to bring the following report, which includes a listing of the participating firms, to the attention of my colleagues:

REPORT

In January of 1976 a comprehensive statistical analysis of the welfare situation in Woonsocket as well as a "Five Point Remedial Plan" for positive changes within the welfare system were presented in a special report to Mayor Gerard J. Bouley and the members of the Woonsocket City Council. This presentation had for its objectives to make welfare recipients viable assets first to themselves, and secondly, to make welfare recipients valuable assets to the community.

At that time, single cases had escalated 174.2% over 1971–72 and 47.2% over the previous year, while family cases had jumped 100% over 1971–72. The week of February 12, 1976 recorded the highest caseload in the history of Woonsocket Welfare Department with 813 single cases and 190 family cases for a total of 1003 cases.

With the support of the present administration, three programs were initiated: (1) Mandatory Work Relief, (2) Job Development, and (3) Job Placement. Angelo Montecalvo, a city employee assigned to the Department of Human Resources, and assisted by three Title VI CETA workers, is the director of these programs. During these last twenty-nine months over 50 companies and businesses have encouraged our efforts by cooperating fully with our programs. As of June 30th, 1978, 1,128 clients have been interviewed by our job placement officer, 799 have been referred for full-time jobs, and 500 have been hired. It is mandatory for a client to accept the job if hired.

In preparation for full-time employment clients are placed in a mandatory work relief program in order to develop certain skills and to earn their welfare checks. A capable unemployable single person or a healthy male parent automatically becomes a SWAT member, (Special Work Assistance Team). This team is comprised of only welfare clients, under the supervision of CETA workers. With our own trucks we are able to perform innumerable services to the community such as maintaining parks; delivering second hand furniture to the poor; move retarded people and burned out families; paint trucks, fences and buildings; etc. In an emergency situation we are able to mobilize these forces for a special assignment. Since the program has been initiated SWAT members have expended 35,784 work hours at a savings of $107,352 to the city of Woonsocket.

Clients who cannot qualify for our SWAT Program are placed in our Therapeutic Assistance Program so their lives may also be enriched by inter-action with people. They serve in non-profit organizations as outreach workers, clerks, janitors, cooks, telephone operations, paraprofessionals teaching arts and crafts to blind and handicapped people, etc. As of June 1978 TAP personnel have expended 35,746 work hours at a savings to taxpayers of $107,238. After twenty-seven months, our SWAT and TAP Programs have expended a grand cumulative total of 71,530 work hours for a savings of $214,590 based on a figure of $3.00 per hour.

These programs have had the positive effects of rehabilitating clients by making them valuable assets to themselves; the programs have provided numerable services to the community at no cost to the taxpayers; and they have proven a significant factor in cutting welfare cost. As of June 30, 1978 our family caseload had been reduced by 71% from 190 cases to 55 cases; our single cases have been reduced by 60% from 813 single cases to 323 cases; a total reduction of 62%. Even with the cost of living increase over these last two years, our weekly cash payments to clients* has been reduced from $30,141.57 to $15,995.87, the week of June 29, 1978, a substantial reduction of 47%.

When our statistical report was made to the city administration in 1976, medical and vendor payments were fifteen months behind. Today we are close to the ninety-day paying period. Though we have had to include two years of payments into a one-year-paying period, we were still able to reduce our doctors' payment by 31% over 1975–76, and still this figure is 1% lower than payments made to doctors in 1974–75. Our hospital and clinic payments in 1977–78 were 28% lower than 1976–77. Drugs and medicine payments were at a lower level than in 1974–75 with a reduction of 27% over 1976–77.

Our cash relief expenditures in 1977–78 were reduced by $493,518 even with a cost of living increase to welfare clients. This indicates a 34% reduction over 1975–76. Even with the spiraling medical cost, the cost of living increase, back payments in medical bills, renovation of the new welfare office and our emergency food voucher assistance program during the blizzard of 1978, to mention significant adverse variables, our total expenses for 1977–78 were at the level of 1974–75.

The existence of a welfare office is not to eliminate the poor and the needy nor is it a place where cash payments are issued for the asking. A welfare office should be a place where people are provided with opportunities to challenge their lives, so that again they may feel part of a community. Welfare programs that only provide financial assistance to people quickly deteriorate into a very dehumanizing process. The comprehensive report recently circulated by the Rhode Island Department of Health strongly supports our contention that welfare clients are the loneliest people in the world. As the study indicates, the death rate among the poor is 27% higher than the higher-income group for cardiovascular diseases, 73% higher for cirrhosis of the liver, 82% higher for diabetes, 145% higher for accidents, 29% higher for suicide, and 1,000% higher for homicide.

Job Development and Placement, SWAT and TAP are concepts that were implemented to bring self-esteem to welfare clients; to develop a good work ethic; to allow clients to see their potentials and capacities; and to experience that they also have something to live and work for. Too many clients cling to their own talents and leave them untouched because they are afraid there is nobody interested. They soon regress into their own fantasies and suffer a growing loss of self esteem. No more can we allow welfare recipients and their children, and their children's children, to become conditioned to an inferior way of life. Welfare has to become an unconditioning process so that clients can be made to realize their life can also be improved. It is imperative that clients be exposed to a voluntary or involuntary self-motivating process in order to better themselves. In Woonsocket we are trying to create a system that allows clients the responsibility of choice. Welfare monies must become the taxpayers' investment in the human potentials of less fortunate individuals.

COMPANIES HIRING FROM WELFARE OFFICE

Goldstein Inc., Quincy Dye Works, Tech Industries, Miller Electric, Reliance Plastics, A. J. Krajewski Mfg. Co., Amperex, Narragansett Knitting, Raymond Lessard Press, Hyman Brickle Co., Lincoln Textile Corp., and Jack-in-the-Box.

Johnny Shadow, Cumberland Foundry, Crystal Plastics, Paul's Roofing, Ram Safety, New England Container, Menard Ford Co., Reliance Plastics, Magco Plastics, Frank Malec Forestry, Jed Delta Company, Madison Company, and Pizza Hut.

Lessard Detective, Holley Mineral Spring, Piro Metal, Stamina Mills, Foster Metal, Burger Chef, Rex Coat & Suit, and Hayward Schuster.

International Fibers, ACS Industries, American Luggage, Metal Box Corp., Regis Casting, Polytop Company, Frank Kearns Inc., Woonsocket Polishing Inc., Star Carbonizing, Beedco Company, Parco Enterprises Inc., and Kentucky Fried Chicken.

Champagne Brothers, Dannisson Company, Tinsel Town, American Luggage in Albion,

*All payments certified by Department of SRS.

Electronic Moulding, Healthtex Company, Bancroft Company, Lincoln Dimensional Tube, Woonsocket Health Center, Garelic Farms, Glass Craft Company, Puretan Aerosol, and Crystal Craft.

ORGANIZATION'S BENEFITING FROM TAP

Mt. St. Charles Academy, Chamber of Commerce, Woonsocket Family & Child Service, R. I. Association of the Blind, T.O.C.T.A., Bourdon Blvd., Y.M.C.A., R.O.A.D., Precious Blood Cemetery, and Morin Heights.

Crepeau Court, Alcoholics Anonymous, Woonsocket Library, Woonsocket Food Co-Op., United Veteran Council, Woonsocket Welfare office, Tri-Hab, Police Department, Head Start, Red Cross, and Coalition for Consumer Justice.

Duties performed (partial list): kitchen aides, maintenance helper, outreach worker, clerical help, librarian aides, teacher's aides, janitors, and counsellors.

PARTIAL LIST OF SWAT'S DUTIES

Maintain parks.

Work with highway on various projects.

Move retarded people.

Move burned out families.

Keep emergency shelter clean and ready for use.

Paint snow plows, bleachers, and guard rails.

Pick up and deliver furniture for the poor.

Move civil defense food and equipment to different locations.

Landscape.

Cut brush.

Sweep sidewalks.

Snow removal.

RETIRING MEMBERS OF 95TH CONGRESS

● Mr. JOHNSON of California. Mr. Speaker, JOE SKUBITZ will be retiring at the end of this session of Congress, and we are certainly going to miss him. JOE has a very affable manner about him and is always ready with a story. Behind this front of joviality, however, is a serious legislator. JOE has made important contributions to the Congress throughout his years in public service.

JOE has put in some 34 years on Capitol Hill. He came first as an assistant while attending the George Washington University. He came to like it, and when the time to return home came, the people of his district encouraged him to go back to Washington as their Congressman. This he did, and he has been with us ever since.

I came to know JOE better through our Membership on the House Interior and Insular Affairs Committee. As a senior Republican on that committee, JOE made significant and valuable contributions to legislation directing the wise use of our natural resources. JOE was always a hard working member of that committee, and I am sure that his colleagues there will miss his contributions.

JOE SKUBITZ always had time to work for the little man. He took his responsibilities as a Representative seriously and did all he could to help the people of Kansas' Fifth District.

As we conclude this session of Congress, I wanted to take this opportunity to wish JOE well in the years ahead and ask that he continue to share with us his wisdom and humor.●

A TRIBUTE TO "JOE SKUBITZ"

● Mr. ROGERS. Mr. Speaker, it is with a great sense of friendship that I rise to pay tribute to the gentleman from Kansas, JOE SKUBITZ. He will be missed by all who have worked with him during his eight terms in the Congress.

It has been a privilege serving with JOE on the Interstate and Foreign Commerce Committee. Through the years his incisive questioning and close scrutiny of bills coming before the committee have served a vital role in the House. There will always be a need for intelligent probing and questioning of the legislation we consider and JOE will be missed especially in this regard. Additionally, he has been recognized for the many contributions he has made on the Interior and Insular Affairs Committee.

During his years in Washington, first as an administrative assistant, then as a popular Congressman, JOE SKUBITZ has built a career of which he can indeed be proud. When he returns to Kansas he will be missed by his many friends, but I do consider myself fortunate to count myself among them. I join my colleagues in wishing JOE and his wife every success in the future.●

● Mr. LONG of Louisiana. Mr. Speaker, although Representative MAX BAUCUS is a relatively new Member of this body, most of us here in the House have already come to admire his many talents and qualities of leadership.

MAX BAUCUS has proved to be an extremely valuable asset to the Committee on Appropriations and to the House leadership as assistant majority whip. He is a bright, well informed leader, who has been a most skillful spokesman for measures to improve the quality of this institution and its legislation. I have had the pleasure of serving with MAX on the Executive Committee of the United Democrats of Congress and the Rural Caucus. His approach to long-standing problems has been both refreshing and encouraging, and I have greatly benefited from my contact with him. MAX BAUCUS' contributions to these organizations, as well as to the legislative business of the House, have been substantial, and we shall miss his talents in the upcoming Congress.

I value MAX BAUCUS highly as a close friend and energetic working partner. I am sure my colleagues join with me in congratulating the distinguished gentleman from Montana on his excellent performance in the House of Representatives. We wish him well.●

● Mr. BROOKS. Mr. Speaker, for the past 10 years I have had the privilege of serving with WALTER FLOWERS on the Judiciary Committee. He will not be with us in the 96th Congress, and the Judiciary Committee and this House will sorely miss this intelligent, capable, and dedicated Member from Alabama.

In addition to his Judiciary Committee assignment, he served on the Science and Technology Committee and was chairman of the Fossil and Nuclear Energy Research, Development, and Demonstration Subcommittee. This has been an especially critical area since the energy crisis came upon us and he has performed his duties with distinction.

Once again, let me say that we will miss WALTER FLOWERS and wish him the best in his future endeavors. The voters of the Seventh Congressional District of Alabama should be proud to have had such a man as their Representative for the past 10 years.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable WALTER FLOWERS, who is retiring at the close of the 95th Congress after 10 years of service.

WALTER FLOWERS has proven himself a most capable legislator as a member of the House Select Ethics Committee, the House Committee on Standards of Official Conduct, and the House Judiciary Committee, and he has compiled a splendid record of achievement as the chairman of the Subcommittee on Fossil and Nuclear Energy Research, Development, and Demonstration of the House Science and Technology Committee.

I extend my best wishes to WALTER for a healthy and happy retirement from the House of Representatives as he pursues a continued career of public service in the U.S. Senate.●

● Mr. MURPHY of Pennsylvania. Mr. Speaker, I would like to take a few minutes to bid farewell to two of our honored colleagues, ROBERT N. C. NIX, and JOSEPH A. LE FANTE.

Though we are from opposite ends of the Keystone State, Mr. NIX has indeed been an inspiration to a new Member of this body such as I. His dedicated and responsible service in the House of Representatives has led him to the chairmanship of the House Post Office and Civil Service Committee and his service on the House International Relations Committee.

Among his many accomplishments is his dedication to Civil Service Reform on the domestic front and innumerable contributions through his efforts on the House International Relations Committee to the international scene.

BOB's 20 years of continuous service speaks well for him. His keen interest in the good of his constituency and the country that he has served will not be forgotten. Mrs. NIX will be missed in these Chambers. However, I as well as my other colleagues, wish him well and welcome him back any time he should choose to visit us.

At the same time I would like to bid a similar farewell to JOE LE FANTE. Those of us who have gotten to know JOE within the last 2 years regret that we have no more time in which to draw from his wisdam and experience. Likewise, those constituents who JOE has so ably represented are losing a good Congressman and fine legislator. He has shown all of us in our short time here that he is a conscientious representative, an able lawmaker, and a fair, understanding gentleman.

I have had the pleasure of serving with JOE LE FANTE on two subcommittees of the Education and Labor Committee. His past legislative experience, insight, and deep concern for people has proven to be a valuable contribution to my experiences this term. The quality of the legislation brought out of his committees is testimony to his ability and character.

JOE leaves Congress, but not public service. He will return to New Jersey where he is expected to be named to a cabinet post in state government. I am confident that JOE will continue to distinguish himself as a public servant, and I am sure that I join with the rest of my colleagues in wishing him health, success, and much happiness.

To both these men who are leaving our ranks I say thank you for your guidance and your efforts for you leave behind an indelible mark on the states you represent, your colleagues, and especially your country.●

● Mr. FUQUA. Mr. Speaker, when the gavel raps sine die adjournment for this Congress, this House will lose the services of a dear and personal friend and valued colleague, WALTER FLOWERS.

WALTER'S departure is especially significant to me for I will greatly miss his exceptional ability and expertise as a fellow member of the Science and Technology Committee.

His advice and counsel throughout his 10 years has been invaluable. His dedicated work as chairman of the Energy Research and Development Subcommittee has earned him the respect of his colleagues and a solid reputation for his expertise in this field.

WALTER has not only served the people of the Seventh District of Alabama well, but indeed the constituents of every Member have and will continue to benefit from his outstanding leadership and service to the Nation.

Foresight and an unswerving dedication to the responsibilities of his office have marked WALTER'S career in the House. The Nation is indebted to him.

He is an outstanding leader and American, a valued colleague, devoted and sensitive public servant. We admire and respect him, and he will be sorely missed.●

● Mr. GAYDOS. Mr. Speaker, as this session comes to an end, my distinguished colleague from Pennsylvania, the Honorable ROBERT N. C. NIX, will be retiring from a long and productive career in the U.S. House of Representatives.

This will bring to a close a very distinguished legislative career which began with his election to the U.S. Congress in 1958 and his reelection to each succeeding Congress.

ROBERT NIX came to the Congress with the skills of a successful lawyer who had established an excellent record as an attorney for the Commonwealth of Pennsylvania and in the private practice of law. He put these well-developed practical skills to good use as chairman of the Committee on Post Office and Civil Service and its Subcommittee on Investigations, and as a diligent and effective

member of the Committee on International Relations.

In his work with the Committee on Post Office and Civil Service, he demonstrated good judgment, commonsense, and wisdom. He was intricately involved in major efforts over the past 20 years to reorganize the Postal Service and civil service, and he was tireless in his efforts to assure the American taxpayer the best effort and service from the Postal Service and the Federal bureaucracy.

He had a good understanding of the way in which national policies affect the Commonwealth of Pennsylvania, and with his long experience as a Member of Congress, he was always helpful to younger Members of the Pennslyvania delegation.

Above all else, BOB has been a good friend and an impeccable gentleman. I will miss his friendship, wisdom, and experience, which he so readily shared with his colleagues. The Congress of the United States will lose a great human being and a fine legislator.

BOB, you leave us with a high standard to follow. We all wish you good health and many years of happiness in retirement.●

● Mr. GAYDOS. Mr. Speaker, the end of the 95th Congress marks the close of the brief, but productive, career of my good friend and colleague, JOSEPH A. LE FANTE, as a Member of the U.S. House of Representatives.

JOE LE FANTE is an able and knowledgeable legislator, whose career in public service began in local government in his home State of New Jersey. In 1969, he was elected to the New Jersey General Assembly, where he subsequently became majority leader, and later speaker. Elected to the 95th U.S. Congress in 1976, he immediately assumed the role of a dedicated and effective representative in Congress. It is rare that a freshman Member can acclimate himself so well and apply himself so readily and completely to the rigorous duties of a Member of Congress as did JOE LE FANTE.

I was proud to have had the privilege of working with JOE on the Subcommittee on Compensation, Health and Safety, which I chair. He was one of its most active members and applied himself with diligence in all matters before the subcommittee. His untiring efforts and concern for the working people of this Nation were major factors in the passage of legislation to protect the health and safety of millions of mine workers—the Mine Health and Safety Amendments of 1977.

In the 2 years I have had the opportunity and pleasure of serving with JOE, I have come to know him as a trusted friend and an able and dedicated public servant. His amiable manner and sincerity are but two of the qualities which make JOE a likeable individual, and I know many of my colleagues share my high esteem and regard.

It is with sadness that I note JOE'S retirement from Congress, and we will all miss him. However, JOE'S many years of public service to the people of New Jersey and the Nation have earned him this opportunity, and I wish him many years of happiness and good health in all his future endeavors.●

● Mr. LONG of Louisiana. Mr. Speaker, as you know, our good friend and colleague, the Honorable LLOYD MEEDS, has announced his retirement effective at the close of this session. LLOYD MEEDS' departure from this legislative body leaves the House without one of its most dedicated Members, and we shall certainly miss him in the 96th Congress.

Representative MEEDS and I have served together on the Rules Committee for the past 2 years, and I have had many opportunities to witness his grasp of House procedures. LLOYD is one of the House's finest parliamentarians; his mastery of the rules and precedents of this institution has been of great value to the committee, and his skills will not be easily replaced. His political courage is of the highest order.

The void created by LLOYD MEEDS' retirement will be much greater than we now realize. One of the hardest working Members, Congressman MEEDS has served on the Obey Commission, the Select Committee on Ethics, and ably chairs the Interior and Insular Affairs Committee's Subcommittee on Water and Power Resources. In addition, Mr. MEEDS is an active member of the Subcommittees on General Oversight and Alaska Lands, and Indian Affairs and Public Lands. A strong environmentalist, LLOYD MEEDS has made significant contributions to this legislative field and his expertise here will be sorely missed.

My wife, Cathy, and I will be extremely sorry to see LLOYD and his wife, Mary, leave Congress, as we have been close friends for many years. We both wish them continued success and hapuiness in all their future endeavors.●

● Mr. MURTHA. Mr. Speaker, I would like to join with my many colleagues in thanking Congressman BOB NIX for his many years of service to the House of Representatives, the city of Philadelphia, and his constituents in the Second District of Pennsylvania.

When I came to the House in 1974 BOB NIX was extremely helpful to me in learning about the issues and understanding the procedures of Congress.

We are all familiar with the excellent legislative record he has compiled and his excellence as chairman of the Post Office and Civil Service Committee. We also know about his deep concern for his constituents and the city of Philadelphia and the many positive, progressive things he has done to help the people he represents. He has always worked to act in the best interests of constituents.

Mr. Speaker, we will all miss BOB NIX in the House and the people of Philadelphia will miss him. I know, however, I join with us all in wishing him continued success in the years ahead.●

● Mr. RUSSO. Mr Speaker, I must admit that I view the departure from the House of my good friend WALTER FLOWERS with mixed feelings. He is a bright, articulate Member and has contributed greatly in his decade here. On the other hand, he is a ferocious paddleball player and I must admit to looking forward to some room on the courts.

At the appropriate moments, WALT has demonstrated he can be ferocious in his duties here. Quietly, without fanfare, he has demonstrated personal courage and dedication to his work here as a representative of the people.

He is a gentleman of the first order and it has been a pleasure to serve with him. I suspect we will be hearing from him again. A man with his talents does not "retire."●

● Mr. JOHNSON of California. Mr. Speaker, the Committee on Public Works and Transportation, which I have had the honor to chair during this 95th Congress, is losing one of its most effective and admired members with the voluntary retirement of Representative WILLIAM F. WALSH, who has represented the 33d District of New York for the past 6 years.

Congressman WALSH made his mark in the House of Representatives in his very first term when the colleagues who had entered the House with him in 1973 voted him the "outstanding freshman" of that 93d Congress. In the succeeding years, he has added greatly to that reputation and to the esteem in which he is held by his fellow-Members on both sides of the aisle. For the past 4 years, BILL WALSH has been the ranking minority member of our committee's Subcommittee on Public Buildings and Grounds, dealing with the enormously complex problems of housing the Federal Government's far-flung departments, agencies, bureaus, commissions, and boards and their millions of Government workers. In that capacity, he has worked tirelessly and selflessly, without a trace of political partisanship, to protect the public interest in the construction and leasing of Federal office space.

Congressman WALSH is a man of broad and varied interests and concerns. He has contributed mightily to our committee's legislative efforts in water resources development, in aviation, in surface transportation, and in the oversight and investigation of all the committee areas of legislative jurisdiction.

BILL WALSH is a man whose quiet dignity and conscientious devotion to his congressional responsibilities have won him the respect, admiration, and friendship of all of us who have known and served with him.

His constituents in Syracuse, N.Y., are losing an exceptional representative through Congressman WALSH'S retirement, and we on the Public Works Committee are losing a valued friend and colleague.●

TRIBUTE TO CONGRESSMAN CHUCK WIGGINS

● Mr. MCCLORY. Mr. Speaker, it has been said most appropriately, that our colleague from California, Congressman CHARLES WIGGINS, is a brilliant constitutional lawyer on the House Judiciary Committee. CHUCK WIGGINS' great knowledge of the law and his clear perception of constitutional principles coupled with his eloquence in debate have made him an outstanding member of the Judiciary Committee and of the House of Representatives.

Mr. Speaker, the decision by CHUCK to retire from the Congress means that we, in this body, will experience a great loss of wisdom, judgment and dedication. However, the decision is understandable and should be appreciated by all.

Mr. Speaker, it has been my privilege to be a close personal friend of CHUCK WIGGINS and both my wife, Doris, and I have appreciated our relationships with CHUCK and his lovely wife, Betty. We join in wishing both of them happiness and success in the years ahead, as CHARLES WIGGINS retires to the private practice of law and to a life more compatible with the freedom and privacy which he and Betty and their children will be able to experience when separated from the demands and pressures of the U.S. Congress and this Capital City.●

● Mr. JOHNSON of California. Mr. Speaker, the record of this 95th Congress would not be complete without paying tribute to an old and good friend, Representative TENO RONCALIO of Wyoming, who is retiring voluntarily at the close of this session to return to private life in his native State.

I have been privileged to work closely with TENO throughout his 10 years of service in the House and have watched with admiration his daily performance on the Floor of the House and in committee. No one who has ever had the opportunity to see TENO in action can fail to appreciate the breadth of his concerns, his grasp of the legislative process, and his dedication to the public service.

Congressman RONCALIO shared with me a deep concern for the development and protection of the great natural resources of the American West. During all his years in the Congress, his efforts have been governed by his unshakeable belief that the Nation's energy sources—oil and gas, uranium and coal, which are to be found in vast amounts in Wyoming—can be developed without harm to the environment, to the land, water, and air, or to the well-being of the people who live in these areas of development.

As a member of the Interior Committee, he has played a major role in this effort, as well as in the creation and protection of recreational areas in our national parks and in the development of water projects that have transformed many semi-desert regions of the West into prosperous farmlands.

As a member of our own Committee on Public Works and Transportation, TENO has cosponsored and worked on just about every highway and aviation bill that has been enacted into law in recent years. With all his varied interests, the gentleman from Wyoming has somehow managed to find time to serve with diligence and distinction on our Subcommittee on Public Buildings and Grounds, including a term as chairman of that subcommittee, guarding the public interest in the leasing and construction of Federal office space throughout the United States.

TENO RONCALIO has served the people of Wyoming and the broader constituency of the Nation long and well. We who have known him as a friend and fellow Member of the House shall long remember him. We wish him well in all the years ahead.●

● Mr. JOHNSON of California. Mr. Speaker, BOB LEGGETT will soon be leaving the House of Representatives. As one of his colleagues from northern California, I am indeed sorry to see him leave. He has been an effective legislator and a hard working Representative for his people in the Fourth District.

Through his membership on the House Armed Services Committee, BOB has given California an important voice in the development of military affairs. He has been a strong supporter of the military facilities in the Sacramento area. His hard work and great concern have earned for him the respect of his colleagues.

Because BOB represents a farming area of California, we have often worked together on common problems. BOB has been an effective Member of the California delegation and has strongly supported development of water resources in our State.

BOB and I have also worked together on several matters, because following the 1974 reapportionment by the California Supreme Court, I received two counties BOB had previously represented. Together we have been able to significantly help improve the development of that area.

BOB is a very warm and friendly person, and we have all enjoyed his humor. He goes about his work diligently, but also with a smile which can be infectious. We are going to miss that.

As BOB and his wife Barbara turn to new pursuits, Albra and I want to wish them both the very best. They can leave the Halls of Congress knowing that BOB has made an important and effective contribution to the Congress and will long be remembered for his efforts.●

● MR. LONG of Louisiana. Mr. Speaker, I consider myself an extremely fortunate individual to have worked and served with so many dedicated and capable Members of Congress. One such Member is the Honorable RAY THORNTON who will be leaving the House after adjournment.

RAY and I came to Congress together in 1972 and since that time, I have enjoyed a close and productive friendship with the distinguished gentleman from Arkansas. We have worked closely together on the Rural Caucus, an organization which has profited from Congessman THORNTON's membership. A thoughtful and well informed Member, Mr. THORNTON's careful scrutiny of the issues and constructive proposals have contributed substantially to the successful operation of the Caucus.

An active member of the Committee on Science and Technology, RAY THORNTON ably chairs the Subcommittee on Science, Research, and Technology as well as serving on two other subcommittees of this committee. In addition, Representative THORNTON's expertise in agricultural matters have made him a valuable asset to the three subcommittees of the Committee on Agriculture. Despite his exceptionally heavy committee assignment, RAY THORNTON always performs with skill and competence. Certainly his ability and talents in these areas will be sorely missed in the 96th Congress.

I will greatly miss RAY THORNTON next year. He has served this institution and the public in an exemplary manner, and his leaving will leave the Congress without one of its most talented and hard working Members.●

● Mr. LONG of Louisiana. Mr. Speaker, at the close of this session, WALTER FLOWERS will have served in the House of Representatives for 10 years. As he will not be with us in the 96th Congress, I would like to take this opportunity to congratulate the distinguished gentleman from Alabama on his outstanding career in the House.

Some of us will remember WALTER best for his strong leadership in the Judiciary Committee when he served as chairman of the Subcommittee on Administrative Law and Governmental Relations. Others will recall WALTER FLOWERS for his fine contributions to energy legislation. As chairman of the Science and Technology Subcommittee on Fossil and Nuclear Energy Research, Development and Demonstration, Congressman FLOWERS expertise and experience were of invaluable assistance in the drafting of very complicated and technical energy bills. WALTER FLOWERS' courageous fight for the Clinch River project illustrates his many talents as a spokesman. His appointment to the Ad Hoc Committee on Energy, the Select Committee on Aging, the Committee on Standards of Official Conduct and the Select Committee on Ethics is indicative of the high esteem his colleagues hold for him, and his exemplary performance in these duties is a service that will be sorely missed.

When WALTER FLOWERS leaves this body, I will feel a great sense of personal loss as I have had the privilege and pleasure of working with him on many occasions. More important, Congress will lose one of its most dedicated and capable Members, and his talents will not easily be replaced.●

● Mr. LONG of Louisiana. Mr. Speaker, the dean of the Louisiana House delegation, the Honorable JOE WAGGONNER JR., will be retiring from the House of Representatives at the close of this Congress. Mr. WAGGONNER's retirement leaves the Congress without one of its most experienced and effective leaders, and we will certainly feel the loss of the distinguished gentleman from Louisiana in the 96th Congress.

Representative WAGGONNER has served the Fourth Congressional District of Louisiana since 1961, and his contributions to the legislative business of this institution have earned him a national reputation a "man who gets things done on Capitol Hill." Intelligent, quick and persuasive, JOE WAGGONNER has played a significant role in the formulation of our Nation's tax policy as a member of the Ways and Means Committee. Congressman WAGGONNER served on numerous task forces of this committee and contributed many constructive proposals for the improvement of our tax code. Since the beginning of the 95th Congress, Mr. WAGGONNER has ably chaired the Subcommittee on Miscellaneous Revenue; his appointment to this position is indicative of the respect his colleagues have for Mr. WAGGONNER's expertise in this legislative field.

Beyond his knowledge of tax matters, JOE WAGGONNER has mastered the Rules of the House of Representatives and skill-

fully works them to the advantage of the position he is supported. Any piece of legislation benefits from his support, for he knows how to move it quickly through the parliamentary process.

Most important, JOE WAGGONNER's service here in Congress has been marked by great political courage and conviction. He has served his constituency and the Nation in an exemplary manner and his talents will not easily be replaced. We, of the Louisiana delegation, will suffer a great personal loss with his departure, as we have enjoyed his friendship and wise counsel. I am certain my colleagues join with me in wishing JOE continued success and happiness in all his future endeavors. Wherever he chooses to direct his energies will undoubtly benefit.●

● Mr. RINALDO. Mr. Speaker, I am genuinely pleased to rise this evening to recognize the contributions and achievements of my good friend and colleague, JOSEPH A. LE FANTE.

Although JOE is retiring after only one term, he has made his impact in Washington.

As a member of the Education and Labor and Small Business Committees, JOE has not been afraid to speak out and vote for the best interests of his constituents. In fact, his courageous, effective leadership goes back to his days in the State legislature, where he was majority leader, and later speaker, of the general assembly.

JOE LE FANTE has always been committed to the well-being of his constituents. As a State legislator, and as a U.S. Congressman, he has worked to improve the quality of life of the people he was elected to serve. In my judgment, he has succeeded. The people of the 14th District owe a debt of gratitude to JOE LE FANTE.

Mr. Speaker. I will miss JOE as a colleague and as a good friend. But I know that when he returns to New Jersey, he wil continue to be the effective, outspoken public servant he has always been.●

● Mr. BRINKLEY. Mr. Speaker, with the adjournment of the 95th Congress, the Honorable WALTER FLOWERS of Alabama will retire from the U.S. Congress after 10 years of distinguished service. We who have had the honor of working with this fine gentleman know him as a determined man who has always displayed warm sincerity and genuine concern for those he represents.

I have always been impressed with this man from the State which borders mine. For a man to conceive an idea of putting a canoe in the Potomac River and maneuvering it downstream for public relation purposes is to establish his ingenuity; for him to serve in such a distinguished manner on the Judiciary Committee is to establish his intellect. A combination of these two qualities bode well for WALTER FLOWERS.

John Kennedy said,

> And when at some future date the high court of history sits in judgment on each of us, recording whether in our brief span of service we fulfilled our responsibilities to the state, our success or failure, in whatever office we hold, will be measured by the answers to four questions: First, were we truly men of courage . . . ? Second, were we truly men of judgment . . . ? Third, were we truly men of integrity . . . ? Finally, were we truly men of dedication . . . ?

WALTER FLOWERS can answer a resounding "aye" to all these questions. As a progressive legislator and as a dear friend, he will be missed. I wish him much happiness.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. BURKE of Florida, for Saturday, October 14, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LIVINGSTON) to revise and extend their remarks and include extraneous material:)

Mr. WYDLER for 60 minutes, October 14, 1978.

Mr. PURSELL, for 5 minutes, today.

Mr. CORCORAN of Illinois, for 5 minutes, today.

Mr. GREEN, for 5 minutes, today.

Mr. BROYHILL, for 15 minutes today.

Mr. KEMP, for 10 minutes, today.

Mr. RAILSBACK, for 5 minutes, today.

Mr. GRASSLEY, for 15 minutes today.

Mr. GOODLING, for 5 minutes, today.

Mr. DON CLAUSEN, for 5 minutes, today.

Mr. GOLDWATER, for 5 minutes, today.

(The following Members (at the request of Mr. LIVINGSTON) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes today.

Mr. GONZALEZ, for 5 minutes today.

Mr. LEDERER, for 60 minutes today.

Mr. BROOKS, for 60 minutes today.

Mr. FRASER, for 5 minutes today.

Mr. TEAGUE, for 5 minutes today.

Mr. MINISH, for 60 minutes today.

Mr. EDWARDS of California, for 5 minutes today.

Mr. DIGGS, for 30 minutes today.

Mr. FASCELL, for 15 minutes today.

Mr. DODD, for 5 minutes today.

Mr. LEGGETT, for 10 minutes today.

Mr. LAFALCE, for 10 minutes today.

Mr. PEPPER, for 10 minutes today.

Mrs. COLLINS of Illinois, for 5 minutes today.

Mr. UDALL, for 10 minutes today.

Mr. BURKE, of Massachusetts for 60 minutes, October 14, 1978.

Mr. BRINKLEY, for 60 minutes, October 14, 1978.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Appendix of the RECORD, or to revise and extend remarks was granted to:

Mr. BROWN of California, and to include extraneous matter notwithstanding the fact that it exceeds five pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $3,500.

Mr. ST GERMAIN, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,061.

Mr. GILMAN, to revise and extend his remarks in the general debate in the House today on S. 2399, Psychotropic Substances Act of 1978.

Mr. RUSSO to revise and extend his remarks during debate on H.R. 11979, local rail service.

Mr. FLORIO to revise and extend his remarks during debate on H.R. 11979, local rail service.

(The following Members (at the request of Mr. LIVINGSTON) and to include extraneous matter:)

Mr. TAYLOR.

Mr. NEDZI in two instances.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 2253. An act to amend title 28 of the United States Code to encourage prompt, informal, and inexpensive resolution of civil cases by use of arbitration in United States district courts, and for other purposes; to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 11686. An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1979, and for other purposes;

H.R. 13418. An act to amend the Small Business Act by transferring thereto those provisions of the Domestic Volunteer Service Act of 1973 affecting the operation of volunteer programs to assist small business, to increase the maximum allowable compensation and travel expenses for experts and consultants, and for other purposes; and

H.R. 13635. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes.

ADJOURNMENT

Mr. DAVIS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 19 minutes a.m.), under its previous order, the House adjourned until today, Saturday, October 14, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5125. A communication from the President of the United States, transmitting a report recommending the designation of a 50.4-mile segment of the Illinois River in Oregon as a part of the National Wild and Scenic Rivers System, pursuant to section 4 of the Wild and Scenic Rivers Act (H. Doc. No. 95-401); to the Committee on Interior and Insular Affairs and ordered to be printed.

5126. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Plant Variety Protection Act (7 U.S.C. 2321 *et seq.*) to clarify its provisions, and for other purposes; to the Committee on Agriculture.

5127. A letter from the Assistant Secretary of the Navy (Manpower, Reserve Affairs and Logistics), transmitting a report on the settlement of outstanding claims against the Navy by the Newport News Shipbuilding and Drydock Co.; to the Committee on Armed Services.

5128. A letter from the Secretary of the Interior, transmitting the 1978 report on mining and minerals policy, pursuant to section 2 of Public Law 91-631; to the Committee on Interior and Insular Affairs.

5129. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on excess defense articles delivered to foreign governments during the second quarter of fiscal year 1978 and the cumulative status for the year October 1, 1977 through March 31, 1978, pursuant to section 8(d) of the Foreign Military Sales Act Amendments of 1971, as amended; to the Committee on International Relations.

5130. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on excess defense articles delivered to foreign governments during the third quarter of fiscal year 1978 and the cumulative status for the year, October 1, 1977 through June 30, 1978, pursuant to section 8(d) of the Foreign Military Sales Act Amendments of 1971, as amended; to the Committee on International Relations.

5131. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on the use of funds for assistance to Zaire, as directed by the President in his determination No. 78-11; to the Committee on International Relations.

5132. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

5133. A letter from Assistant to the Governor of the Canal Zone, transmitting a draft of proposed legislation to amend title 2 of the Canal Zone Code to provide for an exclusive remedy against the United States in suits based upon medical malpractice on the part of medical personnel employed by the Canal Zone Government; to the Committee on Merchant Marine and Fisheries.

5134. A letter from the Secretary of Housing and Urban Development, transmitting the third semiannual report on energy conservation standards for new buildings program, pursuant to section 311(4) of the Energy Conservation and Production Act; jointly, to the Committees on Interstate and Foreign Commerce, and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MEEDS: Committee on Rules. House Resolution 1431. Resolution providing for the consideration of S. 666. An act to allow Federal employment preference to certain employees of the Bureau of Indian Affairs, and to certain employees of the Indian Health Service, who are not entitled to the benefits of, or who have been adversely affected by the application of, certain Federal laws allowing employment preference to Indians, and for other purposes. (Rept. No. 95-1781). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 1434. Resolution providing for the consideration en bloc of the conference reports on the bills H.R. 4018, H.R. 5146, H.R. 5037, H.R. 5289, and H.R. 5263 (Rept. No. 95-1782). Referred to the House Calendar.

Mr. STAGGERS: Committee of conference. Conference report on S. 2466 (Rept. No. 95-1783). Ordered to be printed.

Mr. STAGGERS: Committee of conference. Conference report on S. 2534 (Rept. No. 95-1784). Ordered to be printed.

Mr. STAGGERS: Committee of conference. Conference report on S. 2416 (Rept. No. 95-1785). Ordered to be printed.

Mr. PERKINS: Committee of conference. Conference report on S. 995 (Rept. No. 95-1786). Ordered to be printed.

Mr. SMITH of Iowa: Committee on Small Business. Report on small business problems in the marketing of meat and other commodities (pt. 1.—meat pricing) (Rept. No. 95-1787). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Small Business. Report on small business problems in the marketing of meat and other commodities (pt. 2.—transportation) (Rept. No. 95-1788). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 6575. A bill to establish a transitional system of hospital cost containment by providing for incentives and restraints to contain the rate of increase in hospital revenues, to establish a system of capital allocation designed to encourage communities to avoid the creation of unneeded and duplicative hospital facilities and services, to provide for the publication and disclosure of information useful to the public in making decisions about health care, to provide for the development of permanent reforms in hospital reimbursement designed to provide incentives for the efficient and effective use of hospital resources, and for other purposes; with amendment (Rept. No. 95-1789, Pt. I). Ordered to be printed.

Mr. ULLMAN: Committee of conference. Conference report on H.R. 12050 (Rept. No. 95-1790). Ordered to be printed.

Mr. FOLEY: Committee on Agriculture. Report pursuant to section 302 of the Congressional Budget Act of 1974 (Rept. No. 95-1791). Referred to the Committee of the Whole House on the State of the Union.
[*Submitted Oct. 14 (legislative day, Oct. 13), 1978*]

Mr. REUSS: Committee of conference. Conference report on S. 3084 (Rept. No. 95-1792). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolu-

tions were introduced and severally referred as follows:

By Mr. FORD of Tennessee:

H.R. 14320. A bill to amend title XVIII of the Social Security Act to include dental care among the items and services for which payment may be made under the supplementary medical insurance program; to the Committee on Ways and Means.

By Mr. HANNAFORD:

H.R. 14321. A bill to amend the Internal Revenue Code of 1954 to allow individuals who are participants in employer pension plans a deduction for their contributions to individual retirement plans, and to increase the amount of the credit for the elderly; to the Committee on Ways and Means.

By Mr. HOLLAND (for himself, Mr. BROYHILL, Mr. ABDNOR, Mr. DODD, Mr. BLANCHARD, Mr. MCEWEN, Mr. WYDLER, and Mr. MCDONALD):

H.R. 14322. A bill to amend the Trade Act of 1974; to the Committee on Ways and Means.

By Mr. JEFFORDS (for himself and Mr. HOLLENBECK):

H.R. 14323. A bill to provide for the timely and safe disposal of radioactive ores, minerals, and mill tailings as well as physical facilities and material wastes of all types which are produced as a result of the use of nuclear energy; jointly, to the Committees on Armed Services, Interior and Insular Affairs, Interstate and Foreign Commerce, and Science and Technology.

By Mr. MAZZOLI:

H.R. 14324. A bill to amend the Public Health Service Act to provide for the development of standards for provision of hospice care, to provide for studies and demonstration projects in the provision of hospice care, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MIKVA (for himself, Mr. FOWLER, Mr. FORSYTHE, Mr. GUYER, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. RINALDO, and Mr. UDALL):

H.R. 14325. A bill to correct inequities in certain sales representatives practices, to provide protection for certain sales representatives terminated from their account without justification, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MONTGOMERY:

H.R. 14326. A bill to amend sections 3686 and 8686 of title 10, United States Code, to credit certain full-time training duty of members of the National Guard; to the Committee on Armed Services.

By Mr. POAGE:

H.R. 14327. A bill to authorize and direct the Secretary of Agriculture to establish a national program of rangeland research to be carried out by the several States; to the Committee on Agriculture.

By Mr. PREYER:

H.R. 14328. A bill to protect the privacy of correspondence in the mails; to the Committee on Post Office and Civil Service.

By Mr. SCHEUER (for himself and Mr. WALKER):

H.R. 14329. A bill to establish a national commission to study the use of computers in the Nation's education system; to the Committee on Education and Labor.

By Mr. STEERS:

H.R. 14330. A bill to amend title VII of the Civil Rights Act of 1964 to establish an Office of Equal Employment Opportunity in each department, agency, and unit of the Federal Government, and for other purposes; to the Committee on Education and Labor.

By Mr. THONE (for himself and Mr. DERWINSKI):

H.R. 14331. A bill to amend the Congressional Budget and Impoundment Control Act to limit total Federal budget authority and budget outlays in fiscal year 1980, 1981, 1982, and 1983; jointly, to the Committees on Government Operations and Rules.

By Mr. BROYHILL:

H.R. 14332. A bill to amend title 5, United States Code, to establish certain procedural and other requirements designed to insure that rules prescribed by Federal agencies are necessary, reasonable, and compatible with congressional goals and policies; to the Committee on the Judiciary.

By Mr. CARR:

H.R. 14333. A bill to prohibit the inclusion of a scenic shoreline drive in the management plan for the Pictured Rocks National Lakeshore in the State of Michigan; to the Committee on Interior and Insular Affairs.

By Mr. CORCORAN of Illinois:

H.R. 14334. A bill to require the Secretary of the Interior to make a study for purposes of determining which, if any, lands encompassing the Illinois and Michigan Canal would be suitable as a national historical park; to the Committee on Interior and Insular Affairs.

By Mr. CRANE:

H.R. 14335. A bill to amend the Airport and Airway Development Act of 1970 to make privately owned public use airports eligible for assistance under the act; to the Committee on Public Works and Transportation.

By Mr. DENT (for himself, Mr. ERLENBORN, Mr. PHILLIP BURTON, Mr. GOODLING, Mr. HAWKINS, Mr. MICHAEL O. MYERS, Mr. SARASIN, Mr. SIMON, and Mr. THOMPSON):

H.R. 14336. A bill to provide for pension reform for State and local public employee retirement systems, to amend the Employee Retirement Income Security Act of 1974 to promote more efficient and satisfactory management of the functions of the Federal Government relating to employee pension and welfare benefit plans and more effectively carry out the purposes of such act, and for other purposes; jointly, to the Committees on Education and Labor, and Ways and Means.

By Mr. GILMAN:

H.R. 14337. A bill to amend the Legislative Reorganization Act of 1946 to improve the oversight capabilities of the standing committees of the Senate and of the House of Representatives; to the Committee on Rules.

By Mr. LAFALCE:

H.R. 14338. A bill to amend the Resource Conservation and Recovery Act to establish a program for the identification and reclamation of abandoned hazardous waste sites, to establish a fee for the storage or disposal of hazardous waste, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. LEVITAS:

H.R. 14339. A bill to establish an Office of Regulatory Review in the General Accounting Office to assist the Congress in evaluating the economic impact of agency rules; to the Committee on Government Operations.

By Mr. LUNDINE (for himself, Mr. MOORHEAD of Pennsylvania, Mr. FISHER, Ms. MIKULSKI, Mr. MAGUIRE, Mr. MIKVA, Mr. PATTISON of New York, Mr. BAUCUS, Mr. FRASER, Mr. PEASE, Mr. HEFTEL, Mr. EILBERG, Mr. EDGAR, Mr. STEERS, Mr. DOWNEY, Mr. HUGHES, Mr. ERTEL, Mr. DICKS, Mr. SEIBERLING, Mr. MARKEY, Mr. WEAVER, Mr. LAFALCE, Mr. CARR, Mr. HANNAFORD, and Mr. NOWAK):

H.R. 14340. A bill to reduce the rate of inflation and keep it within reasonable bounds by providing for a comprehensive plan for coordinating Federal economic and regulatory policies to offset inflationary pressures, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, Education and Labor, Government Operations, and Rules.

By Mr. MOORHEAD of Pennsylvania:

H.R. 14341. A bill to amend the Internal Revenue Code of 1954 to require that employee stock ownership plans financed through an additional investment credit be nondiscriminatory to any group of employees; to the Committee on Ways and Means.

By Mr. GARY A. MYERS:

H.R. 14342. A bill to amend title 18 to make unlawful a willful misrepresentation regarding a Member of Congress or Federal officer made to influence Federal, State, or local government employees in the performance of official acts; to the Committee on the Judiciary.

By Mr. NEAL (for himself, and Mr. STANTON):

H.R. 14343. A bill to amend the Export-Import Bank Act of 1945; to the Committee on Banking, Finance and Urban Affairs.

By Mr. OTTINGER:

H.R. 14344. A bill to amend the Tariff Schedules of the United States to eliminate the duty on ribbon fly catchers; to the Committee on Ways and Means.

By Mr. PANETTA (for himself, Mr. RYAN, Mr. BEDELL, and Mr. MOSS):

H.R. 14345. A bill to amend section 2 of the National Housing Act to provide for a guaranteed loan program designed to encourage the acquisition and installation of water conservation equipment and systems in dwelling units; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PANETTA (for himself, Mr. RYAN, and Mr. BEDELL):

H.R. 14346. A bill to establish an Office of Water Management within the executive branch to coordinate Federal water authorities; to establish an Independent Water Project Review Board within the executive branch to advise the President and the Congress; and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. PANETTA (for himself, Mr. BEDELL, Mr. HARRIS, Mr. MOSS, and Mr. RYAN):

H.R. 14347. A bill to require that certain consumer products be labeled to specify the rate of water consumption of the consumer products, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PANETTA (for himself, Mr. RYAN, and Mr. MOSS):

H.R. 14348. A bill to require that certain consumer products achieve minimum water efficiency standards,and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PANETTA (for himself, Mr. BEDELL, Mr. HARRIS, Mr. MOSS, and Mr. RYAN):

H.R. 14349. A bill to establish minimum water efficiency standards for public buildings and to provide for the procurement and installation of efficient water supply and removal equipment in public buildings; to the Committee on Public Works and Transportation.

By Mr. PANETTA (for himself, Mr. RYAN, and Mr. MOSS):

H.R. 14350. A bill to amend the Federal Water Pollution Control Act to include the reduction of unnecessary water consumption as a part of the national policy for the control of water pollution, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. PANETTA (for himself, Mr. KREBS, Mr. MCCLOSKEY, Mr. GRASSLEY, Mrs. LLOYD of Tennessee, Mr. MARKEY, Mr. FORSYTHE, Mr. DOWNEY, and Mr. LIVINGSTON):

H.R. 14351. A bill to amend the Congressional Budget Act of 1974 to provide for a 2-year budgeting cycle, to provide for separate

and timely consideration each of authorizing legislation, budget resolutions, and appropriations, and for other purposes; to the Committee on Rules.

By Mr. PANETTA (for himself, Mr. BEDELL, Mr. MOSS, and Mr. RYAN):

H.R. 14352. A bill to assure more adequate supplies of water to the Nation, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Public Works and Transportation.

By Mr. PERKINS (for himself, Mr. THOMPSON, and Mr. HAWKINS):

H.R. 14353. A bill to establish an additional position of Assistant Secretary of Labor; to the Committee on Education and Labor.

By Mr. PRITCHARD (for himself and Mr. YOUNG of Alaska):

H.R. 14354. A bill to provide that the halibut research and management functions of the International Pacific Halibut Commission be carried out by the Northwest and Alaska Fisheries Center of the National Marine Fisheries, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. PURSELL (for himself and Mr. HOLLENBECK):

H.R. 14355. A bill to provide for a Federal program for health promotion and disease prevention; jointly, to the Committees on Interstate and Foreign Commerce, and Education and Labor.

By Mr. STEERS:

H.R. 14356. A bill to require that the Federal Government pay interest on overdue contract payments, and for other purposes; to the Committee on the Judiciary.

By Mr. WEISS:

H.R. 14357. A bill to provide authority for the President to stabilize prices, wages, interest rates, and corporate dividends; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ABDNOR (for himself, Mr. ALEXANDER, Mr. AUCOIN, and Mr. TRAXLER):

H.R. 14358. A bill to provide assistance to rural water systems in achieving compliance with title XIV of the Public Health Service Act, and for other purposes; jointly, to the Committees on Agriculture, and Interstate and Foreign Commerce.

By Mr. DORNAN (for himself, Mr. HANSEN, Mr. HYDE, Mr. MOOREHEAD of California, Mr. LUKEN, Mr. BAUCUS, Mr. MOTTL, Mr. YOUNG of Florida, Mr. YOUNG of Alaska, Mr. BADHAM, Mr. DERWINSKI, Mr. DEVINE, Mr. LLOYD of California, Mr. HANNAFORD, Mr. PATTERSON of California, Mr. DON H. CLAUSEN, Mr. LAGOMARSINO, Mr. SYMMS, Mr. STOCKMAN, Mr. CUNNINGHAM, Mr. CARTER, Mr. MARRIOTT, Mr. KELLY, Mr. GUYER, and Mr. DUNCAN of Tennessee):

H.R. 14359. A bill to amend the Internal Revenue Code of 1954 to provide for tax reductions and reforms; to the Committee on Ways and Means.

By Mr. NOLAN (for himself, Mr. BAUCUS, Mr. LUJAN, Mr. DAVIS, Mr. STARK, Mr. HUBBARD, Mr. RUNNELS, and Mr. WIRTH):

H.J. Res. 1169. Joint resolution raising the price support levels for milk, wheat, corn, soybeans, and cotton to 90 percent of the respective parity prices therefor, and for other purposes; to the Committee on Agriculture.

By Mr. ROONEY:

H.J. Res. 1170. Joint resolution proposing an amendment to the Constitution of the United States to provide that the level of total expenditures of the United States for any fiscal year shall not exceed the level of total revenues of the United States for such fiscal year and for the disposition of subsequent deficits, and that the gross Federal debt be reduced by open-market operations; to the Committee on the Judiciary.

By Mr. ROSTENKOWSKI (for himself and Mr. MURPHY of Illinois):

H.J. Res. 1171. Joint resolution relating to the publication of economic and social statistics for Americans of Balto-Slavic origin or descent; jointly, to the Committees on Education and Labor, and Post Office and Civil Service.

By Mr. WHITE (for himself, Mr. BUCHANAN, Mr. ROBERT W. DANIEL, Jr., Mr. GUYER, Mr. HUCKABY, Mr. NICHOLS, Mr. ROBINSON, Mr. ROUSSELOT, Mr. RUNNELS, Mr. SEBELIUS, and Mr. CHARLES WILSON of Texas):

H.J. Res. 1172. Joint resolution proposing an amendment to the Constitution of the United States to provide that the level of total expenditures of the United States for any fiscal year shall not exceed the level of total revenues of the United States for such fiscal year and for the disposition of subsequent deficits, and that the gross Federal debt be reduced by open-market operations; to the Committee on the Judiciary.

By Mr. HANSEN (for himself, Mr. KEMP, and Mr. BURGENER):

H. Con. Res. 750. Concurrent resolution to uphold the separation of powers between the executive and legislative branches of Government in the termination of treaties; to the Committee on International Relations.

By Mr. McDONALD (for himself, Mr. SCHULZE, Mr. MOORHEAD of California, Mr. IRELAND, and Mr. EVANS of Delaware):

H. Con. Res. 751. Concurrent resolution expressing the sense of Congress with respect to the Internal Revenue Service's proposed revenue procedure on private tax exempt schools; to the Committee on Ways and Means.

By Mr. SOLARZ:

H. Con. Res. 752. Concurrent resolution endorsing the concept of a commemorative stamp honoring the Revolutionary War Prison Ship Martyrs and urging the U.S. Postal Service to release, issue, and sell such a stamp; to the Committee on Post Office and Civil Service.

By Mr. SOLARZ (for himself, Mr. EILBERG, Mr. GILMAN, Ms. HOLTZMAN, Mr. LEHMAN, Mr. MIKVA, Mr. OTTINGER, Mr. RICHMOND, Mr. ROSENTHAL, Mr. SCHEUER, Ms. SPELLMAN, Mr. MARKS, Mr. LE FANTE, Mr. MOTTL, and Mr. KEMP):

H. Con. Res. 753. Concurrent resolutions endorsing the concept of a commemorative stamp honoring the Jewish holiday of Chanukah, and urging the U.S. Postal Service to release, issue, and sell such a stamp; to the Committee on Post Office and Civil Service.

By Mr. McKINNEY:

H. Res. 1435. Resolution relating to the restoration and use, as the City Museum of the District of Columbia, or a related appropriate public or commercial purpose, of the former Masonic Hall at 9th and F Streets, NW., Washington, D.C.; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of the rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUCOIN:

H.R. 14360. A bill for the relief of Theresa Flowers; to the Committee on the Judiciary.

By Mr. DELLUMS:

H.R. 14361. A bill for the relief of Oscar Armando Benavides; to the Committee on the Judiciary.

By Mr. FISHER:

H.R. 14362. A bill for the relief of Bui Dung; to the Committee on the Judiciary.

By Mr. GEPHARDT:

H.R. 14363. A bill for the relief of the Jewish Employment Vocational Service, St. Louis, Mo.; to the Committee on the Judiciary.

By Mr. THORNTON:

H.R. 14364. A bill for the relief of Bob C. Riley; to the Committee on the Judiciary.

By Mr. VOLKMER:

H.R. 14365. A bill for the relief of the Jewish Employment Vocational Service, St. Louis, Mo.; to the Committee on the Judiciary.

By Mr. YOUNG of Missouri:

H.R. 14366. A bill for the relief of the Jewish Employment Vocational Service, St. Louis, Mo.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

558. The SPEAKER presented a petition of the Board of Education of Frederick County, Frederick, Md., relative to the proposed establishment of a separate Department of Education, which was referred to the Committee on Government Operations.

EXTENSIONS OF REMARKS

TRIBUTE TO ANTHONY DI PROSPERO OF PHILADELPHIA, PA.

HON. MICHAEL O. MYERS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. MICHAEL O. MYERS. Mr. Speaker, nearly 500 years ago a brave young man set sail from Italy in search of the new world. That man was Christopher Columbus, and history has recorded his discoveries and their importance to the history of mankind.

As we celebrate Columbus Day, I want to bring to the attention of my colleagues the deeds of one man who has worked so very hard to honor the memory, name, and glory of Christopher Columbus. I speak of Mr. Anthony Di Prospero of Philadelphia, Pa.

Born in south Philadelphia, Mr. Di Prospero traveled to Genoa, Italy, where he attended the public school system before returning to the United States to complete his high school education at South Philadelphia High School. Mr. Di Prospero worked long and hard mastering a trade and soon became very proficient in the tailoring business.

After working for several years with the Philadelphia Department of Recreation, Mr. Di Prospero began his remarkable work honoring Christopher Colum-

bus. He had a large recreation center renamed the Columbus Square Recreation Center, and in 1953 he organized the Columbus Civic Association of Pennsylvania, Inc. This outstanding organization has as its motto the words: "To honor the memory, name and glory of Christopher Columbus" and it is widely recognized as a leading force in meeting such a worthy goal.

Among the many awards bestowed upon Anthony Di Prospero are the Award of Merit from the Italian-American Press and Radio Association; a Resolution of Praise from the Pennsylvania House of Representatives, and a Citation of Honor from the U.S. Senate. He is especially proud of the honor given to him when he received the Union Legion of Merit of Rome; and he has twice been honored by the Republic of Italy for his many contributions to patriotic and charitable causes. Mr. Di Prospero was made a Cavaliere in 1962 and a Commendatore of the Order of the Star of Italian Solidarity in 1968.

Mr. Speaker, I believe the people of Italy have shown Anthony Di Prospero that they deeply appreciate the work he has done to perpetuate the memory of Christopher Columbus. I would like to add my congratulations to this remarkable man.

Mr. Anthony Di Prospero is indeed a worthy recipient of the many honors and awards he has received over his many years of service to his community. I am very proud to have this opportunity to acknowledge his work before my colleagues in the House of Representatives and I know that the city of Philadelphia is proud to have him as its native son.●

BORIS TSITILIONOK

HON. LOUIS FREY, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. FREY. Mr. Speaker, all of the nations which signed the Helsinki Final Act, including the Soviet Union, pledged to do everything possible to reunite families separated by political boundaries.

Because the Soviet Union is not living up to that promise, Members of Congress are conducting a vigil on behalf of the families which remain separated.

At this time, I would like to bring to the Members' attention the situation of Boris Tsitilionok:

BORIS LEIBOVICH TSITILIONOK

Boris Tsitilionok is a 31 year old toolmaker who applied for an exit visa in 1971. Refused on the basis of national security, he subsequently lost his job and was placed under incessant KGB surveillance with periodic visits to their offices, threats of repression, and fortnightly arrests.

In February 1975, he was among nine Jewish activists who demonstrated briefly in Moscow carrying banners of "Visas not Prisons" and "Free Emigration of the Soviet Jews to Israel." Their demonstration was brought to an end within 30 seconds by police and KGB men. In March 1975, he was sentenced to 5 years in exile in Siberia.

Prior to sentencing, Boris' parents, who live in Haifa, wrote the following appeal:

"Our son participated in ten demonstrations and was detained 25 times and this was only during 1972–73. In July 1973, he was thrown into prison together with other boys where they were beaten up severely by the prison guards. During Brezhnev's visit to the U.S. he was detained and arrested 9 times. . . . On the 10th of November, 1974 he was picked up in the street by members of the KGB and warned that if he would continue to insist on his emigration he would be put in a mental institution. . . . Our family begs you to undertake urgent measures before it is too late. Our family will be very grateful to you if you will raise your voice in defense of our son."

In another plea dated October 5, 1975, his mother Batia wrote:

"My son, Boris, is now in the Far North, Siberia. . . . I want to stress that he is an official Israeli citizen. He got his citizenship on the 10th of March 1972. I, as many Jewish mothers, appeal to the Jewish hearts and consciences all over the world to take an active part in our struggle, in our fight for free emigration of the Soviet Jews to Israel. I am very obliged to your attention and for your noble participation in the fate of the Orphans of Aliyah."●

LIMITATION OF TERMS FOR MEMBERS OF CONGRESS

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. HILLIS. Mr. Speaker, over the years, there have been numerous proposed constitutional amendments to limit and/or alter the terms for Members of the House of Representatives, the Senate, the Vice President, and the President. Today, I am adding to the list of proposed amendments by introducing an omnibus measure which, if ratified, would extend the terms of Representatives to 3 years, and the terms of the President and Vice President to 6 years. Further, my proposed amendment would limit the number of years Representatives can serve in the House to 12 years, Senators to 12 years, and combined service in the House and Senate to 18 years. The President would be limited to two terms.

My proposal is intended to be a comprehensive reform designed to modernize our Constitution thus improving our electoral process. As I just outlined, my proposal has three separate components.

First, to establish triennial terms for Representatives;

Second, to establish hexennial terms for the President and Vice President; and

Third, to limit service in Congress to 12 years in either House, and 18 years in both the House and Senate.

Each component needs to be thoroughly reviewed and examined as well as the aggregate effects of the proposed amendment.

First of all, the need for longer terms for Members of the House should be apparent to any student of our political process. The original purpose of the biennial term was to keep Members in close contact with the electorate by establishing these relatively short terms of service.

Alexander Hamilton who is generally credited with authorship of Federalist Paper No. 52 explained the rationale of the biennial term as follows:

As it is essential to liberty, that the government in general should have a common interest with the people; so it is particularly essential that the branch of it under consideration should have an immediate dependence on, and an intimate sympathy with, the people. Frequent elections are unquestionably the only policy by which this dependence and sympathy can be effectually secured. But what particular degree of frequency may be absolutely necessary for the purpose, does not appear to be susceptible of any precise calculation—and must depend on a variety of circumstances, with which it may be connected.

Considering the world of the late 1700's, a biennial term was undoubtedly necessary to keep Members in close touch with their constituents. However, as Alexander Hamilton rightly pointed out, there is no way to determine what is the absolute best length of a term, but that the length of the term must be dependent on a variety of circumstances with which it may be connected.

I submit that the circumstances have, indeed, changed since the Constitution was ratified. To begin with, through modern mailing techniques both by constituents and interest groups, Members are well exposed to the opinions and moods of the citizenry. In addition, telephones and television along with sophisticated public opinion polls contribute to keeping Members abreast of the views of their constituents and the Nation as a whole. Newspapers and magazines also add to the exposure of public moods to Members.

Obviously, improvements in transportation have helped Members keep in close contact with the electorate. To illustrate the frame of mind of the delegates to the Constitutional Convention and the circumstances under which they lived, I quote from Carl Van Doren in his book of the Constitution "The Great Rehearsal":

The journey from New Hampshire to Philadelphia took usually a good part of two weeks, from Georgia a good part of three.

In a world where it took up to 3 weeks to travel from Georgia to Pennsylvania, a biennial term would appear to be needed to prevent Members from losing touch with their constituents. However, in a world where a Member can fly from Washington, D.C., to Los Angeles in 6 hours, the rationale behind a biennial term must be questioned.

There can be no question, but that the circumstances under which Representatives serve have changed. None of the aforementioned modern communication and transportation inventions which help to disseminate and facilitate the views of the American people to the Members were available when the Constitution was drafted and ratified. Certainly, the modern-day Congressman has every opportunity to avail himself of the thoughts and views of constituents. In my opinion, there is no justification to the argument that extending Members' terms from biennial to triennial will lessen their rapport with constituents.

There are two other considerations which were important in the minds of

the delegates to the Constitutional Convention in deciding on a 2-year term. They felt that the term must be long enough to allow Representatives to adequately do their job without unnecessary disruption and allow them to adequately comprehend the job before facing reelection. Second, the delegates wanted to insure that the term was short enough to protect the safety, or freedoms and liberties, of the people.

On the first point, Hamilton wrote in Federalist Paper No. 53:

> No man can be a competent legislator who does not add to an upright intention and a sound judgement, a certain degree of knowledge of the subject on which he is to legislate. A part of this knowledge may be acquired by means of information, which lie within the compass of men in private, as well as public stations. Another part can only be attained, or at least thoroughly attained, by actual experience in the station which requires the use of it. The period of service ought, therefore, in all cases, to bear some proportion to the extent of practical knowledge requisite to the due performance of the service.

Our world today is infinitely more complex than the world in which Hamilton lived. Since our world is more complex, the issues we face are more complex. Hamilton was correct in saying that the term should be proportionate to the knowledge requisite to do the job. The requisite knowledge to handle the issues today is very large and continues to grow. A triennial term is more proportionate today than a biennial term to the requisite knowledge to handle legislative matters in the best interest of the Nation.

The last concern of the delegates in selecting a biennial term for Representatives was to protect the safety of the people, to which I made reference to earlier. We should remember that the delegates were forming a new government. They lived in a world where liberties and freedoms of expression and movement were rare. Now that our Nation is over 200 years old, the liberties and freedoms of our people are well established. Unlike the delegates, we have the benefit of experience which proves that the Government established by the Constitution has sufficient safeguards against threats by the Congress to the safety of the American people. Little argument can be made that a triennial term would undermine the safety of the American people.

While I see no obvious adverse effect to extending the terms of Representatives, there are several advantages to such a move. Most importantly, it would give each Congress an additional year to start work on complex pieces of legislation without having to completely start the legislative process over again. At the beginning of each Congress, our committees must hold hearings and markup sessions and report measures that had been reported during the previous Congress but failed to be enacted due to logjams which occur at the end of every Congress.

Such logjams should be very apparent to every Member, because as we approach the end of the 95th Congress, we are facing the worst logjam I have witnessed since coming to Congress. Further, the present controversy over deregulation of natural gas illustrates how biennial terms are simply too short to handle the more complex issues of the day.

By creating triennial terms for Members of Congress, we obviously reduce the number of elections within any given period over 4 years. Thus, the American people will be able to save millions of dollars in political contributions and the millions of dollars necessary to hold selections.

The second major change in our electoral process I propose is a 6-year term for our President and Vice President. Certainly, it would be necessary to have a hexennial Presidential term if a triennial term to Representatives is approved. It seems only logical that we keep the system of having congressional elections halfway through a President's term and simultaneous with his election or reelection.

It is also obvious that the Senate elections should occur every 3 years with half the Senate elected each time. Under my proposal, each State would elect one Senator every 3 years for a hexennial term.

While a triennial term for Members of the House warrants support, that alone does not warrant a hexennial term for the President just to preserve the traditional relationship between congressional and Presidential elections. A hexennial Presidential term must be able to stand on its own merits to deserve our support.

It should be noted that we already have made one important change in the Presidential term. The 22d amendment ratified in 1951 prevents any person from holding the office of President more than twice. The Federal bureaucracy which the President must manage has become overwhelming in size and complexity. With the passage of the 22d amendment, President's have a maximum of 10 years (and most often, only 8 years) to learn the nuances of the job, gain control of the bureaucracy, recommend changes and implement those recommendations. Further, the President must direct much attention, almost 1 year, to reelection efforts. Upon close examination, 8 years is too short a period for a President to truly make a strong and lasting imprint on the executive branch, and to fulfill his mandate from the electorate to implement the policies on which he based his election and reelection campaigns.

I submit that a hexennial Presidential term would provide for a more stable foreign policy. Ever since the United States became a world superpower, other nations have watched Presidential elections with great interest. In recent years, we have seen such important issues as the SALT negotiations coming to a complete standstill due to uncertainty in the outcomes of a Presidential election. If the United States is to have a more consistent foreign policy, we must have a more stable Presidency.

Obviously, our defense systems must be based on our foreign policy in order that that policy can be implemented. Modern weapons systems take years to develop and build. It has become increasingly difficult for the Department of Defense to develop long-term designs of military posture due to fluctuations in Presidential policies. While hexennial terms will not eliminate such fluctuations, they will be reduced. I use foreign policy and defense issues only as examples of how our quadrennial Presidential terms hamper a President's ability to function.

Under my proposal, the President would be eligible for reelection, but limited to two terms. There are some, I realize, that might support a 6-year term for President, but only if limited to one term. The main argument in favor of this position appears to be an effort to free the President from election politics allowing, in theory, the President to only be concerned with what is best for the Nation. If that argument were true, we should be able to see substantial differences between the actions of past Presidents in their first and second terms. That has not been the case as history tells us.

It must be noted that while before 1951, there was no prohibition from running for a third term, the tradition was so strong that only Franklin Roosevelt was able to overcome it. While other Presidents (most notably President Grant) considered or tried to break the tradition, it was too strong to overcome.

History tells us that when a President is ineligible for reelection (whether prohibited by the Constitution or tradition), he is not "removed from politics." Party considerations and a natural desire that his party maintain control of the White House continue to influence Presidential actions.

Limiting a President to one 6-year term does not provide an adequate amount of time to develop and implement his programs. As I said earlier, I do not believe that even 8 years is long enough. By allowing for two 6-year terms, the President should have sufficient time to develop and implement programs, and also allow the American people an opportunity to replace him should his first term prove unsatisfactory.

A hexennial Presidential term is not a new idea. The term of the President coupled with the reelection issue was heavily debated during the Constitutional Convention. Since then, almost 150 proposals have been introduced to somehow change or limit Presidential terms.

It takes a special effort from an extraordinary person to be elected President today. I find it hard to believe that such a person would not be primarily motivated by a sense of history and aware of some of the awesome responsibilities associated with the job. The degree to which politics plays a role in the day-to-day decisions of the President hopefully is subordinate to the overall best interest of the Nation. To that end, the eligibility for reelection should be of minor importance.

The third and last major component contained in my proposal would limit service in the House and Senate. As with the first and second components of my amendment, limiting service in Congress is not a new idea. It has been debated numerous times since the Constitution was ratified. Most recently, hearings were

held last year by the Senate Subcommittee on the Constitution of the Committee on the Judiciary.

I think the major objection to limiting service in Congress is that such a limitation might prevent the American people from being represented by the person of their choice. I am not sure that this argument is really valid. The powers of incumbency are so great that little choice is truly available to the voter.

Incumbents have the advantages of franked mail, highly qualified personal and committee staffs, the entire resources of the Library of Congress, and so on until the list of advantages becomes overwhelming. One only has to review the results of the last several elections where about 90 percent of all incumbents won reelection to see that these advantages are hard to beat.

The same arguments which are used against limiting Presidential service can be used against limiting terms of service in Congress. Nevertheless, and perhaps because of the visibility of the office, the people of the United States recognize the dangers of excess tenure by a single person in an office like the Presidency.

The trend toward congressional careerism is relatively new. During the 1800's, it was the tradition for Members to self-impose a 4-year limit of service in the House and 6 years in the Senate. Service in the Congress was not considered a career, but more a form of public service to be shared by others. It is that sense of public service which we now lack and which coincides with the concept of a citizen's legislature that I desire to reinstate.

The concepts of equal representation were as important in the minds of those who wrote the Constitution as they are to us today. However, a strong argument can be made that excessive tenure coupled with the seniority system, even as that system exists today, undermines equal representation. Under the present system, Senators or Congressmen who hold chairmanships for extended periods gain awesome legislative power. Can equal representation be served when one Senator or Congressman holds substantially more power and influence than any other Member?

By adopting limitations on service in the National Legislature, we may not eliminate the centralization of legislative power, but we provide for a method of dispersing that power among more Congressmen and Senators.

As anyone who takes the time to listen to the ideas and opinions of the citizenry knows, there are many individuals who possess fresh ideas and approaches to the problems we deal with that are never given an opportunity to be heard in the proper form. By providing for a more constant turnover of legislators, the doors of Congress will be opened to the new ideas, concepts, and beliefs of more people. New faces will bring new approaches to old problems. These new faces should be presented to the review of the electorate for support or rejection. By limiting congressional service, we provide competition among the various approaches to Government and the major issues facing the Nation.

Another often repeated argument against limiting service in Congress is that such a limitation might deny the electorate the opportunity of being represented by a highly qualified legislator. I doubt that any Member is so unique that there is no one in his constituency capable of doing the job just as well or even better.

Each of the components I have mentioned deserves the support of the Congress, and the combination of these components justifies the extraordinary effort necessary to amend the Constitution. Should my proposal receive sufficient support, it would modernize the Constitution by altering the terms of Members of Congress and the President to make them proportionate with the requisite knowledge to properly execute the job. By maximizing participation in the legislature and minimizing the burdens of reelection, my proposal would enhance the ambiance within which the Government must operate.

A copy of my amendment follows:

H.J. RES. —

Joint Resolution proposing an amendment to the Constitution of the United States to provide a six-year term for President and for Vice President and a three-year term for Representatives and to limit the total number of years for which Senators and Representatives may serve

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of submission of this joint resolution by the Congress:

"ARTICLE —

"SECTION 1. The twenty-second article of amendment to the Constitution of the United States is hereby repealed.

"SEC. 2. The President and Vice President shall hold their offices during a term of six years. No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than three years of a term to which some other person was elected President shall be elected to the office of the President more than once.

"SEC. 3. The House of Representatives shall be composed of Members chosen for terms of three years by the people of the several States.

"SEC. 4. As soon as possible after the date of ratification of this Article, the Senate shall adopt a resolution adjusting the terms of Senators beginning after the effective date of this article so that the term of one Senator from each State begins every three years and the term of one Senator from each State begins in the same year as the term of the President begins.

"SEC. 5. No person may serve any portion of a term as a Representative if, at the completion of such term, such person would have served as a Representative for periods aggregating more than twelve years, taking into account only service after the effective date of this article.

"SEC. 6. No person may serve any portion of a term as a Senator if, at the completion of such term, such person would have served as a Senator for periods aggregating more than twelve years, taking into account only service after the effective date of this article.

"SEC. 7. No person may serve any portion of a term as a Representative or Senator if, at the completion of such term, the aggregate period served as both a Senator and a Representative would exceed eighteen years, taking into account only service after the effective date of this article.

"SEC. 8. For purposes of calculating periods of service under this article, only service in calendar years during which a person has served in office for at least nine calendar months, including any portion of any month, shall be considered and such service shall be considered to be service for one year.

"SEC. 9. This article shall take effect on the first day of the first calendar year beginning more than one year after the ratification of this article in which a Presidential term begins." ●

TRIBUTES TO ROBERT L. F. SIKES

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. CHAPPELL. Mr. Speaker, the last days of this 95th Congress have a somewhat bittersweet significance, for we know that the final bells will mean the departure of many of our colleagues from active membership. Even though we will promise to "keep in touch"—or to "work together" on this or that project, we know that it will not be quite the same. Many of our colleagues have already declared their intentions to forego another term, for whatever reason, to draw a close to their years in the House. I rise this afternoon to recognize the tremendous and remarkable congressional career of one such colleague, the dean of our Florida delegation, the Honorable ROBERT L. F. SIKES.

BOB'S announcements some months ago that he would be retiring at the end of the 95th Congress came as a surprise to most of us. Except for a very few of us in this Chamber, ROBERT L. F. SIKES has been an integral part of the House since long before we arrived. He has been the dean of Florida's delegation for many, many years. Had he not chosen to retire, he would, in the 96th Congress, have been dean of the entire House.

Mr. Speaker, were I to attempt to list the many contributions BOB SIKES has made during his 38 years in the Congress, we would have to postpone adjournment for several more weeks—and even then, I would almost certainly have missed some of the accomplishments of this remarkable legislator. If I were to try to add the many honors he has received—or the innumerable things he has done for the Nation, for the State of Florida, and for his district, we would have to postpone the beginning of the 96th Congress for several months.

Few individuals can compare to BOB SIKES in terms of the good they have done in the public service, in any elected office. For 38 years, BOB SIKES has devoted himself to doing the best for his country and for the people he represented. His service in the Congress spans some of the most historical times in this century; he has known no fewer than eight Presidents, hundreds of Senators, and—literally—thousands of Members of the House, who have come and gone during his time here.

Any Congressman must be judged, first and foremost, on what he has done

for the people of his won district. Few Members of the House, past or present, can claim the record BOB has made in that regard. The First District of Florida was always BOB's first loyalty, and he has served their interest and needs well during his 19 terms in Washington.

Few public figures in our history could match BOB in terms of the respect and affection his constituents hold for him. The people of Florida's First District view their Congressman with a support that anyone in public life would envy—but it is a support that BOB has earned, through almost four decades of hard work for his people.

He has become, as well, a nationally known and respected figure for his unwavering support of this Nation, for his deep and abiding concern for its defense and security. His spirit and deeply held convictions in that regard have helped shape our defense policies to no small degree during his years here, and he has prevented many poor decisions, leaving us stronger and better protected as a Nation than we might otherwise would have been. For that, we owe him our gratitude.

The House of Representatives would not be quite the same after BOB has gone back to Florida. We in the Florida delegation will miss his leadership, his wise counsel, and his guidance, as will all those who have worked with him through the years in committee and on the floor.

Mr. Speaker, I ask that all of BOB SIKES' colleagues join this afternoon in saluting him for his splendid career here in the House, and in wishing him a wonderful and well earned retirement.●

BOB SIKES: A GREAT AMERICAN

HON. JOE D. WAGGONNER, JR.

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. WAGGONNER. Mr. Speaker, few men have devoted as much of their lives to serving the people of this great country as has my dear and close friend, BOB SIKES. Having served with him since I came to Congress in 1961, I not only recognize BOB SIKES as an able legislator, but a great American. I am proud to call him my friend.

I have had the pleasure of visiting in BOB's district and I know firsthand that BOB's people love and adore him as he does them. No Member of this body is loved and respected more by his people than is BOB.

Working with BOB on mutual problems over the years brings to mind many fond memories. Primarily, because we have always shared the same fundamental ideals; the belief that America must maintain a national defense second to no nation—and I hasten to add, there is no Member of Congress who has committed himself to the extent that BOB has to the defense of this country—and that the free enterprise system with a minimum of Government interference should be preserved as the cornerstone of freedom.

Let me tell you, BOB does not tackle a problem lightly. He goes into battle to win. I never will forget several years ago, BOB came to me to help enlist support in the House for the Republic of China, about to be expelled by the United Nations. Before BOB had finished his efforts, he had 337 Members of the House sign a petition of support within 3 days. Try to get even 100 Members to sign anything. It is nearly impossible.

We are all aware of the growing complexities and demands of our Government; however, few have risen to the challenges and met the needs with the courage and strength that BOB has displayed. Despite odds against him or criticism of his positions, he has never been one to back away; instead, he has met each challenge head on. This service and dedication is deeply appreciated and respected by me and all of us.

BOB and I, along with others who have chosen not to seek reelection to Congress will be keeping our eye on our colleagues up here. Of course, the day-to-day schedules that we have become so accustomed to will be missed, but I think we will both find that they were not habit forming. Perhaps our new lives in the sunny South will be the envy of our colleagues. In beginning his retirement, however, I offer one more challenge to BOB SIKES; that of seeing where the fish bite best—Cypress Lake, La., or those northwestern Florida lakes.●

FBI UNDERCOVER OPERATIONS AMENDMENT

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. EDWARDS of California. Mr. Speaker, the following legal memorandum was prepared by the Department of Justice in order to explain the need for certain limited exemptions to law relating to Government procurement and public money. Those laws appear to create unintended barriers to effective performance of FBI undercover operations. Accordingly, I introduced, and the House subsequently adopted, on September 28, 1978, an amendment to the Department of Justice authorization bill (H.R. 12005) to eliminate these problems. My amendment differs from the Department proposal in that the statutory exemptions are more precisely described, and certification by the FBI Director and Attorney General or Deputy Attorney General of the need for relying on the exemptions is required.

The Department's memorandum, however, accurately describes the scope and intent of this amendment. The first section of the opinion, reprinted below, deals with the most important problem addressed in the amendment—the disposition of moneys received in the course of the FBI's undercover activities.

The memorandum follows:

DEPARTMENT OF JUSTICE,
Washington, D.C., July 27, 1978.

MEMORANDUM FOR THE ATTORNEY GENERAL

Re Legislation Regarding FBI Undercover Operations

This Office has proposed that the following language be added to the FBI's authorization bill:

With respect to undercover investigative operations necessary to the performance of the law-enforcement and other responsibilities vested by law in the Federal Bureau of Investigation—

(1) Sums authorized to be appropriated under this Act may be used for leasing space on such terms and for such periods as the Attorney General determines to be necessary to the successful conduct of undercover investigative operations, in or outside the District of Columbia, without regard to section 529 of title 31, United States Code, and without identifying the government as lessee;

(2) Sums authorized to be appropriated under this Act may be deposited in banks or other financial institutions; and

(3) In fiscal year 1979 the proceeds from these operations, less expenses incurred in such operations, shall be covered into the Treasury of the United States as miscellaneous receipts.

The purpose of this proposed amendment is to provide narrow exceptions to certain provisions of law which relate to government procurement and the public money and which presently present problems with respect to the continued effective performance of FBI undercover operations. This memorandum will explain the need for this provision with respect to the FBI's undercover law-enforcement operations.

In the last few years, the FBI has increasingly used undercover operations as a method of performing its law enforcement functions. These operations are quite successful in the investigation and prosecution of crime—the "Sting" operation is one example of this. In fact, undercover operations are often the only effective means to detect and prosecute certain sorts of criminal activity, particularly if the FBI cannot secure the cooperation of one of the participants in a criminal enterprise.

These activities, of course, must be conducted in accordance with the requirements of all applicable law. To this end, the Attorney General has approved the general use of undercover operations, and is consulted on significant individual operations before they are initiated. We are also presently formulating guidelines to cover many aspects of these operations. In addition, Congress has been advised of this technique, and has appropriated three million dollars for FY 1978 to support these operations.

In the course of studying the legality of these operations, several legal questions have been raised which could present substantial obstacles to the continued effective performance of undercover operations. Legal problems arise in three main areas: (1) whether the FBI may use income generated in the course of its undercover activities to offset the expenses incurred in those activities, *see* 31 U.S.C. § 484; (2) whether the FBI may deposit funds in banks in support of its undercover operations, *see* 18 U.S.C. § 648; 31 U.S.C. § 521; and (3) whether certain statutes pertaining to government leasing apply to leases required by the FBI in its undercover operations. We shall discuss these problems separately. Each discussion will address the legal question involved, the extent to which the FBI is presently engaged in the particular activity, and the alternatives available to the FBI if it could not engage in this activity.

USE OF INCOME TO OFFSET EXPENSES

The most important problem addressed in the proposed amendment concerns the disposition of moneys received in the course of the FBI's undercover activities. The specific question is whether 31 U.S.C. § 484 requires all income generated in these activities to be

paid into the Treasury, or whether such income might be utilized to meet the expenses incurred in the course of those activities. For the reasons that follow, it is our conclusion that 31 U.S.C. § 484 requires that moneys received by the FBI in the course of its undercover activities be paid into the Treasury. As we describe further below, this legal conclusion will have a severe impact on both the scope and the credibility of FBI undercover operations, and the proposed amendment is thus essential to the FBI's continued efforts in this regard.

A.

Section 484 provides in relevant part:

The gross amount of all moneys received from whatever source for the use of the United States, except as otherwise provided in section 487 of this title, shall be paid by the officer or agent receiving the same into the Treasury, at as early a day as practicable, without any abatement or deduction on account of salary, fees, costs, charges, expenses, or claim of any description whatever.

The broad language of this provision—particularly the reference to "all moneys received from whatever source"—would appear to encompass income generated from FBI undercover operations. That all such income must be remitted to the Treasury would seem to follow from the requirement that the "gross amount" of such funds are required to be paid into the Treasury "without any abatement or deduction on account of salary, fees, costs, charges, expenses, or claim of any description whatever."

Several rationales might be advanced to hold 31 U.S.C. § 484 inapplicable in this context, but we do not believe that any of these rationales warrant such a conclusion. The first such rationale is grounded on the fact that the statute only encompasses moneys received "for the use of the United States." This phrase has been interpreted to require that the funds in question are "to be used in bearing the expenses of the administration of the Government and paying the obligations of the United States." 33 Op. A.G. 316, 321 (1922). Other decisions applying the statute also indicate that the funds must be available to the United States for disposition on its own behalf. *See, e.g., United States* v. *Sinnott*, 26 F. 84 (D. Ore. 1886); 15 Op. A.G. 654 (1877).

Accepting this approach, we believe that the funds here are received for the use of the United States. It seems unquestioned that the funds in issue are at the disposal of the United States—as can be seen from the fact that the two alternatives presented are the use of the funds by the FBI or their transmittal to the Treasury. This availability of the funds to the United States must mean that they were received "for the use of the United States."

Another point raised to delimit the reach of 31 U.S.C. § 484 in this context is that the payments here are not made to an entity or individual openly acting as an agent of the United States; rather, the payments are made to a business or individual whose affiliation with the government is unknown to the payor. This argument rests on both the unusual nature of the payments and the state of mind of the payor, but we think neither factor is relevant. As to the payor's knowledge of the real beneficiary of his payment, we would note that all that matters under the statute is that an officer or agent of the United States *receive* a payment which is for the use of the United States. The state of knowledge of the payor would seem irrelevant so long as this essential requirement is met. As to the unusual nature of the payments, the statutory reference to "all moneys from whatever source" would seem to preclude an interpreration of the statute limited to the ordinary or normal sorces of governmental revenue. In fact, section 484 has often been applied to revenues generated from what must be deemed unusual sources. *See, e.g.*, 3 Comp. Gen. 461 (1924) (bribes).

The legislative history of 31 U.S.C. § 484 supports our conclusion that the section extends to the moneys generated in FBI undercover activities. While the debates in Congress focused on the normal sources of government revenue, Congress' intent was not so delimited. This may be seen from the original version of what is now 31 U.S.C. § 484; it required payment into the Treasury of the gross amount of all duties received from customs, from the sales of public lands, and from all miscellaneous sources, for the use of the United States . . . Act of March 3, 1849, 9 Stat. 398.

It is clear from this language that Congress intended to encompass revenue not only from customs and sales of land—the ordinary source of income at the time—but also from "all miscellaneous sources." This same intent is displayed in the Congressional debates. Statements in these debates demonstrate that Congress intended that the provision would require that "all the moneys belonging to the United States" be paid into the Treasury "without any deduction . . . whatsoever." 18 Cong. Globe 474 (1848) (remarks of Rep. Hall). *See also* 18 Cong. Globe 464 (1848) (remarks of Rep. McKay).

Congress' underlying goal in enacting 31 U.S.C. § 484 also supports the conclusion that the statute is applicable here. Congress' intent in enacting this provision was to curb Executive discretion in the handling of public moneys and to ensure that all expenditures would be authorized by Congress. 18 Cong. Globe 465, 475 (1848) (remarks of Rep. Toombs); 18 Cong. Globe 464 (1848) (remarks of Rep. McKay and Rep. Pollock). This measure was deemed necessary to fulfill the constitutional requirement in Article I, § 9, that Congress, and not the Executive, exercise control over public expenditures. 18 Cong. Globe 465, 475 (1848) (remarks of Rep. Toombs); 18 Cong. Globe 464 (1848) (remarks of Rep. McKay). *See also* 51 Comp. Gen. 506, 507 (1972). This purpose would require Congressional control of all funds that are available to the United States for disbursement, regardless of the source of the funds or the reason the funds were surrendered to the United States.

In other contexts, we have concluded that the FBI's broad statutory mandate "to detect and prosecute crimes against the United States," 28 U.S.C. § 533(1), operated to provide by necessary implication an exception to statutes of broad reach. We cannot reach the same conclusion here. First, the broad working of the statute, as well as the statute's underlying fundamental purpose to circumscribe Executive discretion in the expenditure of funds, counsel against such an approach. Perhaps more importantly, to create an implicit exception would run counter to the unusal Congressional practice of formulating an explicit exception to the broad reach of 31 U.S.C. § 484 on those occasions where it believes one necessary.[1] In fact, Congress has explicitly provided for exception to 31 U.S.C. § 484 in other law-enforcement contexts. See 21 U.S.C. § 886(b) (DEA); 42 U.S.C. § 3769(f) (LEAA). These provisions indicate Congress' awareness of the problems arising in law enforcement by virtue of the restrictions of 31 U.S.C. § 484 on the use of funds and demonstrate Congress' ability to resolve them. We thus do not believe that an implicit exception to 31 U.S.C. § 484 would be justified.

[1] For example, Congress has provided for exceptions which explicitly authorize retention of all moneys received, Pub. L. No. 94-291, § 102, May 22, 1976, 90 Stat. 523, or which authorize a deposit to the credit of the relevant appropriation, 8 U.S.C. §1356(a), 31 U.S.C. § 488, or which establish a revolving fund, 19 U.S.C. § 2074, or which authorize a deduction for expenses. 19 U.S.C. §1493, 21 U.S.C. § 1049.

The Comptroller General has formulated another exception to 31 U.S.C. § 484, but we do not believe it is applicable to the problem at issue. The Comptroller General has ruled that 31 U.S.C. § 484 will admit of a "reasonable construction" with respect to any particular form of income. 39 Comp. Gen. 647, 649 (1960). The situations where this approach has been applied, however, have been those where it could be said that the applicability of section 484 would be contrary to Congress' intent underlying a particular program. *Id.*; 24 Comp. Gen. 847 (1945); 23 Comp. Gen. 652 (1944); 22 Comp. Gen. 1133 (1943). In our view, Congress must ordinarily be assumed to intend that the FBI will perform its duties, including its undercover activities, within the constraints of existing law.[2]

In view of the absence of any sufficient indication that Congress intended that 31 U.S.C. § 484 not apply to situations such as these, we must conclude that 31 U.S.C. § 484 requires that funds received by the FBI in the course of its undercover activities be paid into the Treasury. We note that the Comptroller General has reached a similar result with respect to moneys paid out and recovered in undercover law enforcement operations. 5 Comp. Gen. 289 (1925); 3 Comp. Gen. 911 (1924).

B.

We understand that the FBI is currently using income to offset expenses in several respects.[3] The conclusions reached above will, in the absence of immediate corrective legislation, require the FBI to cease this practice. Since there appear no viable alternatives by which the FBI can accomplish the goals served by the current practice, the FBI states that both the scope and credibility of its undercover activities will be severely hampered if corrective legislation is not immediately obtained.

The FBI uses income to offset expenses to maintain the undercover businesses it establishes to investigate certain sorts of white collar and organized crime. There are now nine of these businesses in operation, and five more are presently planned. These operations have significant expenses, as is the case with all going businesses. These expenses are now being defrayed by using the income generated by the particular business. If the FBI must remit this income to the Treasury, and meet all expenses out of its appropriations, those appropriations would be quickly depleted. We have been informed by the FBI that, in view of the limited funds available these operations will necessarily have to be significantly reduced in number or in scope.

There appear to be no alternatives available to the FBI to avoid this result. One alternative—that of increasing the FBI's budget—is not within the FBI's control. Another alternative, which has been used on occasion, is for the FBI to associate with a private business. However, the owners of the businesses which would be useful to the FBI's investigative efforts are often unwilling to cooperate with the FBI. In addition, the FBI itself is often reluctant to adopt this approach, due either to problems of civil liability or to the dangers which might occur to private individuals.

[2] While conceivably a different view of Congress' intent could be drawn from disclosures of this practice to Congress and Congress' acquiescence therein, in our view the disclosures relating to this particular practice have not been so detailed or widespread to allow for this conclusion. *See TVA* v. *Hills*, 46 U.S.L.W. 4673, 4683 (1978).

[3] The FBI has used this practice upon an oral opinion from the Criminal Division. The FBI's Legal Counsel Division has also, in a written opinion, concluded that this practice was lawful.

The second manner in which the FBI uses income to offset expenses is in the gambling area. Agents who are involved in undercover activities often must associate with those who engage in various forms of gambling. In the FBI's view, the agent must also gamble if he is to maintain his credibility.

However, it seems obvious that, even in gambling activities involving fairly low sums, participation in such activity can be quite complicated if the receipts from each winning hand or roll of the dice must go to the Treasury. Moreover, gambling involves averaging and a gambler who cannot offset winnings against losses in a night of poker or a day at the race track would become very expensive indeed. In addition, problems might occur if the individual agent must later render an accounting of all the various gambling transactions which took place. In the view of the FBI, the application of 31 U.S.C. § 484 to this activity would require its undercover agents generally to avoid gambling, with the consequent loss to those agents' credibility.

Again, there appears to be no real viable alternative to this approach. In view of the limited funds available, the FBI would simply have to curtail its activity in this regard.

We thus recommend that legislation be sought as expeditiously as possible to alleviate this problem. We believe that the proposed amendment would accomplish this result. We would note here that the amendment would allow the FBI to use the moneys it receives in undercover activities only to meet the expenses of those activities; profits would still be required to be forwarded to the Treasury. In addition, the amendment contemplates that the proceeds from one activity will be used only to meet the expenses of that particular activity, and not the expenses of other activities.●

THE GREAT AMERICAN MELTING POT

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mrs. HECKLER. Mr. Speaker, during this past weekend, Columbus Day activities took place throughout the Nation and, indeed, it is an important day for all Americans.

It is a time that we focus on the outstanding achievements of Italian-Americans, but also ponder the significant events and accomplishments of all groups in the great American melting pot. It is a day of patriotism, religious observances, and celebration on a grand scale.

In Fall River, Mass.—a city of many ethnic groups—the entire community was involved in 4 days of activities in recognition of Columbus Day. The city was filed with a contagious spirit of good will, and I was privileged to participate in this great American event.

The success of the celebration resulted from the dedication and hard work of the members of the Columbus Day Committee in Fall River. May I take this moment to recognize these individuals and congratulate each for their special contribution in making this national day very meaningful to their community:

1978 Columbus Day Committee:
Santi DiRuzza, General Chairman.
Ernest J. D'Ambrosio, Secretary.
Frederick A. D'Adamo, Treasurer and Chief of Staff.
John J. D'Adamo, Program Chairman and Publicity.
James Wilcox, Sports Chairman.
Albert D'Ambrosio, Banquet Chairman and Parade Marshall.
Sadie Tigano, Memorial Dedication Chairlady.
David Silvia, Assistant Coordinator.
Daniel Morris, Parade Coordinator.
Major Anthony S. D'Ambrosio, USAR (Ret), Honorary Marshall.
Police Chief Henry Ramos, Honorary Chief of Staff.
Raymond J. Onorato, Reception Chairman and Float Chairman.
Roccina Marsden, Co-Chairman.
Henry Maddaleno, Ball Chairman.
Caroline Dolan, Co-Chairlady.
Angelo Ferraro, Decoration Chairman.
William J. Angelini, Historian.
Aurora Perry, Chairlady Miss Columbus "78".
General Committee Members:
Al Rainone.
John Tigano.
Henry Seneca.
Roland Pare.
Angelo Fusaro.
Gus Gagliari.
Gus Gagliari, Jr.
Michael J. Sicilia.
Organizations Sponsoring Celebration:
Italian American War Veterans—Fall River Post 10 and Auxiliary.
Italian Progressive Club, Incorporated—Fall River.
Lodge Giovenezza—Sons of Italy.●

EXPLOSION AT AJAX MINING CO., FRANKLIN COUNTY, ALA.

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BEVILL. Mr. Speaker, on Friday, September 22, 1978, an explosion of unknown origin occurred at the Ajax Mining Co. in Franklin County, Ala., part of the Fourth Congressional District of Alabama which I am privileged to represent in the House of Representatives.

Mr. Bobby West, safety director of the mine, was killed as a result of the explosion. Mr. Danny Little, a pit foreman at the mine, was severely injured as was Mr. Jim Franklin, an inspector for the U.S. Mine Safety and Health Administration.

Personnel from the Bureau of Alcohol, Tobacco and Firearms and the Mine Safety and Health Administration are presently conducting an investigation as to the cause of the explosion.

I want to take this opportunity to express my condolences to the family of Mr. West. Furthermore, I want to use this as a means of expressing my admiration for the courage which was exhibited by all three men.

Those workers who produce our Nation's primary energy source and those officials, such as Jim Franklin, who are charged with the responsibility of looking after the safety and health of those workers, face constant dangers in order that our mining industry can function safely and without undue interruption.

It is proper that we, the Representatives of all our citizens, pay tribute to Jim Franklin and Danny Little and posthumously to Bobby West. These men, as public servants and mining industry workers, give so much of themselves for our daily comfort and welfare that perhaps we all too often take them and their critical work for granted.●

WHY ORANGES IN JAPAN COST A DOLLAR EACH

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. VANIK. Mr. Speaker, in an effort to improve our trade balance with Japan—projected at $12 billion for 1978—the United States has been pushing for the liberalization of Japanese trade policies. One of the most protectionist areas in Japan involves limits on the importation of citrus—an area where the United States has high quality, low-cost produce to offer.

The price of oranges in Japanese stores is often over a dollar a piece—thus strictly limiting consumer demand and blocking a major potential market for one of America's agricultural sectors.

The following article from the Mainichi Shimbun of September 5, 1978, explains how the price of an orange rises to such heights—and why the United States is correct in continuing to press for further trade liberalization.

EXORBITANT PRICES UNDER HIGH YEN

The volume of imports of U.S.-produced oranges increased by three times this year, and their prices dropped to the point where they were regarded as "fruit for the masses." However, the prices of these oranges are rising again. The rise in the prices of these imports under the high yen is really unconvincing. However, it is said that this is because trading companies qualified to import add import margins accounting for 90–100 percent and are making undue profits. In response to a Mainichi Shimbun reporter collecting data, a trading company leader clarified on the 4th their raising of the prices of U.S.-produced oranges. When oranges whose import price is ¥42 each leave the hands of trading companies, the price rises to more than ¥90, and a total profit of ¥6 billion to ¥7 billion falls into the hands of industry circles, for a total import volume of 45,000 tons. This is trade rubbing the wrong way the wishes of consumers hoping for the return of exchange profits.

"We may be told that this is the case with oranges, too, for the same thing happened to bananas before. They are profitable, at any rate," said trading company (A) which has its head office in Tokyo. With the introductory remark that "I will not mention the same for fear of causing a hindrance," a leader (Y) explained its way of making profits as follows:

The import price (CIF) of oranges in yen, which the said company imported from California, the U.S., in August, was $14.50 per case (17.5 kilograms; containing 88 oranges)—¥2,827 at the exchange rate of ¥195 to $1. The tariff was ¥565.50, the rate being 20 percent. The sundry expenses amounted to a total of ¥300. Thus, the import price was ¥3,693. This means that the price of one orange was ¥42.

The oranges imported flow from trading companies to wholesalers and then to retailers through direct transactions, without coming under the hammer. The problem is the trading companies' import margins. In the case of company A, one case is priced at ¥7,000. In other words, the profit is ¥3,307 per case. The margin is as high as 89 percent. "The price is rather low in the case of our

company. At most trading companies, the prices are on the ¥8,000 level. They sell them by adding a margin of about 100 percent."

So far, the trading companies' side has explained that the import margin is about 50 percent. However, it is said that they actually add profits twice as large. If a trading company has the right to import 1,000 tons of oranges, its profit will amount to more than ¥180 million.

The intermediate margins gained by wholesalers and retailers amount to a total of about 50 percent, and therefore, the price of oranges is as high about ¥150 each when consumers buy them at fruit stores. In June, the price was ¥70 each, but now it is more than ¥200 at some stores.

Why does such an abnormally margin arise? Mr. Y says, "Oranges have not been liberalized, and the absolute amount is insufficient. Importers are under the designation system, and they can fix prices monopolistically." He says also that "Lemons and grapefruit, which have been liberalized, are over-plentiful, and deficits are likely to be caused. This is being covered by oranges."

The import companies which have received permission from the Government number 91, and they include medium and small trading companies specializing in the import of foodstuffs. Through the Japan-U.S. negotiation in the spring of this year, the import framework has increased to 45,000 tons, three times that of last year. Seven top-ranking companies including trading company F hold a share of more than 50 percent. Allocation of the amount of imports is decided by the Agriculture-Forestry-Fishery Ministry in the light of actual records in the post, etc., but competition in obtaining shares is acute. Another importer confesses that "There are some businessmen with political party affiliations who move politicians with money and make their allocations advantageous." Among businessmen, there are brokers called "paper businesmen" who sell their rights to other trading companies by attaching premiums, without importing the goods themselves.

NATIONAL FEDERATION OF VEGETABLE AND FRUIT RETAILERS ASSOCIATIONS TO RISE UP FOR "CORRECTION OF DISTRIBUTION"

The national Federation of Vegetable and Fruit Retailers Associations (Chairman: Minira Hirano; consisting of about 70,000 stores), unable to put up with this "rights-and-interests trade" by trading companies, will hold a conference of representatives in Tokyo on the 9th, and request the Agriculture-Forestry-Fishery Ministry, MITI, etc., to "correct the structures of imports and distribution."

Federation Vice-Chairman Tetsuzo Yamaguchi criticizes that the control by importers is not limited to the manipulation of prices. There are many cases where importers sell fruit directly to major supermarkets without the medium of wholesalers, to make their profit margins large. Therefore, the vegetable and fruit market in Kanda, Tokyo, is constantly short of supply. It is said that some retail stores cannot obtain the items. Vice-Chairman Yamaguchi says, "So far, the problem of oranges has been regarded as taboo, with the remark that 'No matter what may be done, it is useless.' However, I cannot put up with the way of resting secure on rights and interests. As it is indispensable to correct the structures of imports and distribution, I want to push the movement in co-operation with consumers, too."

Agriculture-Forestry-Fishery Minister Nakagawa has left for the U.S. to attend the Japan-U.S. negotiations on agricultural products, which are to be held from the 5th. The U.S. side is calling for increasing the import frameworks for oranges and fruit juice. Will the prices become low again if the volume of imports increases? Mr. Y says in a bullish tone, "Liberalization will be troublesome. However, even if an amount twice as large as that this year is imported, it will be possible to maintain the present prices."

COURSE OF DISTRIBUTION OF IMPORTED ORANGES AND THEIR PRICES

(In case of company A)

(1) Import port—One case (containing 88 oranges; weighing 17.5 kg.) $14.50 = ¥2,828.50 (¥195 to $1) (about ¥32.13 each).

(2) Tariff rate—20% from June to November; +¥565.50.

(3) Sundry expenses—Custody fee, etc.; +¥300.

(4) Import price—¥3,693 per case (about ¥42 each).

(5) Trading companies' margin—about 89%: +¥3,307: ¥7,000.●

PORK PRODUCERS SPEAK

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. SKELTON. Mr. Speaker, recently I attended a meeting of Missouri's Fourth District Pork Producers, and I was presented with 7,397 signatures on petitions plus oral statements by several persons concerned about Federal rules and regulations that affect the pork industry. I asked that the comments of these people be reduced to writing for presentation in the CONGRESSIONAL RECORD. The following are some excerpts from those comments:

Mr. Gerald M. Sandidge, Ham Hill Farms, Inc., Marshall, Missouri: "No one believes we can exist in today's world without rules and regulations. All we want, as hog producers, are rules and regulations, simple, fair, economical, and allow us to produce the best product in the world today at a fair price and profit."

Mr. Jim Stuerke, Higginsville, Missouri, commented on the continuing confusion over whether the IRS will allow pork producers to take an investment credit on their buildings and equipment, and on the labeling of the product known as turkey ham: "I feel that in the future, this will be a concern whether as to young farmers, or young pork producers, will be able to go and invest in new equipment and buildings. I therefore propose that a concrete rule be set as to whether investment credit includes buildings and equipment or one or the other. . . . The pork producers feel that turkey hams should be removed from the food case under this name. If the product is to be marketed it should be listed as a turkey product rather than turkey ham."

Mr. Arthur Barnett spoke on the government test for sulfa residue in hogs and on the labeling of turkey ham.

Mrs. Elmer Helmig, Smithton, Missouri, described her problems with the government test for sulfa residue in hogs. The procedure took nearly three months and cost her approximately $7,000 to $8,000.

Mr. Roger Alewel, a cured meat processor from Concordia, Missouri, spoke on the proposed ban of nitrite: "I ask your continued support in making sure USDA and FDA take action only after adequate research and proof is presented that nitrites can be harmful. The loss of the use of nitrite will result in increased refrigeration therefore energy use by the entire meat industry. However, this is minor when we consider the threat of botulism we could be subjecting our consumers to."

Dr. J. R. Randolph, a Veterinarian from Marshall, Missouri, called the proposed ban on nitrites ". . . unfair and unwarranted. . .". He also commented that sulfa drugs ". . . were banned unfairly and without sufficient evidence."

Mr. Frederick Lovercamp, Sedalia, Missouri, urged Congress to conduct a ". . . reevaluation of the present regulatory procedure. . . . Note that we do not say that we want all regulations eliminated. We do say that we want reasonable regulations based on fact, practicality, benefit, economic impact and prescribed procedure for implementing such regulations." Mr. Lovercamp had the following comments on the MIT study on nitrites: "The MIT study is solid research, but is inconclusive and should not be used as a basis for the ban of nitrites."

Mr. William A. Arnold, Lincoln, Missouri, spoke on the proposal to restrict the use of antibiotic drugs at low levels in livestock feeds: "We are a little confused by the fact the U.S.D.A. is wanting to restrict a product they have proven good and beneficial. . . . The U.S.D.A., pork producers, colleges and chemical companies have all paid for and used research facilities to prove the value and importance of antibiotics such as penicillin and tetracyclines. Since these are used to combat infection, prevent disease and overcome stress problems, we cannot see any justification for their removal from the open market. We have yet to see anything proven against them."

Mr. Speaker, these are the statements of people who are directly impacted by Government rules and regulations. I urge my colleagues in the House to give them proper attention. Also, I wish to point out that the proper subcommittee chairmen of the House and the Senate will be delivered copies of the complete statements made by these people.●

PAUL G. ROGERS

HON. JOE D. WAGGONNER, JR.

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. WAGGONNER. Mr. Speaker, I am happy to join with my colleagues in paying tribute to that able Congressman from Florida, PAUL G. ROGERS.

Having served with PAUL since I came to Congress in 1961, I have found him to be a man of great integrity and honor, whose word is his bond. I have worked closely with PAUL day in and day out on big legislative decisions, as well as small. As members of the Ad Hoc Energy Committee I have seen his level-headed approach to the problems we face and his genuine concern for our Nation. Through his untiring efforts as chairman of the Subcommittee on the Health and Environmental, PAUL has translated his firm convictions and deep concern for his fellow man into working legislation.

PAUL'S no-nonsense approach is evident as he sets his mind to difficult tasks, then undertakes them one by one with the greatest efficiency.

One of the greatest compliments to

any man is that of having the respect of his colleagues and I can say in all honesty PAUL ROGERS has not only our respect, but also our admiration. I wish for PAUL the best in his new life away from the hectic day-to-day schedules, to which we have become so accustomed. I believe, however, that we will both find that this will be one habit easily broken.

I thank you, PAUL, for your diligent efforts in behalf of this great country.●

THE CASE FOR A CONGRESSIONAL VETO

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BLANCHARD. Mr. Speaker, I would like to take this opportunity to commend the work of Congressman ELLIOTT LEVITAS of Georgia with respect to H.R. 3816, the Federal Trade Commission Act Amendments.

H.R. 3816 was recently rejected by the House of Representatives, thanks in large part to Mr. LEVITAS' determination to make certain that it does not pass unless it contains provision for a congressional veto of proposed FTC regulations. The vote on the bill was 175–214, and I believe it reflects the agreement of many of us in Congress that we must find a way to exert some measure of control over the flood of regulations now flowing from Federal agencies.

The Atlanta Journal, in a recent editorial, states clearly the case for the congressional veto. I would like to include it in the RECORD for the benefit of my colleagues:

DOUBT ABOUT DEMOCRACY?

(By Robert Akerman)

In recent years we have witnessed a growing protest against government regulation.

Reasons for the outcry have ranged from the political argument that the liberties of citizens are being eroded to the economic argument that costs mandated by government regulations contribute to inflation and to the decline of U.S. productivity. Of course there are still many people who believe that regulation is the only alternative to irresponsible individualism such as prevailed in the 1890s.

In this philosophic argument, in which both sides probably are partially right, there is a danger that we might overlook the equally important issue of democratic control over the regulatory process—that is, the question of who regulates the regulators. For it is unlikely we will ever do away with all forms of government regulation, and if regulators are substantially beyond the reach of public opinion anyway then it is almost irrelevant to debate whether we ought to have more or less regulation.

U.S. Rep. Elliott Levitas of Georgia has been the principal leader in raising this question of control over the regulatory process. He has proposed that Congress live up to its responsibility to make the laws of the land by establishing procedures for reviewing rules and regulations issued by the bureaucrats.

Until Levitas began his campaign, a citizen could go to jail or pay a large fine for breaking a law that in fact had never been approved by Congress—a citizen could be in violation of a regulation that an agency had issued as an interpretation of a law, or in the case of some agencies, a regulation resting solely upon the authority of the agency itself.

This possibility has been substantially reduced in the last few years as Levitas introduced into a number of bills a provision that a regulation issued pursuant to them is subject to congressional review and may be declared null and void if either branch of Congress overrules it within a specified period of time. His latest target is the Federal Trade Commission; the fight to restrict its present wide scope will be a tough one.

President Carter has denounced the Levitas approach as unwise and possibly unconstitutional, despite Carter's own campaign pronouncements against excessive regulation. On the constitutional point the reasoning is that enforcement of the law is an executive responsibility and therefore Congress should not interfere with it. To me this argument is not as convincing as the Levitas view that making the law should be a legislative responsibility and unelected bureaucrats are in effect making the law when they issue regulations that are not subject to review by Congress.

Perhaps in the long run the real issue will be one of practicality: whether Congress has the time and the expertise to monitor effectively the flood of rules and regulations that come out of the executive branch. At present we are running at the rate of some 18,000 new ones a year issued by the bureaucrats. In fact some congressmen disagree with Levitas precisely because they don't think they can do the job he thinks they ought to try.

Actually Congress would not have to study each and every regulation to catch some of the major problems. They could rely upon the political instincts of members and the pressures of constituents to know what agencies and what types of rules need the closest attention. But let us note carefully the significance of assuming that Congress cannot or will not do this job. If elected officials cannot at least curb the worst excesses of unelected bureaucrats through such a review process, it amounts to an admission that representative government has become meaningless in our complex modern society. The Levitas experiment is well worth making, and if it doesn't work then we will have to do some serious soul-searching about the future of democracy. ●

TRIBUTE TO PAUL ROGERS

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. ROYBAL. Mr. Speaker, it is a privilege to join with my colleagues today in paying a well-deserved tribute to PAUL ROGERS who is retiring at the end of the 95th Congress. He has provided the people of Florida's 11th Congressional District with dedicated and exemplary service since his first election to Congress in 1955.

After 24 years of service, it would be hard for anyone to leave the House without creating some type of void. In PAUL ROGERS' case, his leadership and expertise will be especially missed.

As chairman of the Subcommitee on Health and the Environment of the House Interstate and Foreign Commerce Committee, Congressman ROGERS has been an extremely effective legislator. Unquestionably, his dynamic leadership has had a major impact on the shaping of our Nation's major health policies.

With the increased public interest in the environment, increased congressional action was only logical. Congressman ROGERS recognized the need for action in this important area and saw to it that appropriate legislation was enacted. His work is sure to have a lasting effect on the quality and extent of health and environmental programs throughout the entire Nation.

It has been a pleasure to know and work with PAUL ROGERS as a colleague in the House and I want to take this opportunity to extend my best wishes for continued success.●

INTERIOR APPROPRIATIONS

HON. RAY THORNTON

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 5, 1978

● Mr. THORNTON. Mr. Speaker, the gentleman from Washington, Mr. MCCORMACK, and I want to express clearly for the RECORD the reason for our votes against the fiscal year 1979 Interior Appropriations Conference Report. While that report has many strong and positive provisions, we are deeply concerned that it frustrates a useful program of energy conservation and disregards the actions of the authorizing committees of the House and Senate.

The National Energy Extension Service legislation was developed in the Subcommittee on Energy Research, Development, and Demonstration and became law early in 1977. This program is designed to work in cooperation with the highly successful Agricultural Extension Service and other outreach programs geared to special local conditions that Federal informational sources cannot address. It is much more than another information source. It will serve local communities and individuals by providing technical assistance in implementing energy conservation opportunities for approximately 40 percent of the energy consumption market of our Nation.

The Energy Extension Service recognizes that the Federal Government can have its best contact with individual consumers through State extension services. Additionally, the EES is the only Federal program providing education and training assistance for States to train teachers, heating, ventilation and construction professionals, and energy auditors.

Testimony before the subcommittee indicated that the modest expenditures for this program could save the United States the energy equivalent of oil delivered by the Alaskan pipeline. The program has gone through a pilot program stage and is now ready to go nationwide.

Based on the results of pilot programs in 10 States, the administration's recommendation was for a nationwide $25 million Federal funding level to be matched by the participating States. All 50 States had expressed interest in the program.

Both the House and Senate Authorizing Committees came to the conclusion that the program should be started with 100 percent Federal funding. Accordingly, the House Authorizing Committee, after full and complete hearings, proposed a $25 million fully funded program; and the Senate passed an authorization and appropriation of $35 million.

The House Appropriations Committee passed and recommended an expenditure of $25 million. Regrettably, the Appropriations Committee's recommendation was amended on the floor of the House to a $15 million level. The amendment was accepted by the committee's manager of the bill after its sponsor mistakenly advised the House that there was only a $15 million authorization.

Notwithstanding this background, the House conferees not only insisted upon the House level of funding but ignored the recommendations of the administration and the authorizing committees that the program be instituted in all 50 States.

Incredibly, the conference report directs that the Department of Energy should continue only the pilot program and that no new States should be added without prior approval of the Appropriations Committee.

Mr. Speaker, this action of the conferees not only impedes the process by which authorizing committees exercise responsibility for oversight and review of programs but, in this instance, reflects an action which was taken in disregard of the Appropriations Committee's own recommendation. The result is the impairment of a major and important energy conservation program which has the potential of significantly improving this Nation's energy conservation effort.

For that reason and in order to make a clear record of the unfortunate circumstances surrounding this item, we wanted to explain our votes against the Interior Appropriations Conference Report. Mr. Speaker, I am authorized to report to the House that the gentleman from California (Mr. BROWN) joins us in these remarks.●

WHO NEEDS "RE-EDUCATION"?

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. MICHEL. Mr. Speaker, the May–June 1978 issue of the magazine Public Opinion carried a discussion between former Secretary of State Henry Kissinger and Senator DANIEL PATRICK MOYNIHAN. In that discussion, Senator MOYNIHAN said:

I remember in Washington in 1969 there was an antiwar demonstration of some kind, and a group of returned Peace Corps volunteers took over that building and flew the Vietcong flag from the flagpole of the Peace Corps building. At that moment, it suddenly came to me that these young people had adopted an identification with the aggressor.

Secretary Kissinger said:

When I see, for example, the head of ACTION going to a meeting where the North Vietnamese ambassador upon joining the U.N. castigates the United States, and this American official says, "This is the proudest day of my life. This is what we've been working for all these years," that raises to me really profound questions about the fundamental motivation from the beginning.

The Christian Science Monitor recently reported that the left-leaning French newspaper Le Monde states the prisons of Vietnam under the Communists are "fuller than before and are being expanded" and that the notorious "re-education camps" starve innocent men and keep them in captivity.

At this point I wish to include in the RECORD "Repression in Vietnam Growing?" from the Christian Science Monitor, October 5, 1978; "Vietnam's Gulag Archipelago," from the Christian Science Monitor, October 10, 1978; and "Number of Refugees Fleeing Vietnam Continues to Rise," October 10, 1978, from the Wall Street Journal:

REPRESSION IN VIETNAM GROWING?

(By Jim Browning)

PARIS.—The Communist Government of Vietnam has instituted a system of political repression and economic mismanagement more severe than anything known under the previous governments of South Vietnam, according to an authoritative report in the left-wing French newspaper Le Monde.

The political prisons made infamous under the regime of former South Vietnamese President Nguyen Van Thieu now are fuller than before and are being expanded, the newspaper reported in its Oct. 5 edition.

"Re-education" camps set up for Army officers, officials, and supporters of the old government also are reported full. Despite promises to the contrary, almost no one has been released, even though the Vietnam war ended 3½ years ago, the Le Monde correspondent wrote.

He said refugees have documents purporting to show that as many as 800,000 persons are still in the camps, living in primitive conditions, short of food, often doing dangerous work, and allowed only rare visits. He was told that the death rate in some camps is high.

RARE NEWS ACCESS

The report was filed by R. P. Paringaux after extensive research in Ho Chi Minh City (formerly Saigon) and in the countryside. It is rare for a Western correspondent to be allowed such access to the country.

Next to the article, Le Monde, the most respected newspaper in France and one that was sympathetic to the Communist cause in the Vietnam war, published a front-page editorial.

Entitled "Peace Crimes," it denounced what it called "Vietnam's Gulag Archipelago," and accused the Communist government of preferring "police state monologue to democratic debate."

"If the people cry famine," Le Monde said, in reference to heavy recent flooding and requests by Vietnam for international aid, "it is not fundamentally because of climatic hazards." Instead, the newspaper charged, the cause is bureaucratic corruption and the destruction of the economy in the name of ideology.

The expulsion of Chinese ethnic residents from Vietnam and the war with Cambodia also have damaged the economy, Le Monde said.

ALL INDO-CHINA INDICTED

"What is true of Vietnam is also true of Laos and, of course, Cambodia," the editorial concluded. "Between the Cambodian genocide and the Vietnamese repression there is, of course, an enormous difference of degree. But the inspiration, alas, is the same kind. In both cases it is to level, to eliminate, all differences that exist."

The article filed from Saigon apparently was based on reports from politically moderate Vietnamese who supported neither Mr. Thieu nor the Communists. Mr. Paringaux wrote that the response of government officials, when asked about the charges, was a combination of "mutism and propaganda."

The government, he wrote, is arresting people on mere suspicion. In addition, he said, it "has raised denunciation (of one's neighbor) to the level of a duty, leaving all those who do not conform to the new model to stagnate in the camps."

Vietnamese leaders had promised that after three years all prisoners in reeducation camps either would be free or officially charged with crimes. None apparently yet has been charged, according to Le Monde, and few liberated.

Using a list of 100 former South Vietnamese Army officers and officials married to French women, who therefore have had diplomatic backing for their release, Mr. Paringaux reported that all are still in the camps.

Prisoners who are liberated, usually those of the most immediate use (doctors, teachers, technicians), often must bribe corrupt bureaucrats to find work, the report said.

VIETNAM'S GULAG ARCHIPELAGO

Those who still harbor any illusions that the victory of Vietnam-style communism meant "liberation" for the Vietnamese people ought to be sobered by a recent report in the highly respected French newspaper Le Monde. The political repression, economic mismanagement, and bureaucratic corruption in Vietnam, it seems, are worse than anything known under the previous governments of South Vietnam.

After studying conditions in Ho Chi Minh City (formerly Saigon), Le Monde's correspondent wrote that the "re-education" camps set up for military officers and other supporters of the Thieu regime are still full after more than three years. Some 800,000 persons are said to be in these camps, living in hard conditions and without adequate food. Death rates are high. The political prisons also are fuller than before and there is widespread arbitrary arrest of citizens.

Le Monde, which was sympathetic to Hanoi during the war, deserves high credit for its expose. In a sharp editorial it denounced "Vietnam's Gulag Archipelago" and accused the Hanoi government of preferring "police state monologue to democratic debate." It also made the telling point that Vietnam's current food deficiencies can be traced not to flooding alone but to the fact that the government has destroyed the economy in the name of ideology.

The world is reminded again that communism, of whatever variety, is not the bearer of freedom—but of oppression. Where are those American and other voices that once were so quick to embrace Hanoi's cause? Will they speak up?

NUMBER OF REFUGEES FLEEING VIETNAM CONTINUES TO RISE

(By Barry Kramer)

HONG KONG.—What's going on in Vietnam? Despite a series of typhoons and tropical storms that roared across the South China Sea in September to ravage Vietnam, more Vietnamese than ever before fled across those storm-tossed waters to other lands.

Despite the fact that many of the boats sink (thousands of the escapees have drowned), and despite the fact that they face an uncertain, if not unfriendly reception elsewhere, some 7,300 "boat people" reached haven in some Southeast Asian

country during September—more than had managed to escape Vietnam by boat in any previous month.

According to figures from the United Nations High Commission for refugees, the number of boat people reaching other countries has risen steadily since January. From 1,900 persons in January, it reached 2,146 in March, climbed to 5,600 in May, hit 6.000 in July and set a new record of 7,300 in September—a grand total of almost 40,000 during the first nine months of this year. How many others set out, often in flimsy, leaking boats, but didn't make it, only the sharks know for sure.

In several countries in Asia, especially Thailand, Malaysia and Hong Kong, refugee camps are bursting at the seams. U.N. officials say that although the number of persons fleeing Vietnam, Laos and Cambodia—in boats as well as overland—now averages more than 9,000 a month, only about one-third that number are being resettled each month in the United States, Australia, France, Canada and other countries that are willing to accept them.

The number of boat people has increased slowly each year, until the significant spurt this year.

One major reason for the increase, officials speculate, is the growing tension between Vietnam and China. China contends that Vietnam is maltreating ethnic Chinese residents in Vietnam, while Vietnam counters that China is playing on the ethnic Chinese issue to suppress Vietnam's independence. Behind the debate and hostility lies China's fear of Soviet influence in Vietnam.

Indeed, an increasing percentage of the boat people are ethnic Chinese. A predominantly entrepreneurial group, many Chinese in Vietnam can afford to buy the boats in which they escape, at a price of about $12,000 in gold for even the smallest craft. (One refugee official estimates that Vietnam lost more than 1,300 boats in this manner, reducing the nation's fishing fleet at a time when more fish are needed to help meet Vietnam's protein shortage.)

But that isn't the only reason. A surprising number of the boat people—as many as half by one estimate—are simple folks, fishermen and the like, who are leaving Vietnam because they feel conditions there are too tough. "It's a fear of the future, that socially, militarily and economically, things are going to get worse," says a Westerner in constant touch with the refugees in one Southeast Asian country.

Things may already have gotten worse. The recent storms have been the most damaging in 75 years, according to Vietnamese officials, and have destroyed more than 20% of the country's estimated rice yield this year. Thousands of farm-draft animals have drowned, more than half a million homes were damaged or swept away, with more than four million Vietnamese affected, 2.7 million so badly they'll have to rely on domestic or foreign charity to survive until the next harvest seven months from now. Vietnamese who escaped the storms' fury have been ordered to "donate" part of their rice ration for the flood victims.

Vietnam is also fighting a costly border war with Cambodia. Cambodian Communist officials say Vietnam is preparing a dry season offensive to install a more cooperative government in Phnom Penh. Many foreign diplomats agree, saying that pro-Hanoi Cambodians, armed and trained and supported by Hanoi, could launch major attacks when the rains end in November or early December.

How seriously Vietnam's current food problems could retard that dry-season military push remains to be seen. But the fact is that Vietnam's troubles with Cambodia and China won't allow it the economic recovery or growth necessary to meet more of the needs of its 50 million people. And the number of people disgruntled enough to attempt to leave could grow even larger.

"From accounts of the people who are arriving now," an Asian diplomat says, "there are many people who are preparing to leave Vietnam."

Regardless of their reasons, at least 500,000 Vietnamese have fled their country since April 1975. The fact that the exodus continues to grow three and a half years after the Communist victory in Vietnam must be troubling the leaders in Hanoi (despite their "good-riddance" attitude). It certainly is worrisome to Vietnam's neighbors, and to the Western countries which have accepted many of the refugees and will have to accept many more.●

BAD HOUSEKEEPING

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FRENZEL. Mr. Speaker, this morning's Washington Post editorial, "Bad Housekeeping" blasts House procedures in an accurate, but surprising way.

Mismanagement by the majority leadership has always been kept a closely guarded secret by an overly-protective press. But today the Post looked under the rug and found the mess that the House Republican Research Committee's Task Force on Reform, ably led by LARRY COUGHLIN, had been trying to clean up for years.

The editorial follows. Most people will read it and weep:

BAD HOUSE-KEEPING

By the time Congress leaves town on Saturday, the House will have set two dubious records. One will be for Most Roll Calls in a Year; the previous high (864 in 1976) was exceeded last week. The House is also likely to outdo itself in Most Yeas and Nays Cast Without Any Clear Idea What the Vote Is About. It could hardly be otherwise when members have to vote in quick succession on at least six conference reports, three supposedly minor or noncontroversial bills and perhaps a half-dozen measures requiring fuller debate. That's today's agenda; tomorrow and Saturday could be worse.

Granted, some end-of-session turmoil is unavoidable. Big tax bills always come late. The energy package remains to be passed. House action is also needed to continue ACTION's programs and keep the Endangered Species Act alive.

Still, one may wonder why so much work remains at the end of the year. The answer is not that Congress has been loafing, or that various factions have held back some dubious bills—such as the proposed Department of Education—in hopes of sliding them through in the last-minute crush. Beyond all the maneuvering, what's noteworthy is that the House has been going at a frantic pace for months. Committees have kept churning out bills. Major measures have piled up on the calendar, with the leadership calling up one, then jumping to another, then going back to the first in mid-fight.

Meanwhile, over 400 bills—another record—have come up under "suspension of the rules." That streamlined procedure is supposedly for minor and noncontroversial matters, but many congressmen complain that they can't be sure what's going through when 15 or 20 bills rush by in one day.

How can the House break the general logjam? The Democratic Study Group and others want to curb the number of roll calls. That could save some time. Rep. George E. Danielson (D-Cal.) has calculated that in the first half of this year, 517 roll calls ate up about a third of the House's time—and the outcome was overwhelmingly one-sided in 40 per cent of those votes.

Still, some roll calls are useful. If members aren't made to think about a bill, even for a few seconds, they may not look at it at all—and Lord knows what might slip through then. And that points to the heart of the problem: The volume of business has gotten too great. Past Congresses have created too many programs and agencies for the current Congress to review or at least reauthorize. Moreover, the House's vaunted "democracy"—the advent of lively new members, the spreading-out of subcommittee power, the increases in junior members' staff—has generated a constant flood of new projects and proposals, each with energetic sponsors who can tell you in a trice why their measure is vital to the republic.

Streamlining procedures may only increase the glut. House members don't need more time to dream up and promote more projects. What they need is fewer subcommittees, less entrepreneurial staffs and, above all, more self-restraint. If they did fewer things, they just might do them better—or at least less frenetically. It's something to think about while waiting for the umpteenth roll call late tonight.●

THE VOLUNTEER ARMY CAN FIGHT

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. STEIGER. Mr. Speaker, a popular topic of debate recently has been the question of how well the All-Volunteer Army is working. Some sociologists and Members of Congress have been critical of the quality of the AVF, while the Pentagon has pointed to statistics showing the AVF is higher in quality than its draft-induced predecessor and is representative of the Nation as a whole.

The key question is how well today's Army would do in time of conflict. To make that kind of judgment, the best people to call on are unit commanders. One such battalion commander, Lt. Col. Don Gordon, gave his thoughts in a September 29, Christian Science Monitor article, "The Volunteer Army Can Fight."

Lieutenant Colonel Gordon said:

In my opinion (today's Army) is totally superior to the Army of 1973. . . . This battalion is considerably more effective now with about 20% fewer personnel than it was during the draft.

His article, which discusses the quality of today's soldiers, as well as some of the problems with the volunteer Army, is one which merits the attention of all who are concerned about the AVF.

The article follows:

THE VOLUNTEER ARMY CAN FIGHT

(By Don E. Gordon)

Three years ago I would have agreed with those who believe America's all-volunteer Army is failing—citing such reasons as the inferior quality of its volunteer soldier and its large expense. Today's as a battalion commander, I do not believe it.

The Army certainly is not in tip-top shape; but it is in far better shape, though it is

smaller, than the army of 1965. In my opinion, it is totally superior to the army of 1973. I can't speak for all battalions, but I can compare the one in which I served as a lieutenant, a captain, and now its commander as a lieutenant-colonel. This battalion is considerably more effective now with about twenty percent fewer personnel than it was during the draft.

It is true that military manpower costs account for over 50 percent of the defense budget. This is embarrassing—manpower costs should account for *75 percent* of the budget. A new enlistee receives only $400 per month. After two years this wage increases to only $485 per month or $712 per month if he is married. The minimum national wage is $424 per month. The government pays top dollar to the people who make its equipment but not to the soldier who operates it. If the country wants a highly motivated army, it will have to pay a highly motivating salary.

It is becoming increasingly difficult and expensive to find qualified soldiers owing to low pay and an elimination of the generous educational benefits of the pre-volunteer army GI bill. Milton Friedman, an economist writing in Newsweek some years ago, commented that the draft was an involuntary and inequitable tax imposed upon young men, mostly from lower and lower middle economic class families, to support national defense—the underpaid draftee and his family.

Our soldiers report that there are four chief reasons why they join the Army.

To become eligible for GI educational benefits (consistently the first reason until 1977 when this benefit was eliminated).

To learn a skill,

For adventure, or

To grow up.

What's wrong with the volunteer Army?

The chief attraction for enlistment has been eliminated—payment of 36 months of educational benefits for 36 months of service under the pre-volunteer army GI Bill. The present contributory system provides a maximum of $8,000 for educational expenses with the government chipping in two-thirds of that cost. Only four percent of our battalion's soldiers participate in monthly deduction for this program. They can't afford it! Previously, many good soldiers tolerated problems with army life knowing they were working for an educational opportunity. They had a goal to work toward. That is no longer the case.

Too many soldiers still mow grass, move boxes, and do office work that could be done better and cheaper by civilians and in many cases by the handicapped who desperately need jobs. It is a waste of resources to have either an infantryman or a cryptologic equipment repairman mowing the lawn. Pick up their trash and clean their barracks—yes. Drive buses, mow the lawn, lifeguard at pools—no.

The military justice system imposed on the Army will never work in combat. It will fail to protect the individual because it is too cumbersome and will result in abuses which will be based on expedience. Too frequently, the rights of the good soldier, that is most of the soldiers, are abused by the rights of the aberrantly behaved.

It is not a question of proving guilt, it is a question of *technically* proving guilt. Good soldiers who commit minor infractions are easily punished and their military records permanently annotated while more serious offenders are not punished but are provided general discharges for which there is no practical consequences. Records of punishment, known as Article 15, for minor infractions should be destroyed after two years. General discharges for bad conduct or unsuitability should preclude all GI Bill benefits except medical care for a service-connected injury.

The Army has two, only two, remaining benefits—a commissary where food prices are 15 to 20 percent less than in adjacent communities and 20-year retirement. Most married soldiers see as a serious threat the likely loss of these remaining benefits. Medical care for the family has declined. It is a limited benefit, but not an attraction. Saving money at the post exchange is a myth.

Our citizens must decide between a volunteer and a conscript army. Neither is cheap. The real question is who will bear the burden—the draftee or the taxpayer?

(NOTE.—Lieutenant-Colonel Gordon notes the stated opinions are individually inspired and do not necessarily represent Department of the Army position, interpretation, or policy.)●

THE STATE AGRICULTURAL EXPERIMENT STATION—AN R. & D. DELIVERY SYSTEM

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WAMPLER. Mr. Speaker, on October 11, the President signed into law the Department of Agriculture and related agencies appropriations bill for fiscal year 1979. This act, Public Law 95–448, among other things funded agricultural research for the coming fiscal year. Last year the Congress, in passing the Food and Agricultural Act of 1977, especially title XIV thereof, which created the National Agricultural Research, Extension and Teaching Policy Act of 1977, envisaged a vast expansion of the country's agricultural research effort to insure an adequate and stable food supply for the future, not only for the needs of our own people, but, through trade, to help provide for the food needs of an ever-expanding world population.

Unfortunately, the funds for research expansion were not requested in the President's budget for fiscal year 1979 but were cut back in traditional research areas such as Hatch funds used to fund research at our State agricultural experiment stations. After considerable effort on the part of my colleagues in the House Agriculture Committee and the Subcommittee on Agricultural Appropriations, these funds were restored to fiscal year 1978 funding levels.

Regrettably, funding to meet the target levels in title XIV to the Food and Agricultural Act of 1977 for fiscal year 1979 still fell well below authorized levels. This situation must be corrected in the appropriations for fiscal year 1980, even though the administration might want to hold down agricultural research again in its forthcoming budget request.

The record is clear, we must solve the problem of feeding an expanding world population with dwindling natural resources. Innovative research is needed to accomplish this task. Fortunately, we have the capability to accomplish the task if we will properly make use of the research talent available to us. Dr. Paul E. Waggoner, director of the Connecticut Agricultural Experiment Station, New Haven, Conn., in a letter to me of October 4, pointed the way. I would like to share his letter and his enclosures with you by including them in the RECORD at this point:

THE CONNECTICUT AGRICULTURAL EXPERIMENT STATION,
New Haven, Conn., October 4, 1978.

Congressman WILLIAM C. WAMPLER,
House Committee on Agriculture, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN WAMPLER: Your article in "Food Technology", February, 1978, page 76, has just come into my hands and I have read with particular sympathy your statement, "That's the sum of the problem—tentative research results are too often presented as proven facts to the American public—and they scare the pants off people."

It seems to me that at least part of the cause of this pandemonium that you describe so well is caused by the way that America has chosen to finance research. By using short term grants to individuals rather than the continuing financing of effective institutions, we have divorced science from application, we have weakened the responsibility that scientists feel to their constituents, and we have encouraged people to advertise their field of research by scaring the pants off people.

My concern for the fate of innovation in America has caused me to write the enclosed letter to The Honorable, Jordan Baruch, Assistant Secretary of Commerce. I sent it along hoping that it might prove to be of some interest to you.

Sincerely yours,

PAUL E. WAGGONER,
Director.

CONNECTICUT AGRICULTURAL EXPERIMENT STATION,
New Haven, Conn., October 2, 1978.

Hon. JORDAN BARUCH,
Assistant Secretary of Commerce, Commerce Department, Washington, D.C.

DEAR MR. BARUCH: On Friday night on *Wall Street Week*, Louis Rukeyser gave instructions for making money on vanishing American Inventiveness. Chemical & Engineering News of July 17 told me of your investigation of innovation—now that we can't keep on doing what we've been doing. I presume to write because we have both worked in institutions that combine theory and practice, you at MIT, I at this Station.

What is desired innovation? I assume that the innovation you seek is more than just research or even the winning of laurels; it is science wedded to the solution of mankind's problems. Thus, it is possible for a nation to educate thousands of scientists, spend millions on science, win dozens of Nobel prizes, and still worry about failing innovation.

"I wanted to help feed humanity, but my professors tell me I can't get ahead at a university with practical research." This recent remark by a graduate student poignantly reveals the divorce of our American science from human needs.

D. K. Price tells how we got the divorce (Daedulus 107(2): 77–81). To free science from the hair shirt of the practical goals of such laboratories as the National Bureau of Standards or the experiment stations three tactics were used. Research was combined with teaching; project grants to individuals were used to avoid congressional or institutional influences; and scientists were given political authority that did not depend on popular votes.

Now, about a quarter century after the divorce of science from societal influences, what have we got? We have the graduate student's poignant testimony and your worry about innovation. And we have more.

The nation must pay the overhead of a grant system that requires full-time scientists in Washington to handle the proposals, volunteer scientists to evaluate them, business offices to account for them, and entrepreneurial scientists to seek them. Getting

and spending grants, we lay waste our scientists.

The diversions from society's needs can be read in BioScience 29(8): 490: "'Many of the gaps in nutrition research can be filled only by the accumulation of information of a type that does not attract the attention of faculty members. Alfred Harper, a professor . . . explained . . . Only 1 percent of the grant applications received by the National Cancer Institute are in the nutrition area." Thus society's interest in nutrition is not reflected in research, and innovation suffers.

In an analysis of environmental technology, B. A. Ackerman et al. showed the sorry outcome of an organization when one group establishes a program and then expects another group to follow through enthusiastically. This separation is a natural consequence of grantsmanship. (The Uncertain Search for Environmental Quality. 1974. Free Press, N.Y.).

The demographic change that followed the divorce of science from society is visible in the 1977 Statistical Abstract of the U.S., the full-time equivalents employed in in-Tables 1020 and 1026. In the 1965–75 decade, dustrial R&D increased by 4 percent, while the teachers, full and part-time, employed by institutions of higher learning increased by fully 77 percent. In 1965 there were 28 scientists working in industrial labs for each ten teachers, but in 1975 there were only 17.

In 1973 B. R. Stein analyzed the consequences (Research Policy 2: 2–16). He found that the system of grants, as from the NSF, views scientific progress as a surrogate for achieving practical results, and accountability was largely left to those chosen to determine scientific merit. "While research in the past had contributed to an array of technological benefits which could be equated with the promotion if not satisfaction of national goals, the more recent and increasingly costly scientific undertakings appear to yield ambivalent results."

Today we have the inevitable fallout of a quarter-century program of separating science from other concerns.

In the C&EN article that told me of your study, J. J. Ford is quoted as saying that our present "Organizations are closed systems processing only what they are set up to process with little if any interactive relationships with sister organizations." Seeking innovation the government appropriated more money for the project-grant system associated with universities, a system where Stein found scientific progress was viewed as a surrogate for practical results. With these grants young scientists are trained and then often maintained on post-doctorates in universities, the organizations that process well the students they were established to process. Despite good intentions, there are bound to be, in Ford's words, limited interactive relationships between the system of student-processing and the system of industry, agriculture and others.

"OK", you may say, "We have wrongly driven a wedge between science and practice for nearly a generation. How can we pull out such a lengthy mistake?" I offer a successful alternative that we can work towards.

In agricultural research, the experiment stations are industrial labs. They encompass the range from basic biology to testing innovations in real farm fields. Most of the Federal dollars that come to them, the so-called Hatch funds, come to the Stations themselves and are used in the full range from basic research to payoff in practical innovation.

James G. Horsfall has written of the working and financing of experiment stations in the enclosed editorial in SCIENCE and in an OPINION in FASEB Proceedings. The trick in innovation is putting basic and practical research under the same roof, avoiding the isolation Ford described.

Every day the basic researcher faces the practical problems, and the practical developer sees the frontier of knowledge. They are drawn together by money from a single patron and succeed together by innovating.

Other labs, like Bell, innovate by unified financing rather than sending staff to forage and by placing together first-rate science and tough practical problems rather than separating them. On Route 128 MIT has a unique marriage of science and practice.

What do I urge upon you? I urge Federal financing that does not just multiply the scientists isolated in a system for processing students, but supports a full spectrum of jobs from basic to practical under the roofs of labs devoted to practical solutions to mankind's problems. Then universities will find satisfying jobs for their students; scientists will be stimulated by doing good for man; and the nation will harvest a crop of useful innovation.

Sincerely yours,

PAUL E. WAGGONER,
Director.

AN R & D DELIVERY SYSTEM

The federal government has funded and consumed a fabulous amount of research for its own needs—radar, inertial guidance, proximity fuses, ballistic missiles, "beating the Russians to the moon," and on and on and on. The emphasis has been on federal use. The National Aeronautics and Space Administration speaks of agency users, not citizens users.

At the same time the citizens are saying, "If we can put a man on the moon, we can do this or that." They will not be put off by the alibi, "That is a different subject." We must solve their problems as well.

In his editorial, Bisplinghoff makes a potent point that federal research should be and is now aiming more at citizens' needs, and he goes on to say, "It is not at all clear that funneling federal R & D funds through existing federal institutions will come within a country mile of accomplishing the intended purpose."

I agree wholeheartedly—it will not. Fortunately, there is a family of state institutions with a federal connection that do come within that "country mill of accomplishing the intended purpose" of research for citizens' needs. They do so because they are not federal. I refer, of course, to the Agricultural Experiment Station system.

The first experiment stations were set up a century ago by states to solve problems of farmers, the largest group of citizens at the time. Soon the hoped-for solutions began to come—better varieties, better fertilizers, controls of disease, and better nutrition. Soon city people found that the stations helped to feed them. The economic return on the investment in research was high.

By the time the first 13 state experiment stations were in operation, Congress decided that here was a useful system through which to funnel federal R & D funds with the aim of solving citizens' problems. The Hatch Act was passed, and there is now an Agricultural Experiment Station in every state.

By now the stations have solved reasonably well the problem of cooperating with the industries that produce our food. And they have a delivery system that has functioned for nearly a century. Being spread over the nation and directed from the grass roots, stations know citizens' needs and how they vary over the country. Therefore a federal agency does not direct them, but Congress funds them and thus spreads its scientific bets across the nation. Since no Washington committee can possibly think of all the angles or numbers that might win, the decisions must be and are made locally.

A basic policy is steady money Congress funds the stations on a regular basis, not on the feast-or-famine basis of individual grants. That means that if a fire flares up it can be quenched before people go hungry, as the corn blight epidemic of 1970 plainly showed. In cooperation with industry, the system put out that fire in 2 years. Had the system depended on contracts and grants, the red tape would hardly have been unrolled in that time.

While doing work with practical applications, the stations can do profound research too, as several Nobel prizes and memberships in the National Academy of Sciences prove. Vitamins and hybrid corn testify to the value of the stations. So, too, do dicumarol, streptomycin, and biological control of pests.

Bisplinghoff is correct: the stakes are large, they are getting larger, and the hour is late. Fortunately, in its research for our groceries the country has developed a system that can make discoveries, can translate them into solutions for the public and private sectors, and can deliver the results.

Perhaps the Agricultural Experiment Station system is a first approximation to examine as we seek greater economic return on our federal R & D investment—JAMES G. HORSFALL, *Director Emeritus, Connecticut Agricultural Experiment Station, New Haven 06504.*

THE YEARS OF NEGLECT

Energy for the machines of man is now spread blackly across the front pages of the daily press—a result of years of neglect from a surplus of oil. The editors and man are staring at the bottom of the oil barrel. But modern man and the editors, being well fed and far from the farm, do not even look at the flour barrel, the source of energy for man himself. And yet the bottom of that barrel is also showing. This view also comes from years of neglect, years of neglect of agricultural research.

One simple statistic reveals the bottom of the four barrel. Lester Brown, the distinguished economist of the World Watch Institute, said recently that the world reserves of grain have fallen from 105 days in 1961 to 31 days in 1976. Several years ago, the National Academy of Sciences published a detailed look at how farmers produce the food that fills the flour barrel. It cited many examples of the peaking of productivity curves: the number of people fed by one farmer or one arable acre, the pounds of food produced from a pound of fertilizer, and the pounds of meat from 100 pounds of feed. The fast food chain and the supermarket still have plenty to sell, but we are living on borrowed time. It takes a while to take up the slack.

A century ago agricultural reasearch in the United States became organized with the establishment of an agricultural experiment station. Congress was so pleased with the idea that a dozen years later it passed the famous Hatch Act making continuing grants to every state to operate an agricultural experiment station. Agricultural R & D at experiment stations has followed the dictum of S. W. Johnson, the founding father, who wrote in 1855 that theory and practice, i.e., basic and useful research, must march together in each institution to the drumbeat of the problems of agriculture around the institution.

A century and more later, Norman Borlaug, the recent Nobel Laureate, phrased it more pithily. "Our research must be good," he said, "but it must be good for something." And that it was.

For three quarters of a century, theoretical and useful research did march together, each fortfying the other. Agriculture carried its share of good research and it was good for something. As a result, agricultural productivity in this country rose spectacularly. For

example, at the turn of the century one experiment station director on the eastern seaboard decided that fresh milk would remain in his state as a staple food for children and that corn would be the best food for the cows that produced the milk. In consonance with the policy of his station, he initiated a broad program of theoretical and useful research in corn genetics and corn biochemistry.

The work on corn genetics led to a theoretical explantion of heterosis and then to hybrid corn, whereupon the yield of corn was doubled. The work on corn biochemistry looked at the nutritive value of corn and discovered that corn is deficient in lysine and that animals and people could not survive without lysine—the first demonstration of the essentiality of amino acids in the diet.

Blending theory with practice, the inventors of hybrid corn turned their attention to chromosome maps in corn and discovered a marker gene called opaque II out in a farmer's field. At another station, this gene was found to control lysine synthesis in corn and thus to increase markedly the nutritive value of corn especially for the hungry of the nations of the world depending so heavily on corn in their diet.

The synergism between theoretical and useful research in the same institution was so effective that by 1950 the flour barrel began to overflow and surpluses of food appeared. Policy makers in the United States began to complain about "excess capacity" and recommended that agricultural research be curtailed.

Whether concomitant or causal, a drastic shift between theoretical and useful research did occur. Just at that time the nation began beating another drum. Washington-based professional peers had money to grant to their colleagues across the country. Naturally they beat their drum on the Potomac to the tune of research for the sake of research and research for the advancement of the professions of the peers.

The shifting emphasis toward "basic research" could not have come at a better time to those being discouraged in agricultural research in the stations. The research with grant money was good, no doubt about that; but it steered researchers away from the useful and, thus, was less than "good for something." In many stations, if the work of the researcher was good for something, rather than pure, his peers considered it less than first class.

The long years of neglect of useful research set in and the nation has lived on borrowed time purchased during the years of surpluses by the difference between the income of the farmers and that of their city cousins. As the years of neglect lengthened, the surge of agricultural production efficiency slackened.

Faced with this situation this year, Congress in its infinite wisdom is considering a curious solution. It would create a granting agency within the U.S. Department of Agriculture for still more theoretical research in institutions that have been doing it all the time. Thus, another diverting drumbeat from the Potomac, faintly disguised as a farm tune, but disrupting of the union of theory and practice in the stations.

What to do? Restore the dignity of useful research to the Experiment Stations, not try to graft it onto institutions that have not shown any yen for it. Give as much academic recognition for a resistant variety of wheat as for a new twist on the DNA molecule. Return to the stations the basic research policy and the funds to do it under the Hatch Act so that theoretical and useful research could march happily together once more.

JAMES G. HORSFALL,
The Connecticut Agricultural Experiment Station.

THE ASBESTOSIS TIME BOMB

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. HANNAFORD. Mr. Speaker, this month's issue of Trail magazine contains an interesting article on an important subject: asbestos pollution in the workplace. Written by Robert E. Sweeney, a former Member of Congress and a present partner in the Cleveland, Ohio, law firm of Sweeney, Mahon, and Vlad, the article is addressed to those attorneys who will litigate the growing number of asbestos claims coming before the courts. It gives an accessibly short yet detailed history of the recognition of the health hazards that are posed by asbestos use, the legal ramifications of asbestos contamination and compensation, and a "what to look for" guide for the attorney interviewing a client with a workman's compensation claim. I believe that this is an issue we will have to deal with in the coming years, and I insert the article for the benefit of our colleagues who may not have had the opportunity to read it in Trial magazine:

THE ASBESTOSIS TIME BOMB

(By Robert E. Sweeney)

There is a popular misconception that asbestos disease cases are basically lung cancer cases. However, scientific studies identify the disease of asbestosis, as well as pleural and peritoneal mesothelioma, as resulting from the inhalation and ingestion of asbestos dust found in the workplace.

Further studies indicate that esophageal, stomach, colon, and rectal cancers are equally caused by industrial exposures.

The workers that we represent are contaminated on construction sites, in shipyards, and in factories throughout the United States. These workers are obliged to labor in dirty, dusty, confined environments. They earn and toil in boilerhouses and hospitals and factories and are daily in contact with asbestos, which is easily airborne, easily swallowed, and easily inhaled.

Lawyers handling cases on behalf of such workers and their families must therefore become familiar with the state of the art in research medicine, science, and in epidemiology concerning asbestos dust.

We should not only pay heed to scientific progress in the American medical and scientific community but to that of the scientists of the United Kingdom as well, who have been primarily involved in this industrial dust area since the early 1900s.

The most prominent and earliest works on asbestos dust inhalation appeared in the *British Medical Journal* of 1924.

These articles provide insight into the medical research which led to the regulation of asbestos dust in factories throughout Great Britain in the mid-1930's. At that time the Ministry of Factories and Health of Great Britain promulgated and adopted regulations concerning the distribution and uses of asbestos.

It is interesting to note that the Johns Manville Corporation, which produces about 70 percent of the asbestos in the world, and markets it through both British and American corporations, has submitted to the regulations in Britain.

The university medical libraries of this country are certainly important sources of information on the state of the art dealing with asbestos. However, the Department of Environmental Medicine at Mount Sinai Hospital in New York City has some of the best research material available in the world on the subject.

At Mount Sinai, prominent medical researchers of international recognition have worked most effectively under the direction Dr. Irving J. Selikoff, M.D., to develop creditable and recognized medical surveys on the relationship of asbestos dust inhalation to the onset of pulmonary disabilities.

Trial lawyers should be familiar with the fact that it was the studies of Dr. Selikoff and the research team at Mount Sinai that developed the basis for our knowledge of the statistical association between asbestos inhalation and ingestion and the high rate of cancer in insulators.

INDUSTRY ACTIVITY

Circa 1930, the adverse effect of an increasing number of insurance claims on the workmen's compensation costs to the industry prompted an inquiry into the problem. Alerted by the work of medical and scientific investigators throughout the world, the asbestos industry, led by Johns Manville, commissioned the Metropolitan Life Insurance Company in the early 1930s to investigate and determine the relationship of asbestos exposure to the high rate of pulmonary disease encountered among workers in the asbestos mines and factories.

These studies were conducted under the leadership of the medical director of the Metropolitan Life Insurance Company, Dr. Anthony J. Lanza.

The project ran from October 1929 to January 1931. It included study of dust conditions in asbestos mines and mills in Canada and the United States.

Physical examination of asbestos workers included X-rays, films, and studies of dust exhaust systems.

The conclusions of the industry's own research proved that prolonged exposure to asbestos dust caused pulmonary fibrosis and that cases of definite cardiac enlargement were frequently found to be associated with asbestosis.

The study recommended that the industry face seriously the problem of dust control in asbestos plants and sponsor studies on known cases of asbestosis.

In short, the industry investigation clearly documents the fact that the industry was mining and manufacturing a hazardous product. X-rays taken in the study showed fibrosis buildup in the lower lobes of the lungs of the workers examined.

Later, the industry established the Industrial Hygiene Foundation of Pittsburgh, and I am convinced that this organization was established to cloak their activities.

From time to time, reports would be received by the foundation and the asbestos manufacturing leadership of the nation alerting the industry to the hazardous potentials of the product that they were manufacturing. The reports urged that precautionary methods be adopted to remove workers from the risk of inhalation or ingestion of the airborne asbestos fibers.

Further recommendations were made that engineers be hired to design exhaust systems in the plants to remove workers from the harmful effect of dust inhalation. As a result, exhaust systems began to appear in American factories. Respirators and masks were recommended. Other steps were taken to physically examine employees on an annual basis to determine the particulars of the state of the health of the employees and the degree to which they were harmfully affected by their exposure to asbestos dust.

With full knowledge of the state of the art of medicine and science, with full knowledge of the fact that their own mine and plant workers were being harmed and that this harm was continuing on a progressive basis, the manufacturers continued to receive workmen's compensation claims from

injured men and women. They continued to adjust or negotiate these claims, fully mindful of the scope of the ever-increasing occupational hazard.

We have delved into the files of their medical libraries and the papers of their directors. We have found an exchange of correspondence between these directors and the leadership of the American asbestos manufacturing community pertaining to these studies. The tone of the correspondence is that of a warning to the industry of the harmful and dangerous effects of asbestos and a prescription of recommendations for improving industrial hygiene.

ACT I, SCENE I

The tragic story of the epidemic of asbestos dust disease in the United States of America is just now unfolding. What we are looking at is Act I, Scene I of a health tragedy that could have been avoided. I predict that we will be hearing much more about this health epidemic as more and more American men and women die at early ages from asbestos dust exposures that could have been avoided.

I share with you the testimony of the vice president of Johns Manville before the Assistant Secretary of Labor for Occupational Safety and Health a few years ago. He said that his company certainly knew about the harmful effects of asbestos 30 or 40 years ago and that it has tried to investigate the problem and follow the advice of medical experts.

Unfortunately, the steps that they took only served to partially protect their factory and mine workers. They completely neglected to consider the effect that their harmful and hazardous product had on the general public, or the field worker who had to come in contact with it on the construction site or in the maritime shipyard.

The results of discovery in asbestos cases clearly indicate that the manufacturing companies failed to take air sample tests in the construction environment and failed to go into the shipyards and construction sites to determine the conditions under which their product was used.

They failed to determine what precautions should be taken and what consequences could be expected. In short, they avoided the duty that was theirs under Section 402A of the law of strict liability, where they are charged to the knowledge of an expert as to the potential dangers and hazardous potential of the product that they produce.

They failed to keep abreast of the state of the art, the work of epidemiologists and researchers. They failed to underwrite research and, most importantly, they failed to adequately and properly label their product as hazardous, once they were on notice of the scientific facts.

As a result, workers and their families have been unnecessarily injured. Recently, I interviewed a 43-year-old woman in the State of Indiana who is a victim of pleural mesothelionma: a mother with a beautiful family who has never directly worked in an asbestos environment.

She married an asbestos worker. She washed his clothes and over a period of time of handling his work clothing in the small closed environment of her basement, she inhaled a sufficient quantity of asbestos to develop the disease which has reduced her life expectancy to six months. She takes medication every few hours to endure the pain of the tumorous cancer which has carved away almost half of her left side of her ribcage. She suffers; and her suffering is the direct result of the greed and the indifference to good industrial health practices of corporate America.

All the victims seem to tell the same story: the material is easily airborne; it gets into your nostrils; it gets in your ears; you swallow it; it clings to your skin; it cuts in and sometimes abrades the skin between the fingers and they start to bleed. Imagine what it does to the tender lining of the lung.

It is important to realize that asbestosis is a progressive insidious disease and that all too often there is a typically long period of latency between the time of initial injurious exposure and the time of the onset of the disability symptoms of disability.

In some instances the latency period can be as long as 25 or 30 years. For this reason, often professional medical men do not make the connection between a disease which appears at mid-life and an injurious exposure to asbestos which may have occurred in the young adult years.

THE CLIENT'S HISTORY

A lawyer interviewing a client with a workmen's compensation claim dealing with pulmonary asbestosis should inquire whether or not the client: worked in a shipyard; worked with asbestos or was anywhere near where asbestos was being used; or whether he ever worked in closed environments repairing and tearing down boilers, removing the outer lining, and shredding old dried asbestos from the mechanism.

A lawyer should ask:

Has the client ever had X-ray studies?

Does he smoke? How much? For how long?

Has he ever been refused insurance due to pulmonary problems?

Has he submitted to a recent physical?

Has he ever been rated for life insurance because of pulmonary deficiencies?

The alert, examining advocate must pinpoint as best he or she can when the worker's symptoms first appeared. This is very important, since it might bear upon statute of limitations problems. Different states begin the calculation of time on a different basis as to when the statute begins to run. Find out:

When was the client's first medical examination?

When was the client first informed of the diagnosis by the family doctor or specialist?

When did the client first experience shortness of breath, clubbing of the fingers, dizziness? Be sure to secure letters of authorization addressed to the client's doctors and medical specialists.

Has the client ever used a mask or a respirator in his workplace? Did he ever know the toxic agent he was protecting himself against?

If the client belongs to a union, find out if there is a health hazard program. Has the client ever been notified by his union's medical consultants as to particular health hazards associated with his job?

Secure a chronology of the client's entire work history. Be sure to inquire whether he or his spouse has kept the old income tax records which can be used most effectively in establishing his work record. By all means, do not overlook the fact that the administrator of the health welfare office or fringe benefit program of the union maintains detailed and accurate records of employment.

After you establish where the man has worked, go down and speak to his employer. Learn as much as you can about the work environment of this particular client. Interview his coworkers, particularly those in his own age group. Find out what jobs they recall having worked on together. Try to get an affidavit describing the working conditions on those jobs from these co-workers. Have them note whether or not the materials they worked on had any precautionary health hazard warning labels on the bags or boxes.

If your client worked for a utility industry, you might inquire at the utility division of engineering, which usually maintains good records on all products, to find out the names of the suppliers of materials who bid on those jobs and the specifications of the insulating materials used.

These former employers can be very helpful as allies in the assertion of third-party claims against the basic manufacturers of asbestos products. It is very important that these employers understand that they are not being targeted and cannot be brought into the litigation; that the sole purpose of the inquiry is to determine which materials and products caused the harm and injury to their employee.

Determine if there were any safety regulations or surveillance practices in effect on the job. Many times we find that the client, while not an asbestos worker, is a sheet-metal worker, a pipe-fitter, a plumber, or a painter, and that he came in contact with asbestos materials because of the simple fact that he worked in close proximity on the work site to the asbestos insulators and was thus contaminated.

In discovery deposition, find out from these sources if they can supply you with any of the invoices or specifications that were published at the time the materials were purchased.

In preparation of the pleadings be certain to develop thorough interrogatories addressed to all defendants.

Anticipate the defense of the manufacturers' attorneys. They will say: "We proceeded to believe that exposure to asbestos material was not harmful and we really did not know that we had any duty as manufacturers until about 1965 when Dr. Selikoff published his articles on asbestos insulators. It was at that point that we then became aware of our responsibility and aware of the fact that asbestos was indeed harmful."

Your job on behalf of the plaintiff is to prove that these claims are sheer nonsense and are unsupported by fact. Use the library, the British and American studies, the US Health Service publications, and other source materials to prove your point. For source materials, direct requests to the state and federal agencies, particularly the Division of Occupational Safety and Health of the US Labor Department and the National Institute for Occupational Safety of HEW.

Check the workmen's compensation files in your district and do not overlook the public health libraries. Dig into the material at the National Academy of Science and, most particularly, regional safety libraries.

Do not neglect to research the manufacturers' corporate reports, for they will indicate the corporations' knowledge of asbestos. Eight years ago Raybestos-Manhattan said in its annual report: "We are delighted to announce to the insulating industry that we have perfected a new product."

Then the company went on to name the product and its properties, adding: "As you know, this bears upon what we have known for over 30 years, that asbestos dust is extremely harmful and dangerous to health."

Check back on the manufacturing industry's agenda for national meetings as early as the 1930s when doctors of the United States Department of Health and federal health agencies were speaking on pulmonary asbestos-related problems.

Once you have the research materials sufficiently gathered, the next step is to visit the family doctor. Ordinarily, he will be more concerned with his patient's care than with the state of medical research. He is generally so busy with office appointments and hospital commitments that he does not have adequate time for in-depth studies outside of his own personal professional practice.

Your duty is to help him. Assist him by turning over to him any knowledge that you have developed in your research. Willingly share your materials with him. Indicate to the professional doctor that you have read the recent studies which claim that, by the use of electronic microscopic methods, pa-

thologist are now able to identify asbestos fibers in tissue.

If your client has mesothelioma, discuss the interesting question of how the asbestos fibers migrate within the body, as it may provide a clue to the origin of your client's disease process.

Delicately consider the procurement of authorizations for postmortem examinations.

In discovery it is helpful to talk to the hierarchy of the defendant corporation. Find and identify the medical director of the corporation. Determine when he was hired, when he retired, the name of his successor, whether he ever spoke at seminars. Secure copies of his articles and addresses to professional societies wherein he discussed asbestos.

I recently had the opportunity to depose the medical director of Johns Manville. Let me share with you a part of an address that he gave at an industry seminar which provided some of the materials for the depositions. In his seminar speech he said: "The industry has a tremendous legal responsibility for the harmful injuries that have been visited on countless people—there is in the United States, because of asbestos inhalation and exposure, a time bomb. A time bomb that may go off and is continuing to grow. We can't begin to approximate how many people will be adversely affected."

These kinds of predeposition comments are very helpful in eliciting from the witness admissions that the industry that acts thusly—that does not label its dangerous product, that does not forewarn the user of these dangers, that does not understand the conditions under which their product is being used, that does not adequately research or keep abreast of the state of scientific and medical art—is in fact an irresponsible industry that ought to be made to respond in damages to the victims that it has thus harmed.

CONCLUSION

We have had an interesting experience in the last five years of involvement in asbestos litigation. The story is still unfolding and it is growing, but if occupational health and safety problems are to be dealt with in real terms, they cannot simply be viewed as medical or technical problems. Rather, they must be thought out in the larger context of workers' struggles for eocnomic security and humanized working conditions. They must be controlled by the decisionmaking concerning health practices in the industry.

Workers must not have to work in ignorance of the dangers and harmful effects of asbestos in the workplace.

This is a very exciting detective story which will bring you to touch upon many other disciplines, and as a consequence, as an asbestos litigator, your life will be made much richer for it. Your clients, the victims and their survivors, are going to get less injustice. The asbestos industry is going to be made much safer. Your philosophical understanding of corporate America and our total social architecture will be your most important tool in locating this information.

In doing this, you and I will have executed our responsibility as lawyers most admirably.●

ROGERS TRIBUTE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. McCLORY. Mr. Speaker, the announcement of Congressman PAUL ROGERS of Florida to voluntarily retire at the conclusion of the 95th Congress came as a distinct surprise to many of his colleagues.

Congressman PAUL ROGERS has distinguished himself during the past 24 years for outstanding and courageous service in articulating the highest principles which guide Members of this body.

It has been my special pleasure to become personally acquainted with Congressman PAUL ROGERS and my wife Doris and I treasure PAUL ROGERS and his lovely wife Becky as personal friends.

Mr. Speaker, Congressman PAUL ROGERS has been of particular value to this body because of his expertise in the fields of health care and related subjects. We are certain that PAUL ROGERS' retirement from the U.S. House of Representatives does not indeed mean his retirement from active life and we expect him to continue in a related or other useful career where his talents and energies can continue to benefit his fellow man.●

TRIBUTE TO WILLIAM F. HICKEY, PAST NATIONAL PRESIDENT OF FLEET RESERVE ASSOCIATION

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BOB WILSON. Mr. Speaker, the convention issue of the Chula Vista Branch 61 of the Fleet Reserve Association contains an article on a most remarkable San Diegan, William F. Hickey, a past national president of the FRA.

Bill is a 30-year Navy veteran whose career spans the seven seas and conjurs up images of the China Station and the days when America's fleets roamed the world. He is a valued friend, and I believe the rest of my colleagues will find this recounting of his life a fascinating tale.

[From the Loudspeaker, Sept. 1978]

WILLIAM F. HICKEY, PAST NATIONAL PRESIDENT 1955–1956, FLEET RESERVE ASSOCIATION

William Francis Hickey was born in Troy, New York, on August 20, 1899. Shipmate Bill was one of six boys and four girls born to William A. and Anna L. Hickey. As a young man growing up in upstate New York, school and a red-blooded American boy, with the feel of salt air running through his veins, are bound to reach a head-on collision which happened when Shipmate Hickey's schooling abruptly ended two weeks into the seventh grade in 1914 at the local Catholic school where he and Sister Theresa could not see eye-to-eye on certain classroom deportment. Needless to say the basis of this story started in rather a similar fashion to most of us who had reasons to enlist in the United States Navy.

Shipmate Hickey boosted his age a couple of years to join New York State National Guard. During the Pancho Villa Raids, his regiment was called by President Wilson and mustered into the United States Army for the Mexican Border Campaign. $18 as a private first class and a horse blanket did not appeal to him. So he requested discharge to enlist in the United States Navy where his brother J. J. was in his 14th year of service.

Shipmate Hickey received his boot training at Coasters Harbor Island, Newport, Rhode Island. During his naval career which spanned thirty years, he had the pleasure of serving on eighteen ships. He has seen sea duty aboard battle ships, destroyers, a tender, and a fleet tug. He served in all fleets—Atlantic, Pacific, Asiatic, European, and South America including duty in the Black Sea following World War I.

Shipmate Bill married Caroline M. Kreiling in 1921, and there were two boys and three girls born to the marriage. They were married in Key West, Florida where Caroline arrived via train. The marriage took place fifty minutes after the train arrived.

In 1937 Bill transferred to the Fleet Reserve with the rate of Chief Boatswain Mate; however, he volunteered to return to active duty on September 23, 1939 and was accepted. His World War II service took him to both the Atlantic and Pacific theaters, and his excellent performance of duty earned him a commission. He was released from active duty to retire with the rank of Lieutenant in November 1947.

Shipmate Hickey became eligible for membership in the Fleet Reserve Association in November 1924, but with the raising of a family and drinking what Bill called "good bourbon", he had to forego one or the other. On the pay of a second cruise, first class of $94.40 per month, Bill chose the easy route. He joined the FRA in May 1937 here in San Diego. Shipmate Bill has served Branch 9 twice as its president before progressing through the ranks to the highest office of the Fleet Reserve Association—National President.

In his many years of association with Branch 9 he has continuously served in some position in that Branch. In 1945 Shipmate was elected Regional President of the old California Region. In 1950 his exceptional leadership and organizational abilities were recognized by his Shipmates of his Region, the West Coast Region, and he was elected President of that area. At that time the West Coast Region was composed of the states of California, Nevada, Colorado, Arizona, and New Mexico. Shipmate Hickey continued to rise up the National Officers' ladder by chairing many key National Committees. In 1954 at the 28th National Convention held in San Diego, he was elected to the office of National Vice President of the Fleet Reserve Association. The following year at the Chicago National Convention he was elected National President by acclamation.

In 1949 Secretary of Defense during the Truman administration issued orders that all commissary stores were to be abolished. Shipmate Hickey was appointed Chairman of a committee by Branch 9 to formulate plans to establish a Coop Store in the San Diego area. He held the first general organizational meeting here at the VFW Club, Seventh and E St., in San Diego where an overwhelming crowd of interested military personnel and their families assembled to make plans.

The initial membership charge of $10 was assessed per family, and in a few weeks over 4,000 members became associated with the project. The store was established in a building at the General Dynamics Plant No. 2 on Pacific Highway in San Diego. It consisted of 16,000 square feet of display area allowing the members to make purchases for their family needs from needles to home furnishings. The pressure to maintain the existing Navy Commissary Store was a battle led by Shipmate Hickey from San Diego to the White House in Washington, D.C.

Shipmate Hickey met with Admiral Denfield who was Chief of Naval Personnel at that time and stated the case for the need of the enlisted personnel to purchase their staples at the Navy Commissary due to the minimum amount of wages then being received. He also told Admiral Denfield that he would not backwater regarding the commissary issue, and he placed his thirty years of naval service on the line to substantiate the importance of this project.

After listening to Shipmate Hickey's presentation, Admiral Denfield replied that the Senate of the United States would never

allow the Navy to courtmartial him over this issue. As a result, the commissary stores were never closed. After twenty months of operation in the San Diego area of the San Diego Coop Store, the store was decommissioned. Each and every contributor to the membership charge received their original investment back many times over.

In 1956 Shipmate Hickey while serving as National President of the Fleet Reserve Association was in Washington, D.C. on official FRA business. Admiral Holliway who was serving as the Chief of BuPers sent a Lt. Cdr. to request in the interest of retention of enlisted personnel in the United States Naval Service the backing of the Fleet Reserve Association to formulate and hold a Mrs. United States Navy Contest. Shipmate Hickey organized thirty such contests throughout the world with the National Contest to be held in Long Beach, CA for a ten day period of festivities which included a tremendous military parade, a fly-by by the Blue Angels, a 51 naval ship review, plus numerous other social activities. This program cost over ½ million dollars of which the Fleet Reserve Association spent approximately $1,500.

The retention of military personnel was completely reversed. The Shipmates of Branch 43 and business community of the City of Long Beach can be proud of their contribution to this highly successful program.

The story of the purchase of the Fleet Reserve Association National Headquarters at 1303 New Hampshire Avenue, Washington, D.C. is a story to be retold. Only by Shipmate Hickey's foresight and initiative did the FRA decide to purchase the property that now houses our National Executive Offices in Washington, D.C. This, as you might know, was not an easy task. At that particular time the spoken word was to place in motion a request to have Shipmate Hickey impeached for doing such a thing as buying a home. But as time was foretold, the home, Shipmate Hickey, and the FRA thrive.

Bill often reminisced regarding his days aboard ships. Among them was the USS North Dakota, a first line battleship, followed by several tours of duty aboard destroyers. Noteworthy was his service in the USS Tattnel, DD–125, and the USS Overton, DD–239. Bill often remarked that he received his sea legs and spurs aboard destroyers.

In 1929 like all good navy men Shipmate Hickey was transferred to the China Station where he served in the USS Whipple for the next two years of his naval service.●

ROCKLEDGE FIREFIGHTERS MARK 75TH ANNIVERSARY

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. COUGHLIN. Mr. Speaker, I am pleased and honored to bring to my colleagues' attention the diamond jubilee anniversary of the Rockledge Volunteer Fire Company No. 1.

From its humble origins in 1893 as the Pennsylvania Fire Company No. 1, the Rockledge firefighters have provided 75 years of uninterrupted dedicated protection to citizens of eastern Montgomery County and northeast Philadelphia. Chartered by the Commonwealth of Pennsylvania in 1903, the Rockledge Volunteer Fire Company No. 1 demonstrates daily the resourcefulness and pride of local concerned individuals in solving the problems of their community.

Rockledge firefighters have met the challenge whenever the community has been threatened. From major blazes that endangered life to disastrous floods that crippled whole municipalities, Rockledge Volunteer Fire Company No. 1 consistently responded with expertise and valor. The legacy of sacrifice and service for others established by the Rockledge volunteers over the fire company's first 75 years will be worthy inspiration to the community's new generation of volunteer firefighters.

Mr. Speaker, I am sure that my colleagues will want to join me in saluting Rockledge Volunteer Fire Company No. 1 on this auspicious day in its history.●

A NATIONAL CANCER RISK ASSESSMENT POLICY

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WAMPLER. Mr. Speaker, it goes without saying that there is an obvious need for Congress, from time to time, to reexamine the laws it has placed on the statute books. This reexamination process should take place in areas where laws have become controversial; have been overtaken by technology; or where the jurisdiction over the basic area has proliferated to several committees of the Congress.

The laws that determine cancer risk assessment fit all three categories I have described above. In addition, we find numerous Federal agencies issuing regulations based on these laws. The result is confusion and controversy.

Two years ago the executive board of the National Pest Control Association, Inc., headquartered at Vienna, Va., adopted a resolution which conforms very closely to the thrust of my bill, H.R. 13543, which seeks a unified national policy concerning carcinogens. I request to insert this resolution in the RECORD at this point:

RECOMMENDED RESOLUTON ON CANCER

Whereas, members of the structural pest control industry seek truth in all matters affecting their businesses and the well-being of the public, and

Whereas, the public as well as affected industries need relief from the stress caused by conflicting or adversarial statements regarding cancer by regulatory officials, scientists, politicians, special interest groups and others, and

Whereas, zero risk from chemicals is unrealistic in a highly developed country such as the United States, and

Whereas, there is urgent need for a single authoritative source of guidance regarding cancer for all segments of society including government,

Therefore, the National Pest Control Association respectfully recommends that the President of the United States solicit from Government, Industry and Scientific Institutions including Professional Societies the names of the Nation's most eminent specialists on cancer and that from such experts he select and appoint a Distinguished Panel of Experts to provide on an ongoing basis:

1. Definition of chemical carcinogen;
2. Priorities in research on chemical carcinogens;
3. Asessment of the risk of cancer to humans because of their exposure to known or potential chemical carcinogens;
4. Reassessment, at least annually, of items 1, 2 and 3.●

BERKS COUNTY, PA., COMMUNITY TELEVISION

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. YATRON. Mr. Speaker, I would like to share with my colleagues an article which recently appeared in the October issue of the "American Association of Retired Persons News Bulletin," concerning Berks County Community Television.

I have long been a staunch supporter of BCTV and have had the pleasure of appearing on the station several times. I can personally attest to its tremendous value in helping the elderly. Many men and women who have previously felt cut off and alone now have a sense of true participation in their community through this exceptional television station.

The article appeared as follows:

TV PUTS COMMUNITY INSIDE CITY HALL

READING, PA.—A 77-year-old mayor and retired educator heads a unique community television station here that has won support from city and county government offices, a score or more of "Over 60" screen personalities, and put city and county officials on a first-name basis with viewers.

Eugene Shirk is board chairman of Berks County Community Television, a two-way cable television facility originating programs from city and county government offices, a Social Security office, and community high schools. More than 70 public and quasi-public organizations have used the cable—the only station of its kind in the U.S.—to communicate with older citizens.

Viewers have attained their "first-name" relationship with officials by watching the mayor and City Council in Thursday night showings of "Inside City Hall," produced by 70-year-old Mae Feick. County commissioners representing a constituency of about 300,000 have a similar program on Thursday mornings, also produced by Ms. Feick, who is a member of AARP.

Besides keeping viewers informed on city and county business, the station, BCTV, presents programs on changes in Social Security, county folk arts, county labor history (which college students can earn credits by watching), the rising cost of health care and other issues of interest to older viewers. For "good buys" and nutritional advice, a retired supermarket supervisor regularly produces a food program including televised visits to bakeries and markets.

Every Friday, Board Chairman Shirk and some of his contemporaries present a one-hour program called "Bridging the Generation Gap," in which they exchange opinions and comments with high school students.

BCTV was established in 1977 by New York University's Alternate Media Center as a National Science Foundation (NSF) research project. Reading was selected as a site because 16 percent of its citizens are over 65—an above-average proportion. The project was intended to test and evaluate

the impact of two-way cable television on the delivery of public services to older citizens.

When the $1.1 million grant expired, New York University withdrew, leaving behind $80,000 worth of black and white television equipment which was turned over to a coalition of older persons for a token sum of $1. Since then, the project has continued through the use of both public and private funding.

Jerry Richter, who originally was retained by the university, has stayed on as BCTV executive director.●

U.S. WHALING POLICY

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. RYAN. Mr. Speaker, on September 25, 1978, I inserted a Washington Post article by Mr. Lewis Regenstein, executive vice president, the Fund for Animals, which discussed a broad departure from existing U.S. whaling policy by Mr. Richard Frank, U.S. Whaling Commissioner, and head of U.S. delegation to the International Whaling Commission (IWC).

In the meantime, Mr. Frank published a rebuttal in the Washington Post, which appeared on September 27, 1978. Mr. Frank's rebuttal does not deal in a satisfactory way with the issues raised by Mr. Regenstein. However, it may delude many people into thinking no problem exists.

I am in receipt of a letter from Mr. Regenstein that takes Mr. Frank to task for his remarks in the Washington Post. Because of the seriousness of Mr. Regenstein's findings, I have asked the Secretary of Commerce to look into this matter as soon as possible and report back to me. We certainly do not want further compromising of the U.S. position at the December 1978, meeting of the IWC in Japan.

I commend to my colleagues Mr. Regenstein's letter which follows:

THE FUND FOR ANIMALS,
Washington, D.C.

Hon. LEO J. RYAN,
Chairman, Subcommittee on Environment, Energy and Natural Resources, Washington, D.C.

DEAR CONGRESSMAN RYAN: A couple of weeks ago, I wrote an article for the Washington Post criticizing the anti-whale conservation policies of Mr. Richard Frank, the U.S. Whaling Commissioner who is Administrator of the Commerce Department's National Oceanic and Atmospheric Administration (NOAA).

I described how Mr. Frank had reversed the U.S. previous pro-protection position on whale conservation and had, in effect, adopted a policy in support of continued commercial whale killing along the lines suggested by the International Whaling Commission's (IWC) Scientific Committee.

This change in policy not only violates President Carter's repeatedly expressed support for a moratorium on commercial whaling—over 80 percent of which is done by Soviet and Japanese whalers—but also subverts the will of Congress as expressed in the Endangered Species Act of 1973, the Marine Mammal Protection Act of 1972, and resolutions passed by both the House and the Senate calling for the United States to negotiate and work for such a ten year moratorium.

Following the publication of my article, which appeared in the Washington Post and the Boston Globe, Mr. Frank responded with a lengthy rebuttal published in the Post, copies of all of which are enclosed. Mr. Frank's response, while not challenging a single fact or statement contained in my article, is filled with half truths, outright falsehoods, and self-serving nonsense, which I will document below.

His letter makes it clear why new leadership is needed if our country's commitment to save the whale is to have any chance of success.

Mr. Frank begins his letter by praising the statements and actions of President Carter in favor of whale preservation, something with which I am quite familar. I even helped distribute, during the Presidential campaign, a Carter campaign statement on whales quoting Jimmy Carter as favoring a ten year moratorium on deep-sea whaling and promising to use this country's 200-mile limit as a bargaining tool to achieve this. Indeed, the very point I was trying to make in my article was that Mr. Frank has ignored and failed to carry out this commitment. Although the U.S. delegation, under Mr. Frank, has paid lip service to our previous policy of pushing for a moratorium, there has been no effective effort undertaken to push for one or even for significantly lower overall quotas.

Although the other countries may have been informed that this was the U.S. position, it should be emphasized that this was done in a pro-forma manner which was not taken seriously by anyone.

Indeed, no one will ever know how the vote would have come out at the last meeting of the IWC—in June, 1978—since the moratorium was removed from the agenda at the last minute without U.S. objection. After Japan threatened Panama with cancellation of a $10 million sugar purchase, Panama succumbed to this pressure by firing its pro-conservation whaling commissioner, Jean Paul Fortom-Gouin, and asked that the moratorium, which it had placed on the agenda, be dropped. This was done without objection from Mr. Frank, who made no attempt to have it retained despite his assertion that it is U.S. policy to seek such a moratorium. Many authorities feel that the moratorium could have been retained if one or more other countries had so insisted.

This tactic permitted the delegations from the other non-whaling nations, such as Canada, Britain, and Holland, to avoid abstaining or voting against this moratorium that had tremendous popular support in their own countries. It is possible that countries that voted against such a resolution one year might have to reverse their positions the next year following the public outcry that could be expected to ensue. We will never know until we try, and under the present policies it is doubtful if the moratorium will ever be given a fair chance to be enacted. Thus, the statement in Mr. Frank's letter that "The Carter administration has continued to support a 10-year moratorium . . . at every meeting of the IWC" is flatly untrue.

Mr. Frank's letter goes on to state, falsely, that:

"In the interest of obtaining improved conservation of whales and reduced hunting more immediately [sic], we have accepted the next best alternative, a procedure under which the member nations of the IWC set quotas at levels recommended by an IWC scientific committee *based on the well-being of the whale stocks*. Thus, political and economic considerations are no longer the determining factors as they once were." (emphasis added)

As Mr. Frank is well aware, the quotas are still set largely according to "political and economic considerations" and are not "based on the well-being of the whale stocks."

The quotas are set for the most part on data provided by the Japanese whaling industry (which is the major source for such information), much of which is biased, self-serving, and often fabricated in such a way as to inflate and exaggerate the size of population stocks and to minimize the efficiency of new and improved hunting technologies, such as the use of sonar. Moreover, many quotas are not even based on this pseudo-scientific method but are rather compromises pulled out of thin air.

For example, population estimates are arrived at using what is called Catch Per Unit of Effort (CPUE), which can give the misleading impression that the more whales that are killed in a period of time or area, the more there must be out there to be exploited.

In other words, if a large group of whales is found and killed in a short period of time, it allows the industry to extrapolate that figure over a larger area and inflate population estimates.

This methodology mistakenly assumes that whales are more evenly distributed over the oceans than is actually the case. In fact, many whales congregate in certain areas at certain times of the year, and the whalers often know where to go in order to kill a maximum number quickly and efficiently.

Thus, entire whale stocks can be wiped out while giving the impression that only a small percentage are being taken out of a much larger population.

Already, there is evidence that the breeding capacity of many whales still hunted is being, or has been, severely crippled.

Far too many sperm whales, for instance, are being killed, especially males, and the sperm whales now being landed are smaller than previous years and most are sexually immature, a sure sign that breeding stock is being destroyed. In the North Pacific and perhaps southern ocean stocks as well, so many males have been overhunted in the past that the birth rate has fallen dramatically, and there is a serious dearth of older, socially mature males, the large ones that take harems and do the breeding. Thus, the populations will continue to fall even if all killing is halted.

One of the major reasons CPUE data are distorted has come from the introduction in recent years of the use of ASDIC, or sonar, to hunt whales.

ASDIC is especially effective in hunting sperm whales, which dive deep and can stay under water for a relatively long period of time.

In the southern ocean and the Western Pacific, the use of ASDIC has drastically increased the efficiency of whaling, by 38 per cent to over 100 per cent in some areas according to some estimates.

However, the Japanese claim that in the North Western Pacific sonar has increased their efficiency only marginally, by a mere 5 per cent or so, a figure so miniscule as to be laughable.

Yet, incredibly, at the December 1977 IWC meeting, the Scientific Committee compromised between the two estimated sets of CPUE figures and came up with a protection (16%) not supported by any data and having no relationship to reality. And this was the main basis for raising the sperm whale quota by almost 900 per cent, from 763 to 6,444, which was supported by Commissioner Frank! This was done even though it was ostensibly U.S. policy to seek a ten year moratorium, and despite the fact that the sperm whale appears on the U.S. list of endangered species.

And in June of this year at the IWC meeting, new scientific data showed that the Western Pacific sperm whale population had been heavily over-exploited and was in sharp decline. In fact, even if there was a zero

quota on this severely depleted population, it would continue to decline. This is irrefutable evidence that the sperm whale quota voted last December had no validity. Yet, no action was taken at this meeting to set a quota for the North Pacific sperm whales (which includes Eastern and Western populations) because the Japanese violently objected as they did in June 1977, when the quota was reduced by several thousand whales. The Japanese are undoubtedly cooking up new "data" for this December's special meeting, just as they did last year to con the IWC into increasing the quota from 763 to 6,444. If the present policy of Mr. Frank prevails, the U.S. will go along with this ploy.

I can hardly believe that Mr. Frank makes the demonstrably false statement that "This procedure has fortunately resulted in a *decrease in quotas at each IWC meeting*, including decreases in 1977 and 1978." (emphasis added)

At the December 1977 IWC meeting in Tokyo, Mr. Frank voted to increase the 1978 sperm whale quota for the North Pacific from 763 to 6,444, which helped perpetuate the Japanese and Soviet commercial whaling industries.

At the June, 1977 meeting, under the leadership of then-U.S. Commissioner William Aron and Deputy Commissioner Tom Garrett, a reduction of 10,000 whales was obtained for the 1978 quota.

This was accomplished in part through a strongly worded message sent by President Carter warning that the U.S. might evoke economic sanctions against any nations that "diminish the effectiveness of the conservation regime of the IWC."

That victory, which many people felt would put the whaling industry out of business, was of course nullified a few months later by Mr. Frank. After helping force the removal of Dr. Aron as Whaling Commissioner (Frank was by then Administrator of NOAA, where Aron was head of its Office of Ecology and Environmental Conservation), Frank proceeded to take the position himself. At the first IWC meeting he had ever attended, in December of 1977, Frank helped reverse these gains and supported the increased quota of an additional 6,000 sperm whales.

Mrs. Frank's ostensible rationale for doing so was because the IWC's Scientific Committee had so recommended; and it is U.S. policy, he says, to ". . . set quotas at levels recommended by an IWC Scientific Committee. . . ." He also writes that this policy was adopted "with the concurrence of the conservation community." In fact, The Fund for Animals and other such groups never "concurred" in such a decision, and I doubt if Mr. Frank can name a single environmental group that went along with this 900 per cent increase in the sperm whale quota.

As for Mr. Frank's statement that this "quota was recommended . . . on the basis of the best available scientific evidence," he knows full well that the Soviets—the major whaling nation along with Japan—refuse to provide scientific data to the IWC, yet they continue to be given quotas each year.

Thus, the U.S. policy now appears to be, according to Frank, one of rubber-stamping the questionable findings of the Scientific Committee rather than seeking increased protection for whales. The Japanese and Soviets have learned to use and manipulate this system of determining quotas, and Mr. Frank is cooperating in this sham arrangement.

Neither Jimmy Carter nor the Congress, through the resolutions and laws it has passed, has said that our policy should be continued commercial killing of whales according to quotas and guidelines set by industry-oriented scientists. Instead, they have said our policy should be protecting whales, seeking a moratorium or, failing that, pushing for significantly lower quotas. This policy has been ignored and abandoned by Mr. Frank, despite the inaccurate and misleading statements he continues to make.

Moreover, Mr. Frank knows full well that it is not U.S. policy to support the Scientific Committee across the board. This seems to be a convenient excuse for going along with the Japanese and Russian whalers. In fact, the Scientific Committee has recommended, and reaffirmed, a zero quota of bowhead whales for Alaskan eskimos, on the grounds that this critically endangered species cannot withstand continued killing. Yet the U.S. has vigorously and successfully fought this Scientific Committee recommendation, and has persuaded the IWC to allow continued eskimo hunting of bowheads, despite the Scientific Committee's findings. There is widespread suspicion that Mr. Frank has reached an understanding with the commercial whalers, whereby he supports them on commercial killing, and they vote to override the Scientific Committee for the sake of the eskimos.

Mr. Frank mentions with pride the ban achieved this year on the killing of fin whales and sei whales in the Southern Hemisphere, but fails to point out that this was done much too late, and only after these stocks of endangered whales had become severely depleted. Moreover, the initiative for this ban came not from the U.S. delegation but from independent research funded by a private conservation group, the Whale Protection Fund in Washington, D.C. Moreover, these reductions were largely offset by a simultaneous increase of 531 in the minke whale quota.

Mr. Frank's lack of determination to achieve overall quota reductions was clearly demonstrated this past June when he failed to support efforts to achieve complete protection, or drastically reduced quotas, for the severely depleted, endangered sperm whale stocks off Australia, an objective being sought by other nations, but not the U.S.

At this meeting, Mr. Frank went along with the quotas at basically the same levels set by the IWC last year, except for North Pacific sperm whales, which will be decided this December. Although there was an overall quota reduction of only 5 per cent, Mr. Frank pronounced the IWC meeting a success.

It is also difficult to understand why Mr. Frank, a few days before the June 1978 IWC meeting, would publicly issue a statement that would jeopardize continued protection for the 11,000 or so California gray whales. Yet, their breeding grounds remain vulnerable and threatened, and their imperiled status is clearly demonstrated by the fact that they remain listed in the U.S. as an endangered species. Moreover, if the pre-exploitation level of these whales was 25–30,000 as some experts believe, instead of the 15,000 assumed by the Scientific Committee, then these whales would still be eligible for protected status.

Again, when there is doubt about the data, the IWC has erred on the side of exploitation instead of protection. But, curiously, in a news release issued shortly before the IWC meeting, Frank suggested that they had recovered sufficiently so that international commercial hunting of them might be revived. "Grounds exist for optimism that the gray whale may be removed from the protected list," Frank said in the release, thus virtually inviting other nations to consider turning to these whales as other stocks disappear or become protected. Sure enough, at the IWC meeting, these whales are removed from the protected list without U.S. objection, and the Russians were given a quota of 178 to be killed for their aboriginal population and reportedly to be fed to ranch-raised fur-bearing animals, such as mink.

In his letter, Mr. Frank gives an elaborate explanation of why these whales will remain protected from commercial killing under the IWC. But he fails to point out that this would apply for only one year, and can be changed by the IWC at future meetings. Thus, my article was correct in asserting that "there is now no effective mechanism to prevent commercial killing from being resumed and expanded in future years."

Finally, Mr. Frank writes that "Although the bowhead whale herd is reduced, most experts in the field do believe that a small take for the next few years would not significantly affect the stock." This statement is contradicted by the fact that the IWC's Scientific Committee—the group whose findings Mr. Frank says he feels obliged to accept—has set and maintained a zero quota on bowheads precisely because they do believe that even "a small take" could jeopardize their survival.

Of the eight great whales on the U.S. endangered list—several of which are still being hunted under IWC regulations—none has shown signs of recovery since being given nominal protection (with the exception of the California gray whales, which have come back after 40 years of protection.)

Today we are seeing some of the last of the great whales still being exploited and slaughtered beyond the point of recovery, with the support of our present Whaling Commissioner. Almost everyone agrees that the data base on which quotas are set is a shaky one, but the killing goes on. If we err, we should do so on the side of conservation, for once the whales are gone, they can never be brought back.

Until recently, the U.S. was the leader at the IWC in helping organize opposition to the small, hard-core bloc of whaling countries. As a result of U.S. leadership, whale quotas have been halved in the last decade. But under Mr. Frank, the U.S. has failed to organize the IWC majority that favors lower quotas. The main pressure on these nations now comes from Japan and the Soviet Union, for the U.S. has abdicated its leadership role.

Respectfully,

LEWIS REGENSTEIN,
Executive Vice President.●

CONGRESS SHOULD REESTABLISH INTERNAL SECURITY COMMITTEES TO MONITOR REVOLUTIONARIES

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. RUDD. Mr. Speaker, I have previously stated my deep concern over the dangerous limitations and restrictions placed on the Federal Bureau of Investigation's monitoring of subversive groups in the United States, by various Department of Justice and Federal court decisions as well as unwise statutes.

As a former special agent for the FBI, I can personally attest to the importance of such monitoring of subversive groups, including efforts to have them infiltrated in order to learn of planned action to harm the public or our Government.

The effect of various laws and decisions by the Justice Department and the courts has been to deny the FBI virtually any power to infiltrate or monitor the activities of ultraleftist groups such as the Revolutionary Communist Party (RCP), the Communist Party USA—a

Marxis-Leninist organization, the New World Liberation Front, the FALN—the Puerto Rican Socialist Party's underground radical organization, and the Progressive Labor Party.

Because of the avowed violent, revolutionary programs of these and other Communist groups, it is absurd to deny the FBI the ability to keep track of the various practices of these organizations.

It is also absurd to deny Congress essential information about these organizations and their activities that it needs, by failing to reestablish full-fledged Internal Security Committees in both Houses of Congress.

It is no coincidence that law enforcement agencies throughout the United States are finding it virtually impossible to keep up with information about these groups, including their planned criminal activities and members.

By stripping Congress and the FBI of the power to perform necessary internal security functions, these groups are allowed to carry out farflung, bizarre terrorist activities against private industry, government organizations and agencies, and individual citizens—without needed counteraction by the proper authorities.

In fact, the internal security situation is so bad at the present time that the Secret Service has listed a large number of American cities as unsafe for a visit by the President of the United States.

Recently the Progressive Labor Party openly advocated the "violent overthrow of the United States." In a special issue of Progressive Labor magazine, the PLP detailed its reasons why such violent overthrow of our Government is deemed necessary.

The fortnightly newsletter, "The Pink Sheet on the Left," published by Phillips Publishing Co., included an article in its September 25 issue concerning this publicly announced objective of the Progressive Labor Party.

The Pink Sheet article notes that the PLP is planting its own members in key positions within our own American Armed Forces, as part of the organization's long-range revolutionary Communist efforts.

It certainly makes sense that we should eliminate all restrictions against FBI infiltration of this organization, in order to protect our people and our Government against its avowed revolutionary objectives.

Congress should also be conducting continuous investigations of this and other groups, through standing internal security committees, so that needed legislative action can be taken to stop this subversive threat to our free institutions.

As soon as Congress reconvenes, it should pass a measure such as House Resolution 48, to reestablish such committees. Nothing should have a higher priority.

I would like to include the Pink Sheet article concerning the Progressive Labor Party at this point in the RECORD:

[From the Pink Sheet on the Left, September 25, 1978]

SPECIAL REPORT: PROGRESSIVE ADVOCATES VIOLENT OVERTHROW OF UNITED STATES

(By Phillip Abbott Luce)

Unfortunately, just as I expected would result from FBI and local police cutbacks in anti-subversion efforts (see Issue No. 181), the smaller communist parties in the U.S. haven't been receiving the attention they should get. A good example is the Progressive Labor Party (see Issue No. 78).

Formed in 1960 as the pro-Chinese Communist party in the U.S. (it's since broken with the Chinese) the PLP has had a history of violence and internal shakeups. But it's survived and is currently making no bones about its revolutionary intentions. Recently, its supporters have physically attacked members of the Ku Klux Klan and the American Nazi Party, and have tried to foment violence during strikes.

PLP membership is less than 3,000, but a handful of fanatics can be effective and dangerous. And the PLP's continued call for violence is a warning of what communists really stand for.

That call rang loud and true in the April-May issue of the Progressive Labor Magazine, official PLP house organ. Its cover story was, "Armed Insurrection: The Road to State Power." Here's how the article began (with my emphasis): No ruling class in world history—slave-owner, feudalist or capitalist—has given up power voluntarily. They have been crushed by armed force . . .

Workers make revolution not to substitute one form of exploitation for another, but to end exploitation and build socialism. Therefore, no compromise is possible with the capitalist class. It must be destroyed.

The conclusion to this long article (which was prepared by the PLP National Committee) gives some detail on future actions. It might also be considered an outline for other communist groups advocating immediate violence in their struggle to overthrow capitalism. Here's that conclusion (with my emphasis):

(1) Our strategy remains the armed struggle for working class state power . . .

(2) We must continue to rebuild our work in the armed forces. We wish to encourage party members and friends . . . to join the armed forces and help build this work. Some older members and friends can join the National Guard . . .

(3) In addition to studying the philosophy of dialectical materialism and the overall political ideas of Marxism-Leninism we must guarantee the study of a particular branch of this science, revolutionary war.

The PLP isn't only calling for armed insurrection, it's planting members in the armed services in an attempt to create confusion and turn troops against their officers to prevent the military from putting down PLP violence.

The Smith Act held it illegal to advocate the violent overthrow of the government. But now that the courts have emaciated the act, the PLP has no qualms about advocating—and planning—revolution. That may cause serious problems as the PLP and various terrorist sects begin serious actions.

That's why I believe it vital that FBI and local police intelligence again infiltrate and closely monitor activities of communist parties such as the PLP. The restrictions placed on the police and national security agencies by the CARTER Administration's Justice Department and the courts must be ended in the interest of national security. A good start would be passage of the Larry McDonald-John Ashbrook House Resolution 48 (see Issue #188) to reestablish a House Internal Security Committee which could prepare the necessary legislation.●

BAD HOUSEKEEPING

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, this morning's Washington Post carries an excellent editorial entitled, "Bad House-Keeping," which takes note of the chaotic and idiotic way we handle legislation in the House. While such chaos is to be expected at the end of a session, the Post correctly observes that "the House has been going at a frantic pace for months. Committees have kept churning out bills. Major measures have piled up on the calendar, with the leadership calling up one, then jumping to another, then going back to the first in mid-flight."

The Post also perceptively singles out the record number of bills being brought up under suspension of the rules which permits only limited debate and no amendments. Comments the editorial:

That streamlined procedure is supposedly for minor and noncontroversial matters, but many congressmen complain that they can't be sure what's going through when 15 or 20 bills rush by in one day.

The Post takes a skeptical view of those who think the answer to this lawjam is to streamline procedures by cutting down on the number of rollcall votes, for instance. Instead, the editorial suggests that the heart of the problem is that, "the volume of business has gotten too great. Past Congresses have created too many programs and agencies for the current Congress to review or at least reauthorize." And the editorial concludes:

Streamlining procedures may only increase the glut. House members don't need more time to dream up and promote more projects. What they need is fewer subcommittees, less entrepreneurial staffs and, above all, more self-restraint. If they did fewer things, they just might do them better—or at least less frenetically. It's something to think about while waiting for the umpteenth roll call late tonight.

Mr. Speaker, the Post editorial coincides with my release yesterday of a "House Reform Agenda for the 96th Congress." My reform proposals address many of the same problems noted by the Post. I have proposed, for instance, that we impose a 1-year moratorium on major new spending programs next year and concentrate on our oversight function by passing sunset legislation and requiring working oversight subcommittees on every legislative committee; only six committees now have exclusive oversight subcommittees. By shifting more attention to oversight we could be cutting back on this "lawjam" that now exists. I have also suggested placing a ceiling of six subcommittees on every committee; the average number of subcommittees per legislative committee today is 7.5. Moreover, we have a total of 191 House units today—committees, select committees, subcommittees, and task forces—up 22 percent from the 159

comparable units in 1974. This helps to explain in large part why we are churning out so much more legislation.

I think we might also exhibit a little more legislative restraint and good sense if we abolished proxy voting and the new one-third quorum requirement. By forcing Members to be actually present to conduct legislative business we just might act more prudently.

At this point in the RECORD, Mr. Speaker, I include the Post editorial and an article from the same edition of the Post on my House reform agenda:

[From the Washington Post, Oct. 12, 1978]

BAD HOUSE-KEEPING

By the time Congress leaves town on Saturday, the House will have set two dubious records. One will be for Most Roll Calls in a Year; the previous high (864 in 1976) was exceeded last week. The House is also likely to outdo itself in Most Yeas and Nays Cast Without Any Clear Idea What the Vote Is About. It could hardly be otherwise when members have to vote in quick succession on at least six conference reports, three supposedly minor or noncontroversial bills and perhaps a half-dozen measures requiring fuller debate. That's today's agenda; tomorrow and Saturday could be worse.

Granted, some end-of-session turmoil is unavoidable. Big tax bills always come late. The energy package remains to be passed. House action is also needed to continue ACTION's programs and keep the Endangered Species Act alive.

Still, one may wonder why so much work remains at the end of the year. The answer is not that Congress has been loafing, or that various factions have held back some dubious bills—such as the proposed Department of Education—in hopes of sliding them through in the last-minute crush. Beyond all the maneuvering, what's noteworthy is that the House has been going at a frantic pace for months. Committees have kept churning out bills. Major measures have piled up on the calendar, with the leadership calling up one, then jumping to another, then going back to the first in mid-flight.

Meanwhile, over 400 bills—another record—have come up under "suspension of the rules." That streamlined procedure is supposedly for minor and noncontroversial matters, but many congressmen complain that they can't be sure what's going through when 15 or 20 bills rush by in one day.

How can the House break the general lawjam? The Democratic Study Group and others wants to curb the number of roll calls. That could save some time. Rep. George E. Danielson (D-Cal.) has calculated that in the first half of this year, 517 roll calls ate up about a third of the House's time—and the outcome was overwhelmingly one-sided in 40 percent of those votes.

Still, some roll calls are useful. If members aren't made to think about a bill, even for a few seconds, they may not look at it at all—and Lord knows what might slip through then. And that points to the heart of the problem: The volume of business has gotten too great. Past Congresses have created too many programs and agencies for the current Congress to review or at least reauthorize. Moreover, the House's vaunted "democracy"—the advent of lively new members, the spreading-out of subcommittee power, the increases in junior members' staff—has generated a constant flood of new projects and proposals, each with energetic sponsors who can tell you in a trice why their measure is vital to the republic.

Streamlining procedures may only increase the glut. House members don't need more time to dream up and promote more projects. What they need is fewer subcommittees, less entrepreneurial staffs and, above all, more self-restraint. If they did fewer things, they just might do them better—or at least less frenetically. It's something to think about while waiting for the umpteenth roll call late tonight.

[From the Washington Post, Oct. 12, 1978]

PROPOSALS FOR HOUSE REFORM OFFERED

Congress should forgo major new spending programs next year and concentrate on studying the effects of past legislation, the chairman of the House Republican Conference said yesterday.

Rep. John B. Anderson (R-Ill.) said the House also should devote its time to investigating existing programs and agencies and to revising its own rules.

The new rules should allow "complete, continuous and unedited live broadcast coverage of House floor proceedings," he said.

Anderson's proposals were submitted to a special Republican task force on House reform.

"We have been too eager to pile new programs on top of old to gain political support from various special interests without proper respect for budgetary restraints, inflationary impacts, the need for greater efficiency and coordination and the over-all national interest," Anderson said.

The first major legislation enacted next year should be a "sunset bill" to impose a specific timetable for reviewing, revising and deciding whether to continue programs and regulatory activities, he said.

The 31 House committees with their 160 subcommittees should be trimmed, he said.

House members of both parties meet in December to vote on rules changes, select leaders and tentatively set legislative agendas for the session that begins in January.

In recent years, the Democratic positions have been placed before the House for a vote with no amendments allowed. Anderson called for an end to that practice.●

JOHN H. DENT

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. JOHNSON of California. Mr. Speaker, as the 95th Congress completes its business, we are reminded that our colleague JOHN DENT will not be returning to these Halls next year. I want to take just a few minutes to commend JOHN on his outstanding record in the Congress.

JOHN came to Congress just before I did, and we have been friends ever since. He has been a hardworking Congressman who knew well the needs and desires of the little man.

Through his membership on the House Education and Labor Committee, JOHN DENT has built an enviable record of accomplishments for the working man and woman. In recent years we have seen a continuing flow of legislation designed to improve the working conditions for American workers. Much of this legislation is the direct result of the skillful leadership of JOHN DENT.

He also took on less glamorous tasks, but nevertheless important ones, through his membership on the House Administration Committee. There JOHN became well known for his diligence and concern with detail.

JOHN has been a good friend and adviser to me throughout the years we have been colleagues. I am going to miss him and want to take this opportunity to wish him continued success and happiness in the years ahead. We hope that he will continue to share with us his vast knowledge and expertise on problems affecting working Americans.●

STATEMENT OF CONGRESSMAN DON EDWARDS UPON INTRODUCTION OF LEGISLATION TO PROTECT RESEARCH ON INTEGRATED CIRCUIT CHIPS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. EDWARDS of California. Mr. Speaker, I am introducing legislation today to protect the rights of inventors and companies engaged in researching applications of semiconductor technology. There is widespread concern in the industry that protection under the copyright laws is necessary to prevent the pirating of imprinted design patterns by foreign competitors.

The proposed bill will amend section 101 of the Copyright Act of 1976 to clarify that copyright protection is available for the imprinted design patterns on semiconductor chips. The Register of Copyrights has denied registration under the present act. She takes the position that these patterns cannot be identified separately from the utilitarian aspects of the chip.

The integrated circuit, a combination of transistors and other electronic circuit elements on a single chip of silicon, was invented in the late 1950's. Commercial integrated circuits (known as "IC's") first were available in 1961. The technology expanded rapidly and in 1971, a fledgling Santa Clara company produced an entire computer on a single silicon chip. The "computer-on-a-chip", technically called the microprocessor or microcomputer, is revolutionizing the electronics industry. The February 20, 1978 issue of Time Magazine quoted an industry analyst as saving that the microcomputer chip: "Will have more impact on our society in the next 20 years than any other invention." Already, the microcomputer is being used in microwave ovens, refrigerators, electric ranges, cash registers, taxi meters, typewriters, television sets, automobiles, hi-fi's, home computers, and, by the end of this decade, probably will be found in virtually every home and business electronic unit produced. To meet the 1980 pollution standards, for example, every automobile will have at least one microcomputer.

The integrated circuit was a Santa Clara Valley development. First marketed in 1961, IC's are already a $5 billion worldwide industry.

Only over the last few years has for-

eign competition become a factor in the state-of-the-art, leading edge portion of the business. The microcomputer started from nothing in 1971. Last year's microcomputer sales were $235 million and are expected to grow 50 percent annually, to exceed $800 million by 1981.

The "chips", as they are dubbed, are becoming larger, more complex—and increasingly expensive to develop. The first microcomputer chip in 1971 was a tiny square slightly larger than one-tenth inch on each side containing 2,250 transistors. The microcomputer of 1978 is a chip about one-quarter inch square and contains over 30,000 transistors. It is more powerful than the IBM 1401—the workhorse business computer of the 1960's.

Producing silicon chips of such complexity requires a substantial chip layout design effort. Layout designers start from a schematic circuit diagram of the microcomputer. The conversion to a chip layout design is done by hand at a drafting table. The completed, hand-drawn layout of a 30,000 transistor chip almost fills a room 20 feet square. Ten designer-years of effort were required to transform that circuit diagram into the chip layout.

The finished layout design is traced by an electronic tracing device connected to a computer. The traced data is stored by the computer onto magnetic tape. This tape is used directly in an electronically controlled camera to photographically produce the masks or tooling which will be used to imprint the design onto the chip. These masks have been photographically reduced in size from the layout drawing by a factor of one one-millionth in area.

Making the layout design is not merely drafting. It requires considerable creativity. The designer must cram the 30,000 transistors and their intricate, rabbit-warren interconnections into an absolutely minimum area in order to minimize the chip size. If the chip is too large, existing production technologies will be incapable of economically producing a sufficient number of fully functioning chips. In other words, the "yield" will be too low to be practical.

At the same time as the cost of creating new layout designs is skyrocketing, the technology for copying them is improving. Ironically, electronic equipment making use of these very microcomputer chips is being used by chip pirates to copy them. Better lenses, better photomicrographic techniques, and better control electronics are becoming available for taking superb blowup pictures of the tiny chip. As soon as the company which did the original design puts a chip on the market, the chip pirate purchases it, removes any impeding coatings on the chip surface, and sends it to a specialized and trained photomicrographer (often in Japan) to make blowup photos of the layout design. Typically, a blowup 800 to 1,000 times the original chip size is used. The chip pirate (or a commercial business which offers chip-copying as a service) electronically traces the photographic blowup and feeds the design information into a computer in exactly the same way as the original layout designer did from his own original design drawings. The techniques and the equipment are exactly the same.

While the American economy is built on competition, unfair competition—and chip pirating is just that—has a negative impact on the semiconductor industry. Unless a reasonable return on investment can be made on a new chip, the American semiconductor firms will not make the investments to design them. Chip pirates drastically curtail the innovator's product leadtime (during which development costs must be recovered) by quickly reaping the fruits of the design. Copying is cheap, designing is dear. If the pirating practices are allowed to continue, the American semiconductor industry no longer will be willing to finance new chip designs. The Japanese companies, financed by the Japanese Government and banks, do not need the profit levels we require to attract capital. They will, by our default, take over the original chip design efforts and eventually the entire market. It was our willingness heretofore to finance creativity which put us in our present leadership position. If our willingness to invest goes, semiconductor leadership inevitably will default to the Japanese, just like video cassette recorders.

Patent protection is not enough. Just as copyright protection on musical works, which has always existed, was not enough to protect against record and tape pirates, patent protection on the circuit designs used in semiconductor chips is insufficient to protect against chip pirates. Patents usually cover narrow circuitry aspects of the chips. These inventions are widely diffused throughout the industry and the world. The semiconductor industry has been characterized by broad cross-licensing of patents, either free or for relatively nominal payments. Patents have been no impediment to its dramatic growth.

The proposed amendment to the Copyright Act will not interfere with the normal "reverse engineering" prevalent in the industry. "Reverse engineering" requires only one or a very few photographs of the layers of the chip. These photographs are analyzed by engineers who can trace the circuit schematic. The circuit schematic is turned over to a chip designed to prepare an original topographic layout design. The taking of these photographs for study and analysis, but not for duplicating, is clearly permitted within the "Fair Use" doctrine set forth in section 107 of the 1976 Copyright Act.

Another practice prevalent in the industry which would not be prohibited by the proposed amendment is the copying of portions of an integrated circuit chip. For example, it is common to copy a single transistor, or a cell of transistors to incorporate these into one's own original topographic layout design. Such copies would be de minimus and thus would not be protectable as "original" works of authorship under the Copyright Act.

The purpose of the proposed amendment to the Copyright Act is to clarify that the creative efforts of highly skilled and highly paid chip layout designers will be legally protected. Much the same as the 1972 amendment to the copyright law was required to prevent phonographic record pirating, the semiconductor industry needs an amendment to the 1976 Copyright Act to prevent "chip pirating".

Chip layout design is a form of unpatentable intellectual property. The 1976 Copyright statute should be clarified to insure its protection.●

THE SALT II AGREEMENT

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BEARD of Tennessee. Mr. Speaker, in the near future the Congress and the American public will be considering the merits of the SALT II agreement.

The following column, by Mr. Cord Meyer, offers some insight into SALT II. The column is erudite and concise. Unfortuately, it is also true.

[From the Richmond Times-Dispatch, Oct. 6, 1973]

A SALT-Y DIALOGUE

(By Cord Meyer)

Confused Citizen. I'm glad we seem to be making progress with the Soviets on a SALT II agreement but I'm not sure I understand exactly what the new treaty will accomplish.

SALT Expert. Ask any question you want. We experts are always happy to explain these complex issues to the layman.

Citizen. Will the treaty control the arms race between us and the Russians?

Expert. Not really. It applies only to strategic nuclear weapons. That means that wide-open competition will continue in building conventional armaments like tanks and artillery. There's no limit on the size of armies.

Citizen. Well, how will the treaty control strategic weapons?

Expert. Both sides will accept an upper limit of 2,250 on the number of vehicles with intercontinental range capable of delivering nuclear warheads.

Citizen. Good. That means the Russians won't be able to increase the number of atomic warheads aimed at our cities and at our own missiles.

Expert. Wrong. The Russians are in the process of arming their big ICBMs with separately targeted warheads. Their biggest missile, the SS–18, can carry 10 warheads of great destructive power and increasing accuracy. At the rate they're going, by 1985 they will have a lead of 5 to 1 over the United States in the nuclear payload they can deliver.

Citizen. What does that mean?

Expert. It means that by 1982 the Russians may be in a position to destroy in a first strike nearly all of our 1,054 land-based ICBMs with plenty of missiles left over for use against our cities.

Citizen. Won't SALT II prevent that from happening?

Expert. I'm afraid not. There is nothing in the new treaty to inhibit the Russians from improving the accuracy and multiplying the number of warheads.

Citizen. But our ICBMs can destroy theirs in the same way, can't they?

Expert. Not as effectively. Our warheads are smaller than theirs and they have protected their silos better than we have. Besides, we are not likely to strike first.

Citizen. What's the answer?

Expert. The treaty would not prevent us from developing a new mobile missile system to replace our vulnerable silo-based missiles. But if we started tomorrow, it would take seven years to deploy the new system, and it will cost more than $25 billion.

Citizen. So under the new SALT agreement we would have to spend even more money for defense. It seems to me that SALT legalizes the arms race instead of ending it.

Expert. Well, we could write off our ICBM force and rely on the retaliatory threat of our submarine-launched missiles and on our B-52 bombers armed with our new cruise missiles. These are either too slow or too inaccurate to be effective against their ICBMs, but they are a serious threat to their urban population and industrial base.

Citizen. In other words, we hold their cities hostage to prevent a first strike?

Expert. There is one problem. The Russians have been spending $2 billion a year on civil defense shelters and evacuation planning, while we have done very little. As a result, they would probably lose a smaller proportion of their urban population than we would in a nuclear exchange aimed at the cities. That puts us at a disadvantage, unless we move into a crash civil defense program ourselves.

Citizen. I can see my taxes going up. When we began these SALT negotiations in 1969, we were ahead of the Russians in every aspect of strategic power. After 10 years of SALT bargaining, they are either superior to us or catching up fast. The only thing they've given up are some obsolete missiles. Why don't we just back out of the whole deal?

Expert. I wouldn't advise that. You see, we have closed down our ICBM production line. The Russians have a whole new generation of missiles ready for testing. We have mostly blueprints and it would take us years to catch up. Besides, there's always the hope that in SALT III we can persuade the Russians to agree to real reductions.

Citizen. Don't count on it. How did we ever allow ourselves to be backed into this corner?

Expert. Ten years ago, we believed that when the Russians caught up with us, they would settle for parity. Stability would then be assured by our mutual ability to destroy each other's cities. Quite unreasonably, the Russians decided to go for superiority, as if nuclear war would be worth winning.

Citizen. But you are the experts. Why didn't you foresee this?

Expert. How could we anticipate that the Russians would behave so irrationally?

Citizen. Just like missiles, experts become obsolete and need to be replaced.●

CONGRESSMAN JOHN H. DENT

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. BROOKS. Mr. Speaker, as we near the end of the 95th Congress, I would like to make note of the outstanding contribution of one of our retiring Members, my friend and able colleague, JOHN H. DENT.

JOHN DENT alwavs kept the best interest of the people of his district, State, and Nation firmly in mind as he pursued an innovative and constructive legislative career.

The fairness and dignity he brought to his leadership roles as chairman of the Subcommittee on Labor Standards of the Committee on Education and Labor, and chairman of the Subcommittee on Accounts of the Committee on House Administration, will be well remembered by his colleagues and the Nation.

It was with great pleasure that this week I served as floor manager of a bill Congressman DENT sponsored, H.R. 9701. It was a meritorious piece of legislation that will protect the future of Federal Government retirees, and JOHN DENT has scored again on behalf of the people.

We will miss him.●

HON. BOB SIKES

HON. LOUIS FREY, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. FREY. Mr. Speaker, it is with regret that I rise today to honor my friend and colleague BOB SIKES on the floor of the institution he has served so ably for the last 38 years.

Since these closing days of the 95th Congress will be the last both of us will spend in the Congress, I cannot say that I will miss him next year. But I will predict that the House will be a different place without the "He Coon." The 96th Congress will convene without the man whose experience and service make him a leader among equals.

Few men have served as long or as strenuously as BOB. His colleauges over the years have moved up, become fed up and quit, or been retired by their constituents. But BOB staved and fought —for the military, for his beliefs, for his constituents—and for Florida.

One of the three national naval training centers is in mv district. Although the center was in the planning stages when I came to Congress, the Navy announced in 1972 that they were closing it down—after spending $15 million. As is usual in these matters, I received a courtesy call almost a half day before the closing notice was made public. The first person I called was the Secretary of the Navy, and the second was BOB SIKES.

I am happy to tell you that not only is the Orlando Training Center still in operation, but that next year when the Navy closes one of the other training centers we will expand to take up the slack.

The point here is not so much that BOB was there to help, or that he could help, but that he acted in the best interests of the State and of Nation. I have often used the phrase, "do well by doing good," to describe various projects—but I think BOB coined the phrase. By doing good for his country he has done enormously well for Florida—and we thank him.

I regret his retirement, but I know he has earned it. I wish him luck, good health and many years of leisure.●

CONGRESSMAN FLIPPO ADDRESSES INTERNATIONAL BIBLE COLLEGE ON RELIGION IN PUBLIC LIFE, PUBLIC POLICY, AND PERSONAL ACTION

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BEVILL. Mr. Speaker, the significance of public life, public policy, and the personal commitment of individuals to religious principles often go unsaid in our deliberations. We begin our proceedings here with a prayer but Congress does not legislate on the basis of religion. The freedom of religion is protected for the individual through the Bill of Rights of the U.S. Constitution. We have held firm to the principle of the separation of church and state throughout our history. history.

Religion and democracy have flourished in our land. Religious belief does have a role in the shaping of public attitudes and is the moral strength of our public institutions. My colleague from Alabama, Congressman RONNIE G. FLIPPO, has spoken eloquently of the relationship between God and man in our national affairs.

The words of Congressman FLIPPO should have a special meaning to those of us in public life regardless of our faith. He speaks from the heart and from the mind with a message which places in the perspective of greater meaning our efforts to rid our society of the evils of mediocrity and injustice.

I am entering these remarks made by Congressman RONNIE G. FLIPPO on September 30, 1978, at the Seventh Annual Evangelism Conference of the International Bible College in Florence, Ala., for the RECORD:

REMARKS OF HONORABLE RONNIE G. FLIPPO TO THE INTERNATIONAL BIBLE COLLEGE, SATURDAY, SEPTEMBER 30, 1978

The relationship between God and man is one of the most important aspects of our national affairs. In the not too distant past, the unwritten glossary on American politics said that God is a word in the last paragraph of a political speech. However, public officeholders are reluctant to discuss religion. Perhaps that reluctance comes from a natural and sincere fear to discuss anything so intently personal as religious faith. Religion is after all a delicate matter so closely bound up with men's personalities that they tend to regard any attack upon their religion as an attack upon themselves. Public officeholders are also reluctant to discuss religion on the grounds that it may appear self-serving. Every politician who kneels in public prayer is suspected of having one eye opened toward a press camera. But it does my heart good when the most powerful politician on planet earth, the President of the United States, stands up before the world on international television directing his remarks to Prime Minister Menahem Begin and President Anwar Sadat, the Heads of Jewish and Moslem nations, and witnesses for the Lord when he says, "As a Christian, Jesus says, 'Blessed are the Peace makers for they shall be called the children of God' ".

Although our nation was founded on the basis of a separation of church and state, there is a constant interaction between the

activities of the national government and the religious forces in local communities. Often our national policy is shaded, diluted and distorted by religious pressure groups. Almost every issue we deal with on a daily basis has some relationship to religious beliefs; abortion, aid to parochial schools, the Equal Rights Amendment and many others are examples of that relationship.

All of these controversial religious issues and thousands more flow into the nations capital. They are national issues which are the concern of all the people of all faiths. They are *your* concern because Washington is You. All of the Representatives, Senators, judges, Presidents, pages and lobbyists are people *you* have sent to Washington, either to govern America or to influence its government. You are paying for them and they are your servants. If they meet religious issues in American politics with evasions and foolish platitudes, it is because you have lacked sufficient candor and courage in facing such issues. If they engage in legislative raids on the public treasury in behalf of parochial special privilege, it is because you have been less than alert in defending the American principle of the separation of church and state. If Washington condones the suppression of religious freedom when the victims are unpopular minorities, it is because you have not been sensitive enough to the rights of the heretic and the citizen of dissident views in your home towns.

There are dangers, but we can also take pride in our National religious picture. We do pretty well in our relationship between church and state. In fact, the combination of tolerance and church-state separation has been rated as our most distinctive contribution to modern statecraft. The churches have thrived on it, and the government has flourished under it and freedom of thought and freedom of faith have prospered under it.

We can offer our Church-State relationship to the world as an example of the way in which democracy and religion may cooperate in a nation of many faiths.

Truth and wisdom are not universally defined commodities. We are a nation of differing viewpoints and differing opinions. That has been true throughout our history.

Every one of the four Gospels reports a different wording for the legend written over the Cross on Calvary. Good men and true each looked at the same cross and each reported what he saw differently.

Government and representatives of government suffer from the same faults that the American people suffer from and rejoice in the same virtues. Most officeholders recognize that the roots of all wrong are in the hearts of men. And the main thrust of Christian effort is toward the regeneration of hearts. Only to the degree that human hearts can be regenerated can social evils be overcome.

God's message was tolerance and love. Jesus' coming was a new day. There was neither Jew nor Greek nor Roman, but a new humanity of which Christ was the head. Wherever he lives a Christian is expected to be a transforming force for the Christian way of life. Each Christian ought to be able to say to every other Christian "You do your Christian job where you are, I'll do my Christian job where I am. And we will both do it without needing a policeman to check up on me or threaten me with punishment if I don't do it." Such is the inner motive of the Christian—a compulsion to love.

Age and education give you the authority, and citizenship and Christianity give you the responsibility to *rage* at mediocrity and injustice and evil in our society; more importantly to rage at mediocrity and injustice and evil in ourselves, in our own hearts.

Lest we leave our lives in the alter of ethical neutrality or find our soul eroded by those gentle raindrops of moral detachment we should heed the writer and do not go softly into that Good night but *rage, rage* against the dying of the light.

Reason.—More things are wrought by reason that this world dreams of; wherefor, we should make reason the ultimate weapon in our arsenal of rage, and by it use convince others of our integrity if not of our rightness.

The hand that cradles the rock and the heart that heeds not the head shall not rule this world.

Read.—Bury yourselves in good books and the Good Book and read them often. Develop a thirst for printers ink and quench it by reading, for from books flow the fountain of youth found by few.

Laugh.—We should learn to laugh at ourselves. He who cannot laugh at himself always appears ridiculous.

Linger.—There is a time and a place for all things. Time will wait for what's worthwhile. As we go through life we should pause to pick some flowers along the way.

Love.—Love is the most *unnatural* of all human emotions. While we have learned how to transplant the human heart we have not learned to transform it. We must learn to act unnaturally and follow the commandment to love one another.●

REPRESENTATIVE JOHN DENT

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. BINGHAM. Mr. Speaker, I am delighted to have the opportunity to participate in this special order in honor of the distinguished gentleman from Pennsylvania, JOHN DENT, who is retiring this year.

I served for a time on the House Administration Committee with JOHN DENT and of course had many opportunities to listen to him speaking in the well of the House, as well as to engage in conversation off the floor.

JOHN has always been a stimulating person, with very definite ideas and the ability to express them forcibly. One did not always have to agree with them to admire the strength of the conviction from which JOHN expressed his views.

JOHN DENT always had the welfare of the Members of the House very much at heart. He understood their problems and sought, from his position in the House Administration Committee, to help in the alleviation, if not the solution, of those problems.

In his work as chairman of the Subcommittee on Labor Relations of the Committee on Education and Labor he battled again, and again for justice for the American working man and woman, seeking to provide a decent minimum wage, to offset the dreadful effects of "black lung" disease, and to provide protection for working people who in the past were too often cheated of their pension rights.

JOHN DENT can be proud of his record in the House and we wish him well in whatever he undertakes in the future.●

LACK OF DEFENSE APPROPRIATION BILL MEANS NO PAY FOR SERVICEMEN AND CIVILIAN EMPLOYEES

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 11, 1978

● Mr. SIKES. Mr. Speaker, Secretary of Defense Harold Brown has addressed a letter to the chairmen of the House and Senate Committees on Appropriations and to the members of the Defense Subcommittees, in which he states specifically that payrolls for 466,000 Department of Defense civilian employees will come due on October 13 and for 1.5 million service personnel on October 15. The Department has no money to meet these payrolls. Passage of an appropriation bill or a continuing resolution this week is essential or these people will go payless. Even if passage of a bill is completed this week, a leadtime of several days is required to assure the checks are in the hands of personnel. A continuing resolution is very unsatisfactory for many reasons. The defense appropriations bill is now ready to come to the floor of the House and Senate. Conferees have completed work on it. It is obvious that there should be no delays in final consideration and approval of the bill. I submit for reprinting in the RECORD a copy of Secretary Brown's letter:

WASHINGTON, D.C.,
October 6, 1978.

Hon. GEORGE H. MAHON,
Chairman, Committee on Appropriation, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Knowing that you share the deep sense of responsibility that I feel for the men and women of our armed forces, I want to express my concern about the current situation with respect to funding of the Department of Defense. I think it important to let you know how things stand now, in order that you may bring the facts to the attention of your colleagues and urge their speedy action.

Since the end of the previous fiscal year on September 30, as you know, there has been neither an appropriation act for the Department of Defense nor a joint resolution to authorize continuing expenditures of funds on an interim basis. No later than October 13 payrolls for approximately 466,000 DoD civilian employees will come due, and no later than October 15 is pay day for the first half of October for 1.5 million of the men and women in the Army, Navy, Air Force and Marine Corps. Normally there is required a lead time of several days to assure that checks are in the hands of our personnel, or are deposited in their bank accounts, on or before the due date. In contemplation of the Congress' final action on the appropriation bill, I have directed that every action be taken to prepare to make the funds available with the shortest possible delay as soon as that may be done. I am concerned, however, that unless the Congress acts very early in the week of October 9 some delays in payment will be unavoidable. These, of course, will work a hardship on persons who do not have savings to tide them over a few days, and on their families. That is an aventuality I am determined to avoid—as I know you are—if it is at all possible to do so.

For this reason I hope you will express to

your colleagues the great concern we share, and that you will urge them to do everything possible to bring about final action on the Defense Appropriation Bill at the earliest possible date next week. I know that you care deeply for the well-being of our personnel, a cause which you have always served with great ability and devotion. It is with that shared goal in mind that I offer any help I can provide to resolve this situation promptly.

Sincerely,

HAROLD BROWN.●

SOLAR ENERGY

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. MAGUIRE. Mr. Speaker, an extremely important series of articles, authored by Gordon Bishop, on the economics of solar energy applications—and their relative advantages relative to conventional fuel sources—has recently appeared in the Newark Star Ledger.

My colleague, MILLICENT FENWICK, has inserted into the RECORD the first three articles in the Bishop series. The fourth and last articles of the five-part series are inserted below, together with a column authored also by Gordon Bishop entitled "Solar Power Outshines the 'Big-Time' Fuels":

BRIGHT SCENARIOS: U.S. AGENCY CHARTS THE FUTURE OF SOLAR POWER

(By Gordon Bishop)

By the turn of the century, more than 37 million homes are expected to be heated and cooled by the sun.

That is the goal of the U.S. Department of Energy (DOE), based on the conservative price of a barrel of oil at $25 by the year 2000.

But, the price of worldwide oil which is almost $15 a barrel today, is expected to more than double that within the next 20 years making solar energy more attractive and competitive to the consumer.

The United States will contain over 100 million dwelling units when the 21st Century begins, according to the "Domestic Policy Review on Solar Energy" released Aug. 25.

The review was ordered by President Carter on Sun Day (solar energy day, May 3). The review was conducted by a cabinet level Solar Energy Policy Committee chaired by Energy Secretary James R. Schlesinger.

About 45 million of the expected number of dwelling units (100 million) will be built between now and the end of the century, the solar review estimates.

Assuming that oil will cost a minimum of $25 a barrel, about one-eighth of the new dwellings—or between five and six million units—will be constructed with a passive solar design, saving roughly 50 per cent of the householder's heating demand.

For every five new homes constructed with solar hot water and heating systems, the report goes on, it is assumed one new home will be built with both solar heating and cooling systems, or slightly over one million units.

Another 11 million homes will be retrofitted with solar hot water collectors and storage tanks.

Thus, solar heated homes would account for about 13 per cent of all new construction over the next two decades, and about 6 per cent of all homes existing in the year 2000, the policy reviewers predict.

Commercial buildings were assumed to offer less of a potential market than the residential sector because of their relatively smaller roof areas per unit of floor area.

A doubling of commercial floor space is likely to occur over the next 22 years, with 20 per cent of the present commercial buildings being replaced, according to the solar analysis.

The heating, hot water and cooling loads displaced by solar systems in the new construction were estimated at 30 per cent of the new loads.

To supply the collectors needed for all buildings for the residential-commercial market would require a solar industry with a cumulative output 130 times greater than what could be produced with present capacity over the same period, the policy review calculates.

A growth of that magnitude would require additional action by government and the private sector to bring about the solar transition envisioned by the policy review committee.

To achieve the level of market penetration possible with existing and improving solar technologies, tax credits amounting to an effective 20–30 per cent discount on the first costs of space and hot water systems are essential, the study finds.

Federal lending institutions also would have to provide extra investments needed for solar installations.

And industry would have to receive additional 10 per cent investment tax credit for solar equipment.

The level of spending by the federal government would be moderate, however. The solar review committee sees a continuation of $500 million a year for research and development programs aimed primarily at technology development.

Consumer education would also have to be stepped up to inform homeowners and business managers of the increasing number of incentives and programs available.

The National Solar Heating and Cooling Information Center lists over 31000 "Solar professionals"—architects, engineers, designers and builders—as of Aug. 1.

Their exact type and level of activity is unknown.

The Solar Center also lists over 400 manufacturers of other types of solar equipment, such as systems to capture and convert sunlight, wind and biomass (wood, sludge, wastes that can be used as fuel).

There are also over 3,000 distributors of solar systems, with the number growing each month as federal demonstration projects become funded and the monies trickle down to the states and local agencies administering the programs.

In New Jersey, the Department of Energy has an office of Alternate Technologies headed by Dennis O'Malley.

The office at 1100 Raymond Blvd., Newark, is processing some 2,000 applications for solar hot water systems. Each qualified applicant receives $400 as a downpayment against the installation of a solar unit costing approximately $2,000.

The program, announced last year, is being funded by the U.S. Department of Housing and Urban Development (HUD).

SOLAR FLICKER: HOME SYSTEMS TESTED IN PSE&G PILOT PROGRAM

(By Gordon Bishop)

Public Service Electric & Gas Co., New Jersey's largest power producer, is spending $627,400 to find out if solar energy can really perform in the Garden State.

When the giant utility (the third largest electric/gas combine in the country) announced in the summer of 1976 that it would install and operate 14 experimental solar systems in its territory, the company received 42,000 inquiries from customers.

Robert I. Smith, president of Public Service, feels "no one really knows what the potential for solar energy is in New Jersey," but that the company's "comprehensive effort" will enable energy consumers and producers to know for sure.

PSE&G selected nine existing homes and installed solar water heating systems in them. Another existing home and a new home were equipped with solar water heating units, as well as systems for heating the living space in the homes.

Another new house was equipped with a solar unit to augment a heat pump, which draws heat from the outside air even in the cold winter months

Two existing swimming pools were retrofitted for solar heating.

In addition, four weather stations were set up to obtain solar data, including temperatures, sunshine intensity and cloud cover.

The stations are located at Public Service's Waldwick switching station in Bergen County, the company's Energy Laboratory in Maplewood, Essex County, Deans switching station in South Brunswick Township, Middlesex County, and Camden switching station in Pennsauken, Camden County.

Each of the 14 participants paid a contribution toward the solar systems, ranging from $100 to $500, depending on the type of unit installed. The cost per installation ranges from $2,000 for a hot water unit up to $15,000 for water and heating.

The demonstration program is now in its second year.

Each test system will become the property of the homeowner upon completion of the study, according to Public Service's Research and Development Department.

The hot water systems were installed in homes in Burlington (a PSE&G employe), Florham Park, Piscataway, Princeton Junction, Rahway, Ramsey, Vincentown, West Windslow(an employe), and Newark.

The Newark installation is a special joint effort with Tri-City Citizens for Progress Union, an innercity redevelopment organization.

PSE&G supplied the equipment and aid in the system design for a three-family residence, Tri-City residents did the installation themselves.

The hot water and heating systems were installed in homes in Bridgewater and Blackwood, South Jersey.

The swimming pool solar units are located in Cedar Grove and River Vale.

The solar augmented heat pump is in a house in Fairfield.

PS researchers say they plan to recover some of their investment through federal solar grants available for certain utility experimental projects.

"Should solar energy prove to be an economic and reliable future energy source for its customers, PSE&G would try to utilize it," the research department reports.

But the company's president is not optimistic on solar energy, as evidenced by two recent speeches he made.

"Present indications are that the savings generated with today's energy prices fail to make solar equipment an attractive investment," Robert Smith told a meeting of the Better Business Bureau of Greater Newark Sept. 18 at the Robert Treat Hotel.

Smith's talk, entitled "Energy for New Jersey," looked dimly at sunshine power.

"As energy prices increase," Smith said, "the economics will become more favorable, and we expect solar to make a small contribution to energy supply between now and the year 2,000."

A week later, on Sept. 23, before the New Jersey Medical Women's Association, Smith declared:

"We are of the opinion that these alternates (solar, garbage, wind, cogeneration) can make only a minor contribution to energy supply in New Jersey during the next 20 years."

Public Service is putting its bet on nuclear power, investing more than $5 billion on nuclear generating stations.

The utility is also relying on coal to produce electricity.

The utility industry in general is counting on coal and uranium fuel as the source of the nation's electric power.

But the U.S. Department of Energy already is downplaying the use of coal because of complicated pollution problems, and President Carter has not yet given the green light to advanced nuclear reactors that eventually will have to replace conventional reactors as uranium supplies dwindle.

Although the jury's still out on solar energy as far as PSE&G is concerned, more and more homeowners and businesses are turning to the sun to heat and cool their buildings.

The pace is slow, however, and Public Service attributes much of the problem to the government and the solar industry itself.

"There has been no large-scale promotion by solar equipment manufacturers," Public Service's R&D department points out.

And governmental assistance through tax incentives, low interest loans, grants and other subsidies are either "nonexistent or few in number," PSE&G emphasizes.

Public Service's "early observations" based on its 14 test projects are:

Costs are generally exceeding the initial 1976 estimated costs.

Installed cost of solar systems is increasing, not decreasing, a situation PSE&G finds might be a "short-term trend reflecting inability to meet demand."

Solar systems in operation have performed well—no major problems beyond usual start-up leaks.

Vandalism can be a problem, especially in urban areas. "No Trespassing" signs have to be posted to discourage inconsiderate solar visitors (the "curiosity factor").

One customer dropped out of the program because of a neighbor's complaint. A replacement was found.

SOLAR POWER OUTSHINES THE "BIG TIME" FUELS

(By Gordon Bishop)

Tucked snugly away in the Blue Ridge mountains of Virginia is a tiny energy factory powered by unlimited human ideas and ingenuity.

Within the round brick walls of Intertechnology Corp., Warrenton, are enough energy schemes to end the world's worries over fuel shortages, environmental disasters and economic-inflation dilemmas.

The task confronting Intertechnology and other research and development companies is to translate the seemingly endless energy potential on earth into useful forms for heating, cooling, and powering motors and machines.

The solutions to many of the world's energy-economic problems are already here, if what Intertechnology and other R&D firms are doing catches on.

In our search for solutions to today's energy fix, we went to the U.S. Department of Energy in Washington, for advice.

Dr. Henry Marvin, deputy program director for Solar, Geothermal, Electric and Storage Systems in the DOE, turned us on to Intertechnology Corp., a leading consultant to the federal government.

Marvin described Intertechnology as an "aggressive worldwide applicator" of alternate technologies, all of them using renewable energy sources.

Intertechnology is the sum and substance of one man—George Szego.

Born in Budapest 59 years ago, Szego is a maverick engineer who is light years ahead of his profession and the energy powers that control the flow of the world's capital and resources.

He would like to see some of that capital and technology shifted immediately to energy resources that are renewable and non-inflationary.

When talking about energy, the economy and the environment, Szego sounds much like Theodore Edison, son of the famed inventor from West Orange.

Ted Edison, also an engineer, warned in this column two years ago of irreversible global conditions unless industrialized nations turned to the sun for relief from oppressive inflation and ecological degradation.

The energy powers—those who control oil, natural gas, coal and uranium—are bent on exhausting their capital and the planet's finite resources this century, rather than build and install solar collectors today.

Edison and Szego, both widely respected engineers, are trying to wake up the people and their governments to the hazards of fossil and nuclear fuels. They are expensive, exhaustible and pollute the biosphere.

Still for every dollar invested in solar sanity today, $1,000 or more goes into nuclear fossil fuels.

A former aerospace specialist with General Electric and professor at Seattle University, Szego decided in 1968 that big corporations and big government were wasting their time and money pursuing the fossil-nuclear nightmare.

He founded Intertechnology Corp. and pioneered many of the solar concepts now being developed by the U.S. Department of Energy and recent corporate converts.

Szego, who holds three degrees in chemical engineering, including a doctorate from the University of Washington, says he is not in the business of developing ideas that become shelved in some bureaucrat's files.

He figures natural gas will be fairly well played out within 10 years, oil within 25 years. and nuclear—well, that's an unanswerable question at the moment because of the nuclear proliferation and storage problem.

As for coal, it will be limited because of carbon dioxide and sulfur dioxide, plus the fact it takes a lot of water for processing, water which is simply not available.

That leaves solar and fusion. Szego regards fusion as a complex, costly experiment which, if it succeeds, won't be of any help for perhaps 100 years.

Solar, on the other hand, is readily available today. It is a simple technology that can produce energy for heating, cooling and electricity. All that's needed is capital, capital that is now being plowed into fossils and nuclear development.

The federal government has spent, in the way of subsidies and tax credits, about $500 billion since 1918 to establish a fossil fuel and nuclear economy.

For only a few billion dollars, solar can be doing the job without pollution and inflation.

George Szego and Ted Edison are engineers, not bureaucrats, legislators or corporate executives.

But if they were making the decisions on policy and direction, our "democratic society" would be serving the interests of the working consumer, and not the energy elite that seem caught in a dead-end technical fix.●

PEACE TALKS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Ms. OAKAR. Mr. Speaker, it is with mixed emotions that I accepted the President's invitation to the opening of the peace talks concerning the Middle East. I say this because, while I applaud the open dialog with Middle Eastern leaders and the President, I do not believe the Middle East is being dealt with in a comprehensive manner. How can we assure there will be peace in the Middle East when, for example, the internal and external problems of Lebanon have not been dealt with. I have often noted, on this floor, the lack of concern for this tiny country and other countries in the Middle East. This is brazenly illustrated by the fact that not one cent to aid this country is to be found in any bill related to foreign aid. While American weapons have been used on occasion to devastate the country, American aid in the form of food, shelter, and clothing is not to be found. Where is the concern for humanity and human rights on the part of our Government for this country and its people. I am submitting for this body's RECORD a letter I wrote to the President calling upon him to use the same energies of his office which he has demonstrated in other areas of this part of the world to the current crisis in Lebanon. No one force is totally guilty or innocent. All are responsible. I urge my colleagues, the President, and the American people to have a commitment and a compassion for these people living in Lebanon. The following is a copy of a letter to the President which was hand delivered October 6, 1978:

WASHINGTON, D.C.,
October 6, 1978

THE PRESIDENT.
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I write to you today, imploring your help as a fellow human being, dedicated to the concept of human and equal rights for all peoples. I write to you today, as my President, believing in your outspoken commitment to World Peace and Human Rights—a concept to which I also am committed. I write to you today, fully confident that you will not permit the present bloodshed reddening the streets of Lebanon to continue.

Lebanon has lived the 'prolonged agony' of the ravages of war and prejudice and destruction. Lebanon, since her inception, has remained unfaltering, however, in her allegiance to the United States, even though, the United States has chosen not to award one cent in terms of human needs to her faithful ally in the foreign aid bill. On the other hand, we have appropriated billions of dollars to the rest of the Middle East. Mr. President, Lebanon is indeed a small country, and perhaps cannot offer the United States the same economic advantages that more prosperous countries of the Middle East have the resources for, yet I cannot despair and think that your motive for assisting less fortunate countries is solely one of economic gain as opposed to the higher value of human justice!

I call upon you to use your influence as a World Leader and a humane person to demand a cease-fire in Lebanon immediately. I call upon you to use your influence as a World Leader and humane person to demand United Nations meet to comprehensively deal with the crisis in Lebanon. I call upon you to make the commitment to Lebanon that you have made to other areas of the Middle East. I call upon you to respond immediately to the August 9th request made by myself, Congressman Kazen, and others of Middle East ancestry regarding a meeting—a meeting which possibly could have begun to build a framework that would have prevented the renewed attack in Lebanon.

I do not dramatize the recent events in Lebanon. I cannot minimize the counter effects such disasters will have on the Camp David accords. The World cannot avoid the political reality of Lebanon any longer—the World cannot avoid a social struggle that could precipitate another war—the world cannot avoid a commitment to human justice and world peace.

I remain confident I will receive a positive response to my requests.

Sincerely,

MARY ROSE OAKAR,
Member of Congress.●

PHILADELPHIA LAUNCHES INFLUENZA IMMUNIZATION EFFORT

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. EILBERG. Mr. Speaker, the city of Philadelphia has launched its 1978–79 influenza immunization program for its high-risk population.

Under the direction of Dr. Lewis D. Polk, acting city health commissioner, the program is being carried out at all 11 of the department's health centers, as well as a nursing, convalescent, and retirement homes throughout the city.

Reporting to the Philadelphia Board of Health at its monthly meeting, Dr. Polk noted that this year's trivalent vaccine will give protection against A/USSR (Russian)/77, A/Texas/77, and B/Hong Kong/72 influenza—the currently prevalent strains—and will require only a single dose for immunization for those over 26 years. Those who are 25 and under will require two doses of a modified "youth formula" vaccine.

Dr. David A. Soricelli, deputy health commissioner for Community Health Services, said the Health Department recommends influenza immunization for anyone 65 years of age and older, as well as for individuals of any age who suffer from a chronic debilitating illness of a cardiovascular, pulmonary, renal, or metabolic nature. These would include such illnesses as heart disease, hypertension, tuberculosis, asthma, chronic bronchitis, kidney or liver problems, diabetes, Addison's disease, or other such disorders.

Flu immunization of healthy children and adults under 65 is not recommended, nor should the vaccine be given to anyone allergic to eggs nor to anyone who has a history of having had Guillain-Barre Syndrome.

During the week of September 25, Health Department technicians visited nursing, convalescent, and retirement homes which have 50 or more residents. Utilizing a jet-injector, they immunized approximately 5,000 persons in the high-risk group.

Free walk-in clinics at the city's health centers for eligible high-risk persons will be available through March 1979.●

S. 957, THE DISPUTE RESOLUTION ACT

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. ANNUNZIO. Mr. Speaker, as the 95th Congress comes to a close, the mad rush to complete action on major legislation has gone into full swing. In the biannual scramble to close up shop, very valuable legislation is often abandoned, doomed to repeat the whole legislative process in the next session. One bill which has already suffered this fate, and which may do so again, is S. 957, the Dispute Resolution Act.

S. 957 is designed to counter the dismaying, but not too surprising figures of a Louis Harris survey which shows that 79 percent of the public feels it is a waste of time to complain about consumer problems because they are confident that nothing will be achieved by doing so. One of the prime causes of this feeling of frustration and helplessness, which allows merchants to continue to abuse their customers, is the adversary court process consumers must deal with in order to enforce their statutory rights. Small claims courts have inconvenient hours, are often inaccessible, and provide little assistance to consumers unfamiliar with the court process. It is estimated that there are presently 41 million individuals without reasonable access to a small claims court. Such a system gives a decided advantage to those who violate the law.

It is imperative that we respond to the ineffectiveness of formal court procedures. We need to explore alternatives to the court system which will offer people an outlet to air their grievances without having burdensome costs and demands placed on them. Experiments throughout the country with innovative mediation, negotiation, and conciliation programs have shown the value of settling disputes outside of the traditional channels. S. 957 is designed to provide Federal support both for improving the traditional small claims court system, and for establishing new mechanisms for resolving disputes. This bill provides for the creation of a dispute resolution program within the Department of Justice. This program would, through grants to States, localities, and nonprofit organizations, assist in the development of inexpensive, fair and easy to use forums for resolving consumer disputes. Applicants for the grants under this program would be required to meet criteria set out in the bill geared to overcome the problems consumers currently face. These include assistance in how to use the dispute resolution mechanism, the establishment of centers in convenient locations and with reasonable hours, and the use of forms, rules, and procedures which are fair and easy to understand. The bill would also require that there is ample assurance that any settlement which is reached will be implemented. This last provision is especially important, because currently consumers have a difficult time collecting damages even if a court has ruled in their favor.

Passage of this bill would prove to Americans that this Congress should be remembered not for freely spending taxpayers' money on worthless projects, but for prudently investing in programs which will benefit all citizens facing the everyday problems which Congress sometimes ignores in its efforts to deal with larger issues.●

HON. ROBERT L. F. SIKES

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. FASCELL. Mr. Speaker, it is not easy to say goodbye to a colleague with whom you have worked for almost a quarter of a century. However, as the 95th Congress nears adjournment, I wish to express my esteem for ROBERT L. F. SIKES, who is retiring from Congress at the end of this, his 19th term.

BOB SIKES has acted as the dean of the Florida congressional delegation since 1952, and he holds the record for length of service in Congress from the State of Florida. Throughout his entire congressional career, he has maintained an outstanding record of service and dedication to the interests of his congressional district, to Florida, and to the Nation.

In his many years on the Military Construction Subcommittee of the House Appropriations Committee, BOB became an influential spokesman for a strong national defense. His legislative skill in the field of military appropriations is acknowledged by all who are familiar with his work in this area.

I am sure that, as BOB looks back on his distinguished career which spans 38 years in the Congress, he will be proud of his many accomplishments. When he returns to his home in the Florida "Panhandle," I can only hope that he will now have the time to enjoy hunting, visiting with friends, and other such leisurely pursuits for which the hectic pace here in Congress has not always left sufficient time.

To BOB and his lovely wife, Inez, I offer my best wishes for future health and happiness.●

WALL STREET JOURNAL CITES NEED FOR INTERNATIONAL EFFORT ON REFUGEES

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. EILBERG. Mr. Speaker, the House has adopted a sense of the Congress resolution requesting the Attorney General to exercise parole authority under the Immigration and Nationality Act to admit, over a 2-year period, 15,000 Cambodian refugees now in camps in Thailand.

This resolution arose out of the deep concern which we all share over the ruthless and brutal treatment of Cambodian citizens at the hands of Communist leaders in that country.

As chairman of the Subcommittee on Immigration, Citizenship and International Law, I joined with the ranking minority member of my subcommittee, Mr. FISH of New York, in opposing the resolution. We felt it to be detrimental to our efforts to establish a fair, humanitarian, and long-range refugee policy in the United States. We warned that its effect would be to perpetuate the past policy of responding to refugee problems in an ad hoc, piecemeal fashion. At the same time, we felt that the resolution was unfair in that it singled out refugees who are now living in far better conditions than other refugees in Indochina, and it did nothing to ease the plight of the Cambodians who are struggling against the genocidal tactics of the Communist regime in Cambodia.

I commend to the attention of my colleagues the following editorial from the Wall Street Journal of October 2, 1978. This editorial correctly points to the lack of coordination and the piecemeal approach which has marked the U.S. Government's approach to the Indochina refugee problem, and cites the need for action on the international level to ease the plight of the tens of thousands of refugees now in Indochina.

This was precisely my concern, Mr. Speaker, when I addressed a letter to President Carter on August 7, 1978, which I also submit for the RECORD:

[From The Wall Street Journal]

INDOCHINA UPDATE

A little more than a year ago, news began coming out of Indochina on the growing refugee problem in the area. The flow of refugees from Vietnam had not dried up as the new regime established its hold; people were still trying to escape, often by heading out onto the open sea in small boats. A few refugees were also managing to escape from Cambodia, bringing their stories of the almost unbelievably grim and murderous life there. Since then, the American government ha. made increasingly strenuous efforts to try to deal with the situation. But deteriorating conditions in Indochina keep outpacing them.

This past winter, the International Rescue Committee sent a citizens' commission to Southeast Asia to get some idea of the size of the problem. The group reported more than a hundred thousand refugees sitting in refugee camps in Thailand, with more scattered throughout Southeast Asia. Fifteen hundred boat people a month were coming out of Vietnam, and two to three thousand entered Thailand from Laos each month even though the Thais no longer wanted to accept them as refugees. The citizens' commission recommended that the U.S. adopt a more generous policy towards refugee admissions. The Carter administration responded, saying it would use its emergency parole authority to admit the boat people and more of the refugees with special family or employment ties to the U.S.

But before much of this could be implemented, circumstances changed once more. There's recently been a sharp rise in the number of refugees reaching haven: From April through August, the average was 8,200 a month. Included was an increase in the number of Cambodians, perhaps because war with Vietnam has diverted Cambodian troops from the Laotian border. The Thai government intends to tighten up its already restrictive admission policies. More of the escapees are now showing up in Malaysia; it seems only a matter of time before the Malaysian government, too, feels it has to do something to cut them off.

Various agencies of government have been trying to cope with these events. Escaped Cambodians, for instance, are in an especially bad position to gain entry into the U.S. because they rarely have relatives here or any special connection with the U.S. government. Congress has just responded with the Dole-Solarz amendment, approving a special use of the parole authority for them. But this isn't an obligation that the country is going to be able to meet easily or neatly. Right now, for instance, the State Department stands in need of more money for our voluntary resettlement agencies, whose costs in settling new immigrants considerably exceed what the government is authorized to reimburse them.

Right now also there are countries that could fruitfully use some prodding to live up to their responsibilities. Japan, for instance, still hasn't forked over the 10 million dollars it pledged to help defray the deficit of the UN's office of the High Commissioner for Refugees. And Sweden, for all the moral sensitivity it displayed during the Vietnam war, evidently doesn't think its duties extend to taking in some of the people whom postwar Indochina has made homeless.

We will no doubt see many such failings, new needs and seemingly endless tasks before this refugee episode is over. It would be a terrible thing if somewhere among them the impulse to continue were lost.

AUGUST 7, 1978.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I remain deeply disturbed by the "ad hoc" response of the United States Government to refugee problems in general and to the Indochina refugee problem in particular.

I communicated this concern to you in a July 12, 1977 letter in which I stated that "it is imperative to end the haphazard, piece-meal approach which the U.S. has taken toward [Indochina] refugees." That same letter requested you to "take the lead in convening the nations of the world for an International Conference on Indochinese Refugees."

Based upon statements made last week by the Secretary of State during a meeting with the ASEAN minister and my own discussions with the Foreign Ministers of Thailand and Malaysia, I continue to believe that such a Conference is essential in resolving this truly international problem. I therefore renew my request that the U.S. undertake immediate steps leading toward the convocation of a worldwide conference on this most serious problem.

I would also request that the Administration consider the urgent need for closer cooperation between the various Executive Departments involved in formulating and implementing administrative aspects of our refugee policies. Unfortunately, there appears to be little coordination between the Departments of State, Justice, and HEW in reaching decisions on: the number and categories of refugees to be admitted; the amount and method of funding their care and maintenance in asylum countries or their processing and movement to the U.S.; or the amount and type of assistance to be provided to voluntary agencies, to the States or to the refugees themselves to facilitate their resettlement in the United States.

For example, the Administration is now asking the Congress to once again extend the "Indochina Migration and Refugee Assistance Program" in a limited, "stopgap" manner. In my judgment it is unreasonable and inefficient to propose such an extension and at the same time support a continuing admisisons program of 25,000 Indochina refugees per year. Certainly, the issues of refugee admissions and resettlement funding cannot and should not be separated—even though we have done so in the past. In order to promote a comprehensive, coordinated and unified approach to the Indochina refugee problem these matters must be submitted to, and considered by, the Congress simultaneously. It makes little sense for the Judiciary Committee to concur in the use of parole for certain Indochina refugees, when no monies exist to process, transport and resettle that group of refugees.

My concerns on this subject are shared by the ranking minority members of the full Judiciary Committee and the Subcommittee on Immigration, Citizenship and International Law, which I chair. In fact, our views were expressed in a June 1, 1978 co-signed letter to the Attorney General regarding the use of parole for 25,000 Indochina refugees. In that letter we stated:

"We are also troubled by the lack of coordination in the Executive Branch in the development of policies and procedures for admitting and resettling Indochinese refugees. Apparently, decisions on the admission of refugees are finalized without adequate planning on the resettlement of such refugees. In our judgment, the presentation of detailed cost data and the submission to Congress of a definitive legislative proposal on financial reimbursement to State Governments would have greatly assisted us in our consideration of this parole request. Decisions to admit refugees must not be made in a vacuum. They must be accompanied by carefully-developed plans designed to facilitate their resettlement in this country."

This view is apparently shared by the House Committee on Appropriations, particularly its Subcommittee on Foreign Operations, chaired by the Honorable Clarence Long. In that Committee's report on H.R. 12931, the Foreign Assistance and Related Programs Appropriation Bill, 1979, it was stated:

"With the fiscal year 1980 justifications, the Administration must submit to this Committee a five year financial projection of the Indochinese program. This must include, at least, the numbers of refugees involved, those costs to be borne by this account and the Department of Health, Education, and Welfare. Further the Administration must submit evidence to this Committee that officials of the Department of HEW are participating at these preliminary stages, are cognizant of the ultimate costs and support this further admission of these refugees. Finally, the Administration must provide detailed documentation or testimony proving that they are working to achieve broader world support for these refugees."

I would therefore urge you to personally insure that these issues are better coordinated in the future and—if necessary—to

establish a formalized mechanism in the White House to accomplish this objective. I strongly believe that these congressional concerns can only be alleviated if we receive the full support and cooperation of high-level officials from your Administration.

I am hopeful that such support could also extend to the enactment of comprehensive legislation on this subject, as well as to the convening of the International Conference on Indochina Refugees, mentioned earlier in this letter.

I can assure you, Mr. President, that I am committed to the establishment of a coherent, long-range and coordinated refugee policy for this country. I know that you share this view and I am most anxious to work with you and your Administration in accomplishing this humanitarian goal.

Sincerely,

JOSHUA EILBERG,
Chairman.●

DAVID G. OGILVIE III WINS GOLF AWARD

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. RUSSO. Mr. Speaker, last month David G. Ogilvie III won the Illinois Professional Golf Association's Golf Pro of the Year Award. This is a fine victory for a man who can trace his golf "tree" back to 1896, who has honed his skill and displayed the dedication to his field that is required to become a champion, and who has ably shared with others, through special teaching programs for young people, the talent and knowledge he possesses. For his contributions in the field of golf education, Dave received the very prestigious, Horton Smith Award, in 1976 from the Illinois P.G.A.

Dave is presently head pro at the Floosmoor Country Club in Floosmoor, Ill., and has gained the affection and admiration of those at the club since going there in 1967 from his work as head Pro at the Peoria Country Club in Illinois.

It might be said that Dave was destined for a life upon the greens. His grandfather, David G. Ogilvie, came to America, in 1896, from Scotland where golf had originated three centuries earlier. The senior Ogilvie was one of the first golf pros in America. David G. Ogilvie II was born in the club house of the Augusta Country Club in Georgia, and later grew up to become the golf pro at that same club, where his son, the man we honor today, started playing golf at the ripe old age of 5.

With this outstanding background, it is not surprising that Dave III won the Cleveland City High School Tournament as a young man, and later, with the help of Arnold Palmer, received a golf scholarship to Wake Forest. The 4 years that Dave was at Wake Forest, the college was All-Conference Champions.

During the time that he worked for his dad as Assistant Pro at the Oakwood Country Club in Cleveland, Dave set the course record at the club and that record still stands today. In 1958 Dave became a member of the PGA and participated in the tour that year.

Today I know my colleagues join with me in congratulating David G. Ogilvie III on this latest achievement; truly, he is a real champion.●

THE OBJECTIVITY OF "JUDGE" SCHAAP

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. McDONALD. Mr. Speaker, on August 1 of this year I alerted my colleagues to a new attack on the intelligence community launched by CIA defector Philip Agee and a small group of his Washington-based collaborators led by William Herman Schaap, the editor of the Military Law Reporter, a project of the Public Law Education Institute of 1346 Connecticut Avenue, Washington, D.C., and a member of the National Lawyers Guild (NLG). My report appeared in the CONGRESSIONAL RECORD of August 1, 1978, pages 23798–23801.

The Agee/Schaap attack has taken the form of a new operation, "Counter Watch," which will publish on a bimonthly basis the Covert Action Information Bulletin which purports to instruct its readers in counterintelligence techniques and reveal the names and locations of persons that they believe are members of our country's intelligence community.

From reading this bulletin, I learned with grave concern that the Counter Watch group plan to learn the identities of, and personal information relating to, key law enforcement officers, including those assigned to intelligence and SWAT groups at the State and local level. This, I believe is the first time that covert activities have been directed against members of local SWAT teams; obviously this type of information would be of particular interest to the supporters of terrorists, such as Schaap, because of the key role that SWAT teams play in hostage situations and terrorist attacks. Our specially trained SWAT officers will now have to take certain precautions for their own privacy and safety, as have those foreign-based members of the intelligence community who have been under attack from Agee and company for the past several years.

The Agee-Schaap operation was launched from Havana during the 11th World Festival of Youth, where Schaap was serving as a "judge" at an anti-CIA kangaroo court, a so-called tribunal, "Youth Accuses Imperialism."

On his return to this country, Schaap, for a short time sought the cover of the Public Law Education Institute, which had assisted him with the early distribution of the Covert Action Information Bulletin, but recently emerged to speak at a local "Women Strike for Peace" meeting.

This meeting was attended by the well-known columnist John D. Lofton, Jr., whose report, carried by United Features Syndicate, Inc., notes that Schaap provided an insight into his objectivity "by admitting that before he went to Cuba to serve as a tribunal judge," he called his sister who teaches high school Spanish and asked her how to say one word: "guilty!" Mr. Lofton's report on the Women Strike for Peace meeting also brings into sharp focus the involvement of the Coalition for a New Foreign and Military Policy, a major antidefense lobby on Capitol Hill, with the Cuban dictatorship and its local supporters. I commend Mr. Lofton's article to the attention of my colleagues:

LEFTISTS AND A LESSON: POLITICAL PRISONERS MATTER

(By John D. Lofton, Jr.)

WASHINGTON.—It is 8 p.m. Friday. Having unwisely suppressed an earlier impulse to go home and clean the cat's litter box, I am instead at a comfortable private residence in the northwest section of this city, to which I have been invited by the September issue of the local Women Strike for Peace newsletter. The featured speakers tonight are Dee Bates and Bill Schaap, who, I am promised, will present "an expose of CIA-FBI infringement of civil liberties in the U.S. and an eyewitness report on the International Tribunal held in the month of August in Havana, Cuba."

Certainly you remember the Youth Accuses Imperialism International Tribunal which was the centerpiece of the World Festival of Youth and Students? You know, the hate-America hootenanny and anti-CIA orgy that attracted some 18,500 far-left crazies from 140 countries? Yeah, that one. Well, Bates was a U.S. delegate to this get-together and Schaap was a "judge" at the tribunal. Bates I know very little about. She is identified only as someone affiliated with something called the Coalition for a New Foreign and Military Policy. Schaap's record is very well known and goes way back.

According to John Rees, editor of the Information Digest, Schaap has been waging war against the U.S. intelligence community for at least 17 years. He is currently a co-publisher, along with CIA defector Philip Agee, of the Covert Action Information Bulletin, the main purpose of which is blow the cover of CIA agents around the world. Writing in the first issue of this publication, Agee says that if peaceful protests don't drive CIA agents out of the countries where they are exposed, then "those whom the CIA has most oppressed will find other ways of fighting back." In December 1975, after his name and home address was published in a local paper, Richard Welch, CIA chief of station in Athens, Greece, was the victim of one of these "other ways." He was murdered by terrorists in front of his residence.

Time magazine reported that the main impact on spectators of the exposes at the Cuban World Festival of Youth and Students was "widespread narcolepsy". I know the feeling well.

Bates is very gushy. She was particularly impressed by the 11,000 Cuban youths in colored T-shirts who formed different designs in the Festival Stadium. "It was fantastic!" she says. "They looked so mechanical." Why it is fantastic that people in a totalitarian country looked mechanical, Bates does not say. She speaks lovingly of one tribunal judge, a female North Vietnamese general known as "the lady with the smile," who "led thousands of guerrillas." Three older women across the room from me yawn simultaneously. Bates presses on, telling how

one witness accused Allan Baake of being "a tool of imperialism," and how she herself was able "to show how our country exploits its people" by focusing on making a dollar rather than protecting our children."

It is Schaap's turn to talk. A lawyer, he gives us an insight into his objectivity by admitting that before he went to Cuba to serve as a tribunal "judge," he called his sister, who teaches high school Spanish and asked her how to say one word: "guilty!" Schaap's lack of fairness is matched only by his gullibility. He repeats as a fact what his Cuban hosts have told him: that $90 million of the cost of the festival was raised by individual Cubans in "small sales like yard sales and bake sales."

Schaap, like Bates, is also impressed by the regimentation of Cuban society, specifically how they were able to serve a sitdown dinner for 28,000 people. But "the most incredible thing" he saw was a gymnastics demonstration featuring 4- and 5-year-olds who were carried into the festival stadium by soldiers. After their routines, these children jumped back into the arms of the soldiers, who marched out of the stadium. Schaap observes:

"In the U.S., kids are afraid of soldiers; in Cuba, they love them." Several in the audience nod knowingly. This is an interesting phenomenon. Why do the anti-war leftists in this country despise displays of militarism here but adore it in communist countries?

Schaap is really steamed that the U.S. press ignored many "astonishing" revelations of the tribunal. To him an allegation is the same thing as a revelation. He quotes one witness as saying that U.S. Agency for International Development police adviser, Dan Mitrione, actually tortured to death innocent Uruguayans simply to demonstrate torture devices. Schaap believes this even though, when I press him later, he says there was no corroborating evidence to back up this assertion. Mitrione was subsequently killed by Uruguayan terrorists. Schaap says he has "shed no tears" over the death of either Mitrione or Welch.

A little later, Schaap refers to one of the Puerto Ricans who tried to assassinate President Truman in the 1950s as a "political prisoner" because he served 28 years in prison. This was an extreme sentence for trying to kill a president, he says.

A woman in the audience asks Schaap what Ralph Nader's role is "in all this." Stymied, he mumbles something about how they are both working for corporate accountability, etc.

I ask if, as a tribunal "judge," he raised the issue of the thousands of political prisoners in Cuba. And why didn't you mention this subject tonight? "I didn't come here tonight to discuss this," he snaps, obviously irritated by the question. "Were you told not to discuss this?" I ask, also becoming irritated. Accusing me of being obnoxious, Schapp rises from his chair saying: "If you were in my bedroom, I'd punch you in the nose!" I ask him where his bedroom is, telling him I'll meet him there.

The hostess takes me by the arm, suggesting that it is time—indeed, past time—that I leave. She is right. This is not a news conference, she says. A grim-faced young woman at my other arm keeps repeating: "You've disrupted our meeting. You've disrupted our meeting."

As I put on my coat and head for the door, I hear another lady say: "He's probably an undercover agent."

Suddenly as I walk to my car in the crisp night air, I'm extremely happy I'm in America and not Havana. When I get home, I go right to the basement. Never has a littered cat box looked so good.●

STRATEGY FOR SURVIVAL

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. SYMMS. Mr. Speaker, I have just finished reading a startling book by one of our friends in England. Brian Crozier's "Strategy for Survival," is a basic mental building block book that corectly shows that the United States has already entered "World War III" and that the struggle against the Soviet Union is not of our wanting, but something that must be realized before it is too late. Soviet imperialism is the greatest threat to peace in the world today.

William Murchison, the editorial staff writer for the Dallas Morning News of September 12, 1978, has done a superb job of capturing the essence of the argument of the "Strategy for Survival." I should like to insert into the RECORD a copy of Mr. Murchison's timely article:

HOW TO HELP MOSCOW

(By William Murchison)

In a new book that absolutely everyone should read—"Strategy of Survival"—Britain's Brian Crozier quotes Vladimir Illich Lenin:

"The capitalists of the whole world and their governments will shut their eyes to the kind of activities on our side that I have referred to, and will in this manner become not only deaf mutes but blind as well.

"They will supply us with the materials and technology which we lack and will restore our military industry, which we need for our future victorious attacks upon our suppliers. In other words, they will work hard in order to prepare their own suicide."

Well, well, well. Who would have ever thought that upon a squalid little monster like Lenin would descend the gift of prophecy?

The latest government figures show that from January to June, U.S. trade with the Soviet Union jumped 45 percent over the same period in 1977. For the communist bloc as a whole, the increase is higher still—55 percent.

Translated into dollars, the figures mean that we sold the Soviet Union $1.52 billion of goods during the first six months of the year; the communist world as a whole bought $2.4 billion in goods from us.

We are supposed, apparently, to rejoice at such tidings. We ought, rather, to be sunk in gloom.

There has been talk in recent years of the "failure of nerve" from which Western society supposedly suffers. No clearer evidence could there be of such a failure than the thirst of Western capitalists—not just American, unfortunately—to do business with the communist world and especially with Soviet Russia. These capitalists are not quite the equivalent of their forerunners in the American West who sold rifles to the Indians. But their shortness of sight is nearly as pronounced.

IBM, Ford, Chase Manhattan, Dresser Industries, Pepsi-Cola, and on and on—the list of American companies doing business in the Soviet Union is a virtual register of capitalism's blue chippers. It is no wonder—speaking just in capitalistic terms. Trading with the enemy can be mighty lucrative.

On the other hand, the gains are not always impressive. To do business with Moscow, American companies must make their kow-tows to the Kremlin. International Harvester, for example, has lately had to sit tamely and watch one of its representatives, F. Jay Crawford, arrested, endlessly interrogated and haled into a Soviet court on flimsy charges of currency manipulation. Crawford's 5-year suspended sentence was no doubt meant to be conciliatory. Had International Harvester any gumption, even so, it would pull out of the Soviet Union in protest.

The long-run consequences of dealing with the Soviets are more disturbing still. Crozier, in his book, talks of the present "crisis of communism." Professing its superiority to the capitalist system, communism nevertheless lags badly in economic (as well as all other) terms. The worse its failures, the harder-put are apologists to justify its moldy dogmas.

"Unsold goods," writes Crozier, "began to accumulate in the U.S.S.R. in the 1960s. A decade later they were still piling up, apparently for the simple reason that the average Soviet buyer doesn't particularly want to buy what the system offers him."

Crozier speaks of the trade deficit as dramatic evidence of the Soviet economy's failures, and likewise of its increasing dependency on Western supplies, such as wheat.

What are Western companies doing, then, when they sell to the Soviets? They are assisting them out of a jam. Propping up a regime that might otherwise be in deep trouble with its own people.

They are actually helping to vindicate communist dogma. If the communist system does not quite coruscate, economically speaking—well, at least it holds together. Just look and see.

This is not the way Soviet-American trade policy is supposed to work, of course. The rationale promoted by Richard Nixon and Henry Kissinger was that trade would make the Soviets more dependent on us, thus more disposed to leave us alone.

And do they leave us alone? If so, it is hard to know where. In Africa, Soviet power advances; the Soviet military buildup goes on relentlessly; Russian spies abound everywhere, but here especially. As plain as the nose on Brezhnev's face, as Crozier points out, is the Soviets' unrevoked ambition to dominate the whole world.

So what do we do? Many things, says Crozier; not the least of which is to cut off credits and technology exports to the Soviet Union—grain deliveries, too, unless perhaps the Soviets agree to heavy defense cuts. These are strenuous measures, at which our capitalists would surely balk. But the likely alternative hardly needs underscoring. it is, as V. I. Lenin kindly reminds us, suicide.●

MARTYRS OF THE HOLOCAUST MEMORIAL

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WAXMAN. Mr. Speaker, the Jewish Federation Council of Greater Los Angeles, in remembrance of the 6 million Jews who died in the holocaust, has erected a Martyr's Memorial as a tribute to those who perished. It will serve as our reminder of this infamous period in our past and as a reaffirmation of the determination that the events which led to this slaughter must never again be repeated. It will enable future generations to be

part of that past and our present commitment to its memory.

The memorial, which will open on November 3, 1978, has been constructed in the form of four cutaway trains which will recall to those passing through the cattle car transports of the holocaust era. On the walls are written the names of victims and the once-thriving communities of Europe where Jewish life was destroyed. The crypt following the passage contains bronze discs engraved with the names of the notorious concentration death camps, the arches bearing the Ten Commandments, represent the faith for which the holocaust martyrs died. Following the crypt is a chapel intended for services, lectures, or contemplation and also provided are display rooms containing photographs, documents, and other articles which are remnants of the life in the ghettos and concentration camps.

Many people were responsible for the realization of this magnificent memorial, the construction of which was paid for through a special fundraising drive. On November 7, the Martyr's Memorial Committee will have a dedication dinner celebrating the completion of the project and will honor Ruth and Lawrence Harvey without whose help, encouragement, and support the tremendous task could not have come to fruition.

I ask the Members to join me in honoring the Martyr's Memorial and to express our appreciation to those who committed themselves to its fulfillment.●

KEMP—WHAT?

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BOB WILSON. Mr. Speaker, I would like to share with my colleagues a recent editorial on the subject of tax cuts, as follows:

KEMP—WHAT?

Now that the Senate has passed the Nunn version of the Kemp-Roth tax cut, the folks who love big government are scurrying around trying to find a rationale for opposing it. The one on which they seem to be settling, floated in a speech by Sen. Moynihan on Monday night and repeated by President Carter at his press conference Tuesday, is that it is too radical a departure to take on the spur of the moment without extensive debate. Kemp—what? they ask. Never heard of it.

The intensively publicized proposal by Sen. Roth and Congressman Kemp, to be sure, would simply have cut tax rates successively in three steps over three years. It was attacked for ignoring spending and deficits, so Sen. Nunn laid out a five-year schedule of rate reductions but made them contingent on holding the growth of federal spending to the rate of inflation plus one percent. Those who argued that Mr. Roth and Mr. Kemp were irresponsible for ignoring spending now argue that Mr. Nunn is irresponsible for including spending.

As it happens, the idea of linking tax cuts to expenditure restraint has also been extensively debated this year, in the context of the budget process. It is said that the House has not had a chance to consider the Nunn proposal, but in fact for a few moments last May the House had actually passed what is in principle the same proposal. The Republican budget resolution offered by Rep. Marjorie Holt was specifically designed to accommodate the first year of the Kemp-Roth cuts, and was offered in the context of a systematic program tying the tax cuts with the spending restraint of a current-services budget—the same inflation-adjusted concept embodied in the Nunn bill.

As the rollcall ended, Mrs. Holt found herself with 202 votes for and 198 against. But Majority Leader Jim Wright started dragging Congressmen bodily into the well to change their votes, and the Holt amendment finally lost by 203 to 197. Mrs. Holt offered conceptually the same amendment again with the second budget resolution in September, and lost by 206 to 201. Considering the lopsided Democratic majorities and pull of the leadership and party loyalty, there is obviously quite considerable sentiment in the House for the principles now embodied in the Nunn amendment, which incidentally passed the Senate by 65 to 20. House Republicans are now moving to instruct the conferees to accept the Nunn amendment; it will be instructive to observe how the Democratic leadership behaves.

The political support for the principles involved is far more important than the mechanics of the Nunn amendment. In itself no gimmick or procedural device can reform government spending. The Washington Post has the fanciful notion that the Nunn mechanics would tie the hands of future Congresses, preventing them from working their wisdom when anti-recession tax cuts or spending increases were needed. Yet there is no way to dictate to future Congresses. And on the record the more likely outcome, we should think, is that they would find some way to distort the Nunn amendment into a pro-spending device, an excuse for not cutting taxes.

What the Nunn mechanics would do, however, is to instill a bit of discipline in the congressional budget process, which itself has been neatly transformed into an engine of high taxes and high spending. No Senator was more effective in opposing tax reduction in this week's debate than budget czar Edmund Muskie, who refused even to let the Senate vote on the provision to repeal deduction of gasoline taxes. On the House side, we find back in May Budget Committee Chairman Giaimo deriding Mrs. Holt's lower totals as an impossible, a "wishtype amendment," though in fact outlays in the final budget resolution ultimately ended up almost exactly what she had proposed in May.

The real effect of the Nunn proposals would be to force the budget committees to take tax reduction seriously as a national goal. At present, tax levels are driven by spending desires; after the budget committees decide how much to spend, the revenue committees decide whether they can afford to cut taxes. With the political support that seems to be building in the country, plus a little luck, this can be reversed. We can decide what level of taxes we want to pay, in particular what levels are healthy for economic growth, and make the budget committees hold down spending accordingly.

This is what the budget process was supposed to have been. It is what the country seems to want. And given the Nunn vote in the Senate and the Holt votes in the House, a majority of the Congress—if given a free choice—would be ready to agree.●

FREE SPEECH

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. EDWARDS of California. Mr. Speaker, the American Civil Liberties Union is one of the most respected defenders of individual rights as provided for under our Bill of Rights that we have in this country, in fact one of the most respected protectors of free speech in the world. One of the reasons the ACLU is so highly regarded, and for the same reason often opposed, is that they believe fre speech applies both to those whose speech we welcome and to those whose speech we do not welcome. As chairman of the House Subcommittee on Civil and Constitutional Rights, I understand full well the difficulties that can incur in protecting our free speech guarantees for everyone. The San Jose Mercury News, a daily newspaper in my district in California, has explained its reaction to recent ACLU projects in a recent editorial. I would like to share the thoughts on the subject with my colleagues:

HANG IN THERE, ACLU

The rights and liberties of people in a free society are most severely tested when they are exercised by unpopular persons on behalf of unpopular ideas.

That's what causes an organization like the American Civil Liberties Union to exist in the first place. And that same truth, stretched to an ironic extreme, is what has brought the ACLU under fire from some of its own supporters who feel the organization has gone too far in defending certain activities by American Nazis and their National Socialist White Workers Party.

A year ago this week, the ACLU defended the right of a small band of Nazis to demonstrate in St. James Park in downtown San Jose.

And in June of this year, the ACLU supported the right of Nazis to march through Skokie, Ill., a Chicago suburb heavily populated by Jewish survivors of German concentration camps; eventually, instead of marching through Skokie, the Nazis held a rally in a Chicago park.

To some traditional supporters of the ACLU, the organization went too far in insisting that fundamental rights extend even to the Nazis.

A sensitively written story by Mercury News staff writer Mark Saylor quotes one San Jose attorney, upon resigning from the Santa Clara County board of the ACLU, as commenting: "Free speech covers a lot of things, but it doesn't cover the Nazis."

We understand that reaction, particularly when it comes from people whose families were victims of Nazi atrocities in Germany.

Against the ACLU's historical background of defending generally left-of-center groups, such as civil rights demonstrators or war protesters, it seems strange and unsettling for the organization to devote its efforts to defense of those who, in the case of the Nazis, no doubt would be the first to destroy the rights of others if they could. But we think the ACLU is correct in staying on its traditional course of defending activities which are guaranteed by the Bill of Rights—regardless of who happens to be involved in those activities.

When even despicable people like the Nazis are protected in their right of free speech,

it is not their cause which is strengthened nearly so much as it is the freedom of speech itself.

And the fact that the Nazis would be the last to understand that, if they were running the society, is, in a way, the whole point.●

LEV ROITBURD STILL DENIED BASIC RIGHTS OF FREE EMIGRATION

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. LEHMAN. Mr. Speaker, once again I find myself joining the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R.

Despite signing the Helsinki Final Act, people who apply for exit visas still lose their jobs and are constantly harassed. Enormous cost, both financial and emotional, are still imposed on those who want to leave. Illegal army conscriptions and show trials are still occurring with clock-like regularity, and political dissidents are tortured in psychiatic institutions as well as being interned in Siberian labor camps.

Once again I call to your attention to the bitter plight of Lev. Roiturd, an aeronautical engineer, his wife, Lilia, and their son, Sasha, who applied for permission to emigrate and join their family in Israel, are unfortunate examples of Soviet policy.

The Roitburds seek not to change the Soviet system, but only to leave the Soviet Union—a fundamental right allowed, even guaranteed, by the Soviet constitution. Yet, the Soviet Union is conducting one of the most frightening campaigns against the Jews in the pogom-like atmosphere that still exists in the U.S.S.R.

Lev Roitburd was dismissed from his job immediately after asking for an exit visa in 1972. After being constantly threatened with arrest and imprisonment for some time, Lev was beaten, arrested, and sentenced at a "show trial" to 2 years in a Siberian labor camp on the charge of obstructing police.

When Lev was freed in the summer of 1975, he returned to his family, and they once again tried to obtain and exit visa, but were denied for no reason. It has come to the point where Lev cannot support his own family, for he cannot find a job. Since the last time I wrote of Lev, things have gotten worse, and there seems to be no end of this brave family's plight.

The time has come for the Soviet Union to stop persecuting these people and the unknown hundreds of others like them. Anti-Semitism still thrives in the U.S.S.R., and lurks on the horizon needing only a bit of prompting from the authorities to gestate into the hate that led in our own century to those official massacres known as pogoms.

On this day we call upon the Soviet Union to prove our fears groundless. We invite them to show us that the present is unlike the past. Release your citizens who ask only to be allowed to go to their religious homeland, we say, "Free Lev, Lilia, and Sasha Roitburd, free them—now."●

PROJECT PACESETTER

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WALGREN. Mr. Speaker, no Congress has devoted so much time to energy issues as the 95th Congress. The final week of this session hopefully will see a National Energy Act which has eluded us for over 18 months.

I want to recommend to my colleagues remarks made by Shirley Sutton, executive director of Project Pacesetter, an ambitious western Pennsylvania energy conservation and development program. Pacesetter has reached out to involve every segment of the community in steps to reduce our energy crisis.

In view of her outstanding work and leadership on Project Pacesetter, Mrs. Sutton has been chosen not only to serve on DOE's Consumer Advisory Committee, but also to be chairperson of the new DOE public energy education task force.

Project Pacesetter is ongoing and results to date are promising. Pacesetter has been designed as a prototype that will encourage the Nation and other communities to take similar steps on our energy problems from a local level.

Pacesetter, Mrs. Sutton, and Americans for Energy Independence are to be congratulated for their diligence and leadership:

CITIZEN PARTICIPATION IN CONSERVATION

(By Shirley Sutton)

Project Pacesetter is a citizen energy education and conservation project involving the whole community. The idea of a Pacesetter-type program began with the national Americans for Energy Independence organization over a year ago. AFEI was concerned about the fact that almost 50 percent of the American public did not believe there was an energy problem, so they decided to try a major citizen education program—but also a program that involved citizens in the planning and implementation stages. Allegheny County, Pennsylvania (which includes the city of Pittsburgh) was chosen as the location to try this pilot program.

An executive committee of leading Allegheny County citizens was chosen to direct the project. The executive committee was chaired by Richard Simmons, President of Allegheny Ludlum Steel, and Lloyd McBride, President of the United Steelworkers of America. Serving on the committee are Edgar Speer, Chairman of the Board of United States Steel Corporation; Joseph Odorcich, Vice President, United Steelworkers of America; Dr. Wesley Posvar, Chancellor, the University of Pittsburgh; Susan Brandt, President, the League of Women Voters, Allegheny County Council; Ronald Davenport, Dean, School of Law, Duquesne University; and Commissioner Jim Flaherty, Chairman, Board of Commissioners of Allegheny County.

Each member of the Executive Committee headed up a Task Force. The six Task Forces were designated to represent various segments of the community: education, labor, business, government, volunteers, and public interest groups.

The project was kicked off in the spring of 1977 with a community announcement that Allegheny County was chosen to try this type of project. Throughout late spring and summer, each Task Force organized within its area of influence. Other county leaders were chosen to head up sub-task forces. These groups met, gathered ideas from people with expertise in their fields, and drew up a plan to be implemented in Allegheny County. The plans told of ways that each segment of the community could contribute to possible solutions to our energy dilemma. Suggestions were also offered for the county as a whole.

September 19th, 1977 was Energy Day in Allegheny County. This was the day that the Task Forces announced to the community the results of all of their planning. Each Task Force had come up with many suggestions, but was instructed to, and did, announce one major project that it would like to emphasize. The Educational Task Force's primary recommendation was the development of an energy curriculum in the school systems of Allegheny County. The Labor Task Force recommended that management-labor energy committees be established to discuss energy-related matters. The Government Task Force announced an Energy Alert system, designed to measure the amount of energy being used through the course of the year in Allegheny County. The Volunteer Task Force announced a plan to build models of a home to show people how their homes could be insulated and otherwise weatherized. The Public Interest Task Force mentioned recycling as its major project, while the Business Task Force suggested the development of energy management workshops, with all businesses designating an energy manager responsible for conservation.

Since September 19, the Task Forces and the Pacesetter staff have been working to implement, first of all, these primary recommendations, and after that, a number of the other recommendations—as many as we possibly can work out within our time constraints.

Most of the original recommendations have been carried out. A pilot program involving a management-labor energy committee is meeting regularly at the Brackenridge works of Allegheny Ludlum Steel Corporation. The Energy Alert system recommended by the Government Task Force has been operating since last November. The reports of our energy usage have become a regular part of our evening news and weather reports on most channels. An "Energy-Saving Money-Saving" model house was displayed January and February in major shopping malls to show people how to retrofit their homes. Eight energy management workshops have been held for the business community, and many businesses within Allegheny County have designated energy managers responsible for conservation. Recycling programs are being advocated with volunteer and public interest groups and a presentation has been made to the Greater Pittsburgh Chamber of Commerce regarding the recycling of office waste paper and the purchase of recycled paper for office use. The Education Task Force's recommendation regarding energy curriculum is being pursued through the development of a motivational videotape for use by teachers at in-service workshops.

When AFEI drew up the Pacesetter plan, they did so with the idea that if Pacesetter was successful, similar plans might be started in many other urban areas in the country. If, through Pacesetter, we can convince more citizens in Allegheny County that the energy crisis is real, and if we can convince these same people that they should conserve in every way possible while solutions to the energy problem are being worked out, we will feel that Pacesetter should be expanded. This is the reason that "Pacesetter" was

chosen as the name for our project. We would like to think that what we are doing in Allegheny County will set the pace for the rest of the country in energy matters.

How will we decide if Pacesetter has been a success? From the beginning we had decided that there would have to be a method of evaluating the program, and we had made plans to have this evaluation done by one of the local universities. As the project began and moved along, interest was shown in the project by the then-Federal Energy Administration, an last September the Department of Energy announced that the University of Pittsburgh would receive a grant to monitor Pacesetter. We are very anxious for Pacesetter to succeed, and we are especially pleased that the federal government has shown so much interest in the kinds of things we are doing in Allegheny County. We would like to think that we will show that the private sector can work together and accomplish its goals as set by Pacesetter.

In addition to reaching out to the people through their organization such as clubs, professional groups, service groups, labor unions, etc., we conducted a mass media campaign in the early phases of the project. This developed awareness of Pacesetter in the community. We continue to have good coverage of our events as they are developed.

Is it possible to give an evaluation at this point as to how I think the project is going? We are a little over the half-way point in the project at present. I am personally excited with the cooperation and interest that have been shown in Project Pacesetter. I believe that, at the outset, our expectations may have been a bit too high. Our plans were extensive and perhaps unrealistic. It is a monumental job to organize a community along the lines that we have suggested and to accomplish all of the many goals that we had discussed in the beginnig in the time frame that we had set for ourselves. But we will achieve all of the major recommendations that the Task Forces have made, and many of the others. We are a pilot program, and so we have learned a great deal. Many of the programs and plans that we tried but were not feasible would not be tried at another time in another city, and we would save ourselves that expenditure of time and energy.

Many people have said, as expected, that they don't believe in the "crisis," but many more have given time, money, materials, and "in kind" services. We have had the usual groups or individuals who didn't carry out the job assigned to them—and others who have done an excellent job with their projects. I have found very few people who have not been willing to do something as part of Pacesetter.

This project has been a tremendous challenge. It has been a great opportunity to work with diverse segments of the community. Credibility is still the biggest drawback. People with opposing opinions have talked over energy problems together, and are working together. The evaluation from that should give us some concrete results. We hope that we can report to the public and the Department of Energy that people working voluntarily together can make a difference. We know that the key to success in developing a good national energy plan is to create better understanding and cooperation among our citizens.●

JOHN H. DENT

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. DERWINSKI. Mr. Speaker, it is a special pleasure for me to join in paying tribute to one of our outstanding colleagues, JOHN H. DENT.

JOHN has always shown a strong sense of dedication to his constituents and to the State of Pennsylvania, as demonstrated by his hard work in Congress. Throughout his career, he has accumulated a record that will long be remembered by all of us. His valuable contributions include the areas of unemployment and workmen's compensation laws, international trade legislation, fair labor standards, coal mine safety, and health legislation.

During his 21 years in Congress, JOHN has served with courage and distinction. He leaves us with a record of legislative accomplishment and personal example which we will all miss.

Mrs. Derwinski and I wish JOHN and his wife Margaret and their family much happiness and success as he enters a richly deserved retirement from public office.●

PRESIDENT SIGNS LAW TO TERMINATE THE WARTIME RENEGOTIATION BOARD

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. HANNAFORD. Mr. Speaker, today I applaud the Congress for having effectively terminated a Government agency which has long since outlived its usefulness.

As my colleagues will recall, I refer to the wartime Renegotiation Board which was subject to careful scrutiny during this Congress. While the House Banking Committee reported legislation expanding the powers and extending the life of this Board, this bill never came to the floor because it lacked the support of a majority of the House. The Senate Banking Committee, on the other hand, defeated similar legislation and instead reported measures to abolish the Board.

Outstanding work was accomplished by the appropriations committees of both Houses. The conference agreement on the State, Justice, Commerce, and Judiciary appropriations bill, H.R. 12934, grants the Board $5.2 million to clear an existing backlog of filings by no later than March 31, 1979. H.R. 12934 was sent to the President, signed on October 10, and is now Public Law 95–431. This feat makes clear that the Congress is opposed to the continuation of the Board and its functions.

As the Board faces the fact of termination in the very near future, however, it will be our responsibility to remain vigilant, for the instinct of preservation is an overpowering one and the Board may take it upon itself to again attempt to persuade the Congress for a new lease on life. The fact remains, however, that it costs the Board $5 to recover $1 and that its peacetime functions hinder innovation and efficiency in the private sector. The Congress must resist all efforts at resuscitation.●

PLO-SPECIAL U.N. UNIT

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BRODHEAD. Mr. Speaker, in December 1977, the United Nations General Assembly approved a resolution establishing within the U.N. Secretariat a special unit on Palestinian rights. Over the past year, this special unit has acted as a U.N.-sanctioned propaganda arm of the Palestinian Liberation Organization, a terrorist group dedicated to the destruction by force of our longtime friend and ally, Israel. It should be pointed out that Israel is also a member of the United Nations.

The PLO has the distinction of not only being the sole terrorist organization—out of hundreds in the world—to be represented in the U.N. It also is the only such body to have a major part of its advertising budget paid for by American taxpayers. The U.S. share of U.N. expenses amounts to 25 percent, or $125,000 of the Special Unit's expenses.

These funds are being used for pamphlets and newsletters propagandizing PLO objecives and for the production of a film, "Palestinians Do Have Rights," which will be released later this year. This film will provide a forum for PLO leader Yasser Arafat and attempt to portray PLO terrorism as justified and PLO goals as "moderate." Thus, the auspices of the United Nations, supposedly dedicated to peace, will be used to promote an organization which condones the murder of innocent civilians, rejects peace negotiations and ignores the rights of U.N. member states and allies of this country.

There is clearly a need for multilateral organizations where the nations of the world can meet to solve world problems. However, the U.N. overstepped its bounds in this instance. It has chosen bias over objectivity and is now promoting the causes of certain factions instead of reconciling the differences between them. I do not believe that our country should let such a perversion of U.N. aims to continue unchallenged.

The President recently signed into law the Foreign Relations Authorization Act, Public Law 95–426, which denounces the work of the Special Unit on Palestinian Rights and calls upon the President to direct our U.N. Ambassador to use all means at his disposal to terminate it. I have written to the President to urge his prompt attention to this matter, and I want to share my letter with my colleagues:

CONGRESS OF THE UNITED STATES,
Washington, D.C., October 12, 1978.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Last week, you signed Public Law 95–426, the Foreign Relations Authorization Act of 1979. I write to ask your immediate attention to Section 614 of this law, which condemns the U.N. Special Unit on Palestinian Rights which was established under the U.N. Secretariat in December, 1977.

Over the past year, this Special Unit has acted as a propaganda arm of the Palestinian Liberation Organization, a terrorist group dedicated to the destruction of our longtime friend and ally, Israel.

Besides using its half-million dollar budget for pamphlets and newsletters propagandizing PLO objectives with the sanction of the U.N., the Special Unit is completing a film, "Palestinians Do Have Rights," which will be released in late November of this year. This film will provide a forum for PLO chief Yasser Arafat and attempt to portray PLO terrorism as justified and PLO goals as "moderate." Because the United States contributes one-quarter of the U.N.'s budget, American tax dollars are being used to actively promote PLO interests. I believe this situation is intolerable.

Congress has already expressed its views on the matter. Section 614 calls upon you to direct Ambassador Young to use all means at his disposal to obtain action by the General Assembly to terminate the Special Unit on Palestinian Rights and its sister body, the Committee on the Exercise of the Inalienable Rights of the Palestinian People. I earnestly urge your immediate attention to this matter.

Thank you for your kind consideration.

Sincerely yours,

WILLIAM M. BRODHEAD,
Representative in Congress.●

SUPER VET JERRY BENSON

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. RUSSO. Mr. Speaker, we are a culture that dearly loves a hero, and when we cannot find them, we invent them in our fiction and our television. But we do not have to create them. Sometimes the heros are right in our back yard—not Superman or Spiderman, but Super Vet.

In fact, Super Vet is not in my back yard, but he is next door. And when Jerry Benson receives the first Mayor Daley Marathon Most Heroic Performance Award from Mayor Bilandic, there will be few people more proud or admiring than his neighbor. The award plaque reads, "Super Vet, Jerry Benson," as well it should. Jerry, who lost his left leg while serving with the Marines in Vietnam, ran, walked and crutched his way on his artificial leg the 26.2 miles of the marathon. The plaque also gives his official time of 9:47 and reads: "Why? 'To Give Hope to All Handicapped People.'"

Jerry enthusiastically talks about the Institute for the Advancement of Prosthetics, headed by Jan Stokosa in Lansing, Mich. After 9 years as an amputee, Jerry says the institute and Mr. Stokosa were able to help him and that the work there should serve as a model for others throughout the country.

Jerry has always been active, so the marathon was right in keeping with his style. He was a starting center in basketball in South Holland, starting shortstop for the softball team, a member of the first-place Harvey Babe Ruth team and member of the bowling champions of Art's Bowling Alley in Harvey.

He also gave time to various programs in the YMCA as a volunteer instructor for children and to elective office in high school. In 1968 he graduated from Homewood Flossmoor High School and at the end of the year joined the Marines.

Today I want to share with my colleagues a letter from Jerry. He has a wonderful philosophy of life and his words speak eloquently of his personal courage:

DEAR CONGRESS: All of us are given the grace of life once as we are conceived. I was more fortunate than most. I received the grace of life a second time on a Vietnam battlefield. From that moment I lost my left leg decisions had to be made.

(1) "I want to live"

(2) "I will never accept defeat"

(3) My third goal was my rainbow, to become a "normal" boy again.

After nine years of trial and error my achievements range from bowling, playing golf, baseball, basketball, volleyball, swimming, driving, riding a bicycle and a motor cycle, skiing and surfing.

And I thank God for teaching me a very special lesson: "Never Give Up Hope When You are Running, Jerry."

Today, I know my colleagues join with me in extending congratulations to this marathon champ. Super Vet Jerry Benson is quite a hero.●

CHAVEZ GETS U.S. MONEY

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BOB WILSON. Mr. Speaker, Jack Pickett, the editor of California Farmer, has pointed out another flagrant abuse of the taxpayer's money by the Federal Government—this time by the Department of Labor.

Mr. Pickett, in his editorial, astutely assesses one Department of Labor grant as wasteful, and shows how another grant to fund a "study of further grants" could become a self-perpetuating cornucopiea of Federal funds.

In the wake of California's proposition 13, and given the present antitax mood of the country, I believe Jack Pickett's timely words will be of benefit to all of us:

[From the California Farmer, Sept. 16, 1978]

CHAVEZ GETS U.S. MONEY

Apparently our own U.S. Department of Labor is totally obvious to the mood of the taxpayers. Chavez asked for a grant of money to be used for various purposes by the United Farm Workers union.

He got more money than he asked for, a total of $804,786. One of the grants for $683,861 will be used to train 75 farm workers. That is over $9,100 per head to teach them how to speak English, how to do offset printing, auto diesel mechanics, carpentry, electrical, plumbing, painting, etc.

If 75 men get $683,861, we figure it would cost almost $1 million to train 100 men and over $9 million to train 1,000.

We agree with the Farm Bureau that this is a flagrant misuse of taxpayers' funds and we think the farmers of this state should vigorously complain to their congressmen.

One of the grants for $120,195 is to be used to study further grants. The way they are setting up it sounds like a self-perpetuating program for spending thousands of dollars.

We would think this would be more than a little disturbing to those educational facilities in this state that are being forced to cut essential subjects to the bone. It must be irritating to those who are being cut out of adult education classes.

Selection of this particular union for all this special funding is subject to investigation and we feel the funding should be stopped immediately.●

OLIN E. TEAGUE: DISTINGUISHED PUBLIC SERVICE MEDAL

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FUQUA. Mr. Speaker, on Tuesday October 3, 1978, the Honorable OLIN E. "TIGER" TEAGUE, was awarded the distinguished public service medal by the Administrator of the National Aeronautics and Space Administration.

The Honorable Robert A. Frosch in making the award, on the behalf of NASA, pointed out that the recipient brought great honor to the award. TIGER TEAGUE's unselfish public service over four decades has brought great credit to his country and to him personally.

Because of the significance of Dr. Frosch remarks, I am including them in the RECORD for the benefit of my colleagues and the general public:

REMARKS BY HONORABLE ROBERT A. FROSCH

Good morning, ladies and gentlemen, and welcome to these ceremonies in tribute to a man whom we all know and respect and to whom our Nation's whole effort in space is so deeply indebted.

We are here to honor Chairman Teague for his unequalled contributions to the space program of our country, but before we do so, we must also give full credit to his equally significant accomplishments in behalf of the American veterans, of which he is himself an honored peer. For thirty-eight years, in nineteen Congresses, as a Member and as Chairman of the Committee on Veterans Affairs, he zealously furthered the cause of these men and women whose needs and problems he understands so well.

For us at NASA, Chairman Teague's most outstanding asset has been his consistent and unswerving faith in the value and virtue of a dynamic and imaginative space program—a faith which he has conveyed to all the elements of the government, industry and university team on which all progress in space depends.

The single episode which best epitomizes Mr. Teague's profound faith in the space effort, was the leadership he demonstrated at the time of the Apollo fire in early 1967. The Space Program was in severe jeopardy because of the tragic deaths of the Apollo crew; many influential Americans questioned the wisdom of proceeding with the lunar landing program; the basic concept of the space effort was challenged; and many potentially disrupting actions were being proposed. The dynamic leadership of Chairman Teague spurred a prompt identification of the issues and a clear-cut course of action to resolve them. Undoubtedly, more than any other single individual, Chairman Teague "saved" the program and redirected our energies in a direction which resulted in the successful lunar landing within the decade of the 60's.

Chairman Teague is unique in the depth of his knowledge of the space program. He believes in and has consistently executed a "hands on" policy in regard to space, routinely and frequently visiting NASA Centers,

industrial contractors and laboratories—in some cases, many times a year. He has insisted on firsthand, personal meetings with the organizations and people doing the work. Moreover, he has insisted that all Members of his Committee do the same and, thus, by example, has developed one of the most knowledgeable Committees in the House, especially valuable in view of the highly technical nature of space operations. His mentorship has thus provided a strong, informed, collective leadership for the Nation in space activities.

In space-related international relations, Mr. Teague has always taken a firm position, assuring that the nation's interests are advanced and its responsibilities met. His support of the cooperative programs with the European Space Agency has been characterized by vision and foresight. His involvement of European decision-makers in our legislative process through visits and testimony has proved an innovative and effective device in the in-depth management of our activities in space.

Nowhere has his consistently optimistic and confident attitude toward the future of our operations in space been more evident of more constructive than his enlightened and effective advocacy of the Space Shuttle. He fully understands the great potential of the Shuttle, its versatility, flexibility and open-ended promise, and has gone into the lists time after time in its behalf despite his realistic awareness that its debut could not occur "on his watch."

I think we are all aware of the benefits which are accruing to our people as a result of our activities in space. The flow has barely begun. In the years to come it will affect nearly every aspect of our lives, and all the millions of men and women here and around the world whose days are brightened and burdens lightened will owe a debt of gratitude to the man we are proud to know with deep affection as "Tiger" Teague.

OLIN E. TEAGUE, CITATION. DISTINGUISHED PUBLIC SERVICE MEDAL

In recognition of his distinguished contributions to the scientific and technological advancement of the Nation by his steadfast advocacy of a strong national space program. In two decades of leadership positions in the House of Representatives, he gained the continuing support of the Congress for the cause of building and maintaining the spacefaring capabilities of the United States.●

TRIBUTE TO PAUL ROGERS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. DRINAN. Mr. Speaker, I am pleased to join with my colleagues in honoring Congressman PAUL ROGERS. Congressman ROGERS is retiring after 24 years of dedicated and productive service to his constituents and to the Nation.

As chairman of the Health and Environment Subcommittee of the Interstate and Foreign Commerce Committee, PAUL ROGERS has been responsible for virtually every major health bill enacted in the last decade.

The list of Congressman ROGERS' accomplishments is far too great to recite here, but allow me to mention a few of the major laws whose passage he has secured: The Health Manpower Act, National Cancer Act, biomedical research program, Emergency Medical Services Act, and the National Health Planning and Resource Development Act.

PAUL ROGERS has been a tireless and effective advocate for improved health care planning and delivery throughout his years in Congress. He has moved national health policy toward an emphasis on prevention and he has fought to make quality health care available regardless of where an individual lives or his or her economic status.

His many accomplishments bear ample testimony to the success and value of his efforts. While he is best known for his outstanding leadership in the area of health policy, his achievements in the environmental field also deserve recognition. The Clean Air Act of 1970, and the Safe Drinking Water Act of 1974 are but two of the major bills he authored in this area.

Mr. Speaker, I am proud to honor this gifted public servant. Rarely has one Congressman done so much for the benefit of so many. He has served the Nation well and he shall be missed.●

MAJ. JAMES E. BOOTH

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. COLEMAN. Mr. Speaker, I recently received a moving letter of tribute from the family of a young man from the Sixth District of Missouri who sacrificed his life to the service of our country during the war in Vietnam.

What makes this letter of interest to my colleagues in the Congress, and to all Americans, is the despair it reflects for all the young men who have been listed as Missing In Action, and then reclassified to "Presumed" Killed in Action. It is my sincere hope that this family's experience may serve to spur our Government forward in fully investigating the fate of all the MIA's from the Southeast Asian conflict.

The letter follows:

ROUTE 2, BOX 15,
Savannah, Mo. 64485.

DEAR CONGRESSMAN COLEMAN: It is time to pay tribute to a very deserving citizen from the 6th Congressional District of Missouri. This young man, Major James E. Booth, USAF, has unselfishly sacrificed his human rights in the service of his country.

On June 23, 1968, Major Booth was backseat pilot in an F-4 which was downed in a mission over North Vietnam. He was declared missing in action. His family has been constantly reassured and promised by the U.S. government that every possible means would be employed to determine his fate. Now, 10 years later, without an iota of new evidence to support the charge, Major Booth's status has been reclassified to "presumed" killed in action, effective August 8, 1978. We, the family, are forced to accept this change although we openly object to this method of accounting.

Major James E. Booth was an asset to his community and a tribute to his humble farm parentage and a testimony of self-attained achievements of success despite his brief 27 years. His unselfish response to the famous challenge, "ask not what your country can do for you, ask what you can do for your country," has earned him much more than he received.

The love and pride we feel for our brother is overshadowed by two questions: 1. Was the price he paid too much? 2. Has his trust in government been betrayed?

The answers are uncertain but whether his bones lie rotting in the soil or in some jungle prison in Southeast Asia, we shall continue to pursue this issue, to obtain an honorable and just accounting for him and all the men abandoned to the mercy of the enemy.

Respectfully submitted by his sister,
LOUISE VAN HOOZER.●

PROGRESS IN TURKEY

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FINDLEY. Mr. Speaker, I would like to share with my colleagues a letter I recently received from Acting Secretary of State Warren Christopher regarding the current situation in the eastern Mediterranean.

In lifting the arms embargo against Turkey, Congress sought to create a new situation which would stimulate a Cyprus settlement and improved U.S. bilateral relations with both Turkey and Greece. This letter provides a positive indication that the termination of the embargo is indeed producing these hoped for results.

DEPARTMENT OF STATE,
Washington, D.C., October 6, 1978.

Hon. PAUL FINDLEY,
House of Representatives.

DEAR PAUL: On September 26 the President signed into law the International Security Assistance Act of 1978 and made the certification to permit resumption of military cooperation with Turkey. We are hopeful that this action has created conditions conducive to the resolution of problems in the Eastern Mediterranean.

While it is obviously too early to make a conclusive judgment, even in the brief period since September 26, there have been positive developments. The most significant was the Turkish decision announced October 4 to reactivate four important defense installations in Turkey (Sinop, Pirinclik, Belbesi, Kargaburun) that were closed when the embargo was imposed. We will soon commence negotiations on long-term facilities arrangements between our two countries. The action to reactivate the closed installations, which involved a major decision by Prime Minister Ecevit and his government, is heartening evidence that Turkey is committed to rebuilding our bilateral relationship.

The developments related to Cyprus are also encouraging. State Department Counselor Matthew Nimetz visited Cyprus early in September and held productive consultations with the leadership of both the Greek Cypriot and Turkish Cypriot communities. We have continued these contacts with the Cypriots here and in New York in connection with the UN General Assembly.

Earlier today President Carter had a useful meeting with President Kyprianou, and Cy met with Turkish Cypriot leader Denktash in New York. Generally, we find a constructive mood prevailing on both sides. Both are seeking a basis for an early resumption of the inter-communal dialogue, and both emphasize that their positions on the outstanding issues are flexible. We intend to remain in close touch with two Cypriot parties, and with Secretary General Waldheim, and will

work actively to facilitate a resumption of direct negotiations.

We will also be working to strengthen our relations with Greece. As a step in this effort, I will be undertaking a mission for the President to Athens later this month.

Knowing your concern for the Eastern Mediterranean, I will report to you again later this fall if there are significant developments.

Sincerely,

WARREN CHRISTOPHER,
Acting Secretary.●

CONSTITUENTS' OPINIONS

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WYLIE. Mr. Speaker, submitted herewith are the results of my most recent questionnaire mailed postal patron to the residents of Ohio's 15th Congressional District.

I have found this method of public opinion sampling to be highly informative and a most useful legislative tool to assist me in representing my constituents in Congress.

The results are as follows:

QUESTIONNAIRE RESULTS

1. People are rightly concerned, I think, about the size and number of federal agencies or bureaucracies. Would you favor "sunset" legislation that would terminate automatically any federal agency after a specified time, unless its continuance can be justified and a law is passed by Congress extending its life?

His—yes, 94.5; no, 2.5; undecided, 2.8.

Hers—yes, 93.2; no, 2.2; undecided, 4.4.

2. Federal judges are appointed for life. Would you favor a constitutional amendment that would limit federal judges to specified terms and, thereafter, require that these judges run against their records, say each six years?

His—yes, 82.1; no, 13.0; undecided, 4.7.

Hers—yes, 85.9; no, 8.7; undecided, 5.2.

3. Should the seven-year time limit for ratification of the Equal Rights Amendment be extended for an additional three-year period as provided for in a bill just reported out of the House Judiciary Committee?

His—yes, 22.8; no, 68.1; undecided, 9.1.

Hers—yes, 33.0; no, 55.2; undecided, 11.8.

4. Do you feel that the United States should increase restrictions on imports?

His—yes, 51.0; no, 33.9; undecided, 14.9.

Hers—yes, 57.8; no, 23.0; undecided, 19.2.

5. Do you favor the death penalty for what are generally termed "capital offenses?"

His—yes, 81.2; no, 11.7; undecided, 7.1.

Hers—yes, 73.0; no, 14.1; undecided, 12.9.

6. Should federal funds be provided to pay for abortions for women who qualify for Medicaid?

His—yes, 35.3; no, 55.5; undecided, 9.2.

Hers—yes, 34.3; no, 56.2; undecided, 9.5.

7. Would you favor the Kemp-Roth proposal that would cut more than $100 billion from federal taxes in three years without a comparable reduction in federal spending?

His—yes, 21.8; no, 65.4; undecided, 12.6.

Hers—yes, 18.8; no, 62.8; undecided, 18.4.

8. Do you think the Administration is doing an adequate job of confronting the unemployment problem?

His—yes, 27.7; no, 54.9; undecided, 17.4.

Hers—yes, 22.3; no, 56.6; undecided, 21.1.

9. Do you think the Administration is doing an adequate job of confronting the inflation problem?

His—yes, 3.9; no, 90.5; undecided, 5.6.

Hers—yes, 3.8; no, 89.5; undecided, 6.7.

10. Do you think the federal government should intervene in the regulation of utility rates?

His—yes, 42.2; no, 44.9; undecided, 12.9.

Hers—yes, 45.0, no, 38.1; undecided, 16.9.●

THE HUMAN RIGHTS OF FORMER ROMANIAN POLITICAL PRISONERS

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FASCELL. Mr. Speaker, several former Romanian political prisoners have written an interesting memorandum on the types of problems such prisoners face in Romania. In an attempt to alleviate some of those problems, the writers of the memorandum outline several specific steps they feel the Romanian Government should take in line with the humanitarian provisions of the many international documents Romania has signed. For those with an interest in the human rights situation in Romania, I have excerpted some of their main arguments below:

STATEMENT

We, a group of Romanians living in the United States and other Western countries, feel it is our duty to bring to the attention of responsible American leaders and organizations the fact that in the Socialist Republic of Romania, former political prisoners are still harassed, persecuted, and forced to live as second class citizens. While assuming a posture of "independence," the current regime managed to acquire great economic and political benefits from Western countries and America, failing to implement any democratic or humane reforms at home. It is worth mentioning in this respect the following facts:

From about 1945 until 1962–64, any discussion of human rights in Romania would have been a matter of ridicule. During the first part of this period the almost nonexistent Communist Party secured political power through mass terror, starvation and mass imprisonment of opponents and by relying on the Soviet Army and the newly created arm of repression Securitate (Secret political police). Hundreds of thousands of people were thrown in prison during that time, many serving up to 20 years there and in labor camps. Many of these political prisoners died while serving their sentences, leaving behind widows and orphans without basic means of support. Others, probably less fortunate, lost their mind while subject to "brainwashing" experiences at Pitesti and Gherla prisons, or the Danube-Black Sea Canal.

In 1963–64 the Bucharest government freed those political prisoners who managed to survive. Nevertheless, before freeing them, the regime subject the inmates, particularly those in Aiud prison, to unspeakable "brainwashing" techniques. These former inmates are now at the mercy of very poor public assistance programs in order to survive, or have become a burden to their impoverished families. On the other hand, many of those who spent endless years in prison have been physically incapacitated, incapable of continuous hard physical work. And yet another large category is unable to retire because they lack the mandatory years of work, although their advanced age would entitle them to. We recently received a letter from a group of such people begging us to ask the U.S Congress and other American organizations to intervene on their behalf so that they may be able to retire and still enjoy some dignity and human rights in their old ages since God denied them such privileges when they were young. Here are those who dared to give us their names:

(1) Remus Radina, age 54, 9 years in prison, Str. Costila No. 8, Ap. 4, Bucharest 5.

(2) Cicerone Ionitoiu, age 54, 10 years in prison, Bvd. E. Bodnaras No. 25, Ap. 24, Bucharest 7.

(3) Valerian Basarabescu, age 57, 10 years in prison, Sos. Pantelimon No. 287, Ap. 64, Bucharest 3.

In 1975 Romania signed the Helsinki Accords, thus pledging to respect the human rights of its own people. Later, Romania received from the United States the Most Favored Nation Clause, which grants her great economic and trade privileges. This privilege, however, was granted on condition that the Bucharest regime would liberalize its emigration and human rights policies. We, American-Romanians, demand that human rights be fully observed in Romania and that former political prisoners enjoy the rights and dignity of all human beings in this 20th Century. This memorandum has been prepared under the guidance of Zaharia Pana of New York, who spent 14 years in the political prisons of communist Romania, and Ion Dima also of New York who spent 10 years in prison:

MEMORANDUM

Former political detainees in Romania continue to form a category of ostracized citizens, deprived of basic human rights.

After years of duress and torture in the extermination conditions prevalent in prisons and labor camps, those who have managed to survive and regain their freedom continue to be the victims of persecution, including among other things, denial of rights to old-age pensions and Social Security benefits.

In all Communist countries the only means available to ensure a minimum of living conditions are the wages and salaries earned by able-bodied individuals or the Social Security benefits granted to those incapable of work. Any other income, apart from wages, old-age pensions and sickness benefits, is considered illegal and is penalized as such.

In accordance with laws applicable in present-day Romania, old-age pensions and sickness benefits are partly calculated on the basis of the average earnings of the respective individual during a given period of time (for instance, 10 years for old-age pensioners), as well as the number of years he or she has been in employment. The voluntary retirement age is 55 for women and 60 for men. On reaching these ages, the minimum period of employment must be 20 years for women and 25 years for men. Nonfulfillment at retirement age of these minimun periods of employment affects the amount of the pension, which even in the most favorable conditions never reaches more than 65 p.c. of earnings during the last 10 year period.

However, as far as former political prisoners are concerned, their years of imprisonment are not taken into account, a circumstance which seriously affects their future existence. It is also worth mentioning that the majority of former political detainees worked during their detention.

In those circumstances, we consider it necessary to emphasize the following points:

1. Since the Communist regime came to power in Romania, the Penal Code has undergone a number of changes in order to bring it into line with the main tenet of the "proletarian dictatorship"—the class struggle. In the framework of these changes in the Penal Code, the penalties imposed on all persons arrested as opponents of the regime have been raised to a maximum level of severity, varying between 10 years for a

disparaging verbal utterance about the regime, to hard labor for life and capital punishment for wider discussions, considered by the authorities as being counter-revolutionary plots or acts in support of American imperialism.

2. During their terms of imprisonment political detainees were compelled to work in various labor camps, such as the Danube-Black Sea Canal, the lead mines at Caynic, Baia Sprie, Valea Nistrului, irrigation projects in the Danube marshlands and the harvesting of reeds in the Delta, as well as in factories and workshops attached to prisons at Aiud, Gherla, Margineni and other penal settlements.

Prisoners working at the more important of these sites were assigned, in accordance with a master plan, to specialized production units, where labor norms were 2 or 3 times the level of those required from "free" workers performing identical work. Moreover, their official wages were paid directly to the Directorate of Prisons and Labor Camps. As a result of the conditions and complete lack of protective measures at these sites of work, many political prisoners died or were incapacitated for life.

3. After their release from detention, the professional qualifications of these former political detainees were ignored and Communist Party organs and personnel bureaus within the State-owned enterprises were, and still continue to be, extremely vigilant that no former political prisoner should occupy a better-paid job, notwithstanding his abilities and qualifications.

4. The penal sentences passed on political prisoners also entailed total confiscation of their assets and belongings, so that after their release they were entirely at the mercy of the Party organs, which continue to exert psychological pressure on these individuals deprived of all rights.

Taking into account the above-mentioned facts, we respectfully request your intervention for the implementation of human rights of former political prisoners in Romania, namely by:

Recognition of their years of detention as equivalent to years of employment. In this respect a precedent has already been created by law for individuals deprived of liberty as a result of administrative decrees.

The granting of Social Security sickness benefits to former political prisoners unfit for work or suffering from chronic diseases, shocks, etc.

The granting of pensions to the deprived descendants of former political prisoners, who died in captivity.

We also request the restitution of assets and belongings confiscated by penal sentences and payment of damages for years in detention.

We sincerely hope that your kind intervention will alleviate some of the hardships of those former Romanian political prisoners and prisoners of conscience who were deprived of freedom for too many years and who still cannot live in peace and dignity now toward the end of their lives.

Sincerely,

ZAHARIA PANA,
ION DIMA,
NICHOLAS DIMA, Ph. D.●

VIGIL FOR FREEDOM

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. GORE. Mr. Speaker, I am pleased to participate in the "vigil for freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of the Soviet Government's repressive immigration policies.

Three years ago, the U.S.S.R. joined 34 other nations in signing the Helsinki Final Act, which committed the signatory nations to pursue policies consistent with basic principles of human rights, including the reunification of divided families, religious freedom, minority rights, and free travel between countries.

Regrettably, the Soviet Government has disregarded the human rights provisions of the Helsinki agreement and has drastically reduced the number of Jewish citizens permitted to emigrate.

Today, I would like to bring to my colleagues' attention the case of Mr. and Mrs. Daniel Fradkin and their children Wolf and Faina, residents of Leningrad. The Fradkins have applied for emigration status to Israel six times in the past 4 years but have been refused permission each time, apparently because of Daniel Fradkin's access to secret documents in 1963. The fact that, for the following 9 years, Fradkin worked as a lecturer of mathematics in Leningrad's Institute of Electrical Communication without access to any secret information whatsoever, has been ignored by the Soviet Government. As a result of his appeal to emigrate, Fradkin was discharged from his position and subsequently was denied employment in his field, forcing him to find work as a postman.

Daniel and Sara Fradkin have no relatives in the U.S.S.R. Mrs. Fradkin's family lives in Israel as do the brother and elderly, ill father of her husband. These relatives have made repeated pleas for assistance to allow Daniel, Sara and their children to leave the U.S.S.R., but their efforts have proved fruitless. It is my hope that this vigil for freedom we hold here will assist in the cause of Daniel and Sara Fradkin and thousands of Soviet Jewish citizens like them.●

TRIBUTE TO JOHN DENT

HON. JAMES R. MANN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. MANN. Mr. Speaker, it is with great pleasure that I speak today about our much respected colleague from Pennsylvania, JOHN DENT.

JOHN has been in Congress for 20 years, and during that time he has been one of the House's unquestioned leaders in the labor field. He has been chairman of the Subcommittee on Labor Standards of the House Education and Labor Committee, and in that capacity has had major legislative accomplishments in the areas of labor regulation, minimum wage, black lung and pension reform. He has also been an important sponsor of many Federal aid to education bills and of legislation extending benefits to older Americans.

Our colleague from Pennsylvania has also made significant contributions to election reform as chairman of the House Administration Committee's Subcommittee on Election Reform. He later did an excellent job as chairman of the administration committee's Subcommittee on Accounts.

JOHN has been a very adept legislator. He has the vital talent of setting his goals on an issue, sensing the mood of Congress, drafting the bills accordingly, and then steering them through the House. It is this talent which has enabled him to see so many significant bills that he has sponsored become law.

With the departure of JOHN DENT, the House is losing one of its most able and effective members.●

TRIBUTE TO DR. AND MRS. ROBERT GERBER

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WAXMAN. Mr. Speaker, on October 29, Dr. Robert Gerber and his wife, Robin Gerber, will be honored at the annual Israel Dinner of State of the Los Angeles Committee for Israel Bonds, Dental Division, at which time they will receive the Sword of Haganah—one of Israel's highest honors. The Gerbers are a young couple who through fervent dedication and consummate skill have worked to alleviate some of the pain and inequity in our present world.

It is evident, in reviewing Robin Gerber's activities, that it is not merely hard work but a strength of conscience which accounts for her involvement in diverse community organizations. She is a member of the executive and civil rights committees of the B'nai B'rith Anti-Defamation League; a member of the planning committee for the first Catholic-Jewish Women's Conference in 1977 and 1978. She is a member of the Board of Parents organization of the Abraham Joshua Heschel Day School, North Hollywood attended by the couple's sons, Ross and Seth.

Robin Gerber is founder of the Los Angeles Women's Campaign for Soviet Jewry–35, an organization formed to protest the Soviet Government's policy of barring countless numbers of Soviet Jews from emigrating from the U.S.S.R. and their subsequent harassment by Soviet authorities. Her work, along with the other women in this group, includes monitoring violations of the Helsinki accords, keeping in close touch with Soviet families in need of moral support, providing them with cultural and religious materials otherwise unobtainable by them, and keeping a steady flow of American tourists to the U.S.S.R. in touch with them. Robin Gerber earnestly believes it is a moral obligation to continue the fight against the Soviet policy of repression because, in principle, it is not only a Jewish issue but the issue of basic human rights and freedom of expression for all people.

Dr. Robert Gerber is chief of the dental staff of Cedars Sinai Medical Center. His interest in the welfare of others began

at an early age. After graduating from Fairfax High School, he went on to predental school at UCLA 1955–57. When he was 17 he joined the U.S. Army Reserve, entered the USC dental school, and was commissioned as second lieutenant in the Medical Service Corps, becoming first lieutenant upon graduation. He served from 1961 to 1964 as captain in the Dental Corps, U.S. Army Europe. His military awards include a letter of commendation for heroism in 1961 at Fort Sam Houston, Tex., for his part in an air rescue operation, and certificate of achievement in 1964 for outstanding service, U.S. Army Europe, Ninth Hospital Center, Germany. His professional associations include membership in the American Dental Association, California Dental Association, Los Angeles Dental Society, Academy of General Dentistry, USC Dental Alumni, Association of Hospital Dentists. He is assistant chairman, Committee on Human Rights, Alpha Omega International Dental Fraternity.

Dr. Gerber shares his wife's commitment to the cause of Soviet Jewish liberation. In 1976 they visited many cities in the Soviet Union to meet personally with the Jewish refuseniks, the account of which was published in the Los Angeles Times. Both Robert and Robin Gerber were delegates to the Second World Conference on Soviet Jewry held in Brussels.

Despite the demands of a crowded professional schedule, Dr. Gerber's other community service activities are as numerous as they are impressive. He is national vice chairman, Committee of Concerned Scientists; a member of the B'nai B'rith's Anti-Defamation League's National European Affairs Committee, and Executive Committee, Pacific Southwest Regional Board; past chairman, United Jewish Welfare Fund, L.A. Dental Division; member and past chairman United Jewish Appeal L.A. Region Young Leadership Cabinet; member of the Commission on Soviet Jewry of the Community Relations Committee, Jewish Federation Council, Los Angeles.

I ask the Members to join me in recognizing Robin and Robert Gerber for their outstanding service to their community as well as to the community of the world.●

GEN. CASIMIR PULASKI

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. DERWINSKI. Mr. Speaker, today marks the 199th anniversary of Gen. Casimir Pulaski's untimely but heroic death. That outstanding Polish patriot gave his life for our country during our Revolutionary War. He will long be remembered for his service in the cause of American liberty, and for his love of freedom.

Born in 1848 in Poland to a distinguished aristocratic family, Count Pulaski turned his interest to military affairs at the age of 20. He joined with his father and brother in pledging their time, fortune, and life to the independence of his native country. Pulaski led the Polish insurrection against the domination of Poland by Russia, Austria, and Prussia. His heroic feats against overwhelming odds won him recognition throughout Europe as an outstanding cavalry leader.

Forced by Russian oppression to leave Poland, Pulaski became an exile in France where he first learned of the American rebellion against the British. Fired by the spirit motivating the American cause, Pulaski offered his services to the Americans who accepted them with gratitude.

By the summer of 1877, Pulaski was in America ready for battle, and in September of that year took his place in the American line, as a volunteer at Brandywine, where his conduct earned him instant recognition. As a result of his outstanding military leadership, the Continental Congress granted him a commission as brigadier general.

At Valley Forge, Pulaski organized an independent cavalry force that was to become known as Pulaski's Legion, earning him the title of "Father of the American Cavalry." Stationed at Baltimore for a time, Pulaski grew impatient for battle and asked for a transfer to the scene of war. The request was granted and the legion moved north, engaging the enemy in frequent battles, throughout New Jersey. When once again a lull developed, Pulaski, whose ardent desire was to make a full and lasting contribution to the Revolutionary War, asked for a more active role in the fight for independence. He was then dispatched to the South, where the British were operating effectively out of Savannah.

Pulaski's courage and determination helped save Charleston, S.C. General Pulaski's final act of undaunted courage came at the Battle of Savannah. As the British fired from the fortified city, Pulaski volunteered to charge through their line of defense, enter the city of Savannah, and confuse the enemy. His untimely death at the head of his famous cavalry charge underscored his dedication to the ideals for which the colonist fought.

On this day, we honor Casimir Pulaski, whose dream of freedom was to benefit millions and millions of Americans to come, including a host of immigrants from his native land and their descendants. He was a hero in the fight for freedom in Poland, his native land, and in America, the land of his adoption.●

KILPATRICK OF CALIFORNIA—A LAWYER'S LAWYER

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. LEGGETT. Mr. Speaker, this week in California the bench and bar lost one of its premier court officials, Henry Hecker Kilpatrick, Esquire. I began practicing law with Henry in Vallejo 28 years ago. I found him an aggressive teacher, a paramount representative of the friends of our offices, and a lawyer who could provide valuable counsel. Judge Vic Castagnetto, Judge Ellis Randall, and former State Bar President Pat O'Hara were all part of the firm.

But for a quirk of fate, Kilpatrick might now hold my congressional seat. Unfortunately, he chose to run for public office 10 years before I did. At that time, his formidable opposition was entrenched, the late John Baldwin of Martinez. Henry was beat in a primary convention where I participated in my one and only campaign for Kilpatrick. He lost, never to attempt the art of politics again.

Kilpatrick adopted the law school adage that "you serve people best by continuity of private practice at the same old stand." For nearly 20 of his 44 years of private practice, he maintained offices at 922 Tennessee Street, Vallejo, Calif. Many times during those 20 years I sought Kilpatrick's counsel, association, and assistance. Always, he was a friend who could be relied upon almost without asking. He epitomized the soundest principles of private practice of the law. The people he assisted measurably and effectively over a lifetime are too numerous to count. The vacuum left by his leaving Vallejo will not soon be filled.

At this time, Henry, the Congress of the United States salutes you for your service to people from the private sector. To your partners, Clint and Dwight, and your lovely wife, Fran, and family, you have our sincerest formal condolences.

Statistical accomplishments of Kilpatrick were noted yesterday in the Vallejo Times Herald as follows:

H. KILPATRICK, VALLEJO ATTORNEY, DIES

The late attorney practiced law for 44 years and formed his own law firm here in June, 1955. He was a 1931 University of California, Berkeley, graduate with a bachelor of arts degree and later attended Harvard Law School and Boalt Hall. He was admitted to the California Bar in June, 1934 and began his first practice in Oakland.

Kilpatrick's achievements were numerous. He was elected to the Board of Governors of the California State Bar Association in 1971 and also elected treasurer of the association in 1973. He served as an association vice president at the same time.

He was a Solano County Bar Association president and a delegate to the Conference of State Bar Delegates on five occasions. He also served on several law study committees for the local association.

Kilpatrick practiced law in good company. Two of the attorney's law partners' in Vallejo also achieved high positions in the state bar association. Russell F. (Pat) O'Hara was its president in 1945 and Judge Ellis R. Randall served on the Board of Governors as well.

The distinguished attorney was a member of the American Bar Association, the American Judicature Society and he was a fellow in the American College of Probate Counsel.

He was a Vallejo Lions Club president, a Silverado Council, Boy Scouts of America president, two-term chairman of the city of Vallejo Juvenile Delinquency Committee and Vallejo's representative in 1958 in Springfield, Mass. when Look Magazine proclaimed Vallejo as one of the publication's All-America Cities.

Kilpatrick was also a member of Naval Lodge 87, F and AM; Vallejo Post 104, American Legion; Vallejo Elks Lodge 559; and a charter member of Green Valley Country Club.

The U.S. Army activated Kilpatrick in

1940 and he served five years as a combat infantry and staff officer in both the European and Pacific theaters during World War II.

His division was immediately transferred from Europe to the Far East after V–E Day in May, 1945, and was ready to land as part of an invasion force on Japan when peace was achieved. The unit went ashore as an occupation force north of Toyko.

He came to Vallejo following his discharge from military service and joined the law firm of O'Hara, Randall and Castagnetto. He remained there until he established a firm with partners J. Clinton Peterson and Dwight C. Ely.

Kilpatrick is survived by five daughters, Mrs. Sandra Petty of Berkeley, Mrs. Mildred Fitzgerald of Rancho Palos Verdes, Calif., Ms. Maureen McDevitt of San Francisco, Mrs. Karen Eichler of Napa, and Mrs. Patrick Murrell of Ceres; one brother, Emmett Kilpatrick of Oakland; and eight grandchildren. ●

AMERICAN PRODUCTIVITY

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WINN. Mr. Speaker, this Nation, since the turn of the century, has experienced a virtual technological revolution. We have set the pace for the world in technological innovation. The American people have displayed a creative motivation that has resulted in the world domination on many fronts of technology. Consequently, the United States has been the envy of the world.

Unfortunately, I fear this is something of the past. I have witnessed in the past few years a general decline on all fronts of technology and innovation. The world is challenging us in the very game we set the standards for and we as a nation are not responding to that challenge. This challenge is not just occurring in the areas of high technology, but in all areas of production. We recognize the obvious trade deficit for oil, but I do not feel we are paying close enough attention to the growing imbalance in manufactured goods such as clothing, appliances, and automobiles. I even noticed that the world's largest sewer pumps were recently imported from a Swiss firm and delivered to the Passaic Valley Sewage Commission in New Jersey. The fact that the trade deficit problem is so prevalent on all fronts of production indicates the existence of a very basic problem; that problem is productivity.

The concept of productivity is very simple; it is the relationship between the input and output of a function. Provided the output is larger than the input, the function will grow. This concept can be applied to nearly all facets of life. For example, our personal checking accounts comply with this concept—obviously, if the withdrawals or outputs are greater than the deposits or inputs then we receive an overdraft statement. In fact, this concept is so rudimentary to our way of life that it is taken for granted. It appears obvious to me that this Nation as a whole and especially the Federal Government has totally ignored this concept when making decisions and drafting legislation.

For example, the public utilities are being forced to convert to coal burners as opposed to gas. Unfortunately, there is no mechanism provided to pay for the cost of compliance with the clean air standards. Therefore, these costs must represent a decrease in total output.

The implementation of OSHA safety standards has added substantially to the cost of manufacturing and construction. This also represents a reduction in productivity. Someone has to pay sooner or later. It appears obvious that later has arrived and the U.S. economy is paying the bill. The world is trying to tell us that our society's economy is about to receive that giant overdraft statement. You only have to look at the condition of the dollar on the world money market, trade deficits and the inflation figures to realize this. It is way past time for this Congress to exercise some reasonable judgment in their decisions and give due consideration to the concept of productivity. It is time to give consideration to the health of the industrial community of this Nation. We no longer can afford the luxury of instituting programs that inhibit or reduce productivity.●

PHILADELPHIA COMMEMORATES VON STEUBEN DAY

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. EILBERG. Mr. Speaker, I am delighted to inform my colleagues in the House that I recently had the privilege of taking part in the Philadelphia tribute to one of our Nation's Revolutionary War heros, Gen. Friedrich von Steuben.

The commemoration was highlighted by a parade and other festivities. Mayor Frank L. Rizzo and other city officials participated in the parade, and in a subsequent observance at Independence Hall.

The parade was reviewed by the mayor, Dr. Werner Ungerer, Consul General of the Federal Republic of Germany from New York; Hans J. Beyer, chairman, Steuben Day Parade; Rev. Dr. Hans Haug, president, German-American Committee; Maj. Gen. Frederick Welsh, 79th Army Reserve Command; Lt. Gen. Willard Pearson, superintendent, Valley Forge Military Academy; Brig. Gen. Martin Krausz, grand marshal of the parade; and Maj. Gen. Robert Friedrich, U.S. Marine Corps.

The Independence Hall festivities got underway when Mayor Rizzo received a burning symbolic torch from a five-man marathon team which ran from New York City to Philadelphia to take part in this year's parade.

Mr. Speaker, Von Steuben came from Prussia to offer his services to the Continental Congress, and was appointed a major general in Washington's army. During the winter of 1777 at Valley Forge, Von Steuben was credited with shaping the Continental Army into an effective, disciplined, fighting force.

The drill manual he wrote for Washington remains today as the fundamental manual of the U.S. Army.●

TRIBUTE TO JOHN DENT

HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. BURKE of Massachusetts. Mr. Speaker, thank you, first of all, for setting aside this time to pay tribute to my dear friend and long-time colleague, JOHN DENT.

JOHN and I came together as freshmen to the 86th Congress. Both of us had served in our respective State legislatures and both of us had assumed positions in the Democratic Party leadership there; JOHN in the State Senate, I in the House.

What especially endears JOHN to me is his lifelong association with the health concerns, prosperity, and aspirations of the working men and women of our Nation. His active interest in labor issues here in the Congress has been unsurpassed. And because he has listened to and acted in the best interests of his district, the 21st District of Pennsylvania, the people there have returned him to this Chamber by wide margins.

JOHN DENT has never waivered in his unceasing efforts to insure just and decent minimum wage laws for all Americans. I was fortunate to work with him during the Johnson administration to pass several labor laws, including the Dent-sponsored minimum wage bill. We have always depended on and unequivocally received each other's support in the areas of medicare, social security, labor standards, and unemployment compensation legislation.

More recently, we enjoined our efforts to enlighten the American public about the state of foreign trade and together we asked our colleagues to take a new look at unrestricted importation of goods into American markets. It seems, JOHN, that we were ahead of our time. The American consumer is only just beginning to realize the serious nature of our trade deficits, foreign trade practices and the threat they pose to American industry and industrial workers.

Congressman DENT'S success in writing into law major reform legislation in the areas of black lung and retirement pensions have helped ease the fear of disease and retirement in security for millions of Americans. His yeoman work has touched the lives of all our citizens, and for a great many, his legislative accomplishments have renewed in them, a sense of self-worth.

I am proud to say that I have been closely associated with JOHN DENT these past 20 years. I have enjoyed a warm and productive working relationship with the current chairman of the Subcommittee on Labor Standards. The United States is losing the talents of a fine legislator and a warm and compassionate man. I shall be sorry to see him leave this House. We have such need of him here.●

HASTINGS COLLEGE OF THE LAW: A CENTURY YOUNG

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. RYAN. Mr. Speaker, 100 years ago the University of California founded its first law school. One hundred years later, Hastings College of the Law, the oldest law school west of the Mississippi has distinguished itself as one of the finest law schools in the country. I think it is only fitting for the House of Representatives to recognize the accomplishments of this noble institution which is celebrating its centennial year in preparing law students for careers in the legal profession.

It is especially important, I think, for the Congress to take note of the fact that Hastings College of the Law has contributed more graduates to the three branches of Government than any other law school in California and more than 250 graduates presently serve in the Judiciary. Hastings has been in the vanguard among law schools in offering, and more importantly, encouraging women and men of all ethnic backgrounds to pursue legal educations. The school attracts students who are among the top 10 percent of the college graduates across the Nation. Furthermore, the 1,500 students at Hastings represent one of the best integrated enrollments in the country. Minority students comprise 20 percent of the student population and women comprise 33 percent of the student body; two of the highest percentages attained by any American law school.

From its very beginning Hastings has pioneered innovative programs in faculty recruiting and curriculum development. Under the respected leadership of Dean Marvin J. Anderson, Hastings has continued to attract eminent legal scholars to its faculty. One-third of the faculty is comprised of members of the "Sixty-five Club," professors who left positions at other law schools due to the mandatory retirement rules and came to Hastings to continue their careers. Hastings instituted this program long before we in the Congress, and the country as a whole, recognized that there was simply nothing ominous or barren about the age of 65. Indeed, Hastings realized early on that the finest legal scholars, professors, and law school deans were being forced from the classroom at a time in their lives when they were probably the most valuable. The greatest beneficiaries of this program have been the students at Hastings who have had the invaluable opportunity of learning the law from the masters who actually wrote the casebooks.

As the school enters its second century of providing students with a legal education, I know my colleagues join me in commending Hastings College of the Law for its outstanding achievements and contributions to the American legal profession, and ultimately, to the American people.●

MULTINATIONAL COMPANIES BRING JOBS TO CORAL GABLES, FLA.

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FASCELL. Mr. Speaker, much uncertainty continues to plague government, industry, and labor leaders about the effects of multinational corporations and their activities on jobs and the general quality of life in this country.

There are conflicting theories and views about the impact of multinationals. But what we need is more facts and less speculation.

The community of Coral Gables, in southern Florida, has recently put together some of the kinds of facts we need. There has been a considerable influx of multinational firms establishing corporate headquarters in Coral Gables since 1974. The figures on the economic impact of that trend, prepared by Mr. Carl Morrison, an active member of the Coral Gables Chamber of Commerce and retired president of Esso Chemical Inter-America, speak for themselves.

The Coral Gables Chamber of Commerce, and its committee of 21, are to be commended for their initiative and support of this study, which is as interesting and useful to policymakers in Washington as it must be to local officials. Certainly it suggests that Congress ought to think twice before adopting legislation that would unduly inhibit multinational business activities in the United States.

The background and text of the 1978 Morrison Report follow:

ABOUT THIS SURVEY . . .

The 1978 Morrison Report—a study reflecting the contribution of the multi-national companies to the economy of Coral Gables—was begun in late 1977 and is based on the 76 multi-nationals headquartered here at that time. Seventy-six companies participated in the study and full answers to our questionnaire were obtained from 50 of these companies, or 66 per cent. Sufficient information was obtained by telephone from the others to satisfactorily include them in the study.

It will be noted that the number of companies is up 80 per cent since early 1974, while the number of total employees is up only 39 per cent. Employees per company has decreased from 38 to 29.2. The percentage of employees living in Coral Gables is up from 18.2 to 20.3.

The number of visitors has increased, which is a good trend not only because of their expenditures in Coral Gables, but also because of the information disseminated through them. An additional bit of information included in the 1978 survey which was not part of the 1974 survey is that 61 per cent of these visitors stay in accommodations within the Coral Gables city limits. Another point to note in the 1978 figures is the increase in services purchased within the City of Coral Gables. This indicated that the need for such services is now being provided by additional local facilities.

In these "services purchased" figures, we did not include travel agents' commissions on the transportation expenditures. It would be quite a substantial figure. Some companies deal directly with the airlines, while others use local agencies.

In compiling the figures for the 1974 survey, 50 per cent of the 42 companies located here at that time filled out and returned the questionnaire, and Carl Morrison sought sufficient information from the other companies to project reasonably accurate information on their behalf.

To obtain any further information about these Morrison Reports, contact the Coral Gables Chamber of Commerce, 50 Aragon Avenue, Coral Gables, Florida 33134. Telephone (305) 446-1657.

A SURVEY OF THE IMPACT OF THE MULTI-NATIONAL COMPANIES ON THE CORAL GABLES ECONOMY

1. The number of multi-national companies locating in Coral Gables increased from 42 in 1974 to 76 in 1978—an increase of 80%.

2. The number of employees of these companies increased from 1,597 in 1974 to 2,225 in 1978—an increase of 39%.

3. The number of employees living in Coral Gables increased 56%, from 290 in 1974 to 453 in 1978.

4. An increase of 174% occurred in the number of out-of-state and foreign visitors to the offices of multi-nationals in Coral Gables—from 4,049 in 1974 to 11,091 in 1978.

5. The average length of the visitors' stays in Coral Gables remained unchanged—2.6 days.

6. The annual total employee payroll increased 24%—from $26,095,000 in 1974 to $47,895,000 in 1978.

7. The annual total employee payroll for employees living in Coral Gables increased from $4,980,000 in 1974 to $8,740,000 in 1978, an increase of 75%.

8. Coral Gables' annual estate tax, tangible property tax, and cost of occupational license revenues totaled $732,000 in 1978, an increase of 67% over the 1974 total of $438,700. (Where a company did not know the real estate tax paid by landlord, they supplied their square feet of floor space. Total tax on the building in question was obtained by Morrison and their square footage ratioed against the total footage and tax.)

9. The value of services purchased within Coral Gables by these multinationals was $1,971,300 in 1974, and $6,650,000 in 1978, an increase of 23%. These figures include office supplies and maintenance where purchased locally. Telephone cost is included as 50% of the total communications cost submitted by the company since it is paid locally. The other 50% is for service paid for outside Coral Gables. Travel costs were obtained from companies but only 7% of the total was included since this is the agent's commission. Where a company did not use an agent, no amount was included.

10. The expenditures by and for the visitors to the offices of the corporations increased 78%. The 1974 figure was $1,994,200 (per diem of $60 was used for visitors; expenditure of $300 per visit was used for purchases by the visitor; expenditure of $50 per visit by the company for the visitor was included). The 1978 figure is $3,555,520 (for visitors to Coral Gables from other locations in the U.S., an expenditure of $210 per trip was used for local travel, living quarters, food and company expenditure for the visitor; for visitors from outside the U.S., $570 per trip for similar expenditures plus local purchases was used).

11. Annual expenditures by employees in Coral Gables increased 93%—from $881,400 in 1974 (based on 50% eating lunch outside the office at a total cost of $245 per year each, plus $30 per year on items other than lunch) to $1,701,000 in 1978 (based on 50% eating lunch outside the office at a total annual cost of $325, plus $45 per year on things other than lunch; it was assumed that each employee living in Coral Gables would spend $2,650 per year on food, clothing, drugs, etc.)

12. For 1978, it was estimated that the approximate annual expenditures for transportation total $8,000,000.●

FORCED BUSING

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. DEL CLAWSON. Mr. Speaker, the issue of forced busing of schoolchildren to achieve racial balance has been the subject of much theorizing and practical discussion. In spite of the strenuous objections of many of those affected, however, the practice continues to affect one U.S. community and school system after another. A column which appeared in the Herald American dated today and published in my hometown of Downey, Calif., examines the issue in depth. I commend the logic of the column "This Changing World" by Madelon Chambliss and am pleased to include it in the RECORD at this point.

FORCED BUSING

(By Madelon Chambliss)

Many people with young children buy homes near schools just for the advantage of having a school nearby. It is not difficult to understand why they are upset when government officials and judges force them to put these children on a bus to be taken five, 10 or 20 miles away to school, all in the name of something called racial balance.

The concept of forced busing for racial balance is one of the most absurd bits of idiocy which has ever been forced upon our citizens. It has no educational value and dubious social value. It does not create good schools. As a matter of fact, busing, with its attendant costs, with its destruction of the neighborhood school concept, its destruction of the cohesiveness encouraged through neighborhood meetings, only exacerbates existing problems.

It is completely at odds with the original purpose of school desegregation. That original purpose was to allow all children to attend the school nearest them regardless of race or color.

Schools across the nation have been integrated for a number of years and schools in cities such as New York were integrated many years before the Supreme Court's 1954 school integration decision. So the racial balance drive is something which goes far beyond school integration and its implementation requires an enormous degree of coercion which is inconsistent with the basic freedoms to which Americans are accustomed.

Since the 1957 start in New York, the racial balance drive has expanded, forcing black children to white neighborhoods and white children to black neighborhoods on long bus rides, regardless of the desires of the children or their parents and with no consideration for the many inconveniences caused. Actually, this forced busing operation causes much protest, boycott and conflict in general.

Although the Supreme Court and federal judges have been a major cause of this forced busing problem, not all judges go along with it. Some have ruled against it, stating flatly that it violates the laws of reason and sanity; that it endangers and jeopardizes the health and lives of hundreds of small children.

One important aspect which government officials and federal judges ignored and which the general public apparently is not aware of is that forced busing was actually forbidden by the Civil Rights law. The language is as follows: "Provided, that nothing herein shall empower any official or court of the U.S. to issue any order requiring the transportation of pupils from one school to another in order to achieve racial balance or otherwise enlarge the existing power of the courts to insure compliance with constitutional standards . . . ."

Incredibly this particular portion of the 1964 Civil Rights Law was not only completely ignored in the drive for forced busing but Federal judges have hurriedly rewritten the Constitution and say that somehow racial imbalance in schools is a violation of the Constitution. Did these judges have the right to change completely the meaning of our Constitution and use it to violate the Civil Rights Law itself in regard to forced busing?

We must use our national resources to strengthen, not weaken our schools and come up with a program that will really provide the highest quality education that we can for all youngsters.

We might add that a good way to improve education across the country is to get the heavy hand of federal big government out of it and leave the policies of the schools to state and local governments.●

TRIBUTE TO JOHN DENT OF PENNSYLVANIA

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. ANDERSON of California. Mr. Speaker, after 22 years of dedicated service in the Pennsylvania Senate, and 20 years in the U.S. House of Representatives, Congressman JOHN DENT is removing his hat from the political ring to return to the doubtlessly more peaceful life of a private citizen. The great State of Pennsylvania and the entire Nation surely will sense the absence of this "guardian of the worker" from the halls of Congress.

JOHN'S outstanding career of public service began over 44 years ago, when he was elected to the Pennsylvania House of Representatives. After one term there, he spent the succeeding 22 years in the Pennsylvania Senate, where he served as floor leader for 17 of those years.

The untimely death of Augustine B. Kelley brought JOHN to the Capitol early in 1958. He quickly established himself as a champion of the American worker with his devotion to the study of the ever-present unemployment problem and workman's compensation laws. He is, not surprisingly, the chief sponsor in the House of bills to raise the minimum wage. Needless to say, the tasks which JOHN chose to undertake upon his arrival in Congress were then, and are today, ominously difficult ones.

JOHN'S service on the Education and Labor Committee and as chairman of the Labor Standards Subcommittee—not to mention the other subcommittees of which he is a member—has been diligent and superior in nature. His dedication to public service has been invaluable to constituents and colleagues alike.

Those of us who remain here can only attempt to fill the void created by JOHN DENT'S retirement. My wife, Lee and I wish JOHN, his wife Margaret, and their wonderful family all the best in the future.●

THE DELUSIONS UNDERLYING THE SALT TREATY

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. LAGOMARSINO. Mr. Speaker, the following article by Eugene Rostow brings to mind these lines written by Thomas Gray:

Alas regardless of their doom
The little victims play!
No sense have they of ills to come
No care beyond today.

Mr. Speaker, it is one of the striking signs of the decline of the West that so many in the West blithely disregard the menace posed to human freedom by the Soviet Union. The Soviet military buildup has been unprecedented in its magnitude and singular in its purpose. Since the SALT I treaty, which supposedly allayed the fears and insecurities of the Soviets, the Russians have doubled the throw weight of their ICBM force. By the early 1980's, the Russians will have increased the number of their nuclear warheads by a factor of 4. The facts are incontestable, their implication quite clear. The Soviets are not content with strategic parity, but are striving for strategic superiority. Yet still, "the little victims play."

What truly amazes me is the indifference with which these ominous developments are greeted by many in the West. It seems to me that this lassitude is comprehensible on two grounds. First and foremost, the fundamental error which many people make is that they do not understand that the interests of the United States and the Soviet Union are fundamentally irreconcilable.

Our differences with the Soviets are real and fundamental, not illusory. These differences did not arise from a lack of communication or understanding. If only such were the case, then it would be possible to reconcile our differences through demonstrations of our good will. However, the procession of illusions which have successively gripped a West desperate for accommodation with the Soviets, from the 1959 Spirt of Camp David, to the Spirit of Geneva, to détente, cannot but inspire a feeling of deep melancholia when we realize how chimerical were those "new eras of cooperation." There can be no cooperation with the masters of the Kremlin except on their own terms. For those men desire not peace and cooperation but world dominion.

From that decisive error flows the equally defective corollary that military force has no utility in international politics today. This truth has been lost on the Soviets who have found that the increased ability to project military power pays handsome dividends when embarking on a course of conquest and carnage across the African continent. Furthermore, this truth has also been lost on our allies who have noticed that the U.S. nuclear umbrella is folding up, as a result of which, they are now developing their own nuclear deterrents.

As Mr. Rostow explains in his article the proposed SALT II treaties represent the culmination of the Carter administration's neglect of the sinews of our military strength.

Our current predicament is best summarized by these words spoken by George Washington to the Continental Army:

The fate of unborn millions will now depend under God, on our courage and conduct. Our cruel and unrelenting enemy leaves us only the choice of brave resistance or the most abject submission. We have, therefore to resolve to conquer or die.

Mr. Speaker, the question is: Do we have the necessary resolve?

[From the Omaha World-Herald, Sept. 10, 1978]

WHAT IS "THE PRESENT DANGER"? ARGUMENTS AGAINST SALT

(By Eugene V. Rostow)

So far as new weapons systems are concerned, the record of the administration is clear and consistent. For President Carter, new systems are like bulls in a bull ring. You know when the bull comes in that he is going to be killed sooner or later by the matador, although you cannot tell when or how. So it has been with President Carter.

Our first new bomber in many years, B–1, has been canceled. The neutron warhead, which might have given NATO a firm shield for 10 years, has been remitted to the shades. The United States has closed down the Minuteman III production line and delayed the initial operating capability of the missile which was supposed to replace it. MX is on ice for the time being. Furthermore, the Trident program has been stretched out.

The record is the same in the area of conventional forces and conventional weapons. The president assures us that all our treaty obligations are still firm, and that we stand squarely behind our allies in the Pacific as well as in the Atlantic.

But the former chief of naval operations has testified that our Navy cannot guarantee the sea lanes beyond Hawaii. Secretary of Defense Brown recently told the Japanese that we could not assure the naval defense of Japan. And the administration has proposed a further reduction in the Navy.

In short, Secretary Brown's celebrated American hare is still asleep, while the Soviet tortoise moves ahead steadily, propelled by the pressures of vast research programs, and the momentum of new generations of weapon systems.

Now, we are told, the administration is about to agree to a SALT agreement whose terms, coupled with recent United States program decisions, would make it virtually impossible to maintain crisis stability or rough equivalence, or to reverse presently unfavorable trends.

The limitations of the three-year protocol to the treaty would affect us far more than the Soviets, if we decide to wake up from our sleep during that period. We have not introduced a new missile system since the late 1960s, while the Soviets have subsequently unveiled five.

Furthermore, temporary agreements with the Soviet Union tend to become permanent—consider the case of SALT I, for example. The administration is pinning its hopes for deterrence on the cruise missile, although it has not yet chosen a modern instrument for getting the cruise missile past Soviet air defense systems. Under the protocol would we ever be able to deploy it? and could we transfer it, or transfer the technology for making it, to our allies?

At the moment, as Paul Nitze has pointed out, we face the unattractive task of negotiating SALT II while having no modern bomber-cruise missile system capable of penetrating Soviet defenses, no follow-on to the aging and vulnerable Minuteman system on the boards, and a submarine missile force of fewer than 25 boats at sea, each constituting 4 percent of our reliable second-strike capability, and thus worth tremendous Soviet efforts to negate.

In the end, many of the proponents of SALT II at any cost fall back on another argument which I should mention. It is better, they argue, to negotiate the best deal the Soviets are willing to give us, and thus preserve the outward forms of detente, because the strategic nuclear balance doesn't make any difference anyway. No one is going to fire nuclear weapons, they argue, so why worry?

The fallacies of this argument, and its frivolity, are appalling, even in an age which should have hardened us to foolish and frivolous arguments.

International politics today, like international politics yesterday, and a thousand years ago, cannot be dissociated from the real power balances which are its matrix.

The nuclear balance is only one element in the equation. But in the Soviet view, as Nitze has recently said, "It is the fulcrum on which all the other levers of influence—military, political and economic—rest."

Can any prudent man or woman seriously advise the United States government that the Soviet view is wrong? Or that the United States should ignore a Soviet warning based on this theory?

With the Soviet military establishment organized and equipped to fight and win nuclear wars, could we resist a Soviet ultimatum—or, for that matter, a Soviet attack in Europe, the Middle East, Africa, or the Far East—under the threat of escalation to a level of violence where we could not meet the challenge?

I do not want to be misunderstood. I do not oppose arms limitation agreements with the Soviet Union as such. On the contrary, I think that, properly designed, they might serve a constructive purpose.

But I do oppose the SALT II agreement as it appears to be emerging from the negotiating table, and so does the Committee on the Present Danger, of which I am an officer.

In our view, the treaty now in prospect would not prevent the Soviet Union from neutralizing our second-strike capability, and would prevent us from restoring the nuclear deterrent on which national security ultimately depends.

The basis for our security is not the treaty, but strategic force deterrence and the strategic and conventional force balance.

We are much too preoccupied with SALT, at the expense of our concern with the realities of power.

I have just returned from a trip to Europe, Iran and China, where I talked at length with responsible governmental leaders.

I can assure you that their concern was with the adequacy of our military establishment, the cohesiveness of our alliances, and the rationality and dynamism of our foreign policy—not with SALT, except as a self-imposed obstacle to restoring our military strength.

Around the world, people are seriously worried about our state of mind. They wonder whether we have the understanding and will to defend ourselves and our interests in world politics, or whether we are in a mood of suicidal appeasement. As the brilliant leader of a moderate-sized country in Asia said recently, "the greatest external threat" to the security of his nation "is the weakness of the West. The West is paralyzed, and divided."

Our goal—the goal of every American—is a stable peace, and improved relations with the Soviet Union, a state of things based on mutual and reciprocal respect for the rules of the Charter of the United Nations regarding the use of force. This is what we mean when we use the word "detente."

In nearly 40 years in or near the foreign and defense policy establishment of the United States, I have never met a person who was not for detente or who favored war with the Soviet Union.

The Russians who govern the Soviet Union are what they are. They will not change and we should not get hysterical about them. They take advantage of every opportunity to expand their power, so long as the risks are not excessive. As they say, they push at every open door.

And they take a long view. We have to deal with them calmly, steadily, and patiently, with an eye on our national interests around the world.

The kind of SALT agreement the administration is so frantically trying to sell the country is not a step toward detente or toward peace, but an act of appeasement which can only invite more Soviet pressure and more risk.

It would freeze us in a position of inferiority, deny us the opportunity to redress the balance, weaken our alliances, and isolate us.

It would be a step toward war, not peace.

"SOFT BARGAIN, HARD SELL"

Eugene V. Rostow was undersecretary of state for political affairs from 1966 to 1969 and presently is Sterling Professor of Law at Yale Law School.

He is chairman of the executive committee of the Committee on the Present Danger, an organization formed to express views on national security and defense policy.

This article is taken from a speech, "SALT II—A Soft Bargain, A Hard Sell," delivered July 25 at a Conference on United States Security and the Soviet Challenge, at Hartford, Conn.●

RETIREMENT OF MR. HEALTH, PAUL ROGERS

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. CORMAN. Mr. Speaker, the last days of a Congress always saddened by the realization that the work of the Congress will proceed next year without the assistance of some of our most distinguished colleagues. One of the most missed will be PAUL ROGERS.

PAUL has established a formidable record as a master legislator. His methods, skills, commonsense, patience, and compassion should be a case study for all who follow. Few Members have been to the well of the House more frequently and none have been more successful.

The Nation has been fortunate that PAUL ROGERS has devoted his talents to health issues. As a result, he has probably done more to improve in a direct way the well-being of the American people than the rest of us can claim.

Every year, U.S. News & World Reports conducts a survey on "Who Runs America." As expected, PAUL ROGERS is ranked as one of the top five leaders in health.

I was surprised the other day as somebody said that she was sorry that I would not be returning to handle health legislation next year. My surprise turned to honor when she realized that I had been confused with PAUL.

Changes ahead in the way health care

is delivered and financed will be more difficult without his leadership and expertise.

The Rogers, first his father, Dwight, and than PAUL, have been an honor to the House and a tribute to the people of Florida.●

PROPOSED REVENUE PROCEDURE ON PRIVATE, TAX-EXEMPT SCHOOLS

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. RHODES. Mr. Speaker, I would like to share with you and the other Members assembled, a letter that was written to me from a constituent who was concerned about the proposed Internal Revenue Service's regulations concerning private educational institutions. This letter represents only one of many that I have received concerning this matter, and all have expressed similar concern about what they, and I, feel is a grave intrusion into the first amendment rights of the citizens of our country. The letter is from an attorney from Phoenix, Ariz., by the name of George H. Mitchell. Mr. Mitchell's remarks are succinct and to the point. However, their brevity is in inverse proportion to the seriousness of the issue they address. I hope all Members take heed of Mr. Mitchell's timely remarks, and that IRS reconsiders its onerous position on this matter.

The letter follows:

PHOENIX, ARIZ.,
October 5, 1978.

Mr. JEROME KURTZ
Commissioner of Internal Revenue, Washinton, D.C.

Re: Proposed Revenue Procedure on Private, Tax-Exempt Schools.

DEAR MR. KURTZ: I have recently noted in the August 22, 1978 Federal Register the proposed revenue procedure on private, tax-exempt schools. I was extremely concerned by what I read and especially the way in which the I.R.S. is attempting to accomplish social reform through taxation. The proposed regulation in my opinion is definitely in violation of the First Amendment of the United States Constitution as an infringement by the state on the freedoms of speech and religion. In addition, it is an attempt by your Bureau to legislate when, in fact, none of the proponents of this proposal are elected representatives of the people.

This is a first amendment issue, not a racial issue, and should therefore be decided by the law and not by your own political and social views or objectives. With this in mind, I was even more alarmed to note that the regulations were scheduled to go into effect without a public hearing. This procedure is unconscionable. It deprives the people of their fundamental right to be informed and to have an opportunity to make their opinions known before any action is taken that directly affects their rights as a citizens.

I would urge that you stop the implementation of this proposed procedure and at the minimum hold public hearings before it is again considered.

Thank you for your attention to this matter.

Very truly yours,

GEORGE H. MITCHELL.●

ANIMAL BIOLOGICAL PRODUCTS ACT OF 1978

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WAMPLER. Mr. Speaker, I have this day introduced, with Mr. GRASSLEY and Mr. LEACH of Iowa as cosponsors, a bill known as the Animal Biological Products Act of 1978. The purpose of this bill is to regulate the production, sale, and shipment of animal biological products and to repeal the act of March 4, 1913, relating to viruses, serums, toxins, and analogous products intended for use in the treatment of animals.

The bill would repeal the act of 1913 (21 U.S.C. 151–158) and would replace it with a new act to be known as the Animal Biological Products Act. The new act would strengthen regulatory measures relating to the production, distribution, and sale of animal biological products used in the prevention, diagnosis, and treatment of animal diseases.

The bill would clarify and extend the provisions of the present law by including: First, provisions for regulating animal biological products moving in intrastate commerce; second, provisions for seizure or stop sale authority for any animal biological product, as defined, which violates the provisions of the act; third, requirements to assure that each animal biological product is pure, safe, potent, and efficacious; fourth, development and issuance of test methods and control procedures as standards; fifth, addition of label requirements; sixth, revisions of the present licensing system relating to animal biological products; seventh, provisions to assure that imported products meet standards of quality as required for domestic products.

When the Virus-Serum-Toxin Act of 1913 was enacted, animal biological products were few in number, and those produced were used largely for the control of hog cholera. In recent years, the production, distribution, sale, and use of animal biologics have expanded greatly as a result of rapid scientific and technological advances. Moreover, new products are always in the process of development.

The products to be regulated under this act are differentiated from the many drugs and devices regulated under the authority of the Food, Drug, and Cosmetic Act, as amended.

One-third of the States have no laws to regulate the production and sale of biological products for animals. For the most part, the other States require only the registering of animal biological products and quality control is nonexistent. Products purportedly prepared for shipment only in intrastate commerce can, and often do, either intentionally or inadvertently find their way into interstate or foreign commerce. It is in the public interest that all animal biological products be brought under the regulation of the Secretary of Agriculture in order to assure that they are pure, safe, potent, and efficacious.

I want to make it crystal clear in introducing this bill that I do not expect it to become law in the 95th Congress. On the contrary, I fully expect that it will not become law this year.

My intention in introducing the measure at this time is so that the general concept of broadened USDA authority in this area of regulation can be examined between now and the convening of the 96th Congress. I do not favor increased Federal regulatory authority unless there is a definite need for it. However, I am also concerned that in many cases areas within the jurisdiction of USDA are being taken over by other agencies such as FDA or EPA. If there is to be further regulation in this area, I believe it should be administered by the Secretary of Agriculture.

For instance, I am aware that this bill gives to the U.S. Department of Agriculture certain authority which the Food and Drug Administration (FDA) may now exercise as it relates to enforcement mechanisms such as those which authorize FDA seizure of misrepresented and unsatisfactory products and those which authorize FDA to obtain injunctions to prevent and restrain violations of law relating to contaminated or harmful biological products.

There is one area in this bill which should, I believe, be strengthened. I would prefer to have an expanded State authority provided for in the bill. It is my considered judgment that USDA could delegate authority for licensing, issuing of permits, and establishment of test standards to the States. Also, I believe that States could be given expanded authority in the enforcement of this Act much as we did in Public Law 95–405, the Futures Trading Act of 1978.

Congressman GRASSLEY, Congressman LEACH and I welcome correspondence and comment from interested parties regarding this legislative measure with respect to ways it may be improved upon before its reintroduction in the 96th Congress.●

FREEDOM FOR SOVIET JEWRY

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. MURPHY of Illinois. Mr. Speaker, as the House today observes a "Vigil for Freedom" for Soviet Jewry, I want to draw my colleagues' attention to the case of Boris Chernobilsky. Mr. Chernobilsky, a member of the Refusnik community of Moscow, was detained last October and accused of "hooliganism," a charge that carries 1 to 5 years in prison. The arrest stemmed from Mr. Chernobilsky's presence at a peaceful protest at the Supreme Court by Moscow Jews. Fortunately, Mr. Chernobilsky was released following a worldwide outcry over this action by the Soviet KGB.

On March 4, 1977, the official Soviet newspaper, Izvestia, accused several leading activists of working for the U.S.

Central Intelligence Agency. That evening, apartments of several Refusniks were searched, Chernobilsky's among them. This represented the most severe crackdown in several years, aimed especially at the group monitoring Soviet violations of the human rights provisions contained in the 1975 Helsinki accords. The searches carried out by the KGB, coupled with the slanderous article in Izvestia, clearly places the activists in serious danger.

While the Soviet Government would like Russian citizens to believe the false charges brought against the Refusniks, the facts are these:

First. All of their activities have been directed solely toward obtaining the right to emigrate from the Soviet Union to Israel.

Second. Everything they have done has been entirely within the framework of Soviet law.

Third. They have always informed Western public opinion and the Western press about their condition and suffering in open letters and declarations.

Fourth. They have never hid from Soviet authorities the fact that they are trying to keep the West aware of their monitoring activities.

Fifth. Their actions are intended not only to help Jews who wish to emigrate to Israel, but to improve the relations between the Soviet Government and countries of the Western world.

Mr. Speaker, I view with apprehension the prospect of anti-Jewish trials based on completely false evidence, and fear that the Soviet Government may be returning to the worst excesses of Stalin's time. It is critical, therefore, Mr. Speaker, that the Congress, the President, and all Americans call on the Soviet Union to abandon its campaign against law-abiding dissidents—in the interest of basic human rights and the possibility of greatly improved United States-Soviet relations.●

VIGIL FOR FREEDOM

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. BROWN of Ohio. Mr. Speaker, I am pleased to join the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of the Soviet Government's repressive emigration policies.

Three years ago 35 nations signed the Helsinki Final Act, committing the nations to pursue policies consistent with the basic principles of human rights, including the reunification of divided families, whose members live in different countries, religious freedom, minority rights and free travel between countries.

Unfortunately, the Soviet Union has failed to honor the human rights provisions of the Final Act.

Today, I want to bring to my colleagues' attention the case of Emanuel and Alla Smeliansky, and their 5-year-old son. Mr. Smeliansky is a 44-year-old former metallurgical engineer. When the family applied for visas in 1970 to join the remainder of his family in Israel, Mr. Smeliansky lost his position as an engineer, as did his wife, an intourist guide. Not only was permission denied, but he was sentenced to 10 days of detention and sent to Butyrka.

Furthermore, Mr. Smeliansky's request resulted in unreasonable harassment, continuing surveillance and confiscation of international correspondence. The Soviet Government also levied heavy taxes, equal to a month's salary, twice on the family.

In January 1976, Smeliansky issued the following statement:

> The list of violations by the Soviet Government could be lengthened and we would ask you to bear in mind that our case is by no means exceptional. Please ask the Soviet Government to keep their promises and to grant us and our friends suffering similarly, permission to emigrate.

It is my sincere hope that this vigil will result in prompt emigration to Israel for this family.●

MICHIGAN MILK PRODUCERS ASSOCIATION SUPPORTS NATURAL GAS CONFERENCE REPORT

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. DINGELL. Mr. Speaker, the Michigan Milk Producers Association has contacted me and asked that the Congress be notified of their support for the natural gas conference report, accompanying the energy bills the House will soon consider. I am pleased to have this opportunity to insert their letter at this point in the RECORD:

MICHIGAN MILK PRODUCERS ASSOCIATION,
Detroit, Mich., October 6, 1978.

Hon. JOHN D. DINGELL,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN DINGELL: This letter is to register the viewpoint and position of the 6,000 dairy farmer members of the Michigan Milk Producers Association. For the past several years as a dairy farmer closely associated with other farmers, I have agonized with them about the lack of progress in achieving a more clear and understandable energy policy.

We believe the energy situation in the United States is critical. Agriculture depends entirely upon an adequate supply of fuel. To meet the needs of agriculture in this country, comprehensive legislation must be enacted and the passage of the bill is crucial in order to demonstrate to all that we have the will to deal with the energy problem in a decisive way. The Conference Report will allow for the production of more gas than at present and it contains provisions to protect the agricultural sector from production to the point of last sale from undue high costs. We also have concluded that it is in our interest as homeowners as well.

We realize it is a very complex issue with extreme positions being held to. Some want total regulation and no price incentive for gas producers, and others want total deregulation now. We know that both opposites cannot be right. Therefore, in the face of the need, we favor the compromise of HR-5289.

On behalf of the dairy farmer members of the Michigan Milk Producers Association, I respectfully request your vote for the Natural Gas Conference Report.

Sincerely,

GLENN LAKE,
President. ●

ADM. PIERRE CHARBONNET

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. LIVINGSTON. Mr. Speaker, I would like to place in the RECORD an interview conducted by the New Orleans Times-Picayune with Vice Adm. Pierre N. Charbonnet, Jr., who recently retired from the Navy after 40 years of service.

Admiral Charbonnet was Chief of Naval Reserve and Commandant of the Eighth Naval District.

In the interview with the Times-Picayune, Admiral Charbonnet expresses his dismay with the Carter administration's policies and what he calls the "muzzling" of the military. He says that the President is telling military commanders, "If you can't go and support me, get out."

Mr. Speaker, I do not believe that this kind of policy gives us a clear picture of the views of our military experts, nor does it enable us to take advantage of their experience. The President is ignoring the experts on national defense, and the security of the United States has become the whipping boy. I think that is a cause for grave concern.

I am inserting this article in the RECORD and I am also writing the House Armed Services Committee, expressing my concern and asking that Admiral Charbonnet be called as a witness when defense policy is under discussion.

We cannot afford to lose military experts and leaders like Admiral Charbonnet merely because the President does not want dissent.

The article follows:

CHARBONNET LEAVES NAVY DISMAYED BY CARTER'S POLICIES

(By Don Lewis)

Vice Adm. Pierre N. Charbonnet Jr. leaves the Navy after 40 years dismayed by the Carter Administration's defense policies and "worried about our sustained capability to meet the Russians and whip 'em in the future."

"I think we can do it right now," said the 58-year-old admiral, who took an early retirement rather than continue to support administration policies he did not believe in during testimony before congressional committees.

"You've got to remember the Soviets have got a momentum built up and I don't think we really know how great that momentum is," added the three-star admiral, who retired Sept. 1 as chief of Naval Reserve and commandant of the Eighth Naval District.

"We know their capacity for building and fabricating ships, like submarines, is something fantastic," he said. "They're geared for military production now. They've got an economy which permits them to go and concentrate on anything they want to."

Could the U.S. Navy keep the vital sealanes open in the event of war with the Soviet

Union, which has a constantly growing blue water Navy?

"I think we could in the selected areas that we would have to," Adm. Charbonnet replied. "We do not have, in my opinion, blanket superiority and capability to cover the seas, period. I think those days are long gone. We could do that 15 years ago.

"I think right now we could keep the sealanes open to principal allies in Europe or Japan," he said. "Heck, I think you've got to consider Japan in any context of confrontation with the Soviet Union and we have too much vested in the Pacific area to ignore them. And I'm not too damn sure that the Russians are not going to make that type move."

At present, the Department of Defense only has eyes for Europe, but Adm. Charbonnet observed: "When the Russian applies pressure and if we have a confrontation with them, there are other places we could have them besides Europe. I'm not necessarily totally sold that NATO is the place, but of couse, we've got to be prepared for NATO."

Adm. Charbonnet worries about a trend he sees among DoD planners: Trying to guess Russian intentions.

"We've got to base our defense establishment on his capabilities, not his intentions," he warned. "I'm sick of this worrying about intentions because we've never guessed intentions right of anybody I've ever known. That goes from Hitler to Castro. We're never right!"

Adm. Charbonnet said that Pentagon planners are talking about a given scenario in a confrontation with Russia. "They're saying things like the war in Europe will be over so fast that maybe the Navy won't even participate," he said.

"This is intentions again and this is not capabilities," he said. "This sort of ignores the fact that there's a Pacific Ocean and we're going to be fighting I assume the Russians or the Iron Curtain in the Pacific. It's going to be a worldwide thing if you fight the Russians, who have access to all oceans—and a fine, expanding navy."

"If you play against his capabilities—and we have a good estimate of his capabilities—and you build for that, it's just one helluva lot safer. You can lose a war easily—quick—on intentions.

"This is like trying to estimate when he's going to make an assault into NATO," Adm. Charbonnet said. "I don't think we will ever have a warning. I think every year when he goes and changes his troops in Eastern Germany, he could make his assault right then."

The admiral said the Soviets are working hard at building a strong military capability and their development of defensive or offensive capabilities are almost entirely based on what the U.S. can do.

"He doesn't mess around with our intentions," Adm. Charbonnet said. "He assumes always, I think, that they're bad for him. And I think we should continue to have the same feeling because it's the safe way to play. You're playing for something in which there are no second place winners.

"It's just like air combat. You either win or you've had it." said Adm. Charbonnet, who flew as a squadron and group commander in the Pacific Theater during World War II.

Adm. Charbonnet has accepted the position of executive assistant to the president of Oil Mop Inc., the New Orleans-based international pollution control company.

During a two-and-a-half hour interview at his new residence on St. Charles Avenue, Adm. Charbonnet said he was ready to retire last October, but decided to stay on at the request of Adm. James L. Holloway III, then Chief of Naval Operations.

He said the muzzling of the military under the Carter Administration has to be experienced to be believed.

Referring to the president, Charbonnet said: "He says if you can't go and support me, get out. You either go our way or leave. And, consequently, that's what I'm doing.

"At one time, we were told by somebody in Defense that we should even get clearance and approval to state our personal opinions," Adm. Charbonnet said. "And it puts you under, I thought, exorbitant pressures.

"For one thing," he said, "I felt constantly sort of hypocritical when I appeared before the Congress where you would go over and defend really the budget that was not your budget, not what we submitted, not what our requirements were, but the requirements that had been interpreted by this echelon of general staff—the analyst types, the budgeteers, the Office of Management and Budget guys.

"I just don't want to go and be dictated to by the administration that I can't agree with.

"When you go and testify in front of Congress any military man has got to have allegiance to the commander-in-chief," Adm. Charbonnet noted. "I recognize that and when I went up there on the Hill I represented the (Naval) Reserve budget to Congress as the administration wanted it. When I went and testified to the Congress, I told them what the administration, the secretary of defense, wanted for the Naval Reserve. Not what the Navy wanted."

Adm. Charbonnet said there are many brilliant young civilians working in the Pentagon with *beaucoup* doctorates in this and that. But, he said, so many have no experience in military matters and "are making decisions about things they really don't know anything about. And this goes for selections of weapons systems and estimates of the threat.

"So many of these Pentagon people are not qualified by virtue of experience," Adm. Charbonnet said. "They don't know what the hell they're talking about."●

TODAY'S SOLDIERS AMONG THE BEST

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. STEIGER. Mr. Speaker, Gen. Bernard W. Rogers, Army Chief of Staff, recently addressed the 60th annual American Legion national convention. In his speech, he spoke of the Army since the end of the draft, commenting both on the problems and the successes of the All-Volunteer Force.

"Our soldiers today reflect the strengths and weaknesses of our society," General Rogers told the Legionnaires. Still, he emphasized, "I believe that today's soldiers are among the best with whom I have had the privilege to serve in over 35 years of commissioned service."

General Rogers' speech is frank and thoughtful. His analysis of the challenges today's Army faces is one that all of us should read. I commend it to the attention of all who read the RECORD:

ADDRESS BY GEN. BERNARD W. ROGERS

Distinguished guests, ladies and gentlemen. I am deeply honored to be here this morning. Yours is a great and proud organization which always gives strong support to many causes of worth to our country. How well I remember from my early childhood my father's pride in belonging to the Legion and his participating in its activities in the small Kansas town of 250 where I grew up. The Legion is still very active in that little town.

The American Legion has always fought for a strong national defense. Two days ago Secretary Brown spoke to you about the requirements of such a defense and the high priority being placed today on combat readiness. The Joint Chiefs of Staff fully concur in that emphasis on readiness. We have committed ourselves to ensuring that we can be militarily responsive to the needs of our nation as determined by the President and the Congress. To that end we have had more opportunities, as a corporate body, than our predecessors to give our advice to this Administration; and we have always had a fair and understanding hearing. Some believe that our military opinions are not sought and are not heard. They are wrong. Our advice might not always be accepted, but the Constitution and the law do not require that it be. The principle of civilian control must remain inviolable; the final decisions on national policy must remain the responsibility of our elected leaders.

I would like to take up this morning where Secretary Brown ended this talk when he stated that "people are the greatest asset we have in defense" and that "the men and women of today offer us the opportunity for the same decisive margin" of victory which "you, our veterans, gave us . . . in the past." All our operational needs, our plans and strategies, our programs and budgets, our sophisticated equipment and computerized methods are ultimately without value unless we have that one key ingredient: adequate numbers of dedicated, responsive, trained and effective soldiers, sailors, airmen and marines.

It will, of course, be an Army perspective from which I speak, but in some cases parallel observations can be drawn from the other Services. I think it would be well to dispel some myths about the volunteer environment, to collect some facts as to the Army's experience in it, and outline for you some of our challenges as we attract, train, care for, and keep the best among those who volunteer to join our ranks.

Since December 1972, when the Army inducted its last draftees, we have been engaged in an unprecedented effort. No country has ever tried over a sustained period in peacetime to fill, solely by volunteers, an Army of our size—over 1.3 million in uniform in the Total Army: the Active Forces and the Reserve Forces—the Army Guard and the Army Reserve. We have had some growing pains and known both ups and downs, but we have met with success, at least in getting adequate numbers of qualified soldiers for our Active Forces which are some 780 thousand strong.

If the volunteer experience has been positive for the Active Army, we have not had comparable success in our Reserve Forces which face a more complex series of challenges. The end of the draft dealt those forces a severe blow. No longer were draft-induced volunteers coming into the Guard or Reserve so as to have a degree of control over the conditions of their required military service. Furthermore, the Active Army is now half the size it was ten years ago at the Vietnam peak. This reduction in the size of the Active Forces and the increase in terms of Active service result in fewer soldiers entering the Reserve Forces to complete their service obligation and serving less time once in the reserves.

Hence, a major result of the dropping of draft has been the dwindling of the strengths of our Reserve Forces. Normally this understrength would be made up by the Individual Ready Reserve, the IRR. This is the pool of trained, former service-members, who are not assigned to Reserve units yet who still have a residual obligation. This IRR pool would not only provide the immediate fillers to bring units up to full strength, it would also serve as the source of replacements for

the casualties we might expect in the early days of a major contingency until a reinstated draft could take over and fill the manpower pipeline. Unfortunately, our IRR pool is today drastically short of personnel. In my opinion, that challenge is exacerbated by another: the Selective Service System is in such a deep standby status that, under current conditions, it would take much too long to get our first draftees in and out of the training command and headed toward their initial units of assignment.

The greatest challenge which the volunteer environment poses for our Army today is reaching and maintaining the appropriate strength levels of our Reserve Forces units and of the Individual Ready Reserve.

Recruiting in the volunteer environment has obviously taken on new meaning, a very energetic one. Recruiting for the Reserve Forces presents challenges altogether different from those facing the Active Forces since recruiting for the Reserve Forces is community based. A surplus of volunteers for a unit here in New Orleans cannot help an understrength in New York.

The greatest assist in increasing the strength of our Reserve Forces would come from there being a general understanding by all citizens of the important role played by the Guard and Reserve today, and the active support of those Reserve Forces by the public and their elected representatives. Meanwhile, we have underway a number of efforts to correct these shortages. We have made proposals for new legislation required from Congress. We have begun a program of direct recruiting assistance of the Army Reserve by the Active Army Recruiting Command. And we are implementing several other measures to enhance our recruiting and retention in the Reserve units that are short. Until these measures are tried in earnest—as such measures have been implemented for the Active Forces—we must hold in abeyance any judgment on the overall success of the volunteer concept.

As we think about recruiting issues, we must recognize that we are in the business of recruiting women as well as men. In today's Active Army, we have almost 50 thousand enlisted women. They are playing an expanding role and doing extremely well at it. They have required that we reassess the types of assignments they can fill, and now some 96 per cent of our military skills are open to them. Women are still barred from assignments likely to involve close combat. They will deploy with their units should we have to go to war. They are soldiers and need to be treated as such, just as are their male counterparts. That is what the women soldiers want; that is what I want. Their presence has leavened the whole Army and presented challenges to leaders to all levels to adjust their traditional modes of thinking. We are proud of the outstanding contribution women are making, and we will be drawing upon them even more over the next several years.

To ease our recruiting burdens we must minimize the losses occasioned by soldiers who do not complete their normal terms of service. Some publicity has been given to the fact that almost 40 per cent of those soldiers who volunteered in FY 1974—the first full year without the draft—did not complete their full 36 months of service. More than half of that loss occurred during the first year. Most of those who departed early were caught in our filtering systems that sought out the non-productive, the inept, the unsuitable or the disciplined soldiers so that our commanders could concentrate on training those who were capable, motivated, and disciplined. As you would expect, it is not until we get our volunteer soldier into uniform and immersed into the regimentation and routine of the Army that we know whether he or she has the motivation, self-discipline, attitude and aptitude to be the kind of soldier we want to keep. If some demonstrate that they cannot or will not meet the standards we set, then we have the tools to remove them from our ranks. After all, this is a volunteer Army, and soldiers volunteer to meet our standards which I insist be high in all areas. If they do not measure up, I encourage commanders to use the tools and programs available to rid us of the substandard. This is surely what you would expect us to do.

As we have gained experience in the volunteer environment, we have been able to determine which categories of potential recruits show the greatest promise for effective service. As our techniques for determining that promise are refined, and as we are able to recruit more from those groups likely to do well, our attrition rates will drop. In several years, we hope to reduce attrition among first termers to about 25 per cent, but progress will be slow and expensive since we are seeking the same sorts of people as business, industry and the other Services.

We have found that one of the best pre-enlistment indicators of potential for effective service is the high school diploma—though it is by no means the only one. The motivation, discipline and reliability displayed in acquiring a diploma carry over into the Army. Our experience shows that a recruit with a diploma is more than twice as likely to finish his first term than his contemporary who does not possess one. Additionally, holders of diplomas are more apt to reenlist.

While these young persons are doing well, this expectation of success should not be construed as implying that soldiers without diplomas cannot be effective. In fact, many of them are. In the last analysis, quality should be measured by performance in one's unit, after initial training. In the main, those who complete training are doing well. When turned on by good leadership, meaningful tasks, tough and challenging training, strict discipline, and high standards, our soldiers respond with dedication, willingness to sacrifice and high performance.

I mentioned that our attrition rates are dropping, and a major factor is that the percentage of high school diploma graduates in the force has increased significantly. So far this year, more than 70 per cent of our new recruits have been holders of diplomas—a higher percentage than ever before during the volunteer environment.

Admittedly, we are not attracting many of those persons who are bound for college and also perhaps not too many at the top end of the intelligence scale. But then we have about the same proportion of enlisted members with at least some college experience as we did during the last year of the draft, about 12 per cent. By the same token we are not accepting those persons at the lower end of the intelligence scale. Our recruits in the lowest acceptable mental level, Mental Category IV, are about half the percentage we were receiving during the draft six years ago.

Many have decried the educational levels in the Army today. I would only point out that during the later phases of World War II, when our soldiers were landing on the beaches of Normandy and New Guinea, the high school graduate content of the Army was less than 40 per cent. At the height of the Korean War, it was less than 50 percent. During the last year of the draft it was 70 per cent. Today our high school graduate content throughout the Active Army is 83 per cent, including a number who have earned their diploma or equivalency while in the Service.

I think such historical perspective is important as we look at the Army and try to judge the qualifications of the soldiers now in our ranks. Although the Army can improve in many respects, and is deeply engaged in just that endeavor, much of the criticism of our soldiers that has been voiced recently is inaccurate. More importantly, hundreds of thousands of fine soldiers have been unfairly maligned. Often, a return to the draft is seen as a panacea for our challenges, but that is not necessarily so. The issue is much more complex and not susceptible to simple solutions.

The volunteer soldiers commanded by General Pershing prior to World War I and those led by General Marshall prior to World War II were not better qualified to be soldiers than those in the Army today. Yet their gallantry on the battlefield is beyond dispute. We sometimes forget the chants of "OHIO"—"Over the Hill in October"—prior to Pearl Harbor. We sometimes forget that large scale troop disturbances occurred during the demobilization after World War II. We sometimes forget that the composition of our Army during the recent draft was not necessarily more representative of our society than our Army is today—or was 50 or 100 years ago.

Perhaps the categories of representation may have changed somewhat, but a degree of imbalance will remain as a matter of practical application of any system—draft or volunteer. No system will be fully representative or truly equitable in practice. What matters is not which social or economic strata our soldiers come from or what motivates them to join; what does matter is how well they perform once they are serving in their units under their sergeants, lieutenants and captains. Then, and only then, can we judge if the soldier's performance is one of "quality."

Quality is an extraordinarily elusive concept, and peacetime measurements of wartime effectiveness must always be indirect; but we are not without experience in the field. Traditional indicators of indiscipline are down dramatically over the past five years—AWOL's, desertions, crimes of violence and the like—in some cases down by a factor of three. Our indications of motivation and morale are up. Our soldiers are in the Army because they want to be, and they are performing well.

I believe that today's soldiers are among the best with whom I have had the privilege to serve in over 35 years of commissioned service.

Let me add to that perspective. Our soldiers today reflect the strengths and weaknesses of our society. They represent a microcosm of the 17–25 year olds in our country since two-thirds of our Army fall in that age group. And, to some extent, the fact that they are now in the Army puts them in an unaccustomed spotlight.

A point has been made about the low reading levels of some of our enlistees. It is true. Even after we disqualify young people in the lowest categories of mental aptitude from coming into the Army, we find that about 6 percent of our enlistees are functionally illiterate, reading at about the 5th grade level. By comparison, a study sponsored in 1975 by the Department of Health, Education, and Welfare, indicated that about 20 percent of all American adults over age 17 are functionally illiterate. Now while certainly not all of these people are qualified for military service—by age if for no other reason—that is nevertheless a shocking figure. It is something about which we all as citizens must be concerned. It has effects with which Army commanders must cope.

However, we have a number of programs in the Army to improve the capabilities of our soldiers in this regard, such as the Basic Skill Education Program, a fully funded, on-duty effort to help the soldier acquire the educational skills he needs to do his job. We are working with the Departments of Labor and HEW to provide pre-enlistment remedial education. Other programs provide industrial recognition for skills learned in the Army and provide for appropriate ap-

prenticeships. And though the Congress has discontinued educational benefits for new soldiers under the GI Bill, there is a partial replacement for it under the Veterans Education Assistance Program.

Public interest has recently focused again on drug abuse in the Services, although Army programs are also deeply concerned with alcohol abuse where our case load is in fact higher. Again, a measure of perspective is in order. We do not want our soldiers to do anything that would impair their health and efficiency or that of the Army. Our soldiers come from a society in which drugs are endemic, and while exact national figures are not available, National Institute of Drug Abuse estimates for the 17-25 year old age group are comparable to those of the Army. We are not satisfied with these comparisons, however, because our responsibilities for national security should require higher standards than those prevalent in society.

We have been encouraged by the downturn of hard drug abuse in the past four years. Alcohol and marijuana use have remained about steady. As accurately as we can determine, about 7 percent of our enlisted soldiers now use hard drugs at least occasionally, with just less than 2 percent of them on a regular basis. Most of this use is in a social or recreational context—we have been able to weed out most of the hard core addicts we had several years ago. We have a number of programs to combat and contain, if not eliminate, drug abuse—recreational, to remove the temptation; educational, to teach the dangers; law enforcement, to root out the sources; and rehabilitational, to treat the abusers.

We do not minimize the problem; any misuse of drugs is abuse and cause for concern. But I want to assure you that drugs have not incapacitated the Army, despite what some would have you believe.

In sum, we have some big people challenges in the Army—as well as challenges in other areas—and we are working vigorously at meeting them. But, they have not overwhelmed us.

Many of these challenges are eternal. They have faced all commanders through the ages, since armies have historically been composed largely of young people. Seventeen to 25 year old men and women today have all the energy and all the high spirits they have always had. They want to be tested, the harder the better. They have an enormous potential for hard work, ingenuity, and great accomplishment. They also have the potential for mischief. They place a premium on good leadership—professional, competent, sensitive, compassionate leadership. Our Army has always needed officers and noncommissioned officers who could channel soldiers' energy in the right direction. Our task today is the same as has always faced the Army: to take those young people who join us, transform them from civilians into soldiers, and train them well so as to produce soldiers who are better as individuals, better as members of the team, and better as citizens once they return to civil life after honorable service in uniform.

In this sense, the quality of any Army is determined more by its leaders than by its junior soldiers. Good leaders can make good units; they can create an environment in which pride, professionalism, confidence, candor, esprit and motivation can fluorish. They can take care of their soldiers and make the best want to reenlist. Those who measure up have done so. Our reenlistment rates today are among the highest we have experienced in the volunteer environment, and we are meeting the reenlistment objectives we had previously set.

I have focused much of my talk on issues surrounding our soldiers that have received considerable national publicity lately. Much fuel for that debate has been based on anecdotal evidence. I submit that the views of one drug abuser, while important in themselves, should not be used to characterize the whole Army, just as the opinions of one sergeant cannot reflect accurately on the state of readiness of the whole Army.

Those of us in uniform generally have a tendency to hark back to the good old days, to wish to return to the comforts of a seemingly remembered past rather than face the possible discomfort of an unknown future. But as the old sergeant once said, "The Army ain't like it used to be, and it never was." Wishful thinking about the past will not solve today's challenges. What we in the Army do is to recognize our challenges today in their human dimensions and, with the resources available to us, do something about them.

Our Army has plotted a careful course between constancy and change. We have adjusted to change in the international environment, and we have adjusted to the dynamics of the society from which we spring. At the same time we have held true to the enduring values of integrity and honor, to the bedrock of professional competence, and to the firm principle of civilian control. If we are indeed to defend our society—and our society's right to change its own values—then the constant values of our commitment to service must remain unalterably fixed.

Before I close, I want to reiterate one point very clearly. Our Army today faces many challenges, just as it always has and always will; and, as in the past, we intend to meet them. Not the least of these challenges is taking what our nation gives us—in the way of material resources and in the way if young men and women—and fashioning a proud Army, professionally competent, capable of securing the interests of our nation in concert with the other Services, and providing an environment in which good soldiers and their families want to serve and live. The soldiers in our Army are doing just that, and they are doing it well. I am proud of them; you veterans can be proud, too. The soldiers need your support; they deserve your support. And I solicit your continued support of them.

VIGIL FOR FREEDOM

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FRENZEL. Mr. Speaker, over 3 years ago 35 nations including the United States and the Soviet Union signed the Helsinki agreement. All of these nations pledged to reunite divided families. However, case after case has come to my attention to indicate that the Soviet Union does not take their responsibility in this matter seriously.

Just last Saturday evening, I participated in a "candlelight march" in St. Paul, Minn., in which 2,000 people demonstrated, in a dignified manner, the outrage over Russian suppression of emigration and other human rights. It is obvious that this strong objection is not confined to a few activists.

We are all familiar with the harassment and intimidation that often follows Soviet Jews request to emigrate from Russia. A case history of these families entitled "Vigil for Freedom," dramatically details this tragic problem. I would like to invite the Members' attention to the situation of the Finkelstein family, which to me demonstrates a clear violation of the Helsinki agreement.

Eitan Finkelstein and his wife, Alexandra, first applied to emigrate to Israel 8 years ago. Mr. Finkelstein is a physicist who was dismissed from the Moscow Physics Technology Institute due to his activist activities. Although he has not worked in his field for 10 years, Soviet officials continue to deny his exit permit on the grounds that he possesses secret information gained during his previous employment. Mrs. Finkelstein is highly educated in oceanographic biology and has not been employed for 2 years.

In 1974, the Finkelsteins' joy over the birth of their daughter was dampened by their struggle with registrar to name their child, Miriam. The family was subject to further harassment from the Soviet officials when Eitan and Alexandra were forced to live in different cities. We recently learned that their telephone was disconnected and they have not received mail for several months. Despite their suffering, the Finkelsteins, like many other courageous families, will not give up their dream.

I share the Finkelstein's dream. I look forward to the day when it will not be necessary to offer case examples of the many families who are forcibly detained in the U.S.S.R. But, that day is not here so we must continue our own struggle to remind the Soviet Government of its signed, but unfilled, commitment to its own citizens for basic human rights.

On this day, I pay nomage to the Finkelstein's personal fight for freedom and their courage to continue that fight. The Finkelsteins are just one of many persecuted families. There are many others who suffer a similar plight, and we must not forget them. I urge every Member of Congress to join this vigil in support of those who must always struggle for freedom.●

ENERGY SITUATION

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mrs. FENWICK. Mr. Speaker, the urgency of the energy situation of this country demands all the innovation and creativity of which this Nation is capable. With this in mind, looking forward to a conference on the subject of alternate and automating exhaustible sources of energy, I would like to bring to the attention of the Members these articles, written by Gordon Bishop, in one of our leading newspapers, the Newark Star Ledger:

ANALYSIS FINDS SOLAR INVESTMENT A "GOOD BUY"

(By Gordon Bishop)

Solar systems can produce more energy for heating, cooling and clean, renewable fuels than a comparable investment in offshore oil and natural gas.

That is the finding of one of the leading consultants to the U.S. Department of Energy—Intertechnology Corp., Warrenton, Va.

Consumers, according to the analysis, will be paying more for oil and natural gas ex-

pected to be found off the New Jersey coast than an equivalent amount of solar energy.

A solar investment of $100 billion in collection systems today buys the equivalent of a million barrels of oil a day, the analysis shows.

The United States now consumes about 20 million barrels a day.

But once the oil and gas are burned, they must be replenished, unlike solar systems, which, once installed, keep on providing energy for 40 years, the lifetime of a typical collector.

The analysis is the first ever done comparing the energy value and costs of Atlantic offshore oil and gas to new solar systems, according to the federal Department of Energy (DOE).

It was prepared by Intertechnology Corp., a worldwide developer of renewable resources and a major consultant to DOE.

The analysis reveals that energy from sunlight—hot water, heating, cooling, electricity, biomass—already is available and will be cheaper and easier to produce than resources taken deep below the Atlantic Ocean beginning in 1987.

That is the year when the first amounts of crude oil and natural gas are expected to be coming ashore for processing and distribution to the consuming public.

The government expects about one billion barrels of oil and five trillion cubic feet of natural gas to be extracted from the Baltimore Canyon some 50 to 100 miles east of New Jersey.

The conclusion reached by Intertechnology Corp. is that an investment in solar applications over the next 20 years will yield much greater energy value and social benefits, and less environmental, economic and political problems.

Moreover, inflation in the "free world" can be controlled through energy systems that rely on renewable and, in most cases, free solar fuels, Intertechnology maintains.

For example, a $100 billion solar investment now can save a million barrels of oil a day. At $15 a barrel, the savings comes to $15 million a day.

The United States will import nearly $50 billion worth of fuels this year, causing a massive trade deficit and feeding inflation, federal studies project.

Yet the U.S. Department of Energy continues to spend more money on development of fossil fuels and nuclear power than renewable solar technologies.

The DOE budget is $10.3 billion, of which $7 billion is allocated for nuclear activities and $684 million for fossil fuel development (conversion of coal into gas and oil).

On the bottom of DOE's priorities is solar energy research and development at $411 million.

The 1979 budget will jump to $12.6 billion, but the solar outlay will rise only $89 million to $500 million, mostly for research and development. And that increase resulted from citizens' pressure following the Sun Day celebration May 3. The original appropriation had been $400 million.

Unless the federal government and the energy industries shift the emphasis to solar, the cost of powering and fueling the nation's economy will continue to rise at a rate of about 10 per cent or more a year, indefinitely, based on costs of finite fuels this decade.

Intertechnology president Dr. George Szego is convinced the U.S. needs a crash program of the same magnitude as the space effort to make solar a reality this century.

The federal government committed $69 billion from 1959 through 1978 to space exploration.

Solar supporters are asking for a $2 billion effort, beginning in 1979, to bring solar into the marketplace at prices most everyone will be able to afford.

During the preparation of the solar/offshore analysis in his Virginia office, Dr. Szego explained that President Carter and Congress created a great deal of confusion by promising solar as a solution to our present fix, but proper initiatives.

Last year, President Carter announced a goal of 2.5 million homes utilizing solar energy by 1985. That number has since been drastically cut back to a few hundred thousand dwelling units, despite a growing interest in solar alternatives.

While the President's Council on Environmental Quality is calling for a 25 per cent solar mix by the year 2000, the oil industry is forecasting a scant of 1 to 2 per cent by then.

New Jersey's Energy Master Plan also anticipates a 25 per cent solar use within the next 22 years if solar development is immediately accelerated.

To determine whether the 25 per cent solar goal was, in fact, achievable, an analysis was done comparing the costs of offshore oil and gas to solar alternatives, and the net impact on consumers—and society.

Two assumptions were made for the analysis. The first is that the worldwide price of a barrel of oil will be about $30 in 1987, when the Mid-Atlantic oil will be coming ashore for processing and distribution in the marketplace.

For natural gas, the wellhead price (where the gas leaves the ground and enters the pipeline) was set at $5 per thousand cubic feet.

Both oil and gas estimates are considered conservative by energy analysts.

The second assumption is that finite energy supplies (particularly oil and gas) will continue to inflate in price about 10 per cent a year. This is also considered a reasonable assumption based on the escalating demand for oil and gas, especially in the developing nations, and the increasingly rapid rate of exhaustion of limited fossil fuels.

The numbers used in the analysis were purposely low and weighted in favor of oil and natural gas to avoid any unintentional bias that would put alternate solar technologies at an advantage, Szego noted.

For example, the $30 per barrel cost is for crude oil before processing. A barrel of oil contains 42 gallons.

The market value of 42 gallons of finished product (gasoline, heating oil, kerosene, etc.) is about three times as much as a barrel of crude oil.

The consumer also pays about twice the wellhead price of natural gas.

But simply using $30 per barrel and $5 per thousand cubic feet of natural gas at the wellhead, the least cost to the consumer would be $200.3 billion over 20 years.

If the higher numbers were used in the analysis, the cost to the consumers would be in the range of $500 billion over the same time period, making solar even a better bargain by comparison.

Dr. Szego did all of the calculations himself.

A chemical engineer with over 30 years experience in the economics of energy and energy conversion and power, Szego, 59, found that $200 billion worth of solar energy over 20 years could save the equivalent of 73 billion barrels of oil.

The rule of thumb in the industry is that an investment of approximately $100 billion today buys the equivalent of a million barrels of oil a day.

That averages out to one-third of a billion barrels per year. Within three years, the $100 billion solar investment returns to the consumer the same as a billion barrels of oil.

At today's price of around $15 per barrel, the cost to the consumer is $15 billion. Again, that is for the raw barrel of oil before processing and distribution.

The Intertechnology figures were similar to those computed by Grumman Energy Systems, a division of Grumman Corp., manufacturers of aircraft and aerospace equipment and a leading developer of solar technologies.

Sally Schneider, a Grumman energy systems engineer, found that for $400 billion (what consumers would most likely pay for Atlantic oil and gas over 20 years production), a solar array could be launched in space and provide the entire northeast with all of its electric energy.

Or, put another way, enough solar collectors could be installed on rooftops (10 billion square feet) to furnish just hot water at a savings of 800 million barrels of oil a year.

In five years, the energy saved from heating just hot water with sunshine would be equivalent to four billion barrels of oil, or four times more than the potential oil reserves in the Baltimore Canyon.

If heating were added to the solar collection and storage system, the energy savings would be triple that of hot water.

Sheldon Butt, president of the Solar Energy Industries Association, Washington, D.C., says that for $200 billion consumers in the Northeast can be provided with as many useful BTUs as a billion barrels of oil and five trillion cubic feet of gas at half the cost.

When asked what's holding back solar if it's a great energy saver, Butt asserted: "The billions and billions of dollars being plowed into harder-to-recover oil and gas, expensive nuclear technology and costly coal conversion."

Major oil companies refuse to say how much they are spending in solar research and development, claiming it is proprietary information that would give competitors an advantage.

Solar companies not engaged in oil, gas, coal or nuclear activities, however, freely report how much they are spending—and must continue to invest—to drive the cost of solar collectors and hardware down to competitive prices.

A typical solar hot water system for a family of four in the Northeast can now be installed for approximately $2,000. Roughly 20 percent of an average home's energy requirements is for heating hot water.

Furnishing heat and storage for up to five sunless days costs an additional $5,000 for a 1,500-square-foot home.

Solar air conditioning is also available, but at costs higher than conventional electric units. For $5,000, a solar air conditioner can be installed in the average home, with a payback of more than 15 years.

The payback on hot water is from three to five years, and heating from 10 to 15 years.

Solar electricity is expected to be on the market within five years. By 1986–87, photovoltaic systems—the method used to convert sunlight to electric energy—is expected to be competitive with local utilities.

A Ten-Dollar Solar Cell Closing Energy Gap

(By Gordon Bishop)

At $1.5 billion, it may be the bargain of the century.

That's how much the U.S. Department of Energy (DOE) needs to launch what it sees as the most promising energy development of the 20th Century—Photovoltaics.

The photovoltaic phenomenon is the direct conversion of sunlight into electricity.

A semi-conductor material transfers the sun's photons, or light energy, into electrons which can do the work: Light a bulb, or power an appliance or motor.

All space satellites orbiting the earth have been powered by silicon cells, a conductor of light energy.

But solar electricity remains largely a space technology.

The Department of Energy is getting only $33 million next year to reduce the costs of producing semi-conductors, a mere pittance

when compared to DOE's $12.6 billion budget for 1979.

Yet with little support from government or industry, photovoltaic engineers have been able to cut the costs of their product from $300 to $10 per kilowatt hour in only five years.

When the price comes down to about 10 to 15 cents per kilowatt hour, it will compete effectively with conventional generating plants that burn oil, coal or uranium fuels to produce electricity.

A typical family of four uses about 17 kilowatts of electricity each day.

With a $1.5 billion investment, DOE's engineers predict solar electricity can be on the market by 1983 for various residential and commercial uses, and will be able to compete dollar for dollar with utilities by 1986.

Utilities, however, will be faced with a shrinking market as homes and businesses begin tapping the sun for electricity.

Paul D. Maycock, assistant director for photovoltaics in the DOE, admits that is a "societal issue" that needs to be resolved.

Maycock refers to it as the "utility-interface" problem. Who pays for the utility back-up costs which would have to be shared with those who do not yet have photovoltaics?

Will consumers be able to afford utility-generated electricity as prices rise to offset losses to new photovoltaic users?

These are some of the tricky balancing issues the federal government must deal with as a new industry emerges to challenge central power systems.

"We are looking at a clean, silent, reliable, high technology that will have a major impact," Maycock envisions.

And that vision is within reach today. More and more photovoltaic arrays are being installed where central power systems cannot reach—remote sites in the mountains, offshore drilling platforms, along transportation corridors, in newly developing countries that cannot afford a billion dollars for a single generating station, and for watches, radios and other electronic gadgets that require little voltage.

The $1.5 billion that DOE is seeking to penetrate the potential market for photovoltaics is the same amount for one nuclear power plant.

Utilities are spending billions of dollars to build nuclear facilities that would have a life expectancy of 40 years.

Some DOE scientists feel the utilities might be building the white elephants of tomorrow, instead of planning on conservation leading to a gradual transition to solar and other renewable sources.

The DOE is striving to combine heating and cooling with photovoltaics for a single system. A similar approach is being taken by SES (Solar Energy Systems), a division of Shell Oil Co.

SES last year announced it planned to have on the market a combined solar system capable of producing hot water, heating, air conditioning and electricity by 1984. The price was $5,000 (1976 dollars).

The Department of Energy finds several favorable attributes for application of photovoltaic electric generating systems for homeowners. They are:

Land costs are offset by existing roofs that collect the sunlight.

Photovoltaic costs scale down proportionally to small kilowatt sizes, unlike central power plants that depend on economies of scale to offset costs.

There are no distribution costs for on-site generation.

The homeowner has a lower discount rate than the utility.

Individual desire for energy independence is served.

As photovoltaics become less expensive and more popular among energy consumers, the federal government is expected to develop a long-range "interface plan" with utilities, which will still be needed to deliver the heavy industrial loads.

Utilities will also be able to generate electricity whenever the sun is shining, making them less reliant on uranium and coal, both finite fuels whose costs will increase while photovoltaics will flatten out once mass production gets underway.

Federal photovoltaic officials see the era of giant power plants with their transmission tentacles spreading out over the landscape coming to an end as soon as a solar economy takes root in the 1980s.

"As energy from the sun is harnessed, there is no reason to keep extending systems that depend on limited and costly fuels for their survival," Maycock observed. "Right now, it doesn't make much sense to continue massive investments in technologies that soon will not be able to compete with solar systems."

At RCA Laboratories in Princeton, scientists have developed a semi-conductor that can be mass produced within a few years, ushering in the age of solar electricity.

RCA inventor Dr. David E. Carlson calls his discovery "hydrogenated amorphous silicon." It is the only amorphous material known that has been used successfully to make high performance, photovoltaic solar cells, according to RCA.

Amorphous silicon solar cells are low cost because the material (derived from common sand) is plentiful . . . the fabrication process involves low temperatures . . . extremely thin layers of the material (about 1/50th the thickness of a human hair) can be placed on inexpensive glass or steel sheets . . . and it is a long-lasting, stable material.

William C. Hittinger, executive vice president of Research and Engineering for RCA, says the federal government must support solar energy, noting it subsidized the oil, gas, coal and nuclear interests.

Since 1918, the federal government, through direct subsidies and tax credits, has given the finite fuel producers a $500 billion break.

Hittinger believes the solar industry needs only tax credits for manufacturers and tax rebates for users to get the sun working for everyone.

Without a long-range government commitment, a significant solar industry may not develop before the year 2000, Hittinger warns.

GREEN POWER: "ENERGY PLANTATIONS" MAY YIELD FAST-GROWING TIMBER FUEL

(By Gordon Bishop)

"Energy Plantations"—which grow fuels the same way farmers raise crops—may someday supplant oil and coal for heating, cooling and generating electricity.

The projected price of plantation fuel is $1.59 for one million BTU's of energy.

The price of oil today is $2 for the same amount of BTUs.

It is estimated that plantation fuel can furnish the nation with 20 per cent of its total energy needs.

Unlike oil or coal, plantation fuel does not pollute when burned.

Aware of the immediate potential of energy plantations, the U.S. Department of Energy has a project underway that would grow hybrid, hardwood trees for fuel on as many as 175 million acres of land unsuitable for food production.

* * * * *

The plan calls for harvesting quick-growing sycamores, poplars, cottonwoods and similar species on 25,000- to 30,000-acre plantations.

An acre yields from seven to 11 dry tons per year.

A typical plantation could supply 150 million BTUs per acre per year, or enough to satisfy the energy requirements of a suburban community.

The wood can also be used to make methanol fuel, replacing gasoline with a substance that emits only carbon dioxide and water.

And methanol fuel delivers 80 to 90 miles per gallon in a modified automobile engine, instead of from 20 to 50 miles from octane gasoline that powers conventional combustion engines.

The "Energy Plantation" concept was first advanced in 1971 by Dr. George Szego, president of Intertechnology Corp., Warrenton, Va.

Intertechnology is a leading consultant to the federal energy department.

* * * * *

Szego's energy plantations are part of a total energy package he describes as "24-Hour Solar."

That involves supplying a homeowner's entire energy requirements around-the-clock, even when the sun does not shine.

Solar energy systems are now capable of delivering BTUs when the sun shines, but the costs for storing heat, or chemical-electrical energy for use on sunless days, are three to four times more than the collection systems.

Szego's "24-Hour Solar" system solves that storage problem, he says. Solar collectors work when the sun's out, and plantation fuel takes over the rest of the time.

Energy plantations supply the fuel that is delivered to homes much the same way as heating oil. However, instead of filling a 500 gallon oil tank, the delivery man fills a magazine with cylinders of compressed chips. The chips burn in the furnace, but without contributing to the atmospheric pollution load.

Energy plantations are a "steady state" system, Szego, a chemical engineer, explains.

Trees growing on a plantation take in carbon dioxide, water and sunlight (photosynthesis), and give up carbon dioxide and water when burned.

They also leave a residue of ash which is collected by the furnace or delivery man and taken back to the plantation to feed more trees.

The carbon dioxide released on burning is returned to the atmosphere, where it is again taken up by the trees on the energy plantation. The CO_2 level remains in balance.

Oil and coal are the byproducts of trees, vegetation and animals that perished millions of years ago and became trapped in sediment and eventually covered and buried in the earth's crust.

Releasing those stored hydrocarbons in the atmosphere today is like trying to squeeze 1,000 people in a room capable of supporting only 100.

Consequently, the carbon level increases in direct proportion to the amount of fossil fuels burned.

The burning of ancient or fossil fuels at higher and higher rates already has caused the carbon level to become imbalanced. It is one of the reasons why coal is no longer being touted by the federal government as the answer to America's long-term energy problems.

The energy plantation is now being eyed as an acceptable alternative to coal, coupled with solar collectors for heating, cooling and generating electricity.

The 175 million acres of energy plantations would also be equivalent to the nation's annual production of coal, according to Szego's calculations, but without the accompanying impact on the air, water and land (strip mining).

The plantations would be harvested every two to three years, with no replanting necessary, as only certain species of trees that can regrow from their cut stumps would be used.

Intertechnology Corp. also has other energy alternatives on the proverbial burner.

Perhaps the most promising of these is OHP—Osmo-Hydro-Power, developed by Intertechnology and Dr. Sidney Loeb, a chemical engineer and professor at Ben Gurion University, Israel.

Essentially, OHP is a simple chemical reaction that makes electricity by passing a salt solution through a membrane into ordinary water. The membrane can be glass, cellulose acetate or triacetate.

Intertechnology is developing an OHP machine that is expected to produce electricity within five years at a cost comparable to what utilities will be charging their electric customers in 1983.

Dr. Loeb and his technicians have brought the costs of OHP electricity down to 40 cents per kilowatt hour. When it drops to 20 cents, they figure it will be competitive with some major utilities that today charge about 10 cents per kilowatt hour.

Public Service Electric & Gas Co., New Jersey's largest power producer, charges about 7 cents per kilowatt hour, with the rate increasing each year as the costs of oil and nuclear fuel rise.

Unlike nuclear or coal-fired power plants, OHP machines can be run by an illiterate person, according to Szego.

"All they have to do is turn color-coated valves every now and then," he says. "It's a simple, reliable, clean operation that needs nothing but salts and water to work."

The Department of Energy is also looking at algae ponds that would feed on sewage-sludge wastes, solving the sludge disposal problem while also providing a renewable source of methane gas.

Algae would be harvested and converted into clean gas for heating and cooling, and as a feedstock for petrochemicals.

The algae ponds could be sited next to energy plantations, supplying the fast growing trees with water whenever there is less than 20 inches of rainfall a year.

The Department of Energy, established by Congress last year, is setting into motion a series of alternate technologies to take the place of finite fuels—oil, gas, coal and nuclear—as they become scarcer and more difficult and expensive to recover.

As one DOE official put it: "We really don't have a shortage of energy. We have a shortage of a few kinds of fuel on which we've become overly dependent and extremely vulnerable.

"What we've got to do is to shift to those sources that are renewable and compatible with man and his environment." ●

NATURAL GAS: WE COULD HAVE IT IN GREAT QUANTITIES IF THE NATIONAL POLICY WERE TO RECOVER IT MUCH MORE RAPIDLY FROM UNCONVENTIONAL SOURCES

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. KEMP. Mr. Speaker, later this this month the National Geographic Society, one of the top scientific research organizations in this country, will release a 15-month study on natural gas and the search for additional supplies of it. Prepared under the direction of Bryan Hodgson, of the society's senior editorial staff, this report is scheduled for release between October 15 and 17.

Unfortunately, that is next week, which means after the House vote on the so-called nautral gas "compromise" bill. Thus, if that timetable is adhered to, the study's findings will have no impact upon the decision we reach. I am therefore entering into our proceedings today excerpts from an advance copy of that study.

In my opinion, this study shows that the emphases in the natural gas compromise and the administration's policy goals reflected in that compromise are misdirected by being insufficient. While the compromise bill takes two steps in the right direction—putting somewhat more emphasis than in the past on development of unconventional sources and providing for more rapid deregulation of natural gas stripper well gas—it does not go far enough. By continuing the heavy and confusing layers of regulation of natural gas far into the future, calling into question whether there really ever will be deregulation, the compromise denies the industry, particulary the independent producers, the incentives needed to develop these unconventional sources rapidly enough to lessen American dependence on imported oil imported liquefied natural gas, Artic gas, Mexican gas, and very expensive gas from coal gasification.

Nearly 3 years ago, three of us in the House—JACK MURTHA, of Pennsylvania, BOB MOLLOHAN, of West Virginia, and I—drew up an amendment to be offered the natural gas legislation then under consideration. That amendment would have provided for immediate deregulation of natural gas stripper wells. That amendment was not offered because it was interdicted by a substitute which took the entire debate off in another direction. But it was reintroduced this Congress by BILL MOORHEAD of Pennsylvania, and myself, and won the support of nearly 70 of our colleagues. It is now in the compromise bill.

At the same time we were drawing up that amendment 3 years ago, we were pushing for adequate ERDA funding for exploring improved techniques for recovering unconventional sources. About 40 of us on the House side appealed to the Senate subcommittee handling the question, and with the support of the Senate's majority leader, ROBERT BYRD of West Virginia, we won that funding. The natural gas compromise puts additional weight behind Congress intent to recover more natural gas from these unconventional sources, but it does not go far enough.

The reason unconventional sources are so important—and the reason the compromise bill should have done more to assure their development—rests in how much more natural gas could be made available. It would, in short, take care of our natural gas shortfall.

Geopressure zones are found in Texas and Louisiana, but deep basins and western tight sands encompass 22 States, mostly in the Rocky Mountain area. Coal seam gas is found in those Rockies and in the Appalachian region. Devonian shale gas is found in 13 States. Methane hydrates are located offshore and in Alaska.

Development of unconventional gas reduces the dependency of the country to natural gas which comes almost exclusively now from the four States in the Southwest. There are 26 States who have unconventional sources which have been—and will continue to be—disadvantaged by regulation of unconventional gas and of stripper wells.

If we want to have enough gas to assure the uninterruption of jobs in months of shortages; to heat our businesses, homes, schools; to reduce dependence on imported fuels, a natural gas bill must provide for the restoration of the incentives necessary to assuring the most rapid development of unconventional sources. The compromise bill does not.

I have one other thing to say with respect to the administration's handling of the unconventional sources question. The Department of Energy has delayed—has been sitting on—a major study on unconventional gas for nearly 6 months. It could have been released at any point in that 6 months. Why wasn't it? Because the study shows that the volume of gas which could be recovered from unconventional sources is staggering, that it would take care of the shortfall. That position, of course, undercuts the administration's statements in seeking this natural gas bill that we are running out.

This is why, as a person says in the National Geographics Society article, "Natural gas? We could have it running out our ears."

Excerpts from that article follow:

NATURAL GAS: THE SEARCH GOES ON

(By Bryan Hodgson)

"Natural gas? We could have it running out our ears," says Dr. Paul Jones. " But first we've got to accept some new ideas about petroleum geology."

He stabs a finger at a map of the Texas-Louisiana coastal region, which is barely recognizable beneath a crazy-quilt pattern of subsurface contour lines.

"Those lines could lead us to more gas than we've ever dreamed of, enough for centuries," says Paul. "They mark the geopressure systems—150,000 square miles of porous shale and sandstone saturated with hot brine at abnormally high pressures. There's good scientific evidence that this brine could contain as much as 50,000 trillion cubic feet of gas. That's equal to 2,500 times our present yearly production."

As a hydrologist, Paul has spent thirty years—most of them with the U.S. Geological Survey—studying the critical role of underground water in the earth's geological history. Some of his ideas are still sheer heresy to many petroleum experts. But he is one of a growing band of scientists, engineers, and hard-nosed production men who reject the dire predictions that United States gas resources will soon be exhausted.

Instead, they want to rewrite the petroleum-geology textbooks to include six "unconventional" gas sources long dismissed as too difficult or too costly to exploit:

Geopressure zones. Interest is focused on the Gulf Coast region, but researchers have identified several other U.S. regions that also may contain significant resources.

Deep basins. Today drillers are finding unheralded quantities of gas at depths between 15,000 and 30,000 feet.

Western "tight sands." In the Rockies drillers have learned how to extract gas from concrete-hard sandstones estimated to contain some 800 trillion cubic feet (TCF).

Coal seams. An estimated 850 TCF of gas exists in the nation's coal seams at depths as great as 6,000 feet.

Devonian shales. More than 1,000 TCF is believed trapped in dense rock underlying 90,000 square miles of Appalachia.

Methane hydrates. At certain pressures and temperatures, methane and water form an icelike substance beneath permafrost and in

deep-ocean bottoms. Undetected in nature until the mid-1960's, hydrates may have captured enormous quantities of gas thought to have dissipated millennia ago.

"If we recover only a small percentage of this gas, we'd more than quadruple our present estimates of potential resources," says one government researcher. "But this is scarcely mentioned as a possibility in our energy plans."

The planners are turning to massive engineering projects for new gas supplies. Liquefied natural gas (LNG), chilled to minus 260°F and imported by tanker from Algeria or Indonesia, may cost five dollars per thousand cubic feet delivered to U.S. pipelines by 1985—more than double the controlled price of new domestic gas. The 4,800-mile Alaska gas pipeline also will require a five-dollar price, as would synthetic gas produced from coal in a series of proposed 1.6-billion-dollar plants backed by the government.

"But we could drill a thousand exploration wells for the cost of one coal-gas plant," says my government friend. "If we're wrong about unconventional resources, we'd soon find out. If we're right, we'd find huge new energy supplies in our own backyard—with a very good chance that they'd be cheaper than the alternatives, and reduce our dependency on imported fuels."

GOVERNMENT PROBES GEOPRESSURE ZONE

We're sweltering on a barge moored in Tigre Lagoon, deep in the humid coastal marsh of southern Louisiana. Dr. Wieland, a veteran petroleum engineer, is working on the U.S. Department of Energy's first geopressure test well, Edna Delcambre #1. It is producing as much as 10,000 barrels of water a day from a sandstone aquifer 12,600 feet below, where pressure is almost 11,000 pounds per square inch and the temperature is 240°F. The gas is collected by an elaborate manifold system, and the water is forced by its own pressure down another well bore for disposal 2,500 feet underground.

Major oil companies have made similar tests in utmost secrecy. But Edna Delcambre #1 is in the public domain. And the results are dramatic. Gas production is 150 percent higher than originally predicted.

"We expected 20 cubic feet per 42-gallon barrel of water," Dr. Wieland says. "But we're getting 50 cubic feet."

The new data delights Dr. Paul Jones, reinforcing theories he's held for years.

"We know that enormous quantities of gas are dissolved in geopressure waters. The reasons are complicated [illustration, page 647], but basically here's what happens:

"The amount varies with temperature, pressure, and salinity. Recent research indicates that water may dissolve as much as 1,000 cubic feet of gas per barrel at 30,000 feet. Near the 20,000-foot level, with lower pressures, its saturation capacity is about 100 cubic feet. Now, over geologic time, these waters have been forced upward. As they encounter lower pressures, gas comes out of solution in tiny bubbles. As more water passes through the pressure-drop zone, the number of bubbles increases. They move upward with the water. When they collect beneath geologic traps, free-gas reservoirs are formed. Today, many such reservoirs in the Gulf Coast geopressure zones are producing trillions of cubic feet a year.

"But the aquifers are vastly more extensive than the free-gas pockets. Virtually all the water is gas saturated. That is the gas we must learn to recover."

ROCK PORES HIDE TREASURE

Edna Delcambre No. 1 is changing all that. In November 1977, Dr. Philip Randolph of the Institute of Gas Technology in Chicago analyzed the well's behavior, and announced that the unexpectedly high production could be explained if only 6.5 percent of the rock's pore space, once thought to contain only water, actually was occupied by tiny trapped gas bubbles.

According to Dr. Randolph's theory, allowing water to rush upward through the well bore reduces the pressure; in turn, that allows the gas bubbles in the aquifer to expand, pop free of their traps, and join the water flow. If that phenomenon is true of geopressure acquires in general, he said, they could contain five times more gas than estimated for dissolved gas alone.

But he provides a hardheaded note:

"I'd urge at this point that we stop worrying about whether we have a thousand trillion or ten thousand trillion cubic feet of geopressure gas. We know there's a bunch! But only by drilling, by developing solid engineering data and lab research are we going to solve the gut issue: How much gas can we produce, and at what price?".

Some experts reject these theories.

"The best reason to drill geopressure test wells is to lay this thing to rest," says Charles Matthews, a consulting petroleum engineer for Shell Oil Company, citing its experience with geopressure aquifers broken in blocks too small for adequate water flow.

But recently Amoco Production Company reported a gas-to-water ratio 140 percent higher than anticipated from normally pressured shallow brine wells in Oklahoma. As for geopressure: "We think it's close to flying on solution gas alone, given continuity of reservoirs," says Michael Waller, the company's vice president for research.

And in 1977 a 20,000-foot well near Baton Rouge, Louisiana, produced as much as 496 cubic feet per barrel—five times the dissolved-gas ratio. Later, a nearby Chevron U.S.A. well blew out while probing at 21,346 feet (above). Before killing the blowout, Chevron initially measured an incredible daily production of 142 million cubic feet, and sold 3.6 billion cubic feet—a year's supply for 31,000 homes—to recoup in 29 days the well's five-million-dollar drilling cost.

DRILLERS GO EVER DEEPER

New ideas are an old story to Robert A. Hefner III.

"We expect to discover gas between 24,000 and 28,000 feet. We're shooting for man's deepest penetration of the earth."

Therein lies another untapped major source of natural gas: deep basins.

Bob Hefner made his predictions stick. His company has drilled more than thirty successful deep wells in western Oklahoma's Anadarko Basin and participated in many others, two of them below 30,000 feet.

Now he's ready for more.

"We think we'll find between 70 and 360 trillion cubic feet of gas in the Anadarko between 15,000 and 40,000 feet," he says. "We're as sure as 150 million dollars in research and exploration can make us. We're even predicting gas production below 50,000 feet, with better technology."

The Anadarko is already one of the nation's most productive basins, with conventional reserves of 130 TCF—more than that of the Gulf Coast States.

"But this basin has 22,000 cubic *miles* of sediments below 15,000 feet—and only one percent of it has ever been touched by a drill," Bob Hefner says.

Bob classifies his new success as a "super well," one whose production exceeds the energy of one million barrels of oil a year.

"Just 165 wells like that will produce more energy each year than the Tennessee Valley Authority's system and the U:S. nuclear-power industry *combined!*

"They're not just gas wells. They're national energy institutions."

Recently a committee of independent gas producers from around the country echoed Bob's feelings about deep exploration. Gas may lie as deep as 30,000 feet in the Appalachian Basin, they said. Other promising areas include the Arkoma Basin in Oklahoma and Arkansas, the Mississippi Embayment in the South, and the Delaware Basin in Texas, already boasting more than 70 super wells.

"If you doubt their judgment, just remember that the nation's 5,000 independent operators made 90 percent of the onshore oil- and gas-field discoveries in 1976–77—and they drilled more than 50 percent of the deep wells," Bob says.

Meanwhile, there's the Anadarko—and a new set of predictions.

"We want to organize a 12-year program to drill 5,000 deep wells. We predict production of a trillion cubic feet by 1982, four trillion by 1991, with more reserves discovered as we go. That'll cost about 16 billion dollars. At today's higher gas prices, I think we'll be able to smoke out the investors."

COAL HIDES CLEANER FUEL

"Digging isn't the only way to get energy from coal," says Harvey Price. "By drilling into seams for methane, we think production could reach a trillion cubic feet a year by 1985, the equivalent of 40 million tons of coal—with no environmental problems."

"This isn't potential gas—it's here today," says Price.

Resource estimates are huge—850 trillion cubic feet, according to a 1977 Federal Power Commission study. "We think it's closer to 1,000 trillion," Price says. "They left out several basins."

Coal-seam methane is nothing new. Miners have feared and fought it for years, and thousands have died in methane-triggered explosions. In 1964 the U.S. Bureau of Mines began a research program designed to remove the deadly hazard and cut ventilation costs by drilling into coal seams before they were mined.

"We've produced more than two billion cubic feet since 1972 in just one West Virginia seam," says Maurice Deul, who started the project. "And just last year a small horizontal borehole produced between 60 and 70 million cubic feet from a Utah seam. We're planning a full-scale program there."

EYE IN SPACE AIDS SHALE PROBE

"But it's hard to get," says Dick McClish, an energy specialist for Ohio's Department of Energy. "We're looking for help from out in space."

He unrolls a large map overlay covered with lines like scattered dry spaghetti.

"This is Ohio's share of the Devonian sediments. The lines are surface faults, plotted from satellite pictures. We think they'll lead us to underground fault systems where shale-gas production is best."

Devonian shale contains an estimated 1,000 trillion cubic feet of gas beneath 90,000 square miles of seven Appalachian states. Ten percent of the gas can be recovered by modern methods, according to the U.S. Department of Energy's Technology Center in Morgantown, West Virginia.

Shale gave birth to the U.S. gas industry in 1821, when the first well was sunk at Fredonia, New York. It produced only a few thousand cubic feet a day for 35 years. Low productivity and long life are typical of Appalachia's 10,000 shale wells. But the Big Sandy field of eastern Kentucky has produced three trillion cubic feet since 1914.

"We'd like to find some more fields like that," says Dick McClish. "The space survey has given us some promising sites. The state is putting up 1.3 million dollars for drilling in Ohio this year, and private investors another 1.7 million. They'll get the gas—and we'll get the most sophisticated Ohio Devonian core sampling ever. A real challenge—and every 5,600 cubic feet of gas means one less barrel of oil imported."

Shale isn't the only gas "play" these days in Appalachia. Recently, with state help, a private firm probed unexplored strata. The well tested at 1.6 million cubic feet a day—phenomenal for Ohio. In central Pennsylva-

nia, an Amoco well tested at 20 million cubic feet daily from a previously unexplored basin. In West Virginia, Consolidated Gas Supply Corporation drilled into a shallow formation near Clarksburg and reported 7.5 million cubic feet a day.

"We don't really know what we've got in Appalachia," says J. Pasini III, a senior engineer at the Morgantown Energy Technology Center. "The big companies pulled out years ago, and there's been almost no real exploration for fifty years. They're starting to come back now—and not just for fun." ○

BERNIE SISK

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 10, 1978

● Mr. JOHNSON of California. Mr. Speaker, BERNIE SISK will be leaving Congress at the end of this session of Congress. As a California colleague of his, I am especially sorry to see him go. BERNIE has been a good friend and adviser to me since I came to Congress.

BERNIE has made significant contributions to the legislation passed by Congress during his tenure here. He has easily gained the confidence and friendship of his colleagues and is well known as a hard worker and a Member who knows his subject.

For many years BERNIE served as a distinguished member of the House Agriculture Committee. He comes from an agricultural area of the Golden State and had a significant background in agriculture prior to coming to Congress. He understands the problems of farmers and their associates in related fields. He worked diligently and successfully in their behalf throughout his service in the House. On numerous occasions, BERNIE'S predictions and suggestions have borne out his remarkable expertise in this field.

BERNIE later moved to the House Rules Committee where his legislative skills and abilities showed new effectiveness. He continued to maintain his interest in agricultural matters and often helped to shepherd agricultural bills through the Rules Committee.

My association with BERNIE are primarily on matters of concern to the State of California. Because we have districts of similar nature, there were often matters on which we worked together. BERNIE worked tirelessly for the wise use of our natural resources and was a strong supporter of water projects throughout our State. Implementation of the Central Valley project in California has been a major objective of his throughout his years in the House, and it was through his efforts and those of others in the delegation that we were able to accomplish much in this direction.

As BERNIE and his wife, Rita, prepare to leave the Halls of Congress, I want them to know that they can leave with great pride. BERNIE has been an effective legislator and an outstanding Representative of his people. Albra and I are going to miss them and want to share with them our very best wishes for continued health and happiness in the years ahead.●

STUDY REVEALS WIDE PBB RETENTION IN MICHIGAN

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. RUPPE. Mr. Speaker, it is not often that a newspaper article is of such interest that the Washington Post reprints it from the Wall Street Journal and the Washington Star chooses to reprint a similar article from the New York Times. But that happens to be an indication of the significance of the PBB chemical contamination problem in the State of Michigan. Eight million citizens of the State have the terribly dubious distinction of carrying PBB's in their bodies, the long-term effects of which are undetermined.

One of the most difficult aspects of the PBB contamination outside of the direct threat to human health is the economic disaster which it has imposed on many Michigan farmers. While insurance settlements and court imposed payments have reimbursed many farmers for their losses from PBB contamination of livestock and the use of their lands, others have not yet been indemnified while their cases proceed glacially through the courts. Many of those individuals are in disastrous economic straits. They have lost their means of livelihood through absolutely no fault of their own, and while the State of Michigan has established a modest program of loan assistance, it in no way makes them economically "whole" during this period when the courts are determining just compensation.

Along with other members of the Michigan delegation I have tried very hard for the past 2 years to gain sufficient support in the House for the establishment of a Federal program of financial assistance to those hard-pressed individuals. We have been unsuccessful. The Senate saw fit to pass such legislation, last year, but we have been unable to convince the Interstate and Foreign Commerce Committee of the need in the House.

As of this moment the House will not take up legislation amending the Toxic Substances Control Act this year even though a bill to do so has been reported from committee and was on the calendar last week. Unfortunately, the bill, H.R. 12441, did not reach the floor. I have today written to the Speaker imploring him to bring this legislation before the House so that at least in conference there would be an opportunity to agree to language which would help to relieve at least some part of the suffering of those who are the innocent victims of this toxic substance disaster.

Mr. Speaker, I insert the Washington Post article in its entirety so that the Congress will be aware of the extent of our disaster in Michigan:

STUDY REVEALS WIDE PBB RETENTION IN MICHIGAN

(By Gail Bronson)

Investigators have determined that 8 million of Michigan's 9.1 million residents are carrying in their bodies toxic chemicals that have caused deaths in cattle and liver cancer in rats.

The chemicals, polybrominated biphenyls, or PBBs, are flame retardants until used recently by the plastics industry. They accidentally were put in cattle feed in 1973 and 1974, resulting in contaminated meat and milk. What at first appeared to be a local health hazard for farm workers and plant production workers now is recognized as a statewide disaster.

The study confirms scientists worst fears that PBB are widely disseminated throughout the state's population and are likely to be retained in their bodies forever. These conclusions are based on tests of mothers' milk in 1976 that showed PBB residues, and on those findings, extrapolations for the entire state population were made.

Earlier this year, Dr. Irving Selikoff of the Mount Sinai School of Medicine tested blood and fat tissue samples from men and women. He found 98 percent of the samples contained PBB, at a lower detectable level than was technologically possible at the time of the mothers' milk study, Selikoff said his findings corroborate the conclusions drawn on the breast milk study evidence.

Although no level of toxicity or safety for humans is known in terms of contamination, PBBs had a devastating effect on the cattle herds that ingested the chemical. Physicians are concerned about how contamination of the food chain may injure people's health in the future.

"If the women are representative of the population, and there is no reason to believe that PBBs were sex discriminatory in their dissemination process, then most of Michigan's population is carrying PBBs," says Dr. Lawrence B. Brilliant, professor of epidemiology at the University of Michigan and lead author of the study reported in the current issue of The Lancet.

"The chemical has gotten all through the food chain," says Dr. Philip J. Landrigan, of the bureau of epidemiology at the Center for Disease Control in Atlanta, "and although it went through like a comet with a long tail, meaning little recontamination will occur, these people will probably carry PBBs with them the rest of their lives."

Human exposures to PBBs initially were thought to be limited to workers in the production process of the chemicals and to farm workers who consumed contaminated produce. An estimated 10,000 to 12,500 persons lived on the contaminated farms.

This belief was based on the manner in which the stock became contaminated. In 1973 and 1974, as the result of a packaging and shipping error, several hundred pounds of PBBs were substituted for magnesium oxide, a dairy-cattle nutritional supplement, and distributed in cattle feed throughout Michigan. In exposed cattle, it caused an often fatal syndrome—anorexia, weight loss, decreased milk production and increased miscarriages.

In June 1976, during an unrelated survey for pesticide residues, the laboratory of the Michigan Department of Public Health discovered that milk from four mothers who weren't from the affected farms contained PBBs. As a result, the health department decided to further document the extent of breast milk contamination. Breast milk was chosen over other tissues for study because it is 4 percent fat, and PBBs are fat soluble.

Samples from 53 mothers who gave birth in August 1976 showed that 51, or 96 percent, contained detectable PBBs, ranging between 0.05 parts of the chemical in a million parts of milk to one part PBB per million parts of milk. Because there isn't any conclusive data on toxicity in humans, scientists can't knowledgeably advise mothers about the relative risk and benefits of breast-feeding at various PBB levels.

"As a pediatrician, I'm concerned about the implications of these findings for children," Dr. Landrigan said. "Breast-feeding is

considered a good psychological factor for children, so we want to be careful not to declare a ban on breast-feeding in Michigan." He observes that concomitantly there is a potential risk to the children who receive this milk depending on what is discovered about the chemical's human toxicity in the future.

The only way that these affected women can excrete the chemical is through lactation, the secretion of milk. There is no known way of excreting the substance from the male body.

Dr. Brilliant said the University of Michigan's School of Public Health is investigating ways to remove PBBs from humans. Furthermore, the U.S. Public Health Service has initiated a 20-year follow-up study using a 4,500 case sample of the affected Michigan population as well as a control population of 2,000 from Iowa to track these people's health. Landrigan said they have found symptoms of fatigue, decreased muscle strength and sleep problems that don't seem to relate to body levels of PBBs and aren't being corroborated by physical examinations.

Dr. Landrigan said it originally was assumed that farm people were only affected as a result of consuming their own produce. What's devastating is the finding that some milk, contaminated with small amounts of PBBs, mixed with milk from uncontaminated dairy cows and marketed at grocery stores across the state, still contained high levels of PBBs.●

ENFORCEMENT OF HEW ABORTION REGULATIONS

HON. GARY A. MYERS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. GARY A. MYERS. Mr. Speaker, as you know, abortion compromise language for the Labor/HEW appropriations measure is still unsettled for this year. In light of the ongoing controversy surrounding Federal participation in abortion funding, I would like to insert in the RECORD information I received from HEW in response to several concerns I voiced over the possibilities of abusing Federal funds to pay for abortions outside the congressional mandate. I feel this response may provide additional insight into the enforcement of the current regulations governing the use of Federal funds for abortions.

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., August 11, 1978.

Hon. GARY A. MYERS,
House of Representatives
Washington, D.C.

DEAR MR. MYERS: This is in response to your letter to me of July 18, which raises several questions regarding the Department's enforcement of its regulations governing the Federal funding of abortions.

First, your letter asks for our comments on the change in the number of cases of rape or incest that will be reported during the first year of these regulations. The Department will not collect statistics on the overall number of rape and incest reports. We do not have any need to know those figures since section 101 of Public Law 95-205 only governs those abortions which are Federally funded. However, an Action Transmittal, which forwarded the regulations to the States and established guidelines, requires States to submit on a quarterly basis the number of abortions for which they have claimed Federal reimbursement under the Medicaid program for each of the three categories for which such reimbursement is available, including those claimed under the rape and incest exception, and the total expenditures for those abortions. These data will enable the Department to monitor the number of abortions being reimbursed with Federal funds.

Second, your letter asks whether there will be an effort to recognize fraudulent reports of rape or incest. Although the primary responsibility for detection of fraud in these instances must rest upon State and local agencies, the Department is making vigorous efforts to ensure that Federal funds are being properly spent. Thus, in addition to its regular review of State claims, the Department is performing an intensive audit in a selected number of States which we anticipate will claim Federal funds for the vast preponderance of abortions to ensure that these States are seeking those funds only for abortions which are reimbursable under the regulations. Any indications of fraud which are detected through these audits will certainly be referred to the proper authorities for investigation and prosecution.

Third, your letter asks what the penalty will be for fraud. That would be dependent upon the statute under which the crime was prosecuted. However, it should be noted that section 1909(a) of the Social Security Act provides for penalties of up to $25,000 in fines and five years imprisonment.

Finally, your letter requests our comments on the number of Federally funded abortions provided under the regulations after they have been in effect for a year. The quarterly submissions required by the Action Transmittal will provide those data for abortions funded under the Medicaid program.

I want to thank you for expressing your continuing interest in this important issue and assure you that the Department will follow the statutory dictate in section 101 of Public Law 95-205 "to ensure that the provisions of this section are rigorously enforced."

Very truly yours,

RICHARD I. BEATTIE,
Deputy General Counsel.●

MICHIGAN GOV. WILLIAM MILLIKEN SUPPORTS NATIONAL ENERGY BILL

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. DINGELL. Mr. Speaker, pursuant to permission previously granted, I am pleased to have this opportunity to insert in the CONGRESSIONAL RECORD the letter of support I received from the Honorable William G. Milliken, Governor of the State of Michigan, for H.R. 8444, the national energy bill:

OCTOBER 3, 1978.

Hon. JOHN DINGELL,
Rayburn House Office Building,
Washington, D.C.

DEAR JOHN: I am writing to urge your support for H.R. 8444, the National Energy Policy Compromise Bill, when it comes before you on the floor of the House during the next few weeks.

I recognize the complex and controversial nature of the bill. I commend you for your efforts to reach an understanding of the issues. At the same time I cannot ignore the critical need Michigan and the rest of the country have for a federal energy policy. It is imperative that this need be met without further delay.

The problems of energy dependence and waste, as well as those of inflation, demand our action. Action which emphasizes the efforts of Congress to help provide this nation with an energy policy is in the best interest of all. Through passage of this measure, the development of new sources of energy will be facilitated and energy conservation will be encouraged. By supporting H.R. 8444, you will be taking a significant step toward ensuring the nation and the world of our commitment to expeditious treatment of our energy deficiencies, and to the ultimate implementation of a comprehensive national energy program.

Warm personal regards.

Sincerely,

WILLIAM G. MILLIKEN,
Governor.●

ELECTION YEAR GRANDSTANDING

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. LAFALCE. Mr. Speaker, the House voted today to instruct House conferees to concur in a Senate amendment to the Revenue Act which promises massive tax cuts with a whole series of "ifs," "ands," and "buts" attached. The Buffalo Evening News, in an editorial in its October 11 edition, superbly analyzed the other body's adoption of this amendment, which is, quite simply, the worst kind of political gimmickry.

The editorial follows:

SENATE FINESSES THE TAX REVOLT

At first glance one might think the Senate had been lassoed by the taxpayer revolt. But we'd be more impressed by its plan to slice federal taxes 25 percent over four years if that plan didn't so closely resemble election-year grandstanding.

True, the Senate did vote 65-30 to provide a gradual 25 percent tax cut over four years, beginning in 1980. But there were two preconditions: first, the federal spending pace be slowed to no more than 1 percent above the rate of inflation; second, federal outlays must decline to 19 percent of gross national product in 1983 from the current 22 percent share.

What gobbledygook, you might say. Here is a purported tax cut—from which no taxpayer can expect to draw any benefit until some iffy point safely in the future. Even the required spending squeeze can be put off for a while—certainly until well after this year's election. And if the sentiment among senators should change? Well, they didn't promise you a tax cut unless they were able to cut spending too, so what if neither one materializes?

We certainly don't object to the concept of linking lower taxes to lower future spending. But if the Senate were really serious, it could just as easily have required the spending cutbacks to begin immediately, tying them to a straightforward system of indexing the income-tax structure to wipe out the automatic tax-raising effect of inflation. Or, for that matter, it could have linked spending reductions to the Kemp-Roth program, which would pare tax rates permanently by 30 percent over three years.

But the Senate rejected the Kemp-Roth approach and put off all the goodies in its alternative plan into the 1980s. So given the political realities of Congress as well as future economic uncertainties, we would not advise any taxpayer to hold his breath while waiting for this kind of income tax cut. Even if the Senate has been lassoed by the taxpayer revolt, it has made sure that the rope has a slip-knot.●

TAXPAYERS FOOT THE BILL FOR WEST VIRGINIA CAMPAIGN

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. FRENZEL. Mr. Speaker, on October 7, President Carter flew to West Virginia. In the words of Washington Post writer Edward Walsh:

. . . The underlying purpose was clearly to help the struggling campaign of the 76 year old Senator (Jennings Randolph).

Mary McGrory, writing in the Washington Star of October 10, said:

Carter had come to West Virginia to protect Randolph against the rains of the ferocious campaign of Republican Arch Moore, Jr. . . .

In the opinion of these writers, and in my own, the purpose, and the result, of the trip was wholly political. But White House officials have insisted that the appearance was "nonpolitical." Therefore, absent some official complaint, the taxpayers of the United States will have to foot the bill for the full cost of this political junket.

Not only did the President shower compliments on Senator RANDOLPH, who had opposed Carter on his two most important legislative actions, but also former Governor Moore was not even invited to the event.

The President will visit nearly one-third of the States this month campaigning for Democratic congressional candidates. He will visit my State. His Vice President has been doing the same thing for months.

Nobody minds those junkets. Some of us even think he is a positive influence for Republicans. But nobody believes those trips are nonpolitical. No taxpayers want to pay for political junkets.

It is not as though the people were just being stuck for the cost of a seat on an airplane. When the President travels, of necessity he must travel in his own plane, with hordes of camp followers, platoons of Secret Service people, and as much of the White House press corps as can squeeze in. That is expensive.

I do not know if the cost should be charged directly to Senator RANDOLPH's committee, or the Democratic National Committee for apportionment to the Randolph committee. But I do know that it should not be charged to the people.

The newspaper articles, quoted herein, follow:

[From the Washington Star, Oct. 10, 1978]

CARTER'S CAMPAIGNING PUTS THE SHINE ON A GLOOMY WEST VIRGINIA DAY

(By Mary McGrory)

ELKINS, W. VA.—To see Jimmy Carter in Elkins (pop. 4,000) was to understand how he got elected president—and can be again.

The scene was one of almost unrelieved desolation. The temperature stood at a bone-gnawing 41 degrees, a chill rain began to fall, as if on signal, as the presidential helicopter put down. The Elkins High School majorettes were blue of knee and nose. The Queen of the West Virginia Mountain State Forest Festival gathered her sodden forest green velvet gown around her; one of her smaller ladies in waiting had donned a hunting cap and a wool jersey shirt against the weather.

The notables, Gov. Jay Rockefeller and his wife Sharon, and Rep. Harley Staggers, were huddled under umbrellas. Carter himself held an umbrella over Sen. Jennings Randolph, the plump and anxious incumbent. It was an appropriate symbol of the visit. Carter had come to West Virginia to protect Randolph against the rains of the ferocious campaign of Republican Arch Moore, Jr., who was twice elected governor of this Democratic state, where pictures of Franklin D. Roosevelt and John F. Kennedy hang on the walls of miners' shacks.

Not every president would have interrupted a weekend rest at Camp David to campaign for a man who opposed him on his two most important legislative actions, the Panama Canal treaties and the veto of the public works bill.

Last April, Randolph, despite a record of party regularity that goes back to New Deal days, voted against both treaties. He gave the reason without any pretense. "Arch Moore," he said, in effect.

Panama, in "super-patriotic" West Virginia, is still an emotional issue. And Moore is still trying to use it—charging Randolph with being a closet supporter of the "giveaway," one who was prepared to give his vote had it been urgently needed.

Fifty-five-year-old Moore calls the 76-year-old Randolph "a nice old man" who cannot give West Virginia vigorous representation in Washington.

Carter did everything in his power to counter Moore. Even though the excursion had been billed as "non-political"—meaning that Randolph will not have to pick up the tab—and the president's airport arrival remarks were scheduled to be of the briefest and most cursory nature, the president let himself go in depicting Randolph as a pioneer and a prophet of such calibre as to make West Virginians seem demented if they didn't re-elect him.

"I work with him every day," he said. "I know of no more dedicated spokesman for the things you and I stand for."

Randolph has been, despite what Moore says, exceptionally diligent in bringing benefits to his poor home state. But this brought him in conflict with Carter on the public works veto, a significant Carter anti-inflationary coup, which Randolph and West Virginia's other senator, Majority Leader Robert C. Byrd, had most vehemently opposed.

Gliding past uncomfortably contradictory material is something all politicians, especially Carter, always do. Since he had indulged in creative perjury by telling the drenched crowd that he could not think of "a more beautiful place to be than right here with you," he obviously saw no good reason not to go the distance for Randolph.

The trip was like hundreds Carter made during his campaign for the White House, when he went everywhere and plumped for anyone on the off-chance it would do him some good. The Democrats are bringing in "big timber" for Randolph. Vice-President Mondale and Secretary of State Vance are due. So, perhaps more to the point, is Sen. Edward Kennedy, who will hold health hearings, and Randolph's hand, later this month.

Carter has wanted to demonstrate that there is no "Carter drag" for Democratic campaigners. Since Camp David, it has been infinitely easier. While what happens in the Sinai Desert is not of immediate consequence in these low-income, high-unemployment hills, West Virginians are glad, like other Americans, to see their president looking presidential.

The 15-minute speech in the rain sounded like an out-of-town tryout for next time. Carter sounded the themes of yesterday—his goal of a government "as kind and competent as the people of West Virginia." He sounded what could be the themes of tomorrow; his successes as a president, working as one Democrat among many.

By the time he finished speaking, the rain had stopped. Something approaching sunshine was contending with the lowering gray clouds.

It was the epitome of Carter's campaign and presidency. Seize every opportunity, however unpromising, and hang in.

Immediately thereafter, the lesson was reinforced. White House transportation aide Robert Manning presented the president on his way to the First Limousine, to his eight-week-old grandson, a West Virginian named Joel Browning. Joel was squalling lustily. The president, undismayed, clucked and cooed and, sure enough, Joel's small countenance, like the skies, cleared, and the moral equivalent of a smile was produced.

The president and Randolph then strode at the head of a parade past thousands of hooded, blanketed, shivering West Virginians, who know all about adversity and were cordial to one public figure who overcame it and another who might.

[From the Washington Post, Oct. 8, 1978]

FORGETTING A PORK-BARREL PAST

(By Edward Walsh)

ELKINS, W. Va.—President Carter proved yesterday that a pork barrel need not come between political friends.

Take the case of Sen. Jennings Randolph (D-W. Va.). As the chairman of the Senate Public Works Committee, he is generally regarded as one of the leading pork-barrelers on Capitol Hill.

When the President Thursday vetoed the $10 billion public works appropriation bill, describing it as bloated with wasteful and unnecessary water projects, Randolph said he regretted the decision, which he blamed on "some extremely bad advice" that had been given to Carter.

But Randolph is also a Democrat facing a tough battle for a fourth full Senate term against former Republican governor Arch Moore.

So it was yesterday that differences over what constitutes pork-barrel appropriations were swept aside as Randolph and other West Virginia Democrats stood on the 50-yard line of the Elkins High School football field watching the president's helicopter approaching over the mountains from the east.

Carter flew here from Camp David, Md., to participate, as four presidents before him had, in the 42nd annual Mountain State Forest Festival Parade in Elkins, which is Randolph's home town. That was the event, but the underlying purpose was clearly to help the struggling campaign of the 76-year-old Democratic senator.

At the high school, coatless despite a cold drizzle, the president told the crowd that "no state has a more strong, vigorous, able or dedicated spokesman" than West Virginia has in Jennings Randolph.

Moore has been making Randolph's age an issue in the campaign. When Carter vetoed the public works bill, Moore noted Randolph's position as chairman of the Public Works Committee, and said that never before had seniority and a Senate chairmanship meant so little to a state.

The president also brought with him to Elkins an announcement of two federal grants for West Virginia—one of $14 million for a civic center in the state capital of Charleston, and the other a $4.7 million loan to a faucet company in Morgantown, where a large number of job layoffs have been threatened.

And from the high school, Carter, Randolph by his side at all times, assumed an honored position in the parade, riding in an open limousine and at times walking along the two-mile route as tens of thousands of enthusiastic spectators cheered and waved.

White House officials insisted that the

president's appearance here yesterday was nonpolitical, and therefore would be paid for by the government. "It is not a campaign trip," White House press secretary Jody Powell said last week.

Randolph also characterized the event as non-political, although he conceded that there could be some benefit in the president's appearance here for him. Asked why Moore, who is, after all, a former West Virginia governor, had not been invited to ride in the parade, one of the largest annual events in the state, Randolph replied with a laugh.

"Why, we don't have candidates in the parade, we just have public officials," he said.

The president's appearance here was his second in the last six months to help Randolph. West Virginia is among about 15 states the White House has targeted for personal appearances by Carter this fall to help Democrats involved in close races.

Carter has already been to North Carolina, South Carolina and Pennsylvania to help Democratic Senate candidates, and to Ohio to raise money for the state party, which this year is given a chance to defeat incumbent Republican Gov. James A. Rhodes.

In the next several weeks, the president plans to campaign for Harry Hughes, the Democratic gubernatorial candidate in Maryland, Gov. Ella T. Grasso in Connecticut and Sen. William D. Hathaway in Maine. He also has campaign appearances scheduled in Minnesota and Kansas.

White House officials say no final decisions have been made on which states Carter will appear in during the last week of the fall campaign, when the president is expected to be on the road for three or four days.●

ISAAC SHKOLNIK

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. MOFFETT. Mr. Speaker, as the Jews of the world celebrate their new year, I would like to call the attention of my colleagues to one Soviet Jew, Isaac Shkolnik, for whom there will be no celebration.

In 1972, Isaac applied for an exist visa to emigrate to Israel. He was subsequently arrested for this "anti-Soviet agitation," and was tried for "treason against the motherland." The Soviets also charged that he was spying for Israel.

Isaac was put into a mental institution before his trial, where an attempt was made to extract false testimony from him. His fellow workers were then threatened in an attempt to secure evidence against him.

During his trial, it was alleged that he had been collecting information for 15 years and was passing it along to foreign powers. Despite a total lack of evidence, Isaac was convicted and sentenced to 7 to 10 years at hard labor. Today, Isaac is in prison subsisting on the equivalent of a meager lunch each day. All this, because he wanted to go to Israel.

I write to Isaac on a regular basis because I believe that it may result in better treatment for him and may speed up his release.

I urge my fellow Members to adopt prisoners of conscience and to write to them regularly. It is not enough to speak of what we would like to do for these dissidents and what we would like to see done for them. Only when we take a personal interest in their welfare and show the Soviet authorities that someone in the free world cares what happens to them, will conditions change. Perhaps, if enough of us take an active role in this endeavor, Isaac and all the other Isaacs presently living under similar conditions will celebrate the next new year in Israel, where they will be able to live out their lives like other free human beings.●

WAR RESISTERS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. WEISS. Mr. Speaker, on September 4, 1978, a group of individuals associated with the War Resisters League recently staged simultaneous prodisarmament demonstrations in Moscow and Washington, D.C.

This courageous action merits the respect of Congress, whatever positions individual Members may espouse on the crucial issues of war and peace. I would like to call my colleagues' attention to the leaflet that was distributed by the War Resisters League members in Red Square in Moscow prior to their arrest.

This eloquent message to the Soviet people should also be carefully considered by all Americans.

DISARM NOW

BAN THE NEUTRON BOMB. NO NUCLEAR TESTS—EAST OR WEST. CUT MILITARY SPENDING—FUND HUMAN NEEDS

We are a group of Americans bringing a plea for nuclear disarmament to the Soviet Union in Red Square today even as others of our number are demonstrating for disarmament at this very moment at the White House in Washington, D.C. We have all been active in the disarmament movement in the United States. We were active in the movement against the war in Vietnam and many of us spent time in prison because of our resistance to that war. We are here and in Washington in order to stop the next war.

For thirty years your country and our country have talked of disarmament while stockpiling more and more weapons of mass destruction. Our governments have talked of peace while preparing for war. Our governments have spoken eloquently of developing the human potential and meeting human needs while wasting our nations' wealth in an insane arms race. And since World War II not a single weapon has been eliminated as a result of our governments' failure to act. In a world bristling with nuclear weapons the stakes are too high, the situation too urgent for us to be content with promises and platitudes.

We are members of the War Resisters League and believe all war to be a crime against humanity. In the past our members demonstrated and worked against British and American intervention when those governments sought to overthrow the Soviet Union by aiding the White Army counterrevolution. Current members of our Executive Committee came to the Soviet Union in the 1930s to help build a peaceful Soviet Union by working in the steel mills and other heavy industry. It is in this spirit that we come now to urge the Soviet Union to lead the world to peace. We understand all-too-well the passion for peace that inspires Soviet citizens since twenty million of your husbands and wives, parents and children, friends and neighbors perished in the Second World War.

We realize that our main emphasis as Americans must be on the United States, which initiated the nuclear arms race and is the only nation ever to unleash nuclear weaponry on fellow human beings. However your government must also share the burden for the arms race that threatens to destroy us all—American citizens as well as your own people—unless it is reversed. We urge the governments of the Union of Soviet Socialist Republics and the United States of America to take immediate steps to end all testing of nuclear weapons and to substantially reduce their respective nuclear arsenals. We further urge that the funds saved by these bold initiatives be applied to meet pressing human needs within their own borders as well as aid economic development in the Third World. We support the international movement to ban the neutron bomb and nuclear power plants that produce lethal nuclear wastes which remain poisonous for tens of thousands of years. We call upon the peoples of the Soviet Union and the United States to consider the folly of nuclear armaments and to pressure their respective governments to move ahead immediately with bold initiatives toward the goal of a peaceful nuclear-free world.

We are not utopians. Rather we are realists who believe that the elimination of the nuclear threat and the scourge of war can come only when we citizens—Soviets and Americans—resolve not to rest until our respective governments take immediate initiatives toward disarmament.

When we return to the United States we will continue our work for disarmament. We urge the people of the Soviet Union who have suffered so much from war, to work to pressure your government to lead the world into a new era of peace.

Y. YEVTUSHENKO

(To M. Bernes)

Do the Russians want war?
Ask the silence above the pastures and fields;
Ask the birches, the poplars.
Go ask the soldiers who now lie under those
birches, and their sons will tell you
whether Russians want war.
Not only for their country did the soldiers
die in that war;
They died so that the world over people could
sleep in peace.
To the rustling of leaves and placards
You sleep, New York, you sleep, Paris.
Let your dreams tell you whether the Russians want war.
Yes, we know how to wage war,
But we don't want soldiers to fall again in
battle onto the sad earth.
Go ask the mothers; ask my wife.
And then surely you'll know whether Russians want war.

1961.

SEPTEMBER 4, 1978.●

TRIBUTE TO JOHN DENT

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. ROYBAL. Mr. Speaker, it is with pleasure that I rise now to add my words of tribute to those already spoken about JOHN DENT, Representative of Pennsylvania's 21st District. During his 20 years in Congress, JOHN has established himself as a hardworking Congressman and a champion of the workingman.

JOHN has taken the time to get to know the people and the problems of his district and has worked hard in Congress to do what he felt was right. His expertise in unemployment and workmen's compensation law, Fair Labor Standards, and coal mine safety and health legislation has proven particularly effective in his work on the House Education and Labor Committee. As chairman of the Subcommittee on Labor Standards, JOHN has combined his expert knowledge with his concern for working people, to bring forth major legislative advances.

Well over 40 years of his adult life have been devoted to serving the people of Pennsylvania and the Nation. He was first elected to the State House of Representatives in 1934, the State Senate in 1936, and the U.S. House of Representatives in 1958. He has distinguished himself as a dedicated public servant and may certainly take pride in his many contributions to our Nation's legislative history.

It has, indeed, been a privilege to know and work with JOHN and I am pleased to have this opportunity to add my words of praise for a friend and colleague, whose presence in Congress will be greatly missed.●

ROCKWOOD NATIONAL CENTER

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. STEERS. Mr. Speaker, since Girl Scouts of the United States of America is a congressionally chartered organization, I would like to call to my colleagues' attention the controversy which has grown up around the proposed sale of the national organization's Rockwood National Center in Montgomery County, Md., my district.

Thousands of girls from throughout the United States have been able to see and visit their Federal Government while staying at the Rockwood facility.

On Monday night, Dr. Gloria D. Scott, president of Girl Scouts of the United States of America and a volunteer like so many other women interested in the work of the Girl Scouts, came to Bethesda to meet with several hundred concerned residents of the area, including many Girl Scouts and Girl Scout leaders. Dr. Scott presented the national board's point of view and listened and took notes on the comments of Washington area people.

Although a congressional charter is not a license for Congress to meddle in the internal affairs of a private organization, I have sought information on the proposed sale for concerned area residents and I have encouraged the State of Maryland to assure that the will which brought the property to the Girl Scouts is not violated.

In my view, the objections developed by the Rescue Rockwood Committee, chaired by Barbara Lehmann, 11403 Rolling House Road, Rockville, MD. 20852, are compelling:

VIEWS OF THE RESCUE ROCKWOOD COMMITTEE

Lou Henry Hoover, wife of President Herbert Hoover and not only an active president of GSUSA from 1922–25 but honorary president during her White House years, directed that furniture from the summer White House at Camp Rapidan be used at Rockwood. That furniture is still there today. In honor of Mrs. Hoover's many contributions to Scouting the Lou Henry Hoover Room at Rockwood was dedicated as well as a 59 acre Memorial Forest and Wildlife Center at Rockwood. All of this would disappear with the closing of Rockwood.

Surely Rockwood holds as much historical significance as the Juliette Low National Center, which was only the birthplace of our founder and had no relationship to the organization of Scouting.

Concerning the Juliette Low National Center, Gordon McKay, controller for GSUSA, tells us "By reason of its historical significance to our organization, it is unique and cannot be regarded from the same economic and development approach as must the other three properties." We consider this statement to be true for Rockwood also.

As a program center Rockwood has served a dual function. It originated various programs which served the needs of Scouting such as the "Flairs" program, and also is used as a hostel-type facility for troops visiting Washington, D.C.

In regards to program, Rockwood has not yet realized its special potential as a close-in Nation's Capital-centered facility. Some of the suggestions which could only happen in the Washington, D.C. locality are listed below.

Opportunities to participate in the action of government: by visiting Congressional hearings, by attending House of Representatives and Senate sessions, by meeting Congressmen and discussing the issues of the day, and by serving as an intern.

Opportunities to participate in heritage studies from earliest settlements to space flight for many cultures; by exploring nearby historical sites and the Smithsonian's major museums.

Opportunities in career exploration in fields non-traditional for women, especially government careers. Law, medicine, and science are more readily available than in many parts of the country.

Art galleries and craftsmen's shops abound in the Nation's Capital, offering opportunities to study creative means of self-expression through art.

Opportunities for international studies and contacts, through embassies, the State Department, and the many agencies serving the international community.

Opportunities for high adventure abound because of Rockwood's unique location adjacent to the C&O Canal and Great Falls Park. The white water at Sherwin Island, the backpacking and hiking trail of the C&O Canal, and the cliffs at Carderock offer the best in canoeing, backpacking, climbing and rappelling all within walking distance. And within an hour's drive are several caves for spelunking.

As a hostel facility, Rockwood has been complimented for the excellent staff help and suggestions that have enhanced a troop's visit to the Nation's Capital. Having Girl Scout hospitality and a secure location were vital factors in producing a relaxed and congenial atmosphere. The girls themselves enjoyed meeting Scouts from other areas and exchanging new and exciting ideas with girls of varying backgrounds. A lone troop coming to Washington would miss this positive experience.

As active Washingtonians, we can assure you that no other property in the Washington area can duplicate the natural setting and close-in location to Washington, D.C. attractions.

One of the facts that bothers Scouts most is that the Board has had little contact with the individual Scout in making such a major decision as to sell Rockwood National Center. Councils were informed in May 1975 that the Board directed Rockwood to operate on an increasingly self-supporting basis during the following three years and that it was suggested that the site be closed unless a purpose and plan for its use had been developed and a financial support system established.

Since volunteers saw such a wide variety of program it was not within the scope of their imagination to doubt that GSUSA with all of their resources could not come up with a purpose and a plan.

In May 1977, Councils were again notified that the same standards that applied to Macy, applied to Rockwood. Only these two cryptic notices as to a possible closing were given. Apparently, Council Presidents did not feel the sale was being contemplated because the notice did not filter down to the Girl Scout membership. Thus we greeted the May 22, 1978 announcement with shocked disapproval. GSUSA asked the membership about closing Macy. Could not the same standard be applied to Rockwood? Had Scotus realized that such abrupt action would be taken, they would have raised their voices to prevent the loss.

Outstanding in everyone's mind is the fact that Washington, D.C. is a mecca for Girl Scouts because it is the Nation's Capital. Not having a national center here is an abrogation of responsibility. From all of the letters that have been written, one fact remains foremost—Scouts from across the country want to retain Rockwood as a National Program Center;—now—and as a heritage for girls yet to come.●

FEDERAL INTERMEDIATE CARE FACILITIES

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. HAMMERSCHMIDT. Mr. Speaker, I would like to take this opportunity to share with my colleagues a very interesting satirical article on Federal intermediate care facilities which was written by one who certainly knows the subject well.

David Ray, Jr., is presently serving as director of the Arkansas Department of Human Services, but his history in the field of mental health has encompassed service on the local, State, and Federal levels. From 1957 through 1964 he served as superintendent of the Arkansas Children's Colony, one of our finest and most effective institutions in the State. During the summer of 1963 David was consultant to the Special Assistant to the President for Mental Retardation and Human Development here in Washington, and during the next 2 years served as Director of Information for the Joseph P. Kennedy, Jr., Foundation.

In 1965 he returned to Washington to become the Executive Director of the President's Committee on Mental Retardation. From 1970 through October 1975 he served as assistant commissioner for the State of Tennessee Department of Mental Health and Mental Retardation in Nashville. For the past 3 years we have been fortunate to have

him in the Arkansas Department of Human Services.

I think that you will find that David's article brings home to all of us the burden which excessive Federal regulations put upon those persons who earnestly desire to provide the best possible training and care to the mentally retarded, and the importance of involving the individual States in setting standards for institutions which insure proper care without wasting the Federal tax dollar or reducing the effectiveness of the programs:

ICF SYNDROME

(By David B. Ray, Jr.)

The other night I had a dream—or maybe a nightmare. The year was 1966—Baltimore won the World Series in baseball—Bonanza was the top t.v. show—the mod looks for women was the mini skirts—the first artificial heart was successfully implanted in a 37 year old woman—Instant Freeze-dried Coffee was introduced—also in 1966, Walt Disney died—New York City had a 140 day newspaper strike—The Sound of Music was the Movie of the year, and the President's Committee on Mental Retardation was appointed by President Johnson—my dream or nightmare went something like this—

A long time ago, I can recall a time when people working in the field of mental retardation were more interested in the retarded person than with filling out paper forms. One can remember when it was not fashionable to talk about mentally retarded people; yet we saw in the 1960's the emergence of President John F. Kennedy who gave the cause "class." We went from the back pages in the news to the society pages and even page one. You know, from such public support, the leadership of many fine superintendents, and others working in the field of the mentally retarded, great strides were taken.

Community programs were begun; there was a happy and warm feeling between staff and between children and individuals who were residents at a facility. We saw work programs that were developed for on-the job training. We saw public information campaigns on behalf of the mentally retarded; we saw great strides in volunteer service. We saw facilities begin to take on a homey look. We saw states beginning to spend more money for their facilities (capital and operating) for State programs as well as local projects. We saw interest and support on the part of U.S. Congress for the great cause.

It was great in those days to walk through facilities stretching from Florida to Maine and from North Carolina to California. You could feel the warm feelings as you toured a mental retardation institution. Churches became interested; it was getting to the place that we were "accepting mentally retarded people as human beings." Superintendents were getting together on a regional and national level to share their experiences. Top professionals were interested in finding out better ways to work with mentally retarded people. Research was taking place that had realistic approaches in all aspects of training. Facilities such as the University Affiliated Facilities and Research Centers were beginning to move and develop in the field of mental retardation and human development. You know—just walking through those facilities and talking to superintendents, their staff, and the folks labeled retarded, was a warm and wonderful experience. There appeared to be a relaxed but yet progressive attitude; there were challenges; there were enthusiastic programs. There were even cross-overs where the psychologists didn't just worry about psychological services or medical people just about medical services or social workers just about social services; people were just working together and having a lot of fun doing it.

Recently I traveled back through some of these facilities and I found some terribly disturbing things. I found people up tight; I found staff worried and puzzled; I saw retarded people that appeared to also be concerned because they knew something was wrong. There was a nervous uncertainty about the future. There were disagreements and disputes taking place on state and national level. What became evident was that busily about something to do with mental retardation. I did not see much happening to the retarded people, but I saw a lot of writing and I saw a lot of charts being circulated around. I saw meetings where people were nervous; I saw doctors begin to be cautious and talk like a doctor; I saw psychologists become frightened and they talked like a scared psychologist; I saw social workers who almost forgot they were social workers.

Remember my dream started in 1966, and I saw hope, enthusiasm, creativity. Now, twelve years later, in 1978, it is depressing; freedom had been taken over by rules and regulations. Superintendents and staff supervisors were not operating the facilities I saw; they were operated by a dictatorship of rules and regulations. This was a great mystery to me.

I secured some national statistics and found that we were spending more money than ever for mentally retarded persons on the federal and state level. We were building new facilities; we were getting more staff; we were paying better salaries. We had more and more meetings; and through it all I saw people writing and writing and writing.

Where was the joy? Where was creativity? Worst of all, I saw concerns turn to fear in the eyes of the mentally retarded people. Brilliant people spoke out for the rights of the retarded but at the same time we became the slave of Federal mandates and regulations.

So I began the search for great people who had creative minds. We secured many medical doctors, psychologists, educators, social workers, other medical and nursing personnel, and we secured outstanding administrators from many walks of life. The best equipment that money could buy was used; the most sophisticated computers in the world were put to work on this problem. Huge rewards were offered to the individuals or group that could diagnose this "sickness" that was causing epidemics with staff and mentally retarded folks.

At last a computer network was developed that the world has never seen. It had the best technology of all the countries of the world tied together to solve the problem of what had happened during this past twelve year period.

The captain of the project said, "D-Day is approaching!" He said, "All of the computers have been programmed. We are now ready to ask our machines for a diagnosis." Thousands of people in this country who work with the mentally retarded were brought in to see this massive network of computer systems. People came from far away and from many lands.

The question was put to the huge network of computers. What has happened to mental retardation during the past twelve years? With five to six times more money—what went wrong? With beautiful facilities and with three times as many staff members—why is there such gloom and frustration? With more than adequate maintenance and operational budgets—what has happened? Where has the happiness gone? Where have the success stories gone? All of this data and more was fed into the computers.

There was a hush over the huge audience of thousands of people. The network of computers digested this information and made the appropriate amounts of burps and beeps. There was a dead silence in the massive room. And then flashing across the huge screen tied to the computers there appears on the screen Diagnosis—I.C.F. Regulations.

An emergency hurried conference among the great people was held and it was decided again to put this massive information into the huge computer complex. Again, the computer was asked what had happened. Once again the giant screen lit up with Diagnosis —I.C.F. Regulations.

People looked puzzled at one another and then in the midst of the huge silence a lonely superintendent of a mental retardation facility stood up. This man had been in charge of the residential program for many, many years and he said, "you know the joy and the fun and even part of the freedom for mentally retarded people began slowly to fade as we moved further and further in our quest for funds and our exposure to I.C.F. kept increasing, even though we knew the radiation levels were approaching dangerous stages."

The superintendent in a quiet but straightforward way continued, 'you know, things were great when we got support from President Kennedy; it was a coup when Congress became interested in problems of the mentally retarded. We were all pleased with the human rights of all people and particularly the handicapped. We were pleased when people in the states took more interest in our programs. It was super when we got some new buildings even though we did not have as much to say about the buildings as we would have liked. It was nice to have the extra staff, but on the other hand it didn't make sense to make our staffs into "robots." Certainly it was supported by those I.C.F. Federal "folks" because robots could not talk back.

For awhile it seemed terrific to have big fat written records of everything that happened to our residents. But about this time I began to notice at staff meetings when we were discussing a certain resident that my social worker or my nurse who used to know the individual personally said, "Well, you know, I haven't seen Johnny or Mary in seventeen months," and I would say, "why has it been seventeen months?" and she said, "well Doctor, I have been busy writing on these records," and when I asked if they had asked Johnny or Mary or one of our retarded kids what they really thought about all this, you know, they had never been asked."

This unusual superintendent continued, "I can remember one day that my educational director felt great and had a great big smile since his wife had just presented him a baby boy. In a typical staff party with jokes, pranks, and just cutting up it was decided to weigh the I.C.F. records of all the residents in this facility. These records weighed more than all of the people we served. (It should be noted here that a Federal grant was not applied for since the rumor was making the rounds that we wanted $2.00 per pound of records for a grant.)"

He continued, "I am not quite sure what that means, but it made me stop and think and while I was quietly thinking a vision came to me that the answer to what happened to our mentally retarded programs the last twelve years was due to the greatest and most frustrating epidemic that the U.S. had ever seen.

I then remembered seeing a super secret special hospital clinic that was attempting to cure the State and local people afflicted with a new virus that we know as I.C.F. I remember one ward that I visited and I saw four former superintendents of MR facilities who had been exposed with the dread I.C.F. syndrome. I saw several team leaders, many psychologists and social workers and nurses who were afflicted with this terrible syn-

drome. These poor people were practically out of their heads, not only with the fever but many of them were making odd sounds and some of these poor people took on baby traits.

Fortunately, in this ward one of the least sick staff members was an expert in behavior modification. You know this guy really got a program working. I don't know how he did it but he would walk into one of these wards where they had ex-superintendents bubbling at the mouth, others screaming, some beating their heads against the wall, and this brave psychologist would just walk in and say here comes the I.C.F. team. And all at once every one of these individuals would pick up their pencils and paper and start writing furiously. They would write and write and write. This would go on until the psychologist would yell—"the Feds have gone". Then all would return to their bizarre behavior.

We were fortunate that one of our superintendents was kin to a governor who in turn was exceedingly close to the big powers in Washington, D.C. This superintendent said he would get his Governor to get help from Congress. I will never forget the day when this superintendent called me and said, "you will never guess what happened," and I said, "well, what happened?" He said, "Congress just voted to set up a National Institute for the prevention of I.C.F." The excitement was contagious and we knew the cure would be forthcoming. It seems that a building was going to have to be erected to develop the research that would be needed for prevention of I.C.F. and a tremendous building was constructed at a cost of $300 million. This federal building was to be an Institute for Prevention of I.C.F., but the building did not meet I.C.F. regulations and furthermore the Federal people could not find how to get it certified.

All kinds of committee study groups, conferences, commissions, and task forces made studies and great volumes of reports were printed, but to no avail. Then very quietly and without much fanfare the Federal I.C.F. specialists took over this $300 million institute. The purpose was to train more I.C.F. specialists. Their mission was to help insure that I.C.F. would continue to expand its authority into all areas of government. The ultimate goal was for I.C.F. to take over the United States first and eventually the world.

The I.C.F. Institute became a deadly training center for I.C.F. regulation writers and I.C.F. Inspectors. It was even more super secret than the C.I.A. and the F.B.I. Medals were given to the person who could come up with the longest sentences and the biggest words at this center. A bonus was given if one could develop a new regulation and develop the written material in such a fashion that no one could understand it. Many times new regulations were added by playing games. For example one person would say a word, then the next person and on and on until at least 1,000 words were written on the blackboard. Then this new 1,000 word statement would become a new I.C.F. regulation.

One of the hardest workers in the Federal I.C.F. program, even though he is dreadfully sick with the I.C.F. disease, has found the time to write more of those beautiful and helpful standards than any other man or woman I know. He was asked recently the secret of his success. This very dedicated man indicated that he developed standards by a very unique method. First of all he rolls a pair of dice and whatever number appears that will be the number of words in the sentence. Two, he draws letters out of a hat and the first letter that he draws will be the first letter for the first word, the second letter for the second word and so on. Then he starts over again and finally completes a proper number of letters for each word with a proper number of words for the sentence. And you get some challenging, noble, and provocative regulations using this method!

Another thing: we were elated when the President of our country was interested and Congress was interested and our states were interested and the public was interested. But things began to fall in place when those HEW Feds got together at their secret meeting place. Somehow or another with no inoculations they all became very ill with I.C.F. fever. Anyway you know how the Feds hate to take the blame for anything; but several expert diagnosticians did indicate it was the I.C.F. syndrome. To make matters worse, this I.C.F. fever was also affecting the mental stability of many of our federal regulation writers. They began to have hallucinations. There is no question that they developed signs of schizophrenia. (However, some people said there was no change—the Feds are like that all the time).

But we all remembered they (the Feds) said write, write in the records, write on the walls; but on the other hand the Feds said work with the individual retarded person, and make their cottages home-like. On the other hand they (the Feds) said well go ahead and make it hospital construction. On one hand in their speeches, Washington Officials reminded us that retarded people were human beings and should be treated so. Yet when we try to make it home-like, they said you must have all of the hospital concepts even though it's not a hospital, but it was a little community of cottages. The Feds finally compromised and said make it like a vault—a completely fire proof vault.

"One Fed in a speech said that MR facilities should resemble a home—but on his tour all he could think of was where were our hospitals, clinics, etc. One Fed says be sure and have 37 fire exits in a cottage for 15. Another Fed said build it like your home, but be sure the corridors are eight feet wide. Too many windows—not enough windows; ceiling too high—ceiling too low; you need privacy—no you cannot have that quiet room."

By now my nightmare was getting progressively worse. The superintendent continued, "I can remember when several Federal and/or State teams would evaluate the quality of our program. It seems that most teams came down with I.C.F. disease. (We wish them well.) The I.C.F. Feds and Health Departments had fun in deciding which life and safety codes to use. Consequently, will it be in the 1965 code? 1967 code? 1973 code? 1976 code?, or some new code that the Feds dreamed up last night?

I thought to myself that I am imagining things, so I will travel for a few weeks and spend some time in Washington, D.C. and then go to every regional office of HEW; then I would have a clear and concise concept of I.C.F. got my Congressman to arrange me a visit to Washington; now you know he is a pretty powerful Senator. He got on the telephone and talked to the Secretary of HEW right away. The Secretary was very cordial but he said it would take him a little time. The Senator called back in a few days and the Secretary was exceeding cordial but said he was having a most difficult time find-out what I.C.F. meant and who was responsible in HEW. After threatening to hold up HEW's appropriation for the next year, we finally got with a group of individuals that appeared to be suffering from I.C.F. They indicated that they were feeling better as they had had several bureaucratic transfusions that day. They told us how I.C.F. regulations developed to make a better way of life for the mentally retarded people.

I have never been the bashful type, so I asked who they talked with to develop these I.C.F. concepts? Well this person told me that there had been some meetings that he attended and that is probably where they caught I.C.F. (We now know it was at the super secret I.C.F. Institute.) Now even though we were labeling it as a sickness, it was in truth good for the mentally retarded, so said our Feds. It's like apple pie, coca cola, and baseball."

This superintendent continued, "I asked, 'By the way, did you talk to any mentally retarded people about I.C.F. regulations? 'Well this very important bureaucrat said, 'Why certainly not! What in the world would a retarded person know about I.C.F.?' 'Well,' I said, 'you know if the I.C.F. is for the mentally retarded person, I just thought maybe you might have asked.' Well this guy just gave me a funny look."

I thought I would try again, and I said I wondered if he had made contact with some people like myself, some other superintendent that is running facilities for the mentally retarded; another very important looking bureaucrat spoke up and said; Certainly not! I mean, people that are running programs would be biased and short sighted; they could not give the type of objectivity that you need to have for I. C. F. regulations.

So I thought about it for just a second and I said, 'Well did you maybe talk to some parents of a retarded child?' And another bureaucrat spoke up and said, certainly not! They are too emotional! 'Well', I said, 'I wonder then who you might have sorta bounced these ideas off of?' And in unison they said 'Each other'."

My dream went on and the superintendent continued speaking, "there are six of you bureaucrats in here, so I wonder if you would be kind enough to give me your background before you got into this most important job. All six people looked really important then and were so pleased to be asked what their background was. One of the Feds said his dad was a great financial supporter of Senator B. B. Blank, and he got him this Civil Service job in Washington where he had a chance to serve the people, but his real interest was history. I was somewhat puzzled and I asked about the other backgrounds: one man said he used to repair t.v. sets; one woman was a holdover from the Hoover days still resisting retirement; one person said he was from the Defense Department because when he was assigned to I. C. F. it was his understanding it was a missile program. The other Fed said that she was an art major, and her talents were sought out from a unique standpoint because she was tremendous at drawing straight lines on questionnaires that need to be filled out for I. C. F. There was a silence and then the last person who was the captain of the team smiled very big and said, 'Well you thought we did not have experience, and just to top it off I want you to know I have a Ph.D.' And for just a second I had faint hope, and then I said, 'What is your Ph.D. in?' And he said, 'Egyptian Cryptology'."

Our spokesman and our senior superintendent continued, "I left Washington and made my rounds to all of the Regional Offices of HEW. I was received very warmly in every Regional Office. I met some outstanding people with excellent qualifications. One person used to run a goldfish hatchery; another staff member used to replace lightbulbs in those warning light poles on mountains; another person who had distinguished himself in his state before coming to serve his country as having painted more white lines on interstates than any other man in the country. At one Regional Office I was most fortunate to meet a veterinarian. There was one that used to write articles for the old 'Colliers' and 'Liberty magazines' many years ago. There was one person that had a musical background and indicated that she wanted to write a song about the blues and

I suggested that she might write a song titled 'Those I.C.F. Blues'.

"Well you know I went to all ten Regional Offices plus the great National HEW office and I looked at my notes when I got back home. I ended up with eleven different versions of I.C.F. rules and regulations. In most cases you could not even look at these notes and realize they were about the same subject."

This lonely superintendent became more bold as he stood before this great audience as he continued, "I don't know all the answers, but I know I believe in nice, good living conditions; I know I believe in understanding and well trained staff; and I feel strongly about research and prevention based on good progressive programs. I believe in bringing the innovation back to the people who are not afraid to try something different. I believe in building a home for the retarded, like a home for human beings, because they are human beings. I believe in all of our people having as much privacy as possible, but I also believe in the protection of those individuals that need constant supervision.

"You know I am just as concerned about my tax dollars as most people are. I am concerned because we are throwing away millions of dollars worth of costly construction and staffing that have no effect on the quality of care for retarded people. In fact it is sometimes a negative effect. I believe in getting many of our retarded citizens back to the community and back to things called group homes which should be more and more like a real home.

I would like to have the ability to say to these mighty computers, 'Computers—how can we bring back the joy, the stability, the simplicity, the human approach, understanding, the attitude that we are on the same team together? And then get an answer.

How can we bring about less writing and more attention to the person, not paper work but people work? How can we allow for the individuality for the creativity of fantastic staffs throughout the country? How can we ask the retarded person what he or she would like? Can we bring back the attitude of being efficient in our buildings and efficient in our staffing and programs? And soon you could have less people treated by the state. It can be done and it can save the taxpayers money. Unheard of! unheard of!"

My dream was coming to an end: This lonely superintendent continued. In a bold voice he asked these massive computers. "How can we cure the I. C. F. syndrome and bring back the joy of working with retarded folks?" There was silence. Then the computers buzzed and went bing, bing; more silence and then appeared on a screen in great big letters You Can Tell Those Feds What They Can Do With Those ICF Standards and Regulations—Recommend That They Be Stuffed One By One By One. There was a mighty roar from the group and the computer blew a fuse.

Much, much later as my dream ended, there was a sense of happiness, contentment and victory on the smiles of people that were retarded and people who worked with the retarded. In the want ads of our newspapers I couldn't help but notice some ads pertaining to people who were looking for work. One said he was the greatest white line highway painter in the country. Another said he was fantastic at raising goldfish. One wanted to change light bulbs on mountains. One person wanted something on historical stories both fiction and non-fiction. Last but not least the one who was an expert in Egyptian Cryptology indicated that he would consider a business manager's job for any place except a mental retardation program.

As I awoke I could hear in the background words and sounds of the most popular song of the day, "Oh, Those ICF Blues, Those ICF Blues."●

MARXIST SCRIPT TO NICARAGUAN DRAMA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. McDONALD. Mr. Speaker, the violence and destruction caused by the recent Marxist insurrection in Nicaragua is the most graphic example of the inevitable results of this administration's policy of withdrawing support from America's traditional allies and courting leftists. Should the Marxist-Leninist terrorist movement seize power in Nicaragua with U.S. acquiescence, we can expect the Soviet Union and Cuba to mount similar attempts against the governments of many other Latin American countries.

A highly perceptive article on the implications of the Nicaraguan conflict for the United States by commentator John J. Metzler appeared in the October 2 issue of the Manchester Union Leader which I sincerely recommend to my colleagues.

The article follows:

NICARAGUAN DRAMA BODES ILL FOR U.S.

(By John J. Metzler)

The brutal political-military drama being enacted in the small but strategic Central American republic of Nicaragua bodes poorly for the United States' hemispheric security.

The pro-American central government led by West Point graduate Somoza is fighting a desperate economic and military struggle organized by groups as disparate as businessmen and terrorists of the Marxist Sandino Liberation Front (FSLN). Named after an anti-American figure in the 1920's, FSLN has become Castro's Nicaraguan tool.

When FSLN terrorists seized Nicaragua's national palace in August, the group demanded prisoner releases and ransom money in exchange for the lives of nearly a thousand hostages. After gaining most of their demands, the group was cleverly flown to Panama first to allay many people's suspicion as to the FSNL's direction. Then many of the FSLN cadre soon flew to Havana for a hero's welcome.

Following the palace incident, Nicaragua has faced a general strike and increasing terrorist attacks on isolated cities. The attacks soon widened and engulfed most of the country's centers. Fears of all-out war in Central America surfaced when Cuba accused Israel of aiding Somoza, Venezuela and Panama sent aircraft to Costa Rica, and Costa Rica offered sanctuary to FSLN insurgents.

Somoza's reaction to the attacks was a systematic "city hopping" campaign—mopping up resistance in one center, then moving to the next trouble spot. According to humanitarian officials, the brutal fighting has cost thousands of lives.

Opposition to Somoza is nothing new, much of it centering on the family's four-decade rule in Nicaragua. The Somoza family has powerful business interests in the small nation as well. While much opposition rests on legitimate grounds, some of it would better be called subversion. For more than 17 years, the Cuban-backed FSLN has tried unsuccessfully to overthrow the government. After Somoza ended martial law in September 1977, honest libera's, opportunistic businessmen and the dedicated FSLN made loose arrangements to oppose his ru'e. While highly fragmented in all sectors, the opposition has joined in a kind of "provisional" government uniting all forces. Somoza's opposition has been encouraged by Washington's increasing distance from Somoza's ruling circle.

Twelve opposition leaders permitted to return to Nicaragua in July have framed an opposition manifesto. The Twelve, Los Doce, an organization close to FSLN had their plan published in the country's outspoken newspaper La Prensa. Among other things, the plan called for nationalizing key economic activity and for allowing the FSLN into the future government. Cuba has heartily endorsed the compromise Group of Twelve plan calling for a most certainly short-lived provisional regime.

Should anyone doubt the FSLN motives towards the opposition's non-terrorist sectors, it's wise to consult the FSLN's General Political-Military Platform. After advocating a broad anti-Somoza front including the "bourgeois opposition," FSLN proposes itself as the movement's armed wing. After stating that the FSLN must control the movement, the platform adds that "the bourgeois opposition will be prevented from becoming the political head." So much for those businessmen who hope that FSLN will keep its place in a broad-based provisional regime!

After defeating Somoza, the FSLN advocates no letup in the struggle as "it must not lead us into reformist, nationalist or other kinds of capitalist development." Considering itself a vanguard organization, FSLN will not rest until Nicaragua is transformed into a classical Peoples Republic.

That the FSLN is an international terrorist band is obvious. Supported and in many cases trained in Cuba, endorsed by the Palestine Liberation Organization (PLO) and given refuge in Costa Rica and Panama, FSLN represents a revolutionary whirlwind that, if successful, will bring glory to Havana and Moscow.

At no point since Castro seized power in Cuba 20 years ago, has a Havana-sponsored revolution succeeded anywhere in this hemisphere. While nations such as Allende's Chile were pro-communist, that regime and others were not installed by Castro's revolutionary warfare. For Castro, then, Nicaragua represents a symbol because it was a launching point for the Bay of Pigs invasion of Cuba, and also because Castro propaganda needs a hemispheric victory.

Many of the Latin American revolutionaries lost heart and confidence following Che Guevara's blundered 1967 Bolivian operation. With Guevara dead and the revolutionary precepts of Havana falling on fallow ground in the Americas, Castro had to go to Africa in order to foment troubles. Even there did not succeed by using revolutionary warfare but by using conventional invasions.

Should Castro's FSLN surrogates succeed in Nicaragua, the Americans will feel the effects of increased optimism in the camp of those who admire Cuba and who may be willing to try other similar insurrections in the near future.●

PAUL ROGERS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. UDALL. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following: PAUL ROGERS is leaving, and I am sorry to see him go. PAUL has been one of the very outstanding men I have known here in Congress. He can take some pride in his distin-

guished political career, and as a real fighter in the cause of decent health care for all Americans. Besides being a courageous man, PAUL has a good personality. I shall miss his likable and affable style. And I wish him well.●

THE TRUTH WILL SPEAK FOR ITSELF: THE CONTINUATION OF HUMAN RIGHTS VIOLATIONS IN NORTHERN IRELAND

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. GILMAN. Mr. Speaker, last week I had the pleasure of meeting with Father Raymond Murray and Ms. Rita Mullan to discuss the continuing incidents of human rights violations in Northern Ireland. When I walked away from that meeting, I felt, as I have felt on many occasions, saddened and distressed, because of the lack of knowledge that so many of us have on this issue. It is one of those subjects which no one readily speaks about, and one which is steeped in rumors, falsehoods, and questions.

Mr. Speaker, the flagrant violations of human rights and dignity in Ireland, documented by Amnesty International's Report of June 1978 cannot be allowed to continue. I heard firsthand from Father Murray, chaplain at Armagh Prison for the past 11 years, of the brutality and psychological abuse that suspected violators must endure at the hands of the Royal Ulster Constabulary (RUC), the main auxiliary of British forces in Northern Ireland. The author of several brochures, pamphlets, and books on this subject, Father Murray quietly related the inhuman conditions that the prisoners face daily, stressing the need for a greater awareness on the part of the American Congress about these conditions.

To Americans, the question of Ireland has many aspects. Many Americans of Irish descent, look toward Ireland as their motherland. Other Americans are content to recall the contributions of the Irish on St. Patrick's Day, partaking in celebrations and festivities. And still others who are painfully aware of the plight of Irish prisoners, attempt to call the world's attention to this situation through writing, pleas, and campaigns. It is our duty, as the freest, most democratic nation of this world, to listen, and to act. But we have waited too long to react to the plight of those 5,000 prisoners in Ireland who are being subjected to inhuman and barbarous conditions.

Mr. Speaker, Father Murray spoke this week before our Ad Hoc Committee on Irish Affairs (comprised of 115 Members) and suggested to the Congress mechanisms or action—by raising the public awareness of the problems in Northern Ireland, and by placing pressure upon the President and the British government, these barbarous acts of dehumanization and torture might be stopped. Father Murray explained to us that by seeing each of these prisoners as our brothers, we would be spurred into action.

One of the most startling facts that Father Murray brought to our attention was the ratio of prisoners to inhabitants—Ireland's population being quite small in comparison to other nations, and when compared to the number of prisoners taken in the last several years, we find that the proportion of prisoners to the total population is the highest in the world.

Father Murray, over the past 6 years, has published, along with Dennis Faul and Brian Brady, 16 books outlining the crimes against prisoners in Ireland. No one is more capable of reporting these violations, and no one has more compassion for the scope of human suffering endured at the prisons—Long Kesh, Armagh, Crumlin Road, McGilligan—names which conjure up horror and dread to those who are familiar with their inhumanity and traffic.

This evening I had the opportunity to talk to Leo Fleming of Derry, Ireland, the father of seven children, whose sad tale is an example of the deep and lasting effect that this situation has caused. Two of Mr. Fleming's sons, Paul, age 22, and Leo, age 18, are both imprisoned in Long Kesh as a result of the civil unrest in Ireland. Paul is serving a life sentence for his alleged involvement in a bombing. Leo is serving 10 years for allegedly carrying a firearm. While Paul has been classified as a political prisoner and has visitation rights, Leo is classified as a nonpolitical prisoner and has no such rights. As a result, Mr. Fleming has not seen his son Leo since July 22, 1977.

Unfortunately, the pattern of harassment against the Fleming family does not stop there. Daughter Lynn, age 22, has been arrested 24 times (three times on a single day). Son, Gary, age 20, has been arrested over 30 times. He has been arrested and detained so many times he has lost count.

According to Mr. Fleming, his family members have committed no crimes, have repeatedly been illegally arrested and tried, and remain in jail solely because of political persecution. Can we honestly expect such deep blood wounds to heal over, leaving no scars?

I would lie to focus the attention of my colleagues on some of the brutality in these prisons and holding centers and would like to share with them some of the reports which have emerged from these prisoners. In order to share these reports with my colleagues, I request that these reports which are simply written, straightforward, idiomatic, reflecting the honesty of emotions which the Irish have learned to accept, be printed at this point in the RECORD:

CASE NO. 1

(Mrs. Elizabeth Donnelly, Ardoyne, Belfast, 5 children.)

On Thursday the 6th October 1977 my niece and myself were stopped and searched by the RUC in North Street. We were then asked our name and address and date of birth. I told them my age but refused to give my date of birth. The police woman then told us to get into the jeep as we were being taken to North Queen Street RUC Station. At the station we were told we were being arrested for withholding information, namely our date of birth.

I was then taken into a small room where the police woman again asked my name, address, and date of birth. Still I refused to give my date of birth. When I told the police woman I knew my rights and didn't have to give my date of birth she said—"We are the law and you don't have any rights." Then another police woman entered the room and closed the shutters on the window. She then told me to take off all my clothes. I refused and she went outside the door and told the policeman I wouldn't cooperate. I then heard a policeman saying—"Take the ------ off her." She then came to me and took my shoes off and pulled my trousers down to my ankles then pulled my jumper up over my head and searched around my body. When I asked to get in touch with my solicitor they refused and said when they were finished with me I could see a solicitor. Shortly after I was taken to the reception desk where I was told by a police man that I was not allowed to talk to anyone. A few minutes later I was allowed to go home.

Signed: Mrs. Elizabeth Donnelly.

Witness: Fr. Denis Faul.

Date: 9th October 1977.

CASE NO. 2

(Patricia Moore, Dunmurry. Age 18 years.)

On Wednesday 30th August 1977, I was coming up Castle Street between 3:00 p.m. and 4.00 p.m. I was stopped by a Military Policewoman and she asked me to open my bag. I had a tape recorder in my bag which was switched on by mistake, she also found a letter in my bag which I had found in a telephone box a few minutes beforehand.

I was then arrested and taken to Grand Central Army Post. I was put into a cubicle and then taken out and searched in the toilets. After about two hours I was taken in again and asked if I had anything in my pockets. I emptied my pockets and there was a dead match and a piece of tissue in them; I also had a bracelet on my arm which the Policewoman dragged off me. She was shouting and yelling at me and saying I was a 'suspicious bitch', I did not say a word while this was going on.

I was taken to a room which I took to be a Medical room. A young soldier was in the room when I went in; I think he said he represented the Medical Officer; he asked me about previous illnesses and did I have any scars, also did I want to be medically examined. I said I had no need to be examined. He asked me to sign a form which I did. He went out but the Military Policewoman was still there. He came in again and the two of them giggled and laughed about strip-searching me; he went out again.

Then a black soldier came in and the M.P.W. said "I want her strip-searched"; he just walked out. The young soldier came in again and the M.P.W. said "She's going to be strip-searched and you have to leave." He said something about 'his luck.' He then left and the black soldier came in again; I was standing facing the wall. She (MPW) came over to me and said, "Right, you're going to be strip-searched", with that the black soldier left again. The MPW said "Get your clothes off." I said "No." She said "take them off or I'll get three or four women to take them off for you." I said "Go and get them." She went out for about one minute and came in again with the black soldier. He said "You'd be better to make it easy for yourself." I said "For what reason should I take off my clothes." The MPW said "Because you're a suspicious bitch." I said "I've been searched twice before"; she came towards me and grabbed my coat and tried to pull it off me. I resisted and she pushed me and I banged my head off the wall. She lifted her fist and I thought she was going to hit me and I slapped her face and she then hit me

on the ear. With this the black soldier came in; she told him that I had hit her and that I wouldn't take off my clothes.

She left and came back with two other Women soldiers, one was a Sergeant Major and she said to me 'about making it easier for myself!' I said again that I would not take off my clothes. She asked me again, this time I said I would if some of them left. I took off my clothes, every stitch. I put my shirt and anorak on again quickly but the MPW said, "Who gave you permission to get dressed, you haven't been searched yet" with that she grabbed my anorak and a struggle developed. The black soldier must have heard it and came in again. I struggled and kicked like mad but eventually they managed to get me up onto the table; they put plastic-like handcuffs on my wrists and on my ankles.

The black soldier was holding my arms and he asked one of the women to hold them so he could search me. He said he could not get at me so he took the handcuffs off my ankles and he put his finger inside me; I was crying with the pain; they turned me over and he did it again; during this they were shouting and yelling at me and when I was getting dressed this MPW kept hitting me on the back with her fist. They questioned me again and said they were going to charge me with assault. I thought I was going to be released then, but instead they took me to Castlereagh where I was kept for 24 hours, I was released on Thursday 31st August 1977 at about 8.00 pm.

Signed: Margaret Moore (Mother).
Witnessed: Margaret Gatt (ALJ).

CASE NO. 3

(Castlereagh July 1977. Statement by: Francis McCrory, Beechfield Street, Belfast. Re. His son Patrick McCrory. Presently on remand at Crumlin Road Jail.)

On Friday 8th July at approximately 6 a.m. my house was once again raided by members of the Special Branch, uniformed member of RUC and the Red Caps. After searching my home they announced they found nothing which was incriminating in either a criminal or political sense; they did arrest one of my sons Paul and his friend John who stayed overnight with us. At 9.30 a.m. on the same morning they arrested my son Patrick in Beechfield Street. He was arrested by Red Caps. All three were held at Castlereagh under Section 12 of the PTA. On Saturday 9th July a local Club received a request from the RUC to inform me that my son Patrick had been transferred to the Security Wing of Musgrave Park suffering from abdominal pains and internal bleeding. I rang Ladas Drive, Castlereagh and was advised to go to the Hospital between 7 p.m. and 8 p.m. and I would be permitted to see the boy. I rang Musgrave Park and was told that I could get a visit.

I went to the Hospital and was told by an RUC Sergeant that under no circumstances would I or any of my family or indeed the family Solicitor be permitted to see him. The Solicitor tried and failed also to get in and the Solicitor was then referred to inspector _____ who told him that Patrick was suffering from stomach ulcers. I asked to see the doctor while I was there who told us that Patrick hadn't bled since he came in. When I got back home I got in touch with our own doctor who already knew about everything. The doctor tried to get in, and was told he could indeed see him but that Patrick in the meantime could be shifted back to Ladas Drive so that he would in effect have to make another application to see him. The doctor did so and saw him on Monday. He was allowed to examine him but he was accompanied by two Police Doctors. He observed on examination to have what the Doctor terms as a rebounding phenomenon abrasions to both legs back and front. He asked Patrick how he came to have these. Patrick said he had a fight with his girl. Patrick explained to me later that he was afraid to say that these were caused by RUC and Special Branch and he was afraid of suffering any more. The Doctor also observed that Patrick seemed as if he was still under the influence of medication and said that in no way did he appear to be the same bright boy he had known prior to his arrest. The doctor is willing to give evidence in accordance with these facts. The doctor went on to say that this rebounding phenomenon could be caused by a blow.

I saw Patrick in Townhall Street on Tuesday 12th July. At Townhall St. he told me that a particular Branch man had given him, in the middle of the kicks he was getting from others, one sudden blow in the stomach and immediately blood spurted from his mouth. It was then that the Special Branch man ran away, and shouted for someone to get the Doctor or an ambulance to get him to a hospital. He also told me that he had not been told by a Doctor that he was being discharged. The first intimation of this was when Inspector _____ stated at Mountpottinger came into the room and forcibly removed him from the bed saying "Here boy you're for Ladas Drive again."

He is on remand at Crumlin Jail. My daughter was refused a committal visit. So she saw him on Thursday. He is still very sore and he got a beating by a warder inside Crumlin. On his way out to take a visit he was called a "Murdering B_____."

Signed: Francis McCrory.
Witnessed: Elizabeth F. Murray.
Dated: 17 July 1977.

Amnesty International, that organization which has gained respect throughout the free world, made a report in June of this year, detailing their findings of maltreatment in the Irish prisons. I am inserting into the RECORD at this point, the conclusions and recommendations by Amnesty International:

CONCLUSIONS

1. On the basis of the information available to it, Amnesty International believes that maltreatment of suspected terrorists by the PUC has taken place with sufficient frequency to warrant the establishment of a public inquiry to investigate it.

2. The evidence presented to the mission does not suggest that uniformed members of the RUC are involved in the alleged maltreatment.

3. The evidence presented to the mission suggests that legal provisions, which have eroded the rights of suspects held in connection with terrorist offenses, have helped create the circumstances in which maltreatment of suspects has taken place.

4. The evidence presented to the mission suggests that the machinery for investigating complaints against the police of assault during interview is not adequate.

RECOMMENDATIONS

1. Amnesty International recommends that, for reasons relating to the protection of suspects and police-officers alike, a public and impartial inquiry be established to investigate the allegations of maltreatment.

2. The terms of reference of this inquiry should include consideration of the rules relating to interrogation and detention, admissibility of statements, and the effectiveness of machinery for investigating complaints against the police of assault during interview.

3. The inquiry should have access to all relevant data on individual cases of alleged maltreatment.

4. Pending the establishment and reporting of such an inquiry, Amnesty International recommends that immediate steps should be taken to ensure that suspects being interviewed by the Royal Ulster Constabulary on suspicion of terrorism are protected against possible maltreatment. Measures to this end should include access to lawyers at an early stage of the detention.

Since the issuance of the Amnesty International report, I have not learned of any changes in procedures, conditions, or opinions about the treatment of suspects in Northern Ireland. Nor am I aware of any renewed commitment on the part of the United States to uncover the truth, to level proper sanctions against the wrongdoers, and to insure the human rights of the Irish prisoners. I am aware, however, of the continuing apathy by our Nation in this regard, and the lack of action by the administration. Several Members of this body have stood up to be counted—my esteemed colleague from New York, MARIO BIAGGI, and other members of the 115-member Ad Hoc Committee on Irish Affairs. But we cannot solve this problem alone, what is necessary is the involvement and leadership by our President, by our Irish-American community, and by the rest of the world.

Some 5,000 individuals have been detained, questioned, beaten, abused—and there has been little if any protest. It is about time that the silence of apathy is broken by an outcry of indignation.

Mr. Speaker, I urge my colleagues to take a long, hard look at the Amnesty International report, a document which can have long-lasting effects on this issue of human rights.●

THEY, TOO, WANT TO GO TO ISRAEL

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. HARRIS. Mr. Speaker, the mother is Vina Belkina and her son is Yakov Rachlenko. She is 63 years old and a pensioner in Moscow; he is 28 years old and a janitor. All they want in this world is to leave the Soviet Union and live in Israel. The facts of the case are depressing and I wanted to take this opportunity to inform my colleagues of them, as part of our Vigil for Freedom.

Vina and her two children, Mirra and Yakov Rachlenko, applied to emigrate to Israel in November 1977. Vina and Mirra were granted permission to leave the U.S.S.R. in March 1973, but Yakov was denied permission to leave because "he served in the Army until November 1971."

Vina decided to stay with her son until they both could leave together. Mirra left for Israel in April 1973 and has lived there ever since. She was married in 1975 and is the mother of a beautiful infant daughter—a child she would like her mother and brother to meet and know.

Yakov Rachlenko was trained and worked as a radio engineer. After his refusal in 1973, he lost his job. Now he works as a janitor repairing boilers. It is my understanding that he is living under house arrest.

The situation is deteriorating. Phone conversations in recent months, between Mirra in Israel and her mother in Moscow have been interrupted. Further, the Rachlenko's good friends, Vladimir Slepak and Ida Nudel have been handed harsh sentences and exiled. With the passing of time, Vina's and Yakov's loneliness only grows. They long for a day when they and so many of their friends in Moscow can be reunited with their relatives in Israel.

Mr. Speaker, it is clear to me, that this is another example of a violation of the Helsinki Act. We will not stop pressing until the Soviets honor their commitments and allow families, such as the Rachlenko's, to be reunited.●

CELEBRATION OF NORTH STAR MINISTRIES

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. JOHNSON of California. Mr. Speaker, Dr. Bill Mansdoerfer, president and founder of North Star Ministries of Grass Valley, has been honored recently during the 15th anniversary celebration of the founding of North Star Ministries in Grass Valley.

Dr. Mansdoerfer and his staff have played an important role in the lives of many young people and have helped them to lead a more Christian life. The programs of North Star Ministries are many and varied. Under the capable leadership of Bill Mansdoerfer, these ambitious programs have moved steadily ahead.

Young people, ages 16 to 21, are provided the opportunity to overcome their problems. The principal prerequisite is that the young person must ask for help. After this is accomplished, the orderly rehabilitation of that young person begins. The four keystones of the program are spiritual guidance, hard work, education, and vocational training. The program helps young people to contribute to the conservation of natural resources and at the same time develop an appreciation for those resources.

Mr. Speaker, the Nevada County Board of Supervisors recognized the accomplishments of Dr. Mansdoerfer on the occasion of North Star's 15th anniversary. I would like to include a copy of their resolution of commendation at this point in the RECORD.

The resolution follows:

RESOLUTION

Whereas, Dr. William Mansdoerfer, Founder and President of North Star Intensive Training Center, is deserving of the highest commendation for the outstanding work he has done in helping young persons; and

Whereas, Dr. Mansdoerfer and North Star have worked with Nevada County in assisting in the counseling of runaways and providing a home for them until satisfactory family arrangements could be made; and

Whereas, Dr. Mansdoerfer has worked with Nevada County's Mental Health Board in establishing an excellent mental health program; and

Whereas, Dr. Mansdoerfer has served on the Nevada County Health Planning Council and serves as the County representation on the Regional Health Systems Agency Council; and

Whereas, North Star is an academy and motivational facility to help young people who are troubled; and

Whereas, under the direction of Dr. Mansdoerfer, the North Star Academy has served over 2,000 young people through their education and counseling efforts; and

Whereas, North Star is funded through the private donations of concerned citizens and does not take Federal or State funds; and

Whereas, Dr. Mansdoerfer has been available and deeply involved in suicide prevention in this County; and

Whereas, North Star Hot Line, a telephone answering service to assist those needing someone to listen, has been effective in meeting the needs of hundreds of troubled people; and

Whereas, Dr. Mansdoerfer founded his organization 15 years ago, and established North Star nine years ago in Nevada County and has been an asset to solving the needs of this County.

Now, therefore, be it resolved by the board of supervisors that the members take this opportunity to publicly commend Dr. William Mansdoerfer for the outstanding work he has done, not only in helping today's troubled youth, but also his dedication and untiring efforts to make Nevada County a better County both in health and mental health fields; and

Be it further resolved that Nevada County Board of Supervisors express the hope that Nevada County will continue to benefit of his abilities, experience and expertise for many years to come.

Be it further resolved that the Clerk of the Board of Supervisors transmit a suitably prepared copy of this resolution to Dr. William Mansdoerfer.

LEE METCALF FAIR EMPLOYMENT RESOLUTION

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mrs. SCHROEDER. Mr. Speaker, the House of Representatives can "boast of some connections with the great, of some insanity, and a modicum of idiocy." But it can hardly boast of blazing the trail against employment discrimination.

Congress—often dubbed the "Last Plantation"—has exempted itself from the provisions of title VII of the Civil Rights Act and from the Equal Pay Act. In answer to this situation, the Fair Employment Practices Panel was formed in 1975. We now believe, however, that the time has come to move beyond the voluntary provisions of the fair employment practices agreement and toward binding legislation which will mandate that the House of Representatives become "an equal opportunity employer."

Therefore, today Representative MO UDALL and I are reintroducing the companion measure to Senate Resolution 431, the Lee Metcalf fair employment resolution, which is now awaiting consideration by the full Senate.

To date, 32 Representatives have cosponsored the fair employment resolution. Their names follow:

Representatives Berkely Bedell, William Brodhead, Yvonne B. Burke, Bob Carr, Ronald Dellums, Robert Drinan, Robert Edgar, Don Edwards, Joshua Eilberg, Dante Fascell, Joseph Fischer, Donald Fraser, William Gephardt, William Lehman, and Matthew McHugh.

Representatives Edward Markey, Abner Mikva, Parren Mitchell, Toby Moffett, Stephen Neal, Richard Ottinger, Leon Panetta, Edward Pattison, Charles Rangel, Henry Reuss, John Seiberling, Paul Simon, Newton Steers, Paul Tsongas, Bruce Vento, and James Weaver.●

COLLEGE "DAVID" TAKES ON HEW GOLIATH

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. McDONALD. Mr. Speaker, the Department of Health, Education, and Welfare is going around the country like a large misshapen camel trying to stick its nose under the tent of every college campus in the country. Some small independent colleges have succeeded in keeping the HEW camel out of the tent by refusing to participate in any Federal aid to education programs. However, now on the basis of title IX, requiring there be no sex discrimination, HEW is trying to gain control of the remaining independent schools by refusing to let students attending these schools participate in Federal tuition loan programs. Grove City College in Pennsylvania is currently the target of such an attack. Human Events of September 30, 1978, describes how this occurs and why we should all be concerned over this attack on academic and intellectual freedom in this country.

The article follows:

COLLEGE "DAVID" TAKES ON HEW GOLIATH

(By Hannah Yonan)

Goliath is at it again. Once more a group of private educational institutions is reeling under the Department of Health, Education and Welfare's heavy-handed efforts to expand its power. One of the current victims, along with 12 or so other colleges around this country, is Grove City College, a small private college in western Pennsylvania.

This Christian school—affiliated with, but not controlled by, the United Presbyterian Church—places a strong emphasis on free-market principles and their importance to a dynamic economy. The college offers its 2,200 students quality academic training at one of the lowest tuition rates of any private college in the country ($1,740 plus $1,180 room and board for the 1977–78 academic year).

On Dec. 9, 1977, the Associated Press in Pittsburgh called the public relations office at the college informing it that HEW Secretary Joseph Califano was threatening to cut off federal funds to 10 school districts and 12 colleges throughout the country, including Grove City, if they did not sign forms indicating compliance with Title IX anti-sex discrimination regulations.

This legislation—part of the Education Amendments of 1972—prohibits the exclusion of any person on the basis of sex, from any "educational program or activity receiving federal financial assistance." Under HEW's broad interpretation of Title IX, the agency has issued rules governing almost every aspect of college life, including living facilities, curfews at dormitories, and extracurricular activities such as athletics.

In addition, it has required mixed classes of boys and girls in all courses of instruc-

tion, including physical education, which has been separated traditionally according to sex. Further, the regulations would require "affirmative action" to remedy the effects of so-called past discrimination, though "affirmative action" is not mentioned in Title IX legislation.

Some things need to be clarified.

To begin with, Califano apparently believes that Grove City has been discriminating against women. I am a junior at the college and I, for one, have neither encountered such discrimination nor seen it in evidence. But that is beside the point, since whether Grove City discriminates or not is really none of HEW's business. Congress specifically stated that Title IX applies to an "education program or activity receiving federal financial assistance." Grove City doesn't receive any assistance.

Ever since its creation in 1876, the college has consistently refused to accept even a penny of federal money, knowing full well that such acceptance leads to federal controls.

Nevertheless, Califano and other HEW officials maintain the federal assistance to certain students at Grove City in the form of Basic Opportunity grants or private bank loans guaranteed by the government has the effect of aiding the college and that, therefore, the whole college is a recipient institution and must obey all the federal rules on coed sports, affirmative action etc. As the college sees it, such aid to students is a matter between them and the government. The college itself has maintained no involvement with such funding, except that when a student applies for any grant or financial aid, it certifies that the person is in fact enrolled there.

So, in light of Grove City's experience, one may assume that when a federal worker buys a pound of butter at the corner deli, that deli automatically becomes subject to federal control, since it received federal funds in the transaction.

Grove City has received "Dear Recipient" form letters from HEW in the past. Apparently, since so many institutions of higher learning are recipients of federal largess, the college, it was assumed, also drinks from the federal trough. Said college President Dr. Charles MacKenzie, "When I pointed out that they could not threaten to take away federal aid we did not receive, I was told in strong terms that they would bring us into compliance one way or another."

In January of this year representatives of the college were ordered to appear for its supposed noncompliance before a "departmental administrative judge," an employe of HEW. The college's lawyer for this case, John B. McCroy, said the college does not expect to win the issue while it is within the jurisdiction of HEW, and that it will appeal to the federal courts. Said Dr. MacKenzie, "The trustees have decided to go to the United States Supreme Court to fight for our right to remain independent, if we have to."

And so the struggle goes on, a struggle that not only affects the field of private education, but also virtually every other aspect of American life, down to what seat belts or air bags should be present in cars. Of course, I'm prejudiced. I propose a toast to David. Cheers and Godspeed!●

COMMENDATION

HON. JACK BRINKLEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. BRINKLEY. Mr. Speaker, on the occasion of the retirement of our esteemed colleague, the Honorable JOHN DENT of Pennsylvania, I would like to take this opportunity to commend him for his distinguished service in the U.S. Congress.

His dedication to duty and to his fellow citizens have made him a respected Member of the House of Representatives, and we, who have been privileged to serve with this fine gentleman, gratefully recognize his service. Integrity, honesty, and ability—these are the qualities desired in a Member of Congress, and JOHN possesses them all. We will miss his leadership and his friendship. In Matthew 7:20, we read, "By their fruits ye shall know them." JOHN DENT bears this out, in the best tradition of representative government.●

TRIBUTE TO PAUL G. ROGERS

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 11, 1978

● Mr. CHAPPELL. Mr. Speaker, I regret that PAUL G. ROGERS, one of my colleagues in the Florida delegation is not seeking re-election, and therefore will not be returning after the adjournment of the 95th Congress. Because of his devotion during his 24 years in the House of Representatives, the 11th District of Florida has benefitted in more ways than we could possibly mention here today. I would ask, however, that we in the House pause for a moment to pay tribute to the service, the hard work, and the many accomplishments of the Honorable PAUL G. ROGERS—since 1955, one of Florida's ablest and most respected legislators in the House.

Coming to the House myself in 1968 allowed me to renew an acquaintance with PAUL that began in the 1940's, when we both taught speech, as acting professors at the University of Florida.

Now completing his 12th term in the Congress, PAUL has served the last 8 of those years as chairman of the House Subcommittee on Health and the Environment, of the Committee on Interstate and Foreign Commerce. In this important leadership role, he has earned the title of "Mr. Health" in the U.S. Congress and has gained national recognition and respect as an innovative and hard-working legislator in health-care issues.

Congressman ROGERS has been the leading architect of programs to bring the high costs of hospital care under control and to make our publicly-funded programs for financing health care more efficient, cost-effective, and free of fraud. He has also been a strong advocate of professional review of both the quality and necessity of hospital care paid for by medicaid and medicare, and has developed programs to retire unnecessary hospital facilities and to convert them to other purposes.

One of the major reasons for PAUL ROGERS' phenomenal success in dealing with many of the complex problems of health care is his approach. The ROGERS style invariably enlists the support and assistance of those sectors of the medical education, research, and practicing communities who will be most directly affected. By this means, he has involved those best qualified and equipped to find and implement solutions to health care problems, and has united them in an active partnership with Government—instead of attempting to merely force such changes solely through Federal regulation.

Numerous major health laws bear his mark. PAUL ROGERS has been the driving force behind the National Health Service Corps program, which places critically needed health personnel in medically underserved areas, and the area health education centers program, which provides training and continuing education opportunities for both students and health professionals in community hospitals—thus encouraging physicians to locate their practices in rural areas. In these and other such programs, Congressman ROGERS has consistently sought to improve the overall effectiveness of health planning and to insure health care delivery systems that provide accessible services of good quality and reasonable cost for all citizens throughout the United States.

Health care issues—of such vital concern to every American—will sorely miss the expertise of this respected and conscientious individual. Whoever succeeds PAUL ROGERS as subcommittee chairman will have quite a record to live up to.

We will all miss him—especially me in the Florida delegation. Certainly, his retirement has been more than well earned—and I ask my colleagues to join me in wishing PAUL a full and satisfying retirement. It has been a privilege to serve with a legislator of his caliber and dedication.●

NATIONAL ADVISORY COUNCIL ON MINORITIES IN ENGINEERING

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. MURPHY of New York. Mr. Speaker, a recent address by the chairman of the National Advisory Council on Minorities in Engineering, Mr. Howard C. Kauffmann, to a Washington symposium, outlined the council's concerted effort to bring more minorities into the engineering professions. It includes support programs in universities as well as pre-college prospects, and particularly focuses on the need for more direct involvement of business, Government, educational institutions, and professional organizations to participate in bringing increased opportunities to those minorities who can be directed into the engineering profession.

I would like to commend to my colleagues the remarks, in the hope that they will be inclined to support such goals within their own communities.

The material follows:

ADDRESS BY HOWARD C. KAUFFMANN

The introductory remarks explained the origin of the goal of a tenfold increase in ten years which was endorsed by NACME when it was established by the academy in 1974. That goal has a great deal to recommend it besides symmetry. It is a realistic objective. There was and is every reason to believe that

it can be reached, given a truly nationwide effort. And as we succeed, it will be a large step toward fuller participation of minorities in the mainstream of the private sector.

As we approach the halfway mark in the ten-year program, we can take considerable satisfaction from the results to date. The significant increase in the percentage of minority students in freshman engineering courses unquestionably owes a great deal to the work funded and carried on by the organizations involved in this national effort. I particularly want to acknowledge the outstanding contributions of Reg Jones and Ed Kane, the first and immediate past chairman of NACME. The challenge to measure up to the standard they set is all too clear to me.

For all the accomplishments, of course, there is still much to be done. Phase one of the program established a foundation of teaching and support programs in key colleges and universities which has materially increased the awareness of engineering as a career among minority high school juniors and seniors. The time has now come to begin a second phase, which involves nothing less than a major expansion of the entire program and a strong shift in emphasis to precollege activities aimed at building the supply of qualified and interested applicants. During the next five years of this effort, phase two, the aim will be to generate a "multiplier effect," which is the focus of this symposium.

As the name implies, the "multiplier effect" is something which gives back more than is put in, something which builds on itself and can be more or less self-perpetuating. The trick is to get the process going—and that is going to require renewed efforts from all of us.

This will involve three seperate tasks.

First, we must broaden the membership base of the national organizations involved in the minorities in engineering movement—organizations such as the national fund for minority engineering students and ME³ and NACME. This means an extensive recruiting drive to enlist more members from business, government, educational institutions, professional organizations and minority and community resource groups. And with this expanded representation must come more emphasis on local involvement.

The base for financial support must also be expanded. At the present time, 38 companies and five foundations provide approximately 98 percent of the funds which support national programs to increase minority participation in engineering. Perhaps another 50 companies contribute financial aid through the national fund for minority engineering students, and, of course, others make direct contributions to colleges for this purpose. But this is too narrow a base. It leaves significant potential sources of support untapped, such as the hundreds of companies whose operations and interests are essentially regional. Our goal will be to expand significantly the number of companies supporting the national effort.

Another step in achieving the multiplier effect will be to further extend minorities engineering programs in the pre-college area. While the effort now is concentrated on high school juniors and seniors, there is a need to go as far down as the 7th grade level to reach students when their interests are in the most formative stage. Even modest programs at this level can have great impact in starting youngsters on the road to careers in engineering. We must work with educational systems to ensure that interested youngsters have access to the necessary math and science courses.

Better use can be made of the potential of community and junior colleges as feeder institutions of minority students for the engineering schools. And we should involve more community organizations outside the educational system to help build awareness of engineering career opportunities.

The third task will be to strengthen the programs which are underway, and to ensure that adequate funding is available both for individual students and for program operations. One of the priority needs was underscored by the recent survey of attrition rates made by the retention task force of the committee on minorities in engineering. This study showed that the colleges with the highest retention rates among minority engineering students are those which offer the most complete support programs—including provisions for tutoring and schedule stretchout as well as financial support.

That is the three-part task ahead of us—to broaden the base of support for the national effort, to extend the reach of national minorities engineering programs into schools and community, and to reinforce and expand the programs already underway.

Phase two of our ten-year program is considerably more ambitious than phase one. Some of this is going to be about as many laughs as changing a flat in the Lincoln Tunnel but it has to be done. To achieve our goals, there will need to be improved coordination and more cost-effectiveness in the minorities engineering movement.

All of the national organizations involved will benefit if duplication of effort can be eliminated and the respective roles clearly delineated. This should be a high priority goal throughout phase two in order to efficiently use the available resources and attract additional support.

Careful evaluation of all the programs should be emphasized to ensure that objectives are being achieved and costs are being justified in terms of their real contribution to the total minorities in engineering movement. I encourage contributors of funds to minority engineering programs to make a special effort to evaluate the way these funds are being spent. And I urge those of you who are administering these programs to evaluate your own activities, with particular emphasis on cost-effectiveness.

Corporations' involvement in the national effort can go beyond simply giving money. While contributions to minorities engineering activities are customarily a headquarters concern, company affiliates can be encouraged to help develop programs at the local level. For example, Exxon's activities in the field are currently centered in New York and Houston. We now plan to broaden our involvement and have set Washington, D.C. as our next prime target, working with others to stimulate activities here.

This sort of thing is important in achieving the "multiplier effect" we are striving for. There are numerous other possibilities. More plant visits by student groups can be arranged. Minority engineers on our staffs can appear before high school and junior high school classes as lecturers and role models. Working with local school officials or through the committee, curriculum additions can be suggested to stimulate interest in engineering. And so on. The important thing is to be active, interested participants in the minorities engineering movement, not just passive sources of funds.

Participation means personal participation. The major recruiting campaign about to begin will depend heavily on personal contacts. And I will be requesting various companies to join this national effort through membership in NACME. Your suggestions regarding prospective NACME members are needed as well as the assistance of your personal contact.●

WHY DIRECT SELLERS SHOULD NOT BE COVERED BY PROPOSED FRANCHISE LEGISLATION

HON. ROBERT (BOB) KRUEGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 12, 1978

● Mr. KRUEGER. Mr. Speaker, during this term I sponsored H.R. 9144, designed to protect franchisees from arbitrary terminations and refusals to renew by their franchisors. Representative MIKVA has also sponsored legislation, H.R. 5016, in this area. Since introduction of these measures, I have considered statements made during hearings before the Consumer Protection and Finance Subcommittee and have had discussions with members of various industries affected by these legislative proposals. As a result, it has become clear to me that the definitions of "franchise" used in these bills encompass business relationships not traditionally regarded as franchise arrangements nor lending themselves to the abuses sought to be corrected. In this connection, the antitrust section of the American Bar Association has pointed out in its report on proposed Federal franchise legislation:

> Because circumstances may be so different from industry to industry, and even among different distribution relationships within a particular industry, Congress should proceed very cautiously in developing uniform procedures and remedies which will apply across the board to all relationships that fall within a broadly framed statutory definition of "franchising." Congress should carefully examine the problems which allegedly exist, and the abuses which allegedly have occurred in franchising relationships, in order to determine the extent to which such problems and abuses have resulted from the utilization of particular types of distribution techniques or franchise agreements (or particular contractual provisions in such agreements).
>
> Any legislation which is enacted should be tailored to solve those specific common problems; and eliminate those specific common abuses, which are deemed sufficiently serious to warrant Congressional action. Such an approach would avoid the enactment of broad legislative provisions which may be totally inappropriate for many of the varied distribution methods which might be affected thereby, and also would make it more practical for the diverse industries affected by any proposed legislation to comment more meaningfully on the need for, and potential impact of, such legislation.

One industry to which franchise termination legislation seems particularly inapplicable is direct selling. As now written the overly broad definition in these proposals could be interpreted to cover some relationships within this industry. These are not franchise relationships under the commonly understood meaning of that terms. The problems identified as giving rise to this legislation do not exist within the direct sales industry, in which the common denominator is that sales are personally conducted away from fixed business locations, most often in the consumer's home. For most of the approximately 4.5 million persons

engaged in this industry annually, direct selling serves basically as a supplemental income source and the turnover rate exceeds 100 percent per annum. Many people sell for many years for the same company, some full time, others for only a few weeks per year. Generally speaking, there are no required investments, quotas, territorial restrictions, or controls over members of the direct selling distribution systems.

Because of the frequent and voluntary interruption of selling activities by individual direct sellers, formal termination procedures pursuant to legislative mandate would be expensive, administratively burdensome, and unnecessary for this industry.

In the event of further activity in the area of franchise termination legislation, I urge my colleagues to carefully consider my remarks and the cautionary views of the American Bar Association which I have quoted.●

DISABILITY AWARENESS WEEK

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. EDWARDS of California. Mr. Speaker, I would like to take this opportunity to note that October 14–21 has been designated Disability Awareness Week in the State of California. Organized by the California Department of Rehabilitation, this week has been set aside to focus public attention on the special concerns faced by disabled members of our population.

The situation that confronts disabled individuals in our society has largely been ignored for many years. However, there has been encouraging awareness recently of the rights and concerns of the physically handicapped. This growing public attention has been translated into numerous public programs and laws to improve the conditions relating to such basic issues as job opportunity and lifestyle. Recent laws on both the State and Federal levels have been enacted to deal with these areas, most notably section 504 of the Rehabilitation Act of 1973, which specifically addresses the civil rights of the handicapped. This act has been hailed by HEW Secretary Califano as—

> The first federal civil rights law protecting the rights of handicapped persons and reflecting a national commitment to end discrimination on the basis of handicap.

Implementation of section 504 has led to important progress in many areas of concern to the disabled—accessible transportation systems, design improvements and modification of buildings, and schools which place emphasis on the special learning needs of the disabled. Just as vital has been growing recognition of the important societal contributions to be made by handicapped individuals.

Activities planned for California's Disability Awareness Week will involve individuals representing many different viewpoints. Government staffers, social service workers, lawyers, and handicapped participants will all take part in events located around the State such as seminars, workshops, and discussion groups. Approximately 500 to 1,000 persons are expected to participate in these functions, as well as in the Action 504 conference on the human and legal rights of individuals with disabilities. Speakers include Max Cleland of the Veterans' Administration, Mario Obledo of the department of health and welfare, and Ed Roberts of the department of rehabilitation. On October 19 and 20, the Action Equalization conference will discuss various methods of integrating people and services to better serve the disabled.

Once again, I offer my support for a productive and successful Disability Action Week.●

EQUAL OPPORTUNITY IN FEDERAL EMPLOYMENT ACT OF 1978

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978

● Mr. STEERS. Mr. Speaker, I am today introducing legislation known as the Equal Opportunity in Federal Employment Act of 1978. The purpose of the measure is to insure that Equal Employment Opportunity (EEO) programs at the Federal level have the kind of support that is necessary to deal, in a meaningful way, with job discrimination.

My interest in this proposal stems from my experience in trying to deal with what I believed to be inadequate attention given to EEO efforts by the Department of Health, Education, and Welfare (HEW). I had received reports that the EEO effort at HEW was in real trouble. It lacked leadership and it lacked any real power, or "clout," within the Department. In fact, no one person was in charge of the program. Further, a series of proposed downgradings for EEO personnel, without similar downgradings for other programs at the same level, made it clear that EEO staffs had been singled out for reduced stature, thereby leaving them with reduced clout.

On November 15, 1977, I wrote to HEW Secretary Califano on the matter. An analysis of the HEW response indicated to me that my concerns were entirely justified. I again wrote the Secretary on July 25, 1978. His response to that letter, which I received 3 days ago, still only partially addresses the problem of how to make EEO programs effective tools to bring about true equal opportunity in Federal employment.

Consequently, I am introducing this measure in an effort to be sure that our stated commitment to equal employment opportunity is matched with the staffs and resources necessary to do the job.

Simply put, the Equal Opportunity in Federal Employment Act of 1978 would mandate, by statute as opposed to regulation, not only that EEO programs be established in each "department, agency, and unit" of the Government, but also that the directors and staffs of those programs have sufficient stature, in terms of grade level and rank within their departments and agencies, to perform their jobs effectively. It does little good to have an EEO program if those persons charged with running the program, due to their grade and rank within the bureaucracy, have no power and have no direct access to those who do have the power. My proposal is aimed at resolving that problem once and for all. By establishing these programs by statute, as opposed to departmental regulation as is presently the case, we can help bring about an EEO effort which is not subject to various degrees of emphasis in various departments. The relative importance given EEO would no longer be subject to temporary, political whims of various administrators.

Mr. Speaker, the goal of equal employment opportunity in the Federal Government has been set. It is both a worthy and essential one. This type of legislation would bring us a step closer to insuring that we meet that goal. I hope that it will be given careful attention, and after due consideration, approval.●

CIRCULAR LETTERS OF CONGRESSMEN TO THEIR CONSTITUENTS: 1789–1829

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 13, 1978
